**Commentary.** One of the more available patterns, with perhaps three dozen known survivors. The base of an errant 1 is visible to the left of the date on all examples seen of this issue. An early auction appearance was in the Idler Collection (Haseltine, 4/1870), lot 233. Idler was one of the main outlets for the sale of numismatic delicacies from the Mint.

**Physical Description.** A well-preserved example of this popular pattern. A sharp strike, with reflective fields accented by wisps of gold and champagne toning. **NGC Census:** 4 in PR66; one PR66 Cameo finer. **PCGS Population:** 3 in PR65, none finer (12/08).

**Provenance.** *Ex: Gibson Groves Collection (Stack's, 11/1974), lot 449; Kennedy Collection (Stack's, 12/1980), lot 448; Public Coin Auction (Stack's, 10/1986), lot 308.*

## Desirable 1866 Nickel Pattern Judd-462, PR63 Brown

**1652 1866 Five Cents, Judd-462, Pollock-536, Low R.7, PR63 Brown NGC.**

**Design.** The obverse features a portrait of Washington facing right with UNITED STATES OF AMERICA around and the date below. The reverse has the denomination 5 CENTS centered in a laurel wreath, with the motto IN GOD WE TRUST above. Struck in copper with a plain edge.

**Commentary.** The base of an errant 1 shows to the left of the date on all examples seen of this issue. USPatterns.com estimates a population of fewer than a dozen pieces extant. An early appearance of Judd-462 was in the Parmelee Sale (New York Coin & Stamp, 6/1890), lot 163. The cataloger mistakenly identified that specimen as a bronze piece.

**Physical Description.** An attractive specimen of this rare pattern. Iridescent crimson-red and lavender toning contributes to the exceptional eye appeal. Scattered handling marks define the grade. **NGC Census:** 1 in PR63 Brown, 3 finer. **PCGS Population:** None in PR63 Brown; one in PR63 Red and Brown; three finer (12/08).

**Provenance.** *Unknown.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#60657)

## Finest Certified 1866 Washington Five Cent Pattern Struck in Copper Judd-465, PR64 Red and Brown

**1653 1866 Five Cents, Judd-465, Pollock-559, R.8, PR64 Red and Brown NGC.**

**Design.** The obverse features the familiar bust of Washington facing right, with IN GOD WE TRUST above and the date below. The reverse displays a "crooked" or "Dutch" style 5, centered in a laurel wreath, with UNITED STATES OF AMERICA around. Struck in copper with a plain edge.

**Commentary.** A popular design, with companion patterns in nickel and bronze. This issue is exceedingly rare in copper. A search of auction records reveals that Heritage has not auctioned an example of Judd-465 in the last decade. This particular coin was auctioned in a Stack's sale in 1992, where the catalogers noted, "An ultra-rare pattern with no traceable auction records in this century."

**Physical Description.** Deeply mirrored fields show under lovely lilac toning with most of the original red luster still present. Strongly impressed devices, with crisp detail in all areas. A small, round dot accompanies the usual center dot, and can be used as a pedigree marker. The sole example certified at NGC, while PCGS has graded a single PR63 Brown piece (11/08).

**Provenance.** *Ex: The Winter Collection (Stack's, 1/1992), lot 623, which realized $18,700.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#70660)

## High-End Washington Five Cent Pattern Struck in Bronze Judd-469, PR64 Red and Brown

1654 **1866 Five Cents, Judd-469, Pollock-561, Low R.7, PR64 Red and Brown NGC.**

**Design.** The obverse showcases the popular bust of Washington facing right, with IN GOD WE TRUST above and the date below. The reverse shows a tall 5 centered in a rather sparse laurel wreath, with UNITED STATES OF AMERICA around. Struck in bronze with a plain edge.

**Commentary.** This example represents one of the many Washington five cent patterns of 1866. Washingtonia was a very popular numismatic specialty in the mid-19th century. Robert Coulton Davis listed this pattern as number 217 in his seminal work on patterns in *The Coin Collector's Journal*.

**Physical Description.** Sharply struck, with extraordinary detail on the hair. Attractive, original red luster remains with traces of lilac in the fields. Very challenging at the near-Gem level. This piece is tied for the finest graded by NGC (11/08). PCGS has graded two specimens at this level, with one PR65 Brown finer.

**Provenance.** *Ex: 306th Sale (Kagin, 4/1975), lot 8; Fall Sale (Paramount, 10/1986), lot 389.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#70665)

## Historic 1866 Washington Five Cent Pattern Struck in Nickel Judd-470, PR64 Cameo

1655 **1866 Five Cents, Judd-470, Pollock-562, Low R.6, PR64 Cameo NGC.**

**Design.** On the obverse, a portrait of George Washington faces right, the legend IN GOD WE TRUST above, and the date below. A wreath of laurel on the reverse encloses the so-called Short 5, with the legend UNITED STATES OF AMERICA around. Struck in nickel, with a plain edge.

**Commentary.** Collecting Washingtonia was extremely popular in the 1850s and 1860s. Mint Director James Ross Snowden was particularly anxious to obtain needed specimens for the Mint Cabinet. The large number of Washington five cent patterns created in 1866 may have originated with this trend in mind. USPatterns.com estimates a population of fewer than 12 survivors.

**Physical Description.** An attractive, near-Gem example of this popular pattern. The fields are well mirrored and the devices sharply defined. A small number of contact marks are scattered about the fields, consistent with the grade. Above-average eye appeal. **NGC Census:** 1 in PR64 Cameo, 4 finer. **PCGS Population:** 5 in PR64, 8 finer, none as a Cameo in any grade (12/08).

**Provenance.** *Ex: Stack's private treaty transaction.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#60666)

## Popular Washington Five Cent Nickel, Judd-473, PR64

**1656 1866 Five Cents, Judd-473, Pollock-564, Low R.6, PR64 NGC.**

**Design.** Obverse: Washington portrait facing right, with IN GOD WE TRUST above and date below. Reverse: Regular With Rays design adopted for the year. Struck in nickel with a plain edge.

**Commentary.** Washingtonia was one of the most popular areas of American numismatics during the middle part of the 19th century. This popularity is reflected in the number of Washington patterns created for the new five cent coin in 1866. Including off-metal issues, 40 different patterns were produced.

**Physical Description.** The coin is fully struck, with crisp detail on all device elements. The surfaces have the granular quality often seen on this issue—due to the hardness of the nickel planchets—with pale golden-rose toning overall. An attractive, popular pattern. **NGC Census:** 1 in PR64, 3 finer. **PCGS Population:** 10 in PR64, 6 finer (12/08).

**Provenance.** *Ex: Stack's private treaty transaction.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#60669)

## Popular 1866 Washington Five Cent Nickel, Judd-481, Proof

**1657 1866 Five Cents, Judd-481, Pollock-571, Low R.7—Spot Removed—NCS. Proof.**

**Design.** A head of Washington faces right on the obverse, with the date below and GOD AND OUR COUNTRY around. The final 6 in the date is much larger than the first 6 and is apparently recut at least once. The reverse has a large 5 within a laurel wreath with UNITED STATES OF AMERICA around. Struck in nickel with a plain edge.

**Commentary.** There are probably 10 to 12 examples of Judd-481 known. The die pairing is also known in copper (Judd-482) with about five or six known. This pattern issue was undoubtedly struck for sale to collectors, given the extreme interest in all things Washington during the 1860s.

**Physical Description.** The obverse has light champagne toning over light gray surfaces, with extensive swirling hairlines. The reverse is lighter gray with similar hairlines, and an obvious spot that was removed near the right ribbon end.

**Provenance.** *Ex: Stack's (10/2003), lot 1030.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#60677)

## Popular 1866 Lincoln Five Cent Copper Pattern, Judd-487, PR62 Brown

1658 **1866 Five Cents, Judd-487, Pollock-576, Low R.7, PR62 Brown NGC.**

**Design.** The obverse centers around the bust of Lincoln in profile, facing right. The legend UNITED STATES OF AMERICA circles the bust above, with the date below. The reverse shows the denominational figure 5 above the word CENTS, encircled by a large wreath, with IN GOD WE TRUST above. Struck in copper with a plain edge.

**Commentary.** The currently offered pattern was a sentimental favorite with collectors when it was created. Lincoln was martyred the year before, and memories of him were still fresh in the public mind. The issue is the only pattern design featuring an image of Lincoln produced in the 19th century.

**Physical Description.** Reflective proof surfaces under attractive russet, gold, and blue toning. The fields show only a moderate number of handling marks for the grade. The issue was struck on thin planchets (58 grains) and thick planchets (72 grains). The present example is a thin planchet, weighing in at 60 grains. **NGC Census:** 1 in PR62 Brown, 1 finer. **PCGS Population:** None in PR62 Brown, 4 finer (12/08).

**Provenance.** *Ex: Stack's private treaty transaction.*
*From The Lemus Collection, Queller Family Collection Part Two.*(#60683)

# High-End 1866 Shield Nickel Pattern
# Judd-490, PR66 Brown

1659 **1866 Shield Five Cents, Judd-490, Pollock-578, Low R.7, PR66 Brown NGC.**

**Design.** Obverse similar to the adopted design. Heraldic shield with arrows, topped by a cross, with laurel clusters down both sides. The shield is low in the field, and the date is divided by the ball of the shield. The motto IN GOD WE TRUST is above the shield, in small letters. The reverse shows a Knobbed or "Dutch" 5 centered in a laurel wreath, with UNITED STATES OF AMERICA around the rim. Struck in copper with a plain edge.

**Commentary.** The issue has been widely collected since Robert Coulton Davis first described it in *The Coin Collector's Journal* in 1885 (Davis 225). Collectors recognized the combination of rarity and affordability represented by the coin early on. Specimens are known on both thick planchets (71 grains) and thin planchets (55 grains). This example is a thin planchet, weighing in at 55.2 grains. Hobbyist Lou Butterfield discovered an interesting cutting error on the obverse die. The remains of a letter T can be seen in the field, to the right of the motto. The second laurel leaf points to the base of the partially effaced T. Saul Teichman believes that the engraver initially positioned the motto too far to the right on the die. The error was noticed and corrected, leaving the telltale letter as a remnant (see USPatterns.com for photograph and discussion).

**Physical Description.** The coin features a remarkably strong strike, with all details of the design elements fully brought up. The fields are fully reflective, under attractive shades of cerulean-blue and an accent of red-violet. The surfaces are free of distractions and complement the crisp detail of the devices. Fantastic eye appeal. **NGC Census:** 2 in PR66 Brown, 1 finer. **PCGS Population:** 2 in PR65 Red and Brown; none finer (12/08).

**Provenance.** *Ex: Crouch Collection (Superior, 6/1977), lot 195; Hoffman Collection (Melnick, 11/1982), lot 42.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#60686)

## 1866 Shield Nickel Pattern
## Judd-495, PR64 Brown Ex: Farouk

1660 **1866 Shield Five Cents, Judd-495, Pollock-582, High R.7, PR64 Brown NGC.**

**Design.** The obverse design features the familiar heraldic shield with arrows, cross, and laurel branches. The shield is low in the field and divides the date 18-66. The motto IN GOD WE TRUST is engraved in small letters above the shield. The reverse shows a short numeral 5, centered in a thick laurel wreath, with the legend UNITED STATES OF AMERICA around. Struck in copper with a plain edge.

**Commentary.** The Act of May 17, 1866 authorized a new five cent coin. Many patterns were devised in the search for a new coin design. The present example displays the Union Shield obverse, similar to the design used on the two cent coin of 1864. This design closely resembles the obverse adopted for business strikes, which began to appear in the summer of 1866.

This coin boasts an illustrious pedigree, appearing in some of the most important collections of the 20th century. The issue is extremely rare, and years often pass between auction appearances.

**Physical Description.** The present coin has a strong strike, with crisp detail in all devices. The reflective fields are accented by attractive shades of crimson and electric blue toning. The surfaces have relatively few handling marks for the grade, and eye appeal is excellent. A few small handling marks on the loop of the 5 provide a pedigree marker. Census: 3 in 64 Brown, 0 finer (11/08). PCGS has graded one finer, a 65 Brown.

**Provenance.** *Ex: J. Brenner; F.C.C. Boyd; King Farouk; Palace Collections of Egypt (Sotheby's, 2/1954), lot 1800; Hirt (Pine Tree, 11/1975), lot 249; Auction '84 (Superior, 7/1984), lot 492.*
*From The Lemus Collection, Queller Family Collection Part Two.*(#60691)

# Finest Certified 1866 Shield Five Cent in Copper, R.8, Judd-502, PR66 Brown

1661 **1866 Shield Five Cents, Judd-502, Pollock-588, R.8, PR66 Brown NGC.**

**Design.** The central feature of the obverse design is a heraldic shield with arrows, topped by a small cross, with clusters of laurel leaves draped on each side. The motto IN GOD WE TRUST appears above the shield, the date below. This is the same design adopted for business strike shield nickels of 1866. The reverse design has a tall numeral 5 enclosed within a laurel wreath and the legend UNITED STATES OF AMERICA around the rim. Struck in copper with a plain edge.

**Commentary.** Judd-502 is an extremely rare pattern, with only three auction appearances since 1990. In *The Complete Guide To Shield & Liberty Head Nickels*, Peters and Mohon listed only two auction appearances for the period from 1972-1993. Don Taxay believed only two survivors were extant, but this appears to be a third example. Robert Coulton Davis was aware of the issue in 1885, when he wrote his pioneering work on patterns in *The Coin Collector's Journal*. The variety was listed under number 229 of Davis' compilation. Examples of the design were also struck in nickel and bronze. Davis owned a specimen of the design in all three metals. When his collection was auctioned by the New York Coin and Stamp Company in 1890, the three varieties were sold together as lot 1095. Davis probably acquired the coins through his excellent connections at the Mint.

**Physical Description.** Fully struck, with exquisite detail in all the design elements. Deeply reflective fields show under beautiful shades of golden-brown and cerulean blue toning. The surfaces are virtually free of distractions. The finest Brown example certified by NGC or PCGS (11/08).

**Provenance.** *Ex: Hoffman (Melnick, 11/1982), lot 43.*
*From The Lemus Collection, Queller Family Collection Part Two.*
(#60698)

## Elusive 1866 Shield, No Rays Transitional Five Cent Pattern Struck in Copper Judd-508, PR64 Brown

1662 **1866 Shield Five Cents, Judd-508, Pollock-592, High R.6, PR64 Brown NGC.**

**Design.** The obverse features the standard design used to strike regular-issue Shield nickels in 1866. The reverse die is the No Rays design adopted for use in 1867. Struck in copper with a plain edge.

**Commentary.** An important transitional pattern. Striking problems with the reverse used in 1866 necessitated the removal of the rays between the stars. The new reverse was adopted in mid-1867, so there are two major Shield nickel varieties in that year.

**Physical Description.** Sharply struck, with fine detail on all devices. Iridescent lavender, blue, and green toning over reflective proof surfaces. The fields are remarkably free of handling marks, with only a reverse scratch near the UN in UNITED noted for pedigree purposes. **NGC Census:** NGC has certified four PR64 Brown including this piece, with two PR65 Red and Browns and a PR66 Brown finer. **PCGS Population:** 1 in PR64 Brown, 8 finer (12/08).

**Provenance.** *Ex: Nate Smith Collection (Stack's, 3/1973), lot 440. From The Lemus Collection, Queller Family Collection Part Two.* (#60704)

## Possibly Unique 1866 Washington Five Cent Pattern Struck in Brass Judd-519, PR64

1663 **1866 Five Cents, Judd-519, Pollock-546, R.8, PR64 NGC.**

**Design.** Obverse: Washington portrait facing left with UNITED STATES OF AMERICA around and date below. Reverse: the Without Rays dies adopted for regular-issue coinage in 1867. Struck in brass with a plain edge.

**Commentary.** The muling of these dies resulted in the curious display of the legend UNITED STATES OF AMERICA on both sides of the coin. The coin was struck outside the Mint from genuine dies. The issue was unknown to R.C. Davis when he published his research in *The Coin Collector's Journal*, and USPatterns.com believes the coin to be unique in brass.

**Physical Description.** The coin is struck on a nonstandard planchet. It has a diameter of 21 mm, a thickness of 3 mm, and weighs 115.4 grains. The sharply struck surfaces have the yellow-green underlying color of brass with a significant overlay of brown patina. **NGC Census:** This is the only Judd-519 certified in any grade. **PCGS Population:** None (12/08).

**Provenance.** *Ex: Crosby Collection (Haseltine, 6/1883), lot 1793; Judson Brenner (1914 ANS Exhibit);* Rare Coin Review *21 and 22 (Bowers and Ruddy, 1974), pp. 43 and 80; 65th Anniversary Sale (Stack's, 10/2000), lot 1599; Stack's private treaty transaction. From The Lemus Collection, Queller Family Collection Part Two.* (#60716)

# Ultra-Rare 1866 Nickel Pattern Judd-521, PR61

1664 **1866 Five Cents, Judd-521, Pollock-549, R.8, PR61 NGC.**

**Design.** A fantastic muling of two obverse dies, originally used on Judd-461 and Judd-464, to create a two-headed coin. Obverse: Portrait of Washington, with the legend UNITED STATES OF AMERICA around, and the date below. Reverse: Bust of Washington, with the motto IN GOD WE TRUST above, and the date below. Struck slightly off-center, in silver, with a plain edge.

**Commentary.** This extremely rare issue was struck from genuine Mint dies, but was almost certainly not struck in the Mint. Specimens of this design have been reported on nonstandard planchets in a bewildering variety of metals. The present coin has a diameter of 0.850 inches, far larger than a standard nickel (0.808 inches-0.811 inches). The large diameter and the slightly off-center strike of this example indicate that it was not struck with a close collar. Since close collar technology was used for all issues at the Mint in 1866, it is most unlikely that the coin was produced there. In addition, the use of an expensive metal, like silver, to test the dies for a nickel coin was not standard Mint procedure.

The collector most often associated with unofficial restrikes using Mint dies was Joseph Mickley, because a number of these dies were seized by the government at the posthumous sale of his collection (Mason, 11/1878), lot 917. Mickley may have been the person responsible for producing the present coin, but there is room for doubt. The dies used to strike the present issue were absent from among those seized at the Mickley sale. Dr. George Fuld relates that the dies used for this mule were donated to the Boston Numismatic Society sometime between 1869 and 1878 (see *The Numismatist*, 5/1998). Mickley may or may not have been the donor. Fuld reports that the dies were destroyed only in 1956, affording ample opportunity for someone other than Mickley to make the restrikes. An example was sold in the Crosby Collection (Haseltine, 6/1883), lot 1776. Sylvester S. Crosby had close ties to the Boston Numismatic Society, making him a viable candidate for restrike honors. Whoever produced the restrikes made only a few of them. Experts can account for only three survivors today. Both NGC and PCGS have certified one coin at the PR61 level, with none finer (11/08).

**Physical Description.** The obverse is sharply struck, with crisp detail on the portrait. Several die striations are noted, but few handling marks. The reverse displays prooflike surfaces and a particularly sharp strike. Two planchet flaws are noted, one at the rim at 6 o'clock, and the other in the field near the neck. A beautiful prize for the collector of Washingtonia or the pattern specialist.

**Provenance.** *Ex:* Rare Coin Review *No. 21 (Bowers and Ruddy, 1974), p. 43; River Oaks Collection (Bowers and Ruddy, 11/1976), lot 298; Public Auction Sale (Stack's, 1/1987), lot 503.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#60718)

# Very Rare 1866 Seated Dime Pattern Struck in Nickel
# Judd-534, PR64

1665 **1866 Ten Cents, Judd-534, Pollock-599, High R.7, PR64 NGC.**

**Design.** Both obverse and reverse dies are the familiar design used to strike regular-issue dimes in 1866. Struck in nickel with a reeded edge.

**Commentary.** This design was reportedly struck in two compositions, nickel and silver-nickel. Modern researchers doubt that the silver-nickel coins exist (see USPatterns.com). Robert Coulton Davis listed the issue as number 232 in his pioneering work on patterns. Davis indicated that the pattern was struck in nickel, and made no mention of the silver-nickel alloy. An early auction appearance of the pattern was in the Parmelee Collection (New York Coin and Stamp, 6/1890), lot 159. The lot description reads, "1866 Dime: same as regular issue, but in silver-nickel alloy: proof; rare." It is possible that the Parmelee description is the source of the silver-nickel composition story. William Woodin purchased coins at the Parmelee sale, and the piece may have ended up in his collection. Adams and Woodin picked up the silver-nickel alloy story and listed the variety as number 540 in their 1913 work on patterns. The issue has been listed in pattern references ever since. Testing of known specimens needs to be done to settle this question. Experts estimate less than six examples are extant.

**Physical Description.** Brilliant, lightly toned surfaces. The strike is a little soft on Liberty's head and on the reverse bow, as often seen on this issue. Nickel is a hard metal, and striking difficulties are common on nickel coins. Only a few handling marks in the fields, better than average for the grade. **NGC Census:** Three coins total, all grading PR64, one of which is designated as a Cameo. **PCGS Population:** Two coins, both graded PR64 (12/08).

**Provenance.** *Ex: Jerry Buss (Superior, 1/1985) lot 559; L.W. Hoffecker Collection (Superior, 2/1987), lot 946a.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#60732)

## Attractive 1866 Liberty Seated Dollar Pattern in Copper Judd-541, PR64 Brown

1666 **1866 Dollar, Judd-541, Pollock-606, Low R.6, PR64 Brown NGC.**

**Design.** The familiar Liberty Seated design, with the scroll and motto IN GOD WE TRUST added to the reverse. Both obverse and reverse designs were adopted to coin regular-issue 1866 silver dollars. Struck in copper with a reeded edge.

**Commentary.** In 1866 the design of the quarter, half dollar, and silver dollar were altered to include the motto IN GOD WE TRUST, as required by the Act of March 3, 1865. Current data indicate approximately 30 examples of Judd-541 are extant, a larger number than would normally be necessary to test the dies. It seems likely that some pieces were produced to satisfy demand from favored collectors. The issue occurs with both thin and thick planchets and varying weights. The present example is a thick planchet, weighing 386.8 grains.

**Physical Description.** Sharply struck, with crisp detail in all areas. The surfaces exhibit attractive reddish-brown and olive toning. A few unobtrusive marks are consistent with the grade. **NGC Census:** 5 in PR64 Brown, 5 finer. **PCGS Population:** 1 in PR64 Brown; 5 finer (12/08).

**Provenance.** *Ex: Thomas Elder, 5/1938; The December Sale (Stack's, 12/1987), lot 1027.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#60739)

## Popular 1867 Indian Princess Five Cent Aluminum Pattern Judd-561, PR64

1667 **1867 Five Cents, Judd-561, Pollock-622, R.5, PR64 NGC.**

**Design.** The central obverse device is a head of Liberty facing left, wearing a headdress of four large feathers and a ribbon with the inscription UNION AND LIBERTY. Resting in the hair in front of the ribbon are four large stars. The chief engraver's name LONGACRE F. is stylishly displayed at the truncation of the neck. The legend UNITED STATES OF AMERICA around, with the date in the exergue. The reverse features a Roman numeral V over an ornate shield, with IN GOD WE TRUST at the top. Struck in aluminum with a plain edge.

**Commentary.** The beautiful obverse design has much in common with Longacre's contemporary designs for the Indian Head cent, one and three dollar gold coins. The reverse design resembles a combination of the Shield nickel obverse and the reverse of the Liberty Head nickel. If this design had been adopted, the Mint could potentially have faced the same gilded counterfeit problems that later occurred with the No Cents nickel in 1883.

**Physical Description.** Bright reflective fields contrast with strongly impressed devices. A few, scattered handling marks are consistent with the grade. **NGC Census:** 4 in PR64, 2 in PR64 Cameo, none finer. **PCGS Population:** 14 in PR64, 5 finer (12/08).

**Provenance.** *Ex: Casterline and Hall Collections (Superior, 5/1989), lot 1136.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#60771)

## Pleasing 1867 Coronet Five Cent Nickel Judd-566, PR65

1668 **1867 Five Cents, Judd-566, Pollock-627, Low R.6, PR65 NGC.**

**Design.** The obverse features a bust of Liberty facing left, wearing a coronet, surrounded by the legend and date. The denomination is within a laurel wreath that is close to the edges on the reverse, with a tiny IN GOD WE TRUST above. CENTS is in a straight line. Struck in nickel with a plain edge.

**Commentary.** Judd-566 rates as one of the more plentiful five cent patterns of the 1865 to 1867 period, with about two dozen known. In addition to the patterns struck in nickel, examples were also struck in copper with only about half a dozen known.
**Physical Description.** Brilliant light gray surfaces with faint champagne toning have satiny luster rather than the deeply mirrored appearance of most proof patterns. A few faint hairlines and contact marks over striated surfaces prevent a higher grade. **NGC Census:** 3 in PR65, 4 finer. **PCGS Population:** 4 in PR65, 1 finer (12/08).

**Provenance.** *Ex: Stack's private treaty.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#60776)

## Elegant 1867 Coronet Five Cent Pattern Struck in Nickel Judd-570, PR65 Ultra Cameo

1669 **1867 Five Cents, Judd-570, Pollock-638, R.5, PR65 Ultra Cameo NGC.**

**Design.** A bust of Liberty wearing a coronet and facing left dominates the obverse design. UNITED STATES OF AMERICA is around the periphery with the date below. The top of the 7 is distant from the curl. The reverse shows 5 CENTS centered within a laurel wreath with the motto IN GOD WE TRUST at the top. CENTS is in a curved line. Struck in nickel with a plain edge.

**Commentary.** A relatively plentiful pattern variety with more than 30 examples known, according to the R.5 rarity rating. In addition to these nickel patterns, this die combination was also struck in copper, with only four or five known.

**Physical Description.** A remarkable brilliant light gray proof, especially in the nickel composition, with exceptional cameo contrast on both sides. A few tiny spots and faint contact marks on each side are of little concern to the overall presentation. **NGC Census:** 1 in PR65 Ultra Cameo; 4 numerically finer, three of which are also Ultra Cameos. **PCGS Population:** 5 in PR65, three of which are Cameos; none finer, and no Deep Cameos in any grade (12/08).

**Provenance.** *Unknown.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#60780)

## Comely 1867 Copper Seated Dollar
## Judd-592, PR62 Brown

1670 **1867 Dollar, Judd-592, Pollock-656, Low R.7, PR62 Brown NGC.**

**Design.** Struck from the regular issue dies for the 1867 With Motto Seated Liberty dollar. Struck in copper with a reeded edge.

**Commentary.** Probably between six and 12 examples are known, based on current auction records. The number of appearances in recent auctions suggests that the number of survivors is close to the top of the range, perhaps 10 to 12 pieces. The reverse die has a distinctive die line in the ribbon, beginning at the upper edge above the right top of the N of IN and ending at the lower edge below the D in GOD, that appears on the reverse of regular-issue proof dollars from 1866 to at least 1870.

**Physical Description.** Olive-brown surfaces exhibit mildly reflective proof mirrors with some splashes of light copper that suggest this piece may have been cleaned and retoned. The surfaces have faint hairlines, tiny contact marks, and traces of corrosion on the reverse. **NGC Census:** 1 in PR62, 9 finer. **PCGS Population:** None in PR62, 4 finer (12/08).

**Provenance.** *New Millennium Collection; Heritage (11/2003), lot 11077 as PR63 Brown PCGS.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#60804)

## Appealing 1868 Coronet Cent Pattern
## Judd-608, PR65

1671 **1868 One Cent, Judd-608, Pollock-673, R.4, PR65 NGC.**

**Design.** On the obverse, Liberty is wearing a coronet inscribed LIBERTY. Around, the legend UNITED STATES OF AMERICA and below, the date. This is Pollock's High Date variant, with the 1 closer to the bust than the border. The reverse has a large Roman numeral I enclosed within a wreath of wheat, corn, tobacco, and cotton. Struck in nickel with a plain edge.

**Commentary.** A part of three-piece sets, along with the nearly identical three cent piece (Judd-618) and nickel (Judd-633). There are few patterns given the low R.4 rating, meaning about 100 examples still exist. Pollock comments that the Centered Date variant appears somewhat more common than the High Date, however.

**Physical Description.** Both sides are boldly defined with splendid light nickel-gray surfaces. The fields are nicely mirrored with excellent contrast, especially on the obverse. Few contact marks or other imperfections are noted on either side. **NGC Census:** 4 in PR65, 15 finer. **PCGS Population:** 12 in PR65, 7 finer (12/08).

**Provenance.** *Ex: Stack's private treaty.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#60820)

# Gem Cameo Proof 1868 Aluminum Indian Cent
# Low R.7, Judd-612

1672 **1868 One Cent, Judd-612, Pollock-677, Low R.7, PR65 Cameo NGC.**

**Design.** Struck from the regular proof dies for the 1868 Indian cent, in aluminum with a plain edge. Judd notes that two pairs of proof dies were used.

**Commentary.** One might infer from the use of two pairs of proof dies that a considerable number were struck, but they are nonetheless today rated Low R.7. In addition, aluminum was still quite a precious metal at the time(s) these pieces were produced—regardless of exactly when that was. Improved processes for isolating elemental aluminum from its alloys resulted in increased availability of the metal only in the late 1880s. Per Judd: "One of the reverse dies also used to make restrikes of regular Proof 1864 With L cents (per Richard E. Snow); this die is not known to have been used to strike regular issue 1868 Proof cents, but was widely used from 1869 to 1871 (per Snow). This, plus the use of two die pairs, would seem to indicate that aluminum cents were struck on at least two different occasions."

At least some of these were included in complete 16-piece proof sets from the cent through double eagle. The Garrett Collection had a complete set; the earliest recorded offering of a complete aluminum proof set is in the William Fewsmith sale of 1870, lot 1381, conducted by Mason and Company.

**Physical Description.** Intensely bright, quicksilver surfaces are virtually unmarred by distractions, save for a tiny contact point or two and a single minuscule dark fleck on the obverse. Superb field-device contrast and overall appeal. **NGC Census:** 1 in PR65 Cameo, 1 finer. **PCGS Population:** 1 in PR65, 1 finer, none with a Cameo designation in any grade (12/08).

**Provenance.** *Ex: Superior (2/1987), lot 141A.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#60824)

## Desirable 1868 Three Cent Nickel Pattern, Judd-615, PR64

1673 **1868 Three Cent Nickel, Judd-615, Pollock-680, R.5, PR64 NGC.**

**Design.** Similar in design to the contemporary three cent nickel, but the wreath on the reverse is that of the Flying Eagle cent. Struck in nickel with a plain edge.

**Commentary.** Tom DeLorey observed that the obverse design is a regular 17.9-mm three cent obverse set in a one cent-size 19.1-mm die blank, leaving wide borders, whereas the reverse is normal one cent-size.

**Physical Description.** A lovely proof despite some central design weakness. Both sides have attractive, reflective surfaces with pale gold and faint lilac toning. **NGC Census:** 4 in PR64, 10 finer. **PCGS Population:** 9 in PR64, 9 finer (12/08).

**Provenance.** *Ex: Stack's private treaty.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#60827)

## 1868 Three Cent Nickel Pattern, Judd-618, PR64

1674 **1868 Three Cent Nickel, Judd-618, Pollock-687, R.4, PR64 NGC.**

**Design.** The design is similar, but not identical, to the regular-issue three cent pieces of 1868. The head of Liberty is tilted to look slightly upward, and the peripheral legends are smaller than on the regular issue, giving the appearance of more-open fields. Struck in nickel with a plain edge.

**Commentary.** A magnificent set of 1868 pattern coinage was offered in Stack's October 1992 sale of the Floyd Starr Collection. According to USPatterns.com, it is the only known set to have survived, and it included two of each pattern so that both sides could be simultaneously displayed in the purple velvet case. The set included an example similar to the current Judd-618 offering, along with a Judd-608 cent pattern, and a Judd-633 five cent pattern. Ed Cogan states in his January 1871 sale that the sets were sold to collectors at a cost of $9 each.

**Physical Description.** Original patina in silver-gold and champagne, with tinges of powder-gray. An appealing near-Gem. **NGC Census:** 9 in PR64, 22 finer. **PCGS Population:** 29 in PR64, 12 finer (12/08).

**Provenance.** *Ex: Greater New York Numismatic Convention Sale (Stack's, 4/1988), lot 82.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#60834)

## 1868 Five Cent, Judd-623, PR64

1675 **1868 Five Cents, Judd-623, Pollock-692, Low R.6, PR64 NGC.**

**Design.** The obverse is similar to the regular-issue three cent nickel, while the reverse has a large numeral 5 with small CENTS below, a laurel wreath encircling. IN GOD WE TRUST is in tiny letters above. Struck on a regular-size planchet (unlike some others in this series) in nickel with a plain edge.

**Commentary.** This reverse die was previously used to produce five cent patterns dated 1867. Based on the variety of five cent designs tested at the Mint in 1867 and 1868, it appears that someone was not pleased with the reverse style of the recently introduced Shield nickel. The wreath motif proposed on this and other patterns would have fit the theme of the contemporary cent, three cent nickel, half dime, and dime. Fortunately for collectors today, the distinctive reverse design of the Shield nickel was retained until 1883.

**Physical Description.** The nickel-gray surfaces have lovely champagne-gold, an appealing near-Gem despite a small dark area on the reverse. **NGC Census:** 5 in PR64, 3 finer. **PCGS Population:** 8 in PR64, 1 finer (12/08).

**Provenance.** *Ex: Stack's private treaty.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#60840)

## 1868 Five Cent, Judd-624, Broad Planchet, PR61

1676 **1868 Five Cents, Judd-624, Pollock-693, Low R.6, PR61 NGC.**

**Design.** The obverse is similar to the regular-issue three cent nickel, while the reverse has a large numeral 5 with small CENTS below, a laurel wreath encircling. IN GOD WE TRUST is in tiny letters above. Struck on a broad planchet in nickel with a plain edge.

**Commentary.** Between regular and broad planchets, plain or reeded edge, and nickel, copper, and aluminum strikings, it would be possible to assemble a type set composed just of the 1868 five cent patterns. The rarest confirmed variety is the Judd-629, aluminum, plain edge, regular-size planchet, of which less than a half-dozen are estimated to exist.

**Physical Description.** Powder-gray and pinkish-silver surfaces appear to have a slight cameo appearance due to the broad flan. Some light haze and flecks in the fields account for the grade, but there is still plenty of appeal remaining. **NGC Census:** 1 in PR61, 9 finer. **PCGS Population:** 1 in PR61, 17 finer (12/08).

**Provenance.** *Ex: Stack's private treaty.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#60841)

## 1868 Five Cent Struck in Copper Judd-626, PR64 Red and Brown

1677 **1868 Five Cents, Judd-626, Pollock-695, R.7, PR64 Red and Brown NGC.**

**Design.** The obverse is similar to the regular-issue three cent nickel, while the reverse has a large numeral 5 with small CENTS below, a laurel wreath encircling. IN GOD WE TRUST is in tiny letters above. Struck on a regular-size planchet in copper with a plain edge.

**Commentary.** This is among the rarest of the various five cent patterns of 1868, with the sole exception of the Judd-629 aluminum, plain edge, regular-size variant (the large-size aluminum, Judd-629a, plain edge, is unconfirmed although mentioned in the Taxay reference). USPatterns.com estimates that the copper, plain edge Judd-626 on regular-size planchet has less than a half-dozen pieces known, including a die spacer setup piece (Bowers and Merena, 11/1983, lot 2474).

**Physical Description.** Generous mint red highlights predominate on the obverse, while the reverse shows some red tinges mixing with pretty sage tints. A few small, undistracting contact marks determine the grade, but lots of appeal is present. **NGC Census:** Three coins, all Red and Brown — 2 in PR64 and one in PR65. **PCGS Population:** A single coin, graded PR64 Red and Brown (12/08).

**Provenance.** *Ex: Stack's (6/1987), lot 848.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#70843)

## 1868 High Date Five Cent in Nickel
## Judd-633, Pollock-705, PR65 Cameo

1678 **1868 Five Cents, Judd-633, Pollock-705, R.5, PR65 Cameo NGC.**

**Design.** The obverse is similar to the regular-issue three cent nickel, although there are minor differences in lettering and position of Liberty's head. The date is high (Pollock-705). The reverse has a large Roman numeral V in the center, with a laurel wreath completely encircling. Struck in nickel with a plain edge.

**Commentary.** The V in the center reverse of this pattern is a precursor of what would become, 15 years later, the reverse of the Liberty Head nickel (1883-1913), an originally denominationless design that many collectors to this day call the "V nickel."

**Physical Description.** Brilliant surfaces on each side offer bold contrast, with lots of appeal despite a couple of minor flecks that preclude an even finer grade. **NGC Census:** 3 in PR65 Cameo, 5 finer either by numerical grade or designation. **PCGS Population:** 1 in PR65 Cameo; 2 finer, one of which is a PR65 Deep Cameo (12/08).

**Provenance.** *Ex: Stack's private treaty.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#60851)

## 1868 Seated Liberty Ten Cent Nickel
## Judd-641, PR66

1679 **1868 Ten Cents, Judd-641, Pollock-713, Low R.7, PR66 NGC.**

**Design.** Both the obverse and reverse are similar to the familiar Seated Liberty design, but here the obverse is undated, and the reverse wreath encloses a six-pointed star, the denomination ONE DIME, and the small date 1868 below. Struck in nickel with a reeded edge.

**Commentary.** As reported in the Judd reference, "Research by David Cassel has revealed that these coins were struck in 1863 from a die erroneously dated 1868. The obverse without date is same as that used to strike" Judd-331, a Postage Currency dime.

**Physical Description.** Beautifully pristine powder-gray surfaces are virtually mark-free, with their impressive appeal undampened by a couple of random small dark toning areas. **NGC Census:** 4 pieces total, 1 each in PR65, PR65 Cameo, PR66 (this piece), and PR67 Cameo. **PCGS Population:** 5 pieces total, 3 in PR64 and 2 in PR65. (12/08).

**Provenance.** *Ex: Stack's private treaty.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#60859)

## Lovely 1868 Braided Hair Ten Cent Nickel Pattern Judd-647, PR64

**1680 1868 Ten Cents, Judd-647, Pollock-720, Low R.6, PR64 NGC.**

**Design.** The obverse features the almost identical design used on large cents from 1843 to 1857, while the reverse is similar to the Coronet large cent except the wreath is smaller and open, and TEN CENTS is in the center of the wreath. Struck in nickel with a plain edge.

**Commentary.** Judd-647 and Judd-648 are clearly produced from two different obverse dies. The obverse of Judd-647 has the left base of the 1 over the left center of a dentil, the curl point about over the right edge of the first 8, and the final 8 clearly recut. The obverse of Judd-648 has the left base of the 1 over the right center of a dentil, the curl point between the inner and outer right curves of the 8, and the 86 minutely recut. Judd-648 is also a blundered obverse die, with the tops of stray digits visible in the border below the 86. The reverse dies are the same on both Judd numbers, with the top of a stray A midway between the A and M.

**Physical Description.** All design elements are boldly defined on this brilliant light gray proof. It is a Choice piece with highly lustrous and satiny surfaces that exhibit faint champagne toning. A few tiny spots, lint marks, and planchet flakes are evident, but there are no other significant imperfections. **NGC Census:** 3 in PR64 with 8 finer. **PCGS Population:** 4 in PR64 with 3 finer. (12/08)

**Provenance.** *Ex: Stack's private treaty.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#60865)

## Lovely 1868 Judd-648 Copper Ten Cent Pattern PR66 Red and Brown

**1681 1868 Ten Cents, Judd-648, Pollock-721, High R.6, PR66 Red and Brown NGC.**

**Design.** The obverse uses the head of Liberty as seen on Braided Hair large cents, last produced in 1857, and is mated with a reverse that reads TEN CENTS in the center, surrounded by a laurel wreath. Struck in copper with a plain edge.

**Commentary.** The obverse die is blundered, with the tops of at least two digits embedded in the border dentils at 6 o'clock. It is the same die that was also used for Judd-610 and possibly Judd-611, but not the same as the Judd-647.
Advanced large cent collectors sometimes pursue the 1868 ten cent patterns, as they are the same size as the old large cents and use the same obverse design.

**Physical Description.** A wonderful Premium Gem proof with considerable original orange mint luster, blended with pale blue toning in the fields. **NGC Census:** 2 in PR66 Red and Brown, none finer. **PCGS Population:** None in 66 or finer with any designation, one piece certified as PR65 Red (12/08).

**Provenance.** *Ex: Stack's (6/1987), lot 852.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#70866)

## Impressive 1868 Aluminum Seated Dime Pattern Judd-649, PR63

1682 **1868 Ten Cents, Judd-649, Pollock-722, Low R.7, PR63 NGC.**

**Design.** The regular issue design for the Seated Liberty dime. Struck in aluminum with a reeded edge.

**Commentary.** Aluminum trial pieces were produced in 1868 and 1869 to show the ease of coinage in that metal. A few sets were also produced for sale to collectors, but most have now been broken up and the coins sold individually. It is thought that about six pieces exist today.

**Physical Description.** Both sides have delightful light gray surfaces with fully mirrored fields around lustrous devices. All design elements are sharply detailed. Slight planchet roughness is evident at the left obverse, and both sides have a limited number of blemishes that prevent a higher grade. **NGC Census:** 1 in PR63, 3 finer. **PCGS Population:** none in PR63, 3 finer (12/08).

**Provenance.** *Auction '84 (Superior, 7/1984), lot 495; Superior (2/1987), lot 947A.*
*From The Lemus Collection, Queller Family Collection Part Two*(#60867)

## Important 1868 International Five Dollar Pattern, Judd-659 Struck in Aluminum, PR63 Cameo

1683 **1868 Dual Denomination $5-25 Francs, Judd-659, Pollock-732, Low R.7, PR63 Cameo NGC.**

**Design.** Anthony Paquet's design for an international five dollar coin equal to the value of a proposed 25 franc piece. The obverse depicts Liberty, facing left, with her hair bound by a ribbon and star at the front. The reverse is simply inscribed 5 / DOLLARS / 25 / FRANCS in the center with a laurel and oak wreath surrounding. Struck in aluminum with a plain edge.

**Commentary.** Examples of this pattern were coined in copper and aluminum, each with either a plain or reeded edge. The four varieties are identified as Judd-656 through Judd-659, and about a dozen of each are known, according to USPatterns.com.

Paris, France, was the site of a June 1867 international monetary convention that convened to discuss an international gold coinage based on the French franc. A coinage bill was introduced to produce a U.S. five dollar-25 franc gold coin with a weight of 124.45 grains, rather than the standard 129 grains.

**Physical Description.** The blue-gray fields are fully mirrored around lustrous lighter gray devices, creating excellent contrast. Both sides have a few scuffs and hairlines, along with minor corrosion that is mostly limited to the outer rims. **NGC Census:** 1 in PR63 Cameo, none finer in Cameo; with 1 PR63 and 2 finer lacking the Cameo designation. **PCGS Population:** no PR63 Cameos, none finer in Cameo; with 2 in PR63, and 3 finer lacking the Cameo designation (12/08).

**Provenance.** *Auction '87 (RARCOA, 8/1987), lot 1323.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#60877)

## Gilt 1868 Ten Dollar, Low Date
## Judd-662, Pollock-735, PR50 Details

1684 **1868 Ten Dollar, Judd-662, Pollock-735, Low R.7—Harshly Cleaned—NCS. Gilt Proof.**

**Design.** The obverse design, attributed to James B. Longacre, is quite similar to the design on the circulating three cent nickel, although in the large format here it looks radically different. The reverse shows a small eagle in the center with raised wings, scroll reading IN GOD WE TRUST, UNITED STATES OF AMERICA around, and TEN D. at the rim below. Struck in copper, gilt, with a reeded edge.

**Commentary.** Pollock notes that Tom DeLorey has credited the reverse design to Anthony C. Paquet on stylistic grounds. The tall, thin lettering is certainly stylistically similar. Like many patterns struck in copper for gold denominations, examples of this variety are often found gilt.

**Physical Description.** Pollock-735, Low Date. In-house graded as PR50 Cleaned; the gilding is intact still on both sides. The qualifier of "harshly cleaned" applies more to the obverse than the reverse, although hairlines are also seen on that side. The bright golden surfaces show minor porosity on the left portion of the reverse scroll. **NGC Census:** There is only one Gilt piece in the NGC Census, listed as PR60. **PCGS Population:** none certified at PCGS (12/08).

**Provenance.** *Ex: Stack's (6/2003), lot 596.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#60880)

## Attractive 1869 Cent Pattern
## Judd-666, Pollock-743, PR64 Cameo

1685 **1869 One Cent, Judd-666, Pollock-743, R.5, PR64 Cameo NGC.**

**Design.** The obverse exhibits a bust of Liberty facing left with the legend UNITED STATES OF AMERICA around the periphery and the date below the bust. Liberty wears a coronet inscribed LIBERTY. A Roman numeral I is centered in a laurel wreath on the reverse. Struck in nickel with a plain edge.

**Commentary.** Pollock records three different varieties of Judd-666 that he identifies as Pollock-741, 742, and 743, based on the date position and the style of ribbons at the bottom of the reverse. Pollock-743 has delicate bow ribbons on the reverse. Each is individually rated R.6 in his reference, while the cumulative rarity for Judd-666 is R.5.

**Physical Description.** Both sides of this light gray proof have excellent contrast. The fields are fully mirrored and the devices are frosty and lustrous. Both sides have a few minor hairlines, including one on Liberty's cheek, and the surfaces also have minor spots. **NGC Census:** 1 in PR64 Cameo, 6 finer. **PCGS Population:** none in PR64, 9 finer, none of which are Cameo (12/08).

**Provenance.** *Ex: Stack's private treaty (10/1979).*
*From The Lemus Collection, Queller Family Collection Part Two.* (#60890)

## Pleasing 1869 Liberty Five Cent Nickel Pattern, Judd-684, PR62

1686 **1869 Five Cents, Judd-684, Pollock-763, R.5, PR62 NGC.**

**Design.** The obverse design is similar to the adopted three cent nickel, but in larger format, and a star is added to Liberty's coronet. The reverse features a large Roman numeral V inside a laurel wreath. At the top of the wreath are the words IN GOD WE TRUST on a scroll, and a cross rests squarely atop the design. Struck in nickel with a plain edge.

**Commentary.** The Coronet Head patterns issued in 1869 were offered in three-piece sets for sale to collectors. The sets consisted of a one cent, Judd-666, a three cent, Judd-676, and this five cent, Judd-684. Pollock quotes Dr. Judd who stated that the three-coin sets were sold at the Mint for nine dollars.

**Physical Description.** A trace of champagne toning is evident on each side, over mirrored light gray surfaces. The devices have satiny luster with a slight cameo contrast but insufficient to receive such a designation. The surfaces show moderate hairlines and abrasions, as expected for the grade. **NGC Census:** 4 in PR62, 13 finer. **PCGS Population:** 4 in PR62, 32 finer (12/08).

**Provenance.** *Ex: Stack's (3/1972), lot 387.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#60909)

## Rare 1869 Judd-685 Pattern Copper Five Cent, PR61 Brown

1687 **1869 Five Cents, Judd-685, Pollock-764, R.7, PR61 Brown NGC.**

**Design.** The obverse design is similar to the adopted three cent nickel but in larger format, and a star is added to Liberty's coronet. The reverse features a large Roman numeral V inside a laurel wreath. At the top of the wreath are the letters IN GOD WE TRUST on a scroll, and a cross rests squarely atop the design. Struck in copper with a plain edge.

**Commentary.** The reverse design was first used for Judd-529 and Judd-530 in 1866, assuming of course that all the various five cent patterns of the late 1860s were struck chronologically.

**Physical Description.** A boldly detailed example with reflective fields beneath mottle iridescence. Violet and gold surfaces retain underlying orange mint color. A few minor hairlines and spots prevent a higher numeric grade. **NGC Census:** 1 in PR61 Brown, none finer. **PCGS Population:** none graded by PCGS (12/08).

**Provenance.** *Ex: Stack's private treaty.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#70910)

# Prohibitively Rare 1869 Half Dime Die Trial in Nickel
# PR64 Cameo, Judd-694, R.8

1688 **1869 Half Dime, Judd-694, Pollock-773, R.8, PR64 Cameo NGC.**

**Design.** Produced with regular-issue half dime dies. A seated Liberty holds a pole and cap in her left hand while a shield with a ribbon inscribed with the word LIBERTY rests against her. UNITED STATES OF AMERICA encircles the obverse periphery, with the date in exergue. ONE DIME is within an ornate wreath on the reverse. Struck in nickel with a reeded edge.

**Commentary.** Rare! Rated R.8 by Judd, while according to USPatterns.com, "about a half dozen" examples are known. The latter resource suggests that these pieces were not technically die trials, but rather were deliberately struck to be sold to collectors, possibly as part of complete off-metal sets. This piece, Judd-694, is the smaller counterpart of Judd-720, the Seated dime variant, but is slightly rarer. Pollock (1994) references a letter from Fred Weinberg to Abe Kosoff dated October 1, 1974, which reports the existence of both thick and thin planchet strikings for Judd-694. The thick flans weighed 25.8 grains, whereas the thin planchets came in at 18.4 grains, according to Weinberg. The current offering was previously documented at 19.3 grains and, as such, is considered a thin planchet example.

**Physical Description.** Strike weakness—likely due to the hardness of the metal and the thin planchet—is uniform throughout. The surfaces, although showing light planchet striae, are mostly white and display pleasing cameo contrast. Minor flecking on both sides is noted for the sake of accuracy. Only one Judd-694 pattern has been graded at NGC—the piece offered here—and a lone example grading PR63 is documented in the PCGS *Population Report* (10/08).

**Provenance.** *Ex: Reed Hawn Collection (Stack's, 3/1977), lot 760; Stack's private treaty transaction.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#60919)

## Toned 1869 Standard Silver Ten Cent Pattern Judd-696, PR64

1689 **1869 Standard Silver Ten Cents, Judd-696, Pollock-775, R.5, PR64 NGC.**

**Design.** On the obverse, a head of Liberty faces right, with three large stars on a Phrygian cap. The reverse is the only Standard Silver reverse dime die of the year: STANDARD SILVER around the upper edge, with 10 CENTS inside an oak and laurel wreath. Struck in silver with a reeded edge.

**Commentary.** Judd-696 through Judd-701 Standard Silver dime patterns share the same die marriage, but in different metals and edge variations. A silver planchet with a reeded edge differentiates Judd-696 from the other five varieties. The USPatterns.com website summarizes the Standard Silver issues: "The standard silver series was devised as a means of redeeming fractional currency notes using pieces of reduced weight. In effect, these were token coinage as they were worth less than their face value."

**Physical Description.** Deep blue dominates the obverse of this near-Gem example, whereas the reverse features amber hues framed by the same deep blue toning on the opposite side. A small rim anomaly at 3 o'clock on the reverse does not detract, yet it is mentioned here for the sake of accuracy and will serve as a pedigree marker for future generations. **NGC Census:** 9 in PR64, 15 finer. **PCGS Population:** 8 in PR64, 8 finer (12/08).

**Provenance.** *Ex: Gibson-Groves Collection (Stack's, 11/1974), lot 452.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#60921)

## Attractively Toned 1869 Standard Silver Dime Pattern, PR65 Judd-697, High R.6

1690 **1869 Standard Silver Ten Cents, Judd-697, Pollock-776, High R.6, PR65 NGC.**

**Design.** Right-facing Liberty wearing Phrygian cap decorated with three stars. UNITED STATES OF AMERICA borders the upper periphery of the obverse, with IN GOD WE TRUST in curved ribbon below. Reverse: STANDARD SILVER around upper edge with 10 CENTS inside an oak and laurel wreath. The edge is plain on this silver issue.

**Commentary.** The Judd-696 through Judd-701 dime patterns mark the beginning of the popular Standard Silver issues of 1869 and 1870. The purpose of the proposed Standard Silver coinage was to facilitate the redemption of fractional currency in a manner that would put specie into circulation without the risk of hoarding or exportation due to the intrinsic value of the replacement coinage. To accomplish this goal, the suggested weight of Standard Silver issues was to be less than contemporary circulating silver coinage.

**Physical Description.** Variegated rose and cobalt-blue toning frames reflective fields on both sides of this high grade pattern. The strike is respectable, and there are no flaws or distractions worthy of mention. **NGC Census:** 2 in PR65, 1 finer. **PCGS Population:** 2 in PR65, 2 finer (12/08).

**Provenance.** *Ex: ANA Midwinter Auction (Heritage, 2/1987), lot 1308.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#60922)

# 1869 Standard Silver Dime in Aluminum
# Judd-700, PR67 Cameo, Low R.7
# Less Than Six Examples Believed Extant, Finest Certified by Two Points

1691 **1869 Standard Silver Ten Cents, Judd-700, Pollock-779, Low R.7, PR67 Cameo NGC.**

**Design.** On the obverse, a right-facing Liberty wears a Phrygian cap decorated with three stars. UNITED STATES OF AMERICA borders the upper periphery of the obverse, with IN GOD WE TRUST in a curved ribbon below. The reverse displays STANDARD SILVER around the upper edge, and 10 CENTS is inside an oak and laurel wreath. Struck in aluminum with a reeded edge.

**Commentary.** Specialists agree that less than six examples of Judd-700 exist in all grades, although eight pieces are represented in the combined population data at NGC and PCGS—obviously the result of resubmissions of the same pattern. Andrew Pollock (1994) identifies three specimens, including the current offering, the Connecticut State Library piece, and the King Farouk Judd-700 pattern. Of the three metals used for the Standard Silver patterns, the copper and aluminum issues are the most elusive today.

**Physical Description.** Stunningly brilliant fields support frosty devices on this well preserved representative. Slight weakness in the dentilation is inherent to the issue and in no way affects the grade on this Superb Gem proof specimen. And, as one would expect with such a lofty grade assessment, we struggle to find any other flaws worthy of individual mention. The NGC *Census Report* lists only four examples in all grades. This piece, a PR67 Cameo, is *by far the finest certified at either service*, with the next closest pieces a PR64 NGC and a PR65 PCGS (10/08).

**Provenance.** *Ex: Stack's private treaty transaction.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#60925)

## Attractively Toned 1869 Judd-702 Standard Silver Dime, PR64

1692 **1869 Standard Silver Ten Cents, Judd-702, Pollock-781, R.5, PR64 NGC.**

**Design.** On the obverse a right-facing Liberty wears a starless tiara with a plain band. UNITED STATES OF AMERICA borders the upper periphery, with IN GOD WE TRUST in a curved ribbon below. The reverse shows STANDARD SILVER around the upper edge, with 10 / CENTS in an oak and laurel wreath. Struck in silver with a reeded edge.

**Commentary.** Pollock (1994) writes: "Adams and Woodin report that nine-piece sets of the different 'Standard Silver' designs and denominations were offered by the Mint for $15. Some sixty-nine sets are said to have been actually made, although some one hundred sets were originally planned." The Mint selected silver, copper, and aluminum planchets to strike the many different combinations of the Standard Silver patterns. Of the three, silver was used most often, especially with a reeded edge collar. As such, the current offering is typically selected due to availability.

**Physical Description.** Pleasing pastel coloration—a blend of faded violet and powder-blue—is equally dispersed on both sides of this pleasing silver pattern and the strike is bold for the issue. Considering the assigned grade, the current piece offers abundant eye appeal. **NGC Census:** 7 in PR64, 6 finer. **PCGS Population:** 10 in PR64, 11 finer (12/08).

**Provenance.** *Ex: Gibson-Groves Collections (Stack's, 11/1974), lot 453.*
*From The Lemus Collection, Queller Family Collection Part Two.*(#60927)

# Patinated 1869 Standard Silver
# Dime Pattern, PR64, Judd-703, High R.6

1693 **1869 Standard Silver Ten Cents, Judd-703, Pollock-782, High R.6, PR64 NGC.**

**Design.** On the obverse a right-facing Liberty wears a starless tiara with a plain band behind. UNITED STATES OF AMERICA borders the upper periphery, with IN GOD WE TRUST in a curved ribbon below. The reverse offers STANDARD SILVER around the upper edge, with 10 / CENTS in an oak and laurel wreath. Struck in silver with a plain edge.

**Commentary.** The reeded edge version of this silver pattern appears to be three times more available than the current plain edge variant. Why the Mint decided to employ both reeded and plain edge collars to strike the various Standard Silver patterns is not specifically documented, although the simple reason likely has to do with the concept of showing as much variety as possible in the proposed patterns. Switching a die setup from a reeded edge collar to a plain edge arrangement would have been a relatively easy procedure.

**Physical Description.** Attractive peach patination is occasionally interrupted by tinges of ice-blue toning. Three small planchet flaws—which will serve as pedigree markers for future collectors and researchers—are noted in the reverse field at 4 o'clock. Nonetheless, the current offering is an eye-appealing representative of Judd-703. **NGC Census:** 3 in PR64, 2 finer. **PCGS Population:** 6 in PR64, 5 finer (12/08).

**Provenance.** *Ex: River Oaks Collection (Bowers and Ruddy, 11/1976), lot 940; Wyatt Sale (Superior, 9/1985), lot 1586; Hoffecker Sale (Superior, 2/1987), lot 949A.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#60928)

## 1869 Judd-708 Standard Silver Ten Cent Pattern, PR63

1694 **1869 Standard Silver Ten Cents, Judd-708, Pollock-787, R.5, PR63 NGC.**

**Design.** On the obverse Liberty faces right, wearing a headband that is adorned with a single large star in the forehead area. UNITED STATES OF AMERICA borders the upper periphery, with IN GOD WE TRUST in a curved ribbon below. Reverse: STANDARD SILVER around upper edge with 10 / CENTS in an oak and laurel wreath. Struck in silver with a plain edge.

**Commentary.** The idea of the proposed Standard Silver coinage, unlike many other patterns, had merit, although it was never implemented. One of the key benefits of the Standard Silver plan was that the coins would stay in circulation rather than be hoarded. From Mint Director James Pollock in his June 30, 1870 *Annual Report:* "The reduction in weight of these coins, whilst it would render them intrinsically worth less than nominal value, would not make them unacceptable as 'change,' but would counteract any disposition to hoard or export them, and thus keep them in constant circulation."

**Physical Description.** An even dispersion of rose and lilac toning blankets the obverse of this piece, while the reverse displays a rose-colored center with sea-green around the margin. Slight striking softness observed above Liberty's ear is not to be confused with wear. **NGC Census:** 5 in PR63, 14 finer. **PCGS Population:** 1 in PR63, 11 finer (12/08).

**Provenance.** *Ex: Metro New York Numismatic Convention Sale (Stack's, 3/1973), lot 327.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#60933)

## Scarce 1869 Standard Silver Ten Cent, PR64 Judd-709, High R.6

1695 **1869 Standard Silver Ten Cents, Judd-709, Pollock-788, High R.6, PR64 NGC.**

**Design.** Liberty facing right wearing a headband that is adorned with a single large star in the forehead area. UNITED STATES OF AMERICA borders the upper periphery of the obverse with IN GOD WE TRUST in a curved ribbon below. Reverse: STANDARD SILVER around upper edge with 10 CENTS in an oak and laurel wreath. Struck in silver with a plain edge.

**Commentary.** The Judd-708 through Judd-713 dime patterns were produced from the same die pair and are a continuation of the popular Standard Silver issues of 1869 and 1870. The Standard Silver dimes weighed 31.5 grains, as opposed to the 38.4 grains of the currently circulating silver dimes. The reduced weight would have, in theory, reduced the temptation to hoard the new coinage, thus solving a serious problem faced by post-Civil War America.

**Physical Description.** This bright proof retains much original brilliance with deeply reflective fields and is lightly toned in an array of blue, rose, and slate coloration. The cataloger of the November 1988 Silberman sale by Bowers and Merena documented the weight of this piece at 30.8 grains (1.99 gm). **NGC Census:** 2 in PR64, 5 finer. **PCGS Population:** none in PR64, 4 finer (12/08).

**Provenance.** *Ex: Auction '84 (Stack's, 7/1984), lot 1232; Hoffecker Sale (Superior, 2/1987), lot 949C; Silberman Sale (Bowers and Merena, 11/1988), lot 5391.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#60934)

# Rarely Offered 1869 Standard Silver Dime Pattern in Copper
# Judd-710, PR66 Red and Brown

1696 **1869 Standard Silver Ten Cents, Judd-710, Pollock-789, Low R.7, PR66 Red and Brown NGC.**

**Design.** On the obverse Liberty faces right, wearing a headband that is adorned with a single large star in the forehead area. UNITED STATES OF AMERICA borders the upper periphery, with IN GOD WE TRUST in a curved ribbon below. On the reverse STANDARD SILVER is around the upper edge, with 10/CENTS in an oak and laurel wreath. Struck in copper with a reeded edge.

**Commentary.** The majority of patterns produced with this die marriage are found on silver planchets. The copper and aluminum versions are much less available. *The Official Red Book of Auction Records* by John Dannreuther and Jeff Garrett, which includes records of pattern sales between 1990 and 2005, identifies only one Judd-710 pattern, a PCGS-certified PR65 Brown specimen sold in our January 2002 FUN auction (lot 11515). All of the other five varieties in the Judd-708 to Judd-713 grouping are represented by two or more sales in the same reference, which is a clear statement of the true rarity of Judd-710.

**Physical Description.** Most of the original red luster still remains, with only slight mellowing visible. The area above Liberty's ear—which is typically poorly formed on this issue—is boldly defined. A small toning spot in the obverse field between Liberty's throat and the second A of AMERICA is documented here for the purpose of future identification. USPatterns.com suggests that "about a dozen [pieces] are known." **NGC Census:** 1 in PR66 Red and Brown, none finer. **PCGS Population:** None in PR66 Red and Brown, none finer in Red and Brown, with a single Red designated piece graded PR65 Red (12/08).

**Provenance.** *Ex: Stack's private treaty transaction.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#70935)

## Rare 1869 Ruolz's Alloy Dime Pattern PR64 Red and Brown Judd-717, Low R.7

1697 **1869 Ten Cents, Judd-717, Pollock-797, Low R.7, PR64 Red and Brown NGC.**

**Design.** Judd-716 to Judd-717A patterns feature a regular Seated Liberty dime obverse minus the date. The reverse reads SIL. / NIC. / COP., with a straight line separating the date, 1869, in exergue. Struck in copper with a reeded edge.

**Commentary.** These patterns are referred to as Ruolz patterns, after a German chemist credited for inventing a special alloy containing silver, copper, and nickel. Andrew Pollock, in his *United States Patterns and Related Issues*, reproduces a portion of Mint Director James Pollock's *Annual Report for Fiscal Year Ending June 30, 1869:* "An alloy is proposed by a German chemist residing there, upon the authority of another chemist operating in Germany, which, if adopted, it is said would supply 'the finest, cheapest, and cleanest small coin of any nation in the world.' "

According to the same report, tests of the alloy (26% silver, 41% copper, and 33% nickel) failed miserably. It is the contention of modern researchers, specifically David Cassel, that none of the Judd-716 or Judd-717 patterns were struck using Ruolz's actual alloy, although at least one Judd-716 piece had a comparable composition.

**Physical Description.** Reflective chocolate-brown surfaces display subtle hints of brick-red and lilac coloration when viewed under a light source. We struggle to find a singular distraction worthy of mention on this lovely pattern. NGC has certified one Judd-717 at the PR64 Red and Brown level, and another PR64 Brown piece is documented, for a total of two examples in all grades (10/08). PCGS indicates a total of five Judd-717 patterns including 2 in PR64 Red and Brown and 1 finer, thus correlating well with the USPatterns.com website's estimate of approximately six extant examples.

**Provenance.** *Ex: Stack's private treaty transaction.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#70943)

## Elusive 1869 Ten Cent Trial Piece in Nickel, PR64 Judd-720, Less Than Six Known

1698 **1869 Ten Cents, Judd-720, Pollock-801, High R.7, PR64 NGC.**

**Design.** Judd-718 to Judd-720 patterns are actually trial pieces struck from regular dies, but on copper, aluminum, or nickel planchets. As such, the design is identical to a regular issue 1869 Seated dime: Liberty, holding a pole and cap in her left hand, sits on a rock while supporting a shield and a ribbon bearing her name. UNITED STATES OF AMERICA circles the obverse periphery, with the date below. The reverse features the denomination, ONE DIME, within an ornate wreath of corn, wheat, maple, and oak leaves. Struck in nickel with a reeded edge.

**Commentary.** The authors of the USPatterns.com website comment on this issue: "Although these are described as regular die trial pieces in the standard references, it is more likely that the off-metal 'trials' of this year were deliberately struck for sale to collectors." Regardless of the purpose or exact origin of Judd-720, we know that few have survived. The combined population at NGC and PCGS is seven examples—an inflated figure caused by resubmissions and/or crossover submissions (10/08). The USPatterns.com website suggests that about three or four pieces are known, while Judd's *United States Pattern Coins*, ninth edition, indicates a rarity of High R.7, or four to six extant examples.

**Physical Description.** The design features on this piece are moderately struck on the obverse and poorly defined on the reverse, probably due to the hardness of the nickel planchet. Pleasing gunmetal-gray coloration blankets both sides of this reflective piece. A minuscule toning spot in the lower D of UNITED and a similar spot in the upper right wreath (facing) shall serve as pedigree identifiers for future researchers and collectors. **NGC Census:** one PR64 (this piece), one PR66 Cameo. **PCGS Population:** two PR63 and one each in PR62, PR64, PR65. Seven certified examples, with likely duplications (11/08).

**Provenance.** *Ex: Stack's private treaty transaction.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#60947)

# Well Struck 1869 Standard Silver Quarter Pattern, PR66, Judd-722, High R.6

1699 **1869 Standard Silver Quarter Dollar, Judd-722, Pollock-803, High R.6, PR66 NGC.**

**Design.** On the obverse a right-facing Liberty wears a Phrygian cap decorated with three stars at the front. A ribbon bearing the word LIBERTY flows from the base of the cap to Liberty's shoulder. UNITED STATES OF AMERICA borders the upper periphery, with IN GOD WE TRUST in a curved ribbon below. The reverse shows STANDARD SILVER around the upper edge, with 25 / CENTS in an open oak and laurel wreath. The date, 1869, is at the lower periphery. Struck in silver with a plain edge.

**Commentary.** It is astonishing that the Mint failed to document the thousands of Standard Silver patterns—comprising hundreds of different varieties—that were struck in 1869 and 1870. Based on the surviving documentation of contemporary numismatists, it is clear that the Mint issued many more patterns than necessary, and the motive was simply profit. However, some varieties—such as the current offering—were produced in small quantities and today are elusive, regardless of condition.

**Physical Description.** Boldly struck, especially in comparison to the Judd-721 pattern in this sale, which was produced from the same dies in the same composition, but with a reeded edge. Deep cinnamon coloration throughout is occasionally interrupted by areas of cobalt toning at the peripheries. We find no flaws or distractions requiring disclosure on this Premium Gem proof pattern. **NGC Census:** 3 in PR66, none finer. **PCGS Population:** 2 in PR66, none finer (12/08).

**Provenance.** *Ex: Stack's private treaty transaction.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#60949)

# Eye-Appealing 1869 Standard Silver Quarter in Copper
# PR64 Brown, Judd-723, Low R.7

1700 **1869 Standard Silver Quarter Dollar, Judd-723, Pollock-804, Low R.7, PR64 Brown NGC.**

**Design.** On the obverse a right-facing Liberty wears a Phrygian cap decorated with three stars at the front. A ribbon bearing the word LIBERTY flows from the base of the cap to Liberty's shoulder. UNITED STATES OF AMERICA borders the upper periphery, with IN GOD WE TRUST in a curved ribbon below. The reverse shows STANDARD SILVER around the upper edge, with 25 / CENTS in an open oak and laurel wreath. The date, 1869, is positioned at the lower periphery. Struck in copper with a reeded edge.

**Commentary.** The Judd-721 through Judd-726 quarter patterns were produced from the same die pair. The six varieties of the current design were struck in silver, copper, and aluminum. Judd-723—the current offering—was considered an R.6 variety by Pollock and is listed as such on the USPatterns.com website. However, the ninth edition of *United States Pattern Coins* by Judd opines that Judd-723 is a Low R.7 variety. In actuality, this issue is on the border of High R.6 and Low R.7, based on an analysis of certified coin population data and auction records. Sixteen examples are certified at NGC and PCGS combined, less duplicates (11/08).

**Physical Description.** A halo of champagne iridescence frames turquoise centers on this reflective proof. The strike is variable, with noted weakness in the left obverse and central reverse design details. LIBERTY on the central obverse ribbon is poorly defined as well. A natural planchet void below the 18 of the date is noted for the sake of full disclosure. **NGC Census:** 1 in PR64, 3 finer. **PCGS Population:** 3 in PR64, 5 finer (12/08).

**Provenance.** *Ex: 468th Sale (Stack's, 5/1994), lot 490. From The Lemus Collection, Queller Family Collection Part Two.* (#60950)

# 1869 Standard Silver Quarter Pattern
# Struck in Aluminum, PR65 Cameo
# Judd-726, One of Less Than Six Known

1701 **1869 Standard Silver Quarter Dollar, Judd-726, Pollock-807, High R.7, PR65 Cameo NGC.**

**Design.** On the obverse a right-facing Liberty wears a Phrygian cap decorated with three stars at the front. A ribbon bearing the word LIBERTY flows from the base of the cap to Liberty's shoulder. UNITED STATES OF AMERICA borders the upper periphery, with IN GOD WE TRUST in a curved ribbon below. The reverse shows STANDARD SILVER around the upper edge, with 25 / CENTS in an open oak and laurel wreath. The date is at the lower rim. Struck on a plain-edged aluminum planchet.

**Commentary.** The number of Judd-726 Standard Silver quarter patterns struck is unknown, but the amount must have been small, as less than six pieces are believed extant today. Silver was the preferred metal for the many different Standard Silver patterns, with copper and aluminum pieces issued in much smaller quantities, based on their availability today.

**Physical Description.** Reflective fields and cameo devices are the distinctive features of this well struck piece. Unsurprisingly, considering the metal, the surfaces are essentially untoned, although we note a small spot below the O in OF on the obverse. Between the two major grading services only five Judd-726 patterns are documented. The current offering is the finest graded at NGC (10/08). The Bowers and Merena cataloger of the Mann sale (9/88) indicated a weight of 23.1 grains (1.5 grams) and the Pollock reference documents a diameter of 0.898 inches (22.8 mm) with a die alignment of 180 degrees for this example. **NGC Census:** 1 in PR65 Cameo, none finer. **PCGS Population:** 1 in PR65 (non-Cameo), none finer (12/08).

**Provenance.** *Ex: Estates of Philip M. Mann, Jr. and Glenn B. Smedley (Bowers and Merena, 9/1988), lot 593.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#60953)

## Stunning 1869 Standard Silver Quarter Pattern, Judd-727, PR65

1702 **1869 Standard Silver Quarter Dollar, Judd-727, Pollock-808, R.5, PR65 NGC.**

**Design.** On the obverse a right-facing Liberty wears a starless tiara. A headband behind bears the legend LIBERTY in raised letters. UNITED STATES OF AMERICA borders the upper periphery, with IN GOD WE TRUST on a curved ribbon below. The reverse shows STANDARD SILVER around the upper edge with 25 / CENTS in an open oak and laurel wreath. Struck in silver with a reeded edge.

**Commentary.** Judd-727 is the most available of the six patterns struck from this die marriage, considered common by specialists. However, it is common only relative to other patterns and could be considered very scarce in general numismatic terms. The combined population of Judd-727 at NGC and PCGS is 67 pieces in all grades.

**Physical Description.** Mind-boggling electric-blue patination dominates the reflective fields, with deeper gray toning seen elsewhere. A beautiful example in all regards. **NGC Census:** 10 in PR65, 7 finer. **PCGS Population:** 5 in PR65, 5 finer (12/08).

**Provenance.** *Ex: Stack's private treaty transaction.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#60954)

## Premium Gem Proof 1869 Standard Silver Quarter, Judd-728, High R.6

1703 **1869 Standard Silver Quarter Dollar, Judd-728, Pollock-809, High R.6, PR66 NGC.**

**Design.** On the obverse a right-facing Liberty wears a starless tiara. A headband behind the tiara bears the legend LIBERTY in raised letters. UNITED STATES OF AMERICA borders the upper rim, with IN GOD WE TRUST on a curved ribbon below. On the reverse STANDARD SILVER borders the upper edge, with 25 / CENTS in an open oak and laurel wreath. Struck in silver with a plain edge.

**Commentary.** Andrew Pollock states in his 1994 reference that there is a possibility that Judd-728 exists at two different weights—77 grains and 84 grains. All of the examples in his census, where the specifications are documented, appear to be of the former weight. The Lemus Collection pattern is listed at exactly 77.0 grains, with a die alignment of 180 degrees. It is interesting to note that only two examples of the 20 pieces thus certified by NGC and PCGS combined have been designated as Cameo proofs. Apparently the dies were prepared in such a manner that cameo contrast on the final product was not a consideration.

**Physical Description.** The beautifully mirrored surfaces of this survivor are well preserved, hence the lofty Premium Gem designation by NGC. Bright rose toning gradually turns to pale blue at the margins. The strike is bold throughout. **NGC Census:** 3 in PR66, 2 finer, including one PR66 Cameo. **PCGS Population:** 2 in PR66, 1 finer (12/08).

**Provenance.** *Ex: Stack's private treaty transaction.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#60955)

# 1869 Standard Silver Quarter Pattern
# Judd-730, Low R.7, PR65 Red Cameo

1704 **1869 Standard Silver Quarter Dollar, Judd-730, Pollock-811, Low R.7, PR65 Red Cameo NGC.**

**Design.** On the obverse a right-facing Liberty wears a starless tiara. A headband behind the tiara bears the legend LIBERTY in raised letters. UNITED STATES OF AMERICA borders the upper rim, with IN GOD WE TRUST in a curved ribbon below. On the reverse STANDARD SILVER is around the upper edge, with 25 / CENTS in an open oak and laurel wreath. Struck in copper with a plain edge.

**Commentary.** Judd-730 is a rare pattern by any definition. The USPatterns.com website suggests an extant population of less than 12 examples. The ninth edition of *United States Pattern Coins* by J. Hewitt Judd provides a rarity rating of Low R.7, which correlates to between seven and 12 pieces on the modified Sheldon rarity scale. Considering the combined certified population of seven pieces (10/08) and the seven examples sold at major auction since 1990—both figures possibly representing more than one appearance of the same coin—it is clear that Judd-730 falls on the border of Low R.7 and High R.7.

**Physical Description.** This piece displays fiery-red coloration over beautifully mirrored surfaces and frosty devices. Faint traces of an old fingerprint on the reverse preclude an even higher grade on this Gem proof pattern. Pollock (1994) included the current specimen in his census with the following data: "64.0 grains, diameter: 0.898 inches, die alignment: about 170 degrees." This specimen is the finest example graded by either service. The NGC *Census Report* documents three examples in all grades, with the current offering the only one at the PR65 Red level (11/08). It also has the distinction of being a Cameo piece—the only such example designated as such by the major services. PCGS has thus far certified four Judd-730 patterns, with the highest assigned grade a PR64 Red. The current population data likely include one or more resubmissions.

**Provenance.** *Ex: Alto Collection (Stack's, 12/1970), lot 776. From The Lemus Collection, Queller Family Collection Part Two.* (#80957)

## 1869 Standard Silver Quarter
## Judd-733, PR62

1705 **1869 Standard Silver Quarter Dollar, Judd-733, Pollock-814, R.5, PR62 NGC.**

**Design.** On the obverse a right-facing Liberty wears a headband displaying LIBERTY in raised letters and a single star at the front. UNITED STATES OF AMERICA borders the upper periphery, with IN GOD WE TRUST in a curved ribbon below. The reverse shows STANDARD SILVER around the upper edge, with 25 / CENTS in an open oak and laurel wreath. The date, 1869, is at the lower rim. Struck in silver with a reeded edge.

**Commentary.** Judd-733 through Judd-738 patterns represent the third and final Standard Silver obverse design, as described above. All three classes are similar in style and, as with the dime and half dollar patterns, the reeded edge silver pieces are more available than the others. However, none of the Standard Silver patterns are common in general terms, considering that not a single variety ranks below R.5 on the Sheldon rarity scale.

**Physical Description.** A ring of cobalt toning at the obverse and reverse peripheries delicately frames lightly toned surfaces. We note a strong strike with the exception of slight weakness above Liberty's ear, as typical for the issue. A conservatively graded specimen that offers substantial eye appeal. **NGC Census:** 1 in PR62, 19 finer. **PCGS Population:** 10 in PR62, 26 finer (12/08).

**Provenance.** *Ex: Stack's private treaty transaction.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#60960)

## 1869 Standard Silver Quarter
## Judd-734, High R.6, PR64

1706 **1869 Standard Silver Quarter Dollar, Judd-734, Pollock-815, High R.6, PR64 NGC.**

**Design.** Liberty, wearing a headband inscribed with LIBERTY in raised letters and a star at the front, faces right. A plain ribbon gracefully flows through Liberty's hair and across her shoulders. UNITED STATES OF AMERICA is at the upper rim, with IN GOD WE TRUST in a ribbon below. The reverse features 25 / CENTS within an oak and laurel wreath, with STANDARD SILVER above and the date, 1869, below. Struck in silver with a plain edge.

**Commentary.** Judd-733 through Judd-738 use the third obverse die mated with the usual Standard Silver reverse die. All of the three obverse dies used to strike these quarter patterns are similar. It is believed that the reason for the minor design changes was to simply create variety for collectors, which in turn generated revenue for the Mint and/or someone closely tied to its internal operations. Little official documentation is available regarding the Standard Silver patterns of 1869 and 1870, so we rely on contemporary accounts for research purposes.

**Physical Description.** Well struck with crisp details throughout. Russet toning is evenly dispersed across both sides, with subtle hints of cobalt patination at the peripheries. "Pull-away" toning at the outer extremes of the obverse letters confirms the originality of the current offering. **NGC Census:** 2 in PR64, 5 finer. **PCGS Population:** 1 in PR64, 5 finer (12/08).

**Provenance.** *Ex: National Bank of Denver Sale (Bowers and Merena, 6/1987).*
*From The Lemus Collection, Queller Family Collection Part Two.* (#60961)

## Well-Preserved 1869 Copper Quarter Pattern PR66 Red and Brown Judd-735, Low R.7

1707 **1869 Standard Silver Quarter Dollar, Judd-735, Pollock-816, Low R.7, PR66 Red and Brown NGC.**

**Design.** On the obverse a right-facing Liberty wears a headband displaying LIBERTY in raised letters and a single star at the front. UNITED STATES OF AMERICA borders the upper rim, with IN GOD WE TRUST in a curved ribbon below. On the reverse STANDARD SILVER is around the upper edge with 25 / CENTS in an open oak and laurel wreath. The date, 1869, is at the lower margin. Struck in copper with a reeded edge.

**Commentary.** Of the three different metals used to strike the many Standard Silver patterns of 1869 and 1870, the silver and aluminum pieces are typically well preserved. Copper examples, on the other hand, can present a challenge for those in search of problem-free specimens. Per the ninth edition of *United States Pattern Coins* by Judd: "The copper coins in particular are difficult to find in choice preservation as many have been polished or retoned, or are spotted."

**Physical Description.** The current offering has survived in a splendid state of preservation. Mostly red coloration accounts for the Red and Brown designation by NGC and the pleasing surfaces—free of distractions—justify the Premium Gem grade. Pollock (1994) describes this piece in his *United States Patterns and Related Issues:* "86.8 grains, diameter: 0.899 inches, die alignment: about 170 degrees." **NGC Census:** 1 in PR66 Red and Brown, none finer in Red and Brown, with 1 PR63 Red and 1 PR64 Red Deep Cameo. **PCGS Population:** None in PR66 Red and Brown, none finer in Red and Brown, with the highest two graded PCGS pieces being a PR63 Red and Brown and a PR64 Red (12/08).

**Provenance.** *Ex: Stack's private treaty transaction.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#70962)

## Rare 1869 Standard Silver Quarter Struck in Copper, Judd-736 Low R.7, PR65 Red and Brown

1708 **1869 Standard Silver Quarter Dollar, Judd-736, Pollock-817, Low R.7, PR65 Red and Brown NGC.**

**Design.** On the obverse a right-facing Liberty wears a headband displaying LIBERTY in raised letters and a single star at the front. UNITED STATES OF AMERICA borders the upper rim, with IN GOD WE TRUST in a curved ribbon below. The reverse shows STANDARD SILVER around the upper edge, with 25 / CENTS in an open oak and laurel wreath. The date, 1869, is at the lower rim. Struck in copper with a plain edge.

**Commentary.** Pattern specialists agree that less than 12 Judd-736 patterns exist in all grades. Both of the copper pattern issues bearing this design—the reeded edge and plain edge variants—are rare, yet the plain edge version offered here appears to be slightly less available, based on the infrequency of auction appearances and the combined population data of NGC and PCGS.

**Physical Description.** Teetering on the edge of a full Red designation, this specimen was likely limited by areas of darker toning in the right obverse field and on the high points of Liberty. The surfaces, otherwise, are pleasing and fully deserving of a Gem proof determination. Before being encapsulated, the current offering was documented at 85.9 grains with a diameter of 0.899 inches. The die alignment is approximately 170 degrees (Pollock, 1994). **NGC Census:** 1 in PR65 Red and Brown, 1 finer. **PCGS Population:** There are only 2 Judd-736 coins graded by PCGS both having achieved the grade of PR64 Red (12/08).

**Provenance.** *Ex: Lee Collection (Superior, 9/1988), lot 2843..*

# Enticing 1869 Standard Silver Half, Judd-742, PR63

1709 **1869 Standard Silver Half Dollar, Judd-742, Pollock-823, R.5, PR63 NGC.**

**Design.** The obverse features a right-facing Liberty wearing a Phrygian cap decorated with two large stars at the front. A ribbon with LIBERTY in raised letters flows over Liberty's hair. Within the two central folds of the ribbon—above the L in LIBERTY—is the engraver's initial, B, identifying this as a William Barber design. UNITED STATES OF AMERICA boldly encircles the periphery, with IN GOD WE TRUST on a scroll below. The D in GOD is dramatically repunched, with bold remnants of the letter visible by a full character space to the right. On the reverse 50 / CENTS is within an oak and laurel wreath, with STANDARD SILVER at the upper rim and the date below. Two small stars in the lower field—one in the left and one in the right—complete the design. Struck in silver with a reeded edge.

**Commentary.** Although William Barber engraved this obverse, James B. Longacre's earlier concept, specifically the five dollar pattern of 1860, Judd-271, inspired the design. And, unlike the dime and quarter Standard Silver patterns of 1869, the half dollar issues included a fourth metal composition—brass.

**Physical Description.** Variegated hues of teal and cinnamon coloration blanket the mirrored surfaces of this Select proof survivor. Minuscule toning spots scattered about both sides, although not visually distracting, preclude a higher grade. The strike is average. This more-available (though still quite rare) pattern variety has seen several dozen examples certified at NGC and PCGS combined, with most averaging PR62 or PR63 (11/08). **NGC Census:** 4 in PR63, 7 finer. **PCGS Population:** 8 in PR63, 12 finer (12/08).

**Provenance.** *Ex: Metro New York Numismatic Convention Sale (Stack's, 3/1973), lot 353.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#60969)

# Stunning 1869 Standard Silver Half Dollar
# Judd-743, High R.6, PR66

1710 **1869 Standard Silver Half Dollar, Judd-743, Pollock-824, High R.6, PR66 NGC.**

**Design.** The obverse features a right-facing Liberty wearing a Phrygian cap decorated with two large stars at the front. A ribbon with LIBERTY in raised letters flows over Liberty's hair. Within the two central folds of the ribbon—above the L in LIBERTY—is the engraver's initial, B, identifying this as a William Barber design. UNITED STATES OF AMERICA boldly encircles the periphery, with IN GOD WE TRUST in a scroll below. The D in GOD is dramatically repunched, with bold remnants of the letter visible by a full character space to the right. On the reverse 50 / CENTS is within an oak and laurel wreath, with STANDARD SILVER at the upper rim and the date below. Two small stars in the lower field—one in the left and one in the right—complete the design. Struck in silver with a plain edge.

**Commentary.** Judd-743 differs from Judd-742 only by the absence of edge reeding. Interestingly, the plain edge piece offered here is substantially rarer than Judd-742 and less then a dozen specimens are believed extant in all grades, according to the USPatterns.com website. The NGC *Census Report* confirms the relative scarcity of each issue: 18 Judd-742 patterns have been graded compared to a paltry five Judd-743 issues, all grades considered (10/08).

**Physical Description.** A Premium Gem proof survivor. Highly reflective fields reveal russet and electric-blue coloration when rotated under a light source. A slightly weak strike, common to the issue, is redeemed by the pristine state of surface preservation. A stunning half dollar pattern in both design and quality. **NGC Census:** 2 in PR66, none finer. **PCGS Population:** The finest PCGS graded coin is a single PR65 (12/08).

**Provenance.** *Unknown.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#60971)

# Judd-748 1869 Standard Silver Half, PR64

1711 **1869 Standard Silver Half Dollar, Judd-748, Pollock-831, R.5, PR64 NGC.**

**Design.** Liberty, wearing a plain tiara, faces right. A headband behind the tiara features LIBERTY in raised letters. UNITED STATES OF AMERICA dominates the upper periphery, with IN GOD WE TRUST in a ribbon below. On the reverse 50 / CENTS is within an oak and laurel wreath, with STANDARD SILVER at the upper rim and the date below. Two six-pointed stars in the lower field—one to the left and one to the right—complete the design. Struck in silver with a reeded edge.

**Commentary.** The half dollar was the largest denomination struck to represent the 1869 Standard Silver issues. Three different obverse dies were combined with a common reverse die to produce 21 combinations of half dollar patterns for the year. The pieces differ slightly by design, in composition, and by edge type—reeded or plain. The Standard Silver dime and quarter patterns of the same year were each manufactured in 18 different types. Three additional variations of only the fifty cent pieces were produced on reeded edge brass planchets. Thus the true number of patterns in an 1869 Standard Silver set is 57, although the brass pieces are extremely rare and deemed uncollectible, so the accepted total is generally documented as 54 varieties.

**Physical Description.** Light gold coloration over mirrored surfaces is occasionally interrupted by hints of electric-blue toning. Weakness in the central reverse is a design flaw and typical to most Judd-748 survivors; the opposing obverse details are deeply cut and cause a metal-flow issue. Elsewhere, the strike is crisp. **NGC Census:** 10 in PR64, 5 finer. **PCGS Population:** 13 in PR64, 3 finer (12/08).

**Provenance.** *Ex: Stack's private treaty transaction.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#60977)

# Plain Edge 1869 Standard Silver Half, PR64
# Judd-749, High R.6

1712 **1869 Standard Silver Half Dollar, Judd-749, Pollock-832, High R.6, PR64 NGC.**

**Design.** Liberty, wearing a plain tiara, faces right. A headband behind the tiara features LIBERTY in raised letters. UNITED STATES OF AMERICA dominates the upper periphery, with IN GOD WE TRUST in a ribbon below. On the reverse 50 / CENTS is within an oak and laurel wreath, with STANDARD SILVER at the upper rim and the date below. Two six-pointed stars in the lower field—one to the left and one to the right—complete the design. Struck in silver with a plain edge.

**Commentary.** Nine-piece sets of Standard Silver patterns were offered to collectors at the cost of $15 per set. The fact that the Mint produced 54 different combinations of Standard Silver dimes, quarters, and halves dated 1869 sheds light on the intended purpose of the patterns. Profit was clearly a motive, since the number of patterns produced, which were quite similar in design, was excessive. All of the Standard Silver issues are technically essays, or experimental patterns, since they represented a change in weight or size and composition, as opposed to a design revision only.

**Physical Description.** Typical for the issue, this piece shows weakness on the central reverse design. The surfaces are reflective and free of mentionable distractions. Azure coloration dominates lilac undertones on both sides of this near-Gem proof specimen. A lovely representative of Judd-749, of which fewer than 12 survivors are believed extant in all grades. **NGC Census:** 1 in PR64, 3 finer. **PCGS Population:** 2 in PR64, 2 finer (12/08).

**Provenance.** *Ex: Auction '87 (Stack's, 7/1987), lot 834. From The Lemus Collection, Queller Family Collection Part Two.* (#60978)

# 1869 Standard Silver Half in Copper
# Judd-751, Low R.7, PR65 Brown
# Among the Finest of Less Than Six Known

1713 **1869 Standard Silver Half Dollar, Judd-751, Pollock-834, Low R.7, PR65 Brown NGC.**

**Design.** Liberty, wearing a plain tiara, faces right. A headband behind the tiara features LIBERTY in raised letters. UNITED STATES OF AMERICA dominates the upper periphery, with IN GOD WE TRUST in a ribbon below. On the reverse 50 / CENTS is within an oak and laurel wreath, with STANDARD SILVER at the upper periphery and the date below. Two six-pointed stars in the lower field—one on the left and one on the right—complete the design. Struck in copper with a plain edge.

**Commentary.** Plain edge copper examples of this series—Judd-748 to Judd-753—are challenging to locate in any condition. Although the ninth edition of Judd's *United States Pattern Coins* suggests that the Judd-753 plain edge aluminum pattern is the rarest of the six issues (not counting Judd-753A), the Judd-751 offered here appears to be equally as rare. Both Judd-751 and Judd-753 have appeared at auction the same number of times prior to the current sale, and the combined NGC and PCGS population data are similar for both varieties. Furthermore, the USPatterns.com website indicates that less than six examples are known for both Judd-751 and Judd-753.

**Physical Description.** Reflective, chocolate-brown surfaces reveal subtle blue and mauve highlights when examined under a light source. The strike is bold for the issue—probably due to the relative softness of the copper planchet. A couple of small, dark toning spots in the right obverse field are now integral to this specimen and serve as permanent pedigree identifiers. Census: 1 in 65 Brown, 0 finer (10/08). Numerically tied for finest, as PCGS has certified two PR65 Red and Brown specimens at the finest there.

**Provenance.** Ex: *Robert W. Rusbar Collection (Bowers and Merena, 9/1990), lot 720.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#60980)

# Popular 1869 Standard Silver Half Dollar Pattern Struck in Silver, Judd-754, Near-Gem Proof

1714 **1869 Standard Silver Half Dollar, Judd-754, Pollock-838, R.5, PR64 NGC.**

**Design.** A right-facing Liberty features a headband with LIBERTY in raised letters and a single star at the front. UNITED STATES OF AMERICA dominates the upper rim, with IN GOD WE TRUST in a ribbon below. On the reverse 50 / CENTS is within an oak and laurel wreath, with STANDARD SILVER at the upper border and the date below. Two six-pointed stars decorate the lower field. Struck in silver with a reeded edge.

**Commentary.** Interestingly, the Standard Silver dime and quarter patterns of 1869 featured obverse dies used only in that year, whereas the five obverse dies used to strike the 1869 Standard Silver half dollar patterns were also used to produce 1870-dated Standard Silver fifty cent patterns. This issue, Judd-754, is one of the more available patterns in the series, although it can only be considered "common" in relation to other patterns of the era. As of (11/08), NGC and PCGS have documented a total of 63 examples in all grades. The number of auction appearances in the past 10 years is approximately half of that number.

**Physical Description.** Well, but not fully struck, with reflective surfaces, this offering boasts a subtle blend of russet and lavender coloration over dove-gray toning. Three insignificant yellowish toning spots around the ND of STANDARD on the reverse will make this piece unquestionably identifiable to future researchers. **NGC Census:** 3 in PR64, 9 finer. **PCGS Population:** 13 in PR64, 5 finer (12/08).

**Provenance.** *Ex: King Farouk; Palace Collections of Egypt (Sotheby's, 2/1954), lot 1828 (with auction tag attested to by Sol Kaplan); Lester Merkin Coins (2/1971), lot 881.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#60984)

# Memorable 1869 Standard Silver Half Dollar Pattern Judd-755, Superb Gem Proof Tied for Finest Certified

1715 **1869 Standard Silver Half Dollar, Judd-755, Pollock-839, High R.6, PR67 NGC.**

**Design.** A right-facing Liberty features a headband with LIBERTY in raised letters and a single star at the front. UNITED STATES OF AMERICA dominates the upper periphery, with IN GOD WE TRUST in a ribbon below. On the reverse 50 / CENTS is within an oak and laurel wreath, with STANDARD SILVER at the upper border and the date below. Two six-pointed stars decorate the lower field. Struck in silver with a plain edge.

**Commentary.** The plain edge variant of this die marriage is approximately three times as scarce as the reeded edge version, yet the historical prices realized at auction do not reflect the disparity in availability. Such is the case for many other rarities in which the supply is low, but the demand is also limited. However, the research efforts of pattern specialists in recent years—namely the release of the much-improved Judd reference and the USPatterns.com website—are helping to draw attention to the patterns field, and demand is on the rise.

**Physical Description.** A Superb Gem proof coin—pattern or otherwise—should possess not only pristine surface quality, but also substantial eye appeal. The current offering fully delivers on both counts. Pleasing amber toning at the peripheries is notably deeper in hue than in the centers. The mirrors are breathtakingly deep, and we find no flaws warranting disclosure. The slight weakness in the IB of LIBERTY on the obverse, and in the central reverse detail, is inherent to the issue, as are the die file marks in the upper reverse field. This piece is one of three documented at the PR67 level at NGC, including one with a Cameo designation, and no examples have earned a higher grade (11/08). The two finest of the 11 specimens graded by PCGS reside at the PR65 level. A stunning pattern that is sure to elicit aggressive bidding activity.

**Provenance.** *Ex: Stack's private treaty transaction.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#60985)

## Significant 1869 Aluminum Seated Liberty Dollar Pattern Judd-764, PR65

**1716 1869 Dollar, Judd-764, Pollock-849, Low R.7, PR65 NGC.**

**Design.** The regular issue design for the Seated Liberty dollar. Struck in aluminum with a reeded edge.

**Commentary.** The 1869 aluminum patterns of all denominations were almost certainly struck for sale to collectors, although they have been called trial pieces in past literature. They were sold in cased sets, at least two of which survive intact. The other sets have long since been broken up. About half a dozen examples of Judd-764 still exist, per USPatterns.com.

**Physical Description.** This deeply mirrored piece has strongly contrasting frosted devices that yield a stark cameo contrast. Somewhat softly impressed in the centers, as is often the case on dollars from the late 1860s and early 1870s. This striking problem apparently was also experienced on off-metal patterns as well. A few tiny lint marks are seen scattered across each side, but the only sign of oxidation is a small dot of brown color in the field by star 11. An outstanding aluminum pattern that combines numismatic significance with strong visual appeal. **NGC Census:** 1 in PR65, 1 finer. **PCGS Population:** 1 in PR65, none finer (12/08).

**Provenance.** *Ex: Krugjohann Collection (Bowers and Ruddy, 5/1976), lot 1057; Fairfield Collection (Bowers and Ruddy, 10/1977), lot 37; Thomas Moore Sale (Steve Ivy, 10/1980), lot 1849; ANA (Heritage, 8/1996), lot 5142; Heritage (7/2003), lot 9988.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#60995)

## 1869 With Motto Five Dollar in Copper Judd-775, PR58 Burnished

**1717 1869 Five Dollar, Judd-775, Pollock-861, High R.7—Burnished—NCS. Proof.**

**Design.** The dies are the regular-issue Liberty Head half eagle design of the year. Struck in copper with a reeded edge.

**Commentary.** While the Judd reference refers to these as regular die-trial pieces, USPatterns.com suggests they more than likely were produced for sale to collectors as part of complete off-metal sets. Other 1869-dated half eagle patterns listed in the Judd reference, such as Judd-778, employ the pre-1866 No Motto reverse. Such pieces are now believed to have been privately struck outside of the Mint, possibly by either famed 19th century collector Joseph J. Mickley or *Early Coins of America* author Sylvester S. Crosby.

**Physical Description.** In-house graded as PR58 Burnished. There is no NCS color designation or grade on this copper piece, but the coin is extremely dark brown, with some areas of raw orange copper on the reverse.

**Provenance.** *Ex: Superior (1/1989), lot 3826.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#61007)

# Fanciful 1870 Three Cent Silver Pattern, PR66
# Judd-797, Low R.7

1718 **1870 Three Cent Silver, Judd-797, Pollock-884, Low R.7, PR66 NGC.**

**Design.** A seated Liberty faces left while supporting a shield with a scroll inscribed LIBERTY on her right side and holding an olive branch in her left hand. A crudely fashioned cap atop a pole awkwardly looms in the background. UNITED STATES / OF AMERICA occupies the periphery with the date, 1870, in exergue. The reverse design is that featured on the regular three cent silver pieces of the year: Roman numeral III, branch with three berries above, three arrows and ribbon below, all within an ornate C. Thirteen stars encircle the design. The smaller-diameter reverse die accounts for the abnormally large border on that side. Struck in silver with a reeded edge.

**Commentary.** James B. Longacre died on January 1, 1869, and William Barber was named Chief Engraver shortly thereafter. The obverse die that produced Judd-797 through Judd-801 is attributed as Barber's work and was also used to strike the Judd-809 through Judd-820 1870 half dime patterns. The same motif is used on several other pattern issues dated 1870, although the execution of the design on the three cent silver and half dime patterns is slightly less refined than found on the larger-denomination issues.

**Physical Description.** Lightly toned throughout and highlighted at the obverse periphery with a touch of cobalt iridescence at the margins. Well struck overall with just enough contact marks to keep this beauty from a full Superb Gem designation. **NGC Census:** 1 in PR66, 1 finer. **PCGS Population:** The highest graded pieces at PCGS are 2 PR65 coins (12/08).

**Provenance.** *Ex: Stack's private treaty transaction.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#61040)

## Delightful William Barber 1870
## Three Cent Silver in Copper
## Judd-798, PR65 Brown

1719 **1870 Three Cent Silver, Judd-798, Pollock-885, Low R.7, PR65 Brown NGC.**

**Design.** The obverse design, attributed to William Barber, features a seated figure of Liberty facing left and supporting a shield in her right hand, an olive branch in her left. A free-standing Liberty pole is present behind the shield. The reverse is the same design used to coin regular issue three cent silver pieces. Struck in copper with a plain edge.

**Commentary.** In the ninth edition of Judd, Dave Bowers calls this pattern (in all metals and edges) a "numismatic curiosity." The obverse was intended to be part of the Standard Silver series, and should never have been muled with the three cent silver reverse. Since the obverse die was meant for a half dime and the two denominations had diameters that differed by about 1.4 mm, the reverse has a wide border for the coin's size. The Judd-798 pattern is considered Low R.7 in the ninth edition of Judd, Low R.7 at USPatterns.com, and R.7 in Pollock. These differing rarity ratings indicate that about eight to 10 pieces exist today.

**Physical Description.** Both sides have outstanding chestnut and mahogany color with faint iridescent toning and fully reflective surfaces. A few tiny spots and other blemishes are evident on each side. **NGC Census:** 1 in PR65 Brown, 2 finer, including 1 PR65 Red and Brown and 1 PR66 Red and Brown. **PCGS Population:** 1 in PR65 Brown, 3 finer, including 2 graded PR65 Red and 1 graded PR66 Red (12/08).
**Provenance.** *Ex: Superior (7/1993), lot 638.*
*From The Lemus Collection, Queller Family Collection Part Two.*(#61041)

# Unimprovable 1870 Three Cent Pattern
# Judd-799, PR67 Red and Brown
# Finest Graded at Either Service

1720 **1870 Three Cent Silver, Judd-799, Pollock-886, Low R.7, PR67 Red and Brown NGC.**

**Design.** A seated Liberty faces left while supporting a shield with a scroll inscribed LIBERTY on her right side and holding an olive branch in her left hand. A crudely fashioned cap atop a pole awkwardly looms in the background. UNITED STATES / OF AMERICA occupies the periphery with the date, 1870, in exergue. The reverse design is that featured on the regular three cent silver pieces of the year: Roman numeral III, branch with three berries above, three arrows and ribbon below, all within an ornate C. Thirteen stars encircle the design. The smaller-diameter reverse die accounts for the abnormally large border on that side. Struck in copper with a reeded edge.

**Commentary.** A rarely offered variety. *The Official Red Book of Auction Records* by Dannreuther and Garrett (2006) lists three sales of this pattern at auction between 1992 and 2004. The ninth edition of the Judd reference notes that this issue was "made in quantity as a numismatic curiosity." The curiosity comment is accurate, but the statement should read, "made in a *limited* quantity," since it would appear that less than a dozen examples are known in all grades. In fact, the combined population at NGC and PCGS is 10 pieces—a figure that likely includes resubmissions of the same pattern.

**Physical Description.** With claims to a full Red designation, this intensely beautiful example is seemingly unimprovable in terms of quality. The mirrored surfaces shimmer around contrasting design devices on both sides, and the details are well formed. A wisp of darker patination on the high points and in the obverse fields keeps this offering at the PR67 Red and Brown level, which is the finest graded at either service as of (11/08). A Superb Gem proof pattern destined for the finest of cabinets.

**Provenance.** *Ex: Stack's private treaty transaction.*
*From The Lemus Collection, Queller Family Collection Part Two.*
(#81042)

# The Finest Graded Judd-810 Pattern
# 1870 Standard Silver Half Dime
# High R.7, PR66 Cameo

1721 **1870 Standard Silver Half Dime, Judd-810, Pollock-898, High R.7, PR66 Cameo NGC.**

**Design.** A seated Liberty faces left while supporting a shield with a scroll inscribed LIBERTY on her right side and holding an olive branch in her left hand. A crudely fashioned cap atop a pole awkwardly looms in the background. UNITED STATES / OF AMERICA occupies the periphery with the date, 1870, in exergue. The reverse design features the denomination, 5 / CENTS, enclosed within a wreath of cotton and corn that is tied with a bow at the bottom. The legend STANDARD—in smaller letters—is at the upper periphery. Struck in silver with a plain edge.

**Commentary.** Judd-809 through Judd-814 patterns of 1870 introduced the first and only use of the half dime denomination for the Standard Silver series, a type that was absent from the 1869 issues. William Barber's obverse die is the same used to strike the 1870 three cent silver patterns, Judd-796 through Judd-801.

**Physical Description.** Deeply mirrored surfaces surrounding frosty devices are the most noticeable attributes of this well-struck survivor. Variegated blue and rose coloration, although subtle, is observed when viewed under direct light. This piece is the first in Andrew Pollock's 1994 roster, where he describes it as weighing 19.0 grains with a diameter of 0.600 inches. The NGC *Census Report* records only two pieces: the current offering—the only Cameo representative—and a PR62 example. PCGS documents four specimens, the finest a PR64 Cameo.

**Provenance.** *Ex: Reed Hawn Collection (Stack's, 3/1977), lot 761. From The Lemus Collection, Queller Family Collection Part Two.* (#61054)

# 1870 Standard Silver Half Dime, Judd-811
# PR65 Red and Brown

1722 **1870 Standard Silver Half Dime, Judd-811, Pollock-899, Low R.7, PR65 Red and Brown NGC.**

**Design.** A seated Liberty faces left while supporting a shield with a scroll inscribed with LIBERTY on her right side and holding an olive branch in her left hand. A crudely fashioned cap atop a pole awkwardly looms in the background. UNITED STATES / OF AMERICA occupies the periphery with the date, 1870, in exergue. The reverse design features the denomination, 5 CENTS, enclosed within a wreath of cotton and corn tied with a bow at the bottom. The legend STANDARD—in smaller letters—is at the upper periphery. Struck in copper with a reeded edge.

**Commentary.** The Judd-809 through Judd-814 half dime patterns are described as "numismatic productions" in the ninth edition of the Judd reference. Q. David Bowers elaborates in *The Harry W. Bass, Jr. Museum Sylloge:* "In 1870, silver half dimes did not circulate in the East or Midwest, nor had they since the summer of 1862. By this time the nickel five cent piece was well established (having been introduced in 1866), and there were no plans to create a new half dime design. The Coinage Act of 1873 abolished the half dime." In other words, the Mint produced the Standard Silver half dime patterns for the benefit of numismatists, as well as the coffers of certain officials and insiders.

**Physical Description.** Ample red coloration adorns this Gem pattern; there is actually more red than brown. Three carbon flecks are present on the obverse: one on the E of AMERICA, another below the final A of the same legend, and an insignificant speck in the left obverse field. Otherwise the strike is bold, and the surfaces are well preserved. **NGC Census:** 1 in PR65 Red and Brown, with 1 PR65 Red finer. **PCGS Population:** None in PR65 Red and Brown, none finer in Red and Brown, with 2 pieces graded PR64 Red (12/08).

**Provenance.** *Ex: Reed Hawn Collection (Stack's, 3/1977), lot 762.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#71055)

# 1870 Half Dime Pattern in Copper PR66 Red and Brown
# Judd-817, High R.6

1723 **1870 Half Dime, Judd-817, Pollock-906, High R.6, PR66 Red and Brown NGC.**

**Design.** A seated Liberty faces left while supporting a shield with a scroll inscribed with LIBERTY on her right side and holding an olive branch in her left hand. A crudely fashioned cap and pole are suspended in the background. UNITED STATES / OF AMERICA occupies the periphery with the date, 1870, in exergue. A regular 1870 half dime reverse die was used to strike the Judd-815 through Judd-820 patterns. HALF DIME is enclosed within a wreath of corn, wheat, oak, and maple, tied with a bow at the bottom. Struck in copper with a reeded edge.

**Commentary.** More patterns were produced in 1870 than any other year in the history of the U.S. Mint. In fact, more than 250 different varieties are documented for the year. The large selection of patterns includes certain issues that have a questionable status, including the current offering. If no new half dime designs were being contemplated for circulation, then why would the Mint produce several variations of the denomination in a range of metals and edge types? The most plausible explanation is collector demand.

**Physical Description.** Fiery red surfaces are occasionally interrupted by areas of darker patination, primarily on the high points of the design; hence the Red and Brown designation by NGC. Save for slight rim weakness at the 12 o'clock obverse position, the strike is bold, and the overall eye appeal is consistent with a Premium Gem proof grade. A few scattered toning spots on both sides are noted for the sake of accuracy. **NGC Census:** 4 in PR64 Red and Brown, none finer, with a single coin graded PR66 Brown Cameo. **PCGS Population:** None in PR66 Red and Brown, none finer in Red and Brown, with 2 pieces graded PR64 Red (12/08).

**Provenance.** *Ex: Reed Hawn Collection (Stack's, 3/1977), lot 765. From The Lemus Collection, Queller Family Collection Part Two.* (#71061)

# One of the Finest Known Judd-818
# 1870 Half Dimes in Copper
# PR67 Red and Brown

1724 **1870 Half Dime, Judd-818, Pollock-907, Low R.7, PR67 Red and Brown NGC.**

**Design.** A seated Liberty faces left while supporting a shield with a scroll inscribed with LIBERTY on her right side and holding an olive branch in her left hand. A crudely fashioned cap and pole are suspended in the background. UNITED STATES / OF AMERICA occupies the periphery with the date, 1870, in exergue. A regular 1870 half dime reverse die was used to strike the Judd-815 through Judd-820 patterns. HALF DIME is enclosed within a wreath of corn, wheat, oak, and maple, tied with a bow at the bottom. Struck in copper with a plain edge.

**Commentary.** Pattern researchers believe that less than 12 Judd-818 survivors exist today. By way of relatively fewer varieties and lower production totals, the half dime patterns of 1870 are far scarcer than the dimes, quarters, and fifty cent pieces of the same year. As one example, there are 16 half dime pattern varieties dated 1870, against a total of 51 dime issues.

**Physical Description.** Per the ninth edition of *United States Pattern Coins* by Judd: "As is always the case with patterns of this era, copper strikings are very difficult to find in a combination of high grade and pleasing eye appeal." The current piece offers both attributes, and is the only PR67 Judd-818 pattern—regardless of color designation—graded by either service as of (11/08), with none finer. Pristine red surfaces confirm that this Superb Gem proof example was carefully preserved from the moment it left the Mint. **NGC Census:** 1 in PR67 Red and Brown, none finer. **PCGS Population:** none in PR67 Red and Brown, none finer in Red and Brown, with a single PR64 Red (12/08).

**Provenance.** *Ex: Stack's private treaty transaction.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#71062)

# Breathtaking 1870 Half Dime in Aluminum
# Judd-819, High R.7
# PR67 ★ Ultra Cameo, Finest Known

1725 **1870 Half Dime, Judd-819, Pollock-909, High R.7, PR67 ★ Ultra Cameo NGC.**

**Design.** A seated Liberty faces left while supporting a shield with a scroll inscribed with LIBERTY on her right side and holding an olive branch in her left hand. A crudely fashioned cap and pole are suspended in the background. UNITED STATES / OF AMERICA occupies the periphery with the date, 1870, in exergue. A regular 1870 half dime reverse die was used to strike the Judd-815 through Judd-820 patterns. HALF DIME is enclosed within a wreath of corn, wheat, oak, and maple, tied with a bow at the bottom. Struck in aluminum with a reeded edge.

**Commentary.** The acquisition of a Judd-819 pattern—currently considered a High R.7 variety with less than six examples known—in any condition is cause to celebrate. Pollock identified a mere three specimens in his 1994 pattern treatise, inclusive of the piece offered here. The Dannreuther-Garrett compilation of auction records between 1990 and 2005 failed to record a single instance of a Judd-819 pattern—an astonishing testimonial to the absolute rarity of this issue—and the current sale marks the first auction appearance of this variety in 20 years.

**Physical Description.** Incredible device-to-field contrast earned this piece an Ultra Cameo designation by NGC. The razor-sharp strike and virtually untouched surfaces combine to further justify a Superb Gem grade. Finally, the entire ensemble taken as a whole more than merits NGC's special Star designation for its phenomenal eye appeal. In a word, this special pattern is breathtaking. Census: 1 in 67 ★ Ultra Cameo, 0 finer (11/08).

**Provenance.** *Ex: Reed Hawn Collection (Stack's, 3/1977), lot 767. From The Lemus Collection, Queller Family Collection Part Two.* (#61063)

## 1870 Half Dime Pattern, PR66 Red and Brown Judd-821, High R.7

1726 **1870 Half Dime, Judd-821, Pollock-911, High R.7, PR66 Red and Brown NGC.**

**Design.** Judd-821 to Judd-824 patterns are actually trial pieces struck from regular dies, but on copper, aluminum, or nickel planchets. As such, the design is identical to a regular issue 1870 Seated half dime; Liberty, holding a pole and cap in her left hand, sits on a rock while supporting a shield and a ribbon bearing her name. UNITED STATES OF AMERICA circles the obverse periphery, with the date below. The reverse features the denomination HALF DIME within an ornate wreath of corn, wheat, maple, and oak leaves. Struck in copper with a reeded edge.

**Commentary.** Technically speaking, Judd-821 is a die trial, although it is generally referred to as a pattern. The current offering is one of seven patterns purchased at the March 1973 Stack's auction of the Reed Hawn Collection, and every piece was of the half dime denomination. Each example is of unusually high quality and the current offering is not an exception.

**Physical Description.** Red coloration dominates the surfaces of this Premium Gem proof, despite the Red and Brown designation by NGC. The strike is bold and there are no distractions worthy of individual mention, save for a small carbon spot well-concealed within the left (facing) wreath. Documented in Pollock at 19.3 grains with a diameter of 0.605 inches. There are a mere 4 instances of the Judd-821 being graded at NGC and PCGS combined, with this piece as the finest certified. **Complete NGC Census:** 1 in PR65 Brown Cameo and 1 in PR66 Red and Brown. **Complete PCGS Population:** 1 PR65 Brown and 1 PR65 Red and Brown (12/08).

**Provenance.** *Ex: Reed Hawn Collection (Stack's, 3/1977), lot 769. From The Lemus Collection, Queller Family Collection Part Two.* (#61065)

## Pleasantly Toned 1870 Standard Silver Dime, Judd-825, PR66

1727 **1870 Standard Silver Ten Cents, Judd-825, Pollock-915, Low R.7, PR66 NGC.**

**Design.** A left-facing seated Liberty holds a shield at her right side and an olive branch in her left hand. A scroll inscribed with LIBERTY flows across the shield, and a crudely fashioned cap and pole are suspended in the background. UNITED STATES / OF AMERICA occupies the periphery with the date, 1870, in exergue. On the reverse 10 / CENTS is within an open wreath of cotton and corn, tied with a bow at the bottom. STANDARD—in small letters—is found at the edge above the wreath, and the rim is unusually wide. Struck in silver with a reeded edge.

**Commentary.** Nine distinct classes of 1870 dime patterns are known, including seven Standard Silver issues such as the current offering. The first eight of the nine dime groups comprise six variations: silver, copper, and aluminum, each with either a reeded or plain edge. The result is a total of 51 different dime patterns dated 1870—more than any other year by a wide margin.

**Physical Description.** Attractive cobalt and azure hues intermingle with peach toning throughout. The average strike of this Premium Gem proof is redeemed by substantial eye appeal and remarkably clean surfaces. Pollock (1994) notes that the current offering weighs 38.4 grains and has a diameter of 0.703 inches. The die alignment is 170 degrees. **NGC Census:** 1 in PR66, none finer. **PCGS Population:** 1 in PR66, none finer (12/08).

**Provenance.** *Ex: Bareford Collection (Stack's, 10/1981). From The Lemus Collection, Queller Family Collection Part Two.* (#61069)

## Attractively Toned 1870 Dime
## Judd-831, Gem Proof

1728 **1870 Ten Cents, Judd-831, Pollock-921, High R.6, PR65 NGC.**

**Design.** A left-facing seated Liberty holds a shield at her right side and an olive branch in her left hand. A scroll inscribed with LIBERTY flows across the shield, and a crudely fashioned cap and pole are suspended in the background. UNITED STATES / OF AMERICA occupies the periphery with the date, 1870, in exergue. The reverse is that of the regular dime issue for the year. Struck in silver with a reeded edge.

**Commentary.** This variety marks the beginning of the Judd-831 to Judd-836 run of 1870 dime patterns. Barber's peculiar obverse die was mated with a regular reverse die to create the six patterns, which, technically speaking, were not produced to test a new concept. Rather, these and many other 1870 patterns were concocted to sell to collectors of the era, who were growing in number thanks to the increased production of numismatic periodicals and other factors.

**Physical Description.** Blue-gray coloration intermingles with rose highlights throughout on this Gem beauty. The surfaces are flashy and every bit deserving of the PR65 determination by NGC. The cataloger of this piece in the Stack's November 2004 sale documented a weight of 38.7 grains. **NGC Census:** 4 in PR65, 1 finer. **PCGS Population:** 1 in PR65, none finer, with 1 PR63 Cameo (12/08).

**Provenance.** *Ex: Public Auction Sale (Stack's, 11/2004), lot 721.*
*From The Lemus Collection, Queller Family Collection Part Two.*(#61075)

# Rare 1870 Seated Liberty Dime Pattern
# William Barber's Design
# Judd-832, PR66, Finest Certified

1729 **1870 Ten Cents, Judd-832, Pollock-922, Low R.7, PR66 NGC.**

**Design.** Attributed to William Barber, the obverse depicts a seated figure of Liberty facing left and supporting a shield in her right hand, an olive branch in her left. A free-standing liberty pole is present behind the shield. The reverse has the same cereal wreath type used to coin regular issue 1870 dimes. Sets were available of this design in silver, copper, and aluminum with either reeded or plain edges. It is unknown what price the Mint sold these for. This obverse was also combined with the Standard Silver wreath reverse. Struck in silver with a plain edge.

**Commentary.** The Mint marketed various five-piece sets of William Barber's Seated Liberty coinage to collectors in 1870. Each set consisted of the five silver denominations from half dime through dollar, and they appeared in copper, silver, and aluminum, each with either a reeded edge or a plain edge. In total there were 30 different varieties among the five denominations. The sets struck in silver with a plain edge included Judd-816, 832, 883, 934, and 1003. Each denomination incorporated the William Barber obverse design with the regular issue reverse design.

**Physical Description.** A stunning Premium Gem proof with intermingled violet, cobalt-blue, and gold toning over fully mirrored fields. The devices on both sides are lustrous, with noticeable contrast, although such a designation has eluded this piece due to its deep original toning. This is the single finest certified of this pattern variant at either NGC or PCGS (11/08).

**Provenance.** *Nate Smith Collection (Stack's, 3/1973), lot 443*
*From The Lemus Collection, Queller Family Collection Part Two.*
(#61076)

## 1870 Seated Dime Pattern, Judd-833
## PR66 Red and Brown

1730 **1870 Ten Cents, Judd-833, Pollock-923, High R.6, PR66 Red and Brown NGC.**

**Design.** A left-facing seated Liberty holds a shield at her right side and an olive branch in her left hand. A scroll inscribed with LIBERTY flows across the shield and a crudely fashioned cap and pole are suspended in the background. UNITED STATES / OF AMERICA occupies the periphery with the date, 1870, in exergue. The reverse is that of the regular dime issue for the year. Struck in copper with a reeded edge.

**Commentary.** The USPatterns.com website opines that approximately 12 examples of Judd-833 exist in all grades. Pollock (1994) was able to document 11 specimens, and the combined total of certified examples at the major grading services confirms the consensus of a High R.6 rarity.

**Physical Description.** Glimmering surfaces radiate lilac and magenta coloration on both sides of this Premium Gem proof. The strike is expectedly bold. **NGC Census:** 4 in PR66 Red and Brown, none finer. **PCGS Population:** 1 in PR66 Red and Brown, none finer (12/08).

**Provenance.** *Ex: Stack's private treaty transaction.*
*From The Lemus Collection, Queller Family Collection Part Two.*(#61077)

# High R.7 1870 Dime Pattern, PR67 Cameo
# Likely the Finest Known Judd-835

1731 **1870 Ten Cents, Judd-835, Pollock-926, High R.7, PR67 Cameo NGC.**

**Design.** A left-facing seated Liberty holds a shield at her right side and an olive branch in her left hand. A scroll inscribed with LIBERTY flows across the shield and a crudely fashioned cap and pole are suspended in the background. UNITED STATES / OF AMERICA occupies the periphery with the date, 1870, in exergue. The reverse is that of the regular dime issue for the year. Struck in aluminum with a reeded edge.

**Commentary.** A rare pattern, in the strictest sense. Andrew Pollock documented only two specimens—this piece and the King Farouk pattern that was part of Sotheby's February 1954 Palace Collections of Egypt sale. The number of auction appearances over the past few decades indicates that fewer than six examples are extant in all grades, and most of those pieces are likely in tightly held collections. In any case, this Superb Gem Cameo piece is quite likely the finest known, as well as one of the very few available.

**Physical Description.** Considering the aluminum composition, this blast-white specimen boasts astoundingly deep mirrors. The devices display considerable contrast with the mirrored fields, fully justifying the NGC Cameo designation. This is a well-struck Superb Gem Cameo proof and the only Judd-835 documented in the NGC *Census Report* as of (11/08). PCGS has certified only a single example of the Judd-835, a PR65 non-Cameo piece.

**Provenance.** *Ex: Estates of Philip M. Mann, Jr. and Glenn B. Smedley (Bowers and Merena, 9/1988), lot 591.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#61079)

UNITED STATES OF AMER
1870
STATES OF AMERICA

## 1870 Seated Liberty Aluminum Ten Cent Judd-836, PR65

1732 **1870 Ten Cents, Judd-836, Pollock-927, High R.7, PR65 PCGS.**

**Design.** The obverse is the William Barber Liberty Seated design, with Liberty holding a pole topped by a Liberty cap. UNITED STATES is to the left and OF AMERICA to the right; the date 1870 is below. The shield is behind her rather than in front, with a drape reading LIBERTY across the top. The reverse is the regular dime die of the year. Struck in aluminum with a plain edge.

**Commentary.** Minor coinage sets of these designs were sold complete from the half dime to dollar, in copper, aluminum, or silver with plain or reeded edge, some also including a silver three cent piece, such as the Eliasberg and Parmelee sets. USPatterns.com estimates that fewer than a half-dozen are known.

**Physical Description.** A well-struck and attractive Gem example, despite the minor planchet defects that are often seen on the Mint's early experiments with producing aluminum coinage. In a PCGS green-label holder. **PCGS Population:** one PR64, two PR65 (including this piece) (11/08). **NGC Census:** none.

**Provenance.** *Unknown.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#61080)

## 1870 Standard Silver Dime, Judd-837, PR64

1733 **1870 Standard Silver Ten Cents, Judd-837, Pollock-928, R.5, PR64 NGC.**

**Design.** Obverse Liberty Head with cap and three stars, UNITED STATES OF AMERICA around, motto IN GOD WE TRUST on scroll below. Reverse 10 / CENTS / 1870 inside an open agricultural wreath, STANDARD at the rim above. Struck in silver with a reeded edge.

**Commentary.** The 1870 Standard Silver dimes come in many different combinations of dies and metal. This is another plentiful type, rated R.5 (31-75 pieces known).

**Physical Description.** The silvery surfaces are tinged with pink on the obverse, and deeper lilac and ice-blue accents the reverse. Minor contact explains the grade. **NGC Census:** 6 in PR64, 11 finer. **PCGS Population:** None in PR64, 1 finer (12/08).

**Provenance.** *Ex: Stack's private treaty (10/1981).*
*From The Lemus Collection, Queller Family Collection Part Two.* (#61081)

## Lovely 1870 Standard Silver Dime Pattern in Silver Judd-838, PR65

1734 **1870 Standard Silver Ten Cents, Judd-838, Pollock-929, High R.6, PR65 NGC.**

**Design.** A capped bust of Liberty faces right with UNITED STATES OF AMERICA around and IN GOD WE TRUST on a scroll below. Three stars appear at the front of the cap, although one is mostly hidden from view. On the reverse 10 CENTS and 1870 are within a wreath of cotton and corn with STANDARD above. Struck in silver with a plain edge.

**Commentary.** Nine-coin sets of the Standard Silver 10, 25, and 50 cent pieces of 1870 were marketed to collectors for $15 per set through the Philadelphia Mint. With various designs, a variety of compositions, and both plain edge and reeded edge pieces, several different sets were available. This pattern issue in silver, plain edge, was part of a set that included Judd-838, 844, 850, 889, 895, 901, 940, 946, and 952.

**Physical Description.** An outstanding Gem proof with considerable rich blue toning over pale gray and gold surfaces. Both sides have lightly mirrored fields, with a satiny appearance on the devices. The surfaces are visibly pristine, and the entire presentation is one of significant aesthetic appeal. **NGC Census:** 1 in PR65, 2 finer. **PCGS Population:** 1 in PR65, 1 finer (12/08).

**Provenance.** *Stack's (10/1986), lot 55.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#61082)

## 1870 Standard Silver Dime in Copper Judd-839, High R.7, PR65 Brown

1735 **1870 Standard Silver Ten Cents, Judd-839, Pollock-930, High R.7, PR65 Brown NGC.**

**Design.** Obverse Liberty Head with cap and three stars, UNITED STATES OF AMERICA around, motto IN GOD WE TRUST on scroll below. Reverse 10 / CENTS / 1870 inside an open agricultural wreath, STANDARD at the rim above. Struck in copper with a reeded edge.

**Commentary.** Rated High R.7, this is an extremely elusive variety, even among patterns. USPatterns.com estimates that only a half-dozen examples are known, the vast majority of which qualify for the "Brown" designation.

**Physical Description.** The brightly mirrored fields enhance the overlying brown and blue colors on each side of this attractive Gem. **NGC Census:** 1 in PR65 Brown, 1 finer. **PCGS Population:** None in PR65 Brown, none finer, with a single PR64 Red and Brown (12/08).

**Provenance.** *Ex: T. Henry Allen Collection (Stack's, 2/1977), lot 365.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#61083)

## 1870 Standard Silver Dime, Judd-843 PR66, Tied for Finest Certified

1736 **1870 Standard Silver Ten Cents, Judd-843, Pollock-942, Low R.6, PR66 NGC.**

**Design.** The Liberty Head design, no stars on the tiara, IN GOD WE TRUST on a scroll below the portrait. On the reverse an open agricultural wreath encloses 10 CENTS, date 1870 below. STANDARD is at the upper rim. Struck in silver with a reeded edge.

**Commentary.** These were struck in both plain edge and reeded edge versions, and both are generally available for a price. Although Judd rates both issues Low R.6 (21-30 known), there are 19 plain edge (Judd-844) pieces certified at both services combined, compared with 50 of the reeded edge (Judd-843)—as always, less a percentage of duplications.

**Physical Description.** A delicate blush of gold and ice-blue accentuates the mostly silver-gray surfaces. An attractive and high-end survivor of this relatively available Standard Silver issue. This piece is tied for finest certified at either service, with a half-dozen so graded (11/08).

**Provenance.** *Ex: Gibson-Groves Collections (Stack's, 11/1974), lot 457.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#61087)

## Gem Proof 1870 Standard Silver Dime, Judd-844

1737 **1870 Standard Silver Ten Cents, Judd-844, Pollock-943, Low R.6, PR65 NGC.**

**Design.** Obverse Liberty Head with starless cap, UNITED STATES OF AMERICA around, motto IN GOD WE TRUST on scroll below. Reverse 10 / CENTS / 1870 inside an open agricultural wreath, STANDARD at the rim above. Struck in silver with a plain edge.

**Commentary.** Although it is overgeneralizing (there are exceptions), the silver, plain or reeded edge 1870 Standard Silver dimes are *generally* more obtainable than their copper or aluminum counterparts.

**Physical Description.** The silver-gray, attractive surfaces show just a barely discernible tinge of golden color at the extreme rim. A well-struck and problem-free Gem. **NGC Census:** 4 in PR65, 1 finer. **PCGS Population:** 3 in PR65, none finer (12/08).

**Provenance.** *Ex: Stack's (6/1988), lot 443.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#61088)

## Beautifully Toned PR66 1870 Standard Silver Dime, Judd-849

1738 **1870 Standard Silver Ten Cents, Judd-849, Pollock-956, R.5, PR66 NGC.**

**Design.** Obverse Liberty Head with hairbun and star on headband, UNITED STATES OF AMERICA around, motto IN GOD WE TRUST on scroll below. Reverse 10 / CENTS / 1870 inside an open agricultural wreath, STANDARD at the rim above. Struck in silver with a reeded edge.

**Commentary.** Plentiful for a pattern issue, ranked as R.5 by both Judd and USPatterns.com.

**Physical Description.** Splendid patina of deep blue and pinkish-gold graces both sides of this pretty Premium Gem example. Some strike softness appears on Liberty's tresses, a design problem that would dog most 19th century coin designs overall. **NGC Census:** 2 in PR66, 1 finer (a PR66 Cameo). **PCGS Population:** 1 in PR66, none finer (12/08).

**Provenance.** *Ex: Stack's (5/1975), lot 946.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#61093)

## Condition Census 1870 Standard Silver Dime Judd-850, PR65, High R.6

1739 **1870 Standard Silver Ten Cents, Judd-850, Pollock-957, High R.6, PR65 NGC.**

**Design.** Obverse Liberty Head with hair bun and star on headband, UNITED STATES OF AMERICA around, motto IN GOD WE TRUST on scroll below. Reverse 10 / CENTS / 1870 inside an open agricultural wreath, STANDARD at the rim above. Struck in silver with a plain edge.

**Commentary.** Much more elusive than its reeded edge counterpart in silver (Judd-849, rated R.5), this High R.6 plain edge pattern variant has an estimated 13 to 18 survivors. Although USPatterns.com merely calls both types "fairly common," the certified data tend to reinforce our belief: NGC and PCGS together have certified 39 examples of the Judd-849, but only 15 specimens of Judd-850—as always, less duplications.

**Physical Description.** Pinkish-gold highlights visit both sides of this untroubled Gem. **NGC Census:** one PR64, two PR65 (including this piece), one PR66 Cameo finer. **PCGS Population:** seven in PR62-PR64, three PR65, one PR66 (11/08).

**Provenance.** *Ex: Bowers and Merena (11/1988), lot 5400.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#61094)

## Near-Gem Judd-855 1870 Standard Silver Ten Cent, Date Below Wreath

1740 **1870 Standard Silver Ten Cents, Judd-855, Pollock-935, High R.6, PR64 NGC.**

**Design.** Obverse Liberty Head with cap and three stars, UNITED STATES OF AMERICA around, motto IN GOD WE TRUST on scroll below. Reverse 10 / CENTS inside a small oak and laurel wreath. STANDARD SILVER, in large letters, arcs along the top half of the reverse rim. The date 1870 is at the lower reverse rim. Struck in silver with a reeded edge.

**Commentary.** This is one of two reverse styles used on Standard Silver dimes in 1870, Date Within Wreath and Date Below Wreath. The differences in the two variants are fairly striking.

**Physical Description.** The attractive surfaces show pinkish-gold highlights on both sides that add to the charm. Some light contact and minor planchet striations appear on the reverse. **NGC Census:** 2 in PR64, 5 finer. **PCGS Population:** 2 in PR64, 1 finer (12/08).

**Provenance.** *Ex: Stack's private treaty (10/1981).*
*From The Lemus Collection, Queller Family Collection Part Two.* (#61099)

## Lovely Gem 1870 Standard Silver Ten Cent Judd-867, High R.6

1741 **1870 Standard Silver Ten Cents, Judd-867, Pollock-963, High R.6, PR65 NGC.**

**Design.** Obverse Liberty Head with hairbun and star on headband, UNITED STATES OF AMERICA around, motto IN GOD WE TRUST on scroll below. Reverse 10 / CENTS inside a small oak and laurel wreath. STANDARD SILVER, in large letters, arcs along the top half of the reverse rim. The date 1870 is at the lower reverse rim. Struck in silver with a reeded edge.

**Commentary.** Combines the obverse of Judd-849 and similar types with the reverse of Judd-855 and its siblings. The obverse die was first used on Judd-708 of 1869.

**Physical Description.** Dappled highlights of heather and fuchsia appear on both sides of this charming Gem coin. **NGC Census:** 1 in PR65, 3 finer. **PCGS Population:** 1 in PR65, 4 finer (12/08).

**Provenance.** *Ex: Stack's private treaty (10/1981).*
*From The Lemus Collection, Queller Family Collection Part Two.* (#61111)

## Attractive 1870 Standard Silver Dime
## Judd-868, PR65

1742 **1870 Standard Silver Ten Cents, Judd-868, Pollock-964, Low R.7, PR65 NGC.**

**Design.** Obverse Liberty Head with hairbun and star on headband, UNITED STATES OF AMERICA around, motto IN GOD WE TRUST on scroll below. Reverse 10 / CENTS inside a small oak and laurel wreath. STANDARD SILVER, in large letters, arcs along the top half of the reverse rim. The date 1870 is at the lower reverse rim. Struck in silver with a plain edge.

**Commentary.** Ranked Low R.7 by the Judd reference book, somewhat rarer than its High R.6 reeded edge counterpart, Judd-867. There are 12 Judd-867s at NGC and PCGS combined, compared to nine Judd-868s.

**Physical Description.** Pinkish-gold tinges predominate, with hints of ice-blue and some minor planchet striations evident on the reverse. A sharply struck and attractive Gem example. **NGC Census:** 4 in PR65, 1 finer. **PCGS Population:** 3 in PR65, none finer (12/08).

**Provenance.** *Ex: Stack's private treaty (11/1981).*
*From The Lemus Collection, Queller Family Collection Part Two.* (#61112)

## Copper 1870 Standard Silver Dime
## Judd-869, High R.7, PR63 Brown

1743 **1870 Standard Silver Ten Cents, Judd-869, Pollock-965, High R.7, PR63 Brown NGC.**

**Design.** Obverse Liberty Head with hair bun and star on headband, UNITED STATES OF AMERICA around, motto IN GOD WE TRUST on scroll below. Reverse 10 / CENTS inside a small oak and laurel wreath. STANDARD SILVER, in large letters, arcs along the top half of the reverse rim. The date 1870 is at the lower reverse rim. Struck in copper with a reeded edge.

**Commentary.** A rare copper, reeded edge variant, rated High R.7 in the Judd reference. Further confirmation is provided by the paucity of certified survivors.

**Physical Description.** Yellow, blue, and rose highlights flash under a light on this Select proof piece. A curly lintmark is noted in the right obverse field under Liberty's throat, providing a pedigree marker. Other lintmarks and minor contact evidence appear on the reverse. Despite the seemingly modest grade, plenty of appeal remains on this piece. This is the sole certified example at NGC, while PCGS has certified four pieces in PR64 and PR65 (11/08).

**Provenance.** *Ex: Stack's private treaty.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#61113)

## Anomalous 1870 'Stateless' Pattern Quarter Judd-877, Ex: King Farouk, PR63

1744 **1870 Standard Silver Quarter Dollar, Judd-877, Pollock-974, Low R.7, PR63 NGC.**

**Design.** The obverse displays a seated figure of Liberty facing left with 13 stars arranged around the border and the date below. Liberty supports a shield with her left (facing) hand, over which a scroll inscribed with LIBERTY is draped. The reverse depicts the denomination 25 / CENTS within a wreath of cotton and corn. The word STANDARD is at the top. Struck in silver with a plain edge.

**Commentary.** The muling of Barber's obverse with the Standard Silver reverse is anomalous, with no mention of the issuing authority, the United States of America. Probably about 10 to 12 examples of Judd-877 are known in various grades, including this piece from the King Farouk Collection.

**Physical Description.** A splendid cameo proof, although undesignated as such, with light gold and iridescent toning over the mirrored fields on both sides. All of the design elements are bold, and the surfaces are exceptional, other than the typical faint hairlines encountered at the grade level (and often encountered on Ex: Farouk coins). **NGC Census:** 2 in PR63, 2 finer. **PCGS Population:** None in PR63, 3 finer (12/08).

**Provenance.** *Ex: King Farouk; Palace Collections of Egypt (Sotheby's, 2/1954), lot 1853; later, Stack's via private treaty.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#61121)

## Outstanding 1870 Standard Silver Quarter in Copper, Judd-878 PR66 Brown, Finest Certified

1745 **1870 Standard Silver Quarter Dollar, Judd-878, Pollock-975, Low R.7, PR66 Brown NGC.**

**Design.** William Barber's Seated Liberty design with a Liberty pole behind with a Phrygian cap atop and 13 stars around the margin. The reverse has 25 CENTS in the center, surrounded by a thick agricultural wreath with STANDARD in small letters at the top. Struck in copper with a reeded edge.

**Commentary.** Judd-878, part of the series of 1870 patterns without a country identification, is a rarity with less than a dozen known examples. NGC and PCGS together have seen 11 *certification events*, less the usual possible duplications.

**Physical Description.** While NGC calls this Premium Gem proof "brown," it is more accurately described as having violet, rose, and blue toning, over deep olive surfaces. Both sides are boldly detailed and highly attractive. This outstanding piece is the single finest certified at NGC *and* PCGS within any color designation (11/08).

**Provenance.** *Ex: Stack's (4/1971), lot 741.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#61122)

## Impressive 1870 Pattern Quarter
## Silver, Plain Edge, Judd-883, PR66 Cameo
## The Finest Graded at Either Service

1746 **1870 Quarter Dollar, Judd-883, Pollock-981, Low R.7, PR66 Cameo NGC.**

**Design.** The obverse depicts a seated figure of Liberty facing left, with 13 stars around and the date below. The reverse is of the regular issue design. Struck in silver with a plain edge.

**Commentary.** Judd-883 is part of the William Barber series of silver coins that were sold in sets, either with reeded edge pieces or plain edge pieces such as this one. The sets contained an example of each denomination from the half dime to the silver dollar. Barber probably began work on his own rendition of a Seated Liberty design shortly after James B. Longacre's death on January 1, 1869, although his left-facing Seated Liberty motif does not appear on pattern coinage until 1870. Barber's design was applied to patterns of every silver denomination in this year.

**Physical Description.** An incredibly attractive Premium Gem Cameo proof, this pattern has a dusting of light gold over both surfaces, framed by pale blue, violet, and iridescent toning. The design motifs are well defined. This piece represents the finest graded at either service and is likely one of the finest of the relatively few J-883 patterns extant. In his 1994 tome, Andrew Pollock documented this piece at a weight of 96.2 grains with a diameter of 0.948 inches. The die alignment is 180 degrees. **NGC Census:** 1 in PR66 Cameo, none finer. **PCGS Population:** The finest PCGS graded coins are 2 PR64 pieces (12/08).

**Provenance.** *Unknown.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#61127)

## Attractive 1870 Copper Quarter
## Judd-885, PR63 Brown

1747 **1870 Quarter Dollar, Judd-885, Pollock-983, Low R.7, PR63 Brown NGC.**

**Design.** The obverse depicts a William Barber portrait of Liberty seated left, with 13 stars around the periphery and the date 1870 below. The reverse is the same used to produce regular-issue 1870 Seated quarters. Struck in copper with a plain edge.

**Commentary.** The combination of Barber's Seated Liberty obverse and the regular-issue reverse exists in silver, copper, and aluminum, and each composition is known with a reeded edge or with a plain edge. Similar pieces were issued for every silver denomination from the three cent piece to the silver dollar, a total of six denominations and six varieties, or 36 pieces altogether. Such a collection would be virtually impossible to assemble, even with unlimited finances, as the opportunity to acquire individual pieces will present the major hurdle.

**Physical Description.** Both sides of this lovely proof quarter dollar pattern have considerable faded orange mint color, with splashes of light blue and iridescent toning. Typical faint hairlines and tiny contact marks are evident on the surfaces. **NGC Census:** 1 in PR63 Brown, 3 finer. **PCGS Population:** 2 in PR63 Brown, 7 finer (12/08).

**Provenance.** *Ex: Stack's (10/1988), lot 616.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#61129)

## 1870 Standard Silver Quarter
## Judd-888, PR62

1748 **1870 Standard Silver Quarter Dollar, Judd-888, Pollock-987, R.5, PR62 NGC.**

**Design.** A bust of Liberty wears a cap ornamented with three stars and faces right, the legend UNITED STATES OF AMERICA surrounds the figure, and a scroll with IN GOD WE TRUST is below. The reverse reads 25 CENTS 1870 in the center and is surrounded by a wreath of cotton and corn. Struck in silver with a reeded edge.

**Commentary.** What goes around, comes around. In 1870 as now, the Mint was flooding the market with a plethora of different items, some valued more for mere variety and curiosity's sake than for any true artistic or intrinsic value. Extensive nine-piece sets of the Standard Silver design were marketed for $15 per set. Each set contained three denominations, each with three design variants, in one metal. Judd-888 ranks among the most plentiful of all the Standard Silver issues.

**Physical Description.** Pale silver-gray surfaces have considerable deep steel toning on both sides, muting the otherwise reflective fields. Both sides have typical minor hairlines and contact marks, consistent with the grade. **NGC Census:** 4 in PR62, 15 finer. **PCGS Population:** 9 in PR62, 18 finer (12/08).

**Provenance.** *Ex: Stack's (12/1970), lot 782.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#61132)

## 1870 Plain Edge Standard Silver Quarter
## Judd-889, PR65

1749 **1870 Standard Silver Quarter Dollar, Judd-889, Pollock-988, Low R.7, PR65 NGC.**

**Design.** The Liberty Head design with cap and three stars on the tiara. On the reverse an open agricultural wreath encloses 25 CENTS, date 1870 below. STANDARD is at the upper rim. Struck in silver with a plain edge.

**Commentary.** Much rarer than the reeded edge version of the same pattern, with perhaps a dozen examples extant in all conditions. Andrew Pollock, in his *United States Patterns and Related Issues* (1994), documents six known examples of Judd-889, although the possibility of duplication in his roster exists. The quality of auction catalog photography varied in the early 1980s, so plate matching today can be challenging. If anything, there are less than six different specimens traced.

**Physical Description.** Delicious rose-pink toning covers the obverse, with the reverse adding some blue and violet accents. A pretty and well-struck Gem. Pollock provided measurements of the current offering in his reference: 84.4 grains, 0.898 in diameter, and a die alignment of "about 170 degrees." Census: 1 in 65, 1 finer (10/08).

**Provenance.** *Ex: Stack's private treaty.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#61133)

## 1870 Standard Silver Quarter
## Judd-894, PR64

1750 **1870 Standard Silver Quarter Dollar, Judd-894, Pollock-1001, R.5, PR64 NGC.**

**Design.** The Liberty Head design, no stars on the tiara. On the reverse an open agricultural wreath encloses 25 CENTS, date 1870 below. STANDARD is at the upper rim. Struck in silver with a reeded edge.

**Commentary.** At R.5, this is another widely available Standard Silver quarter, while still rare by the standards of U.S. numismatics. Judd-894 is known on both thick and thin planchets, although the difference is not designated in either attribution system. Pollock traced two thin flan variants in his 1994 treatise, but cautions that "it is likely that several exist." The thin planchet patterns weight approximately 77 grains, whereas the thick pieces examined measure between 84.3 and 84.4 grains. The piece offered here was struck on a thick planchet.

**Physical Description.** Tinges of pinkish-lilac and ice-blue on both sides enhance the appeal, despite the presence of some minor contact in the fields. A well struck and attractive coin. Census: 7 in 64, 10 finer including a handful of Cameo pieces (10/08).

**Provenance.** *Ex: Numismatic Gallery (1937), "AW-970," $10; Lee and Peter L. Shaffer Collections (Superior, 9/1988), lot 2848.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#61138)

## Toned 1870 Standard Silver Quarter
## Judd-895, PR64 ★

1751 **1870 Standard Silver Quarter Dollar, Judd-895, Pollock-1002, Low R.7, PR64 ★ NGC.**

**Design.** The Liberty Head obverse, with no star on the tiara. IN GOD WE TRUST is on a scroll below the portrait. On the reverse an open agricultural wreath encloses 25 CENTS, date 1870 below. STANDARD is at the upper rim. Struck in silver with a plain edge.

**Commentary.** Another plain-edge rarity, ranked as Low R.7 (seven to 12 pieces known). NGC and PCGS combined have certified 15 pieces, less duplicates.

**Physical Description.** Generous washes of turquoise cover most of the obverse, accompanied by smaller swaths of lilac and silver. The reverse shows similar hues with a larger untoned central area. NGC has certified this single PR64 Star, plus two PR65s and one PR67 Cameo (10/08). There are 11 certified at PCGS.

**Provenance.** *Ex: Greater New York Numismatic Convention Sale (Stack's, 4/1988), lot 832.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#61139)

## 1870 Standard Silver Quarter, Judd-896
## PR66 Brown, Tied for Finest Certified

1752 **1870 Standard Silver Quarter Dollar, Judd-896, Pollock-1003, Low R.7, PR66 Brown NGC.**

**Design.** The Liberty Head obverse, with no star on the tiara. IN GOD WE TRUST is on a scroll below the portrait. On the reverse an open agricultural wreath encloses 25 CENTS, date 1870 below. STANDARD is at the upper rim. Struck in copper with a reeded edge.

**Commentary.** Another Standard Silver issue that comes in reeded edge and plain edge variants; both are quite rare, although the plain edge, Judd-896, is somewhat less so than the reeded edge, Judd-897.

**Physical Description.** Lovely highlights of pale aquamarine and rose generously cover both obverse and reverse. Well struck and thoroughly attractive. This PR66 Brown is tied for finest certified with one other NGC-graded piece and one PCGS example, regardless of color designation (10/08).

**Provenance.** *Ex: Stack's (3/1995), lot 1404.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#61140)

# High-End 1870 Standard Silver Quarter Tied for Finest Certified Judd-900, PR66

1753 **1870 Standard Silver Quarter Dollar, Judd-900, Pollock-1015, R.5, PR66 NGC.**

**Design.** The obverse die is centered around a bust of Liberty facing right, wearing a headband with one star and the inscription LIBERTY. The legend UNITED STATES OF AMERICA surrounds the bust, with a scroll inscribed with the motto IN GOD WE TRUST below. The reverse features the denomination 25 CENTS and the date encircled in an agricultural wreath, with the word STANDARD above. Struck in silver with a reeded edge.

**Commentary.** USPatterns.com states that Judd-900 was produced for sale to collectors in sets with other denominations and designs for $15.00. An early auction appearance of such a set was in the Parmelee Collection (New York Coin & Stamp, 6/1890), lot 212, "1870 50c., 25c., 10c. STANDARD set: same obv. as on lot 194: three designs for each value. ***R*** values and dates in wreaths of corn, cotton and sugar; STANDARD in small letters above: silver: proofs: milled edges; 9 pcs." If Parmelee paid $15.00 for this set, he suffered a considerable loss, as the lot sold for $0.40 per piece. Unwary collectors have similar experiences today, with televised marketing of "special" Mint products.

**Physical Description.** A stunning Premium Gem proof that probably deserves a Cameo designation, although this piece is not designated as such. Both sides are sharply detailed, the obverse with vibrant rose, violet, and blue toning. The reverse is fully mirrored with toning that ranges from pale champagne to deep gold. A splash of lilac is also present. **NGC Census:** 2 in PR66, a single PR66★ is finer. **PCGS Population:** 2 in PR66, none finer, with a single PR64 Cameo (12/08).

**Provenance.** *Ex: Alto Collection (Stack's, 12/1970), lot 783. From The Lemus Collection, Queller Family Collection Part Two.* (#61144)

## Resplendent 1870 Standard Silver Quarter Judd-901, PR64

1754 **1870 Standard Silver Quarter Dollar, Judd-901, Pollock-1016, High R.6, PR64 NGC.**

**Design.** The bust of Liberty faces right on the obverse, with UNITED STATES OF AMERICA around and the motto IN GOD WE TRUST on a scroll below. Liberty's hair is tied in a bun, and the headband is ornamented with a star. On the reverse, the denomination 25 / CENTS and date 1870 are in a wreath of cotton and corn, with the inscription STANDARD above. Struck in silver with a plain edge.

**Commentary.** About a dozen examples are known, according to USPatterns.com. The rarity rating of High R.6 suggests slightly more than that number, between 13 and 18 pieces.

**Physical Description.** Bold obverse and reverse design details are evident on this lovely specimen. A few tiny contact marks are evident in the obverse field. The brilliant silver surfaces exhibit light champagne toning that deepens to gold along the borders. **NGC Census:** 3 in PR64, 2 finer. **PCGS Population:** 3 in PR64, 5 finer (12/08).

**Provenance.** *Ex: Abner Kreisberg (4/1967), lot 1182; Stack's (6/1986), lot 509.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#61145)

## Important 1870 Standard Silver Quarter Judd-910 Aluminum, PR63

1755 **1870 Standard Silver Quarter Dollar, Judd-910, Pollock-999, High R.7, PR63 NGC.**

**Design.** Standard Silver design with a bust of Liberty facing right on the obverse. Liberty's cap is ornamented with three stars and a ribbon with the inscription LIBERTY; the motto IN GOD WE TRUST is on a scroll at the lower periphery. The reverse depicts the denomination within a wreath of oak and laurel with STANDARD SILVER above and the date below. Struck in aluminum with a reeded edge.

**Commentary.** Less than a half-dozen examples of this aluminum pattern variety are known. In general terms, aluminum examples of the Standard Silver patterns are substantially rarer than either silver or copper patterns.

**Physical Description.** A brilliant light gray proof, this piece has deep mirrors and excellent contrast. Some minor surface roughness is typical for the composition, probably explaining the Select proof grade. This PR63 piece is nonetheless one of only two certified at NGC, behind a PR66 Star Cameo example (11/08). PCGS has graded but a single PR64 specimen.

**Provenance.** *Ex: Superior (9/1988), lot 2847.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#61154)

## Sensational 1870 Standard Silver Quarter, Judd-912 PR67 Cameo, Finest Certified

1756 **1870 Standard Silver Quarter Dollar, Judd-912, Pollock-1008, High R.6, PR67 Cameo NGC.**

**Design.** Standard Silver design, with the head of Liberty wearing a diadem and a ribbon inscribed LIBERTY in raised letters. The reverse reads STANDARD SILVER 1870 around the rim, with 25 / CENTS in the center of an oak and laurel wreath. Struck in silver with a reeded edge.

**Commentary.** Although the Standard Silver patterns struck in 1869 and 1870 are quite plentiful, consisting of many dozens of varieties among the various denominations, few can match the aesthetic desirability of the present piece.

**Physical Description.** This bold Superb Gem is a sensational example with full cameo contrast, as noted by NGC. The surfaces are fully and deeply mirrored around sharply defined design motifs. Both sides display light champagne color with splashes of deeper gold and iridescent toning. NGC has graded 10 examples, with this piece and a single PR67 non-Cameo example numerically tied for the finest. PCGS has certified a half-dozen specimens, the finest a PR66 (11/08).

**Provenance.** *Ex: Stack's private treaty.*
*From The Lemus Collection, Queller Family Collection Part Two.*
(#61156)

## Splendid 1870 Copper Standard Silver Quarter Judd-914, PR65 Brown

1757 **1870 Standard Silver Quarter Dollar, Judd-914, Pollock-1010, Low R.7, PR65 Brown NGC.**

**Design.** Liberty faces right and wears a plain tiara with a band inscribed LIBERTY, the motto IN GOD WE TRUST below, and the statutory legend around. The reverse has a wreath of oak and laurel around 25 / CENTS, with STANDARD SILVER above and the date below. Struck in copper with a reeded edge.

**Commentary.** About 12 pieces are known, per USPatterns.com. Andrew W. Pollock, III recorded this piece in his 1994 reference with a weight of 81.4 grains and die alignment of about 170 degrees.

**Physical Description.** Lovely olive and blue surfaces with light reflectivity rather than the usual deeper mirrored fields of most proof strikes. Both sides have countless tiny specks of lighter tan. This piece is the third finest that NGC has certified behind a PR67 Red and Brown and a PR65 Red and Brown. The best PCGS has graded is PR64 Red and Brown (11/08).

**Provenance.** *Superior (2/1987), lot 2833.*
*From The Lemus Collection, Queller Family Collection Part Two.*
(#61158)

High-End 1870 Standard
Silver Quarter
Judd-915, PR65
Red and Brown

# High-End 1870 Standard Silver Quarter
# Judd-915, PR65 Red and Brown

1758 **1870 Standard Silver Quarter Dollar, Judd-915, Pollock-1011, R.7, PR65 Red and Brown NGC.**

**Design.** The central figure of the obverse is a bust of Liberty facing right. Liberty is wearing a tiara with an eponymous inscription and her hair tied in a pony tail. The legend UNITED STATES OF AMERICA surrounds the bust above, and a scroll with the motto IN GOD WE TRUST is below. The reverse features the words 25 / CENTS encircled by a wreath of oak and laurel, with the inscriptions STANDARD SILVER above and the date below. Struck in copper with a plain edge.

**Commentary.** The Standard Silver coinage was an attempt to redeem the paper fractional currency or "shinplasters"—so-called because the notes quickly wore out and became filthy—that proliferated during the Civil War. The Standard Silver coinage was .900 fine, but lighter-weight than the regular silver coinage, which was still being hoarded after the war. It was hoped that the lighter-weight coinage would circulate because of its lesser intrinsic value. The concept was never adopted, however. The copper patterns were made for sale in sets with other denominations. USPatterns.com estimates a population of fewer than a dozen examples extant.

**Physical Description.** Well struck, with attractive mint red and crimson toning on the obverse. The reverse has an appealing golden-brown color. A pleasing specimen of this popular pattern. This piece is the only Red and Brown non-Cameo example at NGC, although a PR66 Red and Brown Cameo piece at that service is numerically finer (11/08). PCGS has certified two PR65 Red and Brown coins and a couple of Brown examples.

**Provenance.** *Ex: Lewis Reagan Collection (Stack's, 1/1996), lot 650.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#71159)

## Beautiful 1870 Standard Silver Half Dollar, Judd-929 PR65 Red and Brown

1759 **1870 Standard Silver Half Dollar, Judd-929, Pollock-1048, R.7, PR65 Red and Brown NGC.**

**Design.** The obverse portrays a seated figure of Liberty with shield and olive branch. A scroll is draped over the shield with the word LIBERTY inscribed in raised letters; a Liberty pole stands behind the shield. Thirteen stars surround the central devices, with the date in the exergue. The reverse features the denomination 50 / CENTS encircled by an agricultural wreath, with the word STANDARD spelled out above. Struck in copper with a reeded edge.

**Commentary.** William Barber designed the beautiful obverse of this pattern, one of his finest designs. There is some controversy concerning the design, as Pollock and Judd both list the variety with LIBERTY in incuse letters on the scroll, while USPatterns.com has seen only the raised letters design. The present example has raised letters. USPatterns.com estimates fewer than a dozen specimens are extant.

**Physical Description.** An attractive specimen with iridescent crimson and gold toning. A few unobtrusive handling marks near star 1 act as a pedigree marker. Tied with one other example at PCGS for finest certified in the Red and Brown designation. **NGC Census:** This piece is the only Judd-929 certified at NGC. **PCGS Population:** 3 Judd-929 pieces have been certified by PCGS, they grade PR66 Brown, PR65 Red and Brown, and PR66 Red (12/08).

**Provenance.** *Ex: Lloyd M. Higgins (Bowers and Merena, 1/1998), lot 699, listed as Judd-929A because of the raised letters controversy.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#71174)

# Magnificent 1870 Barber Design Half Dollar
# Judd-933, PR64 Cameo

1760 **1870 Half Dollar, Judd-933, Pollock-1039, Low R.7, PR64 Cameo NGC.**

**Design.** The obverse portrays a seated figure of Liberty with shield and olive branch. A scroll is draped over the shield, with the word LIBERTY inscribed, and a Liberty pole stands behind the shield. Thirteen stars surround the central devices, with the date in the exergue. The reverse is the design used for regular-issue coinage in 1870. Struck in silver with a reeded edge.

**Commentary.** The obverse die is one of the most appealing creations of William Barber, a beautiful adaptation of the Seated Liberty concept. The coins were produced for sale to collectors as part of complete silver sets. These sets were popular items at the time, and their sale probably provides the precedent for many of the specialty items the Mint offers to collectors today. An early appearance of such a set was in the Parmelee Collection (New York Coin & Stamp, 6/1890), lot 206, "1870 complete set 3c. to Dollar: heavily draped female figure seated l., holding shield and olive branch. Barber's design. **R** same as each of regular issue: silver: proofs: rare; 6 pcs." USPatterns.com estimates approximately one dozen specimens are extant.

**Physical Description.** The strike is phenomenal, with crisp detail on all of the richly frosted devices. The fields are deeply mirrored to produce the bold contrast characteristic of the Cameo designation. In his description of this piece in the Krugjohann Collection, Q. David Bowers declared, "No finer specimen of this stunningly attractive design does or could exist." **NGC Census:** 1 in PR64 Cameo, 1 finer plus an additional 5 pieces which are numerically finer, though lacking the Cameo designation. **PCGS Population:** PCGS has certified no Judd-933 pieces with the Cameo designation; their finest piece is a single PR65 (12/08).

**Provenance.** *Ex: Krugjohann Collection (Bowers and Ruddy, 5/1976), lot 1252; Auction '87 (Paramount, 7/1987), lot 333. From The Lemus Collection, Queller Family Collection Part Two.* (#61179)

## Barber 1870 Seated Half Dollar
## Judd-935, PR64 Brown

1761 **1870 Half Dollar, Judd-935, Pollock-1041, High R.6, PR64 Brown NGC.**

**Design.** A seated figure of Liberty faces left on the obverse, with 13 stars surrounding. The date is below, a free-standing Liberty pole is behind, and LIBERTY is inscribed on a scroll crossing a small shield. Paired with a regular-dies Seated half reverse, struck in copper with a reeded edge.

**Commentary.** William Barber's rendition of the Seated Liberty design that appeared on numerous pattern varieties of 1870. About 15 or 16 examples of this pattern variety are known.

**Physical Description.** Splashes of light tan, mellowed red, and iridescent toning accompany the medium brown surfaces of this Choice proof. The underlying fields are fully mirrored and pristine, around satiny and boldly detailed devices. **NGC Census:** 2 in PR64, 7 finer. **PCGS Population:** 2 in PR64, 7 finer (12/08).

**Provenance.** *Ex: Stack's (3/1992), lot 1710; Stack's (1/1993), lot 1560.*
*From The Lemus Collection, Queller Family Collection Part Two.*
(#61181)

## Gorgeous 1870 Copper Half Dollar
## Judd-936, PR65 Brown

1762 **1870 Half Dollar, Judd-936, Pollock-1042, High R.6, PR65 Brown NGC.**

**Design.** A seated figure of Liberty faces left on the obverse with 13 stars surrounding. The date is below, a free-standing Liberty pole is behind, and LIBERTY is inscribed on a scroll crossing a small shield. Paired with a regular-dies Seated half reverse, struck in copper with a plain edge.

**Commentary.** The same design as Judd-935, but with a plain edge that was produced by a smooth, unreeded collar. Like Judd-935, about 15 or 16 examples of this copper pattern are known.

**Physical Description.** A remarkable display of medium green and gold iridescence appears over the fully and deeply mirrored fields on both sides of this Gem proof. A few tiny spots are evident but are of little consequence. The obverse and reverse design motifs are fully lustrous, creating an excellent cameo appearance. **NGC Census:** 1 in PR65 Brown, none finer with the Brown Designation, however there are also a PR65★ Red and Brown, a PR66 Red and Brown, and a PR64 Red in the Census. **PCGS Population:** None in PR65 Brown, none finer with the Brown designation, however there are also 2 PR65 Red and Brown pieces, a PR64 Red and Brown, and a PR65 Red in the Population (12/08).

**Provenance.** *Ex: Stack's (8/1971), lot 466.*
*From The Lemus Collection, Queller Family Collection Part Two.*
(#61182)

## Popular Gem Proof 1870
## Standard Silver Half Dollar
## Judd-940, Pollock-1053

1763 **1870 Standard Silver Half Dollar, Judd-940, Pollock-1053, 1067, High R.6, PR65 NGC.**

**Design.** The central figure of the obverse is a bust of Liberty facing right, wearing a cap with two large stars and a ribbon inscribed LIBERTY in incuse letters. The legend UNITED STATES OF AMERICA arcs above, with a scroll inscribed IN GOD WE TRUST below. The reverse features the denomination 50 / CENTS and the date encircled in an agricultural wreath, with the word STANDARD above. Struck in silver with a plain edge.

**Commentary.** Pollock-1053 is a variety of Judd-940, distinguished by the position of the tip of Liberty's cap under the center of the second S in STATES. USPatterns.com estimates fewer than a dozen examples survive.

**Physical Description.** Sharply struck, with attractive shades of golden-brown toning on the obverse. The reverse retains its brilliant flash, under spots of golden-brown color. A pleasing example of this sought-after pattern. Census: 2 in 65, 1 in 65 Cameo, 0 finer (11/08). The finest at PCGS are a trio of PR64 specimens.

**Provenance.** *Ex: Public Auction Sale (Merkin, 6/1972), lot 328.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#61186)

# Important Copper 1870 Standard Silver Half Dollar
# Judd-942, Pollock-1069, PR64 Brown

1764 **1870 Standard Silver Half Dollar, Judd-942, Pollock-1069, High R.7, PR64 Brown NGC.**

**Design.** The obverse design is a bust of Liberty facing right, with the legend UNITED STATES OF AMERICA around and IN GOD WE TRUST on a scroll below. Liberty is wearing a cap ornamented with two stars, and a ribbon crossing her shoulder is inscribed LIBERTY in incuse letters. The reverse has the denomination 50 / CENTS and the date 1870 within a wreath of cotton and corn, with the inscription STANDARD above. Struck in copper with a plain edge.

**Commentary.** Andrew Pollock listed two different varieties for Judd-942, but went on to say that one of them, Pollock-1055, remains unknown. For Pollock-1069, he listed just two auction appearances, both by Bowers and Ruddy. He overlooked this example, surprising since he had viewed and recorded the entire Queller Collection prior to publication of his reference. This example matches the plate of neither piece recorded in Pollock's book, so it is a third known example. At least two other pieces also exist.

**Physical Description.** Considerable pale orange color intermingles with violet and blue on both sides of this Choice proof. A couple of marks appear on Liberty's cheek. Otherwise, the surfaces are nicely preserved, with lightly mirrored fields.

**Census and Provenance.** We can account for these pieces:
1. D.E.A. and U.S. Marshals Service Sale (Heritage, 12/1988), lot 1889. **The present example.**
2. Heritage (8/2006), lot 1462. PR65 Brown NGC.
3. Heritage (1/2003), lot 9925; Heritage (9/2008), lot 3448. PR64 Red PCGS.
4. Bowers and Ruddy (7/1981), lot 2411. PR63.
5. Bowers and Ruddy (9/1975), lot 1026. Proof.

*From The Lemus Collection, Queller Family Collection Part Two.* (#61188)

## Possibly Unique 1870 Thin Planchet Silver Half Dollar Judd-951, PR66

1765 **1870 Standard Silver Half Dollar, Judd-951, Pollock-1094, R.5, PR66 NGC.**

**Design.** The bust of Liberty faces right on the obverse with UNITED STATES OF AMERICA around, and the motto IN GOD WE TRUST on a scroll below. Liberty's hair is tied in a bun. On the reverse, the denomination 50 / CENTS and date 1870 are in a wreath of cotton and corn, with the inscription STANDARD above. Struck in silver with a reeded edge.

**Commentary.** According to researcher Andrew Pollock, the Queller specimen has a weight of just 153.6 grains, which he describes as a "thin planchet" pattern. All other examples of Judd-951 that Pollock examined weigh about 168 grains, and they are described as "thick planchet" patterns. Judd-951 is possibly unique on a thin planchet.

**Physical Description.** The central obverse design on this Premium Gem proof has some typical weakness, but the overall presentation is excellent. The surfaces are pristine and fully mirrored around modestly lustrous devices. For the Judd-951 regardless of planchet thickness, this piece is numerically tied for finest at NGC with a PR66 Cameo piece (11/08). **NGC Census:** 1 in PR66, 1 finer (the PR66 Cameo listed previously). **PCGS Population:** None in PR66, none finer, with the finest PCGS certified pieces being 3 PR65 pieces and a PR63 Deep Cameo (12/08).

**Provenance.** *Ex: Stack's private treaty.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#61197)

## Rare 1870 Standard Silver Half Dollar, Judd-952 PR66, Tied for Finest Graded

1766 **1870 Standard Silver Half Dollar, Judd-952, Pollock-1095, Low R.7, PR66 NGC.**

**Design.** The bust of Liberty faces right on the obverse, with UNITED STATES OF AMERICA around and the motto IN GOD WE TRUST on a scroll below. Liberty's hair is tied in a bun. On the reverse, the denomination 50 / CENTS and date 1870 are in a wreath of cotton and corn, with the inscription STANDARD above. Struck in silver with a plain edge.

**Commentary.** The Queller specimen weighs 153.7 grains, about the same as the thin planchet Judd-951. Andrew Pollock does not record weights of any other specimens, leaving the reader guessing as to the possible existence of thin and thick planchet variations of Judd-952.

**Physical Description.** Like others of this design, the obverse exhibits some central striking weakness. However, the surfaces are exceptional, with rich reddish-gold at the center of the obverse, surrounded by pale blue, violet, and iridescent peripheral toning. The reverse has lush blue and iridescent toning. Tied for numerically finest at NGC with a couple of other pieces including a Cameo example (11/08). **NGC Census:** 2 in PR66, 1 finer (the PR66 Cameo piece mentioned previously). **PCGS Population:** None in PR66, none finer, with the finest piece certified by PCGS being a single PR64 (12/08).

**Provenance.** *Ex: Stack's private treaty.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#61198)

## Significant 1870 Standard Silver Half Dollar Struck in Copper Judd-954, PR66 Brown

1767 **1870 Standard Silver Half Dollar, Judd-954, Pollock-1097, High R.7, PR66 Brown NGC.**

**Design.** A bust of Liberty faces right. She wears a LIBERTY-inscribed diadem, and her hair is tightly bound with a ribbon. IN GOD WE TRUST reposes within a scroll below, while UNITED STATES OF AMERICA surrounds the portrait. The reverse has a wreath of corn and cotton with 50 / CENTS / 1870 inside and STANDARD centered above. Struck in copper with a plain edge.

**Commentary.** Less than a half-dozen examples of Judd-954 still exist, according to USPatterns.com. Andrew Pollock records five examples in his reference, with possible duplication of some of those pieces.

**Physical Description.** Slightly weak at the center of the obverse, as usual. The surfaces are amazing mirrors beneath deep blue and iridescent toning. The reverse is lighter reddish-gold with considerable iridescence. Tied for finest certified. **NGC Census:** one each PR66 Brown (this piece), PR66 Brown Cameo. **PCGS Population:** two PR64 Brown, one PR64 Red and Brown (11/08).

**Provenance.** *Ex: Auction '87 (Stack's, 7/1987), lot 835.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#61200)

## Incredible 1870 Standard Silver Aluminum Half Dollar Judd-955, PR65 Cameo

1768 **1870 Standard Silver Half Dollar, Judd-955, Pollock-1099, High R.7, PR65 Cameo NGC.**

**Design.** A bust of Liberty faces right. She wears a LIBERTY-inscribed diadem, and her hair is tightly bound with a ribbon. IN GOD WE TRUST reposes within a scroll below, while UNITED STATES OF AMERICA surrounds the portrait. The reverse has a wreath of corn and cotton with 50 / CENTS / 1870 inside and STANDARD centered above. Struck in aluminum with a reeded edge.

**Commentary.** The aluminum variety of this design combination, with less than half a dozen reeded edge pieces known. A similar number of plain edge examples are also known, cataloged as Judd-956.

**Physical Description.** The cameo contrast that is evident on this Gem proof aluminum piece is absolutely amazing, with deeply mirrored fields around the lustrous devices. The strike on both sides is bold, especially for an aluminum piece. Of the five examples certified at both services, this piece is tied for numerically finest graded, and it is the only Cameo coin certified by either service. **NGC Census:** 1 in PR65 Cameo, none finer. **PCGS Population:** 3 in PR65 but lacking the Cameo designation, none finer (12/08).

**Provenance.** *Ex: Bowers and Merena (9/1988), lot 600.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#61201)

## Desirable 1870 Standard Silver Half Dollar, Judd-957, PR64

1769 **1870 Standard Silver Half Dollar, Judd-957, Pollock-1108, R.5, PR64 NGC.**

**Design.** Liberty faces right, surrounded by UNITED STATES OF AMERICA. LIBERTY is inscribed on the headband, and a large star is on her forehead. A scroll below contains IN GOD WE TRUST. The reverse features 50 / CENTS / 1870 within a wreath of cotton and corn, tied with the usual bowknot. STANDARD is centered above the wreath. Struck in silver with a reeded edge.

**Commentary.** The Judd-957, as one of the silver, reeded edge 1870 Standard Silver patterns, is among the more available of this long series, although it is still rare in absolute terms. A complete nine-piece set consisted of three obverse designs combined with a single reverse design, in denominations of 10 cents, 25 cents, and 50 cents, in a single metal and common edge style.

**Physical Description.** Both sides of this near-Gem proof are essentially brilliant, with lovely peripheral iridescence. Like others of this design, just the slightest evidence of design weakness can be seen at the center of the obverse. **NGC Census:** 3 in PR64, 4 finer. **PCGS Population:** 8 in PR64, none finer (12/08).

**Provenance.** *Ex: Stack's private treaty.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#61203)

## Wonderful 1870 Standard Silver Half Judd-958, PR65

1770 **1870 Standard Silver Half Dollar, Judd-958, Pollock-1109, High R.6, PR65 PCGS.**

**Design.** Liberty faces right, surrounded by UNITED STATES OF AMERICA. LIBERTY is inscribed on the headband, and a large star is on her forehead. A scroll below contains IN GOD WE TRUST. The reverse features 50 / CENTS / 1870 within a wreath of cotton and corn, tied with the usual bowknot. STANDARD is centered above the wreath. Struck in silver with a plain edge.

**Commentary.** The standard silver patterns of this design combination, with either a reeded edge (Judd-957) or a plain edge (Judd-958), are considered relatively plentiful in comparison to most pattern varieties. The ninth edition of Judd's *United States Pattern Coins* notes that the obverse used to strike Judd-957 through Judd-962 half dollar patterns was first used to produce the 1869 Judd-754 through Judd-759a patterns. The difference between the two issues—other than the date—is that the 1869 halves used an oak and laurel wreath design, whereas the 1870 patterns employed an agricultural-style wreath.

**Physical Description.** This gorgeous Gem exhibits deep blue and light gold toning on both sides, over deeply mirrored fields that display excellent contrast against the frosted devices. **PCGS Population:** 2 in PR65, 1 finer. **NGC Census:** 3 in PR65, none finer, with a PR64 Cameo also in the Census (12/08).

**Provenance.** *Ex: Stack's (10/2003), lot 2038.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#61204)

# Fiery 1870 Standard Silver Half Dollar in Copper
# Judd-971, PR65 Red
# Fifth Auction Appearance in 35 Years

1771 **1870 Standard Silver Half Dollar, Judd-971, Pollock-1082, High R.7, PR65 Red NGC.**

**Design.** The obverse Judd calls Obverse 2 of 1869: Liberty faces right wearing a cap with two stars. A ribbon crossing her shoulder bears a raised LIBERTY, with no designer's initial B on the ribbon folds at the rear of the cap. On the reverse a wreath of corn and cotton encloses 50 / CENTS, the latter in an upcurving arc, with STANDARD SILVER around the upper half of the rim. Two ornamental stars are at 4:30 and 7:30, with date 1870 at 6 o'clock. Struck in copper with a reeded edge.

**Commentary.** Judd-971 and others of this group (Judd-969 through Judd-974) have most of the final S in STATES over the top of the cap. The normal design has nearly the entire final S to the right of the top of the cap. The design variations of Judd-969 through Judd-974 are apparently quite rare. Only three or four examples of Judd-971 are known.

Consulting a variety of sources, including our own archives, John Dannreuther and Jeff Garrett's *Auction Records of U.S. Pattern Coins,* and the series of *Auction Prices Realized* published by Rome and Krause Publications, yields the following record of just four auction appearances for Judd-971 dating back 35 years:

1. RARCOA, January 1973. Proof.
2. Jess Peters, April 1976. Fine.
3. Bowers and Merena, May 1992. PR63 Red and Brown.
4. Bowers and Merena, March 1993. PR63.

The auction record suggests that there are four examples known, although a fifth is possible. The 1973 RARCOA appearance was unplated but described as lightly toned, and is probably the same as one of the Bowers and Merena coins. The 1976 Jess Peters coin is clearly different from the others, assuming it was properly attributed.

**Physical Description.** We believe that the present specimen is by far the finest of those that exist. Both sides of this fiery Gem are deeply mirrored and fully brilliant, with lustrous devices that exhibit just a trace of mellowing. The surfaces are pristine, with few blemishes of any sort. This exceptional example presents a full quota of aesthetic appeal for the connoisseur. **NGC Census:** The present piece is the only Judd-971 currently certified by NGC. **PCGS Population:** PCGS has certified only 2 total Judd-971 pieces, a PR63 Brown and a PR63 Red and Brown (12/08).

**Provenance.** *Unknown.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#81217)

## 1870 Standard Silver Half Struck in Silver, Judd-981, PR66 Tied for Finest Certified

1772 **1870 Standard Silver Half Dollar, Judd-981, Pollock-1101, Low R.7, PR66 NGC.**

**Design.** Liberty faces right, her hair tied in a bun, wearing a starless diadem inscribed LIBERTY. IN GOD WE TRUST is on a scroll at the bottom rim, with UNITED STATES OF AMERICA around. On the reverse a wreath of corn and cotton encloses 50 / CENTS, the latter in an upcurving arc, with STANDARD at the upper rim and the date 1870 inside the wreath. Struck in silver with a reeded edge.

**Commentary.** USPatterns.com's Saul Teichman and Andy Lustig rank this issue as R.7, "less than a half dozen pieces known." Based on the certified population of 11 pieces (less duplicates) at NGC and PCGS combined, however, we believe Low R.7 (10-12 known) is correct.

**Physical Description.** Generous daubs of rose-red coat each side of this lovely Premium Gem, with the nearly mark-free, well-struck surfaces an added bonus. NGC has certified seven examples in all grades, with three PR66 pieces including the present coin tied for finest there (11/08). PCGS has graded four pieces, the finest a PR64.

**Provenance.** *Ex: Stack's private treaty.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#61227)

# The King Farouk 1870 Judd-983
# Standard Silver Half in Copper, PR65 Brown
# Tied for Finest Certified, Three or Four Known

1773 **1870 Standard Silver Half Dollar, Judd-983, Pollock-1103, High R.7, PR65 Brown NGC.**

**Design.** Liberty faces right, her hair tied in a bun, wearing a starless diadem inscribed LIBERTY. IN GOD WE TRUST is on a scroll at the bottom rim, with UNITED STATES OF AMERICA around. On the reverse a wreath of corn and cotton encloses 50 / CENTS, the latter in an upcurving arc, with STANDARD at the upper rim and the date 1870 inside the wreath. Struck in copper with a reeded edge.

**Commentary.** Much rarer than its silver counterpart, the Judd-983 struck in copper with reeded edge has seen only three auction appearances in the last quarter-century. Before the offering in our October 2007 Signature auction, the last appearance was in the famed collection of William R. "Rudy" Sieck sold in 1981. Other recent landmark pattern collections such as the Rogers Fred Jr., Harry W. Bass Jr., Garrett, and Morris Evans collections have all lacked an example.

**Physical Description.** Tinges of brilliant blue touch the high points of this lovely and well-struck Gem, tied for the finest certified. **NGC Census:** one PR64 Red and Brown, one PR65 Brown. **PCGS Population:** one PR65 Brown (11/08). As always, possible duplicates could exist, and collectors would do well to remember that *not all examples of any coin are necessarily certified.* The preceding are nonetheless useful data to help indicate a coin's true rarity, in the absence of absolute certainty.

**Census and Provenance.** We believe it possible that as few as three examples could exist.

1. King Farouk; "Palace Collections of Egypt" (Sotheby's, 2/1954), lot 1849; Gentleman's Study Collection (Coronet Coin), lot 62; Lester Merkin (2/1971), lot 902. **The present specimen.**
2. ANA (Superior, 8/1975), lot 1251; William R. "Rudy" Sieck Collection (Bowers and Ruddy, 7/1981), lot 209, which brought $850. Choice Proof-65.
3. Detroit Collection (Stack's, 3/1980), lot 713. Proof.
4. Hoosier Discovery Collection (Heritage, 10/2007), lot 3213. PR65 Brown PCGS. Possibly a duplication of one of the above.

*From The Lemus Collection, Queller Family Collection Part Two.*
(#61229)

## 1870 Standard Silver Half, Judd-987, PR67 Cameo
## The Only Cameo Example, Tied for Finest Graded

1774 **1870 Standard Silver Half Dollar, Judd-987, Pollock-1116, High R.6, PR67 Cameo NGC.**

**Design.** On the obverse Liberty faces right, wearing a headband with a star ornament and inscribed LIBERTY, her hair tied in a bun. IN GOD WE TRUST is on a scroll below, and UNITED STATES OF AMERICA around. On the reverse a wreath of corn and cotton encloses 50 / CENTS, the latter in an upcurving arc, with STANDARD SILVER encircling the top half of the rim and the date 1870 below the wreath. Two ornamental stars are at 4:30 and 7:30. Struck in silver with a reeded edge.

**Commentary.** The specimen offered here was not known to Andrew Pollock when he wrote his 1994 reference on the subject, although he did manage to trace five examples, assuming no duplication in his roster. Until now, this piece has been off of the market since January 1986, when it was sold as part of the Hoagy Carmichael estate by Superior. Carmichael was a famous American composer and musician who is renowned for writing "Stardust" and "Heart and Soul"—two of the most recorded songs in U.S. history. The substantial wealth generated by his creative talents allowed Carmichael to amass a world-class coin collection in the mid-1900s, and the pattern offered here was one of his treasures. The next owner of this Judd-987 will receive a beautiful pattern with an interesting pedigree.

**Physical Description.** The surfaces are essentially pristine, with silver centers and deeper golden accents at the rims on both sides. **NGC Census:** four pieces total, including a PR67 and the present PR67 Cameo, tied for numerically finest graded. **PCGS Population:** 10 coins, the finest two PR66 examples (11/08). Duplicates are almost a certainty here.

**Provenance.** *Ex: Carmichael and Miller Collections (Superior, 1/1986), lot 2461.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#61233)

## 1870 'Coin Without a Country'
## Judd-996 Standard Silver Dollar, PR64

1775 **1870 Standard Silver Dollar, Judd-996, Pollock-1127, High R.7, PR64 NGC.**

**Design.** A seated Liberty faces left, with 13 stars ringing the rim and the date 1870 in exergue. She holds a shield with her right hand and an olive branch in her left. A cap rests atop a Liberty pole, and a scroll crosses the shield with LIBERTY thereon. On the reverse a wreath of corn and cotton encloses 1 / DOLLAR, the latter in an upcurving arc, with STANDARD in tiny letters at the upper rim. Struck in silver with a reeded edge.

**Commentary.** The Judd reference notes this as the first appearance of the silver dollar denomination in the Standard Silver series, and that there is no reference to the country of origin on this "illogical" die combination. USPatterns.com estimates that perhaps a dozen are known.

**Physical Description.** The fields are brightly reflective on each side. The obverse has an even gray patina, while the reverse shows almost no color and is considerably brighter than the obverse. Fully struck in all areas and essentially problem-free. **NGC Census:** 1 in PR64, 1 finer. **PCGS Population:** 1 in PR64, none finer (12/08).

**Provenance.** *Ex: Bowers and Ruddy* Rare Coin Review *44, p. 6; Steig Collection (Bowers and Ruddy, 9/1982), lot 1798; Rusbar Collection (Bowers and Merena, 9/1990), lot 772.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#61243)

## 1870 Standard Silver Dollar, Judd-998 PR64 Red and Brown, Tied for Finest Certified

1776 **1870 Standard Silver Dollar, Judd-998, Pollock-1129, Low R.7, PR64 Red and Brown NGC.**

**Design.** A seated Liberty faces left, with 13 stars ringing the rim and the date 1870 in exergue. She holds a shield with her right hand and an olive branch in her left. A cap rests atop a Liberty pole, and a scroll crosses the shield with LIBERTY thereon. On the reverse a wreath of corn and cotton encloses 1 / DOLLAR, the latter in an upcurving arc, with STANDARD in tiny letters at the upper rim. Struck in copper with a reeded edge.

**Commentary.** Another "illogical die combination" with no reference to the United States of America—or IN GOD WE TRUST, for that matter—on either side. Perhaps a dozen exist.

**Physical Description.** Each side retains most of the original mint red luster with only slight mellowing. Brightly reflective, there are few distractions on either side. The only spot of any note is located above Liberty's foot. **NGC Census:** one each in PR63 Red and Brown, PR64 Brown (this piece), PR64 Red and Brown. **PCGS Population:** 10 pieces, the finest two each in PR64 Brown and PR64 Red and Brown (11/08). The present piece is thus tied for the numerically finest certified.

**Provenance.** *Ex: Stack's private treaty.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#61245)

## 1870 Dollar, Barber's Seated Liberty Judd-1002, PR63 Cameo

1777 **1870 Dollar, Judd-1002, Pollock-1134, Low R.6, PR63 Cameo NGC.**

**Design.** The William Barber Seated Liberty design. A seated Liberty faces left, with 13 stars ringing the rim and the date 1870 in exergue. She holds a shield with her right hand and an olive branch in her left. A cap rests atop a Liberty pole, and a scroll crosses the shield with LIBERTY thereon. The reverse is from the regular Seated Liberty dollar die of the year. Struck in silver with a reeded edge.

**Commentary.** The complete sets offered by the Mint to collectors and including the half dime, dime, quarter, half dollar, and dollar were combined not only as here, with the regular Seated Liberty reverse, but also with the Standard Silver reverse. USPatterns.com estimates that more than a dozen are known of this variety, accounting for the Low R.6 rating in Judd.

**Physical Description.** This brilliant example has starkly contrasted field to devices contrast on each side. The obverse fields show a few slight hairlines which account for the PR63 grade. Fully struck throughout. NGC and PCGS combined have certified a total of 22 pieces, less duplicates. **NGC Census:** 1 in PR63 Cameo, 2 finer with the Cameo designation plus a single PR64 lacking the Cameo designation. **PCGS Population:** None in PR63 Cameo or finer, though there is a single PR64 plus 2 PR65 pieces without the Cameo designation in the Population (12/08).

**Provenance.** *Unknown.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#61249)

## Amazing 1870 Pattern Silver Dollar Judd-1003, PR64 Cameo

1778 **1870 Dollar, Judd-1003, Pollock-1135, Low R.7, PR64 Cameo NGC.**

**Design.** William Barber's design features a Seated Liberty facing left, supporting a shield with her right hand and holding an olive branch in her left hand. A scroll inscribed LIBERTY crosses the shield and a pole stands freely behind, supporting a Liberty cap. The date is below and 13 stars are around. The reverse is the type of the regular With Motto Seated dollars. Struck in silver with a plain edge.

**Commentary.** This piece was mentioned in Andrew Pollock's tome, so it was acquired before the 1994 publication of that reference. Auction records are few, including just 14 appearances that we can track over the last 35 years. Although USPatterns.com suggests that about a dozen examples are known, we would be surprised to learn of that many.

**Physical Description.** Both sides of this incredible proof have exceptional contrast between the deeply mirrored fields and frosty devices. All of the design elements are exceptionally bold, even down to the most intricate details of this minutely double struck piece. Light golden-rose toning is seen over each side, with occasional dabs of lilac interspersed. This is the finest Cameo example certified at NGC, although one each non-Cameo PR65 and PR66 are numerically finer (11/08). The finest at PCGS are five PR64 examples.

**Provenance.** *Ex: Stack's (10/1986), lot 312.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#61250)

## Spectacular 1870 Silver Dollar Struck in Copper Judd-1004, PR64 Brown

1779 **1870 Dollar, Judd-1004, Pollock-1136, Low R.7, PR64 Brown NGC.**

**Design.** The obverse portrays a seated figure of Liberty with shield and olive branch. A scroll is draped over the shield with the word LIBERTY inscribed and a Liberty pole stands behind the shield. Thirteen stars surround the central devices, with the date in the exergue. The reverse is the design used for regular-issue coinage in 1870. Struck in copper with a reeded edge.

**Commentary.** The aesthetically pleasing obverse design is one of William Barber's finest efforts. This issue was produced in copper as here, and in silver and aluminum as well. USPatterns.com estimates that about a dozen specimens survive.

**Physical Description.** Sharply struck, with fine detail in Liberty's hair and the eagle's feathers. Iridescent reddish-brown and cerulean-blue toning enhances the surfaces. The overall eye appeal is outstanding. **NGC Census:** 2 in PR64 Brown, 3 finer. **PCGS Population:** 1 in PR64 Brown, 7 finer (12/08).

**Provenance.** *Ex: Newport Collection (Bowers and Ruddy, 1/1975), lot 1119; Ebenezer Milton Saunders (Bowers and Merena, 11/1987), lot 466.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#61251)

## Elegant 1870 Silver Dollar Struck in Copper Judd-1005, PR66 Brown

1780 **1870 Dollar, Judd-1005, Pollock-1137, Low R.6, PR66 Brown NGC.**

**Design.** The obverse portrays a seated figure of Liberty with shield and olive branch. A scroll is draped over the shield with the word LIBERTY inscribed and a Liberty pole stands behind the shield. Thirteen stars surround the central devices, with the date in the exergue. The reverse is the design used for regular-issue coinage in 1870. Struck in copper with a plain edge.

**Commentary.** William Barber's elegant seated figure of Liberty was one of his best designs. USPatterns.com reports that Judd-1005 was part of the Mint's program of specialty items, sold in combination with other denominations as part of complete year sets. A typical set appeared in the Parmelee Collection (New York Coin and Stamp, 6/1890), lot 209. The set included an example of each coin from three cent piece to silver dollar, in copper with plain edges. Sets were also available in silver and aluminum, with plain or reeded edges. The Mint's market in specialty items seems to have been as active in 1870 as it is today.

**Physical Description.** The deeply mirrored fields flash strongly and give additional vibrancy to the red and blue colors seen on each side. An essentially flawless example of this well-executed pattern. **NGC Census:** 3 in PR66 Brown, 2 finer plus a PR65 Red. **PCGS Population:** None in PR66 Brown, 2 finer plus 10 additional coins with lower numerical grades, but designated as either Red or Red and Brown (12/08).

**Provenance.** *Ex: Stack's private treaty transaction.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#61252)

## Captivating 1870 Copper Dollar Judd-1011, PR64 Red Cameo

1781 **1870 Standard Silver Dollar, Judd-1011, Pollock-1144, Low R.7, PR64 Red Cameo NGC.**

**Design.** The Indian Princess design was James B. Longacre's version of the Seated Liberty concept, introduced in 1870. The design features Liberty seated beside a globe, wearing an Indian headdress. The word LIBERTY is inscribed across the center of the globe and Liberty is holding a pole topped with a Phrygian cap. The reverse features the word STANDARD at the top with 1 / DOLLAR encompassed by a wreath of cotton and corn. Struck in copper with a reeded edge.

**Commentary.** Longacre's design was apparently based on a sketch that he made prior to 1852, but it remained unused until 1870 when it was adapted on a number of different patterns. Longacre died on January 1, 1869, never to see this design on an actual coin. Just under a dozen examples of Judd-1011 are known, according to the current rarity ratings, although we are unaware of a specific census of known pieces.

**Physical Description.** Both sides of this brilliant Cameo proof have lovely pale orange mint color with traces of faint bluish toning on the high points. The design motifs are lustrous and sharply defined with a deep mirror background. **NGC Census:** The present piece is the only Judd-1011 certified by NGC. **PCGS Population:** None in PR64 Red, none finer with the Red designation, plus a single PR65 Brown and a single PR65 Red and Brown (12/08).

**Provenance.** *Ex: Stack's (10/1988), lot 624*
*From The Lemus Collection, Queller Family Collection Part Two.* (#81259)

# Delightful 1870 Indian Princess Pattern Dollar
## Longacre's Masterpiece
## Judd-1014, PR63

1782 **1870 Dollar, Judd-1014, Pollock-1148, Low R.7, PR63 NGC.**

**Design.** The obverse features Liberty, in the guise of an Indian princess, facing left. One hand rests on a globe with LIBERTY inscribed, while the other supports a Liberty pole. Behind her are two flags, one displaying 22 stars. An arc of 13 stars surrounds the central figure, with the date below. Longacre's signature is located below the base. The reverse die is from the same design used in regular-issue coinage for 1870. Struck in silver with a reeded edge.

**Commentary.** James Barton Longacre died on January 1, 1869. His beautiful Indian Princess pattern design was executed posthumously by William Barber, who succeeded him as chief engraver. Barber faithfully preserved Longacre's vision, which had been conceived no later than 1852, the date of a sketch by Longacre that resembles the finished design in every detail. A note from Longacre to Mint Director George Eckert survives in which the designer explains the significance of his devices: "... its purpose is to express a representation of America, by a female figure, in aboriginal costume, seated, contemplating one of the usual emblems of liberty, elevated on a spear, which she holds in her right hand; her left hand resting on a globe, presenting the western hemisphere ... ." The issue was designed in extremely high relief, giving the finished product a stunning, medal-like appearance. The difficulties involved in high volume coining of high relief issues probably caused the Mint to abandon this lovely design.

USPatterns.com estimates fewer than a dozen specimens of Judd-1014 are extant. Advanced collectors should bid aggressively to acquire this piece, as auction appearances are quite infrequent.

**Physical Description.** The inherent beauty of Longacre's design is fully realized in this magnificent specimen. A fantastic strike complements the brightly reflective fields to produce almost three-dimensional contrast. Every detail of the design elements is fully brought up. Light golden-brown color blends with an aurora of crimson and blue at the periphery to create a visual delight. **NGC Census:** 2 in PR63, 1 finer. **PCGS Population:** 2 in PR63, 1 finer (12/08).

**Provenance.** *Unknown.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#61262)

## 1870 Indian Princess Dollar Struck in Copper Judd-1016, PR66 Brown Tied for Finest Certified

1783 **1870 Dollar, Judd-1016, Pollock-1150, Low R.7, PR66 Brown NGC.**

**Design.** The obverse is the Longacre Indian Princess design, while the reverse is that of the regular-issue Seated Liberty dollar. Struck in copper with a reeded edge.

**Commentary.** An Indian Princess design with the posthumous signature of LONGACRE in the right obverse field, tribute to the Mint chief engraver who had died the previous year. In an apparent effort to expand the offerings of patterns for collectors, the Mint combined many of the various obverses available with both the Standard Silver reverses and the regular business strike coins of the year. USPatterns.com estimates that less than a dozen are known, which correlates to the certified population of 13 pieces less duplicates.

**Physical Description.** Highlights of blue and purple accent both sides of this startlingly original Premium Gem. A thin outline of mint red is notably seen around the obverse devices. A needle-sharp strike and near-total absence of carbon further enliven the proceedings. This piece is one of two at NGC in PR66 Brown, with none finer (11/08). The finest certified at PCGS are two PR65 Red and Brown examples.

**Provenance.** *Ex: Stack's (12/1987), lot 1029.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#61264)

## Pretty 1870 Indian Princess Dollar Regular Seated Liberty Reverse Judd-1017, PR64 Brown

1784 **1870 Dollar, Judd-1017, Pollock-1151, Low R.7, PR64 Brown NGC.**

**Design.** The obverse is the Longacre Indian Princess design, while the reverse is that of the regular-issue Seated Liberty dollar. Struck in copper with a plain edge.
**Commentary.** Fewer than a dozen are known of this plain edge variety, according to USPatterns.com. The plain edge and reeded edge copper variants with the regular Seated Liberty (Judd-1016 and 1017) appear to be of about equal rarity; in fact, the combined NGC and PCGS population data show 10 "submission events" of each kind.

**Physical Description.** The term "Brown" is such an *understatement* for a rare coin of this quality. Lovely highlights of rose, orange, blue, and purple play over the surfaces on both sides of this near-Gem coin. **NGC Census:** 3 in PR64 Brown, 4 finer. **PCGS Population:** 1 in PR64 Brown, 6 finer (12/08).

**Provenance.** *Ex: Greater New York Numismatic Convention Sale (Stack's, 4/1987), lot 553.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#61265)

Spectacular 1870 Silver Dollar Pattern
in Aluminum
The Finest Known
Judd-1021, R.8, PR67 Cameo

# Spectacular 1870 Silver Dollar Pattern in Aluminum
# The Finest Known
# Judd-1021, R.8, PR67 Cameo

1785 **1870 Dollar, Judd-1021, Pollock-1156, R.8, PR67 Cameo NGC.**

**Design.** Both obverse and reverse dies are the designs used for regular-issue coinage of silver dollars in 1870. Struck in aluminum with a reeded edge.

**Commentary.** The standard pattern references traditionally list Judd-1021 as a die trials issue, but USPatterns.com states the coins were minted as part of the Mint's marketing program. In support of this view, the present coin was offered as part of an eight-coin 1870 aluminum proof set when it first surfaced in the 1970s. The rarity of the sets was discussed when it was advertised in several issues of the *Rare Coin Review*: "The number of 1870 aluminum proof sets struck is nowhere recorded. We would estimate the number as being in the range of 5 to 10 sets, nearly all of which have been broken up in the intervening years." Neither did the set offered in the review survive intact, as this coin was offered individually in the Fairfield Collection in October 1977.

If the auction appearance record of Judd-1021 is any indication, the estimate of five to 10 sets struck may be too high. The issue was missing in all the great pattern collections of the 19th century. With all their resources and connections, great collectors such as Edward Maris, Henry Linderman, R.C. Davis, Lorin Parmelee, and George Woodside all failed to secure an example of Judd-1021 for their collections. The illustrious collectors of the 20th century fared no better: This piece was missing in the collections of William Woodin, Fred Olsen, Maj. Lenox Lohr, John Work Garrett, Louis Eliasberg, and Harry W. Bass, Jr.

A diligent search of auction records has yielded a grand total of five auction appearances, representing two—or at most three—different coins. The last auction offering of a specimen of Judd-1021 was 18 years ago; this piece also marks the first time Heritage has had the privilege of presenting an example. Clearly, this attractive pattern is among the most elusive of all numismatic treasures.

The coin offered here is the finer of the two specimens seen in recent times. This Superb Gem Cameo proof will be a focal point of any advanced pattern collection. This piece has been off the market for 21 years, and it may be decades before another example becomes available. The astute collector will take notice and bid accordingly.

**Physical Description.** The present coin features a spectacular strike, with crisp detail on all design elements. The fully frosted devices contrast vividly with the deeply mirrored fields to create the dramatic cameo effect. Brilliant, untoned surfaces add to the fantastic eye appeal. An unimprovable specimen of this extremely rare pattern. This piece is, unsurprisingly, the only certified example at NGC, while PCGS has graded one PR65 piece (11/08).

**Census and Provenance.** We believe that only two or three examples of Judd-1021 survive today:
1. *Rare Coin Review* Nos. 21-26 (Bowers and Ruddy, 1974-1976); Fairfield Collection (Bowers and Ruddy, 10/1977), lot 51; Ruder Collection (Stack's, 9/1987), lot 1528. **The present coin.**
2. Champa Collection (Bowers and Ruddy, 5/1972), lot 1082; Public Auction Sale (Superior, 10/1990), lot 1893.

**Other Appearances.** The following citation may be an earlier appearance of one of the coins above, but no verifiable connection can be established.
A. Palace Collections of Egypt (Sotheby's, 2/1954), lot 1838.
*From The Lemus Collection, Queller Family Collection Part Two.* (#61269)

## Gorgeous 1870 Silver Dollar Pattern Struck in Nickel, Judd-1022 Regular Reverse, PR66 Cameo

1786 **1870 Dollar, Judd-1022, Pollock-1157, Low R.7, PR66 Cameo NGC.**

**Design.** The regular dies for the 1870 Seated Liberty dollar, but with rusted devices on both sides. Struck in nickel with a reeded edge.

**Commentary.** About half a dozen of these patterns survive in nickel, struck from proof dies and business strike dies, according to Saul Teichman at USPatterns.com. The rusted design motifs suggest that this pattern was struck sometime after 1870. We are unaware of any specific diagnostic studies of the dies, but offer the following observations: The inside top of the 0 in the date appears to be minutely recut, the shield point is over the center of the upright of the 1, the left base of the 1 is over the center of a dentil, and the date is approximately centered between the border and the base of Liberty. The reverse has a short die line at the top of E in WE.

**Physical Description.** An incredible specimen with bold cameo contrast between the frosty devices and fully mirrored fields. Both sides exhibit splendid light gray surfaces with hints of champagne and iridescent toning. The design motifs are boldly rendered. The surfaces exhibit slight roughness that remains from the planchet before this piece was struck. Three examples of Judd-1022 have been certified by NGC as of (12/08), with the current offering being the finest specimen—the other PR66 is not designated as Cameo. PCGS has no examples of Judd-1022 in their Population (12/08).

**Provenance.** *Ex: Auction '86 (Stack's, 7/1986), lot 475.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#61270)

# 1870 Twenty Dollar Pattern, Gilt Copper
# Judd-1038, PR64, High R.7
# Ex: Bass

1787 **1870 Twenty Dollar, Judd-1038, Pollock-1173, High R.7, PR64 Gilt NGC.**

**Design.** These are trial pieces struck from the regular-issue Liberty Head double eagle dies of the year 1870. Struck in copper with a reeded edge.

**Commentary.** Although at High R.7 the copper pieces (including gilt) are extremely rare, even-rarer examples are known in aluminum and nickel, both ranked R.8. Saul Teichman notes that while these are listed as die trials in the standard references, they may have been deliberately struck in sets for sale to collectors. One must admit that nickel, with its extreme hardness, is an extremely unusual metal to choose for double eagle "die trials." Nonetheless, it also appears that profit was not uppermost in the Mint's motivation either, given that so few sets appear to have been produced. Another equally likely scenario is that the pieces could have been surreptitiously struck for conveyance to William Idler of Philadelphia, the Mint's pet coin dealer from 1859 into the 1880s.

**Physical Description.** Both sides are thoroughly and completely gilt. The highly reflective surfaces show mild cameo contrast with a sharp strike. NGC has certified two PR64 gilt pieces (including the present piece) and one PR65 Red and Brown, while PCGS has certified none of the issue in any grade (10/08).

**Census and Provenance.** Saul Teichman on USPatterns.com says "fewer than a dozen known" but we believe the number may be far less, perhaps as few as four to six pieces. One example is in the Byron Reed Collection, now in the Durham Western Heritage Museum in Omaha. Plate-matching reveals that this is definitely the Harry W. Bass, Jr. coin; this appears to be the first offering of this pattern issue since that 1999 auction.
*Ex: Brinton T. Schorer; Harry W. Bass, Jr. via private treaty (5/1973); Bass Part I (Bowers and Merena, 5/1999), lot 1408, Proof-63, which brought $9,660.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#61287)

## 1871 Three Cent 'Silver' Struck in Aluminum, R.8, Judd-1049 PR64, Two or Three Known

1788 **1871 Three Cent Silver, Judd-1049, Pollock-1183, R.8, PR64 NGC.**

**Design.** This three cent "silver" pattern uses the regular dies for the year 1871, but is struck in aluminum instead, with a plain edge.

**Commentary.** Both the Judd print reference and the USPatterns.com online resource rank this pattern issue at R.8, with the website adding that only two or three pieces are believed to exist and opining that although it is called a die trial issue, the coins may instead have been deliberately struck for sale to collectors. Many, perhaps most, of the 1869-71 issues would certainly fall under that same umbrella, as the U.S. Mint during this time was the largest coin dealer in the United States—unofficially. It had several hundred different pattern varieties on hand (or able to be struck) for well-connected collectors and dealers and Mint officials (and there was not always a clear delineation between them).

**Physical Description.** A splendidly smooth silver-white piece, showing some die striations in the field and a small die line running diagonally through the upper left vertical shield stripes. **NGC Census:** one in PR64 (this piece). **PCGS Population:** one in PR65 (11/08).

**Provenance.** *Ex: Casterline and Hall Collections Sale (Superior, 5/1989), lot 1061.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#61308)

## 1871 Five Cent Pattern With 'Curious' Reverse Judd-1050, PR66

1789 **1871 Five Cents, Judd-1050, Pollock-1184, Low R.6, PR66 NGC.**

**Design.** The head of Liberty wearing a coronet faces left, much as on the circulating three cent nickel, with UNITED STATES OF AMERICA around and the date 1871 below. On the reverse a laurel wreath encloses V / CENTS, the latter in an upcurving arc, with the V shaded on the right side rather than the left, in the words of the Judd reference "presenting a curious appearance." Struck in nickel with a plain edge.

**Commentary.** The Judd reference further says of this piece (in an endnote), "It seems rather curious that new reverse dies were made for J-1050 to J-1055, when the much-combined dies from the various issues of 1866-67 could have been employed." Five cent pieces produced in 1866-67 included numerous Washington and Lincoln pieces, and well as Shield nickel patterns of many kinds and metals.

**Physical Description.** Attractive silver-gray surfaces are lightly tinged with pinkish-gold, displaying few mentionable distractions save for a few tiny flecks. **NGC Census:** 4 in PR66, none finer, with 3 pieces graded PR65 Cameo. **PCGS Population:** 1 in PR66, none finer, with a single piece graded PR64 Cameo (12/08).

**Provenance.** *Ex: Stack's private treaty.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#61309)

## 1871 Five Cent Struck in Copper
## Judd-1051, PR63 Brown

1790 **1871 Five Cents, Judd-1051, Pollock-1185, Low R.6, PR63 Brown NGC.**

**Design.** The head of Liberty wearing a coronet faces left, much as on the circulating three cent nickel, with UNITED STATES OF AMERICA around and the date 1871 below. On the reverse a laurel wreath encloses V / CENTS, the latter in an upcurving arc, with the V shaded on the right side rather than the left, in the words of the Judd reference "presenting a curious appearance." Struck in copper with a plain edge.

**Commentary.** Previous editions of the Judd reference and Pollock's 1994 work on the subject considered Judd-1051 to be an R.5 pattern. Today it is rated Low R.6 like its nickel counterpart. Examples were also struck in aluminum and are more challenging to locate. The current specimen—important pedigree and all—is offered now for the first time in over 15 years.

**Physical Description.** Irregular crescents of darker grayish patina visit each side of this Select proof, which along with a few minor dark flecks likely prevent an even finer grade. **NGC Census:** 1 in PR63 Brown, 7 finer. **PCGS Population:** 1 in PR63 Brown, 19 finer (12/08).

**Provenance.** *Ex: William W. Moore Sale (Stack's, 3/1992), lot 1630; Floyd Starr Collection (Stack's,1/1993), lot 1561.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#61310)

## 1871 Copper Five Cent, Judd-1054
## PR64 Red and Brown

1791 **1871 Five Cents, Judd-1054, Pollock-1189, R.6, PR64 Red and Brown NGC.**

**Design.** The head of Liberty wearing a coronet faces left, much as on the circulating three cent nickel, with UNITED STATES OF AMERICA around and the date 1871 below. On the reverse a laurel wreath encloses 5 / CENTS, the latter in an upcurving arc. Struck in copper with a plain edge.

**Commentary.** Another "custom reverse" that was employed rather than the many 1866-67 reverse die choices that were undoubtedly left over from that extensive series of pattern five cent pieces.

**Physical Description.** Much delightful mint red remains on both sides of this pretty near-Gem coin, with excellent eye appeal. **NGC Census:** 1 in PR64 Red and Brown, 3 finer. **PCGS Population:** 4 in PR64 Red and Brown, 1 finer (12/08).

**Provenance.** *Ex: Stack's (10/1986), lot 29.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#71313)

## 1871 Silver 'Indian Princess' Half Dime
## Judd-1059, High R.7, PR64

1792 **1871 Standard Silver Half Dime, Judd-1059, Pollock-1194, High R.7, PR64 NGC.**

**Design.** The obverse is the posthumous James B. Longacre Indian Princess design, in a starless field with date in exergue. The reverse shows 5 / CENTS, the latter in an upcurving arc, surrounded by a wreath of corn and cotton, with STANDARD in tiny letters at the upper rim. Struck in silver with a reeded edge.

**Commentary.** This reverse die was first used on the 1870 Judd-809 through Judd-814 Standard Silver half dime series. As in 1870, this issue was created as a numismatic delicacy with no serious thought given to changing the appearance of circulating half dimes—whose commercial career would in any case end two short years later. The six specimens traced by Pollock (1994) included this piece, as well as examples pedigreed to famous collections such as Hawn, Newlin, Garrett, King Farouk, and Bass.

**Physical Description.** Generous glints of cinnamon, gold, and lilac appear on both sides of this pleasing and highly reflective near-Gem. Previously documented by Pollock at 19.6 grains with a diameter of 0.609 inches. **NGC Census:** 2 in PR64, 1 finer. **PCGS Population:** 1 in PR64, 1 finer (12/08).

**Provenance.** *Ex: Stack's private treaty.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#61318)

## 1871 Standard Silver Half Dime in Copper
## Judd-1060, PR66 ★ Red and Brown

1793 **1871 Standard Silver Half Dime, Judd-1060, Pollock-1195, Low R.7, PR66 ★ Red and Brown NGC.**

**Design.** The obverse is the posthumous James B. Longacre Indian Princess design, in a starless field with date in exergue. The reverse shows 5 / CENTS, the latter in an upcurving arc, surrounded by a wreath of corn and cotton, with STANDARD in tiny letters at the upper rim. Struck in copper with a reeded edge.

**Commentary.** Another numismatic delicacy made at a time when the Mint was rife with such antics; a production for private profit rather than public progress. The example offered here has been confined to the same collection since May 1975, where it was acquired as part of Stack's Cornell University sale. A total of 23 patterns were offered at that auction, although only five pieces were plated. This lot was not accompanied by a photograph, but the consignor's notes properly identified this pattern as lot 940 from that sale.

**Physical Description.** Per Pollock (1994): 17.6 grains, 0.609 inches, 180 degree die alignment. This marvelous Premium Gem is justly deserving of its NGC ★ designation. Pinkish-red highlights complement the well-struck, mark-free surfaces, further emphasized by the starless obverse field and near-Cameo field-device contrast. There are two PR66 Red and Brown pieces at NGC that are tied for numerically finest certified, the present specimen the only one awarded a ★ for exceptional eye appeal (12/08). PCGS has certified 2 pieces as PR66 Red and Brown with none finer (12/08).

**Provenance.** *Ex: Cornell University (Stack's (5/1975), lot 940.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#61319)

## 1871 Standard Silver Dime in Copper Judd-1075, PR65 Brown

1794 **1871 Standard Silver Ten Cents, Judd-1075, Pollock-1211, Low R.7, PR65 Brown NGC.**

**Design.** The obverse is the posthumous James B. Longacre Indian Princess design, in a starless field with date in exergue. The reverse shows 10 / CENTS, the latter in an upcurving arc, surrounded by a wreath of corn and cotton, with STANDARD in tiny letters at the upper rim. Struck in copper with a reeded edge.

**Commentary.** Although they were sold in sets from the half dime through dollar, this particular pattern variety is estimated to have less than a dozen survivors, according to both Judd and USPatterns.com.

**Physical Description.** Tinges of beautiful blue and purple complement the radiant luster on this wonderful Gem striking. **NGC Census:** one each in PR65 Brown, PR65 Red and Brown, PR67 Red and Brown. **PCGS Population:** one each in PR63 Red and Brown, PR64 Red and Brown, and PR64 Brown; three PR65 Brown (11/08). Nine pieces total.

**Provenance.** *Ex: Stack's private treaty.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#61334)

## 1871 Standard Silver Ten Cent Struck in Aluminum, Judd-1076 PR65, Possibly Two Known

1795 **1871 Standard Silver Ten Cents, Judd-1076, Pollock-1212, R.8, PR65 NGC.**

**Design.** The obverse is the posthumous James B. Longacre Indian Princess design, in a starless field with date in exergue. The reverse shows 10 / CENTS, the latter in an upcurving arc, surrounded by a wreath of corn and cotton, with STANDARD in tiny letters at the upper rim. Struck in aluminum with a reeded edge.

**Commentary.** The rarity of elemental aluminum—a highly reactive metal usually found in natural alloys—until the late 1880s and early 1890s makes many aluminum patterns, including the present piece, considerably more elusive than their counterparts in silver or copper. The Pollock reference notes that this piece weighs 11.1 grains, with diameter of 0.702 in. and 180-degree die alignment (coin turn).

**Physical Description.** The beautifully smooth, quicksilver surfaces show some trivial hairlines, but the cameo appearance of this piece, due equally to the empty obverse field and lack of mentionable distractions, provides undeniable appeal. **NGC Census:** one PR65 (this piece). **PCGS Population:** none.

**Census.** Likely only two pieces exist.
1. Auction '84 (Paramount, 7/1984), lot 534; Hoffecker (Superior, 2/1987), lot 954A. **The present piece.**
2. King Farouk; Palace Collections of Egypt (Sotheby's, 2/1954), lot 1881. Present whereabouts unknown.
*From The Lemus Collection, Queller Family Collection Part Two.* (#61335)

## 1871 Standard Silver Dime, Judd-1080, PR65

1796 **1871 Standard Silver Ten Cents, Judd-1080, Pollock-1216, High R.6, PR65 NGC.**

**Design.** The obverse is Longacre's Indian Princess design, here with 13 stars around the rim. On the reverse 10 / CENTS appears, the latter in an upcurving arc, surrounded by a wreath of corn and cotton, with STANDARD in tiny letters at the upper rim. Struck in silver with a reeded edge.

**Commentary.** Another reuse of the 1870 reverse die on this somewhat available silver variety. Andy Pollock notes that the Lemus Collection example has a die alignment of about 190 degrees, 10 degrees off from normal coin turn.

**Physical Description.** The mirrored fields flash strongly through the deep rose and peripheral blue toning. Fully struck throughout. **NGC Census:** 3 in PR65, 1 finer. **PCGS Population:** 1 in PR65, none finer (12/08).

**Provenance.** *Ex: Higgins (Bowers and Merena, 1/1988), lot 694. From The Lemus Collection, Queller Family Collection Part Two.* (#61339)

## Gem Proof Silver 1871 Standard Silver Dime With Regular-Issue Reverse, Judd-1084

1797 **1871 Ten Cents, Judd-1084, Pollock-1220, Low R.7, PR65 NGC.**

**Design.** The obverse is Longacre's Indian Princess design, here with 13 stars around the rim. The reverse is the regular-issue 1871 half dime die. Struck in silver with a reeded edge.

**Commentary.** A nonsensical—or fantastical is perhaps a better word—pairing of a pattern obverse with a regular-issue reverse, for no other apparent reason than to add more delicacies to the Mint's extensive menu. This issue, like many of the Standard Silver die pairings, is a "stateless" and "godless" variety that omits UNITED STATES OF AMERICA and IN GOD WE TRUST from either side.

**Physical Description.** Considerable cameo contrast appears on both sides even though uncredited by NGC, with bluish highlights over the still mostly silver surfaces. A lovely Gem of this rare variety. **NGC Census:** 1 in PR65, 2 finer including a PR66 Cameo. **PCGS Population:** 1 in PR65, none finer (12/08).

**Provenance.** *Ex: Stack's private treaty (11/1981). From The Lemus Collection, Queller Family Collection Part Two.* (#61343)

## 1871 Near-Gem Proof Standard Silver Quarter Struck in Silver, Judd-1090

1798 **1871 Standard Silver Quarter Dollar, Judd-1090, Pollock-1226, High R.7, PR64 NGC.**

**Design.** The obverse is Longacre's Indian Princess design, in a starless field with date 1871 in exergue. The reverse shows 25 / CENTS surrounded by a wreath of corn and cotton, with STANDARD at the upper rim. Struck in silver with a reeded edge.

**Commentary.** A posthumous design apparently implemented by Mint Chief Engraver William Barber after his predecessor's death on January 1, 1869. USPatterns.com estimates that a half-dozen examples of this popular silver variant are known. The Pollock reference notes that this piece weighs 92.1 grains, with diameter of 0.953 in. and die alignment of about 170 degrees (rotated slightly from coin turn).

**Physical Description.** The well-contrasted surfaces on this near-Gem show silver-white coloration tinged with pinkish-gold that is more prominent toward the rim. **NGC Census**: 2 in PR64, 1 PR67 finer. These 3 specimens are the only pieces certified at either PCGS or NGC (12/08).

**Provenance.** *Ex: King Farouk; Palace Collections of Egypt (Sotheby's, 2/1954), lot 1879; Sol Kaplan; Stack's private treaty. From The Lemus Collection, Queller Family Collection Part Two.* (#61349)

# 1871 Indian Princess Quarter, Judd-1099, PR64
## One of Four Known

1799 **1871 Quarter Dollar, Judd-1099, Pollock-1235, High R.7, PR64 NGC.**

**Design.** The obverse is the Indian Princess design, with 13 stars ringing the rim and date 1871 in exergue, while the reverse is from the regular Seated Liberty quarter die of the year. Struck in silver with a reeded edge.

**Commentary.** Pollock notes that the Lemus Collection example shows regular coin-turn die alignment, while the Frossard-Garrett-Bass specimen shows 170-degree alignment. This is likely, but certainly not conclusive, evidence of more than one striking period. With Stars and No Stars set were produced in silver, aluminum, and copper. USPatterns.com estimates that only four pieces are known of this variety.

**Physical Description.** The fields are nicely mirrored, and each side has lighter centers that deepen to a lovely golden around the margins. The devices are sharply defined throughout, there are a few tiny planchet voids on both obverse and reverse. A trace of a fingerprint is located in the upper left part of the obverse. **NGC Census:** one PR64 (including this piece), two PR65, one PR66 Cameo. **PCGS Population:** one PR60, one PR65 (11/08).

**Census and Provenance.** Saul Teichman notes that only four examples are confirmed of this pattern:

1. Gaston DiBello (Stack's, 5/1970), lot 346; Stack's (1/1987), lot 527. Die alignment 180 degrees. **The present specimen.**
2. Édouard Frossard (5/6/1882); T. Harrison Garrett; Garrett Collection-Johns Hopkins University, Part II (Bowers and Ruddy, 3/1980), lot 1037, Choice Proof; Harry W. Bass, Jr. Research Foundation; Bass Collection (Bowers and Merena, 5/1999), lot 1140. Die alignment 170 degrees. PR65 PCGS.
3. Julian Leidman; David Faraday via private treaty sale at NASC show (2/26/1972) for $300; ANA (Heritage, 7/1994), lot 6144, PR64 uncertified.
4. King Farouk; Palace Collections of Egypt (Sotheby's, 2/1954), lot 1879; Byron Johnson; Robert L. Hughes (1/1979); Casterline and Hall Collections Sale (Superior, 5/1989); Salisbury-Woods Collections (Bowers and Merena, 9/1994); Goldberg (5/2003); Heritage (11/2003), lot 11174, unsold. PR60 PCGS.

*From The Lemus Collection, Queller Family Collection Part Two.* (#61358)

## 1871 Quarter 'Die Trial' in Copper Judd-1102, PR66 Red and Brown

1800 **1871 Quarter Dollar, Judd-1102, Pollock-1238, R.7, PR66 Red and Brown NGC.**

**Design.** Listed as a die trial, struck from the regular-issue Seated Liberty quarter dies of 1871, in copper with a reeded edge.

**Commentary.** Rated R.7, this copper pattern probably has only five or six surviving pieces known today. USPatterns.com notes that "although these are described as regular die trial pieces in the standard references, it is more likely that the off-metal 'trials' of this year were deliberately struck for sale to collectors."

**Physical Description.** The splendid surfaces on this pristine Premium Gem offer plenty of rose, lilac, and blue highlights with a good strike and loads of eye appeal. NGC and PCGS combined have certified seven examples, less duplicates. This is the only NGC PR66 Red and Brown, but NGC has also certified a PR67 Red and Brown and a PR67 Star Brown (11/08). The finest PCGS-certified Judd-1102 is a PR66 Red and Brown.

**Provenance.** *Ex: Stack's private treaty.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#71361)

## Extremely Rare 1871 Quarter Die Trial in Aluminum, High R.7 Judd-1103, PR65 Cameo

1801 **1871 Quarter Dollar, Judd-1103, Pollock-1239, High R.7, PR65 Cameo NGC.**

**Design.** Struck from the regular issue dies for 1871 quarter dollars, in aluminum with a reeded edge. From the Briggs 1-A dies: The obverse shows a small rust lump in the drapery just above and right of the Y in LIBERTY.

**Commentary.** Only two or three pieces are currently known, according to USPatterns.com. Andrew Pollock recorded this piece with a weight of 28.2 grains. He also mentioned the Farouk coin and the 1971 ANA example in his census. It is possible that the present piece is the same as one of the other two.

**Physical Description.** Wonderful mirrored fields surround cameo devices on this attractive light gray piece. Both sides are exceptional, with only a few tiny spots. The lower right obverse and upper right reverse borders are ill-defined, suggesting misalignment of the dies. The only certified examples at NGC are this PR65 Cameo and one PR66 Cameo finer, while PCGS has graded a single PR65 coin (11/08). Possible duplication exists.

**Provenance.** *Ex: Estates of Philip M. Mann, Jr. and Glenn B. Smedley (Bowers and Merena, 9/1988), lot 596.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#61362)

## 1871 Gem Standard Silver-Indian Princess Half Dollar in Copper, Judd-1106 PR65 Red Cameo

1802 **1871 Standard Silver Half Dollar, Judd-1106, Pollock-1242, R.7, PR65 Red Cameo NGC.**

**Design.** The obverse is the Longacre Indian Princess design, in a starless field. The reverse offers a wreath of corn and cotton enclosing 50 / CENTS, the latter in an upcurving arc, with STANDARD at the upper rim. Struck in copper with a reeded edge.

**Commentary.** The 1871 pattern half dollars show several variants, with either a Standard Silver or regular Seated Liberty half reverse, and plain or starry field on the Indian Princess obverses. The silver and copper examples, all with reeded edge, are in the Low R.7-High R.7 range, with the aluminum strikings R.8. A unique nickel example from the regular dies (Judd-1119) is also known.

**Physical Description.** Copious quantities of orange-red grace both sides, with splendid cameo contrast between the fields and devices further heightened by the relatively open obverse fields. An appealing Gem. This is the only example in any grade certified at NGC, and PCGS has graded six pieces, the finest two PR66 Brown specimens (11/08).

**Provenance.** *Ex: DuPont Collection (Stack's, 11/1954), lot 2472; Scott Collection (American Auction Association [Bowers and Ruddy], 6/1975), lot 1258.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#81365)

# Eye-Appealing 1871 Half Dollar
# Judd-1109, R.7, PR64 Red Cameo

1803 **1871 Half Dollar, Judd-1109, Pollock-1245, R.7, PR64 Red Cameo NGC.**

**Design.** A seated Liberty faces left, wearing an Indian Princess headdress and a flowing robe. Her left hand rests atop a globe wrapped with a scroll bearing the word LIBERTY in raised letters, while holding a spear and Liberty cap in her right hand. Two flags—one bearing 13 stars—are in the background with the date 1871 in exergue. The periphery is free of stars or legends. The reverse is that of the regular-issue half dollar. Struck in copper with a reeded edge.

**Commentary.** Pollock, in his *United States Patterns and Related Issues,* explores the origin of this obverse design:

> "Although Longacre's Indian princess motif did not appear on any patterns prior to 1870, the design is known to have been conceived by him no later than 1852. Cory Gillilland in her 'Bullion Coins: A Nineteenth Century Proposal,' illustrates Longacre's circa 1852 sketches for this motif. The obverse design, illustrated on p. 22 of the article, is almost identical to that featured on the 'Indian princess' pattern pieces produced in 1870 through 1873, after Longacre's death (in 1869)."

The USPatterns.com website opines that William Barber implemented Longacre's Indian Princess design. Although this motif was never adopted for use on regular-issue U.S. coinage, a similar style of Liberty is found on the U.S. Trade dollars minted between 1873 and 1885.

**Physical Description.** Amazingly preserved red coloration blankets both sides of this near-Gem proof, although a few small scattered carbon spots and a fingerprint are observed on the obverse and likely preclude a higher grade. These minor issues are redeemed by appealing cameo contrast throughout. In fact, the current offering is the only piece that has been granted the Cameo designation by NGC as of (11/08). Pollock (1994) documented the weight of this specimen at 162.8 grains, with a diameter of 1.197 inches. **NGC Census:** 1 in PR64 Red and Brown Cameo, 3 numerically finer. **PCGS Population:** None in PR64 regardless of designation, 2 finer, neither of which are cameos (12/08).

**Provenance.** *Ex: River Oaks Sale (Bowers and Ruddy, 11/1976), lot 978; Lloyd M. Higgins, M.D. Collection (Bowers and Merena, 1/1988), lot 701.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#71368)

# Nostalgic 1871 Standard Silver Half, PR62 Cameo
# Judd-1111, Low R.7

1804 **1871 Standard Silver Half Dollar, Judd-1111, Pollock-1247, Low R.7, PR62 Cameo NGC.**

**Design.** A seated Liberty faces left, wearing an Indian princess headdress and a flowing robe. Her left hand rests atop a globe wrapped with a scroll bearing the word LIBERTY in raised letters, while holding a spear and liberty cap in her right hand. Two flags—one bearing 13 stars—are in the background with the date 1871 in exergue. Thirteen stars fill the periphery. Reverse: 50 / CENTS within an open agricultural wreath and a smaller STANDARD at the upper border. Struck in silver with a reeded edge.

**Commentary.** Pollock (1994) states that Cory Gillilland, in an article titled "Bullion Coins: A Nineteenth Century Proposal," references a letter from James Longacre to Mint Director George Eckert. In the letter, Longacre states that the purpose of his design "is to express a representation of America, by a female figure, in aboriginal costume, seated, contemplating one of the usual emblems of liberty, elevated on a spear, which she holds in her right hand; her left hand resting on a globe, presenting the western hemisphere." The USPatterns.com website states that "this is the most common of the four Longacre designs of this year with slightly over a dozen known." A fascinating comment, considering that the word "common" is associated with a pattern that has appeared at auction less than 10 times in the past 15 years.

**Physical Description.** The cataloger of the Kosoff estate described the current pattern as "lightly polished long ago but still quite attractive." We agree with the latter comment, but this piece was only lightly cleaned, not polished. This piece is resoundingly white, but signs of improper handling are not immediately apparent, and NGC agrees in their assignment of a PR62 grade. **NGC Census:** 1 in PR62 Cameo, 3 numerically finer. Of the four examples graded by NGC, this specimen is the only pattern designated as Cameo. **PCGS Population:** None in PR62 regardless of designation, 2 finer (12/08).

**Provenance.** *Ex: Julian Leidman; William R. Sieck Collection (Bowers and Ruddy, 7/1981), lot 219; Abe Kosoff Estate (Bowers and Merena, 11/1985), lot 1087; Auction '86 (Superior, 7/1986), lot 1160.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#61370)

## Attractive 1871 Indian Princess Copper Half Dollar, Judd-1112 PR63 Red and Brown

1805 **1871 Standard Silver Half Dollar, Judd-1112, Pollock-1248, R.7, PR63 Red and Brown ANACS.**

**Design.** On the obverse, Liberty is seated facing left with the date 1871 below. She wears an Indian headdress and supporting a Liberty pole with her right hand. Her left hand rests on a globe inscribed LIBERTY. Thirteen stars decorate the periphery. The reverse features the denomination 50 CENTS within a wreath of cotton and corn, with the inscription STANDARD above. Struck in copper with a reeded edge.

**Commentary.** Only about half a dozen examples are known in copper, according to USPatterns.com. The Low R.7 rating in the ninth edition of the Judd reference suggests the population actually approaches a dozen examples. In 1994 Andrew Pollock only recorded four pieces in his pattern reference. The Pollock reference contributed substantially to the body of knowledge for the series, although the census listings are clearly incomplete.

**Physical Description.** Both sides have intermingled light orange mint color with splashes of steel-blue, violet, and iridescent toning. This sharply detailed piece has fully reflective fields and satiny devices. **NGC Census:** None in PR63 Red and Brown, 4 finer. **PCGS Population:** None in PR63 Red and Brown, 4 finer (12/08).

**Provenance.** *Ex: Bowers and Merena (9/1992), lot 1696.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#71371)

# Magnificent 1871 Judd-1114 Half Dollar, PR67 ★ Cameo
# Perhaps the Finest of Six Known

1806 **1871 Half Dollar, Judd-1114, Pollock-1250, High R.7, PR67 ★ Cameo NGC.**

**Design.** A seated Liberty faces left, wearing an Indian princess headdress and a flowing robe. Her left hand rests atop a globe wrapped with a scroll bearing the word LIBERTY in raised letters, while holding a spear and Liberty cap in her right hand. Two flags—one bearing 13 stars—are in the background, with the date 1871 in exergue. Thirteen stars fill the periphery. A regular half dollar reverse die was used to produce Judd-1109. An eagle with a shield on its breast and wings spread holds arrows and olive branches in its talons. The upper field features a flowing scroll with IN GOD WE TRUST in raised letters. UNITED STATES OF AMERICA fills the upper periphery with HALF DOL. below. Struck in silver with a reeded edge.

**Commentary.** Andrew Pollock's 1994 pattern reference offers an inaccurate census, so we cautiously provide a modified provenance for the current offering. Coincidentally, the piece in this sale is the Pollock plate coin and was featured on the cover of the October 1988 Stack's sale. Pollock suggests this pattern was once the property of King Farouk and was subsequently sold as part of the Stanford Collection via Steve Ivy in July 1977. Unfortunately, the Judd-1114 in that sale was unplated, so positive identification is impossible. Pollock also counts seven examples, but fewer are believed extant, lending credence to the fact that his itemization is erroneously expansive.

**Physical Description.** As one would expect of a Superb Gem proof, this specimen is stunning in presentation. The strike is intense and time has graciously spared the surfaces of this beauty from any apparent mishandling. All of the aforementioned positive attributes are sealed by an awe-inspiring display of delicate toning throughout, and breathtaking cameo contrast adds to the charm of this magnificent Judd-1114 survivor. **NGC Census:** This is the finest of the two NGC-certified pieces by four grade points, and the Cameo and Star designations only serve to further illustrate this piece's superiority. **PCGS Population:** Four pieces total, the finest of which was graded PR64 (12/08).

**Provenance.** *Ex: New England Museum Properties (Stack's, 10/1988), lot 622.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#61373)

# 1871 Standard Silver Dollar, Judd-1120
# Perhaps Three or Four Known, PR63 Cameo

1807 **1871 Standard Silver Dollar, Judd-1120, Pollock-1256, High R.7, PR63 Cameo NGC.**

**Design.** The obverse is the Indian Princess design of James B. Longacre, in a plain or starless field. His initials J.B.L. appear at the lower right of Liberty's rock, in the field. The date 1871 is below. On the reverse, an open agricultural wreath encloses 1 / DOLLAR, with STANDARD at the top rim. Struck in silver with a reeded edge.

**Commentary.** The Standard Silver patterns were sold in complete sets from the half dime to the silver dollar, but according to USPatterns.com only three or four pieces are known of the present silver dollar patterns. The Standard Silver patterns reflect a late-19th century desire for standardization of design across a range of U.S. coin denominations, much as existed on the Seated Liberty coinage and that would later appear (with minor exceptions) on the Barber dime, quarter, and half dollar that debuted in 1892—a standardization that Walter Breen, never at a loss for words, would brand as "stereotypy" in his *Proof Encyclopedia*.

On some other 1871 dollar patterns featuring this design (Judd-1138 and following) there were 13 stars added around the edge, which was definitely *not* an improvement to this dramatic central design. The cameo effect is lost, and the Liberty cap and flag-points are lost amid the jumble of stars.

**Physical Description.** This cameo-style design is fittingly represented here by a Cameo-certified coin, with lots of eye appeal despite the seemingly modest grade, explained by the presence of moderate hairlines that are most obvious in the right obverse field. There is little color on this coin, and the bold strike is a plus. **NGC Census:** one PR63 Cameo (this coin), one PR66 Cameo. **PCGS Population:** one PR63 (11/08).

**Census and Provenance.** USPatterns.com estimates that three or four pieces are known. See that site for more information.
*Ex: Possibly [Major Lenox Lohr; Byron Johnson Collection (Hughes, 1/1979); William R. "Rudy" Sieck Collection (Bowers and Ruddy, 7/1981), lot 266, Brilliant Proof-63.] Plate-matching, however, is inconclusive, and the pedigree in the Sieck catalog is incorrect.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#61379)

# Finest Certified 1871 Standard Silver Judd-1124 Dollar, PR67 ★ Cameo Struck in Aluminum, R.8

1808 **1871 Standard Silver Dollar, Judd-1124, Pollock-1260, R.8, PR67 ★ Cameo NGC.**

**Design.** The obverse is the Indian Princess design of James B. Longacre, in a plain or starless field. His initials J.B.L. appear at the lower right of Liberty's rock, in the field. The date 1871 is below. On the reverse, an open agricultural wreath encloses 1 / DOLLAR, with STANDARD at the top rim. Struck in aluminum with a reeded edge.

**Commentary.** According to USPatterns.com the aluminum versions (Judd-1124 and 1125) of this Standard Silver dollar pattern are even rarer than the silver versions with plain or reeded edge (Judd-1120 and 1121). In this case, however, the difference is, like for so many of these rare patterns, one of uncertainty. USPatterns.com estimates that "perhaps three or four" examples are known of Judd-1120, with three being our best estimate. But in the case of Judd-1124, the R.8 ranking of USPatterns.com (which also appears in the Judd ninth edition) seems to be the result of its conclusion that there are "at least two known." In reality, three examples of each—and no more or less—might easily exist.

**Physical Description.** There is little to no evidence of post-strike contact on this wonderful coin, although some small planchet flaws attest to the Mint's relative unfamiliarity in 1871 with what was still very much an experimental coinage metal. This is the only certified example that numerically grades PR67, although it certainly merits both the Star and Cameo designations that NGC has also awarded it. **NGC Census:** one PR66, one PR66 Cameo, one PR67 Cameo. **PCGS Population:** one PR66 (11/08). Again, some duplication of one or two pieces is possible here, especially given the narrow grade range.

**Census and Provenance.** We believe that only three pieces exist.

1. Lester Merkin (9/1968), lot 461, proof; Auction '87 (Stack's, 7/1987), lot 837. **The present specimen.**
2. DiBello (Stack's, 5/1970), lot 414; Crouch (Superior, 6/1977), lot 518; William R. "Rudy" Sieck Collection (Bowers and Ruddy, 7/1981), lot 267, Gem Brilliant Proof-67.
3. King Farouk; Palace Collections of Egypt (Sotheby's, 2/1954), lot 1871.

*From The Lemus Collection, Queller Family Collection Part Two.* (#61383)

# Extremely Rare 1871 Indian Princess Dollar
# Judd-1126, PR63

1809 **1871 Dollar, Judd-1126, Pollock-1262, R.8, PR63 NGC.**

**Design.** The obverse features Longacre's Indian Princess design with 13 stars on the flag behind Liberty, all in a plain field with the date below. Probably implemented by William Barber, since Longacre died in 1869. The reverse is the regular issue With Motto Seated Liberty design. A short, raised die line from the N of IN to the G of GOD identifies this as a regular issue proof die used only in 1871. Struck in silver with a reeded edge.

**Commentary.** A number of pattern varieties dated between 1863 and 1873 use the regular With Motto Seated dollar reverse dies. Although certainly not exhaustive, we provide the following notes regarding the regular issue reverse dies used for proofs. Identified are four different reverse dies, with these characteristics.

1. A raised die line extends from the top right of the N of IN through the lower parts of G and O to the bottom edge of the ribbon below D. This die is observed on most or all proof Seated dollars from 1866 to 1868, the majority of 1869, and the minority of 1870.
2. Very slight doubling is observed on the tops of IN. This die is observed on a minority of 1869 proof dollars and most 1870 proof dollars.
3. A short, curved die line begins at the lower right side of N of IN and continues up through the lower left side of G, to the inner right side of that letter, just below the inside crossbar. This reverse die has only been observed on 1871 proof Seated dollars. It is also observed on the Judd-1126 dollar currently offered.
4. The entire motto is boldly doubled. Observed on 1872 and 1873 proof Seated dollars. It is also observed on 1872 Judd-1210.

Although admittedly brief, this reverse die study may help to determine when certain patterns were actually struck. For example, Reverse Die 1 is observed on at least one example of 1865 Judd-435, while Reverse Die 3 has been observed on an example of 1864 Judd-396.

**Physical Description.** An amazing Select proof that exhibits excellent contrast, partly due to the combination of lustrous devices and fully mirrored fields, and partly due to the actual design, with an entirely plain field aside from the date. Slightly toned. **NGC Census:** Two pieces total — this one, and one graded PR66 Cameo. **PCGS Population:** None (12/08).

**Provenance.** *Ex: Stack's (10/2003), lot 1099.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#61385)

# 1871 Indian Princess Silver Dollar, Judd-1127
# R.8, PR63, Only Three-Four Known

1810 **1871 Dollar, Judd-1127, Pollock-1263, R.8, PR63 NGC.**

**Design.** The obverse is of James B. Longacre's Indian Princess design, in a starless (plain) field, with date 1871 below and his initials J.B.L. at the lower right. The reverse is the regular-issue silver dollar die. Saul Teichman notes that "this reverse die is the same as the one used to strike 1866 copper dollars and at least some of the 1865 In God We Trust dollars." Struck in silver with a plain edge.

**Commentary.** The year 1871 continued the striking in various metals and denominations of both the Standard Silver and Longacre's Indian Princess designs, here apparently developed by William Barber more than two years after Longacre's death on January 1, 1869. Of course, other designs by the new Mint chief engraver also began to appear in greater quantities as the decade wore on. Although this pattern bears Longacre's initials in posthumous tribute, some patterns of 1870 (Judd-1008 through 1019) bear his full name spelled out.

These coins were sold in complete five-piece sets from the half dime through silver dollar.

**Physical Description.** Considerable cameo contrast appears on both sides, enhanced by the unadorned, barren obverse field. A few hairlines appear in those fields, but this design is still stunningly attractive. A few stray rose and gold highlights appear, but the coin is still mostly silver. USPatterns.com estimates that only three or four pieces exist. **NGC Census:** one in PR63 (this piece). **PCGS Population:** none.

**Provenance.** *Unknown.* The grade and general appearance concord with the William R. "Rudy" Sieck coin (Bowers and Ruddy, 7/1981, lot 268, Proof-63), earlier from Byron Johnson and Robert L. Hughes—but plate-matching is inconclusive.
*From The Lemus Collection, Queller Family Collection Part Two.*
(#61386)

## Impressive 1871 Standard Silver Dollar Judd-1133, PR64 Cameo

1811 **1871 Standard Silver Dollar, Judd-1133, Pollock-1270, High R.6, PR64 Cameo NGC.**

**Design.** A dollar pattern with Longacre's modified design having only 13 stars on the flag and the first and thirteenth peripheral stars closer to the base. The reverse has 1 DOLLAR as the central design element which is surrounded by a wreath of cotton and corn, and the word STANDARD above. Struck in silver with a reeded edge.

**Commentary.** This is James Longacre's famous Indian Princess design as modified by William Barber for the 1871 pattern coinage. Longacre died in 1869 and never actually saw his design on a struck coin. The Mint sold sets of the Indian Princess patterns, including one of each denomination from the half dime to the silver dollar. In addition to the present dollar, the sets included a half dime (Judd-1065), dime (Judd-1080), quarter (Judd-1096), and half dollar (Judd-1111).

In his roster, Pollock lists six different examples, followed by eight additional auction appearances. From the Queller Collection, Pollock records this coin and another example that was from the 1975 Superior ANA sale. More than a dozen examples are known per USPatterns.com.

**Physical Description.** This gorgeous proof has excellent contrast with fully and deeply mirrored fields around satiny devices. Both sides have a light coat of attractive champagne toning. There are few apparent hairlines or other blemishes visible. **NGC Census:** 1 in PR64 Cameo, 3 numerically finer. **PCGS Population:** 5 in PR64, none finer, and none with the Cameo designation (12/08).

**Provenance.** *Ex: Superior (1/1989), lot 4709.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#61393)

## Stunning 1871 Indian Princess Copper Dollar, Judd-1135, PR65 Red

1812 **1871 Standard Silver Dollar, Judd-1135, Pollock-1272, Low R.7, PR65 Red NGC.**

**Design.** Longacre's design with an Indian Princess seated with 13 stars around. The reverse has 1 DOLLAR within a wreath of corn and cotton, STANDARD above. Struck in copper with a reeded edge.

**Commentary.** Only about half a dozen examples of this Judd variety are known, and the present piece certainly must rank among the finest. Pollock cites five in his pattern reference, including one that hasn't been seen since the Farouk sale, and another that in the Connecticut State Library. The last example of this variety that traded in auction was in January 1997, according to the ninth edition of the Judd book. It is also the first example that we have offered in any of our auctions dating back to 1993.

Denomination sets of the silver coins were sold by the Mint to contemporary 19th century collections, although it is unknown how the copper and aluminum patterns were distributed. They may also have been sold in sets. If that was the case, rarity ratings suggest that the off-metal examples were less popular than the silver patterns.

**Physical Description.** An amazing example with fully brilliant orange mint color on both sides, accenting the satiny devices. All of the design elements are boldly detailed. The fields are fully mirrored around the devices. The only blemishes are a few tiny flyspecks on each side. **NGC Census:** 1 in PR65 Red, only a PR66 Brown numerically finer. **PCGS Population:** 1 in PR65 Red and Brown, only a PR66 Brown finer (12/08).

**Provenance.** *Ex: Stack's private treaty.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#81395)

# 1871 Indian Princess Dollar in Copper, R.8, Judd-1138C
# PR65 Brown, One of Two or Three Known

1813 **1871 Dollar, Judd-1138C, Pollock-1278, R.8, PR65 Brown NGC.**

**Design.** The obverse is the Longacre Indian Princess design as executed posthumously by William Barber, with the addition of 13 stars around the periphery. The reverse is the standard 1871 silver dollar die. Struck in copper with a reeded edge.

**Commentary.** USPatterns.com's Saul Teichman makes an interesting observation concerning this extremely rare pattern series: "This reverse die MAY be the same as the one used to strike 1866 copper dollars [Judd-541] and at least some of the 1865 In God We Trust dollars [Judd-434, 435, and 436 in silver, copper, and aluminum, respectively]. They have not been available for study." While he provides no basis for that statement or further information, the Judd-541 pieces are known to be numismatic delicacies that were struck or restruck for collectors at a later time than the date on the dies. Of course the motto IN GOD WE TRUST was adopted for regular coinage in 1866.

If these patterns were not so incredibly rare, an advanced collector might be able to assemble the cited coins above and compare them, possibly even to the extent of determining a striking sequence. But for the rarer pieces, as here, the best hope is a systematic study of museum pieces; and in many cases, even our nation's major museums lack examples for viewing.

**Physical Description.** Accents of lilac, blue, and sage complement the relatively unmarked surfaces of this delightful Gem proof. There is much field-device contrast, even though it is uncredited by NGC. **NGC Census:** two PR65 Brown. **PCGS Population:** one PR65 Red and Brown (11/08).

**Census and Provenance.** As noted on USPatterns.com and in the Pollock reference, only two or possibly three examples of this pattern are confirmed.

1. *Ex: Greater New York Numismatic Convention Sale (Stack's, 5/1990), lot 1211.* **The present specimen.**
2. Logan/Steinberg Collection (Bowers and Merena, 11/2002), lot 4428; southern collection; Simpson Collection.
3? Mid-Atlantic (Kagin's, 11/1974), lot 1862; ANA (Kagin's, 8/1977), lot 2140; Metropolitan Washington (Kagin's, 7/1979), lot 933. Saul Teichman notes that the Pollock listing of this example is for a silverplated copper example "based on the weight," but if correct it is a third example; else it is a Judd-1138A.

*From The Lemus Collection, Queller Family Collection Part Two.* (#61442)

## Pristine 1871 Pattern Silver Dollar
## Judd-1147, PR66 Brown

1814 **1871 Dollar, Judd-1147, Pollock-1289, High R.6, PR66 Brown NGC.**

**Design.** The Longacre design is used on the obverse that features Liberty seated with conjoined flags behind, left hand resting on a globe, and right hand holding a Phrygian cap on top. The reverse is of the regular die. Struck in copper with a reeded edge.

**Commentary.** This design combination, with the Indian Princess obverse and the regular issue reverse is the most plentiful of all the different 1871 silver dollar types. Considering both reeded edge and plain edge types, more than two dozen silver examples are known, and more than two dozen copper pieces are known. About a dozen are known in aluminum.

The reverse die is currently not matched to any of the known regular issue proof dies, although it is probably the same as one of the dies that were used for 1871 or 1872 proof Seated Liberty dollars. A comprehensive comparison of regular issue reverse dies to pattern dies of all the U.S. pattern coinage may provide interesting results to help date the production time of the various pattern issues.

**Physical Description.** Both sides of this splendid proof have deeply mirrored fields and bold, satiny devices. The obverse retains considerable original orange mint color with lovely gold, violet, and blue toning. The reverse is more deeply toned in sea-green, also with splashes of gold, violet, and blue. The surfaces appear virtually perfect. **NGC Census:** 2 in PR66 Brown, only a PR66 Red finer. **PCGS Population:** 1 in PR66 Brown, none finer (12/08).

**Provenance.** *Ex: Stack's private treaty.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#61409)

## Splendid 1871 Pattern Dollar
## Judd-1148, PR66 Brown

1815 **1871 Dollar, Judd-1148, Pollock-1290, High R.6, PR66 Brown NGC.**

**Design.** The Longacre obverse, with a seated Liberty facing left, wearing an Indian headdress and supporting a liberty pole with her right hand. Her left hand rests on a globe inscribed LIBERTY. Behind is a flag ornamented with 22 stars. Thirteen stars surround, the date 1871 is at the bottom. The design is executed in high relief with the appearance of a medal. The reverse was struck from the die used for regular issue Seated Liberty dollars. Struck in copper with a plain edge.

**Commentary.** More than a dozen examples of this plain edge copper dollar pattern are known, according to USPatterns.com. However, the ninth edition of Judd gives it a Low R.7 rating, suggesting an actual population in the range of 10 to 12 pieces. Based on auction appearances, the High R.6 rating seems more accurate. In our own auctions, we handled three different examples in the year 2007 alone. Our competitors have also handled a number of different examples over the years. This is just one of the many different pattern varieties where a comprehensive roster could be developed, but would present quite a challenge.

**Physical Description.** This gorgeous example features pleasing medium brown surfaces with splashes of gold, violet, and blue toning on both sides. Considerable original red luster remains visible on both surfaces. The fields are reflective with satiny luster on the devices. **NGC Census:** 1 in PR66 Brown, none numerically finer although two other PR66 pieces with different designations exist. **PCGS Population:** 3 in PR65 Red and Brown, none numerically finer (12/08).

**Provenance.** *Ex: Bowers and Merena (5/1992), lot 1760.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#61410)

## Rare 1871 Indian Princess Dollar Judd-1149, Aluminum, PR65 Cameo

1816 **1871 Dollar, Judd-1149, Pollock-1291, Low R.7, PR65 Cameo NGC.**

**Design.** On the obverse Liberty wears an Indian headdress and supports a liberty pole with her right hand facing left. Her left hand rests on a globe inscribed LIBERTY. Behind her is a flag ornamented with 22 stars. Thirteen stars surround and the date 1871 is at the bottom. The reverse is the die used for regular issue Liberty Seated dollars. Struck in aluminum with a reeded edge.

**Commentary.** As a general rule, aluminum patterns are substantially rarer than copper or silver patterns. Prior to the late 1880s, aluminum was considered a precious or semi-precious metal, at one time considered more valuable than gold. At one time, bars of aluminum were exhibited alongside the French crown jewels. Because of its value and scarcity, aluminum saw limited production in pattern coins, and saw no 19th century use in regular issue coinage production.

**Physical Description.** Both sides of this boldly detailed aluminum pattern have light gray surfaces with fully mirrored fields around the lustrous devices. A faint trace of champagne toning is evident on each side. The surfaces exhibit a few fine hairlines and minuscule blemishes including a faint line right of the date and a small planchet flaw in the left reverse field. **NGC Census:** 1 in PR65 Cameo, 2 finer. **PCGS Population:** None in PR65 regardless of designation, 1 finer, no cameos in any grade (12/08).

**Provenance.** *Ex: Stack's (5/1986), lot 1080.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#61411)

## Important 1871 Judd-1150 Aluminum Dollar, PR64

1817 **1871 Dollar, Judd-1150, Pollock-1292, R.7, PR64 NGC.**

**Design.** The Longacre design is used on the obverse that features Liberty seated with conjoined flags behind, left hand resting on a globe, and right hand holding a Liberty pole with Phrygian cap on top. The reverse is the same regular With Motto die that also appears on Judd-1149. Struck in aluminum with a plain edge.

**Commentary.** At least five examples of this rare variety are known. Andrew Pollock recorded four pieces in his pattern reference: the DiBello-Crouch specimen, the 1975 ANA coin, the Fairfield piece, and this example from the Queller Collection. We feel that there may actually be a few more of these Judd-1150 dollars still in existence. We have records of four distinctly different examples appearing in our auctions since 1993, and this coin from the Queller Collection is a fifth example.

**Physical Description.** Both sides have bold design definition with lovely light gray surfaces. The fields are deeply mirrored around the satiny devices, and there are a few contact marks and die cracks that help explain the PR64 grade. Some splashes of dark steel-gray are evident on each side of this near-Gem example. **NGC Census:** 3 in PR64, 3 finer. **PCGS Population:** PCGS has certified a single PR64 with no other examples in any grade (12/08).

**Provenance.** *Ex: Bowers and Ruddy (4/1979), lot 1847; Bowers and Merena (9/1984), lot 398.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#61412)

# Sensational 1871 Commercial Dollar in Copper
# Judd-1156, PR66 Red

1818 **1871 Commercial Dollar, Judd-1156, Pollock-1300, High R.7, PR66 Red NGC.**

**Design.** The obverse features Longacre's Indian Princess design with 22 stars on the flag behind Liberty and 13 stars about the obverse periphery. Probably implemented by William Barber, since Longacre died in 1869. The reverse, used for the Judd-1154 through 1160 varieties, exhibits the legends UNITED STATES OF AMERICA /COMMERCIAL /DOLLAR /420 GRS /900 FINE along with a wreath and cornucopia. GOD OUR TRUST is displayed on a scroll above the wreath ribbon. Struck in copper with a reeded edge.

**Commentary.** As a rare copper pattern featuring the popular Indian Princess obverse with the Commercial dollar reverse—the forerunner of the Trade dollar—this example and its siblings are sought after by collectors from several different but interrelated collecting disciplines.

**Physical Description.** An absolutely stunning Premium Gem proof with brilliant orange surfaces, this pattern Trade dollar has a moderately deep mirrored obverse, with a fully and deeply mirrored reverse. Only faint mellowing of the mint color and splashes of darker toning are evident on either side, insufficient to prevent the Red designation. **NGC Census:** Two coins total — this piece and one grading PR63 Brown. **PCGS Population:** 1 in PR63 Brown, no others in any grade (12/08).

**Census and Provenance.** According to Saul Teichman at USPatterns.com, there are exactly four examples of Judd-1156 currently known:

1. J.C. Mitchelson; Connecticut State Library. Proof. The specific grade is unknown.
2. Auction '87 (RARCOA, 8/1987), lot 1327; David Queller Family Collection. **The present piece.**
3. Goldberg Coins (1/2004); Heritage (8/2004), lot 8003. PR63 Brown PCGS.
4. RARCOA (1/1973), lot 643; Wyoming Collection. Proof. The specific grade is unknown. At the time, it was described as a "Superb Proof with deep rich chocolate brown color and a magnificent rainbow of iridescent sea-green, blue and violet toning."

**Other Appearances.**

A. Lot 1874 in the February 1954 sale of the King Farouk Collection included an example of this pattern. That four-piece lot contained one each of Judd-1154, 1155, 1156, and 1157. The Farouk specimen is now untraced but could be any of the above, except the first.

*From The Lemus Collection, Queller Family Collection Part Two.* (#81418)

# 1871 Commercial Dollar, Copper, Plain Edge
# Judd-1157, PR64 Red and Brown
# Tied for Finest Certified, R.8

1819 **1871 Commercial Dollar, Judd-1157, Pollock-1301, R.8, PR64 Red and Brown NGC.**

**Design.** The James B. Longacre Indian Princess design here shows 13 peripheral stars on the obverse, with 22 stars on the flag. The date 1871 is below. The reverse shows the usual wreath with UNITED STATES OF AMERICA at upper rim, and inside COMMERCIAL / (crossed cornucopias) / DOLLAR / (bar ornament) / 420 Grs. 900 FINE / (bar ornament). GOD OUR TRUST is on the ribbon of the wreath. Struck in copper with a plain edge.

**Commentary.** This Commercial pattern issue, struck in both silver and copper and in plain and reeded edge varieties, was the forerunner of the Trade dollar that would make its official debut in commerce two years later, in 1873. USPatterns.com notes that the former Bass example in silver, reeded edge (Judd-1154), weighed 410 grains—close to the regular standard for silver dollars, despite the reverse inscription.

The use of the revised motto GOD OUR TRUST is interesting, as this original version had been rejected years before, and "no information has been learned to the effect that the usual motto, IN GOD WE TRUST, needed modification," according to Judd. Perhaps the simplest explanation is correct, that for the designer a ribbon center with two sides dictated a three- rather than four-word version.

Judd estimates that the plain edge versions in silver and copper are R.8, while the reeded edge versions are High R.7. Like so many of these incredibly elusive patterns, however, making an accurate census or estimate of their true rarity is simply impossible. Many of the early auction citations lack photographs and/or are simply misattributed—when attributed at all—and various factors conspire to mask the true picture of a given issue's rarity. The certified populations are but one clue to those questions, but they are nonetheless helpful when taken with the usual *caveats* to the *emptor* (and *vendor*).

**Physical Description.** Splendid mostly red surfaces show just a hint of browning. The relatively mark- and carbon-free surfaces are immediately suggestive of an even finer grade, but as it is, this piece is either tied for finest, or perhaps the sole example certified, accounting for resubmissions and crossovers. **NGC Census:** one PR64 Brown, one PR64 Red and Brown (this piece). **PCGS Population:** one PR64 Brown (10/08). Probable duplications exist here.

**Census and Provenance.** Only three pieces are known, according to USPatterns.com, one of them in a museum collection:

1. Stack's (6/1988), lot 454. **The present specimen.**
2. J.C. Mitchelson (1913); Connecticut State Library.
3. King Farouk; Palace Collections of Egypt (Sotheby's, 2/1954), lot 1674; Christie's (9/1988), lot 593, cleaned; Classics Sale (American Numismatic Rarities, 5/2003), lot 83. PR64 Brown NGC.

*From The Lemus Collection, Queller Family Collection Part Two.*
(#71419)

## Extremely Rare 1871 Copper Quarter Eagle, Judd-1164 PR66 Red and Brown Cameo

1820 **1871 Quarter Eagle, Judd-1164, Pollock-1306, R.7, PR66 Red and Brown Cameo NGC.**

**Design.** The regular dies for the 1871 Liberty quarter eagle. Struck in copper with a reeded edge.

**Commentary.** An extremely rare pattern, and another possible numismatic flight of fancy actually produced for sale to collectors. The current offering was part of a small group of U.S. gold patterns offered in the T. Henry Allen sale by Stack's in February 1977. It was described by that cataloger as "proof, almost full mint color. Rarely seen in this lovely state of preservation." It would have been more accurate to write, "rarely seen *at all*," as evinced by the provenance provided below.

**Physical Description.** An incredible Premium Gem proof with full cameo contrast, and essentially brilliant red surfaces. Only a hint of light brown toning appears on the design elements, with splashes of pale violet patina. A boldly detailed, glittering proof that is probably the finest known example of Judd-1164. **NGC Census:** 1 in PR66 Red and Brown Cameo, the finest numerically by three grade points and the only Cameo. **PCGS Population:** Two pieces total, neither of which grades finer than PR65 Red and Brown (12/08).

**Census.** We have records of three examples of the variety, two in copper and one gilt:
1. T. Henry Allen Collection (Stack's, 2/1977), lot 1137; Queller Collection. **The present specimen.**
2. Superior (2/1997), lot 2665; Stack's (10/1997), lot 955; Superior (9/1998), lot 1894; Bowers and Merena (9/2001, sold 11/2001), lot 178; Heritage (1/2007), lot 1475. PR63 Red and Brown PCGS.
3. Harry X Boosel (RARCOA, 4/1972), lot 1131; Harry W. Bass, Jr. (Bowers and Merena, 5/1999), lot 1336. **PR63 Gilt.**

**Other Appearances.** Two other citations may be included in those above, or they might be additional examples:
A. Pine Tree (3/1974), lot 434; Paramount (4/1977), lot 171. This is either number 2 above, or a new example.
B. King Farouk; Palace Collections of Egypt (Sotheby's, 2/1954), lot 1864. This could be the same as any of the above.
*From The Lemus Collection, Queller Family Collection Part Two.* (#71426)

## Desirable 1871 Copper Half Eagle Judd-1170, PR65 Brown

1821 **1871 Five Dollar, Judd-1170, Pollock-1312, High R.7, PR65 Brown NGC.**

**Design.** The regular dies for the 1871 Liberty half eagle. Struck in copper with a reeded edge.

**Commentary.** Like its copper quarter eagle counterpart in copper also in the present sale (Judd-1164), this piece has all the earmarks of a fantasy strike rather than a true die trial. This piece has been off of the market since its last appearance in the October 1977 Steve Ivy public auction. It was deemed important enough by the cataloger of that sale to be afforded a color plate. Indeed it is important and rarely offered for sale.

**Physical Description.** A delicate copper proof with attractive violet and blue toning over faded red mint color. The devices are boldly detailed, and the overall eye appeal is exceptional.

**Census.** Probably just four or five examples of Judd-1170 survive:
1. Stanley Kesselman (8/1971); Harry W. Bass, Jr. (Bowers and Merena, 5/1999), lot 1355. PR65 Red and Brown PCGS.
2. Steve Ivy (10/1977), lot 1038; NASCA (6/1978), lot 4634; Queller Collection. **The present specimen.**
3. Stack's (2/1977), lot 1142; Queller Collection. Proof.
4. Steve Ivy (12/1976), lot 1168. Gilt proof.

**Other Appearances.** In addition to those above, Pollock cites these, which may be duplicated above:
A. Pine Tree (3/1974), lot 434; Paramount (4/1977), lot 177.
B. King Farouk; Palace Collections of Egypt (Sotheby's, 2/1954), lot 1862.
C. Manfra, Tordella and Brooks (1974); T.R. Walsh.
*From The Lemus Collection, Queller Family Collection Part Two.* (#61433)

## Elusive 1871 Copper Eagle Judd-1173, PR67 Brown The Finest Certified Example

1822 **1871 Ten Dollar, Judd-1173, Pollock-1315, High R.7, PR67 Brown NGC.**

**Design.** The regular dies for the 1871 Liberty eagle. Struck in copper with a reeded edge.

**Commentary.** It is believed that about half a dozen of these copper eagles exist, including at least two different examples that are gilt. This piece is probably the finest of all known examples. The present offering of patterns from the Queller Collection provides the interested collector an opportunity to begin an 1871 "gold" proof set in copper. The complete set of six coins would be a remarkable achievement. This was the final lot in the February 1972 sale of the T. Henry Allen Collection by Stack's. Our consignor purchased two pattern lots from that sale: the current piece and the 1871 quarter eagle in copper (Judd-1164), which is offered in this auction as a separate lot. Perhaps one bidder will acquire both lots from the current sale and keep these two pattern cousins together for another 37 years.

**Physical Description.** A stunning Superb Gem proof, this example exhibits beautiful medium blue and violet toning around faded red mint color at the centers. The devices are boldly defined with satiny luster and the flawless fields are fully reflective. **NGC Census:** Three coins total, of which this is the finest. **PCGS Population:** A single coin grading PR65 Red and Brown (12/08).

**Provenance.** *Ex: Stack's (2/1977), lot 1144.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#61436)

# Possibly Unique 1872 Aluminum Half Dime, Judd-1192 Regular Dies, PR65 Cameo

1823 **1872 Half Dime, Judd-1192, Pollock-1332, R.8, PR65 Cameo NGC.**

**Design.** The regular dies for the 1872 Seated Liberty half dime. Struck in aluminum with a reeded edge.

**Commentary.** Like some previous years, all of the regular-issue proof coins of 1872 were struck in various off-metals, most notably in copper and aluminum. The off-metal coins are all extremely rare, and the prospect of forming a complete collection in any single metal is slim at best.

The last auction appearance for Judd-1192, according to Dave Bowers in the ninth edition of Judd, was when this coin appeared in the March 1977 Stack's sale. Collectors have waited patiently for 30 years to acquire an example of the variety. Pollock recorded a second example, from the Farouk sale in 1954 that reappeared in M.H. Bolender's sale of October 1955. If the Queller specimen and the Farouk coin are the same, then we would conclude that Judd-1192 is unique. At USPatterns.com, Saul Teichman states "fewer than 3 examples confirmed."

**Physical Description.** A stunning Gem Cameo proof with brilliant and nearly flawless bright surfaces. Both sides have fully mirrored fields and highly lustrous, frosty devices. The strike is bold, and the overall appearance of this aluminum pattern half dime is exceptional. For an example of this rarity to survive in such wonderful condition is quite amazing. This piece shows only the minor planchet roughness that is testimony to the Mint's still relative unfamiliarity with the processing of aluminum at the time. The sole example of Judd-1192 certified at NGC, while PCGS has also certified only a single PR65 piece (11/08).

**Provenance.** *Ex: Stack's (3/1977), lot 774.*
*From The Lemus Collection, Queller Family Collection Part Two.*
(#61463)

# Barber 1872 Amazonian Quarter
# Judd-1195, PR66 Cameo
# Finest Certified

1824 **1872 Quarter Dollar, Judd-1195, Pollock-1335, Low R.7, PR66 Cameo NGC.**

**Design.** William Barber's Amazonian design with Liberty seated, facing left, her right hand touching the head of a spread-wing eagle, sword in left hand. Thirteen stars are on the upper portion of that side with the date below. The reverse has a reversed variant of the eagle seen on the obverse, denomination below, and UNITED STATES OF AMERICA around much of the perimeter on that side. Struck in silver with a reeded edge.

**Commentary.** Many students of U.S. pattern coinage consider the Amazonian design, which William Barber created, to be the most beautiful design ever created for a coin. It was a mere 18 years after they were coined that the Amazonian name first appeared in the catalog of Lorin Parmelee's Collection sold by New York Coin and Stamp in 1890.

A roster of at least seven different examples appears at USPatterns.com, clearly indicating that there are many rarer pattern issues, but few that are more desirable. Two of those known examples are in museums, one at the Western Heritage Museum in Omaha, from the Byron Reed Collection, and the other at the ANA Museum in Colorado Springs, from the Harry Bass Collection.

**Physical Description.** A dazzling Cameo proof, this Premium Gem exhibits fully brilliant silver surfaces with a subtle frame of peripheral gold toning. Both sides have deeply and fully mirrored fields around the brilliant and lustrous devices. Aside from faint hairlines, tiny contact marks, and minuscule lint marks, the surfaces are pristine. The numerically finest certified at either service, and the only Cameo certified (11/08).

**Provenance.** *Ex: Stack's (10/2003), lot 1070.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#61466)

1825 **1872 Half Dollar, Judd-1200, Pollock-1340, Low R.7, PR64 NGC.**

**Design.** The obverse is of the William Barber Amazonian design. A seated Liberty faces left, holding a sword in her left hand and resting her left arm on a large shield. Her outstretched right hand is on the head of an eagle, wings partially spread, at her feet. Thirteen stars arranged seven and six are before and behind her head, respectively, and the date 1872 is in exergue. The reverse depicts a spread-winged eagle holding three arrows in its right talon and a shield in its left. An olive branch is in front of the shield. The usual national reference is above, with denomination spelled out HALF DOL. below. The scroll crossing the shield reads IN GOD WE TRUST. Struck in silver with a reeded edge.

**Commentary.** While the critical reviews of William Barber's *oeuvre* taken as a whole are mixed at best, there is no denying that this so-called Amazonian pattern, produced in only his third year as Mint chief engraver, is a masterful composition that has justly taken its place among the most popular in the entire pattern repertoire.

Among the various named patterns of the 19th century, the Amazonian constitutes one of the Big Three of U.S. pattern collecting, along with the Shield Earring and Schoolgirl designs. Many collectors of advanced means have endeavored—and endeavor still—to collect at least one example of each design and denomination and/or metal.

Pattern researcher Saul Teichman of USPatterns.com has been unable to find any reference to the "Amazonian" term that predates the June 1890 sale of the Lorin G. Parmelee Collection by H.P. Smith and David Proskey, catalogers.

**Physical Description.** Powder-gray, gold, and ice-blue rim highlights accentuate the surfaces that are still silver in portions of the center, with heavier patina on the reverse than the obverse. This lovely near-Gem proof also offers a razor-sharp strike, with bold definition in the ruffled feathers on the reverse eagle's breast and the shield lines, Liberty's hair, and the eagle feathers on the obverse. A small spot of dark toning on Liberty's exposed left breast serves as a pedigree marker. **NGC Census:** one in 64, five finer including a PR66 Cameo. **PCGS Population:** 1 in PR64, none finer (12/08).

**Provenance.** *Ex: 1981 FUN (New England Rare Coin Auctions, 1/1981), lot 1178.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#61471)

# Extremely Rare 1872 Copper Dollar
# Judd-1210, Regular Dies, PR65 Brown

1826 **1872 Dollar, Judd-1210, Pollock-1350, R.8, PR65 Brown NGC.**

**Design.** The regular Seated Liberty With Motto design, the motto boldly doubled as seen on regular issue proofs dated 1872 and 1873. Struck in copper with a reeded edge.

**Commentary.** The 1872 copper dollars from the regular dies were not trial pieces as often recorded, but instead were part of off-metal coinage sets that the Mint marketed to contemporary collectors. The off-metal pattern sets were coined in both copper and aluminum (Judd-1211).

The complete coinage set in copper contained the cent (Judd-1179), two cent (Judd-1183), coronet three cent (Judd-1185), trime (Judd-1187), five cent (Judd-1189), half dime (Judd-1191), dime (Judd-1193), quarter (Judd-1198), half dollar (Judd-1203), dollar (Judd-1210), gold dollar (Judd-1227), quarter eagle (Judd-1233), three dollar (Judd-1238), half eagle (Judd-1243), eagle (Judd-1248), and double eagle (Judd-1253).

It is doubtful that many sets were actually purchased by collectors, as only two or three examples of the copper dollar are known today. We are aware of only five auction appearances over the past 54 years, and representing at the most only three different coins.

In addition to the Heritage and Stack's auctions where this specimen appeared, either the same or another example was offered in Bolender's 11/1959 sale, reappearing in Merkin's 9/1968 sale, and an example appeared in the King Farouk sale in 1954.

**Physical Description.** This glittering, boldly defined proof has fully mirrored fields around modestly lustrous devices. Both sides are medium to dark brown, with considerable orange mint color remaining beneath the iridescent toning. **NGC Census:** This is the only Judd-1210 certified in any grade or designation. **PCGS Population:** A single coin grading PR64 Brown (12/08).

**Provenance.** *Ex: Heritage (12/1988), lot 1896; Stack's (9/1992), lot 751.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#61481)

# Important 1872 Commercial Dollar
# Judd-1214, High R.7, PR64

1827 **1872 Commercial Dollar, Judd-1214, Pollock-1355, High R.7, PR64 NGC.**

**Design.** William Barber's lower relief copy of James Longacre's famous Indian Princess design. Liberty is seated facing left, supporting a Liberty pole and a globe inscribed LIBERTY. Two flags are behind, one of which exhibits 13 stars. At least four of the stars are widely repunched. The reverse has UNITED STATES OF AMERICA above an olive wreath. GOD OUR TRUST is below the wreath on a scroll, and within the wreath are the legends COMMERCIAL / DOLLAR / 420 GRs / 900 FINE. Struck in silver with a reeded edge.

**Commentary.** The most obvious differences between James Longacre's original design and William Barber's copy are different treatment of the hair and headdress, along with much sharper features on the globe on Barber's low-relief copy.

**Physical Description.** A lovely Choice proof with deep sea-green, pale gold, and iridescent toning that accompanies bold design motifs. A few faint hairlines limit the grade, and tiny lint marks remain from the minting process. **NGC Census:** 1 in PR64, 1 finer as a PR65 Cameo. **PCGS Population:** A single coin, graded PR62 (12/08).

**Census and Provenance.** There are probably seven or eight different examples known:

1. Stack's (1/1987), lot 537. **The present specimen.**
2. Harry X Boosel (RARCOA, 4/1972), lot 1134; Harry W. Bass, Jr.; ANA Museum.
3. Bowers and Ruddy (5/1973), lot 619.
4. H.P. Newlin; Garrett Collection (Bowers and Ruddy, 3/1980), lot 1068; New England Rare Coin Auctions (7/1980), lot 863.
5. Stack's (11/1965), lot 54.
6. Louis E. Eliasberg, Sr. (Bowers and Merena, 5/1996), lot 299.
7. Superior (8/2002), lot 817; Heritage (5/2005), lot 8330; Superior (5/2006), lot 933; Bowers and Merena (3/2007), lot 386; Heritage (8/2007), lot 2184.

**Other Appearances.**

A. King Farouk; Palace Collections of Egypt (Sotheby's, 2/1954), lot 1898; Heritage (8/1985), lot 3340. Not illustrated in either catalog, and probably one of the preceding.

*From The Lemus Collection, Queller Family Collection Part Two.* (#61485)

## Pleasing 1872 Commercial Dollar
## Judd-1219, PR62

1828 **1872 Commercial Dollar, Judd-1219, Pollock-1360, Low R.7, PR62 NGC.**

**Design.** The obverse is the regular design for the Seated Liberty dollar. The reverse has a laurel wreath with UNITED STATES OF AMERICA around. The wreath stems are tied by a bow and intertwined with a ribbon inscribed GOD OUR TRUST. Inside, COMMERCIAL and DOLLAR are separated by a cornucopia with 420 GRS / 900 FINE on two lines below. Struck in silver with a reeded edge.

**Commentary.** Approximately a dozen examples of this Commercial dollar pattern are known. The Commercial dollar patterns and Trade dollar patterns were prepared in anticipation of a coin to compete with the Mexican peso in international trade. Finally, Congress decided on the Trade dollar in 1873. **NGC Census:** 1 in PR62, 2 finer. **PCGS Population:** 2 in PR62, 1 finer (12/08).

**Physical Description.** The deeply toned silver surfaces exhibit reflective fields beneath golden-brown, pale blue, and iridescent toning. Slight central weakness is noted, and the surfaces show the usual minor hairlines and tiny contact marks.

**Provenance.** *Ex: Bowers and Ruddy (11/1977), lot 3270.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#61490)

# 1872 'Indian Princess' Trade Dollar
# Pattern in Silver, Judd-1220
# PR64, High R.7

1829 **1872 Trade Dollar, Judd-1220, Pollock-1362, High R.7, PR64 NGC.**

**Design.** The obverse is the William Barber adaptation of Longacre's Indian Princess design. She faces left, with 13 stars each around and on the flag, a large globe inscribed LIBERTY in raised letters, date 1872 below. The reverse is the first Trade dollar pattern, copying the Commercial dollar patterns. A wreath with UNITED STATES OF AMERICA at upper rim, and inside TRADE / DOLLAR / (bar ornament) / 420 GRAINS. 900 FINE / (bar ornament). IN GOD WE TRUST is on the ribbon of the wreath. Struck in silver with a reeded edge.

**Commentary.** With the explicit inscriptions spelling out a precise metric weight in silver, these Trade dollar patterns not only foreshadow the regular-issue Trade dollars that would debut in 1873, but also some of the other attempts at international coinage, such as the Bickford patterns, the goloid metric dollars, and the stella coinage. The difference in the Trade dollars and the other coinage proposals, however, was that the former were targeted specifically for trade in the Orient, while the latter, in attempting to be "all things to all people," ended up satisfying none of the specific requirements for an international currency.

**Physical Description.** The mostly untoned silver-white surfaces offer just a slight blush of gold on some of the device high points, and there is considerable field-device contrast, although uncredited by NGC. Some light contact evidence and hairlining in the fields explains the grade, but this coin is still commendable in its appeal. Saul Teichman estimates that a half-dozen are known. **NGC Census:** one PR64, one PR65. **PCGS Population:** one each in PR62, PR63, PR65 (10/08).

**Provenance.** *Ex: Americana Sale (Stack's, 1/2005), lot 3043. From The Lemus Collection, Queller Family Collection Part Two.* (#61492)

## Extremely Rare 1872 Gold Dollar Pattern
## Struck in Aluminum, R.8
## Judd-1228, PR66 Cameo

1830 **1872 Gold Dollar, Judd-1228, Pollock-1371, R.8, PR66 Cameo NGC.**

**Design.** Both obverse and reverse dies are the same design used on regular issue coinage in 1872. Struck in aluminum with a reeded edge.

**Commentary.** This extremely rare pattern has traditionally been listed as a dies trial issue, but USPatterns.com believes the coins were produced for sale to collectors in pattern sets. The issue was unknown to R.C. Davis and was missing in most of the great pattern collections of the 19th century. Auction appearances in the 20th century are equally rare. We note an appearance in The Palace Collections of Egypt (Sotheby's, 2/1954), lot 1893; and ANA (Stack's, 8/1976), lot 3637. Opportunities to acquire an example of Judd-1228 are nearly as rare as the coins themselves. Pollock and others considered this pattern to have a rarity rating of R.7 in the past, but numismatic researchers today agree that the rarity is more accurately set at R.8.

**Physical Description.** The current offering was documented in the 1994 Pollock reference at 5.1 grains, 0.591 inches, with a die alignment of 180 degrees. The surfaces are untoned and well preserved. The fields are deeply mirrored and set up a strong cameo effect against the thickly frosted devices. The strike is above average, with only a little softness on the hair and feathers. Overall eye appeal is excellent. This is the only example at NGC certified in any grade, and there are none at PCGS (11/08).

**Provenance.** *Ex: Stack's private treaty transaction.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#61500)

# Popular 1872 Amazonian Ten Dollar
# Gilt Copper, Judd-1246, PR62 Gilt

1831 **1872 Amazonian Ten Dollar, Judd-1246, Pollock-1388, Low R.7, PR62 Gilt NGC.**

**Design.** William Barber's "Amazonian Gold" design has a bust of Liberty facing left, her hair flowing behind her head and below the bust truncation, wearing a Phrygian cap inscribed Liberty. There are 13 stars along the border and the date is below the bust. The reverse is similar to the Amazonian silver design with an eagle, wings spread, grasping three arrows in its right claw, its left leg raised up to support a shield. A ribbon crosses the shield with the inscription IN GOD WE TRUST. Around is the legend UNITED STATES OF AMERICA, and below is the denomination TEN DOL. Struck in copper with a reeded edge.

**Commentary.** The series of Amazonian silver and gold patterns are considered among the most beautiful designs ever created for U.S. coinage, and it is a shame that they never saw actual production for commerce. The Amazonian gold patterns were sold in six-piece sets, mostly produced in copper. Today, several of the copper examples are gilt, like this piece. About a dozen examples are known in all. According to Adams and Woodin, just one set was actually produced in gold, and two sets were produced in aluminum.

**Physical Description.** Satiny greenish-yellow gold with sharp design motifs. The obverse and reverse surfaces exhibit minor hairlines that limit the grade. There are few other blemishes of any significance on either side. **NGC Census:** 2 in PR62 Gilt, 1 finer gilt. **PCGS Population:** None certified gilt (12/08).

**Provenance.** *Ex: Auction '88 (Stack's, 7/1988), lot 1310.*
*From The Lemus Collection, Queller Family Collection Part Two.*
(#61518)

## Popular 1873 Trade Dollar Pattern Judd-1276, PR64

1832 **1873 Trade Dollar, Judd-1276, Pollock-1418, R.4, PR64 NGC.**

**Design.** A coronet inscribed LIBERTY is surrounded by 13 stars with the date below. The reverse has the statutory legend around a wreath with the denomination and technical data inside, the bottom of the wreath is tied by a ribbon with IN GOD WE TRUST. Struck in silver with a reeded edge.

**Commentary.** As a group, most patterns are much rarer than this variety. At least 100 different examples are known. The Mint marketed six-piece pattern Trade dollar sets in 1873, the sets including Judd-1276. Also included were Judd-1281, 1293, 1310, 1315, and 1322.

**Physical Description.** Deep gray-gold toning masks the full mirrors on each side of this lovely Choice proof. The reverse is quite a bit brighter than the obverse. Both sides exhibit mild cameo contrast, and the devices are sharply detailed. Minor hairlines and contact marks prevent a higher grade. **NGC Census:** 3 in PR64, 7 finer. **PCGS Population:** 8 in PR64, 8 finer (12/08).

**Provenance.** *Ex: Stack's (9/1989), lot 1424.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#61561)

## Innovative 1873 Trade Dollar Pattern Judd-1277, PR61

1833 **1873 Trade Dollar, Judd-1277, Pollock-1419, Low R.7, PR61 NGC.**

**Design.** The obverse is centered around a bust of Liberty facing left, with 13 stars at the border and the date below. Liberty wears a beaded coronet inscribed LIBERTY. The reverse features the denomination TRADE DOLLAR and the specifications 420 GRAINS and 900 FINE, enclosed by an olive wreath. The legend UNITED STATES OF AMERICA is above, with IN GOD WE TRUST on a scroll at the base of the wreath. Struck in silver with a plain edge.

**Commentary.** USPatterns.com reports examples of Judd-1277 were sold to collectors as part of six-piece pattern Trade dollar sets for $30 per set. Experts estimate fewer than one dozen specimens survive. **NGC Census:** 1 in PR61, 3 finer. **PCGS Population:** None in PR61, 6 finer (12/08).

**Physical Description.** The surfaces are enhanced by lovely violet and red-gold toning, with a strong strike and minimal handling marks for the grade.

**Provenance.** *Unknown.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#61562)

## Choice Proof 1873 Judd-1281 Trade Dollar Pattern

1834 **1873 Trade Dollar, Judd-1281, Pollock-1423, R.4, PR64 NGC.**

**Design.** J.A. Bailly designed the obverse with a bust of Liberty facing left, her hair coiled at the back of her head. The date is below with 13 stars around. The reverse has an eagle with wings displayed, holding three arrows and supporting a shield. A ribbon inscribed IN GOD WE TRUST crosses the shield. 420 GRAINS, 900 FINE and TRADE DOLLAR are below the eagle, with UNITED STATES OF AMERICA and E PLURIBUS UNUM above. Struck in silver with a reeded edge.

**Commentary.** Another plentiful pattern variety with at least 100 examples known, and also part of the six-piece sets that the Mint sold in 1873. The six-piece sets were reportedly sold for $30, a substantial sum in those days. **NGC Census:** 8 in PR64, 11 finer. **PCGS Population:** 10 in PR64, 2 finer (12/08).

**Physical Description.** This gorgeous Trade dollar pattern has a brilliant obverse with a frame of peripheral gold toning. The reverse is mostly champagne toned with deeper gold at the borders. Both sides have light cameo contrast, although insufficient for the Cameo designation.

**Provenance.** *Ex: House of Stuart, Ltd.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#61566)

## Impressive 1873 Judd-1283 Trade Dollar PR65 Red and Brown Cameo

1835 **1873 Trade Dollar, Judd-1283, Pollock-1425, R.7, PR65 Red and Brown Cameo NGC.**

**Design.** J.A. Bailly designed the obverse with a bust of Liberty facing left, her hair coiled at the back of her head. The date is below with 13 stars around. The reverse has an eagle with wings displayed, holding three arrows and supporting a shield. A ribbon inscribed IN GOD WE TRUST crosses the shield. 420 GRAINS, 900 FINE and TRADE DOLLAR are below the eagle, with UNITED STATES OF AMERICA and E PLURIBUS UNUM above. Struck in copper with a reeded edge.

**Commentary.** Because it was not part of the six-piece Trade dollar sets that the Mint sold in 1873, Judd-1283 is substantially rarer than some other patterns of this series. It is believe that about 10 examples still exist.

**Physical Description.** An amazing Gem Cameo proof with considerable orange mint color that has only started to fade to medium brown, with traces of steel toning on the high points. The devices on both sides are boldly defined. Faint hairlines are evident in the fields. The only Cameo certified at NGC, although two PR66 Red and Brown pieces are numerically finer (11/08). PCGS has certified only two PR64 Red and Brown pieces.

**Provenance.** *Unknown.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#71568)

## Pleasing 1873 Trade Dollar Pattern Judd-1293, PR65

1836 **1873 Trade Dollar, Judd-1293, Pollock-1435, R.4, PR65 NGC.**

**Design.** The central figure of the obverse die is a seated Liberty facing left. Liberty holds a pole with Liberty cap, and is surrounded by a globe, cotton bales, a plow, and a sheaf of wheat. There is an arc of 13 stars at the border, with the date below. The reverse features an eagle standing on a rock, clutching three arrows and supporting a shield with his left talon. A ribbon across the shield carries the motto IN GOD WE TRUST. A banner in the eagle's beak is inscribed E PLURIBUS UNUM. Below the eagle are the specifications 420 GRAINS and 900 FINE. The peripheral inscriptions are UNITED STATES OF AMERICA and TRADE DOLLAR. Struck in silver with a reeded edge.

**Commentary.** The present coin is a particularly attractive example of this popular issue, one that is considerably more available than most pattern issues.

**Physical Description.** Iridescent lilac, green, and gold toning highlights the surfaces. A strong strike imparts fine detail to all design elements. Some handling marks in the fields are consistent with the grade. **NGC Census:** 5 in PR65, 2 finer as PR65 Cameo. **PCGS Population:** 2 in PR65, none finer (12/08).

**Provenance.** *Unknown.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#61578)

## Enticing 1873 Trade Dollar Pattern Judd-1310, PR64

1837 **1873 Trade Dollar, Judd-1310, Pollock-1453, R.4, PR64 NGC.**

**Design.** The obverse centers around a seated figure of Liberty facing left, with 13 stars around and the date below. Liberty wears an Indian headdress and holds a Liberty pole, with cap. Her left hand rests on a globe with LIBERTY inscribed and there are two flags behind. The reverse features a small eagle clutching three arrows and an olive branch. Below the eagle are the specifications 420 GRAINS and 900 FINE. Above the eagle is a banner inscribed E PLURIBUS UNUM and below is another banner reading IN GOD WE TRUST. The peripheral inscriptions are UNITED STATES OF AMERICA and TRADE DOLLAR. Struck in silver with a reeded edge.

**Commentary.** The obverse is a copy of Longacre's Indian Princess design, used on pattern silver dollars of 1870-1872.

**Physical Description.** Every detail of Longacre's beautiful design is strongly delineated. The largely untoned surfaces show just a hint of golden at the periphery. A few scattered handling marks are consistent with the grade. **NGC Census:** 7 in PR64, 6 finer. **PCGS Population:** 11 in PR64, 2 finer (12/08).

**Provenance.** *Ex: Stack's private treaty transaction.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#61596)

## Lovely 1873 Indian Princess Trade Dollar
## Judd-1312, PR65 Brown

1838 **1873 Trade Dollar, Judd-1312, Pollock-1455, Low R.7, PR65 Brown NGC.**

**Design.** A Trade dollar design struck in the year of its regular issue debut that shows Liberty seated on the obverse wearing an Indian headdress, Liberty pole and cap in her right hand, left hand resting on a globe, and conjoined flags behind. The reverse has a small eagle in the upper half with the weight and fineness below and the statutory legends on scrolls both above and below. Struck in copper with a reeded edge.

**Commentary.** Examples of this pattern design in silver were marketed as part of six-piece pattern Trade dollar sets in 1873. However, there was no such market for the copper examples, and today only about 10 pieces are known.

**Physical Description.** An impressive Gem proof with mildly reflective fields and lustrous devices beneath olive-brown and iridescent patina. Both sides have boldly defined design elements. Exceptional aesthetic appeal will delight the connoisseur. **NGC Census:** two in 65 Red and Brown, one in 65 Brown (this piece) (11/08). **PCGS Population:** one PR60 Red and Brown, one PR64 Red. Five pieces total.

**Provenance.** *Ex: Stack's private treaty (12/1987).*
*From The Lemus Collection, Queller Family Collection Part Two.* (#61598)

## Appealing 1873 Trade Dollar Pattern
## Intriguing Design by Bailly
## Judd-1315, PR63

1839 **1873 Trade Dollar, Judd-1315, Pollock-1458, R.4, PR63 NGC.**

**Design.** The central figure of the obverse is a seated Liberty facing left, with 13 stars around and the date below. Liberty rests her left hand on a globe inscribed LIBERTY and holds a Liberty pole with cap in her right. Liberty is surrounded by two bales of cotton, a wheat sheaf, and a tobacco plant. The reverse features a small, defiant eagle standing on a shield. The eagle clutches three arrows and an olive branch. Below the shield is a scroll with the motto IN GOD WE TRUST. In the field below the scroll are the specifications 420 GRAINS and 900 FINE. The motto E PLURIBUS UNUM is in the field above the eagle. The peripheral inscriptions are UNITED STATES OF AMERICA and TRADE DOLLAR. Struck in silver with a reeded edge.

**Commentary.** This intricate design is attributed to J.A. Bailly. Judd-1315 is another issue distributed by the Mint as part of six-piece pattern sets. USPatterns.com reports the price for these sets was $30, a substantial sum in 1873.

**Physical Description.** The present coin is fully struck, with intricate detail on all design elements. Iridescent lilac and green-gold toning enhance the reflective fields. What appears to be a struck-through grease mark on the reverse accounts for the grade. Overall, pleasing eye appeal and a fascinating design. **NGC Census:** 8 in PR63, 20 finer. **PCGS Population:** 10 in PR63, 14 finer (12/08).

**Provenance.** *Ex: Stack's private treaty transaction.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#61601)

## Impressive 1873 Trade Dollar Pattern Judd-1322, PR64 Cameo

1840 **1873 Trade Dollar, Judd-1322, Pollock-1465, R.4, PR64 Cameo NGC.**

**Design.** The obverse is similar to the adopted design for the Trade dollar except the base extends farther to the right. The reverse features a small eagle with wings extended, clutching three arrows and an olive branch. The eagle's beak holds a banner inscribed with the legend E PLURIBUS UNUM. Below the eagle are the specifications 420 GRAINS and 900 FINE. The peripheral inscriptions are UNITED STATES OF AMERICA and TRADE DOLLAR. Struck in silver with a reeded edge.

**Commentary.** Chief Engraver William Barber wanted to avoid using the Bailly design, with globe and Liberty pole devices, on the Trade dollar. In a letter to Mint Director Linderman, Barber wrote, "... the whole attitude and emblems would be charged with being a plagiarism on the old English copper penney of George III of which it is almost a copy." Barber won this battle.

**Physical Description.** An impressive strike imparts crisp detail to all design elements. The reflective surfaces are mostly untoned, except for a hint of golden at the periphery. Handling marks are minimal for the grade. All in all, a most attractive specimen of this elusive pattern. **NGC Census:** 1 in PR64 Cameo, 8 finer. **PCGS Population:** 8 in PR64, 4 finer, no Cameos in any grade (12/08).

**Provenance.** *Ex: Stack's private treaty transaction.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#61608)

## Bailly's Obverse 1874 Twenty Cent Pattern Finest Certified Judd-1354, PR65 Cameo

1841 **1874 Twenty Cents, Judd-1354, Pollock-1498, Low R.7, PR65 Cameo NGC.**

**Design.** The central figure of the obverse is a seated Liberty facing left, with Liberty pole and globe. The globe is inscribed LIBERTY. The figure is surrounded by two bales of cotton, a tobacco plant, and a sheaf of wheat. An arc of 13 stars surrounds the figure above, with the date below. The reverse die is similar to the design adopted for regular issue coinage except for minor differences in leaf position, and the second arrowhead points above the T in TWENTY. Struck in silver with a plain edge.

**Commentary.** The obverse of this design is essentially the same as the one attributed to French-born sculptor J.A. Bailly, and used on pattern Trade dollars of 1873. The reverse is similar to Barber's eagle on the Trade dollar. Mint Director Linderman specifically requested these designs, with a view to making the coin easily distinguishable from the Seated Liberty quarter. USPatterns.com estimates a surviving population of about two dozen pieces. This specimen is tied with three others for finest certified at both leading grading services (11/08).

**Physical Description.** All design elements show needle-sharp definition. The well-preserved fields are enhanced by delicate shades of golden toning at the margins. Overall excellent eye appeal. **NGC Census:** 1 in PR65 Cameo, none numerically finer regardless of designation. **PCGS Population:** 1 in PR65, none finer, no Cameos in any grade (12/08).

**Provenance.** *Ex: Randolph S. Rothschild Collection (Stack's, 10/2003), lot 1057.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#61658)

## Magnificent 1874 Twenty Cent Pattern Tied for Finest Certified Judd-1355, PR65 Brown

1842 **1874 Twenty Cents, Judd-1355, Pollock-1499, Low R.6, PR65 Brown NGC.**

**Design.** The central figure of the obverse is a seated Liberty facing left, with Liberty pole and globe. The globe is inscribed LIBERTY. The figure is surrounded by two bales of cotton, a tobacco plant, and a sheaf of wheat. An arc of 13 stars surrounds the figure above with the date below. The reverse die is similar to the design adopted for regular issue coinage except for minor differences in leaf position, and the second arrowhead points above the T in TWENTY. Struck in copper with a plain edge.

**Commentary.** The popular design for the obverse is attributed to the French-born sculptor Joseph Alexis Bailly. Mint Director Linderman foresaw difficulties with the twenty cent piece because of its close resemblance to the quarter. He specifically requested a pattern of this design to help differentiate between the two coins. In the end, the Seated Liberty obverse was adopted, and Linderman's concerns proved valid. The new denomination was extremely unpopular, and was abandoned after only four years. USPatterns.com estimates about one dozen examples are extant.

**Physical Description.** Mint red color lingers in protected areas near the devices, while the fields are highlighted with attractive crimson and lilac toning. All details of the intricate design are clearly delineated. NGC has certified two pieces at the PR65 Brown level, while PCGS has yet to grade a coin this high (11/08).

**Provenance.** *Unknown.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#61659)

## Extremely Rare 1874 Quarter Pattern Less Than Three Confirmed Judd-1359, PR64 Brown

1843 **1874 Quarter Dollar, Judd-1359, Pollock-1504, R.8, PR64 Brown NGC.**

**Design.** The obverse and reverse dies are from the same designs used on regular-issue coinage in 1874. Struck in copper with a reeded edge.

**Commentary.** Judd-1359 is traditionally listed as a dies trial issue, but USPatterns.com believes the coins were distributed by the Mint as part of complete off-metal sets. An example of such a set in copper was in the collection of King Farouk-Palace Collections of Egypt sale (Sotheby's, 2/1954), lot 1933. The issue is extremely rare today, with fewer than three examples traced.

**Physical Description.** All design elements are sharply delineated, with particularly fine detail on the eagle's feathers. The surfaces are toned a pleasing chocolate-brown. The present example is the finest certified in the Brown category at both NGC and PCGS (11/08).

**Provenance.** *Ex: D.E.A. and U.S. Marshals Services Sale (Heritage, 12/1988), lot 1897.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#61663)

## Attractive 1874 Bickford Ten Dollar Pattern
## Judd-1374, PR62 Brown

1844 **1874 Bickford Ten Dollar, Judd-1374, Pollock-1519, Low R.6, PR62 Brown NGC.**

**Design.** The obverse depicts a bust of Liberty facing left with the legend UNITED STATES OF AMERICA above and the date below. Liberty wears a diadem inscribed with the word LIBERTY and ornamented with six stars. The weight 16.72 GRAMS, the standard of the metal 900 FINE, and the word UBIQUE are centered on the reverse. Around the periphery is the U.S. denomination DOLLARS 10 and the following international equivalents: STERLING £2.1.1; MARKEN 41.99; KRONEN 37.31; GULDEN 20.73; and FRANCS 51.81. Struck in copper with a reeded edge.

**Commentary.** Dana Bickford envisioned an international coin that could be used by travelers to avoid the expense and inconvenience of monetary exchange in different countries. The world was not ready for this idea in 1874, but the euro has successfully met many of the same goals today. The coins were struck on large-diameter, thin planchets to discourage platinum-filled counterfeits.

**Physical Description.** All design elements are sharply delineated. Lovely crimson and blue toning accents the surfaces. A few spots and handling marks account for the grade. **NGC Census:** 1 in PR62 Brown, 3 finer. **PCGS Population:** None in PR62 Brown, 5 finer (12/08).

**Provenance.** *Ex: Stack's private treaty transaction.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#61678)

# Finest Certified 1874 Bickford Eagle
# Struck in Copper, Plain Edge
# Judd-1375, PR66 Brown

1845 **1874 Bickford Ten Dollar, Judd-1375, Pollock-1520, Low R.7, PR66 Brown NGC.**

**Design.** A fresh-faced, youthful Liberty faces left on the obverse, with her hair tied back and wearing a diadem, ornamented with six stars, reading LIBERTY. UNITED STATES OF AMERICA rings the rim; the date 1874 is below. Liberty has an olive wreath tied around her neck. On the reverse a rope design forms six separate cartouches around the rim. In the center is the Latin word UBIQUE "everywhere," with 16.72 GRAMS 900 FINE in three lines. In the cartouches are the coin's exchange value in various international currencies: DOLLARS 10; STERLING £2.1.1; MARKEN 41.99; KRONEN 37.31; GULDEN 20.73; FRANCS 51.81. Struck in copper with a plain edge.

**Commentary.** Pollock comments that "UBIQUE is an allusion to the objective of the international coinage scheme, signifying that such pieces would be accepted everywhere." Perhaps today such a scheme appears incredibly naïve, but the world is now a smaller place than almost a century and a half ago. We have instantaneous buy/sell spreads on an enormous basket of international currencies traded daily by the billions of dollars, and reportage that is lightning-quick. The various currencies of course varied against each other back then, but they were revalued sporadically, not instantaneously and continually in real time. Barring easy access to the wealth of information that we have today on the interexchangeability of currencies, the Bickford proposals may seem more creative than naïve.

**Physical Description.** Although many of the copper examples have been gilt, this piece has not. Some mint red remains around the devices, but overall the surfaces are generously tinged with blue highlights, while revealing little evidence of contact. A few stray dark flecks fail to dampen the appeal on this, *the finest certified example.* Although USPatterns.com calls these "relatively common" and assigns an R.6 rating, the Judd reference rates them Low R.7. We believe that in this case, the latter is correct. **NGC Census:** one PR62 Brown, one PR65 Brown, PR66 Brown (this piece). **PCGS Population:** one each in VF, PR62 Brown, PR64 Red and Brown, PR65 Brown (10/08).

**Provenance.** *Ex: Stack's (3/1992), lot 1729.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#61679)

## Appealing 1875 'Sailor Head' Judd-1392 Twenty Cent PR65 Cameo

1846 **1875 Sailor Head Twenty Cents, Judd-1392, Pollock-1535, Low R.6, PR65 Cameo NGC.**

**Design.** A coronet inscribed LIBERTY adorns a head of Liberty, her hair tied back with a ribbon. The reverse has a shield with 20 and the word CENTS at the lower border. Arrows, leaves, and a glory of rays embellish the shield, with UNITED STATES OF AMERICA around. Struck in silver with a plain edge.

**Commentary.** Designed by William Barber and nicknamed the Sailor Head design, it is nearly identical to the design of certain 1875 half eagle and eagle patterns.

**Physical Description.** A gorgeous Gem Cameo proof with lustrous silver-gray devices that are surrounded by deeply reflective steel and gunmetal-blue fields. A few tiny flecks include one in the left obverse field a little above and right of star 2. **NGC Census:** 1 in PR65 Cameo, 1 finer as a PR66. Only two of the 10 pieces certified by NGC have been designated as Cameo, this one and a PR64 Cameo. **PCGS Population:** 2 in PR65 without the Cameo designation, none finer (12/08).

**Provenance.** *Lester Merkin (2/1971), lot 853.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#61699)

## Pleasing 1875 Twenty Cent Pattern Unusual Design Error Judd-1399, PR64

1847 **1875 Twenty Cents, Judd-1399, Pollock-1542, Low R.6, PR64 NGC.**

**Design.** The obverse features a seated figure of Liberty by the seashore, with an arc of 13 stars above and the date below. Liberty holds an olive branch in her right hand and rests her left hand on a globe with the word LIBERTY inscribed. A steamship is seen in the distance, and behind Liberty a wheat sheaf and two flags can be seen. The reverse is similar to the design used for regular coinage, except for minor leaf position changes. Struck in silver with a plain edge.

**Commentary.** Q. David Bowers points out a curious error in this design. The smoke from the ship's smokestack is trailing behind the ship, but the sails are billowing forward, indicating the wind is blowing in the opposite direction. USPatterns.com estimates approximately one dozen examples of Judd-1399 are extant.

**Physical Description.** The present coin is sharply struck, with fine detail on the hair and eagle's feathers. Light centers give way to iridescent golden-rose and blue toning, creating fantastic eye appeal. An attractive example of this unusual pattern. **NGC Census:** 2 in PR64, 5 finer. **PCGS Population:** 5 in PR64, 2 finer (12/08).

**Provenance.** *Ex: Auction '87 (RARCOA, 8/1987), lot 1331.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#61706)

## Popular 1875 Twenty Cent Pattern 'Liberty at the Seashore' Judd-1403, PR66

1848 **1875 Twenty Cents, Judd-1403, Pollock-1546, High R.6, PR66 NGC.**

**Design.** The obverse features a seated figure of Liberty by the seashore, with an arc of 13 stars above and the date below. Liberty holds an olive branch in her right hand and rests her left hand on a globe with the word LIBERTY inscribed. A steamship is seen in the distance, and behind Liberty a wheat sheaf and two flags can be seen. The reverse features the denomination 20 CENTS centered inside an olive wreath with the legend UNITED STATES OF AMERICA around. Struck in silver with a plain edge.

**Commentary.** The "Liberty at the Seashore" design was popular with Mint personnel despite the famous error in wind direction. The design was used in combination with three reverses on twenty cent patterns and, in modified form, on Trade dollar patterns as well. USPatterns.com estimates a surviving population of more than one dozen examples. The present example is a virtually unimprovable specimen of this popular design.

**Physical Description.** The strike is extraordinary, with crisp detail on all devices. The centers are a lovely pink-gray, with deep blue toning outside. The overall eye appeal is outstanding. **NGC Census:** 2 in PR66, none finer. **PCGS Population:** The finest graded are two PR64 pieces (12/08).

**Provenance.** *Ex: Public Auction Sale (Stack's, 10/1986), lot 61. From The Lemus Collection, Queller Family Collection Part Two.* (#61710)

## Marvelous 1875 Twenty Cent Pattern 'Liberty at the Seashore' Design Judd-1404, PR65 Brown

1849 **1875 Twenty Cents, Judd-1404, Pollock-1547, High R.6, PR65 Brown NGC.**

**Design.** The obverse features a seated figure of Liberty by the seashore, with an arc of 13 stars above and the date below. Liberty holds an olive branch in her right hand and rests her left hand on a globe with the word LIBERTY inscribed. A steamship is seen in the distance, and behind Liberty a wheat sheaf and two flags can be seen. The reverse features the denomination 20 CENTS centered inside an olive wreath with the legend UNITED STATES OF AMERICA around. Struck in copper with a plain edge.

**Commentary.** Judd-1404 was a popular design with Mint personnel. Mint Director Henry Linderman acquired specimens of this design in silver, copper, and white metal. When Linderman's collection was sold in Scott's 84th Auction Sale (Scott Stamp and Coin, 2/1888), all three examples were sold together as lot 110. The present example is a particularly attractive specimen of this popular pattern.

**Physical Description.** Iridescent lavender and brown toning enhances the well preserved surfaces with noticeable traces of mint red around the devices. The strike is sharp, with all elements of the design fully brought up. Outstanding eye appeal. **NGC Census:** 3 in PR65 Brown, 2 finer including a PR65 Red and Brown. **PCGS Population:** None in PR65 Brown, three in PR65 Red and Brown, 2 numerically finer (12/08).

**Provenance.** *Ex: Stack's private treaty transaction. From The Lemus Collection, Queller Family Collection Part Two.* (#61711)

## Colorful 1875 Twenty Cent Pattern Judd-1407, PR66 Cameo

1850 **1875 Twenty Cents, Judd-1407, Pollock 1550, Low R.6, PR66 Cameo NGC.**

**Design.** The obverse closely resembles Gobrecht's Seated Liberty design adopted for regular-issue coinage, but the date is in smaller letters and LIBERTY is incused. The reverse features the inscription 1/5 OF A DOLLAR centered in a laurel wreath, with the peripheral inscriptions UNITED STATES OF AMERICA above, and TWENTY CENTS below. Struck in silver with a plain edge.

**Commentary.** This issue must have been a favorite of Mint Director Henry Linderman. There were five examples of Judd-1407 in his collection when it was sold by Lyman Low and J.W. Scott in 1888. USPatterns.com estimates a surviving population of more than one dozen examples.

**Physical Description.** The deeply mirrored fields show just the slightest overlay of golden toning on each side. The devices are heavily frosted and present a stark cameo contrast against the illimitable depth of reflectivity in the fields. The finest certified at NGC, although PCGS has certified a PR66 non-Cameo piece (11/08).

**Provenance.** *Unknown.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#61714)

## Impressive 1875 Pattern Twenty Cent Piece Judd-1411, PR64

1851 **1875 Twenty Cents, Judd-1411, Pollock-1554, Low R.7, PR64 NGC.**

**Design.** The obverse is similar to the regular design, although LIBERTY is incused on the shield, much like other Seated Liberty pieces, rather than raised as on the regular issue twenty cent coins. The reverse is also nearly identical to the regular issue, although the leaves in the branch are slightly different, and the stars between the legend and denomination are smaller. Struck in silver with a plain edge.

**Commentary.** The years 1874 and 1875 saw many pattern twenty cent pieces issued in anticipation of a large coinage of that denomination. In the ninth addition of Judd, Dave Bowers writes: "The year 1875 hosts a potpourri of pattern issues, some with true pattern intent (certain of the twenty-cent pieces may be in this category) and others created as numismatic delicacies, the latter including illogical varieties and mulings."

**Physical Description.** An extraordinary proof with excellent contrast beneath a light coat of lovely gold and iridescent toning. The fields are fully and deeply mirrored around the frosty devices. Both sides are pristine and almost entirely free of hairlines or other blemishes. **NGC Census:** 1 in PR64, 2 finer. **PCGS Population:** 3 in PR64, 0 finer (12/08).

**Provenance.** *Unknown.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#61718)

## Wonderful 1875 Pattern
## Twenty Cent, Judd-1412
## PR66 Red and Brown

1852 **1875 Twenty Cents, Judd-1412, Pollock-1555, R.6-7, PR66 Red and Brown NGC.**

**Design.** This variety is nearly identical to the regular issue twenty cent piece. The only differences are incuse letters on the obverse and different positions of leaves and arrows on the reverse. Struck in copper with a plain edge.

**Commentary.** In addition to the seven pieces recorded in Andrew Pollock's reference, there are probably a similar number of additional pieces known. Probably about 14 to 16 examples are known in all. Pattern twenty cent pieces were made in 1874, 1875, and 1876. In 1874 there were six varieties from two different designs, and in 1876 regular issue pieces were coined in copper. The big year for patterns of this denomination was 1875 with seven designs and a total of 24 varieties.

**Physical Description.** Sensational bright orange mint color is just beginning to show the faintest bluish-brown toning on the high points, just sufficient to prevent a full red designation. A small pedigree identifying spot is visible in the left obverse field. **NGC Census:** 1 in PR66 Red and Brown, none finer. **PCGS Population:** 3 in PR65 Red and Brown, none finer (12/08).

**Provenance.** *Unknown.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#71719)

# 1875 Twenty Cent Aluminum Pattern
# Judd-1413, High R.7, PR66 Cameo
# One of the Finest Specimens Extant

1853 **1875 Twenty Cents, Judd-1413, Pollock-1556, High R.7, PR66 Cameo NGC.**

**Design.** The obverse is similar to the regular Seated Liberty twenty cent piece, but the date is smaller and LIBERTY is incuse on the shield, rather than raised. The reverse is also similar to the adopted design, but the end leaves of the olive sprig overlap. USPatterns.com notes other differences: The second arrowhead points well above the T in TWENTY and all three leaves point toward the eagle's wing. On the regular die, the second arrow points to the tip of the T and the bottom leaf points to the T in CENTS. Struck in aluminum with a reeded edge.

**Commentary.** The twenty cent piece was introduced as an ill-conceived sop to the increasingly powerful Western silver-mining interests, as a way to increase domestic usage and circulation of silver. Andrew Pollock comments that the reverse "appears to be the identical reverse die used to strike the varieties (Judd-1354 through 1356, Pollock-1498 through 1500) of 1874." Fewer than a half dozen examples are known, including at least one piece in a museum collection that is presumably permanently off the market.

**Physical Description.** Brilliant mercury surfaces on both sides are free of all distractions other than a couple of lint marks, as struck, and some minor hairlines. There are no other planchet problems, and the coin offers excellent brilliance and eye appeal. **NGC Census:** two PR63, one each PR65 Cameo and PR66 Cameo. **PCGS Population:** one PR63 (11/08).

**Census and Provenance.** Fewer than a half dozen pieces are known, including:

1-2. Two pieces that were in the Heinig sale (Stack's, 10/1978), lot 305, weighing 17 grains and 14.2 grains.
3. Crouch (Superior, 6/1977), lot 387; FUN (per Pollock, 1/1984), lot 4382.
4. J.C. Mitchelson (1913); Connecticut State Library.
5. King Farouk; Palace Collections of Egypt (Sotheby's, 2/1954), lot 1950.

## Extremely Rare 1875 Copper Quarter Dollar, Judd-1416 PR65 Red and Brown

1854 **1875 Quarter Dollar, Judd-1416, Pollock-1559, R.7, PR65 Red and Brown NGC.**

**Design.** Made from the regular dies for the 1875 quarter dollar, and struck in copper with a reeded edge.

**Commentary.** In addition to an extensive series of twenty cent piece patterns and the Sailor Head gold patterns, a complete run of regular issue off-metal coins were produced in copper and aluminum. All of those trial pieces are extremely rare, in every instance either High R.7 or R.8. Fewer than three pieces in copper and less than three in aluminum are confirmed for the quarter dollar trials, according to USPatterns.com. In 1994 Andrew Pollock recorded five examples in his reference, with the possibility of duplication.

**Physical Description.** A single small spot near star 1 is the only significant blemish on this wonderful Gem. Both sides have fully brilliant mint red color with a few tiny pepper specks and hints of gold and iridescent toning. **NGC Census:** Two pieces total, both graded PR65, this one in Red and Brown and another in Red. **PCGS Population:** A single coin graded PR64 Red (12/08).

**Provenance.** *Ex: Bowers and Merena (9/1984), lot 382; 1985 ANA (Heritage, 8/1985), lot 3346; Superior (1/1986), lot 2113.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#81723)

## Important 1875 Copper Half Dollar, Judd-1418 PR64 Red Cameo

1855 **1875 Half Dollar, Judd-1418, Pollock-1561, R.7, PR64 Red Cameo NGC.**

**Design.** Struck from the regular dies for the 1875 half dollar. Struck in copper with a reeded edge.

**Commentary.** The complete set of off-metal pieces from the regular coinage series for 1875 includes 14 coins from the cent to the double eagle in copper, and 14 more in aluminum. They are all extremely rare, and any attempt to form a complete set would probably take a lifetime. David Queller collected pattern coins for 40 years, and only obtained five of the 28 possible pieces.

**Physical Description.** An amazing, fully brilliant red proof that just misses the Gem grade level, although we are not certain why. The surfaces are deeply mirrored with frosty and boldly detailed devices. A few faint specks in the right obverse field are the only blemishes. **NGC Census:** NGC has certified only two examples — this PR64 Red Cameo, and a PR65 Red Cameo. **PCGS Population:** Two coins total, one grading PR64 Red and one grading PR65 Red (12/08).

**Provenance.** *Ex: Lester Merkin (2/1971), lot 910.*

# Wonderful Premium Gem Proof 1875 Commercial Dollar
# Judd-1423, Five Known

1856 **1875 Commercial Dollar, Judd-1423, Pollock-1566, High R.7, PR66 NGC.**

**Design.** A seated figure of Liberty faces left at the seashore, with 13 stars ringing the rim and the date 1875 below. She holds an olive branch and rests her left hand on a globe reading LIBERTY. Two flags and a sheaf of wheat flank her. A steamship with sails appears in the water, with sails billowing in one direction and steam blowing in the opposite direction. A scroll above the date reads IN GOD WE TRUST. On the reverse an olive wreath contains COMMERCIAL / (ornamental cornucopias) / DOLLAR / (ornaments) / 420 GRS / 900 FINE / (ornament), with UNITED STATES OF AMERICA at the rim. On the bow tying the wreath a second reference to the Deity appears, this time the outdated GOD OUR TRUST. Struck in silver with a reeded edge.

**Commentary.** A numismatic delicacy produced at a time when the Commercial dollar, forerunner of the Trade dollar, was already obsolete. The reverse die was first used with an 1871-dated obverse by Longacre, the Indian Princess design, on the Judd-1154/1155 and Judd-1158/1159 Commercial dollar patterns.

The impossible physics depicted on the design is a well-known numismatic blooper, one that is a repeat of various 1875-dated pattern designs, including the twenty cent (Judd-1396 through 1406) and silver/Trade dollar (Judd-1420 through 1429). USPatterns.com comments that supposedly only six pieces were struck; five of them are listed in Pollock.

**Physical Description.** Wonderful accents of ice-blue and pastel heather-gold grace both sides of this stunning Premium Gem, a well-struck and thoroughly delightful representation of this popular Liberty at the Seashore design. **NGC Census:** one in PR63, two in PR65, one in PR66 (this piece). **PCGS Population:** two in PR62 (11/08).

**Census and Provenance.** Saul Teichman reports his belief that five pieces currently exist, out of six supposedly struck according to Adams-Woodin.
*Ex: Stack's (5/1998), lot 546.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#61730)

# 1875 Commercial Dollar, Judd-1424
# PR64 Red and Brown, Only Six Known

1857 **1875 Commercial Dollar, Judd-1424, Pollock-1567, High R.7, PR64 Red and Brown NGC.**

**Design.** A seated figure of Liberty faces left at the seashore, with 13 stars ringing the rim and the date 1875 below. She holds an olive branch and rests her left hand on a globe reading LIBERTY. Two flags and a sheaf of wheat flank her. A steamship with sails appears in the water, with sails billowing in one direction and steam blowing in the opposite direction. A scroll above the date reads IN GOD WE TRUST. On the reverse an olive wreath contains COMMERCIAL / (ornamental cornucopias) / DOLLAR / (ornaments) / 420 GRS / 900 FINE / (ornament), with UNITED STATES OF AMERICA at the rim. On the bow tying the wreath a second reference to the Deity appears, this time the outdated GOD OUR TRUST. Struck in copper with a reeded edge.

**Commentary.** The Judd ninth edition lists the silver specimens of the same design (Judd-1423) as High R.7 and the copper examples as Low R.7, but Saul Teichman of USPatterns.com has documented only six surviving examples in the census below, from among the eight copper pieces reported struck by Adams and Woodin.

**Physical Description.** Wisps of pale violet and orange complement the considerable dollops of mint red that cling to the surfaces on each side. This well-struck specimen is free of mentionable distractions, with appeal suggestive of an even finer grade. **NGC Census:** one each in PR64 Red and Brown (this piece), PR65 Red and Brown, PR66 Red, PR67 Red and Brown. **PCGS Population:** one each in PR64 Red and Brown, PR65 Red and Brown, PR65 Red (11/08). Seven pieces total, less duplicates as always.

**Census and Provenance.** Only eight pieces are recorded as struck, according to Adams and Woodin, with six documented here as expanded from USPatterns.com.

1. Auction '87 (RARCOA, 7/1987), lot 1332; David M. Silberman, Jr. Collection (Bowers and Merena, 11/1988), lot 5414. **The present specimen.**
2. J.C. Mitchelson (1913); Connecticut State Library.
3. Gaston DiBello (Stack's, 5/1970), lot 473; Armand Champa; Rogers M. Fred, Jr. (Bowers and Merena, 11/1995), lot 2335; American Numismatic Rarities (11/2003). PR65 Red PCGS.
4. Brinton T. Schorer; private treaty sale to Harry W. Bass, Jr. (5/3/1973); Bass Collection (Bowers and Merena, 5/1999), lot 1323, which brought $6,325. PR64 Red PCGS.
5. Burke-Clemente Collections (Bowers & Merena ,5/1994), lot 1000. PR65 uncertified.
6. William Mitkoff; private treaty sale to David Faraday (9/23/1972) for $700; ANA (Heritage, 7/1994), lot 6149, which brought $10,120. PR65 Red and Brown uncertified.

*From The Lemus Collection, Queller Family Collection Part Two.*
(#71731)

# 1875 Trade Dollar Pattern, Judd-1426, PR66
# Struck in Silver, High R.7

1858 **1875 Trade Dollar, Judd-1426, Pollock-1569, High R.7, PR66 NGC.**

**Design.** A seated figure of Liberty faces left at the seashore, with 13 stars ringing the rim and the date 1875 below. She holds an olive branch and rests her left hand on a globe reading LIBERTY. Two flags and a sheaf of wheat flank her. A steamship with sails appears in the water, with sails billowing in one direction and steam blowing in the opposite direction. A scroll above the date reads IN GOD WE TRUST. The reverse is that of the as-issued Trade dollar, Type One, produced from 1873 through 1876, with berry below the eagle's claw. Struck in silver with a reeded edge.

**Commentary.** The various pattern Trade dollars and the Commercial dollars, their immediate predecessors in both design and spirit, form a wonderfully fertile area for collectors of the regular issues who wish to break new ground in their numismatic pursuits. Produced from 1871 through 1876, the Trade and Commercial dollar patterns feature a wide variety of designs, metals, and die pairings. While all are extremely rare, examples can be found with diligence and patience.

Concerning the present issue, USPatterns.com posits that "at least" five specimens are confirmed to exist. The Pollock reference provides a different provenance for a Lemus Collection piece that we cannot confirm.

**Physical Description.** Shades of gold and olive, amber and rose abound on this lovely Premium Gem, with lots of eye appeal and a bold strike equally evident. **NGC Census:** two PR66 (including this piece). **PCGS Population:** none (11/08).

**Census and Provenance.** Saul Teichman has traced five examples of this pattern variety. The Pollock reference records a different Lemus Collection specimen, but we believe our consignor may have sold that piece and acquired the one here.
*Ex: Stack's (11/2001), lot 632.*
*From The Lemus Collection, Queller Family Collection Part Two.*
(#61733)

1859 **1875 Trade Dollar, Judd-1427, Pollock-1570, High R.7, PR63 Red NGC.**

**Design.** The familiar Liberty by the Seashore obverse is here paired with the reverse of the Type One Trade dollar (1873-76), with berry below the eagle's claw. Struck in copper with a reeded edge.

**Commentary.** Another copper issue that is apparently about on a par in terms of rarity with its silver counterpart. Chief Engraver William Barber would have been in his late 60s when he executed this obverse design, with what Judd variously terms "impossible physics" and "egregious gaffe"—the sails billow in one direction while the smoke from the steamship stack blows in the opposite direction.

Ironically, William Barber died unexpectedly fours year later—after catching a chill at the seashore. The Pollock reference notes that the Lemus Collection piece weighs 350.2 grains, with 1.492-in. diameter and 180-degree die alignment.

**Physical Description.** Bright mint red is present, along with a bold strike. A few minuscule flecks appear in the obverse field, apparently precluding a finer grade but still not overly distracting. **NGC Census:** one each in PR63 Red (this piece), PR64 Red, PR65 Red and Brown, PR67 Star Red and Brown. **PCGS Population:** one PR65 Red and Brown (11/08). Five certified pieces in total.

**Census and Provenance.** Saul Teichman of USPatterns.com has traced only six or seven examples:

1. Lester Bernstein Collection (Stack's, 4/1986), lot 1172. **The present specimen.**
2. J.C. Mitchelson (1913); Connecticut State Library. Gem proof.
3. King Farouk; Palace Collections of Egypt (Sotheby's, 2/1954), lot 1947; Paxman Collection (Bowers and Ruddy, 11/1974), lot 1043. Proof.
4. Great '80 (Hughes, 7/1980), lot 135, PR65; D.A. Holt.
5. King Farouk; Palace Collections of Egypt (Sotheby's, 2/1954), lot 1947; Dr. Vickery, ANA (Paramount, 8/1972), lot 1009, proof; Wyoming Collection.
6. Heritage (6/1987); East Coast Pattern Dollar Collection (American Numismatic Rarities, 9/2003), lot 99. PR64 Red NGC.
7. An example offered in our Long Beach Signature Sale (Heritage, 5/2003, lot 6442) went unsold. It may duplicate one of the above, else it is a new specimen. PR67 Red and Brown NGC.

*From The Lemus Collection, Queller Family Collection Part Two.* (#81734)

## 1875 Sailor Head Half Eagle
## Judd-1439, PR64 Brown

1860 **1875 Sailor Head Five Dollar, Judd-1439, Pollock-1582, Low R.7, PR64 Brown NGC.**

**Design.** Another example of the Barber Sailor Head motif, here with 13 stars at the rim. The reverse features an eagle like the one that debuted on the 1875 twenty cent pieces for regular issue. FIVE DOLLARS is at the lower rim, with UNITED STATES OF AMERICA above and IN GOD WE TRUST on a ribbon below the eagle. Struck in copper with a reeded edge.

**Commentary.** Another probable fantasy piece like the similar eagle pattern, as there was no recorded interest in changing the circulating gold denominations of the era. This was distributed in sets along with the Sailor Head ten dollar, Judd-1444, Pollock-1588.

**Physical Description.** The fields are brightly reflective, and each side shows rich tones of brown and blue, with faint underlying hints of red still visible as well. **NGC Census:** NGC has certified nine examples of the issue, four of which are gilt, with the rest ranging from PR64 Brown (this piece) through PR67 Red and Brown. **PCGS Population:** None in PR64 regardless of designation, 3 finer (12/08).

**Provenance.** *Ex: Stack's private treaty (1/1981).*
*From The Lemus Collection, Queller Family Collection Part Two.* (#61746)

## Elusive 1875 Half Eagle Pattern
## Judd-1441, Gilt Copper, PR63

1861 **1875 Five Dollar, Judd-1441, Pollock-1585, High R.7, PR63 Gilt NGC.**

**Design.** The Judd-1441 pattern is produced from the regular half eagle dies for the year, but struck in copper, some gilt (as here), with a reeded edge.

**Commentary.** Also known in aluminum (Judd-1442). The half eagle patterns of this year are likely merely off-metal numismatic delicacies struck for sale to collectors, as there was no recorded interest in changing the Liberty Head gold denominations of the era, and certainly copper or aluminum patterns, even if gilt, would not have satisfied the needs of commerce. However, the large-denomination patterns of 1875 are doubly in-demand, partly due to the fact that all regular-issue 1875 gold coins of the United States, save for the double eagle, are great rarities in their own right.

**Physical Description.** The smooth golden surfaces are evenly gilded and show no distractions, save for some tiny contact marks that are completely unbothersome. A bit of a "railroad rim" shows on this piece on each side, from a strike that is slightly off-center toward 1:30 on the obverse. This attractive piece nonetheless appears conservatively graded. **NGC Census:** one each PR64, PR63 gilt (this piece), PR64 Red and Brown, PR64 Red, PR66 Star Red and Brown. **PCGS Population:** one PR64 Red and Brown (11/08).

**Provenance.** *Ex: Lee and Peter L. Shaffer Collections (Superior, 9/1988), lot 5154.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#61749)

# Gem Red and Brown 1875 Sailor Head Ten Dollar in Copper, Judd-1444

1862 **1875 Sailor Head Ten Dollar, Judd-1444, Pollock-1588, R.6, PR65 Red and Brown NGC.**

**Design.** Another example of the Barber Sailor Head motif, here with 13 stars at the rim. The reverse features an eagle like the one that debuted on the 1875 twenty cent pieces for regular issue. TEN DOLLARS is at the lower rim (not FIVE DOLLARS, as stated in the Judd ninth edition), with UNITED STATES OF AMERICA above and IN GOD WE TRUST on a ribbon below the eagle. Struck in copper with a reeded edge.

**Commentary.** From the Pollock reference: "Don Taxay cites the Haseltine sale of March 1876 where it is reported that only five examples were struck. The number of auction appearances of the variety, however, suggests that the actual population is considerably larger. Mark Van Winkle reports that these pieces were distributed by the Mint in sets together with examples of [Judd-1439, Pollock-1582]." More recently, USPatterns.com opines that "over a dozen" pieces are known, several of them gilded.

**Physical Description.** This appealing Gem offers considerable field-device contrast, with blue devices highlighted against the orange and brick-red fields. There are few signs of contact or other distractions. **NGC Census:** eight pieces ranging from PR61 gilt to PR67 Brown Cameo. The present example is one of two certified PR65 Red and Brown. **PCGS Population:** six pieces ranging from PR62 Red and Brown to PR65 Red and Brown (11/08), including one PR63 gilt example.

**Provenance.** *Ex: Auction '89 (Stack's, 7/1989), lot 1866. From The Lemus Collection, Queller Family Collection Part Two.* (#71752)

# 1875 Eagle, Gilt Aluminum, Judd-1447
# R.8, PR65, Two or Three Known

1863 **1875 Ten Dollar, Judd-1447, Pollock-1592, R.8, PR65 Gilt NGC.**

**Design.** Both obverse and reverse are from the regular gold eagle dies of 1875, but this piece is struck in aluminum, gilt, with a reeded edge.

**Commentary.** This pattern is doubly rare. Not only is the pattern issue itself rated R.8, with only two or three pieces known, but the eagle on which it is based, and all the other regular-issue gold coins of 1875 with the sole exception of the double eagle, are noted rarities with exceedingly low mintages. Mintages of the copper and silver circulating issues for the year ranged from sufficient to enormous—but the gold coinages are another story altogether.

Of the six gold denominations current in 1875 from the gold dollar through double eagle, one was a proof-only issue of 20 coins, the Indian Princess three dollar gold. Four other gold issues—the gold dollar, quarter eagle, half eagle, and eagle—saw mintages that added up to 1,100 business strikes *in toto*, plus a sprinkling of 20 proof coins per denomination. In the case of the 1875 business-strike eagle, only 100 business strikes plus 20 proofs were produced. The 1875 eagle is the most legendary and valuable issue in the entire run from 1838 to 1907. Only the business-strike 1875 Liberty Head twenties saw plentiful mintages at three different mints—and again the proof emission was just 20 coins.

Since the regular-issue gold coins of 1875 are so rare, most examples of the Judd-1447 (aluminum) and the Judd-1446 (copper) have been gilded. Pollock comments that this example weighs 41.0 grains, with 180-degree die alignment.

**Physical Description.** The gilting evenly covers both sides of this splendid Gem, which shows precious few marks that might serve as pedigree identifiers. The strike is full on both sides, and even though this piece is struck in aluminum, there are none of the air bubbles or other planchet defects that frequently plague early aluminum pattern coinage. **NGC Census:** one PR65 gilt (this piece), one PR66 ★ Ultra Cameo nongilt (11/08). **PCGS Population:** none.

**Census and Provenance.** Only two or possibly three pieces are known.

1. Robison Collection of U.S. Gold Coins (Stack's, 2/1979), lot 722. **The present specimen.**
2. Gilhousen (Superior, 2/1973), lot 1062; Rio Rancho (Superior, 10/1974), lot 469.

**Other Appearances.** While these are likely duplications of the pieces above, we cannot conclusively establish a pedigree chain.

A. King Farouk; Palace Collections of Egypt (Sotheby's, 2/1954), lot 1937.

B. Paramount *Special Price List* No. 3 (1966), p. 3.

*From The Lemus Collection, Queller Family Collection Part Two.* (#61756)

# Gorgeous 1875 Liberty Twenty in Copper
# Judd-1448, High R.7, PR66 Brown
# Finest Certified by Three Points

1864 **1875 Twenty Dollar, Judd-1448, Pollock-1593, High R.7, PR66 Brown NGC.**

**Design.** The regular issue dies of the 1875 Type Two Liberty double eagle. The obverse and reverse dies are both the same as those used for the regular issue proofs. Struck in copper with a plain edge.

**Commentary.** The standard pattern references describe Judd-1448 and Judd-1449 as regular dies "trial pieces." More likely, they were purposely made with the intention of marketing directly to the numismatic community in the late 19th century.

Examples are known in copper (Judd-1448) with about four or five known, in brass (Judd-1448A) and described as unique, and in aluminum (Judd-1449) with just two or three known, according to USPatterns.com. That means that less than 10 examples are known in all different metals, and some of those have been gilt in an attempt to pass them as the more valuable regular issue proof double eagles. The unique example described as brass was last seen in the 1954 Sotheby's sale of the King Farouk Collection, and it is most likely an example in copper that has been cleaned or unusually toned.

The present piece is only the second example that we have handled. Previously, we offered a PCGS PR63 Brown example in our February 2002 Long Beach sale.

**Physical Description.** This boldly defined Premium Gem proof has exceptional cameo contrast, despite the lack of such a designation from NGC. The surfaces display deep sea-green patina with traces of rose and iridescent toning. Fully mirrored fields are exceptionally deep with highly lustrous devices. As further testament to its extreme rarity and marvelous quality, this is the only specimen in *any* grade certified at NGC, and PCGS has graded only the single PR63 Brown example mentioned above (11/08).

**Provenance.** *Ex: Heritage (6/1987), lot 4599.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#61757)

## Likely Unique 1876 Sailor Head Dollar
## Struck in Copper, Plain Edge, Judd-1458
## PR66 Red and Brown, Only Certified Example

1865 **1876 Sailor Head Dollar, Judd-1458, Pollock-1608, Likely Unique, PR66 Red and Brown NGC.**

**Design.** On the obverse a head of Liberty faces left in a plain (starless) field, with only the date 1876 below. She wears a coronet inscribed LIBERTY in raised letters, and her hair is tied back with a ribbon. On the reverse a thick central laurel wreath frames ONE / DOLLAR, with the country reference above and Latin motto below. Struck in copper with a plain edge.

**Commentary.** The William Barber Liberty Head is more popularly known as the Sailor Head, an appellation that appears more recent than monikers such as Washlady, Shield Earring, and Schoolgirl, all of which seem to date back to the 1891 sale of the Doughty Collection by Harlan P. Smith and David Proskey. Indeed, even in the 1981 ANA Sale conducted by Bowers and Ruddy, the catalogers omit the Sailor Head nickname from all of the 1875-1877 pattern issues of similar design. In any case, the Sailor Head design is a theme and variations that carries over from 1875 through 1877 through various denominations and metals, some of the pieces clearly "with pattern intent" and some of them almost certainly numismatic delicacies, to borrow the old term. The Judd reference points to Mint Director Henry R. Linderman as the source for many of the latter, clearly a man not averse to lining his own pockets.

Among the Sailor Head designs with pattern intent are the 1875 twenty cent pieces where the theme first appeared (Judd-1392 through Judd-1395). In contrast, the eagle patterns with a similar obverse (Judd-1443 through 1445) seem to be more fantasy pieces, as there was clearly no intent to change the long-running and successful Liberty Head motif on the ten dollar or other gold denominations. The 1875 Sailor Head ten dollar reverses, however, feature the perched eagle design that would end up on the regular-issue twenty cent piece and Trade dollars of 1875, while the twenty cent pieces mentioned above have an unusual reverse, with 20 incused in large numbers into a shield.

The Sailor Head motif would reappear in 1876 on the silver dollar patterns (Judd-1457 through 1466), struck in various metals and with minor design differences of other kinds. The pattern dollars of 1876 are an important specialty within pattern collecting. No silver dollars were produced for domestic circulation within the United States, of course, from 1873 until 1878, and the Centennial date makes the 1876 pattern dollars doubly important. All are extremely rare.

With regards to the present Judd-1458 1876 Sailor Head struck in copper, plain edge, USPatterns.com lists the present coin as **unique,** providing the provenance expanded below. The Bowers and Ruddy cataloging in the Sieck sale that claimed there were four pieces known was clearly referring to the reeded edge Judd-1458A, of which perhaps a half-dozen pieces exist. Similarly, the Judd-1458, Pollock-1608 specimen listed in Pollock from the Harry W. Bass, Jr. Research Foundation is in reality a Judd-1458a, Pollock-1607, clearly described in the Bass Collection Sale (Bowers and Merena, 5/1999, lot 1266) as "Copper. *Reeded edge.*" As further evidence, the present coin is the only certified Judd-1458 at either NGC or PCGS, while there are eight examples of the Judd-1458A at both services combined.

**Physical Description.** The resemblances to the color plate in the Sieck catalog are unsurprising and unmistakable, with generous amounts of mint red complementing tinges of blue that is most prominent along the lower obverse rim, to the left of the date. A couple of tiny flecks at the rear neck and the rear bust truncation provide even more conclusive plate-matching. Generous luster cascades from both sides, with a well-delivered strike and essentially no distractions of any sort. **NGC Census:** one PR66 Red and Brown (this piece). **PCGS Population:** none, as expected (11/08).

**Provenance.** *Ex: Fairfield (Bowers and Ruddy, 11/1977), lot 63, considerably miscataloged but a plate match; William R. "Rudy" Sieck Collection (Bowers and Ruddy, 7/1981), lot 277.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#71778)

# Spectacular 1876 Silver Dollar Pattern
# Barber's 'Sailor Head' Design
# Judd-1460, PR65 Red Cameo

1866 **1876 Sailor Head Dollar, Judd-1460, Pollock-1610, R.7, PR65 Red Cameo NGC.**

**Design.** The obverse centers about a small head of Liberty facing left, wearing a coronet, with the date below and the motto IN GOD WE TRUST between the date and the bust. The coronet is inscribed LIBERTY and the hair is tied in a bow. The reverse features an olive wreath surrounding the denomination ONE DOLLAR. The legend UNITED STATES OF AMERICA is at the border above and E PLURIBUS UNUM below. Struck in copper with a reeded edge.

**Commentary.** This is Barber's famous "Sailor Head" design, first used in 1875. The pattern dollar designs of 1876 were an attempt by the Mint to be proactive, as the silver faction in Congress was attempting to pass legislation reinstating the old standard silver dollar. Silver specimens of this design (Judd-1459) were struck on August 1, 1876, along with samples of two other designs (Judd-1457 and Judd-1462). Superintendent Pollock forwarded samples of all three patterns to Mint Director Linderman, writing, "Sir: I herewith send three impressions of the pattern dies prepared by Mr. Barber, for the proposed silver dollar. They were completed and handed to me this morning." The Mint's commendable foresight in preparing for the silver dollar coinage proved unnecessary in this case, as the Bland-Allison Act did not pass until 1878. One wonders what became of these three patterns after Linderman received them. No examples were included in the catalog of his collection prepared by Lyman Low in 1887. It was most uncharacteristic of Linderman to let such prizes escape his grasp.

In the Olsen Sale (Mehl, 11/1944), lot 52, B. Max Mehl stated only five specimens of Judd-1460 were coined. This corresponds well with the USPatterns.com estimate of approximately a half dozen survivors today. The present coin has been unavailable to collectors since 1986, and no example of Judd-1460 has appeared at auction in the last eight years. Clearly, the present offering is an important opportunity for the astute pattern specialist.

**Physical Description.** Sharply struck, with all design elements fully realized. Mint-red reflective fields contrast sharply with the elegant devices to produce the coveted cameo effect. A few scattered handling marks are consistent with the grade. This example is the finest certified in the Red Cameo designation at both leading grading services (11/08).

# Unique 1876 Sailor Head Copper Dollar
# Plain Edge, Judd-1466, PR65 Brown

1867 **1876 Sailor Head Dollar, Judd-1466, Pollock-1617, Unique, PR65 Brown NGC.**

**Design.** Barber's Liberty Head is sometimes called the Sailor Head design in a field of 13 stars arranged with seven left and six right. The date is below the bust with IN GOD WE TRUST at the top border. LIBERTY appears on a coronet in Liberty's hair with beads or pearls along the top edge. The reverse has ONE DOLLAR within a wreath with UNITED STATES OF AMERICA at the top border and E PLURIBUS UNUM at the bottom border. Struck in copper with a plain edge.

**Commentary.** The ninth edition of the Judd reference lists this plain edge pattern as **unique.** In addition to the Queller coin, Andrew Pollock lists an appearance in Sotheby's February 1954 sale of the King Farouk Collection. We believe those two records are for this single specimen. USPatterns.com conclusively lists this example as ex: Farouk and also unique.

For 1876 there are 24 different pattern silver dollar varieties, including all designs, compositions, and types, with a comprehensive total population of less than 100 coins, or about four per variety. A collection of all 24 varieties could take a lifetime to assemble.

**Physical Description.** The impressive proof surfaces of this specimen have attractive golden-brown patina that is accented by violet and blue toning. Both sides have excellent design details and few blemishes, if any. Traces of original mint red are evident in the protected areas on the reverse. A check of the certified populations also confirms this PR65 Brown piece as the only one certified at NGC and PCGS (11/08).

**Provenance.** *Ex: King Farouk; Palace Collections of Egypt (Sotheby's, 2/1954); later, Stack's private treaty.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#61788)

# 1876 Twenty Dollar in Copper, Judd-1493 High R.7, PR66 Red and Brown Relative of the Unique Transitional Issue in Gold, Judd-1488

1868 **1876 Twenty Dollar, Judd-1493, Pollock-1646, High R.7, PR66 Red and Brown NGC.**

**Design.** Both the obverse and reverse are of the regular Liberty Head double eagle dated 1876. Importantly, the coronet tip nearly touches star 7, and the reverse reads TWENTY D. Struck in copper with a reeded edge.

**Commentary.** This is similar to the Judd-1489 double eagle pattern, but the coronet tip is much closer to star 7 than to star 6, as on the regular-issue dies of 1876. In 1877 the regular-issue die shows the point of the coronet midway between stars 6 and 7, the same die that was used for the gold (Judd-1488) and copper (Judd-1489). The Judd reference also lists the counterpart of the Judd-1493 in aluminum as Judd-1494, but those are unconfirmed, as noted in all the standard print and online references. USPatterns.com notes that less than six pieces of the Judd-1493 are known in all grades—and that figure includes two pieces that were misattributed in the Harry W. Bass, Jr. Research Foundation as Judd-1489.

In 1877 the double eagle hub modifications resulted in Liberty Head that appears to gaze rather more forward than upward as previously, and not only is the forward tip of the coronet positioned differently, but also the top of the "bun" of hair at the back of her head is adjacent to star 10, whereas previously it nestled in-between stars 10 and 11. There are many other minor differences on both sides that may be discovered through careful study. These patterns are also important because of their close association with the unique transitional double eagle pattern in gold, Judd-1488. That piece, according to USPatterns.com, "first came to light in the June 1909 *Numismatist* when J. Haseltine sold the piece to William Woodin. It is unclear whether the piece was originally owned by Idler or Snowden. Later owners include Newcomer and Farouk. It has not been seen since."

**Physical Description.** The surfaces are virtually pristine, with stunning highlights in shades of orange, purple, blue, and yellow over both sides. The strike is generally bold, despite trivial softness noted on the high-point hair beneath the coronet. **NGC Census:** one PR63 gilt, one PR66 Red and Brown (this piece), one PR67 Brown. **PCGS Population:** two PR66 Brown (11/08).

**Provenance.** *Ex: ANA (New England Rare Coin Auctions, 7/1979), lot 1350.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#61815)

Rare, Beautiful 1877 Sailor
Head Half Dollar
Judd-1502, PR66 Brown

# Rare, Beautiful 1877 Sailor Head Half Dollar
# Judd-1502, PR66 Brown

1869 **1877 Sailor Head Half Dollar, Judd-1502, Pollock-1655, Low R.7, PR66 Brown NGC.**

**Design.** The central figure of the obverse is a head of Liberty facing left. Liberty wears a coronet inscribed LIBERTY, and her hair is tied with a ribbon. The bust is surrounded by 13 stars, arranged seven to the left and six to the right. IN GOD WE TRUST is at the border above and the date below. The reverse features a heraldic eagle clutching an olive branch and a group of eight arrows. The peripheral inscriptions are UNITED STATES OF AMERICA above and HALF DOLLAR below. E PLURIBUS UNUM is inscribed in the field above the eagle's head. Struck in copper with a reeded edge.

**Commentary.** This issue was extremely rare in the 19th century, and a diligent search of the great pattern collections of that era has unearthed only two examples. The first appearance of this pattern we have been able to trace is in the Linderman Collection (Lyman Low, 6/1887), lot 56, where it appeared as part of an 11-piece cased set of patterns. This sale was suppressed by the U.S. government, with many coins being confiscated. The wonderful pattern set was offered again a year later in J.W. Scott's 84th Sale (Scott Stamp & Coin Company, 2/1888), lot 56. The Doughty Collection (New York Coin & Stamp, 4/1891) contained a specimen of this rare variety, which is now impounded in the Durham Western Heritage Museum (this coin may possibly be the Linderman example, in a later appearance). The next auction appearance of Judd-1502 we have encountered is in the Public Auction of Rare Pattern Coins (Edgar Adams, 2/1911), lot 156. Adams organized that sale to help his benefactor, William Woodin, dispose of many duplicate pattern coins he had acquired in his famous deal to return two half union gold patterns to the Mint Cabinet. Woodin reportedly received "several crates" of patterns in exchange for the two fifty dollar gold coins, including many pieces unknown to collectors before the event. In the catalog, Adams discusses the half dollar patterns of 1877 and reveals some interesting information about Judd-1502: "At least one of the above never has been listed, No. 156. It was not known to Dr. Davis, the pattern expert, and was not mentioned in the catalogue of the Maris sale, when something like seventeen 1877 pattern half dollars were sold." Apparently, Adams was not aware of the Linderman and Doughty listings. Considering Adams' comments and noting the small number of auction appearances for Judd-1502 before this sale, it seems reasonable to conclude this issue was virtually unknown to collectors of the 19th century, and most of the half dozen or so examples we know today must have come from William Woodin's pattern hoard. Woodin consigned another example of Judd-1502 to the 1914 ANS Exhibition.

Today, USPatterns.com can account for seven specimens of Judd-1502 (see the website for detailed census information). The present coin is virtually unimprovable and last appeared at auction in 1970. The present offering is a valuable opportunity to acquire this seldom encountered numismatic prize.

**Physical Description.** Iridescent green and cerulean-blue toning creates spectacular eye appeal, enhancing the virtually flawless surfaces. An extraordinary strike imparts crisp detail to all design elements. The present coin is the finest certified in the Brown category at both NGC and PCGS (11/08).

**Provenance.** *Ex: Gaston DiBello Collection (Stack's, 5/1970), lot 382; Stack's; private treaty transaction. Earlier, possibly the property of William Woodin.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#61837)

# Rarely Encountered 1877 Half Dollar Pattern
# Morgan Obverse Design, Ex: Farouk
# Judd-1503, Pollock-1656, PR63 Cameo

1870 **1877 Morgan Half Dollar, Judd-1503, Pollock-1656, High R.7, PR63 Cameo NGC.**

**Design.** The obverse features Morgan's head of Liberty facing left, wearing a cap with ears of wheat and cotton bolls. Two groups of stars surround the bust, seven to the left and six to the right. E PLURIBUS UNUM is inscribed above the head and the date is below. The intricate reverse design displays an eagle on a shield, clutching an olive branch and three arrows. The shield is tightly surrounded by a laurel wreath and a scroll bearing the motto IN GOD WE TRUST. The peripheral inscriptions are UNITED STATES OF AMERICA above and HALF DOLLAR below. Struck in silver with a reeded edge.

**Commentary.** Andrew Pollock noted there were two varieties of Judd-1503, which he designated Pollock-1656 and Pollock-1664. The present coin is Pollock-1656, characterized by a short leaf beneath the I in PLURIBUS and a long, slender truncation of the bust. Pollock credits Harry Bass with the discovery of the two varieties. USPatterns.com lists a census of just four surviving specimens of Pollock-1656. The discerning pattern specialist will not let this opportunity slip by.

**Physical Description.** Deeply mirrored fields contrast boldly with fully frosted devices to produce a delightful cameo effect. Hints of iridescent blue and gold toning accent the surfaces, creating remarkable eye appeal. A few hairlines in the fields account for the grade. The present specimen is the only coin to receive the highly regarded Cameo designation at either of the leading grading services (11/08).

**Provenance.** *Ex: King Farouk; Palace Collections of Egypt (Sotheby's, 2/1954), lot 1970; June Sale Part II (Stack's, 6/1984), lot 1242; Randolph S. Rothschild Collection (Stack's, 10/2003), lot 1090. From The Lemus Collection, Queller Family Collection Part Two.* (#61838)

# Extremely Rare 1877 Morgan Half Dollar
# Judd-1504, Pollock-1658, PR67

1871 **1877 Morgan Half Dollar, Judd-1504, Pollock-1658, High R.7, PR67 NGC.**

**Design.** The obverse features Morgan's head of Liberty facing left, wearing a cap with ears of wheat and cotton bolls. Two groups of stars surround the bust, seven to the left and six to the right. E PLURIBUS UNUM is inscribed above the head and the date is below. The reverse has an eagle displayed on a shield with three arrows in its left claw and an olive branch in its right claw. A round band frames and passes beneath a shield, lettered IN GOD WE TRUST. Around the shield and band is a laurel wreath, with UNITED STATES OF AMERICA along the outer border, and HALF DOLLAR below. Struck in silver with a reeded edge.

**Commentary and Census.** Pollock describes two different obverse dies, distinguished by the relationship between the leaves and RI. This pattern variety, Pollock-1658, has the leaves and letters separated. The other variety, Pollock-1666, has the leaves and letters, especially R, touching.

According to Saul Teichman at USPatterns.com, there are only four examples of the Pollock-1658 variant known, and just two of the Pollock-1666 version. Extended provenances are available at that website. The Queller specimen is the finest of all six examples of Judd-1504:
—Pollock-1658. **Queller Specimen**. PR67 NGC.
—Pollock-1658. Stack's (10/2000). PR66 NGC.
—Pollock-1658. Bass Specimen. PR64 PCGS.
—Pollock-1658. Farouk Specimen. PR63 NGC.
—Pollock-1666. Garrett Specimen. Proof.
—Pollock-1666. Saul Teichman Collection. VF.

**Physical Description.** An impressive Superb Gem, this pattern has fully and deeply mirrored fields around lustrous devices, and perhaps deserves a Cameo designation. Both sides have gorgeous gold, pale blue, and iridescent toning.

**Provenance.** *Ex: Stack's private treaty.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#61839)

# Pollock Plate 1877 Judd-1510 Half Dollar
# Morgan Design, Silver, PR66

1872 **1877 Morgan Half Dollar, Judd-1510, Pollock-1674, High R.7, PR66 NGC.**

**Design.** The obverse has the basic Morgan Liberty head facing left, with E PLURIBUS UNUM in large letters to the left and right. Below, the date is in small numerals, with two stars left and four right of the date. Above are seven additional stars. Although not identical, the reverse design is similar to the adopted Morgan dollar design of 1878, of course with the denomination expressed as HALF DOLLAR. Struck in silver with a reeded edge.

**Commentary.** There are just five known examples of Judd-1510, according to Saul Teichman at USPatterns.com, and just four of those are collectible—hence the High R.7 rarity rating on the modified Sheldon scale. In addition, the same design was created in copper (Judd-1511), with just four examples known.

**Physical Description.** Both sides of this silver piece have impeccable cameo contrast, although this piece is not designated as such by NGC. The devices are pale blue, with deeper blue toning over the fully mirrored fields. It is an amazing Premium Gem proof with a high degree of aesthetic desirability.

**Census and Provenance.** Expanded provenances of each of the five examples are available at USPatterns.com. Teichman considers the Smithsonian Institution coin to be finest known, followed closely by the Queller specimen:
—Smithsonian Institution. Proof.
—**Queller Specimen.** PR66 NGC.
—Bass Specimen. PR65 PCGS.
—Woodin-Newcomer Specimen. PR64 PCGS.
—Farouk Specimen. Proof, cleaned.

(#61848)

# Extremely Influential 1877 Half Dollar Pattern
# Six Examples Known
# Judd-1512, PR62

1873 **1877 Morgan Half Dollar, Judd-1512, Pollock-1676, High R.7, PR62 NGC.**

**Design.** The obverse features Morgan's head of Liberty facing left inside a beaded circle. There are 13 stars arranged in two arcs outside the circle, six left and seven right. The inscription E PLURIBUS UNUM is above and the date below. On the reverse, a beaded circle encloses a defiant eagle facing left perched on a thick scroll. The scroll carries the inscription IN GOD WE TRUST, with three arrows and an olive branch behind. The legend UNITED STATES OF AMERICA is above and the denomination HALF DOLLAR is below. Struck in silver with a reeded edge.

**Commentary.** Morgan's memorable Liberty head was used , with slight modifications, on 17 different pattern designs in 1877. Of course, it was also adopted for use on the obverse of the Morgan silver dollar, which began production in 1878. The model for Morgan's design was reportedly a Philadelphia school teacher, Miss Anna W. Williams. Williams was always shy about her role as model, and tried to avoid notoriety as the famous "Silver Dollar Girl."

The intricate reverse design was also used again, with minor revisions, on the famous " Schoolgirl" dollar pattern of 1879. The impressive "defiant" eagle was also borrowed by Charles Barber many years later for the reverse of the Panama-Pacific quarter eagle. Andrew Pollock believes the inspiration for this striking motif was a sketch drawn by Titian Peale, circa 1838.

USPatterns.com states only six examples of Judd-1512 are extant (see USPatterns.com for a detailed census of surviving examples). The present coin has been off the market since 1984, and offerings of any example of Judd-1512 are few and far between. We expect intense competition for this influential, historically important pattern.

**Physical Description.** Attractive golden-rose toning accents the well-preserved surfaces. The strike is a little soft on the hair around Liberty's ear, as often seen on this design. Reportedly cleaned in the past, as many of King Farouk's coins were, light hairlines can be seen in the mirrored fields. Overall, a pleasing example of this extremely important issue. **NGC Census:** 1 in PR62, 4 finer. **PCGS Population:** None in PR62, 2 finer (12/08).

**Provenance.** *Ex: King Farouk; Palace Collections of Egypt (Sotheby's, 2/1954), lot 1975; June Sale Part II (Stack's, 6/1984), lot 1245. From The Lemus Collection, Queller Family Collection Part Two.* (#61850)

# Memorable PR66 Brown 1877 Morgan Half Dollar, Judd-1513

1874 **1877 Morgan Half Dollar, Judd-1513, Pollock-1677, Low R.7, PR66 Brown NGC.**

**Design.** The obverse features the George T. Morgan Liberty Head, somewhat as on the Morgan dollar, but inside a beaded circle, with E PLURIBUS UNUM above and the date 1877 below. The reverse features Morgan's "defiant eagle," perched on a scroll inscribed IN GOD WE TRUST. Three arrowheads shoot up from the rear right of the scroll, and an olive branch from the left. UNITED STATES OF AMERICA and HALF DOLLAR are inside a beaded circle. Struck in copper with a reeded edge.

**Commentary.** The 1877 half dollars, in dozens of different designs and metals—44 in all, including the die variety mentioned below—form a popular subset of pattern collecting in and of themselves, and the Morgan Liberty Head designs are foremost in popularity of those. The attractive reverse design, featuring an eagle apparently about to take flight, was later used on the 1879 Schoolgirl dollar. It was also modified slightly for the 1915-S Panama-Pacific International Expo commemorative gold quarter eagle, a rush job by Charles Barber that fortunately started with this excellent design.

While there were certainly others—Farouk, Sieck, Morris Evans—one of the most memorable offerings of 1877 half dollar patterns in recent years was the incredible Bowers and Merena auction in May 1999 of the Harry W. Bass, Jr. Collection. Of the 44 possible half dollar combinations of 1877, Bass had managed to acquire 30 different examples, several of them unique or nearly so, and in one case a unique die variety that *Bass himself discovered* (Judd-1540, Pollock-1711, lot 1241 in the Bowers and Merena catalog).

**Physical Description.** The medium-brown surfaces show highlights with blue dominant in the center, but significant tinges of mint red grace the peripheries. There is considerable cameo contrast, and little evidence of contact on either side. A marvelous specimen that would enhance the finest collection of U.S. coins. This piece is numerically tied with one single PR66 Red and Brown each at NGC and PCGS (10/08).

**Provenance.** *Ex: Stack's (12/1987), lot 1026.*
*From The Lemus Collection, Queller Family Collection Part Two.*
(#61851)

# 1877 Morgan Half Dollar in Silver, Judd-1514
# PR67 ★ Cameo, Finest at NGC

1875 **1877 Morgan Half Dollar, Judd-1514, Pollock-1678, Low R.7, PR67 ★ Cameo NGC.**

**Design.** The obverse is similar to the Morgan dollar, but the head of Liberty is surrounded by a beaded circle, with 13 stars and E PLURIBUS UNUM around the edge. The date 1877 is below. On the reverse a so-called "defiant eagle" is perched on a scroll inscribed IN GOD WE TRUST. An olive branch points left, and three arrowheads point right. Struck in silver with a reeded edge.

**Commentary.** Despite the popular terminology, the defiant eagle, while it may have its wings spread, is rather dyspeptic in appearance. The pose seems staid and monumental rather than lifelike, and the unnaturally heavy wings appear to be Oriental fans. This bird would never have flown. George T. Morgan seems to have had a peculiarly difficult time engraving our national bird, and none of his attempts are more than qualified successes.

Numismatic art critic Cornelius Vermeule comments concerning the reverse of the Morgan dollar in his recently released second edition of *Numismatic Art in America:*

"It can also be noted from the snatches of correspondence quoted above that George T. Morgan was unsatisfied with the tradition of Peter, the then-stuffed eagle at the Philadelphia Mint. The 'studies in nature' that he would seem to have procured for the eagle, however, must have had little effect on his oeuvre, for the bird on the reverse of the 1878 silver dollar is much more removed from reality than the creatures on some of the patterns for trade dollars in 1873. Some details, to be sure, like the broad tail, betray ornithological research, but in total substance the eagle with wings spread is as heraldic as his early 19th-century counterparts with the shields on their stomachs. Clearly, Morgan's dollar was a refreshing step away from the standard Gobrecht-styled seated Liberty with 'sandwich-board' eagle, but the decisive moment of revolution in American numismatic art had not yet arrived."

**Physical Description.** The coin is virtually flawless; the only interruptions in the surfaces are a few tiny lint marks that were struck into the piece at the time of minting. The centers are brilliant and surrounded by a ring of golden-brown toning at the margins. The fields are deeply mirrored, and the devices present stark cameo contrast on both obverse and reverse. In PR67 ★ Cameo, this piece is the single finest certified at NGC. The finest at PCGS is a PR64 example (11/08).

**Census and Provenance.** Per USPatterns.com, only seven examples are known. See that reference for a detailed census, from which this provenance is also expanded.
*Ex: Maj. Lenox Lohr; R.E. Cox Jr., private treaty transaction (1959), $250; Cox Collection (Stack's, 4/1962), lot 2266; Champa Collection (American Auction Association, 5/1972), lot 1063; Stack's private treaty transaction (2/1978).*

# Extraordinary 1877 Morgan Half Dollar Pattern
# Finest Certified Brown Example
# Judd-1517, PR66 Brown

1876 **1877 Morgan Half Dollar, Judd-1517, Pollock-1681, Low R.7, PR66 Brown NGC.**

**Design.** The obverse features Morgan's head of Liberty facing left inside a beaded circle. There are 13 stars arranged in two arcs outside the circle, six left and seven right. The inscription E PLURIBUS UNUM is above and the date below. The central figure of the reverse die is an eagle with spread wings inside a beaded circle. The eagle's wing feathers are larger than on other varieties. The eagle is standing on a scroll inscribed IN GOD WE TRUST, with an olive branch and three arrows behind. The legend UNITED STATES OF AMERICA is above and the denomination HALF DOLLAR is below. Struck in copper with a reeded edge.

**Commentary.** Morgan's Liberty head design is well known to all collectors as the device used for the obverse of regular-issue silver dollars, beginning in 1878. R.W. Julian has shown this design was actually the first of four designs prepared by Morgan in 1877. The model for Liberty was Miss Anna Williams of Philadelphia. The reverse design is similar to the motif used on Judd-1514, but the feathers in the eagle's wings are larger and fewer in number.

An early auction appearance of Judd-1517 was in the Maris Collection (H.P. Smith, 6/1886), lot 198. Maris was an avid collector of patterns, and his collection included examples of 20 different 1877 half dollar patterns. Many of these coins were purchased by T. Harrison Garrett at the sale.

USPatterns.com indicates eight specimens of Judd-1517 are extant (please see the website for detailed census information). The present coin is a virtually unimprovable specimen and last appeared at auction 37 years ago. Advanced collectors should bid accordingly.

**Physical Description.** The strike shows only minimal softness on Liberty's hair, as usually seen on this issue. Lovely, iridescent toning enhances the undisturbed surfaces in shades of crimson, green, and gold. This specimen exudes spectacular eye appeal. The present coin is the finest certified in the Brown designation at both NGC and PCGS (11/08).

**Provenance.** *Ex: 1971 ANA (Stack's, 8/1971), lot 475.*
*From The Lemus Collection, Queller Family Collection Part Two.*
(#61855)

# Seldom-Encountered 1877 Half Dollar Pattern
# Morgan's Classic Design, Judd-1521
# PR63 Red and Brown

1877 **1877 Morgan Half Dollar, Judd-1521, Pollock-1685, R.7, PR63 Red and Brown PCGS.**

**Design.** The obverse features Morgan's head of Liberty facing left, wearing a cap with ears of wheat and cotton bolls. Two groups of stars surround the bust, seven to the left and six to the right. E PLURIBUS UNUM is inscribed above the head and the date is below. The intricate reverse design displays an eagle on a shield, clutching an olive branch and three arrows. The shield is tightly surrounded by a laurel wreath and a band bearing the motto IN GOD WE TRUST. The peripheral inscriptions are UNITED STATES OF AMERICA above and HALF DOLLAR below. Struck in copper with a reeded edge.

**Commentary.** The obverse design is George Morgan's famous Liberty head concept, adopted for use on the silver dollar in 1878. The model for the obverse is thought to be Anna Williams, of Philadelphia. USPatterns.com believes three or four examples of Judd-1521 are extant today. The present offering is a rare opportunity to secure this desirable issue.

**Physical Description.** Attractive orange-red patina covers the mirrored fields, while the central devices are accented with tones of blue and crimson. Reportedly cleaned long ago, the surfaces have retoned nicely. A rare and desirable prize for the advanced collector. **PCGS Population:** Two coins total, this piece and one in PR66 Red and Brown. **NGC Census:** Two pieces total, each of which is graded PR66 Red and Brown (12/08).

**Provenance.** *Ex: King Farouk; Palace Collections of Egypt (Sotheby's, 2/1954), lot 1976; 188th Auction Sale (Bolender, 3/ 1955), lot 1480; River Oaks (Bowers and Ruddy, 11/1976), lot 983; Arnold and Romisa Collection (Bowers and Merena, 9/1984), lot 390; Fred/ Ward Collection (Bowers and Merena, 11/1995), lot 2279; Pre-Long Beach (Superior, 2/2005); Drew St. John (American Numismatic Rarities, 6/2005), lot 418; (Bowers and Merena, 8/2005); Pre-Long Beach (Goldberg, 2/2006); June Sale (Stack's, 6/2006).*
*From The Lemus Collection, Queller Family Collection Part Two.* (#71859)

# Popular 1877 Judd-1524, Pollock-1690
# Half Dollar Pattern, PR64

1878 **1877 Half Dollar, Judd-1524, Pollock-1690, Low R.7, PR64 NGC.**

**Design.** The obverse has a head of Liberty with six stars to the left, seven to the right, and the date below. Liberty wears a wide banded cap with the word LIBERTY, her hair tied back with a ribbon. The cap is garnished by wheat and cotton. The reverse has an eagle on a shield inside a band that carries the dual mottoes IN GOD WE TRUST and E PLURIBUS UNUM. Around is the legend UNITED STATES OF AMERICA with the denomination HALF DOLLAR below. Struck in silver with a reeded edge.

**Commentary.** Among 1877 pattern half dollars, this variety is more plentiful than most, with eight different examples currently known, according to Saul Teichman's notes, including one example of Pollock-1692 with the second 7 in the date closer to the border, from a different obverse die. On this Pollock-1690 obverse the second 7 is distant from the denticles.

**Physical Description.** This Choice proof is a lovely example with delicate champagne toning over brilliant silver surfaces. The fields are fully mirrored, although little contrast is evident between the fields and the devices. **NGC Census:** 3 in PR64, none finer. **PCGS Population:** 1 in PR64, none finer (12/08).

**Census and Provenance.** Apparently eight pieces survive:

1. DiBello Collection (Stack's, 5/1970), lot 389; Harry W. Bass, Jr. (Bowers and Merena, 5/1999), lot 1226; Superior (7/1999 FPL). **The present specimen.**
2. Pollock-1692. Dr. Edward Maris; Garrett Collection (Bowers and Ruddy, 11/1979), lot 388; Harry W. Bass, Jr. (Bowers and Merena, 5/1999), lot 1228. PR64 PCGS.
3. Lester Merkin (6/1970), lot 647; Armand Champa (Bowers and Ruddy, 5/1972), lot 1069; Robert L. Hughes (1/1979); Robert L. Hughes (1/1980). Choice Proof.
4. Robert L. Hughes (7/1980), lot 104; Steve Ivy (12/1980), lot 1853. Choice Proof.
5. Edward Cogan (1883); Garrett Collection duplicate; Superior (2/1977); Morris Evans (Bowers and Merena, 8/1998), lot 2086. Choice Proof.
6. Stack's (9/1994); Superior (7/2003). PR62 NGC, cleaned and retoned.
7. Dr. J. Hewitt Judd; Steve Ivy (12/1976), lot 1170. PR60+.
8. King Farouk (Sotheby's, 2/1954), lot 1979; Stack's (6/1984), lot 1251; Stack's (3/2005). Proof, cleaned and lacquered.

*From The Lemus Collection, Queller Family Collection Part Two.*
(#61864)

# Infrequently Offered 1877 Half Dollar Pattern
# Finest Certified in its Category
# Judd-1525, Pollock-1691, PR67 Brown

1879 **1877 Half Dollar, Judd-1525, Pollock-1691, 1693, Low R.7, PR67 Brown NGC.**

**Design.** The central figure of the obverse is a bust of Liberty facing left. Liberty wears a cap with a wide band, and her hair is confined by a ribbon. The band of the cap is inscribed LIBERTY and is adorned with wheat and cotton. An array of 13 stars surrounds the bust, and the date is below. The reverse features an eagle, displayed on a shield, clutching an olive branch and three arrows. A circular band is visible behind the shield, with the Gothic inscriptions "In God We trust" and "e pluribus unum." The peripheral inscriptions are UNITED STATES OF AMERICA and HALF DOLLAR. Struck in copper with a reeded edge.

**Commentary.** Barber's distinctive obverse design was later used on the Goloid pattern dollars of 1878-1880. There are two varieties of Judd-1525, which Andrew Pollock designated as Pollock-1691 and 1693. The present coin is an example of the former designation, characterized by the second 7 in the date being distant from the dentils. USPatterns.com currently traces eight examples of Pollock-1691 (see the website for detailed census information). The coin offered here is a virtually unimprovable specimen, off the market since 1971. Advanced pattern collectors should be prepared for stiff competition when this lot comes up for bidding.

**Physical Description.** A beautiful array of mint red, crimson, olive, and light blue toning makes this coin a visual treat. All elements of the intricate design are finely detailed and complement the flawless surfaces to produce fantastic eye appeal. The present coin is the finest certified example in the Brown category at both NGC and PCGS (11/08).

**Provenance.** *Ex: Public Auction Sale (Lester Merkin, 9/1967), lot 542; Public Auction Sale (Lester Merkin, 6/1971), lot 887.*

# Extremely Rare 1877 Half Dollar Pattern
# Four Known, Three Available
# Judd-1528, PR65 Cameo

1880 **1877 Half Dollar, Judd-1528, Pollock-1696, High R.7, PR65 Cameo PCGS.**

**Design.** The central device of the obverse die is a helmeted head of Liberty facing left, with the motto IN GOD WE TRUST above and 1877 below. The helmet has a prominent crest, an embossed eagle design, and a visor with LIBERTY inscribed in incuse letters. Thirteen peripheral stars are arranged seven to the left and six to the right. The reverse features a small heraldic eagle, clutching arrows and an olive branch. The legend UNITED STATES OF AMERICA arcs above and the denomination HALF DOLLAR below. E PLURIBUS UNUM is inscribed above the eagle's head. Struck in silver with a reeded edge.

**Commentary.** Barber's intricate obverse design was apparently inspired by a sketch drawn by Christian Gobrecht in the late 1830s, when he was chief engraver at the Mint. Andrew Pollock notes that this drawing of Liberty wearing a Corinthian style helmet with an embossed eagle is illustrated in the article "From the Drawingboard of a Coin-Engraver" by Elvira Clain-Stefanelli.

Judd-1528 is an extremely rare issue, with only four examples known to numismatists today. Of the four specimens known, one is permanently impounded in the Harry W. Bass Jr. Research Foundation. Thus, considered with respect to collector availability, the issue is R.8.

The early history of this issue is largely a mystery. R.C. Davis was not aware of the variety when he wrote his seminal work on patterns in *The Coin Collectors Journal,* and there was no example in his collection when it was sold in 1890. The issue was likewise missing in Maris, Parmelee, and Woodside. Perhaps the first auction appearance of Judd-1528 was in the Linderman Collection (Lyman Low, 6/1887), lot 56. The specimen in that lot was part of an 11-piece cased pattern set Linderman had coined for his own collection (see Judd-1536 to read Low's lot description).

That lot was offered again the following year in J.W. Scott's 84th Sale, because Low's sale was suppressed by the U.S. government at the last minute. It should be noted that Linderman died on January 27, 1879. The presence of this example in his collection establishes a terminal date for the production of Judd-1528. The coins were probably minted in 1877, as dated, and certainly no later than January 1879. The next appearance of Judd-1528 researchers have traced was in the collection of William H. Woodin, Secretary of the Treasury under Franklin Roosevelt. Woodin consigned an example of this issue to the 1914 ANS Exhibition. Except for these few scattered appearances, the early record of this fascinating pattern remains blank.

Opportunities to acquire an example of this extremely rare pattern have not proliferated in modern times, aside from a flurry of appearances in 2003 (see USPatterns.com for a detailed census). The present coin has been off the market for five years, and no other example appeared at auction in that time frame. Clearly, the present offering is an event of great importance and we expect spirited competition to ensue when bidding is opened.

**Physical Description.** An extraordinary strike displays every detail of Barber's complex design. The richly frosted devices complement deeply mirrored fields to produce stunning contrast, worthy of the coveted Cameo designation. Iridescent gold and champagne toning highlight the undisturbed surfaces. The combination of all these aesthetic qualities creates unsurpassed eye appeal. No other example of this fantastic pattern has been certified at the Gem Cameo level by either of the leading grading services (11/08).

**Provenance.** *Ex: King Farouk; Palace Collections of Egypt (Sotheby's, 2/1954), lot 1974; Gaston DiBello (Stack's, 5/1970), lot 392; Byron Johnson (Hughes, 11/1979); K. Goldman; Classics Sale (American Numismatic Rarities, 12/2003), lot 306. From The Lemus Collection, Queller Family Collection Part Two.* (#61868)

The Dr. Maris-Garrett 1877 Barber Pattern Half Dollar
Struck in Silver, Judd-1535, R.8
PR65, Finest of Three Known
Plate Coin in Judd Ninth Edition

1881 **1877 Half Dollar, Judd-1535, Pollock-1703, R.8, PR65 PCGS.**

**Design.** The obverse is the so-called "Barber's Liberty Head with coronet and wheat and cotton." The head of Liberty faces left, IN GOD WE TRUST is above and the date below. Liberty wears a coronet reading LIBERTY in raised letters. The coronet is decorated with wheat ears, cotton bolls and leaves. The stars are seven left, six right. The reverse is "Barber's small heraldic eagle." The eagle has a shield on its breast, clutching arrows and an olive branch. UNITED STATES and HALF DOLLAR are at the rim, with E PLURIBUS UNUM in an inner arc between the wingtips. Struck in silver with a reeded edge.

**Commentary.** Only three specimens are known of this R.8 silver pattern, although at the time of the Garrett sales, the cataloger called this piece "possibly unique." One of the three pieces is permanently sequestered in the Byron Reed Collection in Omaha, and the only other specimen in private hands is graded only PR60 by PCGS. As the finest known of this illustrious pattern variety and with an equally starry pedigree, this piece is a standout, even in the remarkable Lemus Collection of incredible breadth and quality. Dr. Edward Maris, the author of what remains today the standard reference on New Jersey coppers of the Colonial era, is the first documented owner of this piece. Next it went to the incredible Garrett Family-Johns Hopkins Collection, begun by railroad magnate T. Harrison Garrett.

The possibility presented by the present lot, to acquire a pattern of such importance and lineage, probably represents a once-in-a-lifetime opportunity for most collectors and pattern specialists.

**Physical Description.** The silver-gray surfaces cede to moderately intense, iridescent pastel patina in shades of golden and rose on the obverse, with emerald-blue dominant on the reverse. There is considerable cameo contrast despite the bold coloration, although it is unnoted on the PCGS insert. As noted in the ANR catalog a few years ago, the piece is actually an overdate of sorts, with the 1 in the date first punched too far right, giving the appearance of an "1877/1177." Other modern collectors would term it an RPD, for "repunched date."

**Census and Provenance.** Only three pieces are known. The census below is expanded from USPatterns.com:

1. Dr. Edward Maris (Harlan P. Smith, 6/1886); Garrett Collection-Johns Hopkins University; Garrett I (Bowers and Ruddy, 11/1979), lot 391, $24,000; Auction '89 (Superior), lot 626; D. Novoselsky, PR64 PCGS; Kagin's; Superior (7/2003); Classics Sale (American Numismatic Rarities, 12/2003), lot 307, PR65 PCGS, $35,650. **The present specimen. Plate coin in the Judd ninth edition.**
2. Francis W. Doughty; Byron Reed Collection; Durham Western Heritage Museum, Omaha. PR65 ICG.
3. Superior (6/1981); Auction '82; Harry W. Bass, Jr. Collection (Bowers and Merena, 5/1999), lot 1236; southern collection; Simpson Collection. PR60 PCGS.

*From The Lemus Collection, Queller Family Collection Part Two.* (#61876)

## Elusive, Historically Important 1877 Half Dollar Pattern Struck in Copper, Two Known in Collectors' Hands Judd-1536, PR63 Brown

1882 **1877 Half Dollar, Judd-1536, Pollock-1704, High R.7, PR63 Brown NGC.**

**Design.** The obverse features a bust of Liberty facing left, wearing a coronet with wheat ears and cotton bolls. The coronet has the word LIBERTY inscribed in raised letters. The motto IN GOD WE TRUST is spelled out above Liberty's head, with stars on either side and the date below. The reverse is centered around a heraldic eagle, clutching an olive branch and three arrows. The motto E PLURIBUS UNUM is located above the eagle's head. The legend UNITED STATES OF AMERICA surrounds the eagle, with the denomination HALF DOLLAR below. Struck in copper with a reeded edge.

**Commentary.** There are only four examples of Judd-1536 known to numismatists today. When and why the coins were minted has never been satisfactorily determined. The pedigree records for these coins are blank before circa 1950, except for a single citation in the Doughty Collection (New York Coin & Stamp, 4/1891). That specimen was soon impounded in the Omaha City Library, courtesy of Byron Reed. The early history of the three coins still in collectors' hands has remained a numismatic mystery for more than a century.

The key to the puzzle of Judd-1536 may be found in a convoluted lot description in The Linderman Collection of United States Coins and Pattern Pieces (Lyman Low, 6/1887), lot 56. The lot contains two examples of Judd-1536, as part of an 11-piece cased pattern set. It seems likely that the two patterns contained in this set correspond to two of the three specimens in collectors' hands today, but conclusive proof is not available. It is possible that some coins were struck circa 1877 that are no longer extant, so a one-to-one correspondence between the Linderman coins and the examples known today may not be valid. It is a tidy scenario, even a likely possibility, but not 100% certain. In any case, this lot constitutes the first auction appearance of two specimens of Judd-1536.

One could wish that Low had retained the services of a good copy editor, as his description is nearly impenetrable. It is no wonder the information was overlooked until the present time. To his credit, Low tried to identify the patterns in this sale by the numbers in R.C. Davis' pattern listing, then recently published in *The Coin Collector's Journal*. The attempt at scholarship backfired in this case, as four of the specimens in the lot were unknown to Davis. A careful reading of Low's citation enables the reader to identify two examples of Judd-1536. Note: D. 402 corresponds to Judd-1535, the same dies as Judd-1536, but struck in silver. Davis was aware of the silver strikings, but the copper patterns were unknown to him.

> "Lot 56 1877 Set. 10C., 25C. (D. No. 391, 392), 50c., $1.00 (D. 409). Profile Liberty l. with jewelled coronet, hair tied with ribbons, two ends of which depend; stars surround; IN GOD WE TRUST above (except on 10C.). ***R*** of Dime and Quar. Dol. regular issue. Half Dol. with National Arms, motto above (like D. 402). Dol. wreath of corn, cotton and wheat encloses 1 Dollar; motto below; 2 specimens to show both sides. Dollars with same rev. but obv. profiles l. with plain and jewelled coronets, hair bound with additional fillet, end droops at back in broad loop, portion of hair extends below neck; two dies slightly differing. Half Dolls., profile l. jewelled coronet with wheat and cotton decorations (D. 402). ***R*** National Arms like first mentioned (2 specimens to show both sides). Also one with helmeted head l. ***R*** Eagle standing on ground, motto incused on base (D. 405). Another; muled dies of obv. D. 405 with rev. D. 402; four not in D. Copper; mounted on raised discs, satin and velvet lined case. 11pcs."

The purpose of the Judd-1536 patterns becomes abundantly clear. They were produced as numismatic delicacies, primarily for the cabinet of Mint Director Henry Linderman. There was intense competition between Chief Engraver William Barber and his assistant George Morgan in 1878 to produce attractive designs for the soon-to-be-revived silver dollar denomination. Linderman and a few other Mint insiders took advantage of this situation to secure examples of these rare and beautiful coins for their private collections. Linderman died on January 27, 1879, so the date of production for these patterns must closely approximate their inscribed date of 1877. The coins were never intended for public consumption, and most collectors never knew of their existence.

The story of Lyman Low's attempt to sell Linderman's collection is well known to numismatists. The U.S. government claimed the patterns were federal property, stopped the sale, and seized many of the lots without compensation. The financial loss incurred in this fiasco temporarily drove Low out of business. He went to work for J.W. Scott, and became the editor for *The Coin Collector's Journal*. The coins Low retained from Linderman's collection, including the wonderful set of patterns mentioned above, were offered again under the auspices of J.W. Scott on February 28, 1888. This time the government did not interfere, and the coins were dispersed without incident. After their initial appearance, the examples of Judd-1536 were apparently split up, and their individual paths are difficult to trace until fairly recent times (see USPatterns.com for a discussion of recent pedigree data). Saul Teichman notes an example in Frossard's 92nd Sale (Frossard, 5/1889), lot 322, and the Byron Reed coin mentioned above might be a reappearance of a Linderman coin, instead of a separate example. William Woodin appears to have secured at least two examples of Judd-1536 at some point, as he consigned a specimen to the 1914 ANS Exhibition and there is a citation for one example in the Public Auction Sale of Rare Pattern Coins (Edgar Adams, 2/1911), lot 157. The Adams sale consisted primarily of Woodin's duplicates.

Whatever its history, Judd-1536 remains an attractive and elusive issue, with only three specimens available to collectors. The present coin has been off the market for 18 years. The last offering of any example of this pattern was the Harry Bass Collection (Bowers and Merena, 5/1999), lot 1237, nearly a decade ago. Clearly, opportunities to acquire this issue are infrequent, and the importance of this offering cannot be overstated.

**Physical Description.** Iridescent crimson and gold toning highlights the well preserved surfaces. The coin was reportedly cleaned long ago, as were all of King Farouk's copper coins, but the effects are no longer evident. A few scattered contact marks are consistent with the grade. Overall eye appeal is outstanding.

**Provenance.** *Ex: King Farouk; Palace Collections of Egypt (Sotheby's, 2/1954), lot 1977; Detroit Historical Society (Stack's, 3/1980), lot 719; Stack-Teich Sale (Stack's, 1/1990), lot 1429.*
*Possibly earlier in the Linderman Collection (Lyman Low, 6/1887), lot 56.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#61877)

1877 Judd-1539 Copper
Half Dollar, R.8
Likely Only Two
Known, PR65 Red

# 1877 Judd-1539 Copper Half Dollar, R.8
# Likely Only Two Known, PR65 Red

1883 **1877 Half Dollar, Judd-1539, Pollock-1708, R.8, PR65 Red NGC.**

**Design.** A rare and unusual design on both obverse and reverse. The obverse shows a large head of Liberty with a wide band in front of a Liberty cap that has the word LIBERTY incused. The reverse shows a large eagle standing on a tablet inscribed with incuse E PLURIBUS UNUM. The eagle awkwardly supports a large shield, which distinguishes the reverse from Judd-1537 (silver) and Judd-1538 (also copper). Struck in copper with a reeded edge.

**Commentary.** Designed by William Barber, one of the large suite of half dollar patterns that were produced, likely for profit, before the final Morgan dollar design was adopted in 1878. Pattern expert Saul Teichman and we believe that there are only two pieces existing of the Judd-1539. For many years the Judd-1538, lacking the reverse shield on the eagle, was miscataloged as Judd-1539.

Teichman comments that the four Judd-1538 examples were listed as Judd-1539 for many years, including being overlooked in the Adams-Woodin reference. The Judd-1538 was first described in Thomas Elder's 5/1908 sale (lot 521, which went to Virgil Brand) before publication of the Adams-Woodin book (1913), even though Omaha collector Byron Reed had had a Judd-1538 piece since 1891. The first description of the Judd-1538 and 1539 as being *different* was by Wayte Raymond in Morgenthau's 4/1932 Shinkle sale. It appears that both Farouk examples were actually Judd-1538 but were listed in the Sotheby's sale under the Adams-Woodin number for Judd-1539.

Even in a collection full of rarities such as the Lemus Collection, this piece—not only from the famous suite of 1877 half dollars that form a popular pattern collecting specialty, but also in Gem Red condition, and one of only two that likely exist—is a standout opportunity for some forthright bidder. Do not let this marvelous potential acquisition slip away.

**Physical Description.** The present specimen has a needle-sharp strike and seemingly unabraded surfaces. Dusky orange-red and aqua colors are predominant, although the obverse has a few minuscule toning flecks. Some fadeaway toning at the letters on the reverse periphery confirms the remarkable originality of this stunning Gem Red example. **NGC Census:** one PR65 Red (this piece), one PR66 Brown. **PCGS Population:** none.

**Census and Provenance.** Likely only two pieces exist.

1. Anderson Dupont, Part II (Stack's, 11/1954), lot 2480, which realized $100; U.S. Coins and Paper Money (Stack's, 9/1999), lot 1087, which realized $11,500; New Millennium (Heritage, 11/2003), lot 11212, which realized $32,200. **The present specimen.**
2. Dr. J. Hewitt Judd; Numismatic Enterprises (2/1966); Public Auction Sale (Stack's, 3/1980), lot 720; Great '80 Sale (Robert L. Hughes, 7/1980), lot 105; Tangible Assets; Teletrade (3/3/1993); Marin Numismatics; ANA (Heritage, 7/1994), lot 7946, which brought $11,825, PR65 Brown PCGS; bought in by Marin Numismatics; Southern Collection; Simpson Collection. PR66 Brown NGC.

*From The Lemus Collection, Queller Family Collection Part Two.* (#81880)

## Extremely Rare, Desirable 1877 Half Dollar Pattern
## Barber's Design, Finest of Three Known
## Judd-1539A, PR65

1884 **1877 Half Dollar, Judd-1539A, Pollock-1707, R.8, PR65 NGC.**

**Design.** The obverse centers around a bust of Liberty facing left. Liberty wears a Phrygian cap and laurel wreath, with the word LIBERTY inscribed on the cap band. The bust is surrounded by 13 stars arranged seven to the left and six to the right. IN GOD WE TRUST is inscribed above with the date below. The reverse features an eagle standing on a tablet inscribed E PLURIBUS UNUM, and clutching an olive branch and three arrows. The eagle's left talon supports a shield. The legend UNITED STATES OF AMERICA is at the border above, with the denomination HALF DOLLAR below. Struck in silver with a reeded edge.

**Commentary.** The year 1877 saw an unprecedented number of patterns produced at the Mint, most notably the series of beautiful half dollar designs. Noted researcher Saul Teichman believes that the 1877 half dollar patterns should not be viewed as individual, unrelated coins created haphazardly, one-by-one by engravers Barber, Morgan, and Paquet. A deeper understanding of these coins can be attained when they are considered in the context of a coordinated design program, and an artistic struggle between Chief Engraver William Barber and his gifted assistant, George Morgan.

Morgan was new to the Mint in 1877, having been hired as assistant engraver the year before. Mint Director Linderman had imported him all the way from England to augment the artistic talent of the Mint staff. Clearly, Linderman recognized Barber's limitations as an artist and sought to improve the design process by bringing in a man of real ability. Of course, Barber recognized him as a threat and became jealous of his artistic reputation.

In Congress, events were under way that would lead to passage of the Bland-Allison Act and the return of the silver dollar in 1878. In anticipation of the need for new coinage designs, the engravers at the Mint created the celebrated series of half dollar patterns we know today. Competition between the engravers was intense, with each man putting forth his best efforts to produce a winning design. Many experimental motifs were created, with nine different obverse dies used in combination with 12 reverse dies. The various mulings produced beautiful, intricate coins, state-of-the-art for 1878. Teichman notes that Morgan concentrated his efforts on a single theme for his Liberty obverse, while Barber created many different motifs in a search for a design that would please the Mint officials.

No issue is more clearly the result of this competition than is Judd-1539A. The similarities between Barber's concept and Morgan's famous Liberty Head design are too great to be accidental. Perhaps the two designers were tasked specifically to produce a design using the same Phrygian Cap motif—or Barber may have decided to go head-to-head with Morgan and try to outclass him on his home ground. Unfortunately for him, while Judd-1539A is certainly an attractive design, Morgan's classic creation is clearly superior. Morgan's Liberty Head concept was chosen for the silver dollar in 1878, and it is one of the most popular designs of all time.

USPatterns.com can trace only three examples of Judd-1539A today. The present coin is the finest of the three, and has only been offered at auction three times since 1886. The importance of this offering cannot be overstated.

**Physical Description.** The present coin possesses the intangible quality known as eye appeal in abundance. The deeply reflective fields are covered with vivid shades of olive, lilac, and gold. The strike is marvelous, with crisp detail in the hair and star centrils. The intricate beauty of Barber's design is fully realized on this extremely rare pattern. This piece is the finest of the three known examples.

**Provenance.** *Ex: Maris Collection (New York Coin and Stamp, 6/1886), lot 206; T. Harrison Garrett; Garrett Collection (Bowers and Ruddy, 11/1979), lot 392; Randolph S. Rothschild Collection (Stack's, 10/2003), lot 1091.*

# Exquisite and Elusive 1877 Half Dollar Pattern
# Unusual Style by Paquet, High R.7
# Judd-1540, PR65 Cameo

1885 **1877 Half Dollar, Judd-1540, Pollock-1711, High R.7, PR65 Cameo NGC.**

**Design.** The central figure of the obverse die is a rather small bust of Liberty facing left, surrounded by an arc of 13 stars, with the date 1877 below. Liberty is wearing her hair tied in a bun and a ribbon inscribed LIBERTY in incuse lettering. The reverse features a stylized eagle with shield, clutching an olive sprig and three arrows. The eagle holds a scroll inscribed E PLURIBUS UNUM in its beak. The legend UNITED STATES OF AMERICA arcs around the periphery, with the denomination HALF DOL. below. Struck in silver with a reeded edge.

**Commentary.** Anthony Paquet created this unusual design with a cosmopolitan aesthetic quality. The small, delicate bust on the obverse resembles the work of French designers of the late 19th century, while the robust eagle on the reverse is reminiscent of the Prussian style. The dies were ready early in 1877. Roger Burdette and USPatterns.com cite a Mint archives document, dated March 20, 1877: "Anthony Paquet left pair of half dollar dies with Coiner to have them turned down to fit the mint's presses." Unfortunately, the dies broke extremely early in the striking process, as all examples from this die feature a prominent die crack through stars 1 to 5 and extending through the date to stars 12 and 13. It is unusual for a die to fail so rapidly. Perhaps the high relief of the design required several strikes to bring up all the design details. The extra stress of the repeated strikes may have resulted in the early failure of the dies. Another die was prepared, with the date positioned differently, and at least one example is known from this die. It must have been clear to the Mint personnel that the design was impractical for regular-issue coinage.

Judd-1540 is an extremely rare issue. Today, five examples are known from the original cracked die, and one example survives from the perfect replacement die (see USPatterns.com for a detailed pedigree listing). A search of auction records has failed to uncover any auction appearances of Judd-1540 in the last four years. The present offering represents an important opportunity to acquire one of the finest specimens of this elusive pattern.

**Physical Description.** The design was struck in high relief, with a strongly detailed strike. Vibrant, reflective surfaces complement the rich, frosty devices. Some die polish striations in the fields should not be confused with hairlines, as the surfaces are virtually pristine. The delicate beauty of Paquet's elegant design is fully realized on this magnificent specimen. **NGC Census:** 4 pieces total, two of which are PR65 with this the only Cameo, none finer. **PCGS Population:** Two pieces grading PR62 and PR65 respectively (12/08).

**Provenance.** *Ex: Randolph S. Rothschild Collection (Stack's, 10/2003), lot 1092.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#61882)

Condition Census 1877
Copper 'Sailor Head' Dollar
Judd-1542, R.7, PR66
Red and Brown

## Condition Census 1877 Copper 'Sailor Head' Dollar
## Judd-1542, R.7, PR66 Red and Brown

1886 **1877 Sailor Head Dollar, Judd-1542, Pollock-1715, R.7, PR66 Red and Brown PCGS.**

**Design.** On the obverse a head of Liberty faces left, with 13 stars around, IN GOD WE TRUST at top, date below. She wears a coronet inscribed LIBERTY in raised letters, and the hair is tied back with a ribbon. On the reverse a thick central wreath frames 1 / DOLLAR, with the country reference above and Latin motto below. Struck in copper with a reeded edge.

**Commentary.** The Sailor Head dollar is one of many pattern varieties from the year 1877, a year in which Mint experimentation, or production of numismatic delicacies, or both, apparently reach their zenith. It is an attractive presentation in its own right, and the large surface area of the dollar, as here, makes it doubly attractive by allowing the more-intricate details to be fully appreciated.

The Sailor Head obverse, however, made its debut in 1875, on pattern designs for the twenty cent piece, half eagle, and eagle. In 1877 this same obverse was combined with several different reverses, but not in the dollar size. The 1877 Sailor Head quarter in silver with regular reverse of the Seated Liberty quarter (Judd-1499) is a legendary rarity, unique and unconfirmed in modern times, while the copper specimens of the same pairing are rated Low R.7. Copper dimes (Judd-1498) with a similar obverse exist, also Low R.7, while silver specimens are unconfirmed. A somewhat similar, though not identical, design graces the Judd-1501 and 1502 half dollars in silver and copper, R.8 and Low R.7 respectively.

As one of the few Sailor Heads in a silver dollar size available in the numismatic marketplace, this piece is sure to see intense bidding competition in this healthy market for collectibles of all kinds, especially numismatic treasures.

**Physical Description.** Copious quantities of original Mint red accompany strong visual appeal, with highlights of orange and lilac and minimal distractions of any sort. A small comma-like dark spot through the 8 in the date and a second in the obverse field below the W(E) serve as pedigree identifiers, but they fail to dampen the impact of this marvelous Premium Gem. An hourglass-shaped area of bluish patina is noted on the reverse around the 1 in the center. **NGC Census:** one each in PR65 Brown, PR65 Red and Brown, PR67 Red and Brown, PR67 Star Red and Brown. **PCGS Population:** one each in PR66 Brown, PR64 Red and Brown, and PR66 Red and Brown (this piece); three PR65 Red and Brown (11/08). Ten certified examples, with likely duplications. USPatterns.com estimates that "at least seven" are known, with one of them in the Connecticut State Library.

**Provenance.** Expanded from USPatterns.com: *Ex: Phillip Warner Sale (Robert L. Hughes, 1/1980), lot 62; Great '80 (Robert L. Hughes, 7/1980), lot 137; Bowers and Ruddy* Rare Coin Review *No. 44, p. 8 (9/1982); Steig (Bowers and Ruddy, 9/1982), lot 1810; Connecticut Historical Society (Bowers and Merena,4/1983), lot 2428; Jascha Heifetz (Superior, 10/1989), lot 3318, PCGS PR65 Red and Brown; Heritage (11/2003), lot 11214, PR66 Red and Brown PCGS.*

# Phenomenal PR65 Gilt Copper Half Union Fifty Dollar Gold Pattern, Judd-1547 Large Head, Perhaps Seven to Nine Known

1887 **1877 Fifty Dollar, Judd-1547, Pollock-1720, Low R.7, PR65 Gilt NGC.**

**Design.** The William Barber Large Liberty Head design. Liberty faces left, with coronet bearing her name, its top border ornamented with beads. Her hair is thick and wavy, and a B in the field just below the truncation (unusually, not on the neck) stands for the Barber. Thirteen stars ring the border, with date 1877 below. The Large Head shows the tip of the coronet *between* stars 5 and 6 while the Small Head has the tip *below* star 6, and the date is considerably closer to the bust truncation on the Large Head. The two lowest curls on Liberty are pointed, rather than rounded as on the Small Head. The reverse is in the same style as the contemporaneous double eagle, but detailed differently, the most obvious being two extra small decorative elements at the rim on each side, between UNITED STATES OF AMERICA and the denomination FIFTY DOLLARS. Struck in copper, gilt, with a reeded edge.

**Commentary.** At Low R.7, the Judd-1547/1549 half union copper patterns and their unique gold cousins (Judd-1546/1548) are the largest denominations in the U.S. pattern series. The denomination was apparently considered only briefly (or not at all, as the large gold coins would have been particularly susceptible to shaving and filing) before being abandoned. According to the *Bass Museum Sylloge*, "Evidently they were struck by late August 1877, as impressions from the dies were sent to [Mint Director Henry] H.R. Linderman on August 30 of that year." It is noteworthy that Linderman was an avid coin collector himself; Don Taxay has written that he believed Linderman ordered the coins for his own use.

No discussion of these phenomenal fifty dollar half union pattern coins can be complete without an introduction to William H. Woodin, one of the foremost figures in the history of U.S. pattern collecting, and indeed in U.S. numismatics in general.

**William H. Woodin, Pattern Collector *Par Excellence***

William H. Woodin (1868-1934) is one of the most illustrious names in coin collecting, and his is a name that some members of the noncollecting public will recognize as well: Long after he had achieved notice in numismatic circles—in 1933, although already in ill heath—he served for a few months under President Franklin D. Roosevelt as his first Secretary of the Treasury. In that capacity, Woodin presided over the "Bank Holiday" of 1933, which closed the doors to the nation's banks until examiners could determine their financial status. This action, the forerunner of the Federal Deposit Insurance Corporation, helped restore confidence in the banking system, avoiding an economic catastrophe of worse proportions. More infamously for collectors, Woodin—although an avid coin collector himself—also oversaw the Gold Recall of 1933, when the U.S. government withdrew from the gold standard and outlawed the private ownership of gold by U.S. residents (except by dentists and jewelers). Collectors nonetheless owe Woodin a debt of gratitude, for he ensured that an exemption was in place for "rare or unusual" gold coins.

However, our focus here is on Woodin's earlier activities in the field of pattern collecting. Q. David Bowers has written extensively about Woodin in his useful *Bass Museum Sylloge:*

"Highlights of his involvement include the 1908 purchase from Stephen K. Nagy and John W. Haseltine of a pair of 1877 $50 'half union' patterns that had been quietly deaccessioned from the Mint cabinet A furor ensued, and through Edgar H. Adams and the original sellers, the pieces were traded back to the Mint in return for 'several crates' of long-stored patterns. After selecting one or more of each interesting different variety for his own collection, a second run of varieties was placed with Waldo C. Newcomer of Baltimore for a reported $150,000, and a third run went to H.O. Granberg of Oshkosh, Wisconsin, for $100,000—each of these two transactions being incredible in amount—equaling or exceeding the $100,000 transaction later registered in 1923 for the purchase of the earlier-mentioned James W. Ellsworth Collection with its pair of 1804 dollars and about 2,000 other coins. Still more were sold by his associate, Edgar H. Adams, on February 10, 1911, via the *Catalogue of the Auction Sale of Rare Pattern Coins Comprising many pattern duplicates, in different metals, and of many denominations, belonging to Mr. William H. Woodin of New York City.* Large numbers of duplicate patterns remained and were sold to F.C.C. Boyd.

"In 1913 Woodin wrote *United States Pattern, Trial, and Experimental Pieces,* published by the American Numismatic Society. His friend and numismatic scout Edgar H. Adams provided research information and took the photographs...."

The furor concerning Woodin's possession of the half union patterns in gold arose after Woodin exhibited the pieces at the New York Numismatic Club in 1909. Regardless of the route the pieces took and those involved, they were certainly obtained as a result of complicity and cronyism on the part of various individuals inside and outside the Mint.

The two unique gold half unions are national treasures, now safely back in the National Numismatic Collections of the Smithsonian Institution. But the copper half unions (many of which are gilt) occasionally come onto the market, albeit sporadically, and never fail to inspire the most intense bidding competition whenever they appear. While the Judd pattern reference, ninth edition, lists the pieces as Low R.7 (10-12 pieces known), we suspect but cannot prove that they may be R.7, with seven to nine pieces surviving.

**Physical Description.** A simply spectacular example of what might very well be called *the most impressive pattern coin available today,* with all of the gilding intact over the surfaces on both sides and a bold strike that appears unimpeded by the large surface area. The possible remains of an old fingerprint appear between the date and star 13—any bets as to whose it might be?—but it is mentioned as a pedigree marker only, and is not at all bothersome considering the incredible desirability, aesthetic appeal, and rarity that this phenomenal coin combines in one neat package. **NGC Census:** one PR67 Star Red and Brown, two PR65 gilt including the present piece, two PR63 gilt. **PCGS Population:** one PR63 gilt, one PR62 Red and Brown, one PR62 Brown, one PR50 Brown. A total of nine certified pieces, less possible duplicates (10/08). Two of those are ensconced, presumably permanently, in the Connecticut State Library and the Smithsonian.

**Provenance.** *Ex: Auction '87 (Stack's, 7/1987), lot 850.*

'Collector's Dream' 1877
Copper Half Union, Judd-1549
PR67 Brown, Tied for
Finest Certified

## 'Collector's Dream' 1877 Copper Half Union, Judd-1549
## PR67 Brown, Tied for Finest Certified
## Ex: Marks, Austin, Fairfield, Sieck

1888 **1877 Fifty Dollar, Judd-1549, Pollock-1722, R.7, PR67 Brown NGC.**

**Design.** The William Barber Small Liberty Head design. Liberty faces left, with coronet bearing her name, its top border ornamented with beads. Her hair is thick and wavy, and a B in the field just below the truncation (unusually, not on the neck) stands for the Barber. Thirteen stars ring the border, with date 1877 below. The Small Head shows the tip of the coronet *below* star 6, while the Large Head shows the tip *between* stars 5 and 6, and the date is considerably further away from the bust truncation on the Small Head. The two lowest curls on Liberty are rounded, rather than pointed as on the Large Head. The reverse (same as the Large Head) is also the same as the contemporaneous double eagle, but detailed differently, the most obvious being two small decorative elements at the rim on each side, between UNITED STATES OF AMERICA and the denomination FIFTY DOLLARS. Struck in copper with a reeded edge.

**Commentary.** In the Judd-1547 description we wrote of the "unusual" circumstances, to say the least, that led to William H. Woodin's possession of the two unique gold half unions, now ensconced in the Smithsonian Institution. The pieces were "deaccessioned," to use a fancy euphemism, from the Mint Cabinet.

For the serious researcher into pattern coins, the Pollock and Judd references are each in their own ways indispensable. But USPatterns.com must not be overlooked, another valuable resource. The following is given *verbatim* from that source, except to better identify in brackets [ ], where possible, a couple of the characters in the drama:

> "The circumstances of the return of this and its companion gold piece J1548/P1721 has been shrouded in mystery but correspondence between Woodin's attorney and the mint in the John Ford library have shed some new light on the matter, and, at a minimum, establish that the 2 pieces belonged to Col Snowden.
>
> "One of these letters from Woodin's attorney to U.S. Attorney Henry W. Wise on June 7, 1910 is shown below courtesy of George Kolbe.
>
> 'Col. [Archibald Loudon] Snowden [Philadelphia Mint chief coiner 1866-77 and superintendent 1879-1885], who had originally purchased these coins from the Director of the Mint [presumably Henry R. Linderman, Mint director 1867-69, 1873-78] in Philadelphia by depositing the bullion value and the charge for pattern pieces to save them from being melted down, in the course of negotiations between himself and Dr. [A. Piatt] Andrew, Director of the Mints [November 1909-June 1910], came to an agreement with the latter over all matters in dispute between them, and proposed to Mr. Woodin to repay him the $20,000 he had paid for these pieces, in order that he might carry out his arrangement with Dr. Andrew. Mr. Woodin after numerous visits to Philadelphia and Washington and conference with Dr. Andrew, both there and in this city, decided to accept this offer, returned the 50's to Col. Snowden, and I thereupon notified Mr. Pratt, as did Mr. Woodin, that the incident was closed, and we requested a letter from your office confirming the same. In view of the trouble and expense to which Mr. Woodin was put to facilitate Dr. Andrew in the adjustment of a very difficult situation, your letter seems a little unfair, in that it would tend to create the appearance of a record some time in the future that Mr. Woodin had been compelled to give up something of which he was improperly in possession.'
>
> "Additional information can be found in the May 17 and 24, 2004 editions of *Coin World* by William Gibbs. It appears that Col. Snowden either gave them back to the Mint or the Mint confiscated them from him after the deal mentioned above was completed."

Reading between the lines, this carefully worded letter appears to be a lawyerly effort to, of course, not only exculpate Woodin—the attorney's client—while obtaining official notice that the incident is resolved and carefully avoiding the blatant casting of blame. One notices that Col. Snowden's motive is purportedly altruistic—to "save them from being melted down." But one also notices that the source of the patterns in the first place is not even named—could it have been the curator of the Mint Cabinet at the time, or other Mint personnel? One also observes that there is considerable friction between Director Andrew, Col. Snowden, and Woodin, to the extent that the Mint ended up loading down Woodin, clearly a shrewd businessman as well as an avid collector, with "crates" of patterns in return for the two gold half unions.

USPatterns.com estimates that "less than a dozen" of both the Large Head and Small Head are known, some gilt, some not. Most copper examples of this design have been gilted, making this nongilt piece even more extraordinary and desirable.

The 1913 Adams-Woodin pattern reference says of the two unique gold half unions:

> "In this year [1877] were struck at the Mint two of the rarest and most interesting pattern coins of the whole series. They were of a denomination higher than any coin of regular issue, being of fifty dollars value, and *are regarded by all collectors as the most desirable coins ever issued at the United States Mint.*"

While those coins are off the market forever, this stunning copper Superb Gem pattern, **at least tied for finest certified,** is certainly a collector's dream.

**Physical Description.** The cataloger of the William R. "Rudy" Sieck Collection simply said in 1981 concerning this piece, **"Gem Proof-67, beautiful iridescent surfaces.** No finer specimen could exist." An incredible, stunning Superb Gem of what is arguably, like its gilt Large Head companion presented here, *the most impressive U.S. pattern available in the numismatic marketplace today,* regardless of price. Both sides are essentially free of even the smallest distractions and show lovely oil-slick iridescence beneath the dominant brown patina. The strike is unassailable. One notes that IN GOD WE TRUST, as on the Judd-1547, is clearly hand-punched: IN GOD WE is not in a regular arc, and some of the letters are tilted slightly left or right from their intended positions. **NGC Census:** two PR67 Brown (including the present piece; could be this same coin submitted twice), one PR64 Cameo gilt, one PR64 gilt, one PR63 gilt. **PCGS Population:** two PR64 gilt. Seven certified coins total, of which five are gilt, less possible duplicates (10/08). Two are off the market, in the Connecticut State Library and the Smithsonian.

**Provenance.** *Ex: Marks (Bowers and Ruddy, 11/1972), lot 1085; Austin (Bowers and Ruddy, 5/1974), lot 1115); Fairfield (Bowers and Ruddy, 10/1977), lot 124; unknown intermediary; William R. "Rudy" Sieck Collection (Bowers and Ruddy, 7/1981), lot 2418, which realized $44,000; Steve Ivy; Martin Paul; Mark Feld; Auction '82 (Paramount, 8/1982), lot 1826, where it brought $26,000. From The Lemus Collection, Queller Family Collection Part Two.* (#61893)

The Matthew A. Stickney 1878 Morgan Dollar Pattern in Silver, Judd-1550A, Pollock-1725, Gem Proof

# The Matthew A. Stickney 1878
# Morgan Dollar Pattern in Silver
# Judd-1550A, Pollock-1725, Gem Proof

1889 **1878 Morgan Dollar, Judd-1550A, Pollock-1725, Low R.6, PR65 NGC.**

**Design.** The design on both sides is similar to the adopted Morgan dollar, but on the obverse the point of the bust truncation is nearer to star 1 than to the 1 in the date. The wheat ear in Liberty's cap is distant from the R in PLURIBUS. On the reverse there are *no* "cut-in" notches where the eagle's lower wings join to its torso. Struck in silver with a reeded edge.

**Commentary. Matthew A. Stickney (1805-1894).** The name of Matthew A. Stickney is one of the most illustrious and revered in U.S. numismatics, more than two centuries after his birth and more than a century after his long life ended. Stickney lived in the same house in Salem, Massachusetts, for 56 years. At around age 18, he began collecting coins—possibly the first person in America to begin a systematic collection of dates in several series (see 1907). His most famous and historic acquisition was in the year 1843, when he obtained a Class I Original 1804 silver dollar directly from the U.S. Mint. Stickney's end of the trade was a unique 1785 Immune Columbia cent overstruck on a 1775 British gold guinea, along with some other pieces.

Stickney provided much valuable assistance to Sylvester Crosby when Crosby was writing his still-famous *Early Coins of America,* published in the mid-1870s. Crosby studied and photographed several coins that were unknown except in Stickney's collection. An entire generation of collectors around the turn of the 20th century was largely unaware of Stickney's holdings. One year after dissolving his filial partnership, Henry Chapman in 1907 landed one of the most valuable and comprehensive coin collections sold in the 20th century, the Stickney Collection. Stickney devoted the last years of his life mostly to genealogy, not numismatics, so many of his coins had not been seen for 25 years or more when sold in 1907.

As expected from a 19th century collection, Stickney's Colonial holdings were strong. Besides a Brasher doubloon-which sold for $6,200-he owned the unique Janus Head halfpenny, a LIBER NATUS cent from New York, an Albany Church penny, an INIMICA TYRANNIS cent, and an extensive run of Washingtonia, including a series of Seasons medals. Patterns were well represented in Stickney's holdings, although his is not one of the foremost names among pattern collectors of the era. (Regarding the present coin, it is worth mentioning that Henry Chapman cataloged the coin as a regular Morgan dollar proof of the year 1878, rather than including it in the patterns section.) Regular issue federal coinage is well represented in all areas, including an 1815 half eagle, but the premier coin, and the one Stickney is most famous for, is his 1804 silver dollar, which realized an astounding $3,600 in 1907.

It is instructive to note that in 71 years of collecting, Stickney apparently never owned an 1802 half dime. It is awe-inspiring to see the proof sets Stickney owned, a near-complete run from 1843 through 1879, missing only the 1851-1853 issues and the 1877, and to read Chapman's accompanying copy: "All brilliant and as bright as the day they left the Mint, having never been out of the possession of Mr. Stickney, who bought them at the Mint, and they have never been cleaned. The finest line ever offered. The half cents are all originals ... ."

The entire Stickney Collection, which his two daughters had maintained intact until the 1907 Chapman sale, realized the princely sum of $37,859.21. The present coin almost undoubtedly represents another coin that Stickney obtained directly from the Mint in the year of its striking, toward the twilight of his numismatic endeavors. As such, it occupies a doubly important place in American coinage history.

**Physical Description.** Delightfully original rose and ice-blue patina evenly covers both sides of this stunning coin, which at first glance simply resembles a high-end Gem proof Morgan dollar. It is quite easy to understand how Henry Chapman could miss (or not care about) the subtle distinctions between the two. **NGC Census:** 4 in PR65, 1 finer as a PR65 Cameo. **PCGS Population:** 2 in PR65, 1 finer as a PR65 Cameo (12/08).

**Provenance.** *Ex: Matthew A. Stickney, likely direct from the Mint; Stickney Collection (Henry A. Chapman, 6/1907), lot 916, which realized $2.00; The Connecticut Historical Society and M. Vernon Sheldon Collections (Bowers and Merena, 4/1983), lot 1191. From The Lemus Collection, Queller Family Collection Part Two.* (#61910)

# 1878 Morgan Dollar, Judd-1550B, Pollock-1724, R.7
# PR67 Red and Brown
# The Only Certified Example

1890 **1878 Morgan Dollar, Judd-1550B, Pollock-1724, R.7, PR67 Red and Brown NGC.**

**Design.** The design on both sides is similar to the adopted Morgan dollar, but on the obverse the point of the bust truncation is centered between star 1 and the 1 in the date. The wheat ear in Liberty's coronet touches the R in PLURIBUS. On the reverse there are *no* "cut-in" notches where the eagle's lower wings join to its torso. Struck in copper with a reeded edge.

**Commentary.** As quoted in Pollock, coin dealer Samuel H. Chapman spoke about the reverse of this design in his 1913 sale of the Arthur Sargent collection:

> "In a conference today, June 6, with the artist, Mr. George T. Morgan, he kindly informed me that 'this die with the deep serratures inserted by hand and with the feathers of the eagle's wing continued on the under edge of the body was the first model, and that he subsequently, in deference to the idea and wishes of the Committee on Coinage, changed the arrangement of the feathers so as to leave a gap in the under edge between the feathers and the body.' Mr. Morgan also stated that he made minor changes in several different models, and believed this model to be the rarest, but could not recall how many were struck from each die."

Andrew Pollock notes that the Lemus Collection example weighs 354.5 grains, with diameter of 1.493 in. and coin turn die alignment.

**Physical Description.** Brick-red enlivens the surfaces with darker brown patina over the devices. Each side shows tremendous eye appeal and no mentionable contact. A couple of tiny dark spots at the back of Liberty's cheek near the jawbone provide pedigree identifiers. This piece certainly appears rarer than the Judd-1550A in the present sale (if without so illustrious a pedigree), as this is the *sole example in any grade certified at either NGC or PCGS* (11/08).

**Provenance.** *Ex: T. Elder (9/1938); Smith (Stack's, 12/1987), lot 1030.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#71912)

# 1878 'Rejected Dollar' Pattern in Silver
# Judd-1554, Pollock-1733
# Gem Proof, R.5, Stunning Original Toning

1891 **1878 Dollar, Judd-1554, Pollock-1733, R.5, PR65 NGC.**

**Design.** The same general design as used on the famous 1877 half union patterns of 1877, this arrangement, according to Saul Teichman on USPatterns.com represents what came to be known as "Barber's rejected dollar" in early pattern auction catalogs. The head of Liberty faces left, with IN GOD WE TRUST above and the date 1878 below. Liberty wears a coronet inscribed LIBERTY. Thirteen stars at the border are arranged seven left, six right. The N of IN is close to the coronet point, and star 13 is close to the lowest hair curl. There are five beads above the Y in LIBERTY. On the reverse an eagle with drooping wings occupies the center, with UNITED STATES OF AMERICA and ONE DOLLAR, the latter in minuscules, at the rim. E PLURIBUS UNUM appears arcing in a Gothic font above the eagle. The upright of the B in PLURIBUS is centered under the tip of the right bottom serif on the second T of STATES, and the M in UNUM is slightly left of center of the M in AMERICA. Struck in silver with a reeded edge.

**Commentary.** Somewhat less rare than previously thought at R.5, down from R.6 when Andrew Pollock III penned his reference. One notes that patterns throw all rarity measurements out the window. Using the modified Sheldon rarity ratings, this means that the issue now has 31-75 examples known, up from 14-30 pieces known. If it were a regular-issue Lincoln cent of such rarity, it would probably bring hundreds of thousands of dollars.

**Physical Description.** A ring of ice-blue surrounds the reddish-golden centers on both sides. Stunningly original, and equally well-struck. **NGC Census:** Three in PR65, two finer, a PR66 and a PR66 Cameo. **PCGS Population:** 3 in PR65, none finer (12/08).

**Provenance.** *Ex: Montgomery Collection (Bowers and Ruddy, 2/1976), lot 1684.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#61915)

# 1878 'Rejected Dollar' in Copper, Judd-1555 Pollock-1734, PR63 Brown

1892 **1878 Dollar, Judd-1555, Pollock-1734, R.7, PR63 Brown NGC.**

**Design.** The same general design as used on the famous 1877 half union patterns of 1877, this arrangement, according to Saul Teichman on USPatterns.com represents what came to be known as "Barber's rejected dollar" in early pattern auction catalogs. The head of Liberty faces left, with IN GOD WE TRUST above and the date 1878 below. Liberty wears a coronet inscribed LIBERTY. Thirteen stars at the border are arranged seven left, six right. The N of IN is close to the coronet point, and star 13 is close to the lowest hair curl. There are five beads above the Y in LIBERTY. On the reverse an eagle with drooping wings occupies the center, with UNITED STATES OF AMERICA and ONE DOLLAR, the latter in minuscules, at the rim. E PLURIBUS UNUM appears arcing in a Gothic font above the eagle. The upright of the B in PLURIBUS is centered under the tip of the right bottom serif on the second T of STATES, and the M in UNUM is slightly left of center of the M in AMERICA. Struck in copper with a reeded edge.

**Commentary.** Because of the die varieties that exist for these "rejected dollar" patterns—at least four different die pairings—Pollock breaks them down according to obverse and reverse variety, whereas Judd lumps them all together. The copper Judd-1555 covers:

—**Pollock-1734**. Diagnostics above.

—**Pollock-1738**. (I)N close to point, star 13 close, three beads above Y; upright of B in PLURIBUS under bottom left serif of E in STATES, M in UNUM right of center of M in AMERICA

—**Pollock-1742.** N distant, star 13 distant; B centered under TE, M centered under M.

—**Pollock-1746.** N close, star 13 close, three beads above Y, with additional bead to the right; reverse stars missing from 4 and 8 o'clock positions, L in PLURIBUS centered under first S in STATES, M in UNUM centered underneath ME in AMERICA.

**Physical Description.** The eye appeal is considerably finer than the PR63 grade might imply, with purple and blue highlights throughout. **NGC Census (as Judd-1555):** one PR63 Brown (this piece), one PR67 ★ Red and Brown. **PCGS Population (Judd-1555):** eight pieces ranging from PR62 Brown to PR66 Red (11/08). The individual varieties are all rated R.7 by both Pollock and USPatterns.com. Pollock notes that the Lemus Collection piece weighs 342.5 grains, with a diameter of 1.491 in. and 180-degree die alignment (normal coin turn).

**Provenance.** *Ex: Danny Arnold Collection and Romisa Collection (Bowers and Merena, 9/1984), lot 401.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#61916)

## 1878 'Goloid' Dollar, Judd-1557, PR64
## The Garrett Specimen

1893 **1878 Goloid Dollar, Judd-1557, Pollock-1749, Low R.6, PR64 NGC.**

**Design.** Liberty faces left, with cap adorned with wheat ears, cotton leaves and bolls, eponymously inscribed in incuse letters. There are 13 stars ringing the rim, with the Latin motto above and date below. On the reverse the center reads GOLOID / 1—G. / 24—S. / .9 FINE. / 258 GRS. within a circle of 38 stars. UNITED STATES OF AMERICA is above, ONE DOLLAR below. Struck in goloid alloy with a reeded edge.

**Commentary.** The cataloger of this piece in its 1989 auction appearance considered it to be "among the finest known." With only one piece certified finer today, that was an accurate assessment. Pollock reproduces a December 1878 commentary by Ed Frossard in his *Numisma:* "Mr. Harlan P. Smith, a noted collector of American coin in New York, showed us lately, at Mr. Sampson's stand, a proof impression of the pattern goloid dollar struck at the Philadelphia Mint, and of which only a minimum complement (13) are said to have been struck."

**Physical Description.** The surfaces are mostly silver, with accents of amber and gold and some small dark toning areas on the obverse that are not particularly bothersome. **NGC Census:** 1 in PR64, 1 finer. **PCGS Population:** 4 in PR64, 0 finer (12/08).

**Provenance.** *Ex: The Garrett Collection (Bowers and Merena, March 1980), lot 1052; Brown and Sheldon Collections (Bowers and Merena, 11/1983), lot 4651; Four Landmarks Sale (Bowers and Merena, 3/1989), lot 40.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#61919)

## 1878 'Goloid' Metric Dollar, Judd-1563, PR63

1894 **1878 Goloid Metric Dollar, Judd-1563, Pollock-1754, Low R.6, PR63 PCGS.**

**Design.** Liberty faces left, with cap adorned with wheat ears, cotton leaves and bolls, eponymously inscribed in incuse letters. There are 13 stars ringing the rim, with the Latin motto above and date below. On the reverse the center reads GOLOID / METRIC / 1—G. / 16.1—S. / 1.9—C. / GRAMS 14.25. within a circle of 38 stars. UNITED STATES OF AMERICA is above, 100 CENTS below. Struck in goloid with a reeded edge.

**Commentary.** The reverse of Judd-1563 is the only reverse die used in 1878 that included METRIC as part of the inscription. Similar Metric dollar patterns struck in goloid—and silver—were produced in 1879 and 1880. Pollock opines that the goloid experiments ceased in 1880 because "interest in the composition had largely disappeared in Congress by 1881."

**Physical Description.** Splendid, well-struck, silvery surfaces with a hint of auburn in the center. Nicer than the conservative grade implies. **PCGS Population:** 6 in PR63, 2 finer. **NGC Census:** 1 in PR63, 2 finer (12/08).

**Provenance.** *Unknown.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#61925)

1878 Morgan Dollar Mule-Fantasy Piece, Judd-1565
High R.7, One of Possibly Five Known
PR65 Red

1895 **1878 Morgan Dollar, Judd-1565, Pollock-1732, High R.7, PR65 Red NGC.**

**Design.** This is a muling of the obverse of Judd-1550A/1550B (Pollock-1725/1726) with the reverse of Judd-1554/1555 (Pollock-1733/1734). The obverse is similar to the adopted Morgan dollar, with the point of the bust truncation nearer to star 1 than to the 1 in the date. The wheat ear in Liberty's cap is distant from the R in PLURIBUS. On the reverse an eagle with drooping wings occupies the center, with UNITED STATES OF AMERICA and ONE DOLLAR, the latter in minuscules, at the rim. E PLURIBUS UNUM appears arcing in a Gothic font above the eagle. The upright of the B in PLURIBUS is centered under the tip of the right bottom serif on the second T of STATES, and the M in UNUM is slightly left of center of the M in AMERICA. Struck in copper with a reeded edge.

**Commentary.** Pollock notes that this is "a muling of incongruously matched dies having the motto E PLURIBUS UNUM on each side." This piece was struck at or near the zenith of Mint clandestine pattern production for profit. It almost appears that any obverse was paired with any available reverse in the search for new varieties with which to satiate the collecting public. At least the Mint—usually—drew the line at pairing two obverses or two reverses together. Note that with the appearance of this Lemus Collection specimen, Heritage has handled three of the known specimens.

**Physical Description.** Wonderfully original mint red abounds on both sides of this charming Gem, with equal amounts of eye appeal that are immediately suggestive of an even finer grade. That higher grade may be defeated only by some completely trivial carbon on the obverse. Pollock notes that this piece weighs 342.1 grains, with a diameter of 1.491 in. and coin-turn die alignment. **NGC Census:** two PR65 Red, one PR67 Brown Cameo. **PCGS Population:** two PR65 Red (11/08).

**Census and Provenance.** According to USPatterns.com from which this census is expanded, possibly five examples are known:

1. Abe Kosoff; Auction '85 (Paramount, 7/1985), lot 1312. **The present specimen.**
2. Dr. Edward Maris (Harlan P. Smith, 6/1886), lot 215; Garrett-Johns Hopkins University; Garrett II (Bowers and Ruddy, 3/1980), lot 1053; Jascha Heifetz (Superior, 10/1989), lot 3323; ANA (Heritage, 8/2007), lot 2189. PR65 Red and Brown PCGS.
3. Dr. J. Hewitt Judd; Abe Kosoff; Harry W. Bass, Jr.; Harry W. Bass Research Foundation; Bass (Bowers and Merena, 5/1999), lot 1279; Rarities Sale (Bowers and Merena, 1/2000). PR65 Red PCGS.
4. ANA (Bowers and Merena, 8/1989), lot 4181; Chalkley Collection (Superior, 1/1990), lot 2787; Auction '90 (Superior, 8/1990), lot 1439; Marin (Don Kagin and Andy Lustig); Rarities Sale (Bowers and Merena, 8/1998), lot 2104; Superior (5/1999), lot 3211; Vanek Collection (Heritage, 7/2007), lot 2262. PR65 Red PCGS.
5. A possible fifth piece. PR67 Brown NGC.

*From The Lemus Collection, Queller Family Collection Part Two.* (#81927)

## 1878 Quarter Eagle Pattern in Copper
## Judd-1567, PR64 Gilt

1896 **1878 Quarter Eagle, Judd-1567, Pollock-1757, Low R.7, PR64 Gilt NGC.**

**Design.** On the obverse the head of Liberty faces left, with the Latin motto around and date 1878 below. Liberty's hair is tied in a bun, and she wears a hair band inscribed LIBERTY, with a second band further back in the hair with a leafy design. On the reverse an overlarge eagle fills the center, with small UNITED STATES OF AMERICA and 2½ DOLLARS at the rim. Struck on thinner, wider (20.5-mm vs. 18-mm) planchets than the regular issue, in copper, gilt, with a reeded edge.

**Commentary.** At first glance the Latin motto E PLURIBUS UNUM appears to be stars, as it is spaced fairly equidistantly between letters and words—and there are 13 letters in the motto. Both the obverse head and reverse eagle dwarf the small rim legends. As the Judd reference puts it, "... the design is hardly finessed."

**Physical Description.** A lovely near-Gem with even gilting throughout, this piece has excellent eye appeal and surfaces that are suggestive of an even finer grade. **NGC Census:** 2 in PR64 Gilt, 0 finer. **PCGS Population:** Only one Judd-1567 certified total, not gilt (11/08).

**Provenance.** *Unknown.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#61929)

## Pleasing 1878 Half Eagle Pattern in Copper
## Judd-1571, PR62 Brown

1897 **1878 Five Dollar, Judd-1571, Pollock-1765, Low R.7, PR62 Brown NGC.**

**Design.** The central figure of the obverse die is a head of Liberty facing left, with her hair tied in a bun. A band confining the hair is inscribed LIBERTY. The motto E PLURIBUS UNUM, punctuated by pellets, extends around the periphery, with the date below. The reverse features an upright eagle holding an olive branch and three arrows. The peripheral inscriptions are UNITED STATES OF AMERICA and FIVE DOL. IN GOD WE TRUST is inscribed in the field between the eagle and the motto. Struck in copper with a reeded edge.

**Commentary.** The issue was coined on a larger diameter planchet than the regular-issue coinage (25.5 mm compared to 21.6 mm). This experimental large, thin planchet was probably an attempt to reduce metal shaving around the rim. The thin planchet may have caused striking problems, or the diameter may have been too close to the 27-mm eagle, causing confusion with that coin. For whatever reason, this measure was never adopted for regular-issue coinage. Judd-1571 is a rare issue today, with perhaps a half dozen examples extant.

**Physical Description.** The present specimen is well struck, with the slightest bit of softness on the eagle's breast that is often seen on this issue. Muted red and blue-gray toning create outstanding eye appeal. There are a minimum of handling marks for the grade. Altogether, a pleasing example of this rare and popular pattern. **NGC Census:** Two coins total — this piece and a PR67 Brown Cameo. **PCGS Population:** Three coins ranging from PR63 Red and Brown to PR65 Brown (12/08).

**Provenance.** *Unknown.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#61934)

1898 **1878 Five Dollar, Judd-1574, Pollock-1766, High R.6, PR63 Gilt NGC.**

**Design.** The William Barber Flowing Hair motif graces the obverse. Liberty faces left, wearing a headband eponymously inscribed. E PLURIBUS UNUM is above, the date 1878 below. The reverse offers an eagle with lowered wings in the center, with UNITED STATES OF AMERICA and E PLURIBUS UNUM around. The arrows are long and slender, their tips extending behind and past the eagle's wing, and the olive branch has six leaves. Struck in a larger diameter than regular half eagle issues, in copper, gilt, with a reeded edge.

**Commentary.** The series of 1878 half eagles, Judd-1568A through 1574A, were struck on larger-diameter, thinner planchets in an effort to combat the plague of malefactors scooping out the center of a gold coin and replacing it with less-expensive metal. Mint Director Henry Linderman's 1878 *Annual Report* states:

> "... the worst danger which threatens our gold coin, from counterfeiters, is the filling with an inferior metal or alloy. By this art the piece presents genuine exteriors, but the inner part removed, a disk of platinum, pure or alloyed, is inserted in its place and closed with a ribbed rim of gold. Its is therefore partly genuine and partly counterfeit, and its value reduced by several dollars, differing according to the denomination of the piece.
>
> "The largest chance of spoilation of course occurs with the twenty-dollar pieces, but the pieces of ten and five dollars have also been filled. So far the mischief has been very limited, as it evidently requires first-class workmen, and is slow work; but pieces of this sort are, of all false issues, the most difficult to detect."

**Physical Description.** Smooth, even gilding coats both sides of this pretty piece. A couple of minor areas of darker toning appear on the reverse in the arrows and the right wing, but there is plenty of appeal for the PR63 grade. **NGC Census:** NGC has certified six examples in all grades, including gilt and nongilt coins. Of the two gilt pieces at that service, this is the finest. **PCGS Population:** Six pieces total, none of which is noted as gilt (12/08).

**Provenance.** *Ex: Auction '89 (Stack's, 7/1989), lot 1865. From The Lemus Collection, Queller Family Collection Part Two.* (#61937)

## 1878 Morgan Five Dollar Gilt Copper Pattern PR63, Judd-1578

1899 **1878 Five Dollar, Judd-1578, Pollock-1771, Low R.7, PR63 Gilt NGC.**

**Design.** The so-called Phrygian Head or Liberty Head obverse, attributed to George T. Morgan. Liberty wears a Phrygian cap, facing left, with LIBERTY incused on the band. E PLURIBUS is to the left, UNUM to the right, with date 1878 below. On the reverse an eagle is somewhat similar to the Morgan dollar reverse "except not as delicate" (Judd). IN GOD WE TRUST is in Gothic script over the eagle, with FIVE DOL. at the rim below. Struck on a regular-diameter planchet, in copper with a reeded edge.

**Commentary.** The overall appearance is similar to the Morgan silver dollar, although a silver one dollar and a gold five dollar with the same or similar designs would have been a fairly radical departure from longstanding practice for the Mint. Many examples are gilt, including the present piece. Two gold examples are also known, both impounded in museum collections.

**Physical Description.** An evenly gilt and thoroughly appealing piece, one of perhaps a dozen known. **NGC Census:** one in PR63 Gilt, one finer gilt. **PCGS Population:** four pieces total, none of which is noted as gilt (12/08).

**Provenance.** *Unknown.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#61942)

## Lovely 1879 Washlady Dime Judd-1584, PR66

1900 **1879 Washlady Ten Cents, Judd-1584, Pollock-1777, Low R.6, PR66 PCGS.**

**Design.** The Washlady design is attributed to Charles Barber, with Liberty's hair bound behind the head. The obverse has UNITED STATES OF AMERICA around the border with the date below the bust. The reverse has a wreath around a beaded circle that contains ONE DIME with E PLURIBUS UNUM framed above. Struck in silver with a reeded edge.

**Commentary.** Dave Bowers has renamed the famous Washlady design as the Society Lady design, perhaps a more suitable name for the lady. The design was issued in four denominations from the dime to the silver dollar, and each was struck in copper and silver. In addition, the two largest denominations are known in white metal, and each is unique in that metal.

**Physical Description.** Slight central weakness is evident on this otherwise gorgeous Premium Gem proof. Both sides have lovely sea-green, gold, and iridescent toning over deeply mirrored fields with light cameo contrast. **NGC Census:** 2 in PR66, 7 finer. **PCGS Population:** 5 in PR66, 2 finer (12/08).

**Provenance.** *Unknown.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#61961)

## Resplendent 1879 Morgan Dime Pattern Judd-1586, PR65

1901 **1879 Morgan Ten Cents, Judd-1586, Pollock-1779, High R.6, PR65 NGC.**

**Design.** A head of Liberty that is similar to that employed on the Morgan dollar faces left on the obverse with the legend around the periphery and the date 1879 below. On the reverse, the denomination ONE DIME is enclosed first by E PLURIBUS UNUM and 13 stars, then by a circle of beads, and finally by a wreath of corn, cotton, tobacco, and wheat. Struck in silver with a reeded edge.

**Commentary.** For decades and many generations, collectors have commonly called this pattern the "Morgan dime," as we do here. Considered High R.6, there are currently about 15 pieces known. NGC and PCGS have combined to certify 11 submissions; each service has graded one PR67, followed by a PR65 Cameo PCGS, and two PR65 NGC pieces. Pollock described this piece as 39.2 grains with a 180 degree die alignment, but the alignment actually is about 150 degrees.

**Physical Description.** A pleasing, fully mirrored proof with considerable contrast, accented by faint champagne toning on both sides.

**Provenance.** *Ex: Stack's private treaty.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#61963)

## Popular 1879 Morgan Dime Judd-1587, Proof

1902 **1879 Morgan Ten Cents, Judd-1587, Pollock-1780, High R.6- Improperly Cleaned-NCS. Proof.**

**Design.** Morgan's Liberty Head serves the obverse with UNITED STATES OF AMERICA around and the date below. The reverse has an agricultural wreath around a circle of dots that contains the motto E PLURIBUS UNUM, 13 stars, and ONE DIME. Struck in copper with a reeded edge.

**Commentary.** The Morgan dime is the smallest of four denominations that feature George Morgan's famous obverse, made popular by the series of silver dollars that are named for him. An estimated 13 to 16 survivors exist of this pattern variety in copper.

**Physical Description.** Both sides are mostly bright orange from cleaning, now with a few splashes of dark brown toning.

**Provenance.** *Ex: Abner Kreisberg; Bowers and Merena (11/1988), lot 5408.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#81964)

## Desirable 1879 Morgan Ten Cent Pattern Judd-1588, PR66

1903 **1879 Morgan Ten Cents, Judd-1588, Pollock-1781, High R.6, PR66 PCGS.**

**Design.** Morgan's Liberty Head serves the obverse with UNITED STATES OF AMERICA around and the date below. The reverse has a laurel wreath around a circle of dots that contains the motto E PLURIBUS UNUM, 13 stars, and ONE DIME. Struck in silver with a reeded edge.

**Commentary.** In addition to his Liberty Head design made famous by the Morgan silver dollar, the artist also created the distinctive Schoolgirl design. The year 1879 was one of great competition between Morgan and both Barbers, William and Charles. All three artists created pattern designs before the death of the elder Barber, William, on August 31, 1879.

**Physical Description.** A boldly detailed and highly attractive Premium Gem, this lovely piece is fully and deeply mirrored around brilliant and frosty silver devices. Both sides are essentially bright silver, with peripheral gold toning. **NGC Census:** 1 in PR66, 4 finer. **PCGS Population:** 1 in PR66, 4 finer (12/08).

**Provenance.** *Unknown.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#61965)

## Morgan's 1879 Dime in Copper Judd-1589, PR65 Red and Brown

1904 **1879 Morgan Ten Cents, Judd-1589, Pollock-1782, R.7, PR65 Red and Brown NGC.**

**Design.** The obverse features the same portrait of Liberty as used on the Morgan dollar, here adapted to the format of a dime. The reverse has ONE DIME in the center and is encircled by a wreath composed of six bunches of four laurel leaves each. Struck in copper with a reeded edge.

**Commentary.** The various patterns that feature George Morgan's head of Liberty are extremely popular with collectors and connoisseurs of both pattern coins and Morgan silver dollars. The present specimen is only the fourth example that we have offered in our auctions since 1993. Depending on the source, the existing population ranges between 10 and 15 coins. The current Judd reference rates Judd-1589 as Low R.7, with 10 to 12 known, and USPatterns.com suggests that 12 to 15 are known.

**Physical Description.** A few modest flyspecks on each side, along with slight mellowing of the reverse design elements, prevents a full Red designation to this boldly detailed Gem proof. **NGC Census:** 1 in PR65 Red and Brown, 3 finer. **PCGS Population:** 1 in PR65 (Red) Cameo, no others graded PR65, 1 finer (12/08).

**Provenance.** *Ex: Stack's private treaty (12/1981).*
*From The Lemus Collection, Queller Family Collection Part Two.* (#71966)

# 1879 'Society Lady' or 'Washlady' Silver Quarter, Judd-1590, PR66

1905 **1879 Washlady Quarter Dollar, Judd-1590, Pollock-1783, High R.6, PR66 PCGS.**

**Design.** The Washlady design is attributed to Charles Barber, with Liberty's hair bound behind the head. The obverse has UNITED STATES OF AMERICA around the border with the date below the bust. The reverse has an eagle clutching an olive branch and three arrows. The UNITED STATES OF AMERICA legend and E PLURIBUS UNUM motto follow inside the upper reverse border with the denomination expressed as QUAR. DOLLAR below. Struck in silver with a reeded edge.

**Commentary.** It is thought that the original "Washlady" name was given by David Proskey in the April 1891 New York Coin and Stamp Company catalog of the F.W. Doughty Collection. Dave Bowers writes in the ninth edition of the Judd reference: "Assistant engraver Charles E. Barber's suite of silver patterns of the dime, quarter dollar, half dollar, and dollar denominations stands today as among his finest work. In the late 19th century, this depiction of Liberty was dubbed the 'Washlady' design, a rather unfortunate designation, as the woman depicted is elegantly coiffed, and certainly not styled as a laundress might have been."

**Physical Description.** Both sides of this brilliant pattern are deeply mirrored around lustrous silver devices. The surfaces are pristine with a hint of light gold toning. Somewhat weakly detailed on the reverse, as usual for the design. This is one of four Judd-1590s that PCGS has certified at the PR66 level, and there are only two pieces finer at that service (11/08). There are a handful of numerically finer pieces certified at NGC.

**Provenance.** *Unknown.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#61967)

## Fiery Red 1879 Washlady Quarter
## Judd-1591, PR66 Red Cameo

1906 **1879 Washlady Quarter Dollar, Judd-1591, Pollock-1784, R.6-7, PR66 Red Cameo NGC.**

**Design.** The Washlady design is attributed to Charles Barber, with Liberty's hair bound behind the head. The obverse has UNITED STATES OF AMERICA around the border with the date below the bust. The reverse has an eagle clutching an olive branch and three arrows. The UNITED STATES OF AMERICA legend and E PLURIBUS UNUM motto follow inside the upper reverse border with the denomination expressed as QUAR. DOLLAR below. Struck in copper with a reeded edge.

**Commentary.** The most recent Judd reference considers this pattern variety to be Low R.7, meaning a surviving population of 10 to 12 coins. At USPatterns.com, the survival estimate is between 12 and 15 coins. In January 2007, we offered a PR65 Red and Brown example of Judd-1591, the only other piece that we have offered since 1993.

**Physical Description.** The central obverse and reverse of this stunning Premium Gem proof are a trifle weak, but all remaining details are bold. This exceptional piece is fully brilliant with light orange mint color. A single tiny spot near the 1 of the date is the only noticeable blemish, and should aid in tracing the provenance. **NGC Census:** 1 in PR66 Red Cameo, none finer. **PCGS Population:** The finest are two coins graded PR65 Red and Brown (12/08).

**Provenance.** *Ex: Stack's private treaty.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#81968)

## Morgan Quarter in Silver
## Judd-1593, PR67 Cameo

1907 **1879 Morgan Quarter Dollar, Judd-1593, Pollock-1787, Low R.7, PR67 Cameo NGC.**

**Design.** Easily called a Morgan quarter, the obverse shows a familiar George T. Morgan Liberty Head design with peripheral inscriptions arranged differently from the silver dollar. Two stars, E PLURIBUS, seven stars, UNUM, four stars (total 13), and the date 1879 below. On the reverse a spread-winged eagle holds an olive sprig in its right talon, three arrows in its left. UNITED STATES OF AMERICA is at the upper rim, with QUARTER DOLLAR at the lower rim. IN GOD WE TRUST is awkwardly squeezed in on three sides of the eagle. Struck in silver with a reeded edge.

**Commentary.** This pattern variety is another whose rarity seems to verge on High R.6/Low R.7 depending on the determination of exactly how many separate examples truly survive—no easy task.

**Physical Description.** Sumptuous central shades of obverse aquamarine cede at the extreme rim to orange and saffron on this pristine Superb Gem. The reverse offers a palette of lighter intensity with gold and aqua shades predominating. **NGC Census:** Even though this PR67 Cameo coin displays startling originality, incredibly there are two examples finer at NGC. **PCGS Population:** 1 in PR67 with no designation, 1 finer (12/08).

**Provenance.** *Ex: Stack's private treaty.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#61970)

# High Condition Census 1879 Washlady Half Judd-1597, PR66 Cameo, One Finer Certified Sharply Struck and Delightfully Toned

1908 **1879 Washlady Half Dollar, Judd-1597, Pollock-1791, High R.6, PR66 Cameo NGC.**

**Design.** The Charles Barber Society Lady design, popularly called the Washlady, although it is an unfortunate misnomer. Liberty's lush hair is piled atop her head, with IN GOD WE TRUST above and stars seven left, six right. On the reverse a perched eagle holds an olive branch with seven leaves. Three arrows pass behind the wing. UNITED STATES OF AMERICA and HALF DOLLAR are at the rim, with the Latin motto in a wide inner arc above the eagle. Struck in silver with a reeded edge.

**Commentary.** USPatterns.com notes that the Washlady moniker apparently takes its source from the April 1891 sale of the Doughty Collection by Harlan P. Smith and David Proskey, adding that it is considered "today to be one of the most beautiful designs" ever made by the U.S. Mint. Although not quite in the same league as the Amazonian, Shield Earring, or Schoolgirl patterns, the Washlady coinage is nonetheless truly attractive and quite desirable. The Washlady half dollars, as the population data below attest, have an added benefit: While still quite rare, they are somewhat more available than those Big Three patterns, and most of the survivors, when found, are attractive and high-grade.

**Physical Description.** Mostly brilliant, the peripheries show occasional dappled shades of cinnamon, amber, and ice-blue. Both the strike and subsequent preservation are impeccable on this Premium Gem proof, with much field-device contrast and even more eye appeal. **NGC Census:** one PR63, two PR66, one PR66 Cameo (this piece), one PR67 Star Ultra Cameo. **PCGS Population:** one PR62, two PR64, one PR65, two PR66, one PR66 Cameo (10/08).

**Provenance.** *Ex: William Mitkoff.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#61975)

## Pleasing 1879 Washlady Half Dollar Judd-1598, PR64 Brown

1909 **1879 Washlady Half Dollar, Judd-1598, Pollock-1792, High R.6, PR64 Brown NGC.**

**Design.** The Washlady design is attributed to Charles Barber, with Liberty's hair bound behind the head. The obverse has UNITED STATES OF AMERICA around the border with the date below the bust. The reverse has an eagle clutching an olive branch and three arrows. The UNITED STATES OF AMERICA legend and E PLURIBUS UNUM motto follow inside the upper reverse border with the denomination expressed as HALF. DOLLAR below. Struck in copper with a reeded edge.

**Commentary.** It is thought that between 12 and 15 examples of this variety exist and we have offered a few nice examples of this half dollar pattern over the years. References on the subject note that Morgan's Schoolgirl patterns are more highly regarded than Charles Barber's Society Lady—or Washlady—motif. Interestingly, a side-by-side comparison shows that both designs feature a similar likeness of Miss Liberty, only with differing hairstyles.

**Physical Description.** An impressive Washlady half dollar with rich sea-green, gold, and iridescent toning on both sides. The fields are fully mirrored and contrast nicely with the sharp devices. Slight central design weakness is the only fault, other than a few tiny flyspecks. **NGC Census:** 1 in PR64 Brown, 8 finer. **PCGS Population:** None in PR64 regardless of designation, 7 finer (12/08).

**Provenance.** *Ex: Stack's (9/1982), lot 749.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#61976)

## Fiery 1879 Morgan Half Dollar Judd-1600, PR63 Red Cameo

1910 **1879 Morgan Half Dollar, Judd-1600, Pollock-1795, Low R.7, PR63 Red Cameo NGC.**

**Design.** The obverse is reminiscent of the standard Morgan dollar, but the border arrangement of stars and E PLURIBUS UNUM differs. The reverse features a large perched eagle with unfurled wings. The eagle clutches three large arrows and an olive branch. IN GOD WE TRUST is widely spread around the eagle. Struck in copper with a reeded edge.

**Commentary.** This pattern is either Low R.7 or High R.6, with about 12 to 15 pieces existing today. Pollock called it R.7, Bowers states Low R.7 in the ninth edition of the Judd reference, and USPatterns.com states R.6. NGC has certified four examples of this pattern variety, but to date the present piece is the only one with a Cameo designation. PCGS has also certified four submissions, none with a Cameo designation.

**Physical Description.** Both sides have bright orange mint luster with a tiny splash of blue toning at 11 o'clock on the reverse. A few dark spots and faint hairlines limit the grade. The central design elements are weak as usual.

**Provenance.** *Stack's (10/2005), lot 1384.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#81978)

# 1879 Morgan Half Dollar in Silver, Judd-1601, PR64 Ex: Bass

1911 **1879 Morgan Half Dollar, Judd-1601, Pollock-1796, High R.6, PR64 PCGS.**

**Design.** Sometimes called the "Miniature Morgan dollar" design. Both dies designed by George T. Morgan. The obverse is the same as on the regular-issue Morgan dollar, while the reverse shows a tall, thin, and somewhat stylized eaglet perching on an olive branch, with UNITED STATES OF AMERICA and HALF DOLLAR at the extreme rim. IN GOD WE TRUST is an inner arc around the eagle. Struck in silver with a reeded edge.

**Commentary.** More than a dozen examples are known in both silver and copper, according to USPatterns.com, with the Judd reference providing an estimate of 10 pieces for the silver examples and eight for the copper (Judd-1602).

**Physical Description.** Lovely iridescent toning in shades of silver-gray and sunset-orange enhances both sides, with some silver remaining in the fields. As noted on Saul Teichman's pattern website, most examples (including the present piece are weakly struck) on the hair just above Liberty's ear, a design flaw shared with most of the circulation strike Morgan dollars. A few tiny dots of darker toning in the reverse field, below OF, will serve as future pedigree markers. NGC and PCGS combined show a total of 11 "submission events" in all grades, although the actual number of distinct pieces could be considerably lower.

**Provenance.** *Ex: Brinton T. Schorer, private sale (5/3/1973); Harry W. Bass, Jr. Research Foundation; Bass Collection Part I (Bowers and Merena, 5/1999), lot 1242, which brought $10,350. PR64 PCGS From The Lemus Collection, Queller Family Collection Part Two.* (#61979)

# 1879 Silver 'Washlady' Dollar, Judd-1603, PR64

1912 **1879 Washlady Dollar, Judd-1603, Pollock-1798, High R.6, PR64 NGC.**

**Design.** Liberty's lush hair is piled atop her head, with IN GOD WE TRUST above and 13 stars around. On the reverse a perched eagle holds an olive branch with seven leaves, and three arrows pass behind the wing. UNITED STATES OF AMERICA and ONE DOLLAR are at the rim, with the Latin motto in a wide inner arc above the eagle. Struck in silver with a reeded edge.

**Commentary.** The ninth edition of Judd's *United States Pattern Coins* comments favorably concerning the "Washlady" patterns:

> "Assistant engraver Charles E. Barber's suite of silver patterns of the dime, quarter dollar, half dollar, and silver dollar denominations stands today as among his finest work. In the late 19th century, this depiction of Liberty was dubbed the 'Washlady' design, a rather unfortunate designation, as the woman depicted is elegantly coiffed, and certainly not styled as a laundress might have been. The addition of the ten-cent or dime denomination to these patterns is quite unusual, as after the Standard Silver series, relatively few new pattern designs were made of this value."

While Charles Barber's reputation has perhaps been unduly tarnished by those of us in the numismatic press who pit him regularly against Augustus Saint-Gaudens, it is nonetheless a truism that both he and his father were Englishmen at heart, both native Britons whose styles were firmly rooted in Victorian tradition. Their work receives mixed reviews, but the greatness of Saint-Gaudens is, perhaps, an unfair yardstick. Charles Barber was born in London on Nov. 16, 1840, the son of William and Anna May Coultart Barber. William was born in London on May 2, 1807, the son of engraver John Barber. The Barbers came to the United States in 1852, when William was 45 and son Charles was 12.

The USPatterns.com website estimates that 12 to 15 specimens are known.

**Physical Description.** This sharply struck piece is mostly silver throughout, with tinges of gold near the rims on each side. Some light hairlines in the obverse field and minor contact evidence account for the grade, but this rare pattern is nonetheless startling in its appeal and originality. **NGC Census:** 1 in PR64, 2 finer. **PCGS Population:** None in PR64, 1 finer (12/08).

**Provenance.** *Unknown.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#61981)

# High R.6 1879 'Washlady' Dollar in Copper, Judd-1604
# PR66 Red and Brown

1913 **1879 Washlady Dollar, Judd-1604, Pollock-1799, High R.6, PR66 Red and Brown PCGS.**

**Design.** Liberty's lush hair is piled atop her head, with IN GOD WE TRUST above and 13 stars around. On the reverse a perched eagle holds an olive branch with seven leaves, and three arrows pass behind the wing. UNITED STATES OF AMERICA and ONE DOLLAR are at the rim. The Latin motto is in a wide inner arc above the eagle. Struck in copper with a reeded edge.

**Commentary.** The USPatterns.com website notes concerning the so-called "Washlady" (or Society Lady, per Judd) design of Charles Barber that it is "considered today to be one of the most beautiful designs ever made by the U.S. Mint. At that time, however, the design was not well received as, apparently, Liberty's hair and the way it was tied back was considered to be disheveled. The Washlady name dates back to the April 1891 New York Coin and Stamp auction of the F.W. Doughty collection and was probably given by David Proskey."

Like its silver counterpart, this copper Washlady dollar pattern is given a High R.6 rarity estimate by USPatterns.com, with 12 to 15 pieces known. A Census of 10 copper specimens is given there. NGC reports four examples within all color designations, while PCGS adds six more—although crossovers are possible.

**Physical Description.** Generous glimpses of iridescent sunset-orange, sage, and saffron grace both sides, with much luster in evidence and little evidence of contact. Some tiny dark flecks in the left obverse field, to the left of the date and star 1, serve as pedigree markers. A sharply struck and memorable example.

**Provenance.** *Unknown.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#71982)

# 1879 'William Barber' Silver Dollar, Judd-1605, PR64 High R.6, Perhaps 13-15 Known

1914 **1879 Dollar, Judd-1605, Pollock-1801, High R.6, PR64 NGC.**

**Design.** Some catalogers call this design similar to the "Washlady" Charles Barber dollars, but to this cataloger the William Barber design of this piece appears to be a mix of the Washlady and Coiled Hair designs, with Liberty's hair rather tightly wrapped about her head. While there are differences, both the timing and thematic artistry are similar. The hair is tied with a ribbon behind, and a band with incused LIBERTY is embedded in the hair. IN GOD WE TRUST is on each side, with date below. The reverse shows a puny perched eagle surrounded by a wreath, with UNITED STATES OF AMERICA and ONE DOLLAR at the rim, while the Latin motto is in an inner arc above the eagle. Struck in silver with a reeded edge.

**Commentary.** In a classic case of closing the barn door after the horse has got out, the Mint in 1879 produced a plethora of silver dollar pattern designs aimed at supplanting the Morgan dollar design of the inexperienced assistant engraver, George T. Morgan—a design that, of course, was struck by the many millions beginning the prior year, in 1878. While the Morgan dollar design saw much criticism in its time, it is well-loved today. If this was meant as an improvement, it is not: The letters in UNITED STATES OF AMERICA are haphazard, with IT and ST close and some other pairs too distant. Various technical aspects of the central design are faulty. If this is truly a William Barber design as Judd maintains (others differ), it is worth noting that he would have been 71 or 72 when he executed this die. (William Barber died unexpectedly on Aug. 31, 1879, after catching a chill on vacation while being in the surf off of Atlantic City, New Jersey.)

The USPatterns.com website calls the design a "borderline R.7" in rarity, meaning that perhaps 13-15 survivors are known. NGC and PCGS combined have certified nine pieces.

**Physical Description.** This sharply struck piece shows generous iridescent patina on both sides, in shades of pinkish-gold, with mint-green and steel-blue clinging around the device edges. There is much appeal present, and the appearance of a faint possible fingerprint mark around Liberty's ear and cheek serves as a pedigree marker. **NGC Census:** 2 in PR64, 1 finer. **PCGS Population:** 2 in PR64, 2 finer (12/08).

**Provenance.** *Unknown.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#61983)

# High R.6 1879 Dollar in Copper
# Judd-1606, PR64 Brown

1915 **1879 Dollar, Judd-1606, Pollock-1802, High R.6, PR64 Brown NGC.**

**Design.** Another example of the modified Washlady design, with some Coiled Head influences also visible. The ninth edition of Judd, edited by Q. David Bowers, attributes this design to William Barber. Liberty's hair is tightly coiled with a ribbon at the back, and she wears a band in her hair with incused LIBERTY. The stars are seven left, six right, with date below. The problematic reverse shows a rather poorly modeled eagle on a perch, with an irregularly spaced and misaligned UNITED STATES OF AMERICA above. The Latin motto is beneath, and because the eagle holds the right (facing) wing higher than the left, the UNUM is on the verge of crashing into it. Both the olive branch and arrows are poorly modeled: The tip of the branch appears cut off behind the left wing, and the arrowheads scarcely emerge from behind the right. An attractive wreath surrounds the eagle, with the denomination below. Struck in copper with a reeded edge.

**Commentary.** Like its silver sibling, the copper striking of the Judd-1606 is also rated a borderline R.7 by USPatterns.com. This design was either modeled by William Barber when he was in his early 70s (per Judd) and in the last year of his life, or by his son Charles when he was approaching 40.

**Physical Description.** Richly lustrous surfaces are deeply patinated in shades of blue and purple on both sides, like much original copper coinage certified as "Brown." The strike is uniformly sharp throughout, and generous eye appeal is present on both sides. A small straight-line scrape from Liberty's mouth into the left obverse field serves as a pedigree marker. Pollock records a weight of 361.0 gn, diameter 1.492 in., and 180-degree die alignment. Between NGC and PCGS combined, there are an even dozen specimens certified of this variety, less the inevitable duplications. **NGC Census:** 1 in PR64 Brown, 6 finer. **PCGS Population:** None in PR64 regardless of designation, 4 finer (12/08).

**Provenance.** *Ex: ANA Midwinter Auction (Heritage, 2/1987), lot 1317.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#61984)

## Condition Census Silver 1879 Schoolgirl Dollar Judd-1608, PR65 Cameo, Among the Most Desired and Admired of U.S. Patterns, Ex: Judd, Sieck

1916 **1879 Schoolgirl Dollar, Judd-1608, Pollock-1804, Low R.7, PR65 Cameo NGC.**

**Design.** The "Schoolgirl" dollar features George T. Morgan's design of Liberty facing left, with E PLURIBUS at the left rim, seven stars above, UNUM at the right rim, four more stars, the date 1879, and finally two more stars before we come back around from whence we began. Liberty's hair is combed back and tied with a ribbon behind her head. A hairband is inscribed LIBERTY, and a string of pearls encircles her throat, as her flowing locks cascade down her shoulder. The reverse features a defiant eagle, seemingly about to take flight, facing left on a rectangular perch with IN GOD WE TRUST. An olive sprig is in the left field, with three arrows in the right field. UNITED STATES OF AMERICA and ONE DOLLAR are at the rims, separated by periods. Struck in silver with a reeded edge.

**Commentary.** The Schoolgirl is among the most celebrated and sought-after American coinage patterns, rated a High R.6 by the ninth edition of Judd's *United States Pattern Coins*. Unlike the unfortunate "Washlady" moniker, here the appellation is richly deserved, with a fresh-faced Liberty wearing a single strand of pearls, appearing to be 14 to 16 and in the first blush of young womanhood. The defiant eagle reverse is reminiscent not only of some of Morgan 1877 half dollar patterns (Judd-1512 and 1513), but Morgan also took it as the model for a much later commemorative gold design, the reverse of the 1915-S Panama-Pacific quarter eagle. Bowers, in his *Guide Book of United States Commemorative Coins*, opines that the "quarter eagle version looked much less elegant."

The USPatterns.com website credits the 1891 F.W. Doughty sale, conducted by David Proskey and Harlan P. Smith, with the origin of the Schoolgirl nickname. That website gives a census of some 14 pieces including the present example, with three of them off the market in institutional holdings: two at the Smithsonian, one at the American Numismatic Society. The site also notes that "it is likely that most known today in silver and copper trace their pedigree to the Woodin collection and were obtained in trade for 'returning' the two $50 gold patterns to the mint collection." The combined NGC and PCGS certified population stands at 11 pieces, which seems to square with the known census.

In the 1981 catalog of the William R. "Rudy" Sieck Collection—a landmark pattern collection that was especially strong in the half dollar and silver dollar patterns from the 1870s—the cataloger wrote this concerning the present specimen:

> "For some reason nearly all known specimens have been cleaned. This and the Garrett coins are marvelous exceptions. The *Schoolgirl* represents a high in American artistic coin design. As a preface to this section notes, this particular coin is Rudy Sieck's all-time favorite. And, that certainly is the opinion of a connoisseur."

Sieck's own words, in the preface to that catalog, are touching: "Of course, the 'Schoolgirl' dollar of 1879 is my favorite pattern. In my opinion it is the most beautiful coin design ever made in America. After the sale I am sure that I will miss 'her' most of all."

**Physical Description.** The "beautiful light green and iridescent blue toning around the borders" that was remarked on in 1981 is still abundant, a sign of this coin's unfooled-with originality ever since it was produced. The splendid surfaces are marvelously attractive, and indeed there is little in the way of obvious pedigree markers save for the original toning.

This marks only the second time that we have offered an example of the Schoolgirl dollar in silver. The first, a PR64 PCGS example pedigreed to the New Millennium Collection, brought $63,250 more than five years ago (November 2003 Signature Sale, lot 11226). The present Gem coin, one of the half dozen or so finest graded save for a single PR66 at PCGS, presents a remarkable opportunity for the pattern connoisseurs of the present and future, just as it did to Dr. J. Hewitt Judd, Rudy Sieck, and other famous collectors of the past.

**Provenance.** *Ex: J. Hewitt Judd; Julian Leidman; William R. Sieck Collection (1981 ANA, Bowers & Ruddy, 7/1981), lot 291, $28,000.*

# 1879 Schoolgirl Dollar in Copper
# Judd-1609, PR63 Brown, Low R.7

1917 **1879 Schoolgirl Dollar, Judd-1609, Pollock-1805, Low R.7, PR63 Brown NGC.**

**Design.** The "Schoolgirl" dollar features George T. Morgan's design of Liberty facing left, with E PLURIBUS at the left rim, seven stars above, UNUM at the right rim, four more stars, the date 1879, and finally two more stars before we come back around from whence we began. Liberty's hair is combed back and tied with a ribbon behind her head. A hairband is inscribed LIBERTY, and a string of pearls encircles her throat, as her flowing locks cascade down her shoulder. The reverse features a defiant eagle, seemingly about to take flight, facing left on a rectangular perch with IN GOD WE TRUST. An olive sprig is in the left field, with three arrows in the right field. UNITED STATES OF AMERICA and ONE DOLLAR are at the rims, separated by periods. Struck in copper with a reeded edge.

**Commentary.** This represents a second opportunity to capture one of the classic of American coinage design, the Schoolgirl dollar, this time in copper. The copper examples are apparently a bit rarer than the silver pieces, although not significantly so. In the mass of High R.6 and Low R.7 patterns in which this sale abounds, potential bidders would do well to remember that *all pattern coins are among the rarest of all U.S. coin types, and that even the so-called "common" patterns are many, many times more rare than most regular issues in the U.S. series.*

For the copper Schoolgirl pattern, the USPatterns.com website shows a census of some 12 pieces, with a couple of possible duplicates taking the number down to 10. The combined total of certified examples at NGC and PCGS also is 10 coins (9/08).

George T. Morgan (1845-1925) had only been employed at the U.S. Mint for some three years when he designed this wonderful pattern dollar, one of the most admired and revered in U.S. numismatics. Born in London, he had earlier been a pupil of Royal Mint engraver Leonard Charles Wyon. He was hired in 1876 after Mint Director Henry Linderman made inquiries to the British institution, feeling that perhaps Chief Engraver William Barber (1807-1879) and his son Charles (1840-1917), the assistant engraver, were "overworked and perhaps underqualified" (Ted Schwarz, "The Morgan and Peace Silver Dollars," *The Numismatist,* November 1975). William Barber had been hired at the Mint in 1865 and had become chief engraver in 1869, on the death of James B. Longacre, at which time he was already 62 years old. His son Charles was still relatively inexperienced.

Linderman wrote in 1875 to the Royal Mint director, "Could you find us a first-class die-sinker who would be willing to take the position of Assistant Engraver at the Mint at Philadelphia? We would like a man who could produce a finished hub, and if he understood modeling and also bronzing it would make him more valuable to us."

On the recommendation of his British employers, Morgan was hired for the Philadelphia position, with the understanding that the elder Barber, William, would soon retire. (Father and son William and Charles Barber shared an office in the Mint, so William's retirement would make room for Morgan to share the space with Charles.) Although William Barber continued to serve as chief engraver until his death, that occurred on Aug. 31, 1879. Apparently Charles Barber was not well-liked by his superiors; it was December before he was named chief engraver, with some consideration given to naming Morgan to the post. Although Morgan's talents were superior to Charles Barber's (and certainly to William Barber's), he served as assistant engraver from 1876, first under William Barber and then until Charles Barber's own death in 1917, a period of 41 years. George T. Morgan was named chief engraver in 1921, after nearly 45 years of Mint service.

**Physical Description.** Lustrous brown surfaces show strong iridescent highlights in shades of blue and purple. A few small lintmarks seen in the digits of the date serve as pedigree markers, but carbon and visible contact on this possibly undergraded piece are essentially absent. Under a loupe some faint evidence of die clashing is visible on each side, more so on the obverse than the reverse.

**Provenance.** *Unknown.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#61987)

# 1879 Morgan Dollar, Judd-1611, PR60

1918 **1879 Morgan Dollar, Judd-1611, Pollock-1807, Low R.7, PR60 NGC.**

**Design.** The obverse is that of the regular-issue Morgan dollar, while the reverse shows a statuesque eagle perched, head facing left, with downward-pointed wings, clutching an olive branch and three arrows. UNITED STATES OF AMERICA and ONE DOLLAR encircle the border. Struck in silver with a reeded edge.

**Commentary.** This "near-Morgan dollar" poses an interesting contrast with the as-issued design. Little comment or notice is made in the numismatic literature of the eagle's wings pointed upward (as on the finished product) vs. the wings pointing downward, as here, whereas Breen notably makes a tremendous distinction between eagles holding olive branches in sinister ("less honorable") claws and dexter ("more honorable") claws. While the eagle on this reverse shows considerable differences, the shape of the head and the center breast, in particular, are beginning to approach the circulation design. About a dozen pieces, perhaps a couple more, are known of this variety.

**Physical Description.** Tinges of olive-green and gray-gold greet the viewer from both sides of this coin, which shows a few light contact marks on Liberty's cheek and elsewhere. Those marks, although not particularly bothersome, along with some haze and hairlining in the fields account for the PR60 grade of this sharply struck piece. Nonetheless quite rare, with no more than about 15 examples surviving today, at least a couple of which are off the market in museum/institutional holdings. **NGC Census:** 1 in PR60, 9 finer. **PCGS Population:** None in PR60, 5 finer (12/08).

**Provenance.** *Ex: Stack's private treaty.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#61989)

## 1879 Morgan Dollar, Judd-1612, PR65 Red

1919 **1879 Morgan Dollar, Judd-1612, Pollock-1808, Low R.7, PR65 Red NGC.**

**Design.** The obverse is that of the regular-issue Morgan dollar, while the reverse shows a statuesque eagle perched, head facing left, with downward-pointed wings, clutching an olive branch and three arrows. UNITED STATES OF AMERICA and ONE DOLLAR encircle the border. Struck in copper with a reeded edge.

**Commentary.** The USPatterns.com website notes, "This design by Morgan is another attempt to replace the production design whose eagle was described as scrawny among other things." The pieces in silver and copper are both equally (exceedingly) rare, with more than a dozen examples (only) known, according to the website. Pollock reports that all specimens known have a 180-degree die alignment. The combined NGC/PCGS certified population stands at 10 pieces in all color designations (Red, Red and Brown, Brown), although only seven are certified Red (9/08).

**Physical Description.** The pristine surfaces of this Gem specimen are a splendid orange-gold. Were it not for a few trivial carbon flecks and minor contact on Liberty's cheek, this piece might achieve an even finer grade. A small oblong dark toning spot just above Liberty's headband, between the UR of URIBUS, serves as a pedigree marker. **NGC Census:** 1 in PR65 Red, 1 finer. **PCGS Population:** 2 in PR65 Red, 1 finer (12/08).

**Provenance.** *Ex: Greater New York Numismatic Convention Sale (Stack's, 4/1988), lot 1418.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#81990)

# 1879 Morgan Dollar, Judd-1613, PR63 Cameo

1920 **1879 Morgan Dollar, Judd-1613, Pollock-1809, Low R.7, PR63 Cameo NGC.**

**Design.** The obverse is the regular-issue Morgan dollar die, but the reverse is yet another modified version like the Judd-1611 and Judd-1612, with the eagle similar but lower in the field. UNITED STATES OF AMERICA is in large letters (compared to the remainder of the lettering), with ONE DOLLAR at the bottom smaller, and IN GOD WE TRUST in similarly small letters in an inner arc above the eagle. Struck in silver with a reeded edge.

**Commentary.** To collectors of the day (and to Treasury and bank officials), Morgan dollars were mostly an unneeded and unwanted nuisance, with a couple of exceptions. But Neil Carothers' seminal book *Fractional Money*—published in 1930 (reprinted 1988 by Bowers and Merena) but a timeless education for serious numismatists—cites two interesting scenarios where the Morgan dollar was popular:

> "The coins were, in general, very badly received. In two regions they were accepted in large numbers. In the South they circulated because of an interesting social situation. As a class the recently emancipated slaves were illiterate. There were no gold coins in circulation, and the colored population refused to use greenbacks with their printed symbols. They gladly accepted the new silver coins, and from this situation came the custom of using silver dollars in the South ...
>
> "In the West the aversion to paper money and the general desire to support silver led to the acceptance of the silver dollar. The North and East would have none of them."

**Physical Description.** Accents of saffron-gold cling to the rims on both sides of this piece. Some moderate hairlining and contact marks in the fields on both sides are noted, accounting for the grade, but this piece is nonetheless attractive and quite rare. More than a dozen are known. The combined NGC/PCGS certified population totals 18 pieces, a figure that undoubtedly includes a few pieces jumping around from one service to another. **NGC Census:** 1 in PR63 Cameo, 4 finer. **PCGS Population:** None in PR63 Cameo, 6 finer (12/08).

**Provenance.** *Unknown.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#61991)

## Condition Census 1879 Morgan Dollar Struck in Copper, Judd-1614 PR66 Red and Brown Cameo

1921 **1879 Morgan Dollar, Judd-1614, Pollock-1810, Low R.7, PR66 Red and Brown Cameo NGC.**

**Design.** The obverse is the regular-issue Morgan dollar die, but the reverse is yet another modified version like the Judd-1611 and Judd-1612, with the eagle similar but lower in the field. UNITED STATES OF AMERICA is in large letters (compared to the remainder of the lettering), with ONE DOLLAR at the bottom smaller, and IN GOD WE TRUST in similarly small letters in an inner arc above the eagle. Struck in copper with a reeded edge.

**Commentary.** The eagle has been moved down lower in the field and ONE DOLLAR is in smaller letters, making room for a second, inner arcing IN GOD WE TRUST below UNITED STATES OF AMERICA. Perhaps someone noticed that the Judd-1611 and -1612 pieces lacked any reference to trust in God?

**Physical Description.** The splendid surfaces of this wonderful Premium Gem coin display rich copper-orange coloration accented by tinges of blue. Dark flecks are minimal, and the eye appeal is generous. A total of 12 pieces are certified at NGC and PCGS combined. Although we have handled several examples of this copper pattern in the past, this is the first time we have ever offered one that exceeded the PR65 grade. In PR66 Red and Brown Cameo this is the single finest certified at NGC, although PCGS has graded a single PR67 Red and Brown example finer (9/08).

**Provenance.** *Ex: Greater New York Numismatic Convention Sale (Stack's, 4/1988), lot 1419.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#71992)

# Splendid 1879 Morgan Dollar in Copper Judd-1616, PR65 Red and Brown

1922 **1879 Morgan Dollar, Judd-1616, Pollock-1812, High R.6, PR65 Red and Brown NGC.**

**Design.** Like the silver/copper pairs immediately before it in the Judd reference, Judd-1611 and -1612 and Judd-1613 and -1614, Judd-1615 (silver) and -1616 (copper) are the regular-issue Morgan head silver dollar. The reverse is the William Barber Perched Eagle design, per Judd, with a perched eagle, wings down, holding a seven-leaved olive branch and three arrows that pass behind the right (facing) wing. UNITED STATES OF AMERICA and ONE DOLLAR encircle the rim, with the Latin motto in a small inner "arc" (slightly arcing; really almost a straight line) above the eagle. Struck in copper with a reeded edge.

**Commentary.** The USPatterns.com website maintains that these Morgan dollar "do-overs" were a reaction by designer George T. Morgan against the purported criticisms of the reverse eagle as "scrawny among other things." Among the comments leveled against it in 1878 upon the debut of the Morgan dollar was this one, as reprinted in the Bowers-Borckardt *Silver Dollar Encyclopedia*, originally published in the Cincinnati *Commercial:*

> "We can not say the art of it 'makes us feel to rejoice.' The eagle, we understand, was drawn by an Englishman. We should think so, too, from appearances. It doesn't seem to resemble the bird of our country. In fact, we are afraid the thing is a British grouse."
>
> Other comments described the eagle design as a "pelican-bat of the wilderness," a "turkey," a "sick bird," and a "hen."

**Physical Description.** A splendid Gem with much mint red still in evidence, and glorious orange-copper coloration throughout. Lighter glimpses of golden-yellow appear near the protected peripheral areas, and distracting carbon is essentially absent. A well-struck and thoroughly delightful specimen. The combined NGC/PCGS population totals 14 examples. In PR65 Red and Brown this piece is one of two so graded at NGC, with only one PR66 Red finer (9/08).

**Provenance.** *Ex: Fairfield (Bowers and Ruddy, 10/1977), lot 82, proof; Greater New York Numismatic Convention Sale (Stack's, 4/1988), lot 1420.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#71994)

Sharp 1879 Metric Dollar,
Judd-1617, PR64

# Sharp 1879 Metric Dollar, Judd-1617, PR64

1923 **1879 Metric Dollar, Judd-1617, Pollock-1813, R.4, PR64 NGC.**

**Design.** The Liberty Head design of William Barber (possibly executed by son Charles), similar to the 1877 fifty dollar half union patterns (Judd-1546), with head facing left, wearing a large coronet with LIBERTY inscribed thereon, hair flowing down the back of her neck. The Latin motto is above, with stars seven left and six right, with the date below. The reverse offers a wreath of cotton and wheat, with inner circle of dots enclosing 895.8 S. / 4.2—G. / 100—C. / 25 GRAMS. Despite the Judd misidentification as E PLURIBUS UNUM, the actual Latin motto present is DEO EST GLORIA ("God is glory/To God be the glory") in a cartouche, with UNITED STATES OF AMERICA and ONE DOLLAR at the rim. Purportedly struck in Hubbell's goloid composition with a reeded edge.

**Commentary.** On May 22, 1877, Dr. William Wheeler Hubbell patented in the U.S. Patent Office an alloy of metals that he termed "goloid," signifying a composition of one part of gold, 24 parts of silver, and 2.5 parts of copper—or, in integral terms, a 2:48:5 mix of gold:silver:copper. This works out to about 3.64% gold, 87.27% silver, and 9.09% copper. Adding the two precious-metal components together, one gets 90.91% gold and silver, and 9.09% alloy, in other words 10 parts of gold and silver and one part of alloy. According to Judd: "This was a mixture containing 90% gold and silver, each of these metals being of equal proportions from a value standpoint, to which coin 10% copper was added to strengthen the alloy. These pieces became known as goloid dollars or goloid metric dollars ... . Two such coins would contain a total worth of gold and worth of silver."

The ratios and proportions of the Hubbell patent and those purportedly contained in the various pattern coin proposals must not be taken too literally, for at least two reasons. First, one would do well to keep in mind that these are *patterns*, not adopted coins. It is unlikely that Mint personnel would actually attempt the novel chemistry required to produce such alloys for mere coinage proposals—and indeed, there is little to no solid metallurgical analysis to indicate that such were produced. Second, the terms "goloid" or "goloid metric," regardless of their original intended meanings, are widely used in Judd and other references to denote mixtures of gold and silver alloyed with copper, although the proportions of the precious metals (and therefore their values) vary widely.

Although NGC and PCGS have certified many dozens of Judd-1617 ("goloid") and Judd-1618 ("silver") pieces, USPatterns.com notes that "apparently none of these have ever been subjected to metallurgical analysis." The subtle difference between standard 90% coin silver and goloid composition can be conclusively shown neither by sight, nor sonority, nor specific gravity, but ultimately only by elemental analysis. Andrew W. Pollock III wisely lumps all of the Judd-1617 and Judd-1618 pieces together under his Pollock-1813 number, writing that "no attempt has been made to distinguish between the two different alloys."

**Physical Description.** This sharply struck near-Gem shows delightful silver-gold coloration with some minimal contact that prevents a higher grade, but the considerable eye appeal and wider availability of this pattern coinage makes the present specimen an ideal acquisition for the collector interesting in obtaining a sample pattern for a type set—or just a single prize from the Lemus Collection! Three-piece sets containing this "metric goloid" dollar, the Judd-1626 (an alternate goloid metric silver dollar design), and the Judd-1635 (1879 Flowing Hair stella) were sold, first to Congressmen for $6.10, then to collectors for $15, so most examples found are in grades of PR50 to PR60. This piece is one of nine graded PR64 at NGC, with seven coins finer at that service (9/08).

**Provenance.** *Ex: Lester Merkin Coins (6/1971), lot 894.*

# 1879 Metric Dollar in Copper, Judd-1619, PR64 Red Low R.7, Perhaps a Dozen Known

1924 **1879 Metric Dollar, Judd-1619, Pollock-1814, Low R.7, PR64 Red NGC.**

**Design.** The Liberty Head design of William Barber (possibly executed by son Charles), similar to the 1877 fifty dollar half union patterns (Judd-1546), with head facing left, wearing a large coronet with LIBERTY inscribed thereon, hair flowing down the back of her neck. The Latin motto is above, with stars seven left and six right, with the date below. The reverse offers a wreath of cotton and wheat, with inner circle of dots enclosing 895.8 S. / 4.2—G. / 100—C. / 25 GRAMS. Despite the Judd misidentification as E PLURIBUS UNUM, the actual Latin motto present is DEO EST GLORIA ("God is glory/To God be the glory") in a cartouche, with UNITED STATES OF AMERICA and ONE DOLLAR at the rim. Struck in copper with a reeded edge.

**Commentary.** Numerous coinage proposals from as early as 1868 for international coinage, the revaluing of circulating U.S. silver coinage to contain even metric weights in 1873, the introduction of the Morgan dollar in 1878, the various goloid metric pattern designs of 1878 and 1879, and the stella proposals of 1880 can all be laid at the feet of silver mining interests headed by Rep. Richard P. "Silver Dick" Bland, John A. Kasson, and William Darrah Kelley, according to Breen's *Complete Encyclopedia*. Concerning the "goloid metric" metallic composition proposed by Dr. William Wheeler Hubbell as an alternative to standard coin silver, Tom DeLorey has written that "the term 'metric alloy' refers to the awkward alloy necessary to make a coin of 25 grams, the weight of a French 5 francs, equal to a dollar in value, rather than an alloy that was 'metric' or base 10 in nature." The goloid composition proposal ultimately failed for the same reason that fusible alloy (1792) and billon (1836 and after) proposals had failed: They were indistinguishable on sight from less-expensive alloys, thus an invitation to counterfeiters, malefactors, shortchangers, miscreants, and ne'er-do-wells to produce lower-cost versions for circulation.

**Physical Description.** Glorious original mint red coloration is the hallmark of this near-Gem copper pattern, with shades of sunset-orange and peach-gold predominating on both sides. A small patch of hair-thin scrapes in the right obverse field, just behind Liberty's head, are undistracting but serve as pedigree markers. The sharp strike and generous eye appeal are bonuses. About a dozen examples of this issue are known, according to USPatterns.com. In the Red designation this piece is exceeded only by a single PR67 Red at NGC. The total NGC/PCGS certified population stands at an even dozen coins, including possible duplicates (9/08). **NGC Census:** 1 in PR64 Red, 1 finer. **PCGS Population:** 0 in PR64 Red, 2 finer with the Red designation (12/08).

**Provenance.** *Ex: D.E.A. and U.S. Marshals Service Sale (Heritage, 12/1988), lot 1898.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#81997)

High R.7 1879 Metric Dollar
in Aluminum
Judd-1624, PR63 Cameo,
Only Four Known

# High R.7 1879 Metric Dollar in Aluminum
# Judd-1624, PR63 Cameo, Only Four Known

1925 **1879 Metric Dollar, Judd-1624, Pollock-1820, High R.7, PR63 Cameo NGC.**

**Design.** The head of Liberty faces left in this design by George T. Morgan, with her hair done up in a bun and with a ribbon with incused LIBERTY. E PLURIBUS UNUM is above, with stars seven left and six right, date below. The reverse portrays a wreath of cotton and wheat, with inner circle of dots enclosing 895.8 S. / 4.2—G. / 100—C. / 25 GRAMS. DEO EST GLORIA ("God is glory/To God be the glory") appears (despite the Judd misdescription as E PLURIBUS UNUM) in the cartouche, with UNITED STATES OF AMERICA and ONE DOLLAR at the rim. Struck in aluminum with a reeded edge.

**Commentary.** At the time this pattern was struck, aluminum was considered more precious than gold. Although it is the most abundant metal found in the earth's crust, because of its extreme reactivity, elemental aluminum is rare, usually found instead in more than 270 different compounds. The Emperor Napoleon is said to have given a banquet at which only the most honored guests were given aluminum utensils; the others had to settle for gold. It was only in 1808 that Humphry Davy discovered the base metal we today call aluminum, and bars of aluminum were exhibited alongside the French crown jewels at the Paris Exposition Universelle of 1855. It was 1884 before the Hall-Héroult process for isolating aluminum from its ores made the element much more available than previously.

The present pattern struck in aluminum is thus quite rare, estimated at High R.7 in the Judd reference, with only four examples known. This design is struck in silver, copper, aluminum, and white metal, but only the single known white metal specimen, believed unique, exceeds the aluminum specimens in rarity.

**Physical Description.** The present specimen represents only the second time Heritage has had the pleasure to offer an example of this extreme rarity. The Philadelphia Mint, as this piece (and the other we offered in 2003) eloquently attests, had little experience at making aluminum planchets. Numerous planchet flaws, including some trapped air bubbles, laminations, and rim irregularities plague the present specimen, mostly on the obverse above Liberty's head. The reverse shows fewer distractions, although a small area of dark toning appears near the rim about 3:30. These planchet problems are minor in the overall scheme of things, however, in view of the elusiveness of this issue. There is sufficient field-contrast to merit the Cameo designation from NGC, and both sides nonetheless offer considerable eye appeal. The planchet problems merely add some piquancy, mute testimony to the Mint's fiddling with new metal technologies and design/coin concepts simultaneously. The Pollock pattern reference describes the Lemus Collection specimen presented here as weighing 97.2 grains, with a diameter of 1.408 in. and a 180-degree die alignment.

**Census and Provenance.** Only four examples are believed to exist, according to USPatterns.com from which the following census derives:

1. Dr. Edward Maris' Collection of American Coins (H.P. Smith, 6/1886), lot 222; Garrett II (Bowers and Ruddy, 3/80), lot 1060, where it realized $3,750; University Park Sale (Steve Ivy, 3/81), lot 1518, where it brought $2,100, Proof 65; St. Louis CSNS Signature Auction (Heritage, 5/2003), lot 7143, which realized $16,100. Reverse planchet flaw below 100. PR63 NGC.
2. King Farouk; Crouch (Superior, 6/1977), lot 546, which brought $600; Brazos (Steve Ivy, 10/1977), lot 1043, proof; Metropolitan Washington (Kagin's, 7/1979), lot 944, proof.
3. King Farouk; Palace Collections of Egypt (Sotheby's, 2/1954), lot 2000; Newport (Bowers and Ruddy, 1/1975), lot 1125, proof; Auction '84 (Superior, 7/1984), lot 499, proof. **The present specimen.**
4. Untraced specimen, perhaps duplicated above.

*From The Lemus Collection, Queller Family Collection Part Two.* (#62002)

# 1879 Goloid Metric Dollar, Judd-1626, PR64 Distributed With 1879 Flowing Hair Stellas

1926 **1879 Goloid Metric Dollar, Judd-1626, Pollock-1822, R.4, PR64 NGC.**

**Design.** The obverse design by William Barber was first employed on Judd-1563, an 1878 pattern goloid metric dollar. The head of Liberty faces left, with a broad band in her hair showing an incused LIBERTY, and stalks of wheat and cotton are behind. The stars are arranged seven left, six right, with date below and E PLURIBUS UNUM above. On the reverse a circle of 38 stars encloses 15.3—G. / 236.7—S. / 28—C. / 14 GRAMS. UNITED STATES OF AMERICA and 100 CENTS encircle the rim, while GOLOID METRIC DOLLAR is in an inner upper arc, and DEO EST GLORIA in an inner lower arc. Andrew Pollock III notes that "this reverse is one of only a few dies in the U.S. pattern series to express the denomination in two different ways." Purportedly struck in goloid composition with a reeded edge, although USPatterns.com notes that "it is unknown if any of these have undergone metallurgical testing."

**Commentary.** Although the Judd-1626 through -1630 issues are called "goloid metric dollars" in the Judd pattern reference, as are the Judd-1617 through -1621 issues, a little elementary math deduces that the proposed (or "purported" is perhaps a better word) alloys are far apart. The silver:gold:copper percentages touted on the Judd-1617 and similar pieces are 89.58%, 0.42%, and 10% respectively, while those percentages for the Judd-1626 series are 84.54%, 5.46%, and 10%. Both are "goloid" in the (loose) sense that they are an admixture of gold and silver, with 10% copper alloy, and both are "metric" in the sense Tom DeLorey defines it (under our Judd-1619 description), with an even weight in grams—but in the former series, the idea of equal values of gold and silver has been abandoned, while here the silver:gold ratio is 15.48:1, not far from the prevailing world standard for much of the 19th century.

Three-piece sets containing this "metric goloid" dollar, the Judd-1617 (an alternate goloid metric silver dollar design), and the Judd-1635 (1879 Flowing Hair stella) were sold, first to Congressmen for $6.10, then to collectors for $15. The *Harry W. Bass, Jr. Museum Sylloge* notes that "pieces were restruck in 1880 in usual silver alloy," implying they were first struck in goloid.

We believe the jury is still out on that point. We recently contacted pattern expert Saul Teichman of USPatterns.com (and the research associate credited in the ninth edition of Dr. Judd's reference), asking him if he had knowledge that any of the pieces in the three-piece sets (Judd-1617 [18], Judd-1626 [27], and Judd-1635) patterns were ever struck in anything other than traditional coinage alloys. His response was short and to the point: "I am unaware of anyone having tested any of the goloid silver pieces or stellas or quintuple stellas to determine if any were actually struck in goloid. I do not know how the grading services are making their determination."

**Physical Description.** The silvery surfaces (one supposes that "goloidy" is not quite so evocative) are tinged with gold patina on each side, more abundant near the rims. A few light hairlines appear in the fields, but fail to detract from the eye appeal of this sharply struck near-Gem. Since these pattern pieces were actually distributed along with the 1879 Flowing Hair stellas, they and their Judd-1617 counterparts are among the more commonly encountered goloid metric dollar patterns. **NGC Census:** 7 in PR64, 12 finer. **PCGS Population:** 10 PR64, 8 finer (12/08).

*From The Lemus Collection, Queller Family Collection Part Two.* (#62004)

# 1879 Goloid Metric Dollar, Judd-1628, PR63 Brown

1927 **1879 Goloid Metric Dollar, Judd-1628, Pollock-1824, Low R.7, PR63 Brown NGC.**

**Design.** The obverse design by William Barber was first employed on Judd-1563, an 1878 pattern goloid metric dollar. The head of Liberty faces left, with a broad band in her hair showing an incused LIBERTY, and stalks of wheat and cotton are behind. The stars are arranged seven left, six right, with date below and E PLURIBUS UNUM above. On the reverse a circle of 38 stars encloses 15.3—G. / 236.7—S. / 28—C. / 14 GRAMS. UNITED STATES OF AMERICA and ONE DOLLAR encircle the rim, while GOLOID METRIC DOLLAR is in an inner upper arc, and DEO EST GLORIA in an inner lower arc. Struck in copper with a reeded edge.

**Commentary.** This interesting composition shows a gold:silver ratio of about 1:15.5, which is the key idea behind William Wheeler Hubbell's original goloid metal patent—proportionally equal values of gold and silver in a coin, to which one-tenth of copper is alloyed.

**Physical Description.** Although technically certified as a Brown piece, considerable iridescent luster in shades of sage-green and reddish-pink appears on both sides of this Select proof. The strike is a bit soft on the hair over Liberty's ear, and a couple of undistracting carbon flecks on each side likely limit a finer grade, notably one at the B of PLURIBUS which serves as a pedigree identifier. A few even lighter flecks appear in the area around 28—C. and 14 GRAMS, worth mentioning only as identifiers. The USPatterns.com website estimates that about a dozen pieces are known. **NGC Census:** 1 in PR63 Brown, 7 finer. **PCGS Population:** None in PR63 Brown, 6 finer (12/08).

**Provenance.** *Ex: Stack's (6/1992), lot 634.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#62006)

# 1879 Flowing Hair Gold Stella, Judd-1635, PR61

1928 **1879 Flowing Hair, Judd-1635, Pollock-1833, R.3, PR61 NGC.**

**Design.** The Charles Barber design. On the obverse the head of Liberty, hair flowing down below her neck, faces left, with the inscription (each character separated by stars) 6 G .3 S .7 C 7 G R A M S around the rim. She wears a coronet bearing the word LIBERTY, and the date 1879 is below. On the reverse a five-pointed star occupies the center, bearing the legend ONE STELLA / 400 CENTS. In an inner circle are E PLURIBUS UNUM and DEO EST GLORIA ("God is glory"), with UNITED STATES OF AMERICA and FOUR DOL. around the outer rim. Struck in gold (standard alloy, despite the inscription) with a reeded edge.

**Commentary.** The 1879 Flowing Hair stella is not only the most popular and widely collected pattern issue—except possibly the 1856 Flying Eagle cent, with which it shares a sizeable number of similarities—but it also has assumed an iconic status among U.S. gold issues that borders on the legendary. Of the Top 250 Auction Prices as published in the 2009 *Guide Book*, stellas, including all four of the gold pattern types, established 17 of those records.

The story of the stellas makes the most sense when viewed in the greater context of the "goloid" (combinations of gold and silver, alloyed with copper) proposed metallic composition proposed by William Wheeler Hubbell and the "metric" proposals for coinage, those that incorporated even metric weights in grams with the value of international currencies such as the French five francs. As Bowers writes cogently in the *Harry W. Bass, Jr. Museum Sylloge:*

> "Many different dollar patterns were produced [in 1878], some in regular silver alloy (90% silver and 10% copper), and others in the special goloid metric alloy. The theory was that goloid, which contained a small part of gold added to silver and copper, would permit a coin of smaller weight and diameter while maintaining the same intrinsic value as a large coin in regular alloy (90% silver and 10% copper). However, the idea failed as only sophisticated elemental analysis could differentiate the goloid alloy in struck coins, and counterfeiters could make such pieces in cheaper silver alloy and few would know the difference."

One could well call the stellas "goloid gold four dollars" to accompany the "goloid silver one dollars"; in terms of their proposed (or purported) chemical composition, they are the converse of the silver pieces. The goloid metric dollars continued to be struck in many different designs in 1879, and the Judd-1617 and Judd-1626—two different goloid metric silver dollar designs—were distributed in three-piece sets to Congressmen along with the 1879 Flowing Hair stella. The story goes that perhaps 25 "originals" of each were struck for distribution, and that they proved so popular that perhaps 400 more sets were restruck in the following year. The numismatic literature for decades has maintained that the originals lack striations on the portrait of Liberty or the central reverse, while the restrikes show such striation. But as time goes by and no pieces appear to lack the striations, many numismatists have concluded that neither were the pattern gold pieces produced in that odd metric alloy, but rather they were struck on regular .900 fine planchets rolled out to 80% of the thickness of a half eagle— making a four dollar piece and accounting for the roller marks or die striations seen on all known gold pieces.

**Physical Description.** A few light contact marks, mostly on the small side and visible only with a loupe, fail to diminish the significant appeal of this legendary rarity. There are some light field hairlines. The two mentionable marks are a straight scrape through Liberty's hair and cheek, ending below the eye, with a second smaller intersecting scrape. Both sides are pretty canary-yellow, with good reflectivity in the fields and moderate mint frost remaining on the devices. As expected, this piece shows the light striations through Liberty's upper brow and the hair under the coronet that we believe exist on all pieces. **NGC Census:** 5 in PR61, 177 finer including Cameo designated coins. **PCGS Population:** 17 in PR61, 252 finer including Cameo and Deep Cameo designated pieces (12/08).

**Provenance.** *Unknown.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#8057)

# 1879 Flowing Hair Four Dollar, Judd-1636, PR63 Brown
# Large Head Design, Struck in Copper

1929 **1879 Flowing Hair Four Dollar, Judd-1636, Pollock-1834, Low R.7, PR63 Brown NGC.**

**Design.** Large Head. The Charles Barber design. On the obverse the head of Liberty, hair flowing down below her neck, faces left, with the inscription (each character separated by stars) 6 G .3 S .7 C 7 G R A M S around the rim. She wears a coronet bearing the word LIBERTY, and the date 1879 is below. On the reverse a five-pointed star occupies the center, bearing the legend ONE STELLA / 400 CENTS. In an inner circle are E PLURIBUS UNUM and DEO EST GLORIA ("God is glory"), with UNITED STATES OF AMERICA and FOUR DOL. around the outer rim. Struck in copper with a reeded edge.

**Commentary.** This is the same obverse design as on the famous gold 1879 Flowing Hair stellas—but we must qualify that this is the Large Head design. According to USPatterns.com, "A second obverse die is known by a single example in copper whose pedigree dates back to the 1906 H.P. Smith sale lot 1447. It has since been gilted." The ninth edition of Judd lists the variant as Judd-1636a, although USPatterns.com still identifies it (after Pollock) as Judd-1636, Pollock-1837. USPatterns.com notes that its photos of the two pieces side by side are from the Superior Rio Rancho Estate sale (10/1974), where both were sold.

Terminology aside, the variants are easily distinguished: The Large Head pieces (Judd-1635 to 1637) show the sharp bust truncation pointing to the first star, while the Small Head variant (Judd-1636a) points to the tip of the 1 in the date. The Large Head coronet tip touches a star at the front of Liberty's forehead, while the Small Head touches (or nearly so) the 7 to the left of that star. The Rio Rancho auction made no note of the unique design, merely identifying the piece as a gilt copper "Judd-1636, Liberty head left, diademed," and it sold for $5,000 against a $5,000 estimate.

**Physical Description.** The protected areas around the legends are muted orange-red, but the open fields are darker bluish-purple on the obverse. The reverse is a deeper bluish-purple throughout, with tinges of jade. A few darker flecks appear on the obverse under a loupe. **NGC Census:** 1 in PR63 Brown, 2 finer. **PCGS Population:** None in PR63 Brown, 1 finer (12/08).

**Provenance.** *Ex: Stack's private treaty.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#62014)

1879 Coiled Hair Stella
Struck in Aluminum
Judd-1640, PR66 Cameo,
Perhaps Five Known

# 1879 Coiled Hair Stella Struck in Aluminum
# Judd-1640, PR66 Cameo, Perhaps Five Known

1930 **1879 Coiled Hair Four Dollar, Judd-1640, Pollock-1840, High R.7, PR66 Cameo NGC.**

**Design.** The reverse and the obverse periphery are the same as the Judd-1635 through 1637 stellas, but the center obverse features the George T. Morgan Coiled Hair design. Liberty's hair is braided, and a hair band in front reads LIBERTY. Struck in aluminum with a reeded edge.

**Commentary.** Until the late 1880s and early 1890s when a new chemical isolation process was discovered, aluminum was considered among the most precious of metals, far rarer and much more coveted than gold. It is difficult today to find adequate words to express how elusive pure aluminum was at the time this coin was struck. We have mentioned elsewhere in this catalog the story of how when the Emperor Napoleon served an imperial dinner of elaborate scale, he reserved the aluminum tableware for the most revered guests, reserving the gold service for those of lower estate. Until the early 1880s, aluminum was sold in troy-ounce quantities, and domestic yearly production was in the range of 1,000 to 3,000 troy ounces, according to the U.S. Geological Survey.

**Physical Description.** The purity of the aluminum provides a radiant backdrop for splendid, intense field-device contrast recognized by NGC. The fields are quicksilver and brightly mirrored, while arctic mint frost cleanly covers both the central devices and the peripheral legends. Light striations are seen through the central star on the reverse, but none appear on the obverse. Some minor planchet roughness is to be expected, due to the Mint's unfamiliarity with what amounted to, at the time, an experimental (and quite valuable) metal. NGC has certified a single piece each in PR66 Cameo (the present example) and PR67 Cameo (9/08).

**Census and Provenance.** There appear to be five separate specimens that we can enumerate:

1. Public Auction Sale (Lester Merkin, 9/1967), lot 407; Rio Rancho (Superior, 10/1974), lot 136; 1979 ANA Sale (New England Rare Coin Auctions, 7/1979), lot 1358; Pittsburgh Elite Coin Auction (Superior, 8/2004), lot 893, realized $89,125. Not gilt.
2. Rare Coin list #10 (Paramount, 6/1975); Dallas Bank Collection (Sotheby's/Stack's, 10/2001), lot 369. Not gilt.
3. Edward Maris Collection (H.P. Smith, 6/1886), lot 221; Garrett Collection (Stack's, 3/1976), lot 668; Harry Bass; Harry Bass Research Foundation. Not gilt.
4. Auction '80 (RARCOA, 8/1980), lot 1946; Auction '83 (RARCOA, 7/1983), lot 1410. Gilt.
5. CSNS (RARCOA, 5/1971), lot 397; Winter ANA (Steve Ivy, 2/1983), lot 1791; 1988 ANA (Heritage, 7/1988), lot 2759. **The present coin.** Not gilt.

**Other Appearances.** These appearances likely represent duplications of the above coins, although tracing complete pedigrees from the early years is today impossible:

A. 1914 ANS Exhibit (Woodin), later sold to Newcomer; an example in the Virgil Brand Collection, bought as part of a complete set of stellas from Edgar H. Adams in 1911.
B. Another example in the Brand holdings, this one from a complete set purchased from F.C.C. Boyd in 1921.
C. King Farouk; Palace Collections of Egypt (Sotheby's, 2/1954), lot 1995, purchased at the sale by James P. Randall.
D. King Farouk; Palace Collections of Egypt (Sotheby's, 2/1954), lot 2024, also purchased by Randall.

*From The Lemus Collection, Queller Family Collection Part Two.* (#62018)

1880 Metric Dollar, Judd-1645, PR66 Cameo
Tied for Finest Certified
Ex: Woodin, Judd

1931 **1880 Metric Dollar, Judd-1645, Pollock-1845, High R.6, PR66 Cameo NGC.**

**Design.** The William Barber design, adapted by his son Charles Barber from the unique 1877 gold "half union" (Judd-1546) that resides in the Smithsonian and some later patterns, notably the Judd-1617 1879 goloid metric dollar, with which the present pattern shares a reverse. On the obverse the head of Liberty faces left, wearing a broad coronet inscribed LIBERTY. Beads decorate the top border of the coronet, and Liberty's hair is thick and wavy. Thirteen stars encircle the rim, with the motto above and date below the portrait. The reverse offers a wreath of cotton and wheat, with inner circle of dots enclosing 895.8 S. / 4.2—G. / 100—C. / 25 GRAMS. Despite the (persistent, in the ninth edition) Judd misidentification as E PLURIBUS UNUM, the actual Latin motto present is DEO EST GLORIA ("God is glory/To God be the glory") in a cartouche, with UNITED STATES OF AMERICA and ONE DOLLAR at the rim. Purportedly struck in Hubbell's goloid composition with a reeded edge.

**Commentary.** As noted elsewhere, we believe that the actual metallic composition of all of these purportedly goloid pieces is none other than standard silver alloy, 90% silver and 10% copper. To our knowledge, no metallurgical evidence suggests otherwise.

The High R.6 rarity rating makes this pattern, while nonetheless rare, among the more available of the goloid metric designs. USPatterns.com (which calls it bluntly "silver") estimates that more than a dozen pieces are known. The Charles Barber goloid and metric dollar conceptions of 1880 also include the Judd-1651 and the Judd-1657 (1880 Flowing Hair stella).

The Stack's cataloger, writing of the present coin in 1986, said, "The present specimen is the plate coin in Judd [seventh edition—1982], the plate coin in Taxay, and the plate coin in Adams & Woodin. Most of the plates in A&W were of Woodin's coins (and Woodin did have a specimen of J.1645 in the ANS Exhibition, 1914), so this specimen is almost certainly ex Woodin. Judd did have a specimen of J.1645. We strongly suspect that this is his own specimen. An exciting opportunity to acquire a true piece of numismatic history."

The coin illustrated in the Stack's catalog is a dead match for this coin, providing an important provenance that attaches to the present lot. With a pedigree that attaches to three of the most important names in the entire field of U.S. pattern collecting, the importance of the present lot cannot be overemphasized.

**Physical Description.** Generous dollops of silver-gold evenly cover both sides, with remarkable field-device contrast present throughout. The golden hues deepen near the rims into cinnamon and russet. Thick mint frost coats the devices, complementing well-mirrored surfaces. A small patch of hazy ice-blue beneath Liberty's chin serves as a pedigree marker, along with a thin, curved lintmark in the obverse field between star 5 and the nose. Remarkably attractive. This piece is the only Cameo certified at NGC, and it is tied numerically for finest certified with a PR66 PCGS coin (10/08).

**Provenance.** *Ex: William H. Woodin; Dr. J. Hewitt Judd; Stack's (10/1986), lot 108, $5,940.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#62030)

# 1880 Metric Dollar, Judd-1646, PR65 Brown

1932 **1880 Metric Dollar, Judd-1646, Pollock-1846, Low R.6, PR65 Brown NGC.**

**Design.** On the obverse the head of Liberty faces left, wearing a broad coronet inscribed LIBERTY. Beads decorate the top border of the coronet, and Liberty's hair is thick and wavy. Thirteen stars encircle the rim, with the motto above and date below the portrait. The reverse offers a wreath of cotton and wheat, with inner circle of dots enclosing 895.8 S. / 4.2—G. / 100—C. / 25 GRAMS. Despite the Judd misidentification as E PLURIBUS UNUM, the actual Latin motto present is DEO EST GLORIA ("God is glory/To God be the glory") in a cartouche, with UNITED STATES OF AMERICA and ONE DOLLAR at the rim. Struck in copper with a reeded edge.

**Commentary.** One of the most available of the 1880 goloid metric patterns, while still rare by any conceivable U.S. coin standard. Although USPatterns.com lists the copper Judd-1646 as rarer than the "goloid" Judd-1645, empirical evidence and the Judd ninth edition suggest that the Judd-1646 is more "common," with perhaps two dozen survivors extant. This concords with the NGC/PCGS population data that show 26 survivors at both services combined (less duplicates, as always).

**Physical Description.** Medium copper-orange coloration predominates, with glimpses of forest-green near the rims. Generous eye appeal is present throughout. A small dark toning spot between stars 6 and 7 serves as a pedigree marker. Sharply struck and pleasing. **NGC Census:** 2 in PR65 Brown, 3 finer. **PCGS Population:** 1 in PR65 Brown, 9 finer (12/08).

**Provenance.** *Ex: Gaston DiBello Collection (Stack's, 5/1970), lot 447; Crouch (Superior, 6/1977), lot 558; Auction '85 (Superior, 7/1985), lot 846.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#62031)

## Attractive 1880 Metric Dollar, Judd-1648, PR63
## One of Eight Pieces Certified in All Grades

1933 **1880 Metric Dollar, Judd-1648, Pollock-1848, Low R.7, PR63 NGC.**

**Design.** George T. Morgan's Liberty Head design as also on Judd-1622. Liberty's hair is done up in a bun, with a ribbon inscribed LIBERTY in incuse letters, the Latin motto above, stars seven left, six right. The reverse offers a wreath of cotton and wheat, with inner circle of dots enclosing 895.8 S. / 4.2—G. / 100—C. / 25 GRAMS. DEO EST GLORIA ("God is glory/To God be the glory") appears in a cartouche, with UNITED STATES OF AMERICA and ONE DOLLAR at the rim. Purportedly struck in goloid with a reeded edge.

**Commentary.** Likely struck in standard coin-silver alloy, 90% silver/10% copper.

**Physical Description.** Gold-tinged rims complement silver-gray centers, with a sharp strike and excellent eye appeal. The moderate field hairlines likely account for the grade, but at first glance the piece nonetheless appears considerably nicer than the Select proof grade. In PR63 this piece is tied for finest at NGC with one other piece, and there are only three certified in total at that service (10/08). There are five certified at PCGS, the finest of them a single PR65.

**Provenance.** *Unknown.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#62033)

# Wonderful 1880 Metric Dollar in Copper
# Judd-1649, PR67 Red and Brown

1934 **1880 Metric Dollar, Judd-1649, Pollock-1849, Low R.7, PR67 Red and Brown NGC.**

**Design.** George T. Morgan's Liberty Head design as also on Judd-1622. Liberty's hair is done up in a bun, with a ribbon inscribed LIBERTY in incuse letters, the Latin motto above, stars seven left, six right. The reverse offers a wreath of cotton and wheat, with inner circle of dots enclosing 895.8 S. / 4.2—G. / 100—C. / 25 GRAMS. DEO EST GLORIA ("God is glory/ To God be the glory") appears in a cartouche, with UNITED STATES OF AMERICA and ONE DOLLAR at the rim. Struck in copper with a reeded edge.

**Commentary.** The Judd ninth edition ranks both the goloid Judd-1648 and the copper Judd-1649 as Low R.7, and there are currently eight examples of each certified at NGC and PCGS combined (10/08). But this copper piece in PR67 Red and Brown is numerically the single finest certified of not only the Judd-1649, but also the Judd-1648s which typically are in somewhat lower grades.

**Physical Description.** A wonderful coin, with typical blue patina in the fields and a considerable remaining presence of original red luster surrounding the devices, all of which is indicative of original copper coinage left undisturbed for more than a century. The strike and subsequent preservation are nonetheless remarkable, and this piece appears easily to justify its Superb Gem ranking. Among the most eye-appealing pieces in the entire Lemus Collection (and that is saying quite a lot). A single tiny mark on the lower jawline provides a pedigree marker, but overall the surfaces are remarkably clean.

**Provenance.** *Ex: 70th Anniversary Sale (Stack's, 10/2005), lot 1385.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#72034)

## Pleasing 1880 Goloid Metric Dollar, Judd-1654, PR66 Tied for Finest Certified

1935 **1880 Goloid Metric Dollar, Judd-1654, Pollock-1854, Low R.7, PR66 NGC.**

**Design.** Obverse the Coiled Hair design of George T. Morgan, with Liberty's hair tightly braided and coiled at the back of her head. E PLURIBUS UNUM is above, with stars seven left, six right, and date below. Reverse UNITED STATES OF AMERICA and 100 CENTS around the outer periphery, with GOLOID METRIC DOLLAR and DEO EST GLORIA in an inner circle. A circle of stars is further inward, with 15.3—G. / 236.7—S. / 28—C. / 14 GRAMS in the center. Purportedly struck in "goloid" composition with a reeded edge.

**Commentary.** While both the Judd-1654 through Judd-1656 and the Judd-1651 through Judd-1653 designs for goloid metric dollars are attributed to George T. Morgan, the Coiled Hair designs are markedly superior in both aesthetics and execution to the so-called Phrygian Cap designs.

**Physical Description.** The centers are silver-gold and only moderately patinated, color that quickly deepens toward the rims into iridescent amber-gold, burnt orange, and steel-blue. A sharply struck and pleasing Premium Gem proof, with splendid eye appeal. This piece is one of two PR66 examples certified at NGC; the finest at PCGS are three PR65 specimens (10/08).

**Provenance.** *Ex: Stack's private treaty.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#62039)

## Sharp 1880 Goloid Metric Dollar Judd-1655, PR65 Red and Brown

1936 **1880 Goloid Metric Dollar, Judd-1655, Pollock-1855, Low R.7, PR65 Red and Brown NGC.**

**Design.** Obverse the Coiled Hair design of George T. Morgan, with Liberty's hair tightly braided and coiled at the back of her head. E PLURIBUS UNUM is above, with stars seven left, six right, and date below. Reverse UNITED STATES OF AMERICA and 100 CENTS around the outer periphery, with GOLOID METRIC DOLLAR and DEO EST GLORIA in an inner circle. A circle of stars is further inward, with 15.3—G. / 236.7—S. / 28—C. / 14 GRAMS in the center. Struck in copper with a reeded edge.

**Commentary.** Both George T. Morgan and William Barber produced two proposals each for goloid metric dollars in 1879, the 1880 pieces rehashing the 1879 designs with a different date. The goloid metric dollar proposals, like the stellas, were a way to find increased uses for silver and to produce an international coinage, although it is likely—in fact, it is probable—that no pieces were actually produced in anything but standard gold and silver alloys.

**Physical Description.** The surfaces are predominantly brick-red, with faint traces of pale blue in the fields. A few light carbon flecks—including one at the obverse denticles between stars 2 and 3 that serves as a pedigree identifier—nonetheless do little to dampen the considerable appeal of this well struck example of an interesting design. **NGC Census:** 1 in PR65 Red and Brown, 2 finer. **PCGS Population:** 1 in PR65 Red and Brown, 1 finer (12/08).

**Provenance.** *Ex: Stack's (3/1992), lot 1723.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#72040)

1880 Nongilt Flowing Hair Stella in Copper, Judd-1658
PR66 Red and Brown, Finest Certified
One of the Few Nongilt Examples Known

1937 **1880 Flowing Hair Four Dollar, Judd-1658, Pollock-1858, Low R.7, PR66 Red and Brown NGC.**

**Design.** The Charles Barber design. On the obverse the head of Liberty, hair flowing down below her neck, faces left, with the inscription (each character separated by stars) 6 G .3 S .7 C 7 G R A M S around the rim. She wears a coronet bearing the word LIBERTY in her hair, and the date 1880 is below. On the reverse (common to all 1879 and 1880 stellas) a five-pointed star occupies the center, bearing the legend ONE STELLA / 400 CENTS. In an inner circle are E PLURIBUS UNUM and DEO EST GLORIA ("God is glory"), with UNITED STATES OF AMERICA and FOUR DOL. around the outer rim. Struck in copper with a reeded edge. When one compares the obverse of the 1880 Flowing Hair stellas against the 1879 obverse, one notes that the date is markedly smaller and shifted, nearly touching the lowest hair curls and well separated from the denticles on the 1880 pieces, while the 1879s show a larger date, centered under the truncation, close to the denticles and the hair.

**Commentary.** Harry W. Bass, Jr. is a name synonymous with gold coins of the finest stripe—so much so that it is sometimes forgotten that he was also a connoisseur of many other types of coinage and currency, not the least of which was a fine collection of U.S. pattern coinage. The Harry Bass, Jr. Core Collection contains several examples of the 1879 and 1880 stellas, in gold and aluminum. The useful *Harry W. Bass, Jr. Museum Sylloge,* written by Q. David Bowers, contains much valuable (and some just plain interesting) information on patterns. One section, "Personalities in the Field of Patterns," has the following to say concerning Dr. J. Hewitt Judd, whom they style as a "collector, writer about patterns 1940s-1950s":

> "Dr. Judd, whose name appeared on *United States Pattern, Trial, and Experimental Pieces,* copyrighted in 1959 but distributed in 1961 by Whitman Publishing Company, was a medical doctor in Omaha, Nebraska. Judd enjoyed coins immensely and collected patterns extensively, but to say he was a dedicated scholar would not be correct. Rather, he appreciated pieces for their beauty. Abe Kosoff urged him to finance the research for a reference work, and eventually a book was published under Dr. Judd's name. However, nearly all of the information in the first edition came either from the 1913 Adams-Woodin text on the subject or from Walter H. Breen, who did much research in the National Archives. Relatively little work was done by Dr. Judd himself, although his contribution was valuable if for no other reason than he served as a clearing house for what others did."

Although his "book" has now been through nine editions as of this writing, the U.S. pattern coin series continues to be attributed by "Judd numbers."

**Physical Description.** Extremely rare as a nongilt copper example of the 1880 Flowing Hair stella. (The Low R.7 rating in Judd is based on gilt and nongilt examples combined.) Softly glowing red-orange covers most of the obverse, along with a generous dollop of forest-green immediately above Liberty's head. The reverse offers a similar palette, with deeper purple replacing the orange. Both the 1880 Flowing Hair and Coiled Hair stellas are extremely rare *regardless* of which metal they are struck in. Most examples of the Judd-1658 are gilt—NGC has certified eight in all grades. In PR66 Red and Brown this nongilt piece is the only example certified at NGC, and there are only one PR64 Red and one PR64 Red and Brown at PCGS (10/08). The finest gilt piece is a single PR65 NGC example. The finest certified, and a significant opportunity.

**Provenance.** *Unknown.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#72043)

# 1880 Gilt Aluminum Flowing Hair Stella
## Judd-1659, PR65
## High R.7, Five or Six Known

1938 **1880 Flowing Hair Four Dollar, Judd-1659, Pollock-1859, High R.7, PR65 NGC.**

**Design.** The Charles Barber design. On the obverse the head of Liberty, hair flowing down below her neck, faces left, with the inscription (each character separated by stars) 6 G .3 S .7 C 7 G R A M S around the rim. She wears a coronet bearing the word LIBERTY in her hair, and the date 1880 is below. On the reverse a five-pointed star occupies the center, bearing the legend ONE STELLA / 400 CENTS. In an inner circle are E PLURIBUS UNUM and DEO EST GLORIA ("God is glory"), with UNITED STATES OF AMERICA and FOUR DOL. around the outer rim. Struck in aluminum, gilt, with a reeded edge. When one compares the obverse of the 1880 Flowing Hair stellas against the 1879 obverse, one notes that the date is markedly smaller and shifted, nearly touching the lowest hair curls and well separated from the denticles on the 1880 pieces, while the 1879s show a larger date, centered under the truncation, close to the denticles and the hair.

**Commentary. Symbology: The Five-Pointed Star.** The five-pointed star is an ancient symbol, but one that even today finds many uses. The regular five-pointed star with 36-degree angles at each point is sometimes called the golden five-pointed star, and if its colinear sides are joined, it forms a pentagram.

Many different types of fraternal and religious organizations use or incorporate the symbol in their logos and marks, including the Druze, the Ottoman Empire, the Bahá'í faith, and the Order of the Eastern Star. Esperanto, the "universal" language, adopts a green five-pointed star as its symbol.

For the vexillologists who may be reading this catalog, the symbol is used on the flags of many nations, including Pakistan, Chile, New Zealand, Morocco, Ethiopia, China, the European Union, the Philippines, Singapore, Turkey, the United States of America, Somalia, Bosnia and Herzegovina, North Korea, Vietnam, Panama, Grenada, the Solomon Islands, Algeria, and Australia.

The stella was born both to promote international uses of silver and to function as a universal circulating currency for Europe. Its fatal flaw, however, was that its value fluctuated against the major European currencies, as today. It is ironic that the stella is a four dollar coin with a five-pointed star, incorporating six grams of gold and a seventh of silver and copper, to produce an international trade coin—one not quite equal to eight florins, the denominations prevailing in Austria and the Netherlands.

**Physical Description.** The gilding on this piece was done at the Mint, and it was expertly done. Beautifully consistent honey-gold coloration appears throughout, with premium eye appeal. A few light planchet striations appear on Liberty's brow and the hair just above. Under a loupe some tiny die "lumps" appear in the fields as well, an indication of the Mint's unfamiliarity with handling aluminum, still an experimental and quite precious metal at the time these pieces were struck. A sharp wire rim appears on the obverse from 10 to 3 o'clock and on the reverse from 7 to 1 o'clock, an excellent pedigree marker. There are also two marks near the reverse rim—one below the D in DOLLAR at 5:30, and another small mark between the TE of STATES—that also provide pedigree markers.

**Census and Provenance.** This appears to be only the second time Heritage has had the privilege of offering this rare pattern stella since we began maintaining our auction records. The present piece is gilt aluminum, however, while the last offering was not gilt. We are able to enumerate the following distinct pieces, but a couple of others could possibly exist.

1. FUN Signature Auction (Heritage, 1/2007), lot 1600. PR64 Cameo PCGS. Not gilt.
2. Paramount (Rare Coin List #10, 6/1975); Jeff Browning Collection (Sotheby's and Stack's, 10/2001), lot 370. Not gilt, Gem proof.
3. Garrett Collection (Stack's, 3/1976); Harry W. Bass, Jr. Collection (Bowers and Merena, 5/1999), lot 1348. PR67 PCGS. Not gilt.
4. Rio Rancho Estate (Superior, 10/1974), lot 138, "Brilliant Uncirculated," gilt aluminum.
5. **The present specimen.** Auction '89 (Superior, 7/1989), lot 874; Stack's (9/2003), lot 704. While this piece is also gilt, plate-matching reveals that it is definitely not the Rio Rancho specimen above.

**Other Appearances.** It is quite likely that some, and perhaps most, of these other appearances cited in the literature actually represent duplications of the coins above. They include:

A. Two pieces owned by Virgil Brand.
B. Two owned by King Farouk.
C. The William H. Woodin-1914 ANS Exhibit-Waldo Newcomer coin.
D. A piece Pollock cites in a 1963 Abe Kosoff sale.

*From The Lemus Collection, Queller Family Collection Part Two.* (#62044)

# 1880 Coiled Hair Stella Struck in Copper
# Judd-1661, PR64 Red and Brown
# One of Three Copper Examples Certified

1939 **1880 Coiled Hair Four Dollar, Judd-1661, Pollock-1861, Low R.7, PR64 Red and Brown NGC.**

**Design.** The reverse and the obverse periphery are the same as Flowing Hair stellas as struck in the various metals, but the center obverse features the George T. Morgan Coiled Hair design. Liberty's hair is braided, and a hair band in front reads LIBERTY. The inscription (each character separated by stars) 6 G .3 S .7 C 7 G R A M S runs around the obverse rim. On the reverse a five-pointed star occupies the center, bearing the legend ONE STELLA / 400 CENTS. In an inner circle are E PLURIBUS UNUM and DEO EST GLORIA ("God is glory"), with UNITED STATES OF AMERICA and FOUR DOL. around the outer rim. Struck in copper with a reeded edge.

**Commentary.** While the 1879 Flowing Hair stellas in gold are frequently seen in the numismatic marketplace, the 1880 designs, both Flowing Hair and Coiled Hair, are extremely rare regardless of the metal composition, be it gold, aluminum, or copper. Since the 1880 Coiled Hair design in gold is one of the most revered and coveted designs in all of U.S. numismatics, the 1880 Coiled Hair patterns struck in copper—while equally rare—provide another venue for collectors to obtain an example of the design. Many of the copper examples have been gilt, making this nongilt specimen all the more desirable. About a dozen examples are purported to exist, according to USPatterns.com.

Interestingly, while the 1880 Flowing Hair stellas show a date that is small, shifted right near the tresses, and distant from the denticles, the date on the 1880 Coiled Hair types is large and well-centered between the peripheral legends, the denticles, and the bust truncation, providing yet another point of contrast among these interesting designs.

**Physical Description.** Tinges of purple, pink, and blue iridescence emanate throughout both sides, with much luster clinging to the surfaces and only a few light flecks appearing under a loupe. A small spot directly atop the T and one through the left side of the S in TES will serve as pedigree markers, with a few others sprinkled around the date, the portrait, and the left obverse field. There are scant visible signs of contact, and generous eye appeal is the chief attribute of both sides of this extremely rare and popular coin. There are two Brown coins certified at NGC—one each in PR65 Brown and PR67 Brown Cameo—but this PR64 is the only Red and Brown at NGC. There are none certified at PCGS (10/08). This wonderful coin represents what may be some fortunate collector's last, best chance to acquire an example for many years to come.

**Provenance.** *Ex: Stack's private treaty.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#72046)

## 1881 Liberty Head One Cent, Judd-1665, PR64 Cameo

1940 **1881 Liberty Head One Cent, Judd-1665, Pollock-1865, High R.6, PR64 Cameo NGC.**

**Design.** The Charles Barber Liberty Head obverse, featuring a head facing left, somewhat similar to the adopted Liberty Head nickel design, but UNITED STATES OF AMERICA rings the obverse in somewhat thick, widely spaced letters, and the bust seems a bit more massive. On the reverse a Roman numeral I is flanked by an agricultural wreath, again similar to the 1883 regular-issue nickel design. Struck in nickel with a plain edge.

**Commentary.** The focus shifts for 1881 patterns from the large denominations of the past few years to the smaller one, three, and five cent denominations. Some numismatic commentators have alleged that the Barber Liberty Head is a portrait of the Greek goddess Diana—but like so many "coin tales," the factual basis, if any, is shrouded in the mists of time.

**Physical Description.** This pleasing piece offers a sharp strike and considerable field-device contrast over grayish-gold surfaces with just a few tiny flecks of deeper color. **NGC Census:** 1 in PR64 Cameo, 1 finer. **PCGS Population:** 1 in PR64 Cameo, none finer (12/08).

**Provenance.** *Ex: Stack's private treaty.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#62061)

## Sharp 1881 Liberty Head Three Cent Judd-1668, PR64

1941 **1881 Liberty Head Three Cents, Judd-1668, Pollock-1869, High R.6, PR64 NGC.**

**Design.** The Charles Barber Liberty Head obverse. Head facing left, similar to the adopted Liberty Head nickel design, but UNITED STATES OF AMERICA rings the obverse in thick, widely spaced letters, with date 1881 below. On the reverse a Roman numeral III is flanked by an agricultural wreath, again similar to the 1883 regular-issue nickel design. Struck in nickel with a plain edge.

**Commentary.** As the Judd ninth edition editors note, it is possible to obtain a complete type set of 1881 patterns, all featuring the common theme of the Barber Liberty Head obverse and a reverse with wreath enclosing the numerator in Roman numerals—"although some patience is required."

**Physical Description.** The powder-gray surfaces offer bold eye appeal, a function equally of the absence of marks and bold strike that immediately suggest a conservative grade for this nice example. Somewhat less than two dozen examples of this pattern issue are certified at NGC and PCGS combined, a few of them likely duplicates. **NGC Census:** 1 in PR64, 3 finer. **PCGS Population:** 2 in PR64, 4 finer (12/08).

**Provenance.** *Unknown.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#62064)

## 1882 Liberty Head Nickel Pattern
## Judd-1684, Proof

1942 **1882 Liberty Head Five Cents, Judd-1684, Pollock-1886, Low R.6—Obverse Spot Removed—NCS. Proof.**

**Design.** The central obverse is that of the regular issue Liberty nickel, with the legend UNITED STATES OF AMERICA around and the date below. The reverse depicts a large Roman numeral V within a wreath of corn and cotton with E PLURIBUS UNUM at the top. Struck in nickel with a plain edge.

**Commentary.** The year 1882 was a replay of 1866, with nickel patterns being the order of the day. Charles Barber introduced his Liberty head on a limited number of patterns in the previous year, including cent, three-cent, and five-cent patterns. In 1882 his design appeared on numerous pattern nickels with a variety of obverse and reverse design variations. The same obverse device remained in use for several patterns in 1883.

**Physical Description.** This pattern is a stunning Cameo proof with bold design details and brilliant nickel-gray surfaces. Only the removal of a tiny spot on Liberty's cheek keeps this piece from a high numerical grade.

**Provenance.** *Ex: Stack's (3/1973), lot 442.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#62089)

## Beautiful 1882 Liberty Head Five Cent
## Judd-1690, PR65

1943 **1882 Liberty Head Five Cents, Judd-1690, Pollock-1892, R.5, PR65 NGC.**

**Design.** The Charles Barber Liberty Head obverse, here in a so-called "transitional" design, nearly the regular issue but dated 1882. Head facing left, similar to the adopted Liberty Head nickel design, but there are slight differences in the position of the stars. The date is below. The reverse is the same as the infamous 1883 NO CENTS reverse: A Roman numeral V is flanked by an agricultural wreath, with UNITED STATES OF AMERICA circling the rim and E PLURIBUS UNUM below. Struck in nickel with a plain edge.

**Commentary.** The transitional patterns such as the Judd-1690 1882 Liberty Head nickel and the Judd-232 1859 half dime are doubly popular, as they are collected both by pattern collectors and by collectors of the regular-series issues and varieties who desire "something special" but might not otherwise dream of collecting patterns in general. With several dozen examples available in the numismatic marketplace, this pattern also has wider availability than most other issues.

**Physical Description.** A beautiful Gem example, with a sharp strike characteristic of the regular-issue proofs, essentially free of distractions and with gray and champagne hues throughout. A tiny dark spot near the bottom of the 2 in the date provides pedigree identification but is otherwise completely undisturbing. **NGC Census:** 5 in PR65, 4 finer. **PCGS Population:** 6 in PR65, 10 finer (12/08).

**Provenance.** *Ex: Stack's private treaty (9/1985).*
*From The Lemus Collection, Queller Family Collection Part Two.* (#62095)

## Transitional 1882 Liberty Head Five Cent Copper
## Judd-1691, PR62 Red and Brown

1944 **1882 Liberty Head Five Cents, Judd-1691, Pollock-1893, R.6, PR62 Red and Brown NGC.**

**Design.** The Charles Barber Liberty Head obverse, here in a so-called "transitional" design, nearly the regular issue but dated 1882. Head facing left, similar to the adopted Liberty Head nickel design, but there are slight differences in the position of the stars. The date is below. The reverse is the same as the infamous 1883 NO CENTS reverse: A Roman numeral V is flanked by a wreath of corn and cotton, with UNITED STATES OF AMERICA circling the rim and E PLURIBUS UNUM below. Struck in copper with a plain edge.

**Commentary.** The term "nickel" as a denomination earlier applied to the copper-nickel Indian cents, introduced in 1859, then to the three cent nickel that was launched in 1865, then to the five cent Shield nickel that debuted in 1866. By the time the Liberty nickel premiered in 1883, the term had come to rest firmly on the five cent piece, where it remains today. This piece represents a second opportunity for Liberty nickel collectors to obtain an interesting and unusual piece as a complement to their regular-issue collections.

**Physical Description.** Sunset-orange patina dominates, with some tinges of purple-blue through the high points of the center obverse. Tiny flecks appear under a loupe, but this piece offers considerably more appeal than the numerical grade indicates. **NGC Census:** 1 in PR62 Red and Brown, 4 finer. **PCGS Population:** None in PR62 Red and Brown, 7 finer (12/08).

**Provenance.** *Ex: D.E.A. and U.S. Marshals Service Sale (Heritage, 12/1988), lot 1899.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#82096)

## Remarkable and Rare 1882 Shield Earring
## Silver Quarter, Judd-1698, PR67 ★
## Tied for Finest Certified

1945 **1882 Shield Earring Quarter Dollar, Judd-1698, Pollock-1900, Low R.7, PR67 ★ NGC.**

**Design.** The Shield Earring design of George T. Morgan. A youthful Liberty faces right wearing a band with the usual inscription, the band compressing the back portion of her hair. She wears a shield-shaped earring, with stars six left, seven right, date 1882 below. On the reverse a perched, defiant eagle occupies the center, clutching an olive branch and arrows. The reverse design is reminiscent of the Flying Eagle cent obverse and the Gobrecht dollar reverse, although the eagle faces right. UNITED STATES OF AMERICA and QUARTER DOLLAR are the peripheral legends. Struck in silver with a reeded edge.

**Commentary.** The Shield Earring quarter, half, and dollar designs—especially in their native metal, silver—are among the most beautiful and coveted pattern designs of the late 19th century. Pattern specialists generally consider the 1872 Amazonian, the 1879 Schoolgirl, and the 1882 Shield Earring designs to be the most beautiful, but of the three the Shield Earring is the rarest overall. Examples of all three types are represented in this quintessential pattern offering of the Lemus Collection, a "triple play" event that has occurred at Heritage only once previously. In PR67 Star this piece is by far the finest certified at NGC and numerically tied with a single PR67 PCGS example, although they could well represent a single coin (10/08). According to USPatterns.com, nine examples of the silver Shield Earring quarter exist, although we believe some of the pieces in our census below may be duplicates.

**Physical Description.** Deep iridescent steel-blue and pinkish original patina, with glimmers of sage, provides tremendous eye appeal that complements pristine surfaces. Justly awarded NGC's desirable Star designation for exceptional eye appeal. Another splendid highlight of the remarkable Lemus Collection. Watch the bidder cards fly on this one!

**Census and Provenance.** The following census was expanded from information provided by USPatterns.com. As mentioned earlier, we believe that two or possibly three pieces on this list may represent duplicate appearances, and that the actual number of survivors may only be six or seven examples.

1. The Mint Cabinet; The Smithsonian Institution, National Numismatic Collection, inventory number 1985.0441.2070.
2. The Gaston DiBello Collection (Stack's, 5/1970), lot 353; Rudy Sieck; Rogers Fred; The Fred and Ward Collections (Bowers and Merena, 11/1995), lot 2258; Larry Hanks (6/1987); Higman-Alterman; Alhambra/Hanks; Pre-Long Beach Sale (Superior, 9/1999); Pre-Long Beach Sale (Superior, 2/2000).
3. Public Auction Sale (Merkin, 9/1967), lot 555; The Whitney P. Sunderland Collection (Bowers and Merena, 3/1994), lot 1434.
4. Col. E.H.R. Green; James Kelly (5/1943); Jesse Taylor; 61st Sale (New Netherlands, 6/1970), lot 88; Harry Bass Research Foundation.
5. Dr. J. Hewitt Judd; An Illustrated History of United States Coins (Kosoff, 1962); Bowers and Ruddy; Florida Collection; The Julius Turoff Collection (Bowers and Ruddy, 10/1976), lot 1225; Sieck-1981 ANA Sale (Bowers and Ruddy, 7/1981), lot 164. The Pollock plate coin.
6. The Armand Champa Collection (Bowers and Ruddy, 5/1972), lot 1027; The Phillip Warner Sale (Hughes, 1/1980), lot 42; Novoselsky; Alhambra/Hanks; E. Fair Premier Sale (Heritage, 10/1999), lot 5768; Superior FPL (4-7/2000); The Jones Beach Collection (Heritage, 1/2007), lot 1609.
7. A coin once in the possession of Julian Leidman, gunmetal blue-gray toned Gem proof. Possibly a duplicate appearance of one of the coins listed here.
8. The H.P. Smith Sale (S.H.& H. Chapman, 5/1906), lot 1463; John Story Jenks Collection (Henry Chapman, 12/1921), lot 5697; John H. Clapp; Clapp Estate, 1942; Louis Eliasberg, Sr.; The Eliasberg Collection (Bowers and Merena, 5/1997), lot 229.
9. The Randolph S. Rothschild Collection (Stack's, 10/2003), lot 1072. **The present coin.**

**Other Appearances.** The following appearances of Judd-1698 may represent earlier citations of the coins listed above, but it is not possible to conclusively link them to the other pedigree chains at this time. The coin was extremely rare before 1910, with only two auction appearances traced, each appearance being part of a three-coin Shield Earring denominational set. It is likely that the same set was offered in two separate appearances. Noted pattern researcher Saul Teichman believes the issue proliferated after William Woodin received several duplicate sets in the famous deal to return the 1877 half union patterns to the Mint Cabinet. Other appearances include:

A. Parmelee Collection (New York Coin and Stamp, 6/1890), lot 252. (possibly the same as number 8 above).
B. Public Auction of Rare Pattern Coins ( Edgar Adams, 2/1911), lot 188.
C. William Woodin's consignment to the 1914 ANS Exhibition.
D. Edgar Adams FPL (circa 1913).
E. King Farouk; Palace Collections of Egypt (Sotheby's, 2/1954), lot 2008 (possibly the same as number 2 above, as Gaston DiBello was one of the few American collectors at the Farouk sale).

*From The Lemus Collection, Queller Family Collection Part Two.* (#62104)

# Marvelous 1882 Shield Earring
# Silver Half, Judd-1700, PR64 Cameo

1946 **1882 Shield Earring Half Dollar, Judd-1700, Pollock-1902, Low R.7, PR64 Cameo NGC.**

**Design.** The Shield Earring design of George T. Morgan. A youthful Liberty faces right wearing a band with the usual inscription, the band compressing the back portion of her hair. She wears a shield-shaped earring, with stars six left, seven right, date 1882 below. On the reverse a perched, defiant eagle occupies the center, clutching an olive branch and arrows. The design is reminiscent of the Flying Eagle cent and Gobrecht dollar reverses, although facing right. UNITED STATES OF AMERICA and HALF DOLLAR are the peripheral legends. Struck in silver with a reeded edge.

**Commentary.** A second example in silver, this time the half dollar, of this remarkable design showing the prowess of a still young and relatively inexperienced George T. Morgan, Mint assistant engraver at the time and for long afterward. Morgan was apparently proud enough of this design to sign it, unusual in the pattern series: His tiny initial M appears on the truncation of the neck, near the hair. Three-piece sets of the quarter, half dollar, and one dollar were issued in both silver and copper. Today the design, along with the Amazonian and Schoolgirl patterns, is admired as among the most beautiful in the entire U.S. pattern series. Examples in silver are especially treasured. We believe that something under a dozen, perhaps 10 or so, examples of this pattern exist in all grades.

**Physical Description.** Silver-white in the centers, this near-Gem proof adds a complement of champagne-pink patina near the rims on both sides. Considering the remarkable eye appeal and relative lack of contact, we are surprised that NGC saw fit to grade this piece only PR64 Cameo, as we believe it to be considerably finer. A tiny lintmark between the chin and star 11 serves as a pedigree marker.

**Census and Provenance.** The following census was expanded from information provided by USPatterns.com. Some entries, including the present specimen, may represent duplicate appearances of the same coin. We believe approximately 10 examples of this special design are extant.

1. The Smithsonian Institution, Inv. No. 1985.0441.2071.
2. Col. E.H.R. Green; 1952 ANA (New Netherlands, 8/1952), lot 4500.
3. Col. E.H.R. Green; B.G. Johnson; Jesse Taylor, private treaty transaction in 12/1944; 61st Public Auction Sale (New Netherlands, 6/1970), lot 89; *Rare Coin Review* No. 8 (David Bowers, 1970); Armand Champa; Rogers Fred; Fred-Ward Collection (Bowers and Merena, 11/1995), lot 2286.
4. Gaston DiBello (Stack's, 5/1970), lot 402; Harry Bass Research Foundation.
5. Dr. J.H. Judd; Illustrated History of United States Coins (Abe Kosoff, 1962), lot 579; Florida Collection; Turoff (Bowers and Ruddy, 10/1976), lot 1225; 1981 ANA-Sieck (Bowers and Ruddy, 8/1981), lot 253.
6. The Phillip Warner Sale (Hughes, 1/1980), lot 53; Great '80 (Hughes, 7/1980), lot 108; Novoselsky; Alhambra-Hanks, E-Fair Premier Sale (Heritage, 10/1999), lot 5769; Fixed Price List (Superior, 4-7/2000); Rarities Sale (Bowers and Merena, 5/2004), lot 560.
7. New York Sale (New England Rare Coin Auctions, 3/1977), lot 1005; Amato Collection (New England Rare Coin Auctions, 7/1978), lot 1189; Platinum Night (Heritage, 1/2004), lot 2236; Southern Collection; Simpson Collection.
8. Anderson Dupont (Stack's, 11/1954), lot 2487; June Sale Part II-Bergin (Stack's, 6/1984), lot 1260.
9. F.K. Saab; Auction '81 (Stack's, 7/1981), lot 1696; ANA Midyear Convention (Heritage, 2/1985), lot 348.
10. Rarities Sale-Morris Evans (Bowers and Merena, 8/1998), lot 2098.
11. Randolph S. Rothschild Collection (Stack's, 10/2003), lot 1095; **The present specimen.**

**Other appearances.** These citations may be earlier appearances of the coins listed above, but the pedigree chains cannot be conclusively confirmed.

A. The Parmelee Collection (New York Coin & Stamp, 6/1890), lot 252.
B. H.P. Smith (S.H. and H. Chapman, 5/1906), lot 1463; John Story Jenks (Henry Chapman, 12/1921), lot 5697; John H. Clapp Collection. (possibly the same as Parmelee).
C. Public Auction of Rare Pattern Coins (Edgar Adams, 2/1911), lot 187.
D. William Woodin's consignment to the 1914 ANS Exhibition.
E. King Farouk; Palace Collections of Egypt (Sotheby's, 2/1954), lot 2008 (possibly the same as number 4, as Gaston DiBello was one of the few American collectors to attend the Farouk sale).

*From The Lemus Collection, Queller Family Collection Part Two.* (#62106)

## 1882 Shield Earring Dollar in Copper, Judd-1703
## High R.7, PR66 ★ Red and Brown Cameo

1947 **1882 Shield Earring Dollar, Judd-1703, Pollock-1905, High R.7, PR66 ★ Red and Brown Cameo NGC.**

**Design.** The Shield Earring design of George T. Morgan. A youthful Liberty faces right wearing a band with the usual inscription, the band compressing the back portion of her hair. She wears a shield-shaped earring, with stars six left, seven right, date 1882 below. On the reverse a perched, defiant eagle occupies the center, clutching an olive branch and arrows. The design is reminiscent of the Flying Eagle cent and Gobrecht dollar reverses, although facing right. UNITED STATES OF AMERICA and ONE DOLLAR are the peripheral legends. Struck in silver with a reeded edge.

**Commentary.** Both copper and silver three-piece sets of the 1882 Shield Earring quarter, half, and dollar were issued. Not only is the Shield Earring the rarest of the "Big Three" named patterns of the 19th century (the others are the Amazonian and the Schoolgirl), but the copper sets were apparently issued in smaller quantities than the silver pieces, to judge by the paucity of survivors today.

Given the incredible demand for Shield Earring patterns of any denomination and for high-grade silver pattern dollars in particular, this stunning high-grade copper example will provide some fortunate and astute collector with another opportunity to acquire this, one of the most celebrated and coveted of pattern designs in all of U.S. numismatics.

**Physical Description.** Generous deep sunset-orange complements tinges of saffron, lilac, and violet, with excellent field-device contrast showing despite the moderately intense coloration. Well deserving of the coveted NGC Star designation for superior eye appeal. USPatterns.com notes that only five pieces are confirmed today, although there are nine pieces (with undoubted duplication) certified between NGC and PCGS combined. NGC has certified two PR67 examples finer, although it is doubtful they surpass the present PR66 ★ Red and Brown Cameo specimen from an aesthetic point of view, regardless of numeric grade (11/08).

**Census and Provenance.** The following census was expanded from information provided by USPatterns.com.

1. Doughty Collection (New York Coin and Stamp, 4/1891); Byron Reed; Durham Western Heritage Museum.
2. Fairfield (Bowers and Ruddy, 10/1977), lot 94; Jascha Heifetz (Superior, 10/1989), lot 3346; Auction '90 (Superior, 8/1990), lot 1448.
3. Numismatic Gallery; Jesse Taylor, private treaty transaction ( 10/13/1942); 61st Public Auction Sale (New Netherlands, 6/1970), lot 90; Great '80 (Hughes, 7/1980), lot 154; Tangible Assets Galleries; Teletrade 3/3/1993; Marin Numismatics; Larry Hanks; Fixed Price List (Superior, 4-7/2000); Long Beach (Heritage, 2/2001), lot 7485; Long Beach (Heritage, 5/2001), lot 9483; LaBelle Collection (American Numismatic Rarities, 7/2005), lot 80.
4. Burke-Clemente Collections (Bowers and Merena, 5/1994), lot 1080; Public Auction Sale (Superior, 8/1995), lot 330; ANA Money Show (Superior, 3/2001), lot 618; Jones Beach Collection (Heritage, 1/2007), lot 1611.
5. Stack's; private treaty transaction. **The present coin.**

**Other Appearances.** These citations may be earlier appearances of the specimens above but cannot be conclusively linked to any of the established pedigree chains.

A. Maris Collection (H.P. Smith, 6/1886), lot 255.
B. Vicksburg Collection II (Woodward, 9/1888); Stetson Collection(Woodward, 1/1889).
C. Woodside Collection (New York Coin and Stamp, 4/1892), lot 380.
D. William Woodin, 1914 ANS Exhibition.
E. Col. E.H.R. Green; 1952 ANA (New Netherlands, 8/1952), lot 2931.
F. King Farouk; The Palace Collections of Egypt (Sotheby's, 2/1954), lot 2007 (two examples).
G. Major Lenox Lohr FPL (Empire Coin Company, 1961). The coin was therein described as a Schoolgirl dollar.

*From The Lemus Collection, Queller Family Collection Part Two.* (#72109)

## 1883 Liberty Head Five Cent Struck in 'Pure Nickel' Judd-1704, PR64 Cameo

1948 **1883 Liberty Head Five Cents, Judd-1704, Pollock-1908, Low R.6, PR64 Cameo NGC.**

**Design.** The obverse is similar in design to the Liberty nickel adopted in this year, except the legend UNITED STATES OF AMERICA replaces the stars. On the reverse a wreath of corn, cotton, maple, and wheat surrounds a central inscription that reads PURE NICKEL. FIVE CENTS is separated above and below with seven stars left and six right. Struck in pure nickel with a plain edge.

**Commentary.** The year 1883 continues the popular Liberty nickel pattern series begun in 1882. Although elemental analysis reveals that some patterns of this year were struck in metallic compositions other than those inscribed on them, this particular design, if truly struck in pure nickel, will adhere to a magnet.

**Physical Description.** The surfaces are silver-white with good contrast between the radiant fields and well-frosted devices. Some grayish haze covers a portion of Liberty and the obverse field nearby, while the reverse offers spectacularly deep contrast. **NGC Census:** 1 in PR64 Cameo, 4 finer plus 2 additional pieces graded PR66, but lacking the Cameo designation. **PCGS Population:** None in PR64 Cameo, 2 finer plus an additional 10 pieces lacking the Cameo designation but graded PR65 or PR66 (12/08).

**Provenance.** *Ex: Bolender Sale (6/1935), lot 1492; Stack's private treaty.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#62120)

## 1883 Aluminum Liberty Head Five Cent, Judd-1706, PR65

1949 **1883 Liberty Head Five Cents, Judd-1706, Pollock-1910, High R.7, PR65 NGC.**

**Design.** The obverse is similar in design to the Liberty nickel adopted in this year, except the legend UNITED STATES OF AMERICA replaces the stars. On the reverse a wreath of corn, cotton, maple, and wheat surrounds a central inscription that reads PURE NICKEL. FIVE CENTS is separated above and below with seven stars left and six right. Struck in aluminum with a plain edge.

**Commentary.** So much for truth in advertising. Despite the reverse inscription, the piece is struck in aluminum, a metal that was still quite rare at the time. The various patterns imitating the Liberty Head design of Charles Barber are popular with both pattern collectors and aficionados of the regular series. Perhaps four to six specimens are known. The total certified population stands at six pieces between NGC and PCGS, with this specimen tied with three others as the finest at PR65 (10/08).

**Physical Description.** A light *soupçon* of bluish-silver is seen over surfaces that are predominantly silver-white. Some grayish flecks appear, undistractingly so, under a loupe, with good contrast the hallmark of both sides.

**Provenance.** *Ex: Paramount (7/1986).*
*From The Lemus Collection, Queller Family Collection Part Two.* (#62122)

## Pristine 1883 Liberty Head Five Cent
## Judd-1710, PR67 Cameo

1950 **1883 Liberty Head Five Cents, Judd-1710, Pollock-1914, R.5, PR67 Cameo NGC.**

**Design.** The obverse is the regular-issue Liberty Head nickel. The reverse is the traditional wreath of corn, cotton, maple, and wheat, with 50 N. / 50 C. in the center. FIVE is at the top rim and CENTS at the bottom rim, with stars seven left, six right. Struck in nickel with a plain edge.

**Commentary.** This R.5 pattern is more available than most pattern issues, with two to three dozen likely existing. Like many pattern issues of the 1870s and 1880s, despite their purported unusual alloys, it is probable that many of these were actually struck on standard nickel/copper-alloy planchets of 75% nickel, 25% copper.

**Physical Description.** A light patina of heather and lilac graces the remarkably pristine surfaces of this piece, with mirrored fields and thickly frosted devices adding up to superlative eye appeal. **NGC Census:** This piece is numerically tied as the finest graded with four other pieces at NGC, including two PR67, the present PR67 Cameo, one PR67 Ultra Cameo, and one PR67 Star Ultra Cameo. **PCGS Population:** One in PR67 without the Cameo designation, none finer (12/08).

**Provenance.** *Ex: Superior (1/1986), lot 601.*
*From The Lemus Collection, Queller Family Collection Part Two.*
(#62127)

## Sharp 1883 Liberty Head Five Cent
## Judd-1712, PR66 Cameo

1951 **1883 Liberty Head Five Cents, Judd-1712, Pollock-1916, Low R.6, PR66 Cameo NGC.**

**Design.** The obverse is the regular-issue Liberty Head nickel. The reverse is the traditional wreath of corn, cotton, maple, and wheat, with 33 N. / 67 C. in the center. FIVE is at the top rim and CENTS at the bottom rim, with stars seven left, six right. Struck in nickel with a plain edge.

**Commentary.** Again, the purported alloy is not necessarily that which was actually used. Another fairly available (relatively speaking, that is) Liberty Head nickel pattern issue, the perfect acquisition to spice up a nice collection of regular-issue proofs or business strikes. The Pollock pattern reference notes that a hoard of 16 specimens passed from the William H. Woodin collection to F.C.C. Boyd, later to Abe Kosoff, with most of them bought later by Sol Kaplan.

**Physical Description.** Silver-white surfaces display a touch of gold, with excellent field-device contrast and premium eye appeal. Sharply struck, and with no obvious distractions. **NGC Census:** While there are eight PR66 examples certified at NGC in all contrast levels, this is the only PR66 Cameo, and there is only one PR66 Ultra Cameo, with no coins numerically finer. **PCGS Population:** 2 in PR66 without designation, none finer either numerically or as a PR66 with a designation (12/08).

**Provenance.** *Ex: Bowers and Merena (3/1989), lot 25.*
*From The Lemus Collection, Queller Family Collection Part Two.*
(#62129)

## 1883 Liberty Head Five Cent
## Judd-1714, PR64

1952 **1883 Liberty Head Five Cents, Judd-1714, Pollock-1919, Low R.6, PR64 NGC.**

**Design.** The Charles Barber Liberty Head portrait. Here she sports a plain coronet, as the word LIBERTY is at the top rim, with stars six left and seven right, date 1883 below. The reverse displays the regular NO CENTS die of 1883. Struck in nickel with a plain edge.

**Commentary.** A true Liberty nickel, one of the few that removes the word from the diadem, coronet, shield, or other design elements on which it is usually found throughout U.S. coinage. Perhaps two dozen examples are known of this issue.

**Physical Description.** Mottled grayish-gold surfaces with a sharp strike display a few scattered, minuscule dark flecks. There is considerable field-device contrast noted, although unrecognized by NGC. **NGC Census:** 4 in PR64, 1 finer. **PCGS Population:** 3 in PR64, 10 finer (12/08).

**Provenance.** *Ex: Stack's (5/1998), lot 525.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#62131)

## 1884 'Holey' One Cent, Judd-1721, PR64

1953 **1884 One Cent, Judd-1721, Pollock-1929, R.5, PR64 NGC.**

**Design.** The Eastman Johnson "holey cent" design. The planchet is holed at the center. The obverse has UNITED STATES OF AMERICA above and the date below, with no other design or ornament. The reverse shows ONE CENT above with an inverted shield and wheat stalks below, within which the fields are open. Struck in nickel with a plain edge.

**Commentary.** Both one cent and five cent patterns of this year feature the unusual Eastman Johnson "holey" design, apparently spurred by comments that the artist made in 1870, according to the Pollock reference. Some three to four dozen examples likely exist today.

**Physical Description.** The silver-gray surfaces demonstrate a modicum of field-device contrast, more so on the reverse than on the obverse. Some planchet irregularity in the form of light "waves" appears, possibly caused by the uneven pressure from striking caused by the center hole. **NGC Census:** 1 in PR64, 11 finer. **PCGS Population:** 4 in PR64, 27 finer (12/08).

**Provenance.** *Ex: Stack's (9/1985).*
*From The Lemus Collection, Queller Family Collection Part Two.* (#62150)

## 1884 'Holey' Five Cent, Judd-1724, PR66

1954 **1884 Five Cents, Judd-1724, Pollock-1934, Low R.6, PR66 NGC.**

**Design.** The Eastman Johnson "holey five cent" design. The obverse shows FIVE above and CENTS below a roughly octagonal opening in the planchet, with shields on either side. The reverse shows UNITED STATES OF AMERICA at the outer rim, with an inner circle of 13 stars and date 1884 below. Struck in nickel with a plain edge.

**Commentary.** One of the more interesting and yet unfortunate U.S. pattern coin designs. The central holes in the "annular" or ring-shaped patterns of 1884 and 1885 weakened the structural integrity of the blank planchets, resulting in irregular flowlines or slight warping seen on many pieces.

**Physical Description.** The battleship-gray surfaces are remarkably pristine on this Premium Gem example, lightly tinged with gold and free of mentionable distractions. Probably two to three dozen exist. **NGC Census:** 3 in PR66, 4 finer. **PCGS Population:** 4 in PR66, 7 finer (12/08).

**Provenance.** *Ex: Stack's (9/1985).*
*From The Lemus Collection, Queller Family Collection Part Two.* (#62154)

# 1885 Snowden Dollar, Judd-1747, PR66
# With Experimental Edge Lettering

1955 **1885 Snowden Dollar, Judd-1747, Pollock-1959, Low R.6, PR66 NGC.**

**Design.** The dies are the regular-issue 1885 Morgan dollar dies, but there is experimental edge lettering as follows: * * * * * * E * / PLURIBUS * / UNUM * * * * *. Struck in silver.

**Commentary.** As Pollock notes in his pattern reference, this was an experiment of Colonel Archibald Loudon Snowden, chief coiner and superintendent of the Philadelphia Mint. According to Pollock:

> "Henry Chapman provided some amusing commentary on the edge lettering of these pieces in his Bement Collection sale of 1916: 'A.L. Snowden's invention ... which he exhibited to me with great pride; was going to have it patented and revolutionize the World's Coinage until I exhibited to him a crown of Oliver Cromwell, and showed him where Thos. Simon had made a better job of it two hundred and thirty-seven years before. The Col. collapsed forthwith.' "

The edge lettering was applied in three segments, using an apparatus that Snowden (who was also the nephew of Mint Director James Ross Snowden) had devised himself. Note that the motto E PLURIBUS UNUM appears on the coin twice!

**Physical Description.** A flashy proof with good luster and considerable dollops of gold, cinnamon, and auburn over the silvery, well-struck surfaces. The coin is housed in an NGC tabbed holder that allows easy viewing of the experimental edge lettering. In PR66 this piece is tied with one other for finest certified of the half dozen examples at NGC. There are 11 others graded at PCGS, the finest a single PR66 (10/08).

**Provenance.** *Unknown.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#62189)

# 1885 Snowden Dollar, Judd-1748, PR68 Red and Brown

1956 **1885 Snowden Dollar, Judd-1748, Pollock-1960, Low R.7, PR68 Red and Brown NGC.**

**Design.** The dies are the regular-issue 1885 Morgan dollar dies, but there is experimental edge lettering as follows: * * * * * * E * / PLURIBUS * / UNUM * * * * *. Struck in copper.

**Commentary.** David Bowers, relating a similar piece in the New Netherlands' 61st sale (6/1970), described the edge lettering thusly:

> "The edge letters appear smaller, thinner, and cruder on the sectional dollar used for the striking of this copper piece, in comparison with that used to strike the silver Judd-1747. The stars are also smaller and some are likewise poorly formed. Of the smaller letters on this lot, the B is completely without serifs, while others have shorter or blunted serifs. The edge on the last is wide and broad, while that on this copper impression is partially beveled upon both obverse and reverse. The sectional dividing line (one of three) before the P is seemingly lacking on this piece."

The rest of the quotation is mostly specific to the particular coin, but Bowers comes to the conclusion that that piece was struck at a different time, and from a different tripartite collar, from the silver Judd-1747 dollars. Both of the present lots, in silver and copper, would bear fruit for the numismatic researcher. The present copper specimen is housed in an NGC tabbed holder that allows easy viewing of the experimental edge lettering.

**Physical Description.** Spectacular appeal is the hallmark of this pristine coin, with generous patina in shades of sunset-orange and gold deepening on the high points to lilac and purple. Sharply struck and splendid. **NGC Census:** In PR68 Red and Brown this piece is, incredibly, tied for finest certified with another NGC example in the same grade. **PCGS Population:** The finest certified piece is a single PR67 Red and Brown example (12/08).

**Provenance.** *Ex: Stack's (12/1977), lot 840.*
*From The Lemus Collection, Queller Family Collection Part Two.*
(#72190)

## The Bass 1885 Snowden Dollar
## Struck in Aluminum
## Judd-1749, PR65

1957 **1885 Snowden Dollar, Judd-1749, Pollock-1961, Low R.7, PR65 PCGS.**

**Design.** The dies are the regular-issue 1885 Morgan dollar dies, but there is experimental edge lettering as follows: * * * * * * E * / PLURIBUS * / UNUM * * * * *. Struck in aluminum with a tripartite collar for the edge lettering.

**Commentary.** This piece hails from the Harry W. Bass, Jr. Collection. Harry Bass is noted for his love of the die varieties of U.S. gold, so much so that it bears remembering that he also formed a first-rate assemblage of U.S. patterns. The Harry Bass Core Collection retains an example of the Judd-1747 Snowden dollar struck in silver.

**Physical Description.** The silver-white surfaces cede to mellow powder-gray on the device high points and in the fields of each side. There is essentially no sign of contact. A small spot of dark toning on the denticles below the 5 in the date serves as a pedigree marker. This PR65 is one of two so certified at PCGS, and there are two PR66 pieces finer (10/08). NGC has certified four other pieces ranging from PR63 to PR67.

**Provenance.** *Ex: Brinton T. Schorer (4/1973); Bass I (Bowers and Merena, 5/1999), lot 1309. From The Lemus Collection, Queller Family Collection Part Two.* (#62191)

# 1885 Three Dollar Struck in Aluminum
# Judd-1753, R.8, PR64
# Finest Certified, One of Two Known

1958 **1885 Three Dollar, Judd-1753, Pollock-1966, R.8, PR64 NGC.**

**Design.** The design is the regular-issue Indian Princess three dollar gold piece designed by James B. Longacre, but struck in aluminum with a reeded edge.

**Commentary.** As we have noted elsewhere in this catalog, aluminum was for much of the 19th century considered a metal more precious than gold, due to its highly reactive nature. When found in nature, it is generally found in one of its many dozens of alloyed forms. Only in the late 1880s and early 1890s did coins made of pure aluminum become more plentiful and widespread, as new means to separate the metal from its alloys were discovered and improved upon. The comparative rarity of aluminum at the time no doubt explains this pattern's R.8 rarity ranking. USPatterns.com notes that "although listed as a regular die trial piece, these were more likely deliberately struck for sale to collectors as part of complete aluminum sets." "Silver" dollars, quarter eagles, and the present three dollar "gold" pattern dated are 1885 are all known in aluminum, but this is by far the rarest of the three issues. The patterns website estimates that only two are known, including the present example.

**Physical Description.** The steel-gray and powder-gray surfaces are free of any discernible color otherwise, and there are only a few tiny contact marks noted in the fields. A small dark spot on Liberty's brow provides a pedigree marker. There are only two pieces certified, this PR64 NGC specimen and a PR63 PCGS example (10/08).

**Provenance.** *Ex: Stack's private treaty.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#62196)

## 1896 One Cent in Bronze, Judd-1768, Pollock-1983 PR65 Red and Brown

1959 **1896 One Cent, Judd-1768, Pollock-1983, R.5, PR65 Red and Brown NGC.**

**Design.** The Charles Barber design. Shield at center obverse with LIBERTY incused. Crossed poles behind support a Liberty cap and an eagle. E PLURIBUS UNUM is at the top rim, with stars seven left, six right. On the reverse a large 1 occupies the center, with CENT below, an olive spring surrounding and UNITED STATES OF AMERICA at the rim. Struck in bronze with a plain edge.

**Commentary.** Several different bronze alloys were struck and are included in this single Judd number, but they cannot be distinguished without metallurgical analysis. One rare positional variety was discovered by Harry W. Bass Jr. (Pollock-1985a); this is *not* an example, but rather one of the more common Pollock-1983 examples.

**Physical Description.** Even almond-tan patina with good field-device contrast appears on both sides. An appealing and well-struck piece with no obvious contact marks. **NGC Census:** 1 in PR65 Red and Brown, 1 finer. **PCGS Population:** 2 in PR65 Red and Brown, none finer (12/08).

**Provenance.** *Ex: Stack's (5/2000), lot 1123.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#62222)

## 1896 Five Cent Nickel, Judd-1771, PR65

1960 **1896 Five Cents, Judd-1771, Pollock-1986, Low R.6, PR65 NGC.**

**Design.** The Charles Barber design. Shield at center obverse with LIBERTY incused. Crossed poles behind support a Liberty cap and an eagle. E PLURIBUS UNUM is at the top rim, with stars seven left, six right. On the reverse a large 5 occupies the center, with CENTS below, an olive spring surrounding and UNITED STATES OF AMERICA at the rim. Struck in pure nickel with a plain edge.

**Commentary.** According to an official report of the era, 15 different metallic compositions were used to strike the one and five cent patterns of 1896, with 10 pieces produced from each of the alloys. The five cent pieces were struck in standard 75%/25% nickel/copper alloy, as well as in various combinations of German silver alloy (copper, zinc, and nickel).

**Physical Description.** The silver-gray surfaces are largely pristine and attractive, despite a few tiny contact marks that account for the Gem grade. A beautiful example of this design, generally considered to be one of Barber more pedestrian and less attractive efforts. **NGC Census:** This piece is one of three certified PR65 at NGC, with a single PR66 finer. **PCGS Population:** 7 in PR65, 1 finer (12/08).

**Provenance.** *Ex: Stack's private treaty.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#62225)

## 1896 Aluminum Five Cent Judd-1772, PR63

1961 **1896 Five Cents, Judd-1772, Pollock-1989, High R.6, PR63 NGC.**

**Design.** The Charles Barber design. Shield at center obverse with LIBERTY incused. Crossed poles behind support a Liberty cap and an eagle. E PLURIBUS UNUM is at the top rim, with stars seven left, six right. On the reverse a large 5 occupies the center, with CENTS below, an olive spring surrounding and UNITED STATES OF AMERICA at the rim. Struck in aluminum with a plain edge.

**Commentary.** One of several experiments during the year with different metallic compositions. By 1896, pure aluminum was becoming much less expensive due to improvements in separating it from its many alloys, and it was therefore given more serious consideration as a viable metal for small-denomination coinage.

**Physical Description.** This silver-white examples shows moderate field-device contrast. A small area of oxidation is located on the reverse rim at the M in AMERICA and serves as a pedigree marker. **NGC Census:** 1 in PR63, 4 finer. **PCGS Population:** 6 in PR63, 3 finer (12/08).

**Provenance.** *Ex: Stack's (10/1988), lot 704.*
*From The Lemus Collection, Queller Family Collection Part Two.* (#62226)

The Farouk-Norweb 1915 S-Less Panama-Pacific
Clandestine Half Dollar Pattern
Struck in Gold, Judd-1960, PR64
R.8, One of Two Known

1962 **1915 Panama-Pacific Half Dollar, Judd-1960, formerly Judd-1793, Pollock-2031, High R.8, PR64 NGC.**

**Design.** The design is the same as the regular-issue 1915-S Panama-Pacific commemorative half, but lacking the normal S mintmark. Struck in gold with a reeded edge.

**Commentary.** Other S-less Panama-Pacific half dollar patterns are also known in silver and copper. These extremely rare patterns were clearly clandestine strikes, produced at the Philadelphia Mint before mintmark punches were applied to the working dies. There are two known examples of the gold half dollar, both struck on cut-down, struck Saint-Gaudens double eagle coins. Similar examples are known of the 1915 Panama-Pacific gold dollar and of the round and octagonal fifty dollar pieces, all lacking the S mintmark. The website USPatterns.com comments of the pieces, "These could be die trials but it seems that they were really struck for profit."

Pollock comments in his *United States Patterns and Related Issues:*

> "Farran Zerbe, who was involved in the coining and distribution of the Panama-Pacific commemoratives in California, has been quoted by Walter Breen as saying that specimens 'may have been struck as trial pieces at the Philadelphia Mint by the instructions of the Secretary of the Treasury, who was a coin collector.' The Secretary of the Treasury at the time was W.G. McAdoo of New York, a name familiar to students of U.S. paper money."

Anthony Swiatek, in his *Commemorative Coins of the United States* (2001), writes much more unequivocally concerning the 1915 Pan-Pac half dollar, "Extremely rare trial pieces, made at the Philadelphia Mint, were struck without the S Mint mark. Two were created in gold, six in silver and four in copper for Treasury Secretary William Gibbs McAdoo—a coin collector!"

**Physical Description.** Further along, Pollock records his notes on the present specimen:

> "Careful examination of the Farouk-Norweb coin [the present coin, listed as No. 2 in the Census below] reveals planchet file marks and traces of an undertype, indicating that the half dollar dies were impressed on a cut-down gold coin, which had been filed to remove high-relief details. This piece is remarkably thick: 2.4 mm at the edge versus 2.1 mm for a regular-issue Panama-Pacific half dollar.
>
> "The characteristics of the coin suggest that it was made clandestinely. Since the piece is overstruck instead of being made using a new planchet of normal thickness, it can be inferred that there was a desire on the part of the manufacturer that no mention of the piece be made in the bullion account books, and thus it may have been produced secretly at the Mint in the same manner as the 1913 Liberty nickel or the Class III 1804 dollar. The only other known example of the variety [listed as No. 1 below] is reportedly also struck over a cut-down gold piece."

The reverse die of the present specimen is rotated about 40 degrees counterclockwise from normal coin turn with respect to the obverse. In contrast, the Brand-Johnson-ANA specimen, No. 2 in the census below which we auctioned in 2003, shows only a slight counterclockwise rotation, on the order of 10 percent. The reverse of this piece also shows considerable evidence of the remaining Saint-Gaudens double eagle obverse undertype on the reverse, as follows: In the central shield area and to the rim below and on either side, traces of Liberty, the peripheral stars, the rock, the gown outline, the ASG monogram, and portions of a date (possibly 1916) appear, the last seen beneath the AR of DOLLAR. The juncture of Liberty's head, neck, and left (facing) arm appear under TAT and IN / WE. (See closeup photos.)

While the logical date to appear is, of course, 1915 rather than 1916, the last digit in the undertype date, while far from bold, appears tantalizingly to have a top loop that much more resembles a 6 than a 5. No trace of a mintmark appears above the date. This piece also has tremendous eye appeal, with generous luster radiating from yellow-gold surfaces that occasionally deepen to orange-gold.

This piece is fairly conclusive evidence that, contrary to the prevailing view, chicanery and profiteering at the Mint did not die out in the 19th century. Farran Zerbe's reputation as a numismatic huckster is widely known, but others (possibly excluding Zerbe) may have been involved in the production of this piece—possibly some of the same personnel responsible for the 1913 Liberty nickels. An unparalleled opportunity for the numismatic researcher or collector of rare patterns.

**Census and Provenance.** Only two pieces are known.

1. Fred E. Olsen Collection (B. Max Mehl, 11/1944), lot 1769, which realized an astounding $4,250; King Farouk; Palace Collections of Egypt (Sotheby's, 1954), lot 309; Norweb Collection (Bowers and Merena, 11/1988), lot 3307. **The present specimen.**
2. Virgil Brand; Burdette G. Johnson; Celina Coin Co.; A. Friedman; ANA (New England Rare Coin Auctions, 7/1979), lot 1365; Sound Beach Collection (Heritage, 11/2003), lot 11252, which brought $165,000.85; Southern Collection; Simpson Collection. PR64 NGC.

*From The Lemus Collection, Queller Family Collection Part Two.* (#12176)

# 1916 Walking Liberty Half Dollar, Judd-1992, PR58
# The 'LiberTy' Half Dollar Pattern, Low R.7

1963 **1916 Walking Liberty Half Dollar, Judd-1992, formerly Judd-1797, Pollock-2053, Low R.7, PR58 NGC.**

**Design.** The obverse is similar to the regular issue, but LIBERTY, with a tall T extending over the RY, is moved to the right obverse field, in back of the walking figure of Liberty and above IN GOD WE TRUST. The digits in the date are tall, tightly spaced, and thick. The reverse design is broadly similar to the regular issue, but there are many differences. UNITED STATES OF AMERICA is spread out in a wider arc along the periphery, with periods before and after. The extra room is provided by the moving of HALF DOLLAR to a second inner arc above the eagle and below STATES OF A, and E PLURIBUS UNUM, in small letters, is moved to the bottom rim. There is no AW monogram by the tip of the eagle's tail. Struck in silver with a reeded edge.

**Commentary.** The www.uspatterns.com website notes that the "Judd-1797A number used in earlier editions of Judd was a misdescription of this." Just to be clear, this coin combines the obverse design as described under Pollock-2054 with the reverse design as described under Pollock-2055. The current and equivalent Judd listing is Judd-1992, where it is noted that these coins are "believed to have been struck between July 27 and August 18, 1916."

This popular pattern is called the "LiberTy" type for obvious reasons. But the Bowers and Merena cataloger, in describing the Pryor and Evans specimens (Nos. 3 and 5 below), noted a more abstruse appellation:

> "The WurliTzer connection (?): The T in LiberTy is overly large, possibly adopted from the WurliTzer logotype?
> "The music house of WurliTzer was founded in 1856 in Cincinnati by Rudolph Wurlitzer, who came from Germany in 1853. The WurliTzer connection with the above 1916 pattern is not far fetched. Farny Wurlitzer (named from Henry Farny, the famous American artist who was his maternal grandfather), who was in charge of the firm's plant in North Tonawanda, NY, from 1909 until the 1960s, told Q. David Bowers that an advertising copy writer came up with the idea of a large T in WurliTzer as a distinctive way of spelling the name—this was well before the 1916 pattern half dollars in question—and that over the years when Mr. Wurlitzer saw others copy the large letter T he would write them a little note of recognition.... The use of erratic letter sizes recurs various times in American numismatics, including 'oF' in the reverse lettering of both the 1948 Franklin half dollar and the 1959 Memorial reverse of the Lincoln cent."

**Physical Description.** Shades of amber, gold, and lilac glow on the surfaces of this lightly circulated proof. A small dark toning spot immediately beneath Liberty's flag, just above and right of the intersection with a ray of the sun, serves as a pedigree identifier. Just a touch of rub on the highest points attests to a brief time in circulation before this rare pattern was fortunately recognized for what it was—or, alternatively, the specimen could have been carried as a pocket piece for a short while.

Noted pattern collector Rogers M. Fred, Jr. provided interesting insights into the manner by which various 1916 patterns entered circulation, in a letter originally quoted by Bowers in his "Numismatic Depth Study" in *Coin World*, Oct. 9, 1974:

"Living in Leesburg [Virginia] at the present time are Mr. and Mrs. Charles Robb, who are good friends of mine. Their son, Chuck, married Lynda Johnson, daughter of President Lyndon Johnson. Frances Robb (Mrs. Charles Robb, Sr.) is the daughter of Mr. [Robert Wickliffe] Woolley, who was director of the Mint in 1916 ... Mr. Woolley is dead now, but I knew him myself when we both lived in Washington in the 1930s and 1940s.

"I have talked to Frances Robb many times about her father and coins, and she told me that in the 1920s her father's house was robbed. Among the things taken was a box containing coins. The thieves were not really interested in the coins as such, but since the robbery was of a general nature they took anything that had value and could be disposed of easily.

"Mrs. Robb has said that her father had patterns of 1916 coinage in that box.... The 1916 patterns are very similar in design to the regular issue and it is reasonable to assume that the thieves thought that the coins were just regular issues and simply spent them. This would explain how the coins got out of the Mint ... ."

While the present piece is just a whisper away from Mint State, it is worth noting that some pattern examples of 1916 Walking Liberty halves and 1916 Mercury dimes are known in the range of Very Good to Fine.

**Census and Provenance.** Only six or seven pieces are likely in private hands, as the first two Smithsonian pieces below are off the market. The following census is expanded from USPatterns.com.

1. Smithsonian Institution, 1985.0551.0756.
2. Smithsonian Institution, 1985.0551.0757.
3. King Farouk; Palace Collections of Egypt (Sotheby's, 2/1954), lot 2026 (two pieces?); William Mitkoff (4/1974); James Bennett Pryor Collection (Bowers and Merena, 1/1996), PR63 PCGS, lot 329; Southern Collection; Samuel Berngard and *S.S. New York* Collections (Stack's, 7/08), lot 4250, PR64 NGC.
4. Robert Marks Collection, Part II (American Auction Association [Bowers and Ruddy], 11/72), lot 1080; Superior (10/1990), lot 1888; Superior (7/1993), lot 468, $35,200. PR63 PCGS.
5. Morris Evans Collection (Rarities Sale, Bowers and Merena, 8/1998), lot 2100, $40,250; later, Kagin's, PR64 NGC; Kennywood Collection (American Numismatic Rarities, 1/2005), lot 1180; Long Beach Signature Auction (Heritage, 6/2005), lot 7457; Baltimore ANA Auction (Heritage, 8/2008), lot 2165. PR65 NGC.
6. Superior (8/1991). VG8 NGC.
7. Anaconda Rare Coins (8/2003); FUN Signature Auction (Heritage, 1/2007), lot 1631, unsold. PR53 NGC.
8. Provenance unknown. **The present specimen.**

*From The Lemus Collection, Queller Family Collection Part Two.* (#62290)

1916 Walking Liberty Half Dollar, Judd-1994, PR64 Finest Available of Two or Three Known

# 1916 Walking Liberty Half Dollar, Judd-1994, PR64
## Finest Available of Two or Three Known

1964 **1916 Walking Liberty Half Dollar, Judd-1994, formerly Judd-1801, Pollock-2059, R.8, PR64 NGC.**

**Design.** The obverse is somewhat similar to the regular issue as adopted, but the 1916 date is small and tightly compacted together. The 1's in the date have tiny serifs on top and bottom, and diagonal flag-shaped tops. The letters in LIBERTY are heavy and slightly further from the rim than on the regular issue, closer to Liberty's foot. Burdette points out that the right heel, foot, and the T of TRUST are farther from the rim than on the circulation dies. The reverse is also similar to the regular issue, but it lacks the AW monogram (for designer Adolph A. Weinman) behind the eagle, to the right of the rock, which was placed on the regular issues.

**Commentary.** This pattern, although similar, shows some distinct differences on the obverse that no dedicated collector of Walking Liberty halves would mistake for a regular-issue piece. Breen's *Complete Encyclopedia* notes that the date is "very small and closely spaced, not extending beyond foot."

Some business strike and proof Walking Liberty half dollars also lack the AW monogram, due either to omission or commission. That is, the initials were either never placed into the dies, or they were subsequently lapped off. This pattern was identified as Judd-1801 before the eighth edition of that reference.

The current (ninth) edition notes that examples of Judd-1994 are "believed to have been struck between September 25 and October 21, 1916." The following comments from Roger Burdette's *Renaissance of American Coinage 1916-21* are useful in providing an understanding of the 1916 patterns:

> "The year 1916 saw the largest group of experimental (or pattern) coins produced by the U.S. Mint since the late 1870s. Unlike most nineteenth century patterns—samples intended to show what a potential coin design would look like *before* a design was accepted—the designs for the three subsidiary coins had been approved before any of the experimental coins were made. The 1916 coins were intended to show the accepted designs in their final forms immediately prior to commencement of production. This affected the coinage in three ways: first, with one documented exception, the experimental coins were not intentionally made with special finishing such as sandblast or brilliant proof. Second, they were struck at ordinary production pressures on normal planchets rather than at high pressure on specially prepared blanks. Third, they were 'experimental coins' and were expected to be examined by the mint and the artists for their faults rather than their virtues.
>
> "In most instances, Philadelphia Mint Superintendent Adam Joyce wanted to know if a change in design had solved a coinage problem—hence, a pattern or experimental coin was struck so the results could be compared with previous versions. These mechanical experiments resulted in the creation of many more patterns than one would think necessary. Evidently, each change in design was modeled, reductions and hubs made, and sample coins struck for review by secretary McAdoo, directors Woolley and von Engelken, and superintendent Joyce. Some patterns were significantly different from the later circulation coins, but many differed only in minor placement of lettering or details of the figures. Limited records were kept of the dies and pattern coins resulting in some patterns entering

circulation. The greatest number of known patterns were created for the half dollar; however, mint documents suggest that the dime and quarter were also troublesome and resulted in a significant number of experimental coins. Comments by [Standing Liberty quarter designer] Hermon MacNeil in January 1917, suggest that there may have been a considerable number of quarter patterns made, but none have survived."

"All of the pattern coin examined by the author have fields that are either polished, smooth and nonreflective, or lightly textured. None of the examples appear to be deliberate sandblast or satin proofs and most look like fairly ordinary circulation strikes with impaired luster."

**Physical Description. This is by far the finest known example—possibly the only specimen available in the marketplace at any price.** The silver-gray surfaces are "lightly textured" in appearance, to borrow Burdette's term, although the exact method of imparting that texture is unknown. A bit of greenish color appears in the right obverse field, just behind Liberty's flag and flora. There is little evidence of contact on either side, as expected for the near-Gem grade. And despite the Burdette caveats above, the strike is sharply executed, with high, squared-off rims at the border and excellent device detailing throughout. The thumb on Liberty's branch hand is fully articulated, and indeed the details elsewhere, such as on the head and sandals, appear full, although we have no other specimens available against which to compare this fabulous piece. A small diagonal stripe of dark toning at the fore of the eagle's throat serves as a pedigree marker.

**Census and Provenance.** Only two or three examples are known of this extremely rare pattern. One is impounded—presumably (and hopefully) forever—in the Smithsonian. Another circulated example reported by Walter Breen is now untraced, to our knowledge. The present example is not only extremely rare and in top condition, but it may also be the only specimen available at any price:

1. B.M. Douglas; donated in 1963 to Smithsonian Institution, 237132.0001. PR63 or thereabouts.
2. King Farouk "Palace Collection" (Sotheby's, 2/1954); William Mitkoff (4/1974); James Bennett Pryor; Congressman Jimmy Hayes Collection (Stack's, 10/1985), lot 69. **The present specimen.**
3. (?) (Breen-5126: "Pvt. coll., worn"), untraced today.

*From The Lemus Collection, Queller Family Collection Part Two.* (#62298)

***End of Session Two***

# Heritage Auction Galleries Staff

**Steve Ivy - Co-Chairman and CEO**

Steve Ivy began collecting and studying rare coins in his youth, and as a teenager in 1963 began advertising coins for sale in national publications. Seven years later, at the age of twenty, he opened Steve Ivy Rare Coins in downtown Dallas, and in 1976, Steve Ivy Numismatic Auctions was incorporated. Steve managed the business as well as serving as chief numismatist, buying and selling hundreds of millions of dollars of coins during the 1970s and early 1980s. In early 1983, James Halperin became a full partner, and the name of the corporation was changed to Heritage Rare Coin Galleries. Steve's primary responsibilities now include management of the marketing and selling efforts of the company, the formation of corporate policy for long-term growth, and corporate relations with financial institutions. He remains intimately involved in numismatics, attending all major national shows. Steve engages in daily discourse with industry leaders on all aspects of the rare coin/currency business, and his views on grading, market trends and hobby developments are respected throughout the industry. He serves on the Board of Directors of the Professional Numismatists Guild (and was immediate past president), is the current Chairman of The Industry Council for Tangible Assets, and is a member of most leading numismatic organizations. Steve's keen appreciation of history is reflected in his active participation in other organizations, including past or present board positions on the Texas Historical Foundation and the Dallas Historical Society (where he also served as Exhibits Chairman). Steve is an avid collector of Texas books, manuscripts, and national currency, and he owns one of the largest and finest collections in private hands. He is also a past Board Chair of Dallas Challenge, and is currently the Finance Chair of the Phoenix House of Texas.

**James Halperin - Co-Chairman**

Jim Halperin and the traders under his supervision have transacted billions of dollars in rare coin business, and have outsold all other numismatic firms every year for over two decades. Born in Boston in 1952, Jim attended Middlesex School in Concord from 1966 to 1970. At the age of 15, he formed a part-time rare coin business after discovering that he had a knack (along with a nearly photographic memory) for coins. Jim scored a perfect 800 on his math SATs and received early acceptance to Harvard College, but after attending three semesters, he took a permanent leave of absence to pursue his full-time numismatic career. In 1975, Jim personally supervised the protocols for the first mainframe computer system in the numismatic business, which would catapult New England Rare Coin Galleries to the top of the industry in less than four years. In 1983, Jim merged with his friend and former archrival Steve Ivy, whom Jim had long admired. Their partnership has become the world's largest and most successful numismatic company, as well as the third-largest auctioneer in America. Jim remains arguably the best "eye" in the coin business today (he won the professional division of the PCGS World Series of Grading). In the mid-1980s, he authored "How to Grade U.S. Coins" (now posted on the web at www.CoinGrading.com), a highly-acclaimed text upon which the NGC and PCGS grading standards would ultimately be based. Jim is a bit of a Renaissance man, as a well-known futurist, an active collector of EC comics and early 20th-century American art (visit www.jhalpe.com), venture capital investor, philanthropist (he endows a multimillion-dollar health education foundation), and part-time novelist. His first fictional novel, "The Truth Machine," was published in 1996 and became an international science fiction bestseller, and was optioned for movie development by Warner Brothers. Jim's second novel, "The First Immortal," was published in early 1998 and immediately optioned as a Hallmark Hall of Fame television miniseries. Jim is married to Gayle Ziaks, and they have two sons, David and Michael. In 1996, with funding from Jim and Gayle's foundation, Gayle founded Dallas' Dance for the Planet, which has grown to become the largest free dance festival in the world.

**Greg Rohan - President**

At the age of eight, Greg Rohan started collecting coins as well as buying them for resale to his schoolmates. By 1971, at the age of ten, he was already buying and selling coins from a dealer's table at trade shows in his hometown of Seattle. His business grew rapidly, and by 1985 he had offices in both Seattle and Minneapolis. He joined Heritage in 1987 as Executive Vice-President and Manager of the firm's rare coin business. Today, as an owner and as President of Heritage, his responsibilities include overseeing the firm's private client group and working with top collectors in every field in which Heritage is active. Greg has been involved with many of the rarest items and most important collections handled by the firm, including the purchase and/or sale of the Ed Trompeter Collection (the world's largest numismatic purchase according to the Guinness Book of World Records), the legendary 1894 San Francisco Dime, the 1838 New Orleans Half Dollar, and the 1804 Silver Dollar. During his career, Greg has handled more than $1 billion of rare coins, collectibles and art, and provided expert consultation concerning the authenticity and grade condition of coins for the Professional Coin Grading Service (PCGS). He has provided expert testimony for the United States Attorneys in San Francisco, Dallas, and Philadelphia, and for the Federal Trade Commission (FTC). He has worked with collectors, consignors, and their advisors regarding significant collections of books, manuscripts, comics, currency, jewelry, vintage movie posters, sports and entertainment memorabilia, decorative arts, and fine art. Additionally, Greg is a Sage Society member of the American Numismatic Society, and a member/life member of the PNG, ANA, and most other leading numismatic organizations. Greg is also Chapter Chairman for North Texas of the Young Presidents' Organization (YPO), and is an active supporter of the arts. Greg co-authored "The Collectors Estate Handbook," winner of the NLG's Robert Friedberg Award for numismatic book of the year. Mr. Rohan currently serves on the seven-person Advisory Board to the Federal Reserve Bank of Dallas, in his second appointed term. He and his wife, Lysa, are avid collectors of rare wine, Native American artifacts, and American art.

**Paul Minshull - Chief Operating Officer**

As Chief Operating Officer, Paul Minshull's managerial responsibilities include integrating sales, personnel, inventory, security and MIS for Heritage. His major accomplishments include overseeing the hardware migration from mainframe to PC, the software migration of all inventory and sales systems, and implementation of a major Internet presence. Heritage's successful employee-suggestion program has generated 200 or more ideas each month since 1995, and has helped increase employee productivity, expand business, and improve employee retention. Paul oversees the company's highly-regarded IT department, and has been the driving force behind Heritage's web development, now a significant portion of Heritage's future plans. As the only numismatic auction house that combines traditional floor bidding with active Internet bidding, the totally interactive system has catapulted Heritage to the top rare coin website (according to Forbes Magazine's "Best of the Web"). Paul was born in Michigan and came to Heritage in 1984 after 12 years as the General Manager of a plastics manufacturing company in Ann Arbor. Since 1987, he has been a general partner in Heritage Capital Properties, Sales Manager, Vice President of Operations, and Chief Operating Officer for all Heritage companies and affiliates since 1996. Paul maintains an active interest in sports and physical fitness, and he and his wife have three children.

**Todd Imhof - Vice President**

Todd Imhof did not start collecting coins in his teens, unlike most professional numismatists. Shortly after graduating college, Todd declined an offer from a prestigious Wall Street bank to join a former high school classmate in his small rare coin firm in the Seattle area. In the mid-1980s, the rare coin industry was rapidly changing, with the advent of third-party grading and growing computer technologies; as a newcomer, Todd more easily embraced these new dynamics. He soon discovered a personal passion for rare coins, and for working with high-level collectors; in 1991, he co-founded Pinnacle Rarities, a firm specialized in servicing the savviest and most prominent collectors in numismatics. At 25, he was accepted into the PNG, and currently serves on its Consumer Protection Committee and its Legislation/Taxation Issues Committee. In 1992, he was invited to join the Board of Directors for the Industry Council for Tangible Assets, later serving as its Chairman (2002-2005).

Todd enjoys a reputation that is envied by the entire numismatic community, and his relationship with Heritage's most prominent clients, who seek his expertise and integrity, has only strengthened over the years. Clients and colleagues are impressed by his ability to navigate complex deals with unsurpassed professionalism. By understanding what each collector is trying to accomplish, Todd has the uncanny ability to identify the perfect coins at the right prices. In the famous Phillip Morse Auction, he became the only person in history to purchase two separate $1mm+ coins during a single auction session! Todd is an avid competitive sailor, and collector of fine wines and Olympic medals. He and his wife have two sons and a daughter.

**Leo Frese - Vice President**

Leo has been involved in numismatics for nearly 40 years, a professional numismatist since 1971, and has been with Heritage for over 20 years. He literally worked his way up the Heritage "ladder" through dedication, hard work, and a belief that the client is the most important asset Heritage has. He worked with Bob Merrill for nearly 15 years and now is the Director of Consignments. Leo has been actively involved in assisting clients sell nearly $500,000,000 in numismatic material. Leo was recently accepted as a member of PNG, is a life member of the ANA, and holds membership in FUN, CSNS, and other numismatic organizations. He believes education is the foremost building block in numismatics. Leo encourages all collectors to broaden their horizons, be actively involved in the hobby, and donate freely to YN organizations. Leo's interests include collecting Minnesota pottery and elegant Depression glass. Although travel is an important element of his job, he relishes time with his wife Wendy, children Alicen and Adam, and son-in-law Jeff.

**Jim Stoutjesdyk - Vice President**

Jim Stoutjesdyk was named Vice President of Heritage Rare Coin Galleries in 2004. A Michigan native, Jim became involved in numismatics at a young age and was named the ANA's Outstanding Young Numismatist of the Year in 1987. A University of Michigan graduate, he was first employed by Superior Galleries, eventually becoming their Director of Collector Sales. Since joining Heritage in 1993, Jim has assumed many responsibilities including Gallery Manager for the retail showroom, retail clientele development, editor of Heritage's Insider magazine from 1998 to 2000, and wholesale trading at coin shows across the nation. Jim's duties now include buying and selling, pricing all new purchases, assisting with auction estimates and reserves, and overseeing the daily operations of the rare coin department. Jim met his wife Amy at Heritage; they married in 1998 and have a son Blake and a daughter Emily. While away from Heritage Jim enjoys spending time with his family and traveling to new places. Jim serves on the Board of Directors of Families for Effective Autism Treatment and has raised tens of thousands of dollars to provide education, advocacy, and support to families in the North Texas area who are affected by autism.

**Norma L. Gonzalez - VP of Auction Operations**

Born in Dallas, Texas, Norma joined the U.S. Navy in August of 1993. During her five-year enlistment, she received her Bachelor's Degree in Resource Management and traveled to Japan, Singapore, Thailand and lived in Cuba for three years. After her enlistment, she moved back to Dallas where her family resides. Norma joined Heritage in 1998; always ready for a challenge, she spent her days at Heritage and her nights obtaining an M. B. A. She was promoted to Vice President in 2003. She currently manages the operations departments, including Coins, Currency, World & Ancient Coins, Sportscards & Memorabilia, Comics, Movie Posters, Pop Culture and Political Memorabilia. Norma enjoys running, biking and spending time with her family. In February 2004 she ran a 26.2-mile marathon in Austin, Texas and later, in March she accomplished a 100-mile bike ride in California.

**Debbie Rexing - VP - Marketing**

Debbie's marketing credentials include degrees in Business Administration in Marketing and Human Resource Management from The Ohio State University, as well as sales experience for General Foods. After joining Heritage in 2001, Debbie rapidly became an integral part of the marketing teams involved with Heritage's most exciting and successful specialties, including U.S. Coins, World Coins, Currency, Music & Entertainment, Vintage Movie Posters, Americana, and U.S. Tangibles Inc. Her varied responsibilities included cross-functional coordination of photography, auction logistics, and marketing. Debbie has been active in coin auctions, staffing the podium, executing client bids, and in lot viewing. Her wide experience in many aspects of the business has provided her with a broad perspective of Heritage's activities. She and her husband Rick have three children – Trent, Abbey, and Claire – and her hobbies include interior design, entertaining and exercise, the beach and water activities, and watching Ohio State football.

**Kelley Norwine - VP - Media and Client Relations**

Born and raised in South Carolina, Kelley pursued a double major at Southern Wesleyan University, earning a BA in Music Education and a BS in Business Management. A contestant in the Miss South Carolina pageant, Kelley was later Regional Manager & Director of Training at Bank of Travelers Rest in South Carolina. Relocating to Los Angeles, Kelley became the Regional Manager and Client Services Director for NAS-McCann World Group, an international Advertising & Communications Agency where she was responsible for running one of the largest offices in the country. During her years with NAS Kelley was the recipient of numerous awards including Regional Manager of the Quarter and the NAS Courage and Dedication award. After relocating to Dallas, Kelley took a job as Director of Client Services for TMP/Monster Worldwide and joined Heritage in 2005 as Director of Client Development. She was named VP of Marketing for Heritage in 2007. A cancer survivor, Kelley is an often-requested motivational speaker for the American Cancer Society. In her spare time, she writes music, sings, and plays the piano.

**Patricia Castillo - Director of Auctions & Client Service**

Patricia Castillo lived all over the country before settling down in Ferris, Texas, near Dallas. She began her career working in Customer Service, and in 2001 joined the Heritage family assisting in Client Services and live auctions. Patricia's knowledge grew with the company, and her hard work led to her promotion to Director of Auctions and Client Services. Patricia is directly involved in the training and management of the Client Services team. A cancer survivor, Patricia enjoys spending time with her two beautiful little girls, attending softball games, and spending time with family and friends.

**Andrea Voss - Live-Auction & Event Coordinator**
Andrea Voss is a true Texas native – born and educated in the Dallas area, with a degree in Journalism from the University of North Texas in Denton. Andrea joined the Heritage family in 2004, and after assisting Client Services with e-mail inquiries, she earned the opportunity to become the Auction Supervisor. Her responsibilities have grown with her experiences, and she is now the Live-Auction & Event Coordinator. Clients may see her in the back of the live auction room supervising, or in the front using her Auctioneer license. In her off hours, Andrea enjoys time on her patio with her dog and cat, and still dreams of one day being a writer.

**Devin Jackson - Auction Client Services/Live Auction Supervisor**
Devin Jackson joined Heritage in 2005 as a member of the Client Services Group. Devin is a native Texan, growing up in a small suburb south of Dallas. Devin later attended the University of North Texas and graduated with a Bachelor's Degree in Kinesiology. A life long sports fanatic, Devin briefly coached high school football, basketball, and track in his home town of Ferris, TX after graduating from college. Devin later joined the staff of Heritage Auction Galleries, assisting with Live Auctions and Client Services. Devin has collected sports cards and memorabilia since he was a young boy and he continues to collect memorabilia from his favorite professional sports teams, including the San Francisco 49ers.

**Marti Korver - Manager - Credit/Collections**
Marti has been working in numismatics for more than three decades. She was recruited out of the banking profession by Jim Ruddy, and she worked with Paul Rynearson, Karl Stephens, and Judy Cahn on ancients and world coins at Bowers & Ruddy Galleries, in Hollywood, CA. She migrated into the coin auction business, running the bid books for such memorable sales as the Garrett Collection and representing bidders as agent at B&R auctions for 10 years. She also worked as a research assistant for Q. David Bowers for several years. Memorable events included such clients (and friends) as Richard Lobel, John Ford, Harry Bass, and John J. Pittman. She is married to noted professional numismatist and writer, Robert Korver, (who is sometimes seen auctioneering at coin shows) and they migrated to Heritage in Dallas in 1996. She has an RN daughter (who worked her way through college showing lots for Heritage) and a son (who is currently a college student and sometimes a Heritage employee) and a type set of dogs (one black and one white). She currently collects kitschy English teapots and compliments.

**Becky Dirting - Managing Director, Collectibles Division**
Becky joined Heritage in 2005 and was named Managing Director of the Collectibles Departments in 2007, providing direct oversight for such auction specialties as Historical Books & Manuscripts, Americana & Political, Civil War, Western, Americana Indian Art, Texana, Comics & Comic Art, Music & Entertainment, Vintage Movie Posters, Sports Collectibles, Illustration Art, and Natural History. Becky's career path included PwC Consulting in Learning and Knowledge Management, and she remains focused on staff development, training, operations and process development, knowledge management, budget management, and contract negotiation. She enjoys spending time with her wonderful husband, sons, extended family, friends and beloved pets, and is a talented chef.

**Julie Gonzalez - Director of Auction Operations**
After working part-time for Heritage for many years, Julie Gonzalez was so excited about the growth opportunities that she joined us on a full-time basis! As the Operations Manager for Americana, she led her team through several successful auctions, and was then promoted to lead the operations staff and consignment coordinators for a third of Heritage's specialty auctions. Her work ethic, determination and tenacity are supporting Heritage's growth. Away from work, you might spot Julie outside enjoying time with her family and friends, or running.

# Coin Department Specialists

**David Mayfield - Vice President**
David has been collecting and trading rare coins and currency for over 35 years. A chance encounter with his father's coin collection at the age of nine led to his lifetime interest. David has been buying and selling at coin shows since the age of 10. He became a full time coin & currency dealer in the mid-80s. David's main collecting interest is in all things Texas, specializing in currency and documents from the Republic of Texas. Being a sixth generation Texan whose family fought for Texas' independence has only increased the value and meaning of these historical artifacts for him. After more than two decades of marriage, David and Tammy have two wonderful sons, Brian and Michael.

**Jim Jelinski - Consignment Director**
A collector since age 8, Jim has been involved in numismatics over 5 decades, progressing from humble collector to professional dealer and educator. He is a Life Member of the *American Numismatic Association*, the *American Numismatic Society*, and other state and national organizations. Starting as Buyer for Paramount International Coin Corporation in 1972, he opened Essex Numismatic Properties in 1975 in New Hampshire. Later, positions at M.B. Simmons & Associates of Narberth, Pennsylvania included Director of Sales, Director of Marketing and Advertising, and Executive Vice President. In 1979, he reorganized Essex in Connecticut and, as Essex Numismatics, Inc., worked as COO and CFO. He joined the staff at Heritage as Senior Numismatist and Consignment Coordinator. Jim has two sons, and is actively involved in his church, and community; he just completed his 20th season of coaching youth athletics, and working in Boy Scouting as a troop leader and merit badge counselor. He has been a fund raiser for Paul Newman's "Hole in the Wall Gang" camp for terminally ill children, and for Boy Scouts. His personal diversions include fly fishing, sky diving, cooking, and wine collecting.

**Sam Foose - Consignment Director and Auctioneer**
Sam's professional career at Heritage divides neatly into two parts. Sam joined Heritage Numismatic Auctions, Inc. in 1993 as an Auction Coordinator. Over the next five years, Sam ran the day-to-day auction operations, ultimately rising to Assistant Auction Director, and began calling auctions. After serving as a Senior Manager and Consignment Director in other collectible fields outside of numismatics, Sam returned to Heritage in 2002 as a Consignment Director in time to help Heritage's expansion into other collectibles. Sam travels the country assisting clients who wish to liquidate their collections of coins, paper money, decorative arts, and sports collectibles. To Sam, helping consignors make the best decisions to maximize their returns from auctioning their properties is the most rewarding part of his job. Sam holds auction licenses in several jurisdictions, and has hammered in excess of $250 million in collectibles as one of Heritage's primary auctioneers. During his free time, Sam enjoys his wife (Heather) and two children (Jackson and Caroline), gardening, golf, grilling, and sports.

**David Lisot - Consignment Director**
David Lisot is in his fourth decade as a numismatist, writer, researcher, publisher, cataloger, public speaker, and website creator. His expertise includes US & world coins and paper money, gemstones, jewelry, stamps, pocket watches, art, postcards, cigar label art, and antique advertising. David is Director of Heritage's Coin Club Outreach program and a Consignment Director. An accomplished videographer and television producer, David produced the award-winning documentaries, *Money, History in Your Hands, Era of Hometown Bank Notes* for the Higgins Money Museum, and video productions for Heritage. He has videotaped over 750 lectures and presentations about coins and collecting as seen on Coinvideo.com. David was featured in the PBS series, *Money Moves* with Jack Gallagher, as a reporter for FNN, and as founder of CoinTelevision.com. David served as an ANA Governor and is a member of many numismatic organizations. He is a Philosophy graduate of the University of Colorado in Boulder, and a Graduate Gemologist from the GIA. David is married with two children, and enjoys travel, history, exercise, and religious studies.

**Bob Marino - Consignment Director & Senior Numismatist**
Bob started collecting coins in his youth, and started selling through eBay as the Internet became a serious collector resource. He joined Heritage in 1999, managing and developing Internet coin sales, and building Heritage's client base through eBay and other Internet auction websites. He has successfully concluded more than 40,000 transactions on eBay, selling millions of dollars of rare coins to satisfied clients. Many collectors were first introduced to Heritage through Bob's efforts, and he takes pride in dealing with each client on a personal level. Bob is now a Consignment Director, assisting consignors in placing their coins and collectibles in the best of the many Heritage venues – in short, maximizing their return on many of the coins that he sold to them previously! Bob and his family moved to the DFW area from the Bitterroot Valley in Western Montana. He enjoys spending time with his family, woodworking (building furniture), and remodeling his house.

**Charles Clifford - Consignment Director**
Charles has been involved with collectibles for over 35 years. His first venture with coins began in the 1970s when he drove to banks all over North Texas buying bags of half dollars to search for the 40% silver clad coins. He has worked as a bullion trader, a rare coin buyer, worked in both wholesale and retail sales, served as a cataloger, and has traveled to hundreds of coin and sports card conventions across the country. Charles also has the distinction of working with Steve Ivy over four decades! Currently he is assisting clients obtain top dollar for the items they have for sale, either by direct purchase or by placing their material in auction. He appreciates Heritage's total commitment to "World Class Client Service" and the "Can Do - Nothing is Impossible" attitude of management and each and every employee. He enjoys collecting hand-blown Depression glass and antique aquarium statues.

**Mike Sadler - Consignment Director**
Mike Sadler joined the Heritage team in September 2003. Mike attended the United States Air Force Academy, earning a degree in civil engineering and pinned on his silver wings in June 1985. After seven years flying various aircraft, he joined American Airlines where he still pilots. More than once, Mike has surprised Heritage employees serving as their pilot while they flew to shows, conventions, and to visit clients. Like so many of our clients, Mike started putting together sets of coins from circulation when he was a small boy, and that collection grew to go to the auction block with Heritage in January 2004. Before coming to Heritage, his unlimited access to air travel enabled him to attend coin shows all around the country. He gained a tremendous knowledge of rare coins and developed an outstanding eye for quality. He is a trusted friend and colleague to many of today's most active collectors. Having been a collector for so long, and a Heritage consignor himself, Mike understands the needs of the collector and what Heritage can offer. Mike is married, has three children, and enjoys coaching and playing lacrosse.

**Katherine Kurachek - Consignment Director**
Katherine grew up in Sarasota, Florida, graduated from the University of Mississippi in 1993 as an art major, and then resided in Colorado (where she opened a pizzeria!) before moving to Dallas. Acting on a suggestion from her father, an avid collector of type coins and a client of Steve Ivy for more than two decades, Katherine came to Heritage in January 2003. She worked alongside Leo Frese for several years, honing her experience in dealing with the numismatic wholesale trade. Taking care of the needs of our dealer-consignors includes soliciting the consignments, inputting the material into our computer systems, and ensuring the smooth flow of the consignment through the many production processes. Katherine is now frequently traveling to coin shows to represent Heritage and service her dealer accounts.In her spare time, she enjoys gardening, golf, hiking, fly-fishing, and walking her two Akitas (Moses and April). Katherine has finally inherited her father's love of these pieces of history, and currently collects love tokens and counterstamps.

**Jason Friedman - Consignment Director**
Jason's interest in rare coins began at the age of twelve when he discovered a bag of Wheat cents and Liberty nickels in his garage. His collecting interest expanded to Morgans and dealing in various coinage. Jason's numismatic business allowed him to pay for most of his college tuition while working part time and attending classes full time. Jason earned his degree in business from the University of North Texas in 2005. Shortly after, he joined Heritage and was able to turn his passion for numismatics into a career. His computer skills and coordinator background are invaluable tools in accessing all levels of expertise at Heritage. Jason enjoys interacting with clients and assisting them in every aspect of the auction process. Apart from his director position, Jason finds it particularly gratifying phone bidding on clients' behalf. He is a member of the American Numismatic Association (ANA) and Florida United Numismatists (FUN).

**Doug Nyholm - Consignment Director**
Doug has been collecting coins since the age of ten and fondly recalls spending Morgan silver dollars to purchase candy as a boy. He worked in the IT industry for 28 years with Unisys, 3Com and Sun Microsystems before joining Heritage. Doug's expertise includes all U.S. coins and varieties. He is also well acquainted with U.S. Federal currency and obsoletes. Doug has a special interest in territorials, and in 2004 he wrote and published *The History of Mormon Currency* and has authored many articles on Kirtland currency, scrip and related Utah items. He is currently writing several additional books including one on Utah National Banknotes. Doug is married, has two daughters, and enjoys mountain climbing and hiking. Doug was the President of the Utah Numismatic Society for 2006-07. His current collecting interests include Capped Bust & Seated half dollars, U.S. Type, and Mormon coins & currency.

**David Lindvall - Consignment Director**
David is a Life Member of the American Numismatic Association, and it seems at times that he has spent his entire life traveling to coin shows across America. His career in numismatics actually started in 1973 at International Coin of Minneapolis. In 1988, he joined Heritage in their Wholesale Division, ultimately rising to become Manager. David continues to enjoy numismatics, but after three decades of traveling to conventions large and small, he decided to change positions so he could spend more time at home than in airport lounges. He joined Heritage's Consignment Director team, where his lifetime of numismatic experience is benefiting clients who expect the very best service when they consign their coins and notes to auction. David has a BA in History and a Masters of Divinity, and he continues to be active in both areas. Now living on Cedar Creek Lake, his hobbies include boating, fishing, and making his lake home available to family and friends to enjoy the lakeside amenities.

**Dennis Nowicki - Consignment Director**
Dennis is fascinated with historical collectibles, and began his numismatic career as the Auction Manager for Bowers and Ruddy Galleries/ American Auction Association in the mid-1970s. After serving in the USAF at NORAD-Cheyenne Mountain Complex, Dennis spent a decade in Japan as a language instructor. He remained active in numismatics and philatelics as a dealer and collector. In the 1990s, he joined Heritage as their webmaster/designer, garnering the NLG's Outstanding Web Site award. Dennis later designed and supported websites for several numismatic firms, as well as cataloging auction lots. He has returned to Heritage as a Consignment Director and cataloger for the US and World coin departments.

**Mark Van Winkle - Chief Cataloger**
Mark has worked for Heritage (and Steve Ivy) since 1979. He has been Chief Cataloger since 1990, and has handled some of the premier numismatic rarities sold at public auction. Mark's literary achievements are considerable. He was editor of *Legacy* magazine, won the 1989 NLG award for Best U.S. Commercial Magazine, and the next year won another NLG award for Best Article with his "Interview With John Ford." In 1996 he was awarded the NLG's Best Numismatic Article "Changing Concepts of Liberty," and was accorded a third place Heath Literary Award that same year. He has done extensive research and published his findings on Branch Mint Proof Morgan Dollars, in addition to writing numerous articles for *Coin World* and *Numismatic News*. Mark has also contributed to past editions of the *Red Book*, and helped with the Standard Silver series in Andrew Pollock's *United States Patterns and Related Issues*. He was also a contributor to *The Guide Book of Double Eagle Gold Coins*.

**Mark Borckardt - Senior Cataloger**
Mark started attending coin shows and conventions as a dealer in 1970, and has been a full-time professional numismatist since 1980. He received the Early American Coppers Literary Award, and the Numismatic Literary Guild's Book of the Year Award, for the *Encyclopedia of Early United States Cents, 1793-1814*, published in 2000. He serves as a contributor to *A Guide Book of United States Coins*, and has contributed to many references, including the Harry W. Bass, Jr. Sylloge, and the *Encyclopedia of Silver Dollars and Trade Dollars of the United States*. Most recently, he was Senior Numismatist with Bowers and Merena Galleries, serving as a major contributor to all of that firm's landmark auctions. Mark is a life member of the A. N. A., and an active member of numerous organizations. He is an avid collector of numismatic literature, holding several thousand volumes in his library, as well as related postcards and ephemera. He is an avid bowler, carrying an 200+ average, and with seven perfect 300 games. Mark is a graduate of the University of Findlay (Ohio) with a Bachelors Degree in Mathematics. Mark and his wife have a 20-something year old son, and twin daughters who are enrolled at Baylor.

**Brian Koller - Cataloger & Catalog Production Manager**
Brian's attention to detail ensures that every catalog, printed and on-line, is as error free as technology and human activity allows. In addition to his coin cataloging duties, he also helps with consignor promises and client service issues. Brian has been a Heritage cataloger since 2001, and before that he worked as a telecom software engineer for 16 years. He is a graduate of Iowa State University with a Bachelor's degree in Computer Engineering, and is an avid collector of U.S. gold coins. Brian's numismatic footnote is as discoverer of a 1944-D half dollar variety that has the designer's monogram engraved by hand onto a working die. In addition to describing many thousands of coins in Heritage catalogs, Brian has written more than one thousand reviews of classic movies, which can be found on his website, filmsgraded.com.

**John Salyer - Cataloger**
John has been a numismatist and coin cataloger with Heritage since 2002. He began collecting Lincoln Cents, Jefferson Nickels, Mercury and Roosevelt Dimes, and Franklin Halves at the age of eleven, as a sixth-grader in Fort Worth; his best friend was also a collector, and his dad would drive them to coin shops and flea markets in search of numismatic treasures. The two youngsters even mowed lawns together in order to purchase their coins, which were always transferred into Whitman folders. John graduated from the University of Texas with a bachelor's degree in English. Prior to his numismatic employment, he worked primarily within the federal government and for several major airlines. His hobbies include playing guitar and collecting antique postcards; an avid golfer, he also enjoys spending time on the links. John has enjoyed making his former hobby his current occupation.

**Dr. Jon Amato - Cataloger**
Jon has been with Heritage since 2004. He was previously a Program Manager in the NY State Dept. of Economic Development, and an Adjunct Professor at the State University of New York at Albany, where he taught economic geography, natural disasters assessment, and environmental management. Jon is currently writing a monograph on the draped bust, small eagle half dollars of 1796-1797; his research included surveying more than 4,000 auction catalogs, recording the descriptions, grades, and photos of 1796-1797 halves. He published an article entitled "Surviving 1796-1797 Draped Bust Half Dollars and their Grade Distribution," in the *John Reich Journal*, February 2005, and also wrote "An Analysis of 1796-1797 Draped Bust Half Dollars," in *The Numismatist*, Sept. 2001. Jon belongs to many numismatic organizations, including the ANA, ANS, John Reich Collectors Society, and the Liberty Seated Collectors Club, and has made several presentations at ANA Numismatic Theaters. He earned a bachelor's degree from Arizona State University, an M.A. from the S. U. N. Y. at Buffalo, and a Ph. D. from the University of Toronto.

**John Dale Beety - Cataloger**
John grew up in Logansport, Indiana, a small town associated with several numismatic luminaries. Highlights as a Young Numismatist include attending Pittman III, four ANA Summer Seminars (thanks to various YN scholarships), and placing third in the 2001 World Series of Numismatics with Eric Li Cheung. He accepted a position with Heritage as a cataloger immediately after graduation from Rose-Hulman Institute of Technology, after serving an internship at Heritage during the summer of 2004. In addition to his numismatic interests, he enjoys many types of games, with two state junior titles in chess and an appearance in the Top 20 Juniors list of the World Blitz Chess Association.

**Cristina Gonzalez - Director of Operations**
Cristina Gonzalez started working at Heritage in 1999, and through years of dedication and application, rose from a Coin Operations Clerk to the Director of Coin Operations. Through innovative thinking, she restructured the daily office tasks preparing millions of numismatic items for auction. She leads a staff of twenty through 104 Weekly Internet Auctions and more than a dozen Signature Auctions each year. Cristina is also supervisor of the Auctions travelling team and attends every numismatic auction. She loves spending time with her family, especially her grandchildren, and working in her yard.

**Ron Brackemyre - Operations Manager**
Ron Brackemyre began his career at Heritage Auction Galleries in 1998 as the Manager of the Shipping Department, and was promoted to Consignment Operations Manager for Numismatics in 2004. He is responsible for the security of all of Heritage's coin and currency consignments, both at the Dallas world headquarters and at shows. His department also coordinates the photography, scanning, and cataloging of coins for upcoming auctions; coordination of auction planning; security and transportation logistics, and lot-view and auction prep. If you have attended a live Heritage coin auction, you are familiar with Ron's excellent work. Ron and his wife, Denice, have two teen-aged sons, and the family passion is riding dirt bikes.

**Cataloged by:** Mark Van Winkle, Chief Cataloger; Mark Borckardt, Senior Cataloger; George Huber, David Stone, Dennis Tarrant
**Edited by:** Mark Van Winkle, Stewart Huckaby, Bob Korver
**Operations Support by:** Cristina Gonzales, Miguel Reynaga Sr., Edna Lopez, Alma Villa, Maria Flores, Celeste Robertson, Manuela Bueno, Cristina Ibarra, Maria Jimenez
**Catalog and Internet Imaging by:** Colleen McInerney, Jason Young, Joel Gonzalez, Travis Awalt, Tony Webb
**Production and Design by:** Katie Brown, Mary Hermann, Mark Masat, Debbie Rexing

# Terms and Conditions of Auction

**Auctioneer and Auction:**

1. This Auction is presented by Heritage Auction Galleries, a d/b/a/ of Heritage Auctions, Inc., or its affiliates Heritage Numismatic Auctions, Inc., or Heritage Vintage Sports Auctions, Inc., or Currency Auctions of America, Inc., as identified with the applicable licensing information on the title page of the catalog or on the HA.com Internet site (the "Auctioneer"). The Auction is conducted under these Terms and Conditions of Auction and applicable state and local law. Announcements and corrections from the podium and those made through the Terms and Conditions of Auctions appearing on the Internet at HA.com supersede those in the printed catalog.

**Buyer's Premium:**

2. On bids placed through Auctioneer, a Buyer's Premium of fifteen percent (15%) will be added to the successful hammer price bid on lots in Coin and Currency auctions, or nineteen and one-half percent (19.5%) on lots in all other auctions. There is a minimum Buyer's Premium of $9.00 per lot. In Gallery Auctions (sealed bid auctions of mostly bulk numismatic material), the Buyer's Premium is 19.5%.

**Auction Venues:**

3. The following Auctions are conducted solely on the Internet: Heritage Weekly Internet Auctions (Coin, Currency, Comics, and Vintage Movie Poster); Heritage Monthly Internet Auctions (Sports, and Stamps). Signature® Auctions and Grand Format Auctions accept bids from the Internet, telephone, fax, or mail first, followed by a floor bidding session; Heritage Live and real-time telephone bidding are available to registered clients during these auctions.

**Bidders:**

4. Any person participating or registering for the Auction agrees to be bound by and accepts these Terms and Conditions of Auction ("Bidder(s)").
5. All Bidders must meet Auctioneer's qualifications to bid. Any Bidder who is not a client in good standing of the Auctioneer may be disqualified at Auctioneer's sole option and will not be awarded lots. Such determination may be made by Auctioneer in its sole and unlimited discretion, at any time prior to, during, or even after the close of the Auction. Auctioneer reserves the right to exclude any person from the auction.
6. If an entity places a bid, then the person executing the bid on behalf of the entity agrees to personally guarantee payment for any successful bid.

**Credit:**

7. Bidders who have not established credit with the Auctioneer must either furnish satisfactory credit information (including two collectibles-related business references) well in advance of the Auction or supply valid credit card information. Bids placed through our Interactive Internet program will only be accepted from pre-registered Bidders; Bidders who are not members of HA.com or affiliates should pre-register at least 48 hours before the start of the first session (exclusive of holidays or weekends) to allow adequate time to contact references. Credit may be granted at the discretion of Auctioneer. Additionally Bidders who have not previously established credit or who wish to bid in excess of their established credit history may be required to provide their social security number or the last four digits thereof to us so a credit check may be performed prior to Auctioneer's acceptance of a bid.

**Bidding Options:**

8. Bids in Signature® Auctions or Grand Format Auctions may be placed as set forth in the printed catalog section entitled "Choose your bidding method." For auctions held solely on the Internet, see the alternatives on HA.com. Review at HA.com/common/howtobid.php.
9. Presentment of Bids: Non-Internet bids (including but not limited to podium, fax, phone and mail bids) are treated similar to floor bids in that they must be on-increment or at a half increment (called a cut bid). Any podium, fax, phone, or mail bids that do not conform to a full or half increment will be rounded up or down to the nearest full or half increment and this revised amount will be considered your high bid.
10. Auctioneer's Execution of Certain Bids. Auctioneer cannot be responsible for your errors in bidding, so carefully check that every bid is entered correctly. When identical mail or FAX bids are submitted, preference is given to the first received. To ensure the greatest accuracy, your written bids should be entered on the standard printed bid sheet and be received at Auctioneer's place of business at least two business days before the Auction start. Auctioneer is not responsible for executing mail bids or FAX bids received on or after the day the first lot is sold, nor Internet bids submitted after the published closing time; nor is Auctioneer responsible for proper execution of bids submitted by telephone, mail, FAX, e-mail, Internet, or in person once the Auction begins. Internet bids may not be withdrawn until your written request is received and acknowledged by Auctioneer (FAX: 214-4438425); such requests must state the reason, and may constitute grounds for withdrawal of bidding privileges. Lots won by mail Bidders will not be delivered at the Auction unless prearranged.
11. Caveat as to Bid Increments. Bid increments (over the current bid level) determine the lowest amount you may bid on a particular lot. Bids greater than one increment over the current bid can be any whole dollar amount. It is possible under several circumstances for winning bids to be between increments, sometimes only $1 above the previous increment. Please see: "How can I lose by less than an increment?" on our website. Bids will be accepted in whole dollar amounts only. No "buy" or "unlimited" bids will be accepted.

    The following chart governs current bidding increments.

| Current Bid | Bid Increment |
|---|---|
| <$10 | $1 |
| $10 - $29 | $2 |
| $30 - $49 | $3 |
| $50 - $99 | $5 |
| $100 - $199 | $10 |
| $200 - $299 | $20 |
| $300 - $499 | $25 |
| $500 - $999 | $50 |
| $1,000 - $1,999 | $100 |
| $2,000 - $2,999 | $200 |
| $3,000 - $4,999 | $250 |
| $5,000 - $9,999 | $500 |
| $10,000 - $19,999 | $1,000 |
| $20,000 - $29,999 | $2,000 |
| $30,000 - $49,999 | $2,500 |
| $50,000 - $99,999 | $5,000 |
| $100,000 - $199,999 | $10,000 |
| $200,000 - $299,999 | $20,000 |
| $300,000 - $499,999 | $25,000 |
| $500,000 - $999,999 | $50,000 |
| $1,000,000 - $1,999,999 | $100,000 |
| $2,000,000 - $2,999,999 | $200,000 |
| $3,000,000 - $4,999,999 | $250,000 |
| $5,000,000 - $9,999,999 | $500,000 |
| >$10,000,000 | $1,000,000 |

12. If Auctioneer calls for a full increment, a bidder may request Auctioneer to accept a bid at half of the increment ("Cut Bid") only once per lot. After offering a Cut Bid, bidders may continue to participate only at full increments. Off-increment bids may be accepted by the Auctioneer at Signature® Auctions and Grand Format Auctions. If the Auctioneer solicits bids other than the expected increment, these bids will not be considered Cut Bids.

**Conducting the Auction:**

13. Notice of the consignor's liberty to place bids on his lots in the Auction is hereby made in accordance with Article 2 of the Texas Business and Commercial Code. A "Minimum Bid" is an amount below which the lot will not sell. THE CONSIGNOR OF PROPERTY MAY PLACE WRITTEN "Minimum Bids" ON HIS LOTS IN ADVANCE OF THE AUCTION; ON SUCH LOTS, IF THE HAMMER PRICE DOES NOT MEET THE "Minimum Bid", THE CONSIGNOR MAY PAY A REDUCED COMMISSION ON THOSE LOTS. "Minimum Bids" are generally posted online several days prior to the Auction closing. For any successful bid placed by a consignor on his Property on the Auction floor, or by any means during the live session, or after the "Minimum Bid" for an Auction have been posted, we will require the consignor to pay full Buyer's Premium and Seller's Commissions on such lot.
14. The highest qualified Bidder recognized by the Auctioneer shall be the buyer. In the event of any dispute between any Bidders at an Auction, Auctioneer may at his sole discretion reoffer the lot. Auctioneer's decision and declaration of the winning Bidder shall be final and binding upon all Bidders. Bids properly offered, whether by floor Bidder or other means of bidding, may on occasion be missed or go unrecognized; in such cases, the Auctioneer may declare the recognized bid accepted as the winning bid, regardless of whether a competing bid may have been higher.
15. Auctioneer reserves the right to refuse to honor any bid or to limit the amount of any bid, in its sole discretion. A bid is considered not made in "Good Faith" when made by an insolvent or irresponsible person, a person under the age of eighteen, or is not supported by satisfactory credit, collectibles references, or otherwise. Regardless of the disclosure of his identity, any bid by a consignor or his agent on a lot consigned by him is deemed to be made in "Good Faith." Any person apparently appearing on the OFAC list is not eligible to bid.
16. Nominal Bids. The Auctioneer in its sole discretion may reject nominal bids, small opening bids, or very nominal advances. If a lot bearing estimates fails to open for 40–60% of the low estimate, the Auctioneer may pass the item or may place a protective bid on behalf of the consignor.
17. Lots bearing bidding estimates shall open at Auctioneer's discretion (approximately 50% of the low estimate). In the event that no bid meets or exceeds that opening amount, the lot shall pass as unsold.
18. All items are to be purchased per lot as numerically indicated and no lots will be broken. Auctioneer reserves the right to withdraw, prior to the close, any lots from the Auction.
19. Auctioneer reserves the right to rescind the sale in the event of nonpayment, breach of a warranty, disputed ownership, auctioneer's clerical error or omission in exercising bids and reserves, or for any other reason and in Auctioneer's sole discretion. In cases of nonpayment, Auctioneer's election to void a sale does not relieve the Bidder from their obligation to pay Auctioneer its fees (seller's and buyer's premium) and any other damages or expenses pertaining to the lot.
20. Auctioneer occasionally experiences Internet and/or Server service outages, and Auctioneer periodically schedules system downtime for maintenance and other purposes, during which Bidders cannot participate or place bids. If such outages occur, we may at our discretion extend bidding for the Auction. Bidders unable to place their Bids through the Internet are directed to contact Client Services at 1-800-872-6467.
21. The Auctioneer or its affiliates may consign items to be sold in the Auction, and may bid on those lots or any other lots. Auctioneer or affiliates expressly reserve the right to modify any such bids at any time prior to the hammer based upon data made known to the Auctioneer or its affiliates. The Auctioneer may extend advances, guarantees, or loans to certain consignors, and may extend financing or other credits at varying rates to certain Bidders in the auction.
22. The Auctioneer has the right to sell certain unsold items after the close of the Auction. Such lots shall be considered sold during the Auction and all these Terms and Conditions shall apply to such sales including but not limited to the Buyer's Premium, return rights, and disclaimers.

**Payment:**

23. All sales are strictly for cash in United States dollars (including U.S. currency, bank wire, cashier checks, travelers checks, eChecks, and bank money orders, all subject to reporting requirements). All are subject to clearing and funds being received In Auctioneer's account before delivery of the purchases. Auctioneer reserves the right to determine if a check constitutes "good funds" when drawn on a U.S. bank for ten days, and thirty days when drawn on an international bank. Credit Card (Visa or Master Card only) and PayPal payments may be accepted up to $10,000 from non-dealers at the sole discretion of the Auctioneer, subject to the following limitations: a) sales are only to the cardholder, b) purchases are shipped to the cardholder's registered and verified address, c) Auctioneer may pre-approve the cardholder's credit line, d) a credit card transaction may not be used in conjunction with any other financing or extended terms offered by the Auctioneer, and must transact immediately upon invoice presentation, e) rights of return are governed by these Terms and Conditions, which supersede those conditions promulgated by the card issuer, f) floor Bidders must present their card.
24. Payment is due upon closing of the Auction session, or upon presentment of an invoice. Auctioneer reserves the right to void an invoice if payment in full is not received within 7 days after the close of the Auction. In cases of nonpayment, Auctioneer's election to void a sale does not relieve the Bidder from their obligation to pay Auctioneer its fees (seller's and buyer's premium) on the lot and any other damages pertaining to the lot.
25. Lots delivered in the States of Texas, California, or other states where the Auction may be held, are subject to all applicable state and local taxes, unless appropriate permits are on file with Auctioneer. Bidder agrees to pay Auctioneer the actual amount of tax due in the event that sales tax is not properly collected due to: 1) an expired, inaccurate, inappropriate tax certificate or declaration, 2) an incorrect interpretation of the applicable statute, 3) or any other reason. The appropriate form or certificate must be on file at and verified by Auctioneer five days prior to Auction or tax must be paid; only if such form or certificate is received by Auctioneer within 4 days after the Auction can a refund of tax paid be made. Lots from different Auctions may not be aggregated for sales tax purposes.
26. In the event that a Bidder's payment is dishonored upon presentment(s), Bidder shall pay the maximum statutory processing fee set by applicable state law. If you attempt to pay via eCheck and your financial institution denies this transfer from your bank account, or the payment cannot be completed using the selected funding source, you agree to complete payment using your credit card on file.
27. If any Auction invoice submitted by Auctioneer is not paid in full when due, the unpaid balance will bear interest at the highest rate permitted by law from the date of invoice until paid. If the Auctioneer refers any invoice to an attorney for collection, the buyer agrees to pay attorney's fees, court costs, and other collection costs incurred by Auctioneer. If Auctioneer assigns collection to its in-house legal staff, such attorney's time expended on the matter shall be compensated at a rate comparable to the hourly rate of independent attorneys.

28. In the event a successful Bidder fails to pay any amounts due, Auctioneer reserves the right to sell the lot(s) securing the invoice to any underbidders in the Auction that the lot(s) appeared, or at subsequent private or public sale, or relist the lot(s) in a future auction conducted by Auctioneer. A defaulting Bidder agrees to pay for the reasonable costs of resale (including a 10% seller's commission, if consigned to an auction conducted by Auctioneer). The defaulting Bidder is liable to pay any difference between his total original invoice for the lot(s), plus any applicable interest, and the net proceeds for the lot(s) if sold at private sale or the subsequent hammer price of the lot(s) less the 10% seller's commissions, if sold at an Auctioneer's auction
29. Auctioneer reserves the right to require payment in full in good funds before delivery of the merchandise.
30. Auctioneer shall have a lien against the merchandise purchased by the buyer to secure payment of the Auction invoice. Auctioneer is further granted a lien and the right to retain possession of any other property of the buyer then held by the Auctioneer or its affiliates to secure payment of any Auction invoice or any other amounts due the Auctioneer or affiliates from the buyer. With respect to these lien rights, Auctioneer shall have all the rights of a secured creditor under Article 9 of the Texas Uniform Commercial Code, including but not limited to the right of sale. In addition, with respect to payment of the Auction invoice(s), the buyer waives any and all rights of offset he might otherwise have against the Auctioneer and the consignor of the merchandise included on the invoice. If a Bidder owes Auctioneer or its affiliates on any account, Auctioneer and its affiliates shall have the right to offset such unpaid account by any credit balance due Bidder, and it may secure by possessory lien any unpaid amount by any of the Bidder's property in their possession.
31. Title shall not pass to the successful Bidder until all invoices are paid in full. It is the responsibility of the buyer to provide adequate insurance coverage for the items once they have been delivered to a common carrier or third-party shipper.

**Delivery; Shipping; and Handling Charges:**

32. Buyer is liable for shipping and handling. Please refer to Auctioneer's website www.HA.com/common/shipping.php for the latest charges or call Auctioneer. Auctioneer is unable to combine purchases from other auctions or affiliates into one package for shipping purposes. Lots won will be shipped in a commercially reasonable time after payment in good funds for the merchandise and the shipping fees is received or credit extended, except when third-party shipment occurs.
33. Successful international Bidders shall provide written shipping instructions, including specified customs declarations, to the Auctioneer for any lots to be delivered outside of the United States. NOTE: Declaration value shall be the item'(s) hammer price together with its buyer's premium and Auctioneer shall use the correct harmonized code for the lot. Domestic Buyers on lots designated for third-party shipment must designate the common carrier, accept risk of loss, and prepay shipping costs.
34. All shipping charges will be borne by the successful Bidder. Any risk of loss during shipment will be borne by the buyer following Auctioneer's delivery to the designated common carrier or third-party shipper, regardless of domestic or foreign shipment.
35. Due to the nature of some items sold, it shall be the responsibility for the successful bidder to arrange pick-up and shipping through third-parties; as to such items Auctioneer shall have no liability. Failure to pick-up or arrange shipping in a timely fashion (within ten days) shall subject Lots to storage and moving charges, including a $100 administration fee plus $10 daily storage for larger items and $5.00 daily for smaller items (storage fee per item) after 35 days. In the event the Lot is not removed within ninety days, the Lot may be offered for sale to recover any past due storage or moving fees, including a 10% Seller's Commission.
36. The laws of various countries regulate the import or export of certain plant and animal properties, including (but not limited to) items made of (or including) ivory, whalebone, turtleshell, coral, crocodile, or other wildlife. Transport of such lots may require special licenses for export, import, or both. Bidder is responsible for: 1) obtaining all information on such restricted items for both export and import; 2) obtaining all such licenses and/or permits. Delay or failure to obtain any such license or permit does not relieve the buyer of timely compliance with standard payment terms. For further information, please contact Bill Taylor at 800-872-6467 ext. 1280.
37. Any request for shipping verification for undelivered packages must be made within 30 days of shipment by Auctioneer.

**Cataloging, Warranties and Disclaimers:**

38. NO WARRANTY, WHETHER EXPRESSED OR IMPLIED, IS MADE WITH RESPECT TO ANY DESCRIPTION CONTAINED IN THIS AUCTION OR ANY SECOND OPINE. Any description of the items or second opine contained in this Auction is for the sole purpose of identifying the items for those Bidders who do not have the opportunity to view the lots prior to bidding, and no description of items has been made part of the basis of the bargain or has created any express warranty that the goods would conform to any description made by Auctioneer. Color variations can be expected in any electronic or printed imaging, and are not grounds for the return of any lot.
39. Auctioneer is selling only such right or title to the items being sold as Auctioneer may have by virtue of consignment agreements on the date of auction and disclaims any warranty of title to the Property. Auctioneer disclaims any warranty of merchantability or fitness for any particular purposes. All images, descriptions, sales data, and archival records are the exclusive property of Auctioneer, and may be used by Auctioneer for advertising, promotion, archival records, and any other uses deemed appropriate.
40. Translations of foreign language documents may be provided as a convenience to interested parties. Auctioneer makes no representation as to the accuracy of those translations and will not be held responsible for errors in bidding arising from inaccuracies in translation.
41. Auctioneer disclaims all liability for damages, consequential or otherwise, arising out of or in connection with the sale of any Property by Auctioneer to Bidder. No third party may rely on any benefit of these Terms and Conditions and any rights, if any, established hereunder are personal to the Bidder and may not be assigned. Any statement made by the Auctioneer is an opinion and does not constitute a warranty or representation. No employee of Auctioneer may alter these Terms and Conditions, and, unless signed by a principal of Auctioneer, any such alteration is null and void.
42. Auctioneer shall not be liable for breakage of glass or damage to frames (patent or latent); such defects, in any event, shall not be a basis for any claim for return or reduction in purchase price.

**Release:**

43. In consideration of participation in the Auction and the placing of a bid, Bidder expressly releases Auctioneer, its officers, directors and employees, its affiliates, and its outside experts that provide second opines, from any and all claims, cause of action, chose of action, whether at law or equity or any arbitration or mediation rights existing under the rules of any professional society or affiliation based upon the assigned description, or a derivative theory, breach of warranty express or implied, representation or other matter set forth within these Terms and Conditions of Auction or otherwise. In the event of a claim, Bidder agrees that such rights and privileges conferred therein are strictly construed as specifically declared herein; e.g., authenticity, typographical error, etc. and are the exclusive remedy. Bidder, by non-compliance to these express terms of a granted remedy, shall waive any claim against Auctioneer.
44. Notice: Some Property sold by Auctioneer are inherently dangerous e.g. firearms, cannons, and small items that may be swallowed or ingested or may have latent defects all of which may cause harm to a person. Purchaser accepts all risk of loss or damage from its purchase of these items and Auctioneer disclaims any liability whether under contract or tort for damages and losses, direct or inconsequential, and expressly disclaims any warranty as to safety or usage of any lot sold.

**Dispute Resolution and Arbitration Provision:**

45. By placing a bid or otherwise participating in the auction, Bidder accepts these Terms and Conditions of Auction, and specifically agrees to the alternative dispute resolution provided herein. Arbitration replaces the right to go to court, including the right to a jury trial.
46. Auctioneer in no event shall be responsible for consequential damages, incidental damages, compensatory damages, or any other damages arising or claimed to be arising from the auction of any lot. In the event that Auctioneer cannot deliver the lot or subsequently it is established that the lot lacks title, or other transfer or condition issue is claimed, In such cases the sole remedy shall be limited to rescission of sale and refund of the amount paid by Bidder; in no case shall Auctioneer's maximum liability exceed the high bid on that lot, which bid shall be deemed for all purposes the value of the lot. After one year has elapsed, Auctioneer's maximum liability shall be limited to any commissions and fees Auctioneer earned on that lot.
47. In the event of an attribution error, Auctioneer may at its sole discretion, correct the error on the Internet, or, if discovered at a later date, to refund the buyer's purchase price without further obligation.
48. Arbitration Clause: All controversies or claims under this Agreement or arising from or pertaining to: this Agreement or related documents, or to the Properties consigned hereunder, or the enforcement or interpretation hereof of this or any related agreements, or damage to Properties, payment, or any other matter, or because of an alleged breach, default or misrepresentation under the provisions hereof or otherwise, that cannot be settled amicably within one (1) month from the date of notification of either party to the other of such dispute or question, which notice shall specify the details of such dispute or question, shall be settled by final and binding arbitration by one arbitrator appointed by the American Arbitration Association ("AAA"). The arbitration shall be conducted in Dallas, Dallas County, Texas in accordance with the then existing Commercial Arbitration Rules of the AAA. The arbitration shall be brought within two (2) years of the alleged breach, default or misrepresentation or the claim is waived. The prevailing party (a party that is awarded substantial and material relief on its claim or defense) may be awarded its reasonable attorney's fees and costs. Judgment upon the award rendered by the arbitrator may be entered in any court having jurisdiction thereof; provided, however, that the law applicable to any controversy shall be the law of the State of Texas, regardless of its or any other jurisdiction's choice of law principles and under the provisions of the Federal Arbitration Act.
49. No claims of any kind can be considered after the settlements have been made with the consignors. Any dispute after the settlement date is strictly between the Bidder and consignor without involvement or responsibility of the Auctioneer.
50. In consideration of their participation in or application for the Auction, a person or entity (whether the successful Bidder, a Bidder, a purchaser and/or other Auction participant or registrant) agrees that all disputes in any way relating to, arising under, connected with, or incidental to these Terms and Conditions and purchases, or default in payment thereof, shall be arbitrated pursuant to the arbitration provision. In the event that any matter including actions to compel arbitration, construe the agreement, actions in aid or arbitration or otherwise needs to be litigated, such litigation shall be exclusively in the Courts of the State of Texas, in Dallas County, Texas, and if necessary the corresponding appellate courts. For such actions, the successful Bidder, purchaser, or Auction participant also expressly submits himself to the personal jurisdiction of the State of Texas.
51. These Terms & Conditions provide specific remedies for occurrences in the auction and delivery process. Where such remedies are afforded, they shall be interpreted strictly. Bidder agrees that any claim shall utilize such remedies; Bidder making a claim in excess of those remedies provided in these Terms and Conditions agrees that in no case whatsoever shall Auctioneer's maximum liability exceed the high bid on that lot, which bid shall be deemed for all purposes the value of the lot.

**Miscellaneous:**

52. Agreements between Bidders and consignors to effectuate a non-sale of an item at Auction, inhibit bidding on a consigned item to enter into a private sale agreement for said item, or to utilize the Auctioneer's Auction to obtain sales for non-selling consigned items subsequent to the Auction, are strictly prohibited. If a subsequent sale of a previously consigned item occurs in violation of this provision, Auctioneer reserves the right to charge Bidder the applicable Buyer's Premium and consignor a Seller's Commission as determined for each auction venue and by the terms of the seller's agreement.
53. Acceptance of these Terms and Conditions qualifies Bidder as a client who has consented to be contacted by Heritage in the future. In conformity with "do-not-call" regulations promulgated by the Federal or State regulatory agencies, participation by the Bidder is affirmative consent to being contacted at the phone number shown in his application and this consent shall remain in effect until it is revoked in writing. Heritage may from time to time contact Bidder concerning sale, purchase, and auction opportunities available through Heritage and its affiliates and subsidiaries.
54. Rules of Construction: Auctioneer presents properties in a number of collectible fields, and as such, specific venues have promulgated supplemental Terms and Conditions. Nothing herein shall be construed to waive the general Terms and Conditions of Auction by these additional rules and shall be construed to give force and effect to the rules in their entirety.

**State Notices:**

Notice as to an Auction in California. Auctioneer has in compliance with Title 2.95 of the California Civil Code as amended October 11, 1993 Sec. 1812.600, posted with the California Secretary of State its bonds for it and its employees, and the auction is being conducted in compliance with Sec. 2338 of the Commercial Code and Sec. 535 of the Penal Code.

Notice as to an Auction in New York City. These Terms and Conditions are designed to conform to the applicable sections of the New York City Department of Consumer Affairs Rules and Regulations as Amended. This is a Public Auction Sale conducted by Auctioneer. The New York City licensed Auctioneers are Kathleen Guzman, No.0762165, and Samuel W. Foose, No.0952360, who will conduct the Auction on behalf of Heritage Auctions, Inc. ("Auctioneer"). All lots are subject to: the consignor's right to bid thereon in accord with these Terms and Conditions of Auction, consignor's option to receive advances on their consignments, and Auctioneer, in its sole discretion, may offer limited extended financing to registered bidders, in accord with Auctioneer's internal credit standards. A registered bidder may inquire whether a lot is subject to an advance or reserve. Auctioneer has made advances to various consignors in this sale.

Notice as to an Auction in Texas. In compliance with TDLR rule 67.100(c)(1), notice is hereby provided that this auction is covered by a Recovery Fund administered by the Texas Department of Licensing and Regulation, P.O. Box 12157, Austin, Texas 78711 (512) 463-6599. Any complaints may be directed to the same address.

## Additional Terms & Conditions: COINS & CURRENCY

COINS and CURRENCY TERM A: Signature. Auctions are not on approval. No certified material may be returned because of possible differences of opinion with respect to the grade offered by any third-party organization, dealer, or service. No guarantee of grade is offered for uncertified Property sold and subsequently submitted to a third-party grading service. There are absolutely no exceptions to this policy. Under extremely limited circumstances, (e.g. gross cataloging error) a purchaser, who did not bid from the floor, may request Auctioneer to evaluate voiding a sale: such request must be made in writing detailing the alleged gross error; submission of the lot to the Auctioneer must be pre-approved by the Auctioneer; and bidder must notify Ron Brackemyre (1-800-8726467 Ext. 1312) in writing of such request within three (3) days of the non-floor bidder's receipt of the lot. Any lot that is to be evaluated must be in our offices within 30 days after Auction. Grading or method of manufacture do not qualify for this evaluation process nor do such complaints constitute a basis to challenge the authenticity of a lot. AFTER THAT 30-DAY PERIOD, NO LOTS MAY BE RETURNED FOR REASONS OTHER THAN AUTHENTICITY. Lots returned must be housed intact in their original holder. No lots purchased by floor Bidders may be returned (including those Bidders acting as agents for others) except for authenticity. Late remittance for purchases may be considered just cause to revoke all return privileges.

COINS and CURRENCY TERM B: Auctions conducted solely on the Internet THREE (3) DAY RETURN POLICY: Certified Coin and Uncertified and Certified Currency lots paid for within seven days of the Auction closing are sold with a three (3) day return privilege. You may return lots under the following conditions: Within three days of receipt of the lot, you must first notify Auctioneer by contacting Client Service by phone (1-800-872-6467) or e-mail (Bid@HA.com), and immediately ship the lot(s) fully insured to the attention of Returns, Heritage, 3500 Maple Avenue, 17th Floor, Dallas TX 75219-3941. Lots must be housed intact in their original holder and condition. You are responsible for the insured, safe delivery of any lots. A non-negotiable return fee of 5% of the purchase price ($10 per lot minimum) will be deducted from the refund for each returned lot or billed directly. Postage and handling fees are not refunded. After the three-day period (from receipt), no items may be returned for any reason. Late remittance for purchases revokes these Return privileges.

COINS and CURRENCY TERM C: Bidders who have inspected the lots prior to any Auction, or attended the Auction, or bid through an Agent, will not be granted any return privileges, except for reasons of authenticity.

COINS and CURRENCY TERM D: Coins sold referencing a third-party grading service are sold "as is" without any express or implied warranty, except for a guarantee by Auctioneer that they are genuine. Certain warranties may be available from the grading services and the Bidder is referred to them for further details: Numismatic Guaranty Corporation (NGC), P.O. Box 4776, Sarasota, FL 34230; Professional Coin Grading Service (PCGS), PO Box 9458, Newport Beach, CA 92658; ANACS, 6555 S. Kenton St. Ste. 303, Englewood, CO 80111; and Independent Coin Grading Co. (ICG), 7901 East Belleview Ave., Suite 50, Englewood, CO 80111.

COINS and CURRENCY TERM E: Notes sold referencing a third-party grading service are sold "as is" without any express or implied warranty, except for guarantee by Auctioneer that they are genuine. Grading, condition or other attributes of any lot may have a material effect on its value, and the opinion of others, including third-party grading services such as PCGS Currency, PMG, and CGA may differ with that of Auctioneer. Auctioneer shall not be bound by any prior or subsequent opinion, determination, or certification by any grading service. Bidder specifically waives any claim to right of return of any item because of the opinion, determination, or certification, or lack thereof, by any grading service. Certain warranties may be available from the grading services and the Bidder is referred to them for further details: Paper Money Guaranty (PMG), PO Box 4711, Sarasota FL 34230; PCGS Currency, PO Box 9458, Newport Beach, CA 92658; Currency Grading & Authentication (CGA), PO Box 418, Three Bridges, NJ 08887. Third party graded notes are not returnable for any reason whatsoever.

COINS and CURRENCY TERM F: Since we cannot examine encapsulated coins or notes, they are sold "as is" without our grading opinion, and may not be returned for any reason. Auctioneer shall not be liable for any patent or latent defect or controversy pertaining to or arising from any encapsulated collectible. In any such instance, purchaser's remedy, if any, shall be solely against the service certifying the collectible.

COINS and CURRENCY TERM G: Due to changing grading standards over time, differing interpretations, and to possible mishandling of items by subsequent owners, Auctioneer reserves the right to grade items differently than shown on certificates from any grading service that accompany the items. Auctioneer also reserves the right to grade items differently than the grades shown in the prior catalog should such items be reconsigned to any future auction.

COINS and CURRENCY TERM H: Although consensus grading is employed by most grading services, it should be noted as aforesaid that grading is not an exact science. In fact, it is entirely possible that if a lot is broken out of a plastic holder and resubmitted to another grading service or even to the same service, the lot could come back with a different grade assigned.

COINS and CURRENCY TERM I: Certification does not guarantee protection against the normal risks associated with potentially volatile markets. The degree of liquidity for certified coins and collectibles will vary according to general market conditions and the particular lot involved. For some lots there may be no active market at all at certain points in time.

COINS and CURRENCY TERM J: All non-certified coins and currency are guaranteed genuine, but are not guaranteed as to grade, since grading is a matter of opinion, an art and not a science, and therefore the opinion rendered by the Auctioneer or any third party grading service may not agree with the opinion of others (including trained experts), and the same expert may not grade the same item with the same grade at two different times. Auctioneer has graded the non-certified numismatic items, in the Auctioneer's opinion, to their current interpretation of the American Numismatic Association's standards as of the date the catalog was prepared. There is no guarantee or warranty implied or expressed that the grading standards utilized by the Auctioneer will meet the standards of any grading service at any time in the future.

COINS and CURRENCY TERM K: Storage of purchased coins and currency: Purchasers are advised that certain types of plastic may react with a coin's metal or transfer plasticizer to notes and may cause damage. Caution should be used to avoid storage in materials that are not inert.

COINS and CURRENCY TERM L: Storage of purchased coins and currency: Purchasers are advised that certain types of plastic may react with a coin's metal or transfer plasticizer to notes and may cause damage. Caution should be used to avoid storage in materials that are not inert.

COINS and CURRENCY TERM M: NOTE: Purchasers of rare coins or currency through Heritage have available the option of arbitration by the Professional Numismatists Guild (PNG); if an election is not made within ten (10) days of an unresolved dispute, Auctioneer may elect either PNG or A.A.A. Arbitration.

COINS and CURRENCY TERM N: For more information regarding Canadian lots attributed to the Charlton reference guides, please contact: Charlton International, PO Box 820, Station Willowdale B, North York, Ontario M2K 2R1 Canada.

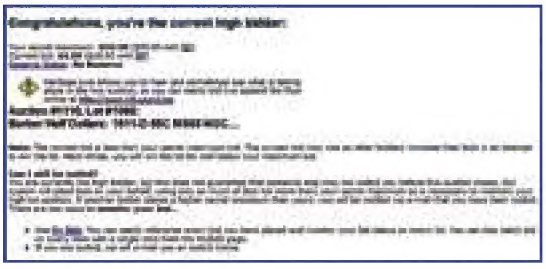
# Your five most effective bidding techniques:

## 1 Interactive Internet™ Proxy Bidding

**(leave your maximum Bid at HA.com before the auction starts)**

**Heritage's exclusive Interactive Internet™ system is fun and easy! Before you start, you must register online at HA.com and obtain your Username and Password.**

1. Login to the HA.com website, using your Username and Password.
2. Chose the specialty you're interested in at the top of the homepage (i.e. coins, currency, comics, movie posters, fine art, etc.).
3. Search or browse for the lots that interest you. Every auction has search features and a 'drop-down' menu list.
4. Select a lot by clicking on the link or the photo icon. Read the description, and view the full-color photography. Note that clicking on the image will enlarge the photo with amazing detail.
5. View the current opening bid. Below the lot description, note the historic pricing information to help you establish price levels. Clicking on a link will take you directly to our Permanent Auction Archives for more information and images.
6. If the current price is within your range, Bid! At the top of the lot page is a box containing the Current Bid and an entry box for your "Secret Maximum Bid" – the maximum amount you are willing to pay for the item before the Buyer's Premium is added. Click the button marked "Place Bid" (if you are not logged in, a login box will open first so you can enter your username (or e-mail address) and password.
7. After you are satisfied that all the information is correct, confirm your "Secret Maximum Bid" by clicking on the "Confirm Absentee Bid" button. You will receive immediate notification letting you know if you are now the top bidder, or if another bidder had previously bid higher than your amount. If you bid your maximum amount and someone has already bid higher, you will immediately know so you can concentrate on other lots.
8. Before the auction, if another bidder surpasses your "Secret Maximum Bid", you will be notified automatically by e-mail containing a link to review the lot and possibly bid higher.
9. Interactive Internet™ bidding closes at 10 P.M. Central Time the night before the session is offered in a floor event. Interactive Internet™ bidding closes two hours before live sessions where there is no floor bidding.
10. The Interactive Internet™ system generally opens the lot at the next increment above the second highest bid. As the high bidder, your "Secret Maximum Bid" will compete for you during the floor auction. Of course, it is possible in a Signature® or Grand Format live auction that you may be outbid on the floor or by a Heritage Live bidder after Internet bidding closes. Bid early, as the earliest bird wins in the event of a tie bid. For more information about bidding and bid increments, please see the section labeled "Bidding Increments" elsewhere in this catalog.
11. After the auction, you will be notified of your success. It's that easy!

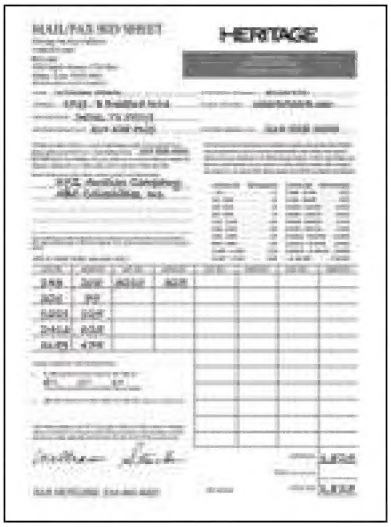


## 2 HERITAGE Live!™ Bidding
**(participate in the Live auction via the Internet)**

1. Look on each auction's homepage to verify whether that auction is "HA.com/Live Enabled." All Signature® and Grand Format auctions use the HERITAGE Live!™ system, and many feature live audio and/or video. Determine your lots of interest and maximum bids.
2. Note on the auction's homepage the session dates and times (and especially time zones!) so you can plan your participation. You actually have two methods of using HERITAGE Live!™: a) you can leave a proxy bid through this system, much like the Interactive Internet™ (we recommend you do this before the session starts), or b) you can sit in front of your computer much as the audience is sitting in the auction room during the actual auction.
3. Login at HA.com/Live.
4. Until you become experienced (and this happens quickly!) you will want to login well before your lot comes up so you can watch the activity on other lots. It is as intuitive as participating in a live auction.
5. When your lot hits the auction block, you can continue to bid live against the floor and other live bidders by simply clicking the "Bid" button; the amount you are bidding is clearly displayed on the console.

## 3 Mail Bidding
**(deposit your maximum Bid with the U.S.P.S. well before the auction starts)**

**Mail bidding at auction is fun and easy, but by eliminating the interactivity of our online systems, some of your bids may be outbid before you lick the stamp, and you will have no idea of your overall chances until the auction is over!**



1. Look through the printed catalog, and determine your lots of interest.
2. Research their market value by checking price lists and other price guidelines.
3. Fill out your bid sheet, entering your maximum bid on each lot. Bid using whole dollar amounts only. Verify your bids, because you are responsible for any errors you make! Please consult the Bidding Increments chart in the Terms & Conditions.
4. Please fill out your bid sheet completely! We also need: a) Your name and complete address for mailing invoices and lots; b) Your telephone number if any problems or changes arise; c) Your references; if you have not established credit with Heritage, you must send a 25% deposit, or list dealers with whom you have credit established; d) Total your bid sheet; add up all bids and list that total in the box; e) Sign your bid sheet, thereby agreeing to abide by the Terms & Conditions of Auction printed in the catalog.
5. Mail early, because preference is given to the first bid received in case of a tie.
6. When bidding by mail, you frequently purchase items at less than your maximum bid. Bidding generally opens at the next published increment above the second highest mail or Internet bid previously received; if additional floor, phone, or HERITAGE Live!™ bids are made, we act as your agent, bidding in increments over any additional bid until you win the lot or are outbid. For example, if you submitted a bid of $750, and the second highest bid was $375, bidding would start at $400; if no other bids were placed, you would purchase the lot for $400.
7. You can also Fax your Bid Sheet if time is short. Use our exclusive Fax Hotline: 214-443-8425.

## 4 Telephone Bidding (when you are traveling, or do not have access to HERITAGE Live!™)

1. To participate in an auction by telephone, you must make preliminary arrangements with Client Services (Toll Free 866-835-3243) at least three days before the auction.
2. We strongly recommend that you place preliminary bids by mail or Internet if you intend to participate by telephone. On many occasions, this dual approach has reduced disappointments due to telephone (cell) problems, unexpected travel, late night sessions, and time zone differences. Keep a list of your preliminary bids, and we will help you avoid bidding against yourself.

## 5 Attend in Person (whenever possible)

Auctions are fun, and we encourage you to attend as many as possible – although our HERITAGE Live!™ system brings all of the action right to your computer screen. Auction dates and session times are printed on the title page of each catalog, and appear on the homepage of each auction at HA.com. Join us if you can!

We're collectors too, and we understand that on occasion there is more to buy than there is cash. Consider Heritage's Extended Payment Plan [EPP] for your purchases totaling $2,500 or more.

**Extended Payment Plan [EPP] Conditions**

- Minimum invoice total is $2,500.
- Minimum Down Payment is 25% of the total invoice.
- A signed and returned EPP Agreement is required.
- The EPP is subject to a 3% *fully refundable* Set-up Fee (based on the total invoice amount) payable as part of the first monthly payment.
- The 3% Set-up Fee is refundable provided all monthly payments are made by eCheck, bank draft, personal check drawn on good funds, or cash; and if all such payments are made according to the EPP schedule.
- Monthly payments can be automatically processed with an eCheck, Visa, or MasterCard.
- You may take up to four equal monthly payments to pay the balance.
- Interest is calculated at only 1% per month on the unpaid balance.
- Your EPP must be kept current or additional interest may apply.
- There is no penalty for paying off early.
- Shipment will be made when final payment is received.
- All traditional auction and sales policies still apply.

**There is no return privilege once you have confirmed your sale, and penalties can be incurred on cancelled invoices. To avoid additional fees, you must make your down payment within 14 days of the auction. All material purchased under the EPP will be physically secured by Heritage until paid in full.**

To exercise the EPP option, please notify **Eric Thomas** at **214.409.1241** or email at **EricT@HA.com** upon receipt of your invoice.

We appreciate your business and wish you good luck with your bidding.

# Jim O'Neal…The Executive

Jim O'Neal is a native of Oklahoma, but his family moved to Southern California when he was two years old. Jim and his wife Nancy (a fourth-generation Californian) both grew up there and met in High School. They celebrated their 50th wedding anniversary in 2008 and are happily working on their second fifty years together! After relocating from the Bay Area in 1971, Dallas has been their primary residence. They have maintained their California roots and spend several months every year at their ocean front home in the San Diego area to avoid Dallas' summer heat and colder winter months.

Jim joined the Frito-Lay Company in 1966 shortly after the merger with Pepsi-Cola that created Pepsi-Co. That global brand power-house now includes Quaker Oats, Tropicana, Aqua Fina, Gatorade, and dozens of regional brands in virtually every country in the world. After a series of promotions he became Senior Vice President of Operations with direct responsibility for manufacturing, logistics, purchasing, industrial engineering, quality assurance, and technical services. With forty plants in twenty-seven states and one of the largest private motor fleets in the United States, it ensured Americans in every town and city are guaranteed access to all their snack favorites.

In 1991, Jim and Nancy moved to London when he became President & CEO for the Europe Group. This included the company's operations in the U.K, Western and Eastern Europe, the Middle East, and Africa. They returned to Dallas in 1996 when Jim was promoted to Chairman and CEO of PepsiCo Restaurants International. His responsibilities included all company-owned and franchise-operated restaurant operations for KFC, Pizza Hut, and Taco Bell. The portfolio consisted of 8,000+ restaurants in over 100 countries.

Following an extensive strategic review and major restructuring, all restaurant operations were spun-off into a separate company: YUM! Brands Inc. That has become the world's largest restaurant company, with more than 35,000 units in 110 countries. Following the spin-off, Jim became President & CEO of Frito-Lay International, where he had full P&L responsibility for the Division's operations in 42 countries and system-wide revenues in excess of $5 billion. It was from this position that he retired from PepsiCo, capping a distinguished career spanning thirty-five years.

Jim is currently Chairman of Pacesetter Capital, a Dallas-based venture capital fund, a member of the Johns Hopkins Urology Advisory Board, and a Board member of River Point Farms (America's largest grower, packer, producer, and shipper of onions). He is also a contributing partner to Cardinal Investment Company (CIC), a Dallas private equity fund, and an active member of the Dallas-Ft. Worth Committee of the Heritage Foundation of Washington, D.C.

# Jim O'Neal...The Collector

On a personal level, Jim O'Neal is an avid collector of political memorabilia, presidential campaign pinbacks, presidential biographies, U.S. coinage, and antique wine. In 2005, Heritage Auction Galleries was privileged to auction his extensive United States Currency Collection. In 2008, Heritage also auctioned his complete half eagle Indian Head Collection that was ranked #4 on the All-Time Finest Registry list of collections of Professional Coin Grading Service (PCGS).

He is still a member of PCGS and actively participates in the immensely popular and highly competitive Set Registry program (both innovations of David Hall). The ten dollar Saint-Gaudens set being offered tonight is the #1 All-Time Finest in both the Date Set and Full Circulation Strike categories. Additionally, his second five dollar Indian set is the #1 All-Time Finest in both categories. Both sets hold similar distinctions on the Numismatic Guaranty Corporation (NGC) Registry. Jim has ten other sets that are ranked either #1 or #2.

Earlier, Jim was Board Chairman for Collector's Universe (the parent company of PCGS) and was fortunate to work with the other Directors, including Co-founder & President David Hall, Q. David Bowers, and Van Simmons, all highly regarded numismatists.

Currently Jim is actively assembling what he hopes will one day be a truly world class type set of U.S. coinage. His primary focus is on high grade gold coins, and in early 2008 (along with Dr. Steve Duckor) he co-founded the 20th Century Gold Collector's Club. The membership includes prominent private collectors and some of the top experts and rare coin dealers in the United States.

In addition to Dr. Duckor, Jim O'Neal is lavish in his praise for Kevin Lipton of Beverly Hills for his invaluable assistance in assembling these remarkable collections. He states "Kevin has become a good friend, in addition to being a trusted advisor with a sterling reputation. He has a terrific eye for quality and an encyclopedic memory for both value and rarity." Equally important has been the mentoring of Jim Halperin, Co-Chairman of Heritage. "Jim has been extremely generous in sharing his vast knowledge and expertise which has helped me avoid some of the pitfalls associated with buying relatively expensive rare coins."

"I jokingly call these experts my Brain Trust, a term that was originally applied to a group of Columbia Law professors that FDR used in shaping the first New Deal in 1933, and later to men associated with the Harvard Law School. I feel equally blessed to have access to such astute advice and pragmatic judgment."

It is with great pride that Heritage offers this magnificent collection of Saint-Gaudens tens in our 2009 FUN Platinum Night Auction this evening.

# Extraordinary 1907 Wire Rim Indian Eagle, MS66

**3500 1907 Wire Rim MS66 PCGS.** The Wire Rim (or Wire Edge) eagle is the nearest that the Philadelphia Mint came to reproducing the Indian Head ten dollar design as originally conceived by Augustus Saint-Gaudens and Theodore Roosevelt. The wire rim feature on this design is the result of metal being forced between the collar and the dies during striking. Potential complications in the minting process when applied to mass production, along with other impracticalities, resulted in an immediate alteration of the original design, after just 500 examples of the Wire Rim type were produced in late August to early September of 1907. (A further 42 pieces were struck between late September and December of that year. Eventually, 70 unsold examples were melted in 1915, leaving a net mintage for the Wire Rims of 472 coins, according to Roger Burdette's *Renaissance of American Coinage 1905-1908.)*

Since these coins were never intended for circulation, most of the surviving examples exist in Mint State. When broken down by grade levels, a survey of combined current population data at NGC and PCGS reveals that the majority of pieces are certified at MS63, MS64, or MS65. At the Premium Gem level of preservation, however, this type becomes very scarce. The two companies together have designated just 35 specimens at MS66, and only 8 coins finer (all 8 at MS67).

The next design version was the so-called Rolled Edge variety, which likewise proved to be short-lived. Eventually, a third design type referred to as the "No Periods" variety was adopted for regular issue Indian eagle coinage of 1907.

This is a simply extraordinary 1907 Wire Rim Indian Head eagle whose surfaces are overlaid in rich, satiny luster. Random striations from die polishing are seen in the fields, particularly on the reverse, features that attest to the fact that great care was taken in the production of these coins. The soft, frosted surfaces are primarily yellow-gold in color, with suggestions of delicate green patina accenting the obverse. Even the major design elements are essentially void of handling marks; however, a couple of small abrasions are noted in the right reverse field. A spectacular piece from both numismatic and artistic vantage points. PCGS Population: 16 in 66, 3 finer (11/08).

# Important Premium Gem 1907 Rolled Edge Indian Eagle

**3501 1907 Rolled Edge MS66 PCGS.** Unlike the 1907 Wire Rim Indian gold eagle, the similarly dated Rolled Edge delivery was intended for general circulation. To protect the surfaces and eliminate the problems associated with the high wire rim, the Mint modified the original Indian eagle design to include a protective rim. A total of 31,550 pieces were produced, but concern over possible public criticism caused all but 50 examples to be melted prior to release. The 50 coins that escaped destruction did so either through the Assay Commission or through collectors with inside connections and museums, who obtained examples directly from the Mint.

Some confusion remains in the numismatic community regarding these rare and important coins. They have sometimes been classified as Patterns, and received the Judd number 1775, later changed to Judd-1903. Since they were originally produced for circulation, however, this designation seems inaccurate.

Like the 1907 Saint-Gaudens double eagles, the '07 eagles required two unsuccessful design "trials" before a final design variation was decided upon for circulation. These consisted, respectively, of the so-called Wire Rim (High Relief) version, the Rolled Edge variety, and the final, adopted No Periods design which was completed by Henry Hering and Homer Saint-Gaudens, after the death of Augustus Saint-Gaudens on August 7, 1907. The final design included lower relief on the devices than on the Wire Rim coins, and a rim border similar to that of the Rolled Edge type. This was a protective rim that would protect the coins' devices from excessive wear, and allow them to be stacked atop one another. A letter from Chief Engraver Charles Barber to Philadelphia Mint Superintendent Landis explained his concerns on this subject:

> "Before final adoption of the new design for the Eagle gold coin I beg to call your attention to that which in my judgement is a serious defect namely, the want of border or determinate edge to make a finish to the coin.
>
> "In the present condition of the design and model, the coin when struck is without a border, consequently, when the planchet receives sufficient blow of the press to make the proper impression, there being no edge or place for the metal to flow into, it is forced up between the die and collar making a fin or sharp edge which would not stand attrition, but would soon disappear, leaving a light weight coin that would be rejected by the Banks and custom offices and sub-treasuries.
>
> "There is also another objection to the design in the present condition namely, it will not pile.
>
> "There being no proper border above the relief of the design for the coins to rest upon, it is dependant (*sic*) upon the convexity of the die to make the concavity of the coin sufficient to clear the relief of the design when the coins are put face to face.
>
> "As the convexity of the die cannot be fixed and is liable to change in the process of tempering the steel, and also in striking the pieces, it will be seen,

that there is no reliable provision made to cover this requisite in these coins, and therefore, the pieces have no proper seat, but are resting in some cases upon a sharp edge and in others upon the shoulder of the Eagle.

"To overcome this defect I would suggest that a border be turned in the die as shown in coin exhibit No. 2, I think you will agree with me that this change in no way detracts from any claim that may be made for artistic excellence, but on the contrary adds to the appearance of the coin and overcomes the objections mentioned above. This change will cause but little delay in the issuing of the coin and can be completed long before the models are sent us for the Double Eagle.

"Awaiting your instructions in regard to this matter, I am
Respectfully,"

(Letter dated August 26, 1907. Per Roger Burdette's *Renaissance of American Coinage 1905-1908,* p. 111)

This is a typically attractive coin for the issue with exemplary luster characteristics. Both sides are drenched in rich reddish-gold and orange-gold colors with a pleasing blend of satin and frosty features. The strike is a little soft in the centers—a diagnostic trait of the issue—and the otherwise pristine surfaces reveal a few tiny specks in the left, upper, and lower right reverse fields. An obviously important coin for the advanced Indian eagle collector. Population: 14 in 66, 3 finer (11/08).
*From The Jim O'Neal Collection of Saint-Gaudens $10 Indians*. (#8851)

# Singular MS68 1907 No Periods Ten

**3502 1907 No Periods MS68 PCGS.** Most collectors know Augustus Saint-Gaudens was the most prominent sculptor of his time, as well as the designer of the eagle and double eagle that still bear his name. In 1906 and the first half of 1907, Augustus Saint-Gaudens' health was deteriorating rapidly. However, an enthusiastic President Roosevelt insisted on holding Saint-Gaudens to his promise to create models of the ten and twenty dollar gold coins the two had discussed in 1905. Saint-Gaudens was, indeed, dragging his feet on completing this project. In addition to a loss of energy brought on by his declining health, he also had other sculptural commissions to complete in 1906 and 1907. Despite these conflicts, on December 15, 1906, models for the two large denomination gold coins were delivered to the Executive Mansion.

The 1907 Wire Rim eagle represented the first attempt by Saint-Gaudens to execute an Indian Head design in U.S. gold which was, in reality, a left facing portrait of Liberty adorned with an Indian headdress. The name of this variety stems from the delicate, knife-like rim that both sides display. This feature is the result of metal being forced between the collar and the dies during striking; the coins were not originally designed with a defined rim. The wire rim on both sides had the potential to interfere with the ejection process, was highly susceptible to abrasions, and also caused stacking problems. These considerations explain why the Mint did not adopt Saint-Gaudens' original design for circulation.

When the original Wire Rim design was found to be impractical and unsatisfactory for normal production, Charles Barber, Chief Engraver of the Mint, made noticeable modifications, particularly to the edge. He was satisfied with the second version, the so-called Rolled Edge variety, and a large number of these were struck in anticipation of placing them in circulation. Correspondence from the Mint indicates $315,000 worth of newly designed Rolled Edge eagles (31,500 pieces) were struck. Despite Barber's satisfaction, Superintendent of the Mint John Landis was unhappy, and he indicated as much in a letter dated September 25, 1907, to Director of the Mint Frank Leach. With the letter, Landis enclosed two examples of the new 1907 eagle design: one the Rolled Edge version, the other a new improved version which subsequently became known as the No Periods or regular issue. These coins were submitted with the following comments:

> "You will notice that the eagle from the last model (No Periods) is a great improvement over those of the first model (the Rolled Edge). The latter are indefinite in detail and outline, not being at all sharp and look like imperfect coins or coins that have been sweated, while the former is sharp in outline, the detail shows up well, the border is broad and prominent and the coins will stack perfectly. If this last model meets with your approval, I would strongly urge upon you the expediency of immediately replacing the $315,000 now on hand, of the first model with eagles of the last model. I think we will be severely criticized, and certainly deserve to be, if the eagles already struck should be allowed to go into circulation."

Finally, there is the No Periods variety. It represented the third and final attempt by the Philadelphia Mint to create a ten dollar gold coin that was practical for commerce, easy to strike, and visually attractive since the first two attempts had failed. Revisions made to the coining dies included strengthening the minute details on the devices and retaining the recognizable Flat Rim for proper stacking. A subtle feature was incorporated to differentiate this variety from the previous two: the periods before E PLURIBUS UNUM were eliminated.

A total of 239,406 No Periods tens were struck for general circulation. The 1907 No Periods variety is well known to numismatists as one of the better produced Indian tens, and this piece is the epitome of perfection. The exceedingly sharp details include the headdress at the center of the obverse, the peripheral stars, the reverse legend, and even the feathers on the upper portion of the eagle's wing. The luster is thick and satiny. Both sides are enhanced with yellow-gold and green-gold patina in a slightly variegated fashion with subtle hints of pink at the central regions. Close examination reveals only the most minimal microscopic marks. If one had to list anything as a future identifier on the beautiful coin, one tiny lateral abrasion is present on the eagle's right (facing) leg at the midpoint. As the lone finest representative of the issue certified by PCGS (11/08), it can act as a distinctive trump for the Registry collector, a centerpiece condition rarity, or (most extraordinarily of all) simply the beginning of a marvelous cabinet of regular-issue Saint-Gaudens eagles, as is the case here.

# Fantastic 1908 No Motto Indian Head Ten Dollar, MS67

**3503 1908 No Motto MS67 PCGS.** During December 1907, new hubs and working dies were made for the 1908 eagles. As was normal procedure for the Philadelphia Mint's engraving department, Barber and Morgan retouched the master hub and die to better define the stars, date, and inscriptions. Other gradual modifications continued for several years. Although the Mint was fully aware of Congressional agitation for restoration of the motto IN GOD WE TRUST to the eagles and double eagles, and had already prepared drawings for a half eagle (never issued), work had to concentrate on the No Motto version. The Mint also had to make eagle and double eagle dies and edge collars for the Denver and San Francisco Mints. Additionally, they supplied the other mints with a sample of the mechanical attachment that controlled collar segments during striking. As the "mother mint," the Philadelphia staff had to prepare and test everything before sending materials to the other mints. With new designs and mechanical changes, this took much more time than in prior years and meant that branch mints had to wait a month or more before they could begin adapting equipment to their presses. All of this took its toll on the Philadelphia Mint's ability to produce gold eagles as well as other required coins. The result was that only 33,500 No Motto eagles were approved for release by the coiner and superintendent.

Because of the slight hub and die modifications before the 1908 coins were struck, the definition is superior on this date to those seen from 1907. The mint luster on this piece is soft and satiny across both sides, producing a lovely, elegant sheen over near-pristine fields and devices. The surfaces show beautiful mint-green coloration in the fields and near the peripheries, with subtle pastel rose accents over the central design elements, including the feathers of Liberty's headdress. The fields have a fine grain texture, as seen on all tens through 1916.

This amazing Superb Gem is one of only four coins so-graded by PCGS, with another five pieces certified at MS67 by NGC; and only one finer (an NGC coin at MS68), as of (11/08).

# Exceptional 1908-D No Motto Ten Dollar, MS66

**3504 1908-D No Motto MS66 PCGS**. At the beginning of 1908 Frank Downer, Superintendent of the Denver Mint, faced the problem of producing new starred-edge eagles. In late January, he had been sent face dies, edge collars, and a sample mechanism for controlling the collar segments during striking. The Philadelphia Mint mechanics also sent drawings of how they thought the apparatus could be adapted to Denver's presses. Yet, it was up to Downer's staff to make it work.

Initial results were inconsistent, with most of the coins too thick and with many errors. The Philadelphia Mint sent out obverse dies made from a new hub and that helped considerably. As the Denver coining department staff gained experience, they successfully adapted the dies and edge collar device to their presses. Within a month production seemed to be moving along smoothly. Overall, use of a segmented edge collar to impart 46 (later 48) small stars on the coin's edge seems to have been easier to manage on the ten dollar coins than the twenties. With 210,000 pieces released for circulation of the 1908-D No Motto, along with a substantial double eagle production, it appears the Denver Mint had successfully adapted its presses to the new design.

As we mention in our *Coinage of Augustus Saint-Gaudens* book, it is interesting to note that the 1908-D eagle is the only branch mint issue to have the mintmark placed to the upper left of the olive branch. On all subsequent dates, it appears to the left of the arrow points.

In top grades, the 1908-D No Motto is scarce with few examples certified above MS63. In his cataloging of the Dr. Thaine Price collection, David Akers contends that:

> "Despite its 210,000 mintage figure, which is only moderately low by Indian Head Eagle standards, the 1908-D No Motto is very difficult to locate in any Uncirculated grade, and nearly all known mint state specimens fall well short of the Choice category. In Choice Uncirculated condition, the 1908-D No Motto is rare and above that level it is very rare. True Gems ... can be counted on the fingers of one hand and rank among the rarest and most desirable issues in the series."

Moreover, in his 1988 treatise titled *A Handbook of 20th Century United States Gold Coins*, Akers states that: "this is one of the least attractive [issues], due largely to the fact that it is generally flatly struck on the obverse and is decidedly lackluster." However, he goes on to say that there are a small number of exceptions, notably the "superb Kruthoffer coin, and ... a very few others as well, but most are weak and dull."

This Premium Gem piece is definitely one of the exceptions. The surfaces are bright and frosted with an accent of orange-gold color around the margin on the reverse. The design elements are well impressed, and strong granularity is present over each side, as always. Surprisingly sharp for the issue with no obvious or mentionable abrasions. One of only 10 pieces so graded by both of the major services in MS66. A mere three coins have been certified finer (all by NGC).

*Ex: The Kutasi Collection (Heritage Auction Galleries, 1/2007), lot 3163.*

# Exceptional Superb Gem 1908 With Motto Indian Head Eagle

**3505 1908 Motto MS67 PCGS.** The 1908 is the first issue of the With Motto type in the ten dollar Indian series. The original mintage was an impressive 341,602 pieces, and Uncirculated coins are anything but rare. However, once the Gem level has been achieved (and in this case passed) there are very few coins to satisfy collector demand. Indeed, population statistics indicate that PCGS and NGC combined have certified only 8 pieces in MS67 and 7 coins finer, as of (11/08), confirming the rarity of this issue in the loftier grades of Mint State.

According to *The Coinage of Augustus Saint-Gaudens* (Ivy Press, 2006):

> "Congress disagreed with President Theodore Roosevelt's decision to omit the motto IN GOD WE TRUST from the newly designed ten and twenty dollar gold coinage. As an expression of public sentiment, Congress passed the Mint Act of 1908, which mandated that the motto be restored to gold coinage. On the tens, it was placed in the field near the eagle's breast, and it remained there for the duration of coinage."

Roosevelt had earlier written a letter to Reverend Roland C. Dryer, of Nunda, New York. Dated November 11, 1907, the letter explained some of President Roosevelt's feelings about the issue of mentioning God on our nation's coinage:

> "My own feeling in the matter is due to my very firm conviction that to put such a motto [In God We Trust] on coins, or to use it in any kindred manner, not only does no good but does positive harm, and is in effect irreverence which comes dangerously close to sacrilege. A beautiful and solemn sentence such as the one in question should be treated and uttered only with that fine reverence which necessarily implies a certain exaltation of spirit. Any use which tends to cheapen it, and above all, any use which tends to secure it being treated in a spirit of levity, is from every standpoint profoundly to be regretted. It is a motto which it is indeed well to have inserted on our great national monuments, in our temples of justice, in our legislative halls, and in buildings such as those at West Point and Annapolis – in short, wherever it will tend to arouse and inspire a lofty emotion in those who look thereon. But it seems to me eminently unwise to cheapen such a motto by use on coins, just as it would be to cheapen it by use on postage stamps, or in advertisements."

The MS67 eagle we offer in this lot displays beautiful yellow-gold surfaces with faint greenish undertones and a few splashes of deeper orange-gold. The luster is intense, and the design features are well impressed, all of which exhibit crisp definition. The surfaces are immaculately well preserved; for the sake of accuracy, we note just one tiny, unobtrusive mark on the Indian's cheek, and a couple of equally trivial nicks on the reverse. All in all, this coin generates exceptional eye appeal, and is sure to draw the attention of serious Indian Head gold collectors.

A 15% BUYER'S PREMIUM APPLIES TO ALL LOTS.

# Outstanding 1908-D Eagle Motto, MS66

**3506 1908-D Motto MS66 PCGS.** Because of its rather large mintage of 836,500 pieces, this conditionally rare issue in the ten dollar Indian Head series has been traditionally underrated in Mint State. As David Akers indicates in his May 1998 catalog of the Dr. Thaine Price collection, "... mintage figures are only a starting point in determining rarity and, in many cases, especially among Twentieth Century gold issues, they can be downright misleading."

The 1908-D with Motto is seldom seen in mint condition and is only infrequently located in grades above MS63. In MS66 level of preservation, the grade of the coin offered in this lot, PCGS and NGC have certified a total of 10 pieces, with only seven specimens finer. Furthermore, our records indicate that a mere seven Premium Gem examples have made appearances at major auction sales over the past twenty or so years, as have five higher-grade coins.

This is a particularly well defined piece that exhibits sharp detail on all of the design elements, a fine-grain texture in the fields, and soft, satiny luster with variegated orange-gold and lime-green color spread over each side. The surfaces are impeccably well preserved, with just a couple of minor marks hidden in the Indian's headdress. A small mint-made planchet flaw is located on the Indian's cheek, but does not distract. An outstanding example of this scarce issue. Population: 4 in 66, 3 finer (11/08).

A 15% BUYER'S PREMIUM APPLIES TO ALL LOTS.

# Radiant 1908-S MS68 Ten Dollar

**3507 1908-S MS68 PCGS.** The main attraction for collectors of the 1908-S eagle is the low mintage of only 59,850 pieces. Like its 1908-D Motto counterpart, the 1908-S is also available in a wide range of grade choices. In the process of cataloging the Dr. Thaine Price collection (May 19, 1998), David Akers writes:

> "... the 1908-S Indian Head Eagle has long been considered one of the rarities of the series. It is apparent that most of the mintage went into circulation since circulated specimens are the most commonly seen examples of the issue. Mint State pieces, including some in Very Choice to Gem condition, are available with more regularity than some other less highly regarded issues of the series, but it is still correct to regard the 1908-S as rare in Gem condition since at most 20-25 such examples exist."

The key to understanding the availability of the 1908-S in high grades lies in a brief passage from Walter Breen's 1988 *Encyclopedia of U.S. and Colonial Coins*: "Uncs are from 2 small hoards, one (of at least 20) found in the 1940s, the other (fewer, choice) from Europe in the 1970s." Apparently the coins in these hoards were of very high quality and constitute most of the high grade coins that are known today.

PCGS and NGC have, to date, certified about 300 1908-S ten dollar coins in Mint State grades. Slightly more than 20 specimens rate MS65, and 15 examples are classified as Premium Gems. The two services have seen eleven MS67s, five MS68s, and a single MS69.

The extraordinary surfaces of most 1908-S tens is the second reason that this issue is a collector favorite. David Akers points out in his 1988 reference on 20th century gold: "...the 1908-S eagle comes with two very different, distinctive finishes. One is frosty and very finely granular, and on these specimens the luster is very good but not outstanding. The other finish (much more rare) is extremely satiny, and with these examples the luster is always exceptionally radiant." With such a selection of finishes, combined with a general lack of large abrasions on most 1908-S eagles, it is no wonder this issue is so popular with collectors.

This particular MS68 coin is of the second variety, i.e., highly satiny with radiant surfaces that give off a beautiful peach-gold color. An attentive strike that imparts strong definition to the design features complements these attributes, further enhancing the coin's overall eye appeal. The only surface blemishes that serve to distinguish this coin from others are a tiny alloy speck in the upper left obverse field, a couple of minuscule nicks on the right (facing) wing of the eagle, and a small mark to the left of the U in UNITED.

For an issue that is known for its singular eye appeal, this is one of the finest 1908-S ten dollar examples known. As such, it presents the advanced gold collector with a seldom-offered opportunity. Population: 3 in 68, 0 finer (11/08).

# Conditionally Rare Premium Gem 1909 Indian Eagle

**3508 1909 MS66 PCGS.** In his 1988 *A Handbook of 20th-Century United States Gold Coins,* David Akers writes: "The 1909 in Mint State almost always has a beautiful, highly lustrous, satiny finish that is not very different from the Proofs. The strike is invariably sharp and the color is typically a light to medium greenish yellow gold or a rich yellow gold." Akers also notes: The 1909 is one of the rarest Philadelphia Mint issues, surpassed only by the 1933, 1907 Rolled Edge and the 1908 No Motto."

When compared to the well-known 1908-S rarity, for example, the 1909 is comparably rare in Gem grade, despite a mintage for the 1909 that is almost three times higher than that of the '08-S. In MS66, it actually edges out its mintmarked cohort. PCGS has certified nine 1909s in MS66, with only two coins finer, while it has graded 10 1908-S coins in MS66, with eight pieces in MS67 and two examples in MS68! A similar situation exists at NGC, which has graded five 1908-S eagles in MS66, with six finer; yet it has certified only three examples of the 1909 in MS66, with three MS67s finer (11/08).

As observed by Jeff Garrett and Ron Guth, in their *Encyclopedia of U.S. Gold Coins, 1795-1933* (2006): "Surviving examples are typical of the quality for the Philadelphia Mint of the period, being sharply struck and showing radiant luster. This date is certainly underrated, but collectors can use this to their advantage to secure a pristine example (before the true rarity of this coin is understood and it becomes properly valued)."

It is more than likely that the two finer-graded PCGS examples of the 1909 (both MS67) are in strong hands, making this coin essentially among the handful of finest obtainable. And what a glorious coin it is, with dazzling cartwheel luster beaming from the yellow-gold, mint-green, and orange-gold surfaces. The strike is crisp and bold throughout. Were it not for a single tick on the Indian's cheek, just behind the mouth, this coin might merit an even finer grade. As it stands, it is as desirable as it is rare.

A 15% BUYER'S PREMIUM APPLIES TO ALL LOTS.

# Condition Rarity 1909-D Ten Dollar, MS66

**3509 1909-D MS66 PCGS.** Breen-7109. The 1909-D is one of the scarcer issues among early ten dollar Indians, and is much more challenging than its mintage of 121,540 pieces would seem to indicate. David Akers contends in *A Handbook of 20th-Century United States Gold Coins* that it is one of the most underrated issues in the series, and is actually one of the rarest in an absolute sense. "Even in MS60 this issue is very rare and in MS63 or MS64 condition, it can be located only with great difficulty," says Akers.

In Gem and better condition the 1909-D is extremely rare. PCGS and NGC combined have certified only eight examples in MS65. Another eight coins have earned the Premium Gem level of preservation, and a mere three pieces are classified as MS67. Neither service has certified any specimen finer. Moreover, our records indicate that the '09-D in these higher Mint State grades has appeared in major auction sales fewer than 20 times within the past 15 to 20 years.

In his May 1998 catalog of the Thaine Price Collection, Akers writes that a number of 1909-D ten dollar coins that were not previously known to the numismatic community have come onto the market in recent years. He goes on to say that most of these are of minimal Uncirculated quality, with only a few even reaching the Choice level.

Walter Breen, in his 1988 Encyclopedia of U.S. and Colonial Coins, identifies two variants of the D mintmark on the 1909. The first variety has a broad D opposite the arrow points, and parallel with the upright of the T in TEN. The second variety has the mintmark below the arrow points. Breen says this was an intentional change in position to give a less cramped effect. According to Breen, the first variety is scarcer in Uncirculated grades than is the second variety.

The current MS66 coin has a satiny appearance, and yields pleasing glowing luster and evenly distributed honey-gold color. The design elements are sharply impressed, with resultant excellent definition in the feathers on the headdress and on the eagle. The mintmark is located opposite the arrow points and is broad, confirming the Breen-7109 variety. The surfaces on both sides are well preserved, and display just a couple of minute marks on the Indian's cheek, and another in the right (facing) reverse field. A small planchet void is located below and to the right of IN GOD WE TRUST, and will serve, along with the previously mentioned unobtrusive contact marks, as a pedigree identifier. Population: 5 in 66, 2 finer (11/08).
*Ex: Phillip H. Morse Collection of Saint-Gaudens Coinage (Heritage Auction Galleries, 11/2005), lot 6506.*

# Breathtaking 1909-S Eagle, MS67

**3510 1909-S MS67 PCGS.** The 1909-S ten dollar Indian Head saw a mintage of 292,350 pieces, and is very scarce in Mint State, with most coins in the MS60 to MS64 grade range. It remains one of the most difficult issues in the entire series to locate in Gem condition. PCGS and NGC have certified fewer than 25 Gem specimens, less than 10 Premium Gems, a mere three Superb Gems, and a solitary MS68.

Interestingly, the 1909-S was virtually impossible to obtain in Uncirculated condition prior to the discovery in the late 1970s of a hoard of about 60 specimens, sold intact by Ron Gillio to Jim Halperin of New England Rare Coin Galleries. Since then, a few other small hoards have been discovered.

Gold specialist David Akers writes in his 1988 *A Handbook of 20th-Century United States Gold Coins* that Uncirculated 1909-S tens from the late 1970s hoard graded mostly MS60 to MS63. Only a few reached the near-Gem level, and none finer. They were, however, according to Akers, generally well struck, exhibited average to slightly above average luster, and tended to be an attractive greenish-gold and rose in coloration. He goes on to note that non-hoard specimens that he has seen display similar patination, but a few are rich yellow or light coppery-gold.

The Superb Gem specimen being offered in the current sale displays the rich yellow patination alluded to above. Both sides reveal a somewhat frosty finish, and exhibit potent luster. A well executed strike leaves sharp, uniform delineation on the design elements. A few minute unobtrusive marks do not detract, and might very well preclude the attainment of an even higher grade. The aficionados of quality gold coinage will not want to miss out on the chance to acquire this breathtaking specimen for inclusion in a top-shelf collection. Population: 2 in 67, 0 finer (11/08). *From The Jim O'Neal Collection of Saint-Gaudens $10 Indians.* (#8864)

# Incredible MS66 1910 Eagle

**3511 1910 MS66 PCGS.** Ex: Duckor. The 1910 eagle has long enjoyed a reputation for easy availability, and in most grades, this is true. By the Select level, however, the issue commands a substantial premium over type. As is the norm for 20th century gold, coins that are readily found in lesser Mint State grades become immensely elusive in better condition, and at the MS66 level, the 1910 eagle becomes a condition rarity, with 19 such pieces certified by PCGS and only two finer (11/08). Despite this rarity, it appears in high-end type collections with some frequency, being one of the more readily acquired Saint-Gaudens eagles in grades above Gem, though not to the same extent as the "usual suspects" for the series, such as the 1926, 1932, or even the 1910-D.

Overall eagle production spiked in 1910 compared to the year before. With total production at 318,500 circulation-finish pieces, this P-mint issue is hardly a low-mintage rarity, though in context of the year of issue, Philadelphia had the lowest output for the denomination in 1910. Denver's mammoth mintage of over 2.3 million pieces was the second-highest recorded for the series, and San Francisco's production of 811,000 examples set a record for the mint and design. The eagle denomination, like other large-format coins of the time, had a production schedule largely dictated by demand, and that demand was not as strong on the East Coast as it was in the rugged West or beyond the Rocky Mountains.

The present Premium Gem is a remarkable representative that combines one of the most desirable modern gold pedigrees with the outstanding visual appeal and quality that made the collection famous. Both the central and the peripheral devices are solidly impressed for the issue, and the powerful luster adds vibrancy to the yellow-gold obverse and the honey-tinged reverse. Remarkably well-preserved on the portrait, and even though a few shallow marks present to the left of the eagle's legs, these flaws have only trivial influence on the tremendous eye appeal. With so many positives present for this piece, even the most discerning collector would be hard-pressed to want more in a 1910 eagle.

*From The Jim O'Neal Collection of Saint-Gaudens $10 Indians.* (#8865)

A 15% BUYER'S PREMIUM APPLIES TO ALL LOTS.

# Fabulous 1910-D Eagle, MS66

**3512 1910-D MS66 PCGS.** Though it is a slightly unconventional choice as a Saint-Gaudens eagle type coin, the 1910-D more than satisfies the usual collector criteria. Certainly, mintage is no object; with over 2.3 million examples coined, it has the second-highest production for the series, behind only the 1932, and represented a record high for the denomination and mint. The chief obstacle to the 1910-D eagle's acceptance as a type coin is a low savings rate in the standard Mint State grades, which makes it less available than the heavily repatriated issues such as the 1926 and 1932. At the Premium Gem level, the 1910-D is a condition rarity but one that is plausible to acquire, with 25 pieces listed in the PCGS *Population Report*, though that service has graded none finer (11/08).

In addition to its considerable availability, the 1910-D offers other type-coin positives. Chief among them are its solid production values, as noted in *The Coinage of Augustus Saint-Gaudens as Illustrated by the Phillip H. Morse Collection*:

> "Typically, the striking definition on the 1910-D is quite sharp, including most of the detail on the headdress and the eagle's wing feathers. The surfaces are softly frosted, as expected on most Philadelphia issues of the period, with the fine granularity seen on all 1908-1916 tens. Generally coins fall in the light to medium orange-gold or greenish-gold color range."

The present coin is an exemplary match for these facets. Subtly green-gold surfaces offer powerful luster with a delicate aura of frostiness to the finely textured fields. The strike is pleasing, if not absolutely sharp, in the centers. Both sides offer remarkable preservation, with only a few minor faults visible in out-of-the-way areas. Whether one is looking for a high-end type coin or adding this intriguing, occasionally paradoxical issue to a fantastic date set, this Premium Gem should fulfill every wish.

*From The Jim O'Neal Collection of Saint-Gaudens $10 Indians.* (#8866)

# Spectacular 1910-S Eagle, MS66

**3513 1910-S MS66 PCGS.** The 1910-S ten dollar started out with a large mintage of 811,000 pieces. However, unlike many ten and twenty dollar issues, the 1910-S did not sit around in bags in bank vaults. Almost all the production run appears to have been dropped into circulation. The population data shows what specialists have long known: the 1910-S is common in circulated grades, but it is scarce in mint condition. To be more specific, approximately 900 circulated pieces have been certified by PCGS and NGC. Every grade is represented from AU58 all the way down to AG3!

The situation changes dramatically when one looks up the grading ladder from MS60 to the finest coins at the MS66 level. There are nearly 700 pieces that have been certified in Uncirculated condition, and lower grade (60-63) coins are always available for a price. But the number thins out quickly above that level with only 32 pieces graded MS64. Above MS64 only three Gems have been certified and five graded MS66 by both services. The fact that more MS66s have been graded than MS65s does not mean that more examples are actually known than at the Gem level. This is simply a reflection of how many MS66 coins have been submitted in hopes of gaining an MS67 grade (a hope that is yet unrealized).

Long before population data was looked to for an indication of scarcity, David Akers wrote in 1988 of the 1910-S:

> "Despite its high mintage, the 1910-S is a very rare coin in all Mint State grades. Occasionally a specimen in MS-63 or less is available, but it is a highly unusual occurrence when one better than that comes up for sale. In MS-64 condition, the issue is really very rare, and it is my opinion that only about six to eight true gems exist, if that many."

The 1910-S comes in both the satiny and frosted finish. Again, according to Akers "the few really top grade examples of this issue that I have seen have all been much more satiny than frosty." The Premium Gem being offered here has undeniably frosted surfaces with the usual fine-grain finish, which is seen to some degree on all tens from 1908 through 1916. This piece has lovely color. Both sides have a mixture of orange-gold and red-gold patina with a slight bit of lilac interspersed—an obvious sign of originality. The coin is nearly perfect in terms of preservation, with the only (vaguely) noticeable mark placed along the jawline of the Indian.

This is one of the finest if not the finest 1910-S eagles known. As such, it presents the collector with a rare (perhaps unique?) opportunity to acquire this condition rarity in the ultimate Uncirculated grade.

# Rare Superb Gem 1911 Indian Ten

**3514 1911 MS67 PCGS.** Ex: Duckor. The appeal of the 1911 is twofold: as a type coin, and as an issue that is available with some frequency in high grades. When encountered, the 1911 is usually an attractive coin and it makes an excellent type piece from the earlier years of this design type. In Gem condition, the 1911 is the third most frequently encountered ten Indian, trailing only the 1926 and 1932. Still, any finer than the MS65 level this is a scarce issue. At MS65 there are exactly 200 pieces certified by NGC and PCGS. At MS66, the combined NGC/PCGS population drops to 67 coins. Fewer than 20 Superb Gems have been seen by the two major services (eight by PCGS and six by NGC; with three in MS68 at NGC). Of course, these numbers are almost certain to be inflated by resubmissions.

There is an interesting story about a small hoard of 1911 tens that came on the market in the early 1990s. We think it is a good story to pass along, even if it does not have a direct bearing on this particular coin (that we know of): A Pontiac car dealership in Ulysses, Kansas closed its doors after many years of service to that community. A prospective purchaser was searching through a dusty storeroom of obsolete parts, and discovered an old carburetor box containing 30-40 Mint State 1911 eagles that apparently had been hidden by the original owner who had long since passed away. What the grade distribution of these coins was we cannot say for certain, but speculation would lead one to suspect that if they had lain undisturbed in the old carburetor box for decades, the average grade must have been quite high.

As with most 1911 tens, striking definition is not a problem on this coin, with strong definition in all areas. Also, the surfaces have a frosted finish with fine granularity over each side. A thin diagonal mark below the L in PLURIBUS may serve in the future as a useful pedigree marker. This is a rare opportunity for the advanced collector to purchase one of the finest 1911 tens available.

# Select Uncirculated Key Date 1911-D Indian Head Eagle

**3515 1911-D MS63 PCGS.** 1911 was the last year that the Indian Head ten dollar gold pieces were produced with 46 stars on the edge, as two stars were added in 1912 with the admission of New Mexico and Arizona as states. The 1911-D is a key issue as an eagle, in addition to its similar key date status in the quarter eagle and half eagle series. In 1911 the Denver Mint produced only 30,100 ten Indians, the lowest figure of the entire series. The 1911-D is an extremely difficult issue to track down in any grade. The average grade for specimens currently certified by the two major services is 53.6; while the most frequently-seen grade designation is AU58, where a surprisingly high number of coins (287) have been seen.

Garrett and Guth (2006) make the following observations about this issue:

> "The low mintage combined with the dismal survival rate leaves collectors with very few to choose from. David Akers notes that the finest example known is the Norweb coin, which currently resides in an Eastern collection. All Indian Head eagle collections are judged to some degree on the quality of the 1911-D issue.
>
> "The '11-D is especially challenging for collectors of Mint State specimens. PCGS and NGC have graded only 118 Mint State pieces each (an interesting coincidence), as of (11/08). Of those 236 coins, however, only 61 have been certified at levels greater than MS62, with 32 designated as MS63, and a mere 29 examples finer. According to the authors of *The Coinage of Augustus Saint-Gaudens* (Ivy Press, 2006), one reason for the lack of availability of Mint State examples is that "almost all of the freshly struck coins were dispersed quickly into circulation, with few held back by collectors."

This is an original example of this scarce issue. The surfaces are satiny with mildly variegated orange-gold patina on each side. A few light field marks explain the grade. This is a rare opportunity to acquire this key date and major condition rarity in the ten dollar Indian Head series.

*From The Jim O'Neal Collection of Saint-Gaudens $10 Indians.* (#8869)

A 15% BUYER'S PREMIUM APPLIES TO ALL LOTS.

# Conditionally Rare Premium Gem 1911-S Indian Ten

**3516 1911-S MS66 PCGS.** Ex: Duckor. Between NGC and PCGS, the two services have graded just 10 examples of this issue in MS66, with none finer (11/08). The vast majority (if not all) hail from a single repatriated hoard that dates to the late 1970s. Before that, this issue of just 51,000 pieces was considered virtually unobtainable, and even the appearance of several dozen Mint State examples only whetted collectors' appetites for the coins.

Selections from a story regarding that important hoard, told by numismatist Marc Emory of Heritage Auction Galleries, are taken from *The Coinage of Augustus Saint-Gaudens* (published by Ivy Press in 2006):

> "In January 1979, at the Basel (Switzerland) coin show, a dealer approached me who just a few months before had offered me a 1909 $10. He thought that coin was FDC, maybe even a Roman Finish proof. In reality, it was one of the most blatantly awful forgeries imaginable. This same dealer now asked what a Gem Uncirculated 1911-S would be worth. After the incident with the 1909, I was highly suspicious, but said it would be worth upward of $1000. ... He invited me up to his hotel room, and I tried to contain my amazement when he produced two absolutely beautiful Gem specimens with gorgeous light patina.
>
> "Later that evening, in the lobby of the hotel, I ran into another dealer from Barcelona, who called me over. Although I rarely went down to Spain, as the export of gold coins from Spain was an incredibly tedious bureaucratic affair in those days, I was known by the Barcelona dealers because I spoke Catalan. ... He explained that there was a group of 30 (!!!) pieces that were being brokered by a coin collector from Barcelona—a man who had business around the world. One thing you learn in the coin business is never say never, so I asked where so many pieces could have come from.
>
> "He explained that the American governor of the Philippines had given 50 brand new pieces that were sent from the San Francisco mint to a friend from Spain. As the U.S. had taken the Philippines from Spain in the Spanish-American War of 1898, American coins circulated freely in the Philippines then, and many Spaniards had stayed on after their government had ceded control of the islands to the United States. The man had brought them with him when he returned home to Spain, and these coins were now being sold by his grandson. ... By and by, the rest of the coins trickled out, and eventually all 50 pieces reached the American numismatic market. ... That group remains one of the most remarkable finds of my thirty-plus years on the job."

This beautiful Premium Gem offers fresh, coruscating luster and lavender-tinged yellow-orange surfaces that border on pristine. The devices are well struck overall, though a trace of softness appears at Liberty's central hair detail, and the visual appeal of the piece is stunning. An incredible representative that would add considerable cachet to any Registry set of Indian Head gold eagles.

A 15% BUYER'S PREMIUM APPLIES TO ALL LOTS.

# Charming MS66 1912 Eagle

**3517 1912 MS66 PCGS.** Though the edge design has not been considered a historical point of demarcation for the Saint-Gaudens eagle, it is interesting to contemplate the before-and-after aspects of the series from the vantage point of 1912, when two stars were added to the previously 46-star edge to symbolize newly added states Arizona and New Mexico. (New Mexico was admitted to the Union on January 6th of that year, while Arizona was added on February 14th. The lack of a 47-star collar, in addition to the 46-star collar's disuse in 1912, suggests that eagle coinage took place later in the year, after the Mint had time to prepare the new collar.)

Prior to 1912, total mintages for the denomination were consistently high (though individual facilities had slack output from time to time) and Philadelphia, Denver, and San Francisco all were active participants. The year 1912 marks the first time that Denver had not struck eagles since its opening in 1906, and Philadelphia and San Francisco would soon experience their own slowdowns, culminating in full stoppage for three years beginning with 1917. In this way, the 1912 acts as a turning-point for the fortunes of the design and the denomination.

That said, the 1912 itself is a comparatively available issue with a mintage of 405,000 circulation strikes, and enough coins have survived that there is a substantial available population in lower and slightly better Mint State grades. The Gem level, however, forces the would-be type collector to seek greener pastures, and only the most dedicated Saint-Gaudens eagle enthusiasts will pursue this issue at the conditionally rare Premium Gem level. For such collectors, the present example is quite the prize, with excellent peripheral striking definition and wonderfully lustrous yellow-gold and honey-gold surfaces that show rose and amber accents. A carefully preserved piece that displays beautifully and exhibits only a few trivial luster grazes on the reverse. Population: 9 in 66, 1 finer (11/08).

A 15% BUYER'S PREMIUM APPLIES TO ALL LOTS.

# Singular 1912-S Eagle, MS66 Lone Finest Graded by PCGS

**3518 1912-S MS66 PCGS.** The 1912-S, with a little-saved mintage of 300,000 pieces, presents a considerable challenge for the collector. Garrett and Guth (2006) report that "A handful of examples are known that qualify in gem grades, but this is certainly one of the more difficult dates to obtain at this desirable level. In terms of the coins graded by NGC and PCGS, this date ranks seventh overall in terms of rarity."

Not only is the 1912-S eagle an important condition rarity, it emerges as one of the absolute rarest issues of the series when overall appearance and eye appeal are factored into the rarity equation. Gold specialist David Akers goes so far as to say that "high grade and attractive" and "1912-S eagle" are almost mutually exclusive terms. Specifically, he indicates that the 1912-S is one of the most poorly struck issues of the series, far weaker than the usual 1911-S or 1913-S. The hair around the face is almost always indistinct, and the feather detail on the eagle's shoulder is usually weak. Akers also notes that the luster is generally well below average for the series.

The 1912-S example that we offer in this lot is without a doubt superior to that typically found. It exudes considerable "flash," with bright surfaces that radiate vibrant luster. The color scheme consists of a mixture of peach-gold and faint grayish-green patina, and occasional orange-gold accents. The design elements are better struck than average, though some of the typical weakness in the hair around the Indian's ear is noted. The feathers in the headdress and on the eagle, on the other hand, display nice definition. Some unobtrusive and minute marks near the Indian's ear and on the eagle's head and neck serve as pedigree indicators. When last offered, this was the *only* PCGS-graded MS66 example of the issue known, and despite the passage of years, that statistic has not changed (11/08).

# Conditionally Rare 1913 Indian Eagle, MS66

**3519 1913 MS66 PCGS.** This is a common date, one of the seven highest-mintage Indian eagles, and yet it is seldom seen in Gem condition. This issue roughly equates in rarity to the 1910, 1912, and 1915. It seems that only 1926 and 1932 are regularly available in the highest grades. There are currently 502 examples of the 1913 graded as MS64 at NGC and PCGS combined. At MS65, the certified population drops precipitously, to just 145 pieces at the two major services. Premium Gems, such as this coin, are downright rare. PCGS has seen a scant 12 examples at MS66, and NGC has only certified 11 pieces at the same grade level, as of (11/08). A single MS67 representative is known, having been graded as such by PCGS.

According to *The Coinage of Augustus Saint-Gaudens* (Ivy Press, 2006):

> "A small group of about 20 Uncirculated pieces was discovered in Niagara Falls, New York when an old tavern was razed after many years of serving the local community. They were found behind the bar-back when it was removed by contractors. These examples have served to make this date somewhat less scarce than was previously thought....
>
> "The 1913 is typically sharply defined, and the surfaces are most often highly lustrous. In fact, the luster seen on this issue competes with that seen on some of the best produced S-mint tens. Color varies somewhat from greenish-gold to light to medium yellow gold. The surfaces have virtually none of the granularity seen on the 1910 to 1912 Philadelphia Mint coins, and can be either frosty or moderately satiny in appearance."

This outstanding example is brilliant, with frosty luster and beautiful yellow-gold coloration. Only a faint trace of rose toning is visible on the obverse. Sharply struck with excellent design details on both sides. The surfaces are not perfect, but they are certainly of exceptional quality, with only a few tiny abrasions or scrapes. Gold coins, especially those of large diameter, such as the eagles and double eagles, were especially susceptible to marks because the metal is quite soft. For this reason, MS65 and finer examples are seldom encountered. This conditionally rare Premium Gem represents a significant opportunity for the specialist to acquire one of the finest surviving examples of the 1913 Indian Head eagle.

*From The Jim O'Neal Collection of Saint-Gaudens $10 Indians.* (#8873)

A 15% BUYER'S PREMIUM APPLIES TO ALL LOTS.

# Stunning 1913-S Ten Dollar, MS66

**3520 1913-S MS66 PCGS.** Only 66,000 pieces were produced of the 1913-S, and apparently a substantial percentage of that mintage was dropped into circulation, as most of the coins known today are in Very Fine to Choice AU condition. Lower-end Uncirculated coins are challenging in the absolute sense with only about 140 or so pieces certified by PCGS and NGC in the MS60-62 grade range. Only 26 coins have been certified in MS63, and the same number in near-Gem.

The two services have graded a mere three MS65 specimens, one Premium Gem, and two Superb Gems. This small number gives one a sense of the rarity of the 1913-S in the higher Mint State levels. Such pieces are rarely seen, and when they available they are highlight coins in whichever auction they are offered.

Gold specialist David Akers comments on the rarity of the 1913-S in his May 19, 1998 catalog of the Dr. Thaine B. Price collection:

> "In any Mint State grade, the 1913-S eagle is a rare issue, and since most of the known Uncirculated examples grade below Choice Uncirculated, the 1913-S is one of the great condition rarities of the series. Even in Choice Uncirculated condition ... the 1913-S is very rare, and no more than a handful of examples are known in that grade as high as Very Choice or Gem Uncirculated. Almost every great collection of Indian Head Ten Dollar gold pieces has failed to have an exceptional example of the 1913-S, and a strong case could be made that not only is this one of the premier condition rarities of the series, it is actually the number one rarity of the series in high grade, i.e., in Choice Uncirculated and higher."

The surfaces of the current Premium Gem offering show a lovely overlay of light orange-gold color imbued with traces of light green, along with a hint of lilac on the reverse. Both sides are evenly covered with matte-like granularity and with phenomenal soft, frosted mint luster, and a well executed strike leaves excellent definition on the design elements. Impeccably preserved surfaces enhance the coin's overall eye appeal. For identification purposes, we mention an inoffensive minute mark near the rim at 7 o'clock on the obverse, and a couple of ticks beneath NIT of UNITED.

This is a colossal ten dollar Indian whose condition would be noteworthy even if it were dated 1932. The fact that it is one of the rarest and most famous issues of this popular series will make this a coin that will be remembered for many years to come, and one that will be cherished by the new owner.

Used as the plate coin in the 2006 *The Coinage of Augustus Saint-Gaudens as Illustrated by the Phillip Morse Collection,* by James L. Halperin, Mark Van Winkle, Jon Amato, Gregory J. Rohan.

# Quality MS66 1914 Eagle

**3521 1914 MS66 PCGS.** While the San Francisco and the occasional Denver issue are most prominent in collectors' minds, the generally higher-mintage Philadelphia coins have a couple of champions, even among With Motto pieces. While the 1909 is rated slightly higher in terms of high-grade collecting difficulty, the 1914 sports the lowest mintage of any Philadelphia With Motto Saint-Gaudens eagle issue. With much of Philadelphia's gold coinage dedicated to overseas trade, particularly European transactions, it is less than coincidental that Philadelphia's smallest With Motto eagle output should come in the same year that the simmering hostilities in Europe broke out into full-fledged warfare.

Another of the 1914 Saint-Gaudens eagle's important distinctions lies in its high production values. An excellent overview of this issue's striking characteristics comes from *The Coinage of Augustus Saint-Gaudens as Illustrated by the Phillip H. Morse Collection:*

> "The 1914 continues the tradition of matte-like surfaces seen on all tens and twenties that were struck from 1908 through 1916. Generally, the high-grade 1914 P-mints that we have seen have strong luster characteristics with thicker mint frost than seen on other Philadelphia coins, and are more suggestive of a high grade San Francisco coin. Color can vary widely from a lighter green-gold to a much deeper peach-gold. This date is also generally found with a strong strike."

The present coin exemplifies the above-listed attributes. Rich yellow-gold surfaces show occasional peach accents and a touch of green-gold at the upper reverse, and while the fields show a touch of the usual granularity, the luster is above-average even by the standards of the issue. Surfaces are carefully preserved and highly suggestive of an even finer grade, though a handful of small, wispy faults combine to preclude such a designation. Nevertheless, a marvelous Premium Gem survivor that is sure to delight its next owner. PCGS has graded just seven examples at this level and only two finer (11/08).

# Incredible 1914-D Premium Gem Eagle

**3522 1914-D MS66 PCGS.** The 1914-D is generally considered the second most-available D-mint ten dollar Indian, behind the 1910-D. David Akers says of the 1914-D in his May 19, 1998 cataloging of the Thaine B. Price Collection:

> "With the sole exception of the 1910-D, the 1914-D is the most common branch mint Indian Head Eagle. It is readily obtainable in mint state grades of Choice Uncirculated and lower, and even Very Choice Uncirculated examples are only scarce and not rare. However, this is another example of a condition rarity issue since, in gem condition, the 1914-D is actually very rare, much more so than any of the Philadelphia issues from 1908-1915 except the 1909, and roughly comparable in rarity to such more highly rated issues as the 1908-S and 1916-S."

PCGS and NGC have certified slightly more than 50 Gem 1914-D eagles. Fifteen have graded Premium Gem, and nine Superb Gem. A number of these coins are likely resubmissions.

The usual granularity shows on both sides of the Premium Gem ten dollar offering in the current sale, as does bright, satiny mint luster. Both sides reveal memorable color, with each consisting of a delicate mixture of peach-gold and mint-green, along with an occasional hint of lilac on the reverse. An exacting strike manifests itself with crisp delineation on the design elements, and both faces are lovingly preserved. A couple of faint rim marks at 9:00 on the obverse, a minute field contact above the rear of the wing, and a couple of more concealed within the plumage below are mentioned solely for identification purposes; and even these are only visible under high-powered magnification.

This piece exhibits great technical quality and incredible eye appeal. The ever-increasing popularity and demand for this series is evidenced by the realization of $109,250 for the Dr. Steven Duckor MS67 example of this date sold by Heritage in April 2006. Population: 4 in 66, 3 finer (11/08).

# Elegant Choice 1914-S Eagle

**3523 1914-S MS64 PCGS.** Though the San Francisco Mint was one of the most active producers of the eagle denomination during the era of the Coronet Liberty design, output in the Saint-Gaudens years was noticeably slack, with the anomalously high mintage of the 1910-S the lone exception (its production of 811,000 pieces is more than double that of its nearest rival). The 1914-S, struck on the eve of international war, saw a mintage of just 208,000 pieces and experienced considerable attrition, both melting and circulation. Most estimates have fewer than one percent of the mintage surviving today, and Mint State examples make up a minority of extant pieces. Among Mint State coins, most do not reach the Select designation, with Choice and better coins scarce in an absolute sense.

One of the best descriptions of this issue's prevailing attributes is found in *A Handbook of 20th-Century United States Gold Coins*, by David Akers:

> "The typical 1914-S has much more lustre than the 1912-S or 1913-S and is very similar to the 1910-S and 1911-S in this important respect. All 1914-S eagles I have seen have been frosty and very sharply struck; some even show a trace of the 'wire rim' that is so evident on the 1911-S and, sometimes, the 1913-S. Color is a definite strong point of this issue, typically rich greenish gold highlighted with rose or orange. Top grade examples of this issue are exceptionally pretty."

It can take holding a coin such as the present near-Gem, however, to comprehend fully this issue's potential for beauty. Faintly green-gold surfaces with booming luster show ample sun-yellow elements and the occasional hint of orange. Devices are well-defined overall, and the suggestion of a wire rim is present at the upper obverse. Though a few wispy faults on each side combine to preclude a higher grade, this piece's overwhelming eye appeal transcends such quibbles. PCGS has certified 11 finer examples (11/08).

# Exquisite Premium Gem 1915 Ten

**3524 1915 MS66 PCGS.** At the time, Philadelphia's production of gold coins in 1915 must have seemed unspectacular, but when examined in retrospect, that year marks the "beginning of the end" for that Mint and circulating gold coinage. Though the main facility struck all four business-strike denominations that year (quarter eagles, half eagles, eagles, and double eagles) the presses fell silent, and save for two McKinley gold commemorative dollars in 1916 and 1917, Philadelphia did not strike another gold coin until 1920, when double eagles made their re-appearance. Quarter eagles and eagles did not return until 1926, and the half eagle was delayed until 1929, a short-lived reprise that seems a mere coda to that denomination.

Despite the slowing rates of international trade and the gradual disuse of gold coinage in everyday domestic transactions, enough pieces were shipped overseas and later repatriated that there are few obstacles to owning a 1915 eagle, should one not be too choosy about grade. As noted in *The Coinage of Augustus Saint-Gaudens as Illustrated by the Phillip H. Morse Collection*, "Compared to other P-mints in the series, few dates are encountered with greater frequency. Only the 1910, 1912 and 1913 are comparable in less-than-Gem levels of preservation among the earlier dates, and of course, the 1926 and 1932 are more common in all grades."

The long journeys taken by most survivors were not kind to them. Many examples are Mint State, with coins grading Select and lower prevalent. At the Gem level, however, availability falls off the proverbial cliff, and should the collector seek a Premium Gem, such a coin represents an immense challenge; PCGS has graded only six examples at that level and only one piece finer (11/08). The charming coin offered here has immensely lustrous wheat-gold surfaces that show whispers of twinkling frost in the fields. The fine details of Liberty's hair are strong, and the carefully preserved portrait attracts considerable interest. Overall visual appeal is superb for this gorgeous and evocative Saint-Gaudens eagle.

# Wonderful MS66 1915-S Ten

**3525 1915-S MS66 PCGS.** As one of the famous low-mintage San Francisco Saint-Gaudens eagle issues, the 1915-S is accorded a special place within the series, and while its fame is not so legendary as the 1920-S, for example, the 1915-S receives its due. As described in *The Coinage of Augustus Saint-Gaudens as Illustrated by the Phillip H. Morse Collection*,

> "The 1915-S is in the upper echelon of rarity among ten dollar Indian gold pieces. Only 59,000 pieces were struck, and it appears that some attempt was made to actually place this issue in circulation as the majority of known survivors are in AU condition. The absolute and condition rarity of this issue is undisputed by those who are familiar with this difficult series.
>
> "That consensus is reinforced by Garrett and Guth, who, in their *Encyclopedia of U.S. Gold Coins*, write of the devastation experienced by the 1915-S: "Not only was this a low-mintage date, but few survivors made it from San Francisco to the Eastern banks where they could escape to Europe to wait out the first half of the 20th century. Most ended up being melted during the 1930s and returned as gold bricks to Fort Knox."

With few survivors extant and most of those showing some degree of wear, it is readily understandable why Mint State pieces should be so prized, particularly in Select and better states. Coins that rate so highly as this Premium Gem are exceedingly elusive; PCGS has certified just two coins at the MS66 level and none finer (11/08). This piece is not merely a technical MS66; it comes alive with eye appeal, vibrantly lustrous in the fiery orange-gold fields that show ample elements of lilac and violet in the hollows closest to the design. The strike is almost uniformly crisp. A single small graze at Liberty's chin should prove useful as a pedigree marker in the future. For the discerning Saint-Gaudens eagle enthusiast who has been frozen out of acquiring a top-tier 1915-S ten until now, this is a fantastic opportunity.

# Magnificent MS67 1916-S Eagle

**3526 1916-S MS67 PCGS.** By the dawn of the 20th century, America's strikings of gold coins were meant increasingly for international consumption, not domestic; the nation's growing international prestige had made the dollar an in-demand global currency, at least in the context of the gold standard. The onset of World War I and the concurrent disintegration of international trade affected the United States Mint's production well before America formally entered the conflict. As described in the *Encyclopedia of U.S. Gold Coins* by Garrett and Guth, "Mintages fell with demand as our nation turned its attention to the unfolding events in Europe in late 1916, and coinage of eagles resumed with only a whimper in 1920."

Since so many of today's 1916-S eagle survivors are About Uncirculated or Mint State, this issue apparently did not circulate to any great extent, though as with its S-mint counterpart from a year earlier, the effort was made. Concerning the rarity of the 1916-S, David Akers writes in his May 19, 1998 catalog of The Dr. Thaine B. Price Collection:

> "Three or four decades ago, the 1916-S was considered to be much more rare than it is today since nice Uncirculated examples were almost never available then. However, in the mid-to-late 1970's, several hoards were discovered containing perhaps 100-125 pieces, most of which were of average Uncirculated quality only. Subsequently, several other small groups were uncovered, adding to the overall population. As a result, the 1916-S is no longer considered a rare issue, but rather a very scarce one in terms of its overall rarity. However, true Gems are still very rare, much more so than they are commonly considered."

Earlier, in his 1988 work *A Handbook of 20th Century United States Gold Coins*, Akers recounted the prevailing traits of coins that came from those hoards: most were boldly detailed, green-gold and rose-gold overall, with the luster surprisingly lacking, at least by the standards of the series as a whole, sentiments echoed by Garrett and Guth. The present coin, though it shares the strong strike, shows several other differentiating traits that suggest careful preservation over the decades, rather than the carelessness of a hoard origin.

The Superb Gem that we offer in this lot is one of just two tied for the finest certified 1916-S ten dollar piece, both certified by PCGS; NGC has never graded an MS67 or better example of this issue (11/08). Exquisitely preserved, subtly satiny surfaces yield gorgeous luster and delightfully variegated greenish-gold and orange-gold patina, the typical coloration seen on coins that did not come out of either of the two prevailing hoards. A sharp strike brings out excellent detail on the design elements, and both sides have been meticulously cared for. A tiny toning spot at the juncture of the Indian's chin and neck, and a linear graze in the upper left reverse field pedigree the coin. This is a wonderful opportunity for the aficionado of Saint-Gaudens ten dollar coinage, one that has been recognized and acquired by the foremost collectors of the series for decades.

*From The Jim O'Neal Collection of Saint-Gaudens $10 Indians.* (#8880)

# Magnificent, Rare 1920-S Eagle, MS66

**3527 1920-S MS66 PCGS.** This year marked the first production of gold coinage since 1916. From the time 126,500 eagles were struck at the San Francisco Mint in 1920, they were considered one of the rarest of all 20th century ten dollar gold coins. Evidently, nearly all were exported in commercial trade, or held in Treasury vaults and eventually melted in the 1930s. No hoards have ever turned up and the coin remains very rare to this day.

T. Louis Comparette, curator of the Philadelphia Mint coin collection, was an important conduit of new coins for the Connecticut State Library's Mitchelson Collection and a few other institutions. Although specimens struck in Philadelphia were usually available with little difficulty, pieces from the other mints were available only from the pyx coins reserved for use of the Annual Assay Commission. (Collectors could usually purchase issued coins directly from each mint, but the quality of specimens was often well below the pyx coins.) On March 1, 1921, Comparette sent George Godard, the Connecticut State Librarian, two of the San Francisco eagles.

> "Here are two eagles struck at the San Francisco Mint in 1920. With some difficulty I was able to secure four specimens from the pyx, of which I send you these, one for your collections, the other for Sen. Hall, whose interests I am still willing to assist, though he will not answer my letters."

One of these was acquired by Godard from the estate of Connecticut State Senator William Henry Hall, whose personal collection included the duplicates sent by Comparette. It was sold by Stack's with Godard's personal collection in 1982. The Smithsonian National Numismatic Collection includes another example that was likely saved from the pyx.

The fact that individual specimens of this issue are so easily traced underscores the absolute rarity of the 1920-S. This particular coin that we offer here last appeared in the extraordinary collection of ten dollar Indians that was assembled by William Thomas Michaels. That set was sold in January 2004. The cataloger for Stack's wrote an insightful commentary on the 1920-S:

> "Although 126,500 coins of this date are reported to have been struck, it is quite evident that nearly all were melted before ever leaving the Mint. Unlike other key dates in this series such as the 1930 'S' and 1933 that, when available, are almost always encountered in Mint State, this date is found in all grades. The fact that most known survivors range in condition from Very Fine to Choice Brilliant Uncirculated only intensifies the desirability of the small number of Gem quality specimens extant."

This wide range of grades of availability (or unavailability as the case is more apt to be) points to a curious duality that is alluded to in the Stack's description. That is, an effort was made to release the 1920-S into circulation, as indicated by the 51 coins certified by PCGS and NGC in VF30 to AU58 grades. Apparently, what need there was for ten dollar coins that had not been produced since 1916, was soon met and the remainder were eventually melted. Thus, the 1920-S is both an absolute and condition rarity.

Walter Breen elaborates on the rarity of the 1920-S ten dollar in his 1988 *Complete Encyclopedia of U.S. and Colonial Coins*:

> "In my experience, the 1920-S is rarer than the 1930-S or 1933. For some decades one 1930-S turned up in the San Francisco area every three years, probably from a single roll. The 1933 is usually considered rarest. About 1952 a small hoard, possibly 20-30 in all ... showed up on the East Coast. A few others turned up later, from French and Swiss banks. No hoard of 1920-S ever appeared, though since 1980 possibly four or five have returned from Europe, and reportedly 10 more were found in upper New York State. Most of these late dates only come Unc. with varying amounts of bagmarks, testifying to their long residence in bank cash reserves."

Most of the known 1920-S tens show weakness of strike on the RTY of LIBERTY, but this is more of a tendency than an absolute diagnostic. This piece shows a full R but TY is not visible, and the typical weakness is noted on the trailing leg of the eagle. Otherwise, the remaining design elements are sharply defined. Both sides show the usual frosty mint luster that is always seen on mint examples of this rarity. The surfaces are remarkably clean, as one would expect for an MS66. A tiny planchet flake on the cheek of Liberty, and a small contact mark to the left of the left (facing) wing are mentioned as pedigree identifiers. The color on this coin is nothing short of extraordinary. Each side shows an intermixture of peach-gold, apricot, mint-green, rose-gold, and lilac patina that adds significantly to the overall eye appeal of this exceptionally well preserved coin.

This magnificent piece represents an opportunity for the advanced collector to add this key issue to a collection of ten dollar Indians. Rarely are such coins available in any condition, and at the Premium Gem level this piece is among the finest known. Population: 1 in 66, 1 finer (11/08).

# Radiant Premium Gem 1926 Eagle

**3528 1926 MS66 PCGS.** Among explanations of the availability of the 1926 eagle, the opening paragraph of the issue's entry in *The Coinage of Augustus Saint-Gaudens as Illustrated by the Phillip H. Morse Collection* is a nonpareil:

> "The 1926 ten dollar had a mintage of more than a million coins, and unlike many other ten Indians, it does not appear to have been extensively melted. Rather, many thousands were apparently shipped overseas in the late 1920s and 1930s to French and Swiss banks. Old hoards of this date have been available to collectors for at least 50 years. While this is a sure indicator of commonness when compared to other issues in the series, it also is good news for the collector as it increases the pool of available coins of this challenging design type."

While the presence of an MS66 piece in this "common" slot may seem unusual for this stellar collection, given the number of Superb Gem examples that represent other issues, there is no such option for even the wealthiest aficionado. Paradoxically for an issue so heavily minted and saved, the 1926 is unavailable at the MS67 level and a condition rarity even in Premium Gem, with just eight coins in the latter grade certified by PCGS (11/08). The repatriation process was not kind to the 1926. In his *A Handbook of United States Gold Coins*, David Akers writes that "Many specimens exhibit unsightly surface 'cuts' that seem considerably worse than one would normally expect as bagmarks. Is there an explanation for this?"

The sentiment is echoed by Garrett and Guth in their *Encyclopedia of U.S. Gold Coins*: "Despite the large mintage and general attractive nature of this date, most show more handling marks than seen on previous issues." No such troubles affect this gorgeous Premium Gem, which shows only a handful of luster grazes and other such trivial faults. The strike is exquisite, and the amber-gold and sun-yellow surfaces teem with luster. A powerfully appealing piece that would be a credit to any collection.

*From The Jim O'Neal Collection of Saint-Gaudens $10 Indians.* (#8882)

# Magnificent MS67 1930-S Ten, Ex: Duckor

**3529 1930-S MS67 PCGS.** Ex: Duckor. As America's circulating gold coinage production wound down though the 1920s and on to 1933, San Francisco's output became increasingly irregular. The West Coast facility was the only site to coin half eagles in 1916; production of the denomination ceased until Philadelphia created its heavily melted issue of 1929. While twenty dollar output enjoyed some consistency, at least in the years that other Mints produced the denomination, the end of the ten dollar denomination was fitful, with a decade falling between the famous 1920-S eagles and the 1930-S pieces, with the lone Philadelphia issue of 1926 intervening. The eagles and double eagles minted at San Francisco in 1930 would be the last U.S. gold coins struck at that Mint until 1984, when it manufactured a different sort of "eagle": ten dollar proof gold commemoratives for the Los Angeles Olympiad.

The 1930-S eagles, already few in number from the tiny original mintage of 96,000 pieces, was decimated by the gold meltings of the Roosevelt Administration. The vast majority of survivors are in varying degrees of Mint State, indicating an issue that met the same fate as many of the other melt rarities of the era. Garrett and Guth, in their *Encyclopedia of U.S. Gold Coins*, write: "In overall terms of rarity, this date ranks a little behind the 1920-S, with just a few hundred known in all, and those are scattered over the grading spectrum." The 1930-S eagle perhaps warrants a stronger compliment; the authors' use of "a few hundred" substantially overstates this issue's availability, since fewer than 200 entries appear in the combined certified population and most authorities list between 125 and 150 pieces extant.

Most of those survivors share several physical traits. As described in *The Coinage of Augustus Saint-Gaudens as Illustrated by the Phillip H. Morse Collection*, "When encountered, the 1930-S is invariably found with thick mint frost, a common trait on S-mint tens in this series." The book further notes that the strike can be soft, particularly at the centers, and that the color is typically "bright yellow or greenish-gold," with red overtones present on many of the highest-graded examples.

This coin's last auction appearance took place in November 1973. The cataloger for Bowers & Ruddy described it as "Gem Brilliant Uncirculated, an absolutely unimprovable specimen of this great rarity. Only rarely does a 1930-S appear on the market. Even rarer still is the appearance of a gem such as this. Worthy of a strong bid." Though one may quibble about the "absolutely unimprovable" aspect of the present piece (a small, shallow reverse graze to the left of the second A in AMERICA is a vital pedigree marker), the sentiment is agreeable, and time has changed neither the rarity of a top-notch example such as this, nor how deserving it is of collector attention. Impressively lustrous yellow-gold surfaces host meticulously preserved devices that sport razor-sharp peripheral detail with only the slightest hint of softness visible at the usual areas. Visual appeal is nothing short of spectacular, and the piece displays beautifully. As the only MS67 representative of this issue certified by PCGS (11/08), it is easily one of the most desirable Saint-Gaudens eagles in existence, and the dedicated student of the series will recognize the extraordinary nature of this Superb Gem's auction appearance. It is impossible to know how many more decades may pass before such an opportunity comes again.

# Fabulous MS66 1932 Eagle

**3530 1932 MS66 PCGS.** Ex: Duckor. Though many older references made little, if any comment on the apparent illogic of producing millions of gold coins in the harsh early years of the Great Depression, later authors have had few qualms about doing so. Garrett and Guth and their *Encyclopedia of U.S. Gold Coins* exemplify the trend: "One can only wonder why such a large number of eagles were coined at the absolute depth of the Depression, but for whatever reason, they were." The decision to strike those pieces makes some sense in light of the then-current presidential administration, though when the production is placed against a backdrop of millions of eagles and double eagles sitting in vaults in Philadelphia, Denver, and San Francisco, it is still inexplicable to a certain degree.

President Herbert Hoover did not turn a blind eye to the Great Depression, contrary to the impression that history books may impart, though his strategies for pulling the United States out of the Great Depression ultimately failed. Hoover and his Cabinet anticipated an eventual recovery, and even after the disruption of international trade by the struggles of different nations to revive their economies at the expense of others', production of gold coinage continued in anticipation. (The suspension of production for the quarter eagle and half eagle, two denominations used more in domestic commerce than international trade, reinforces this idea.)

Conditions continued to worsen, however, and with the defeat of the incumbent Hoover in the presidential election of 1932, the United States made a break with his administration's policies. Franklin Delano Roosevelt's role in the suspension of gold coinage (the eagles and double eagles of 1933 were struck prior to Roosevelt's inauguration) and the effects of his gold-recall executive order are well-established in numismatic lore.

Though millions of the 1932 eagles were melted, enough pieces survived out of the nearly 4.5 million coins struck that the 1932 is one of the most common Saint-Gaudens tens and one of two iconic type issues for the series. It is not until the Premium Gem level that the issue becomes conditionally scarce, and anything finer is a rarity. This gorgeous MS66 piece is among the most beautiful coins imaginable, powerfully lustrous with hints of twinkling frost on the uppermost parts of the sharply struck design. Generally yellow-gold surfaces show occasional milky patina from possible long-term storage, particularly at the left side of Liberty's headband. Each side is virtually mark-free with only a handful of trivial grazes. Magnificent eye appeal.

# Exceptional 1933 Gem Ten Dollar

**3531 1933 MS65 PCGS.** Ex: The O' Neal Collection. In an effort to help reverse the tide of the Depression, Franklin Roosevelt issued presidential orders in early 1933 halting the release of gold coins from the Mint, and recalling gold coin, gold bullion, and gold certificates. These orders created several noteworthy rarities in the 20th century gold series. Most notable among these are the 1933 eagle and the 1933 double eagle. While the latter issue is not believed to have been released before the president's declaration and, as such, is prohibitively rare (and considered by the Government to be illegal to own), 1933 Indian eagles are obtainable, albeit very scarce, and always realize strong prices whenever a survivor appears on the market.

Following its sizeable mintage of 4,463,000 pieces in 1932, the Philadelphia Mint opened 1933 with a respectable delivery of 312,500 eagles in January and February. A few of these coins, perhaps 30 to 40 pieces, were legally released through regular channels at that time. The aforementioned presidential orders not only halted gold coin production, but prompted the Philadelphia Mint to melt all remaining 1933 eagles. Walter Breen, in his 1988 *A Complete Encyclopedia of U.S. and Colonial Coins*, wrote that a small number of possibly 20 to 30 survivors, probably the majority of the coins issued, came to light in an east coast hoard circa 1952. Breen states: "I studied eight of them on a single tray in 1953: gem mint state beauties." A few more individual coins later turned up in French and Swiss banks. All known pieces are in Uncirculated grades.

PCGS and NGC have certified 35 1933 ten dollar pieces to date. One of these graded MS62, four coins rated MS63, and 18 were classified as near-Gems. Eleven specimens graded MS65, and NGC certified a single Premium Gem. It is quite possible that some of the foregoing coins are resubmissions.

In addition to the specimen housed in the National Collection at the Smithsonian Institution, the following roster enumerates 1933 ten dollar coins from plated auction catalogs available to us:

1. **MS66 NGC.** The Betty Goff C. Cartwright Collection (Stack's, 10/2004), lot 2190; The Collection of an East Coast Family (Heritage Auction Galleries, 6/2000), lot 7627.
2. **MS65**. The United States Gold Collection (Bowers and Ruddy, 10/1982), lot 873.
3. **MS65 PCGS.** The Floyd T. Starr Collection (Stack's, 10/1992), lot 1279; The Kutasi Collection (Heritage Auction Galleries, 1/2007), lot 3191; The Madison Collection (Heritage Auction Galleries, 1/2008), lot 3291.
4. **MS65 PCGS. The Present Coin.** The Michael I. Keston Collection (Superior, 1/1996), lot 194 (the Superior catalog indicates that this coin is "Previously from Stack's 1984 Amon Carter sale, lot 398," but our inspection of the Stack's catalog for the Carter sale does not substantiate this); The Phillip H. Morse Collection of Saint-Gaudens Coinage (Heritage Auction Galleries, 11/2005), lot 6520).
5. **MS65 NGC.** Ira and Larry Goldberg (5-6/2005), lot 1065.

6. **MS65.** Smithsonian Institution (per Jeff Garrett and Ron Guth, *Encyclopedia of U.S. Gold Coins, 1795-1933*, p.625).
7. **MS64.** The Norweb Collection (Bowers and Merena, 3/1998), lot 2329 (reported by the Bowers and Merena cataloger to be from the Palace Collection of King Farouk, 2/1954, lot 224).
8. **MS64 PCGS.** The Dr. Thaine B. Price Collection (David Akers Numismatics, 5/1998), lot 71; ANA National Money Show (Superior, 3/2000), lot 1007.
9. **MS64 NGC.** The Freedom Collection (Heritage Auction Galleries, 1/2007), lot 3693; Ira and Larry Goldberg (9/2007), lot 3404.
10. **MS64 PCGS.** The Richmond Sale I (David Lawrence Rare Coin Auctions, 7/2004), lot 2227; Heritage Auction Galleries (1/2007), lot 3694.
11. **Very Choice Brilliant Uncirculated.** The "Dallas Bank" Collection (Sotheby's/Stack's, 10/2001), lot 599.
12. **Brilliant Uncirculated** (Stack's, 5/1986), lot 1545.
13. **Brilliant Uncirculated** (Stack's, 10/1996), lot 1592.
14. **Brilliant Uncirculated** (Stack's, 3/2005), lot 1882.

We want to remind the reader that the foregoing roster only accounts for a limited number of extant 1933 ten dollar gold pieces, that is generally thought to be in the 30 to 40 range. One of the better estimates of surviving examples is perhaps that provided by Carl W.A. Carlson in his article "Tracker: An Introduction to Pedigree Research in the Field of Rare American Coins," published in the 1991 *The American Numismatic Association Centennial Anthology*, edited by himself and Michael Hodder. Carlson identifies at least 25 different 1933 eagle specimens, along with the auction appearances of 18 others "which either had no photo at all or else had a photo so poor as to make accurate plate matching impossible."

The Gem offered here exhibits lovely frosty surfaces that yield dazzling luster and a delicate blend of peach-gold and light green patination, imbued with occasional glimpses of light pink. A well executed strike leaves sharp impressions on the design features, with the Indian's hair, headdress feathers, and eagle's plumage displaying strong delineation in most areas. All of the peripheral elements are bold, except for minor softness on the lower part of the 1 in the date. The reverse mottos are crisp, as is the separation within the bundle of arrows upon which the eagle is perched. A few minute, grade-consistent contact marks are located on the Indian's portrait and in the lower left (facing) obverse field. A small mark is also noted in the reverse field above the eagle's tail, and a minuscule planchet void is visible beneath the last A in AMERICA. These are all unobtrusive, and mentioned solely to help future catalogers and researchers identify the coin.

In summary, this coin possesses exceptional technical quality and aesthetic appeal. This is an infrequent opportunity to acquire one of the most important coins in American numismatics. Population: 7 in 65, 0 finer (11/08).

# UNDER EXECUTIVE ORDER OF THE PRESIDENT

**Issued April 5, 1933**

**all persons are required to deliver**

# ON OR BEFORE MAY 1, 1933

**all GOLD COIN, GOLD BULLION, AND GOLD CERTIFICATES now owned by them to a Federal Reserve Bank, branch or agency, or to any member bank of the Federal Reserve System.**

## Executive Order

FORBIDDING THE HOARDING OF GOLD COIN, GOLD BULLION AND GOLD CERTIFICATES.

By virtue of the authority vested in me by Section 5(b) of the Act of October 6, 1917, as amended by Section 2 of the Act of March 9, 1933, entitled "An Act to provide relief in the existing national emergency in banking, and for other purposes", in which emergency Act Congress declared that a serious emergency exists, I, Franklin D. Roosevelt, President of the United States of America, do declare that said national emergency still continues to exist and pursuant to said section do hereby prohibit the hoarding of gold coin, gold bullion, and gold certificates within the continental United States by individuals, partnerships, associations and corporations and hereby prescribe the following regulations for carrying out the purposes of this order:

Section 1. For the purposes of this regulation, the term "hoarding" means the withdrawal and withholding of gold coin, gold bullion or gold certificates from the recognized and customary channels of trade. The term "person" means individual, partnership, association or corporation.

Section 2. All persons are hereby required to deliver on or before May 1, 1933, to a Federal reserve bank or a branch or agency thereof or to any member bank of the Federal Reserve System all gold coin, gold bullion and gold certificates now owned by them or coming into their ownership on or before April 28, 1933, except the following:

(a) Such amount of gold as may be required for legitimate and customary use by industry, professional or artistic users, or reasonable lawful, (including gold coins in collectors' sets

# Heritage Auction Galleries Staff

**Steve Ivy - Co-Chairman and CEO**

Steve Ivy began collecting and studying rare coins in his youth, and as a teenager in 1963 began advertising coins for sale in national publications. Seven years later, at the age of twenty, he opened Steve Ivy Rare Coins in downtown Dallas, and in 1976, Steve Ivy Numismatic Auctions was incorporated. Steve managed the business as well as serving as chief numismatist, buying and selling hundreds of millions of dollars of coins during the 1970s and early 1980s. In early 1983, James Halperin became a full partner, and the name of the corporation was changed to Heritage Rare Coin Galleries. Steve's primary responsibilities now include management of the marketing and selling efforts of the company, the formation of corporate policy for long-term growth, and corporate relations with financial institutions. He remains intimately involved in numismatics, attending all major national shows. Steve engages in daily discourse with industry leaders on all aspects of the rare coin/currency business, and his views on grading, market trends and hobby developments are respected throughout the industry. He serves on the Board of Directors of the Professional Numismatists Guild (and was immediate past president), is the current Chairman of The Industry Council for Tangible Assets, and is a member of most leading numismatic organizations. Steve's keen appreciation of history is reflected in his active participation in other organizations, including past or present board positions on the Texas Historical Foundation and the Dallas Historical Society (where he also served as Exhibits Chairman). Steve is an avid collector of Texas books, manuscripts, and national currency, and he owns one of the largest and finest collections in private hands. He is also a past Board Chair of Dallas Challenge, and is currently the Finance Chair of the Phoenix House of Texas.

**James Halperin - Co-Chairman**

Jim Halperin and the traders under his supervision have transacted billions of dollars in rare coin business, and have outsold all other numismatic firms every year for over two decades. Born in Boston in 1952, Jim attended Middlesex School in Concord from 1966 to 1970. At the age of 15, he formed a part-time rare coin business after discovering that he had a knack (along with a nearly photographic memory) for coins. Jim scored a perfect 800 on his math SATs and received early acceptance to Harvard College, but after attending three semesters, he took a permanent leave of absence to pursue his full-time numismatic career. In 1975, Jim personally supervised the protocols for the first mainframe computer system in the numismatic business, which would catapult New England Rare Coin Galleries to the top of the industry in less than four years. In 1983, Jim merged with his friend and former archrival Steve Ivy, whom Jim had long admired. Their partnership has become the world's largest and most successful numismatic company, as well as the third-largest auctioneer in America. Jim remains arguably the best "eye" in the coin business today (he won the professional division of the PCGS World Series of Grading). In the mid-1980s, he authored "How to Grade U.S. Coins" (now posted on the web at www.CoinGrading.com), a highly-acclaimed text upon which the NGC and PCGS grading standards would ultimately be based. Jim is a bit of a Renaissance man, as a well-known futurist, an active collector of EC comics and early 20th-century American art (visit www.jhalpe.com), venture capital investor, philanthropist (he endows a multimillion-dollar health education foundation), and part-time novelist. His first fictional novel, "The Truth Machine," was published in 1996 and became an international science fiction bestseller, and was optioned for movie development by Warner Brothers. Jim's second novel, "The First Immortal," was published in early 1998 and immediately optioned as a Hallmark Hall of Fame television miniseries. Jim is married to Gayle Ziaks, and they have two sons, David and Michael. In 1996, with funding from Jim and Gayle's foundation, Gayle founded Dallas' Dance for the Planet, which has grown to become the largest free dance festival in the world.

**Greg Rohan - President**

At the age of eight, Greg Rohan started collecting coins as well as buying them for resale to his schoolmates. By 1971, at the age of ten, he was already buying and selling coins from a dealer's table at trade shows in his hometown of Seattle. His business grew rapidly, and by 1985 he had offices in both Seattle and Minneapolis. He joined Heritage in 1987 as Executive Vice-President and Manager of the firm's rare coin business. Today, as an owner and as President of Heritage, his responsibilities include overseeing the firm's private client group and working with top collectors in every field in which Heritage is active. Greg has been involved with many of the rarest items and most important collections handled by the firm, including the purchase and/or sale of the Ed Trompeter Collection (the world's largest numismatic purchase according to the Guinness Book of World Records), the legendary 1894 San Francisco Dime, the 1838 New Orleans Half Dollar, and the 1804 Silver Dollar. During his career, Greg has handled more than $1 billion of rare coins, collectibles and art, and provided expert consultation concerning the authenticity and grade condition of coins for the Professional Coin Grading Service (PCGS). He has provided expert testimony for the United States Attorneys in San Francisco, Dallas, and Philadelphia, and for the Federal Trade Commission (FTC). He has worked with collectors, consignors, and their advisors regarding significant collections of books, manuscripts, comics, currency, jewelry, vintage movie posters, sports and entertainment memorabilia, decorative arts, and fine art. Additionally, Greg is a Sage Society member of the American Numismatic Society, and a member/life member of the PNG, ANA, and most other leading numismatic organizations. Greg is also Chapter Chairman for North Texas of the Young Presidents' Organization (YPO), and is an active supporter of the arts. Greg co-authored "The Collectors Estate Handbook," winner of the NLG's Robert Friedberg Award for numismatic book of the year. Mr. Rohan currently serves on the seven-person Advisory Board to the Federal Reserve Bank of Dallas, in his second appointed term. He and his wife, Lysa, are avid collectors of rare wine, Native American artifacts, and American art.

**Paul Minshull - Chief Operating Officer**

As Chief Operating Officer, Paul Minshull's managerial responsibilities include integrating sales, personnel, inventory, security and MIS for Heritage. His major accomplishments include overseeing the hardware migration from mainframe to PC, the software migration of all inventory and sales systems, and implementation of a major Internet presence. Heritage's successful employee-suggestion program has generated 200 or more ideas each month since 1995, and has helped increase employee productivity, expand business, and improve employee retention. Paul oversees the company's highly-regarded IT department, and has been the driving force behind Heritage's web development, now a significant portion of Heritage's future plans. As the only numismatic auction house that combines traditional floor bidding with active Internet bidding, the totally interactive system has catapulted Heritage to the top rare coin website (according to Forbes Magazine's "Best of the Web"). Paul was born in Michigan and came to Heritage in 1984 after 12 years as the General Manager of a plastics manufacturing company in Ann Arbor. Since 1987, he has been a general partner in Heritage Capital Properties, Sales Manager, Vice President of Operations, and Chief Operating Officer for all Heritage companies and affiliates since 1996. Paul maintains an active interest in sports and physical fitness, and he and his wife have three children.

**Todd Imhof - Vice President**
Todd Imhof did not start collecting coins in his teens, unlike most professional numismatists. Shortly after graduating college, Todd declined an offer from a prestigious Wall Street bank to join a former high school classmate in his small rare coin firm in the Seattle area. In the mid-1980s, the rare coin industry was rapidly changing, with the advent of third-party grading and growing computer technologies; as a newcomer, Todd more easily embraced these new dynamics. He soon discovered a personal passion for rare coins, and for working with high-level collectors; in 1991, he co-founded Pinnacle Rarities, a firm specialized in servicing the savviest and most prominent collectors in numismatics. At 25, he was accepted into the PNG, and currently serves on its Consumer Protection Committee and its Legislation/Taxation Issues Committee. In 1992, he was invited to join the Board of Directors for the Industry Council for Tangible Assets, later serving as its Chairman (2002-2005).

Todd enjoys a reputation that is envied by the entire numismatic community, and his relationship with Heritage's most prominent clients, who seek his expertise and integrity, has only strengthened over the years. Clients and colleagues are impressed by his ability to navigate complex deals with unsurpassed professionalism. By understanding what each collector is trying to accomplish, Todd has the uncanny ability to identify the perfect coins at the right prices. In the famous Phillip Morse Auction, he became the only person in history to purchase two separate $1mm+ coins during a single auction session! Todd is an avid competitive sailor, and collector of fine wines and Olympic medals. He and his wife have two sons and a daughter.

**Leo Frese - Vice President**
Leo has been involved in numismatics for nearly 40 years, a professional numismatist since 1971, and has been with Heritage for over 20 years. He literally worked his way up the Heritage "ladder" through dedication, hard work, and a belief that the client is the most important asset Heritage has. He worked with Bob Merrill for nearly 15 years and now is the Director of Consignments. Leo has been actively involved in assisting clients sell nearly $500,000,000 in numismatic material. Leo was recently accepted as a member of PNG, is a life member of the ANA, and holds membership in FUN, CSNS, and other numismatic organizations. He believes education is the foremost building block in numismatics. Leo encourages all collectors to broaden their horizons, be actively involved in the hobby, and donate freely to YN organizations. Leo's interests include collecting Minnesota pottery and elegant Depression glass. Although travel is an important element of his job, he relishes time with his wife Wendy, children Alicen and Adam, and son-in-law Jeff.

**Norma L. Gonzalez - VP of Auction Operations**
Born in Dallas, Texas, Norma joined the U.S. Navy in August of 1993. During her five-year enlistment, she received her Bachelor's Degree in Resource Management and traveled to Japan, Singapore, Thailand and lived in Cuba for three years. After her enlistment, she moved back to Dallas where her family resides. Norma joined Heritage in 1998; always ready for a challenge, she spent her days at Heritage and her nights obtaining an M. B. A. She was promoted to Vice President in 2003. She currently manages the operations departments, including Coins, Currency, World & Ancient Coins, Sportscards & Memorabilia, Comics, Movie Posters, Pop Culture and Political Memorabilia. Norma enjoys running, biking and spending time with her family. In February 2004 she ran a 26.2-mile marathon in Austin, Texas and later, in March she accomplished a 100-mile bike ride in California.

**Debbie Rexing - VP - Marketing**
Debbie's marketing credentials include degrees in Business Administration in Marketing and Human Resource Management from The Ohio State University, as well as sales experience for General Foods. After joining Heritage in 2001, Debbie rapidly became an integral part of the marketing teams involved with Heritage's most exciting and successful specialties, including U.S. Coins, World Coins, Currency, Music & Entertainment, Vintage Movie Posters, Americana, and U.S. Tangibles Inc. Her varied responsibilities included cross-functional coordination of photography, auction logistics, and marketing. Debbie has been active in coin auctions, staffing the podium, executing client bids, and in lot viewing. Her wide experience in many aspects of the business has provided her with a broad perspective of Heritage's activities. She and her husband Rick have three children – Trent, Abbey, and Claire – and her hobbies include interior design, entertaining and exercise, the beach and water activities, and watching Ohio State football.

**Kelley Norwine - VP - Media and Client Relations**
Born and raised in South Carolina, Kelley pursued a double major at Southern Wesleyan University, earning a BA in Music Education and a BS in Business Management. A contestant in the Miss South Carolina pageant, Kelley was later Regional Manager & Director of Training at Bank of Travelers Rest in South Carolina. Relocating to Los Angeles, Kelley became the Regional Manager and Client Services Director for NAS-McCann World Group, an international Advertising & Communications Agency where she was responsible for running one of the largest offices in the country. During her years with NAS Kelley was the recipient of numerous awards including Regional Manager of the Quarter and the NAS Courage and Dedication award. After relocating to Dallas, Kelley took a job as Director of Client Services for TMP/Monster Worldwide and joined Heritage in 2005 as Director of Client Development. She was named VP of Marketing for Heritage in 2007. A cancer survivor, Kelley is an often-requested motivational speaker for the American Cancer Society. In her spare time, she writes music, sings, and plays the piano.

**Patricia Castillo - Director of Auctions & Client Service**
Patricia Castillo lived all over the country before settling down in Ferris, Texas, near Dallas. She began her career working in Customer Service, and in 2001 joined the Heritage family assisting in Client Services and live auctions. Patricia's knowledge grew with the company, and her hard work led to her promotion to Director of Auctions and Client Services. Patricia is directly involved in the training and management of the Client Services team. A cancer survivor, Patricia enjoys spending time with her two beautiful little girls, attending softball games, and spending time with family and friends.

**Andrea Voss - Live-Auction & Event Coordinator**
Andrea Voss is a true Texas native – born and educated in the Dallas area, with a degree in Journalism from the University of North Texas in Denton. Andrea joined the Heritage family in 2004, and after assisting Client Services with e-mail inquiries, she earned the opportunity to become the Auction Supervisor. Her responsibilities have grown with her experiences, and she is now the Live-Auction & Event Coordinator. Clients may see her in the back of the live auction room supervising, or in the front using her Auctioneer license. In her off hours, Andrea enjoys time on her patio with her dog and cat, and still dreams of one day being a writer.

**Devin Jackson - Auction Client Services/Live Auction Supervisor**
Devin Jackson joined Heritage in 2005 as a member of the Client Services Group. Devin is a native Texan, growing up in a small suburb south of Dallas. Devin later attended the University of North Texas and graduated with a Bachelor's Degree in Kinesiology. A life long sports fanatic, Devin briefly coached high school football, basketball, and track in his home town of Ferris, TX after graduating from college. Devin later joined the staff of Heritage Auction Galleries, assisting with Live Auctions and Client Services. Devin has collected sports cards and memorabilia since he was a young boy and he continues to collect memorabilia from his favorite professional sports teams, including the San Francisco 49ers.

**Marti Korver - Manager - Credit/Collections**
Marti has been working in numismatics for more than three decades. She was recruited out of the banking profession by Jim Ruddy, and she worked with Paul Rynearson, Karl Stephens, and Judy Cahn on ancients and world coins at Bowers & Ruddy Galleries, in Hollywood, CA. She migrated into the coin auction business, running the bid books for such memorable sales as the Garrett Collection and representing bidders as agent at B&R auctions for 10 years. She also worked as a research assistant for Q. David Bowers for several years. Memorable events included such clients (and friends) as Richard Lobel, John Ford, Harry Bass, and John J. Pittman. She is married to noted professional numismatist and writer, Robert Korver, (who is sometimes seen auctioneering at coin shows) and they migrated to Heritage in Dallas in 1996. She has an RN daughter (who worked her way through college showing lots for Heritage) and a son (who is currently a college student and sometimes a Heritage employee) and a type set of dogs (one black and one white). She currently collects kitschy English teapots and compliments.

**Becky Dirting - Managing Director, Collectibles Division**
Becky joined Heritage in 2005 and was named Managing Director of the Collectibles Departments in 2007, providing direct oversight for such auction specialties as Historical Books & Manuscripts, Americana & Political, Civil War, Western, Americana Indian Art, Texana, Comics & Comic Art, Music & Entertainment, Vintage Movie Posters, Sports Collectibles, Illustration Art, and Natural History. Becky's career path included PwC Consulting in Learning and Knowledge Management, and she remains focused on staff development, training, operations and process development, knowledge management, budget management, and contract negotiation. She enjoys spending time with her wonderful husband, sons, extended family, friends and beloved pets, and is a talented chef.

**Julie Gonzalez - Director of Auction Operations**
After working part-time for Heritage for many years, Julie Gonzalez was so excited about the growth opportunities that she joined us on a full-time basis! As the Operations Manager for Americana, she led her team through several successful auctions, and was then promoted to lead the operations staff and consignment coordinators for a third of Heritage's specialty auctions. Her work ethic, determination and tenacity are supporting Heritage's growth. Away from work, you might spot Julie outside enjoying time with her family and friends, or running.

# Coin Department Specialists

**David Mayfield - Vice President**
David has been collecting and trading rare coins and currency for over 35 years. A chance encounter with his father's coin collection at the age of nine led to his lifetime interest. David has been buying and selling at coin shows since the age of 10. He became a full time coin & currency dealer in the mid-80s. David's main collecting interest is in all things Texas, specializing in currency and documents from the Republic of Texas. Being a sixth generation Texan whose family fought for Texas' independence has only increased the value and meaning of these historical artifacts for him. After more than two decades of marriage, David and Tammy have two wonderful sons, Brian and Michael.

**Jim Jelinski - Consignment Director**
A collector since age 8, Jim has been involved in numismatics over 5 decades, progressing from humble collector to professional dealer and educator. He is a Life Member of the *American Numismatic Association*, the *American Numismatic Society*, and other state and national organizations. Starting as Buyer for Paramount International Coin Corporation in 1972, he opened Essex Numismatic Properties in 1975 in New Hampshire. Later, positions at M.B. Simmons & Associates of Narberth, Pennsylvania included Director of Sales, Director of Marketing and Advertising, and Executive Vice President. In 1979, he reorganized Essex in Connecticut and, as Essex Numismatics, Inc., worked as COO and CFO. He joined the staff at Heritage as Senior Numismatist and Consignment Coordinator. Jim has two sons, and is actively involved in his church, and community; he just completed his 20th season of coaching youth athletics, and working in Boy Scouting as a troop leader and merit badge counselor. He has been a fund raiser for Paul Newman's "Hole in the Wall Gang" camp for terminally ill children, and for Boy Scouts. His personal diversions include fly fishing, sky diving, cooking, and wine collecting.

**Sam Foose - Consignment Director and Auctioneer**
Sam's professional career at Heritage divides neatly into two parts. Sam joined Heritage Numismatic Auctions, Inc. in 1993 as an Auction Coordinator. Over the next five years, Sam ran the day-to-day auction operations, ultimately rising to Assistant Auction Director, and began calling auctions. After serving as a Senior Manager and Consignment Director in other collectible fields outside of numismatics, Sam returned to Heritage in 2002 as a Consignment Director in time to help Heritage's expansion into other collectibles. Sam travels the country assisting clients who wish to liquidate their collections of coins, paper money, decorative arts, and sports collectibles. To Sam, helping consignors make the best decisions to maximize their returns from auctioning their properties is the most rewarding part of his job. Sam holds auction licenses in several jurisdictions, and has hammered in excess of $250 million in collectibles as one of Heritage's primary auctioneers. During his free time, Sam enjoys his wife (Heather) and two children (Jackson and Caroline), gardening, golf, grilling, and sports.

**Bob Marino - Consignment Director & Senior Numismatist**
Bob started collecting coins in his youth, and started selling through eBay as the Internet became a serious collector resource. He joined Heritage in 1999, managing and developing Internet coin sales, and building Heritage's client base through eBay and other Internet auction websites. He has successfully concluded more than 40,000 transactions on eBay, selling millions of dollars of rare coins to satisfied clients. Many collectors were first introduced to Heritage through Bob's efforts, and he takes pride in dealing with each client on a personal level. Bob is now a Consignment Director, assisting consignors in placing their coins and collectibles in the best of the many Heritage venues – in short, maximizing their return on many of the coins that he sold to them previously! Bob and his family moved to the DFW area from the Bitterroot Valley in Western Montana. He enjoys spending time with his family, woodworking (building furniture), and remodeling his house.

**Charles Clifford - Consignment Director**
Charles has been involved with collectibles for over 35 years. His first venture with coins began in the 1970s when he drove to banks all over North Texas buying bags of half dollars to search for the 40% silver clad coins. He has worked as a bullion trader, a rare coin buyer, worked in both wholesale and retail sales, served as a cataloger, and has traveled to hundreds of coin and sports card conventions across the country. Charles also has the distinction of working with Steve Ivy over four decades! Currently he is assisting clients obtain top dollar for the items they have for sale, either by direct purchase or by placing their material in auction. He appreciates Heritage's total commitment to "World Class Client Service" and the "Can Do - Nothing is Impossible" attitude of management and each and every employee. He enjoys collecting hand-blown Depression glass and antique aquarium statues.

**Mike Sadler - Consignment Director**
Mike Sadler joined the Heritage team in September 2003. Mike attended the United States Air Force Academy, earning a degree in civil engineering and pinned on his silver wings in June 1985. After seven years flying various aircraft, he joined American Airlines where he still pilots. More than once, Mike has surprised Heritage employees serving as their pilot while they flew to shows, conventions, and to visit clients. Like so many of our clients, Mike started putting together sets of coins from circulation when he was a small boy, and that collection grew to go to the auction block with Heritage in January 2004. Before coming to Heritage, his unlimited access to air travel enabled him to attend coin shows all around the country. He gained a tremendous knowledge of rare coins and developed an outstanding eye for quality. He is a trusted friend and colleague to many of today's most active collectors. Having been a collector for so long, and a Heritage consignor himself, Mike understands the needs of the collector and what Heritage can offer. Mike is married, has three children, and enjoys coaching and playing lacrosse

**Katherine Kurachek - Consignment Director**
Katherine grew up in Sarasota, Florida, graduated from the University of Mississippi in 1993 as an art major, and then resided in Colorado (where she opened a pizzeria!) before moving to Dallas. Acting on a suggestion from her father, an avid collector of type coins and a client of Steve Ivy for more than two decades, Katherine came to Heritage in January 2003. She worked alongside Leo Frese for several years, honing her experience in dealing with the numismatic wholesale trade. Taking care of the needs of our dealer-consignors includes soliciting the consignments, inputting the material into our computer systems, and ensuring the smooth flow of the consignment through the many production processes. Katherine is now frequently traveling to coin shows to represent Heritage and service her dealer accounts.In her spare time, she enjoys gardening, golf, hiking, fly-fishing, and walking her two Akitas (Moses and April). Katherine has finally inherited her father's love of these pieces of history, and currently collects love tokens and counterstamps.

**Jason Friedman - Consignment Director**
Jason's interest in rare coins began at the age of twelve when he discovered a bag of Wheat cents and Liberty nickels in his garage. His collecting interest expanded to Morgans and dealing in various coinage. Jason's numismatic business allowed him to pay for most of his college tuition while working part time and attending classes full time. Jason earned his degree in business from the University of North Texas in 2005. Shortly after, he joined Heritage and was able to turn his passion for numismatics into a career. His computer skills and coordinator background are invaluable tools in accessing all levels of expertise at Heritage. Jason enjoys interacting with clients and assisting them in every aspect of the auction process. Apart from his director position, Jason finds it particularly gratifying phone bidding on clients' behalf. He is a member of the American Numismatic Association (ANA) and Florida United Numismatists (FUN).

**Doug Nyholm - Consignment Director**
Doug has been collecting coins since the age of ten and fondly recalls spending Morgan silver dollars to purchase candy as a boy. He worked in the IT industry for 28 years with Unisys, 3Com and Sun Microsystems before joining Heritage. Doug's expertise includes all U.S. coins and varieties. He is also well acquainted with U.S. Federal currency and obsoletes. Doug has a special interest in territorials, and in 2004 he wrote and published *The History of Mormon Currency* and has authored many articles on Kirtland currency, scrip and related Utah items. He is currently writing several additional books including one on Utah National Banknotes. Doug is married, has two daughters, and enjoys mountain climbing and hiking. Doug was the President of the Utah Numismatic Society for 2006-07. His current collecting interests include Capped Bust & Seated half dollars, U.S. Type, and Mormon coins & currency.

**David Lindvall - Consignment Director**
David is a Life Member of the American Numismatic Association, and it seems at times that he has spent his entire life traveling to coin shows across America. His career in numismatics actually started in 1973 at International Coin of Minneapolis. In 1988, he joined Heritage in their Wholesale Division, ultimately rising to become Manager. David continues to enjoy numismatics, but after three decades of traveling to conventions large and small, he decided to change positions so he could spend more time at home than in airport lounges. He joined Heritage's Consignment Director team, where his lifetime of numismatic experience is benefiting clients who expect the very best service when they consign their coins and notes to auction. David has a BA in History and a Masters of Divinity, and he continues to be active in both areas. Now living on Cedar Creek Lake, his hobbies include boating, fishing, and making his lake home available to family and friends to enjoy the lakeside amenities.

**Dennis Nowicki - Consignment Director**
Dennis is fascinated with historical collectibles, and began his numismatic career as the Auction Manager for Bowers and Ruddy Galleries/ American Auction Association in the mid-1970s. After serving in the USAF at NORAD-Cheyenne Mountain Complex, Dennis spent a decade in Japan as a language instructor. He remained active in numismatics and philatelics as a dealer and collector. In the 1990s, he joined Heritage as their webmaster/designer, garnering the NLG's Outstanding Web Site award. Dennis later designed and supported websites for several numismatic firms, as well as cataloging auction lots. He has returned to Heritage as a Consignment Director and cataloger for the US and World coin departments.

**Mark Van Winkle - Chief Cataloger**
Mark has worked for Heritage (and Steve Ivy) since 1979. He has been Chief Cataloger since 1990, and has handled some of the premier numismatic rarities sold at public auction. Mark's literary achievements are considerable. He was editor of *Legacy* magazine, won the 1989 NLG award for Best U.S. Commercial Magazine, and the next year won another NLG award for Best Article with his "Interview With John Ford." In 1996 he was awarded the NLG's Best Numismatic Article "Changing Concepts of Liberty," and was accorded a third place Heath Literary Award that same year. He has done extensive research and published his findings on Branch Mint Proof Morgan Dollars, in addition to writing numerous articles for *Coin World* and *Numismatic News*. Mark has also contributed to past editions of the *Red Book*, and helped with the Standard Silver series in Andrew Pollock's *United States Patterns and Related Issues*. He was also a contributor to *The Guide Book of Double Eagle Gold Coins*.

**Mark Borckardt - Senior Cataloger**
Mark started attending coin shows and conventions as a dealer in 1970, and has been a full-time professional numismatist since 1980. He received the Early American Coppers Literary Award, and the Numismatic Literary Guild's Book of the Year Award, for the *Encyclopedia of Early United States Cents, 1793-1814*, published in 2000. He serves as a contributor to *A Guide Book of United States Coins*, and has contributed to many references, including the Harry W. Bass, Jr. Sylloge, and the *Encyclopedia of Silver Dollars and Trade Dollars of the United States*. Most recently, he was Senior Numismatist with Bowers and Merena Galleries, serving as a major contributor to all of that firm's landmark auctions. Mark is a life member of the A. N. A., and an active member of numerous organizations. He is an avid collector of numismatic literature, holding several thousand volumes in his library, as well as related postcards and ephemera. He is an avid bowler, carrying an 200+ average, and with seven perfect 300 games. Mark is a graduate of the University of Findlay (Ohio) with a Bachelors Degree in Mathematics. Mark and his wife have a 20-something year old son, and twin daughters who are enrolled at Baylor.

**Brian Koller - Cataloger & Catalog Production Manager**
Brian's attention to detail ensures that every catalog, printed and on-line, is as error free as technology and human activity allows. In addition to his coin cataloging duties, he also helps with consignor promises and client service issues. Brian has been a Heritage cataloger since 2001, and before that he worked as a telecom software engineer for 16 years. He is a graduate of Iowa State University with a Bachelor's degree in Computer Engineering, and is an avid collector of U.S. gold coins. Brian's numismatic footnote is as discoverer of a 1944-D half dollar variety that has the designer's monogram engraved by hand onto a working die. In addition to describing many thousands of coins in Heritage catalogs, Brian has written more than one thousand reviews of classic movies, which can be found on his website, filmsgraded.com.

**John Salyer - Cataloger**
John has been a numismatist and coin cataloger with Heritage since 2002. He began collecting Lincoln Cents, Jefferson Nickels, Mercury and Roosevelt Dimes, and Franklin Halves at the age of eleven, as a sixth-grader in Fort Worth; his best friend was also a collector, and his dad would drive them to coin shops and flea markets in search of numismatic treasures. The two youngsters even mowed lawns together in order to purchase their coins, which were always transferred into Whitman folders. John graduated from the University of Texas with a bachelor's degree in English. Prior to his numismatic employment, he worked primarily within the federal government and for several major airlines. His hobbies include playing guitar and collecting antique postcards; an avid golfer, he also enjoys spending time on the links. John has enjoyed making his former hobby his current occupation.

**Dr. Jon Amato - Cataloger**
Jon has been with Heritage since 2004. He was previously a Program Manager in the NY State Dept. of Economic Development, and an Adjunct Professor at the State University of New York at Albany, where he taught economic geography, natural disasters assessment, and environmental management. Jon is currently writing a monograph on the draped bust, small eagle half dollars of 1796-1797; his research included surveying more than 4,000 auction catalogs, recording the descriptions, grades, and photos of 1796-1797 halves. He published an article entitled "Surviving 1796-1797 Draped Bust Half Dollars and their Grade Distribution," in the *John Reich Journal*, February 2005, and also wrote "An Analysis of 1796-1797 Draped Bust Half Dollars," in *The Numismatist*, Sept. 2001. Jon belongs to many numismatic organizations, including the ANA, ANS, John Reich Collectors Society, and the Liberty Seated Collectors Club, and has made several presentations at ANA Numismatic Theaters. He earned a bachelor's degree from Arizona State University, an M.A. from the S. U. N. Y. at Buffalo, and a Ph. D. from the University of Toronto.

**John Dale Beety - Cataloger**
John grew up in Logansport, Indiana, a small town associated with several numismatic luminaries. Highlights as a Young Numismatist include attending Pittman III, four ANA Summer Seminars (thanks to various YN scholarships), and placing third in the 2001 World Series of Numismatics with Eric Li Cheung. He accepted a position with Heritage as a cataloger immediately after graduation from Rose-Hulman Institute of Technology, after serving an internship at Heritage during the summer of 2004. In addition to his numismatic interests, he enjoys many types of games, with two state junior titles in chess and an appearance in the Top 20 Juniors list of the World Blitz Chess Association.

**Cristina Gonzalez - Director of Operations**
Cristina Gonzalez started working at Heritage in 1999, and through years of dedication and application, rose from a Coin Operations Clerk to the Director of Coin Operations. Through innovative thinking, she restructured the daily office tasks preparing millions of numismatic items for auction. She leads a staff of twenty through 104 Weekly Internet Auctions and more than a dozen Signature Auctions each year. Cristina is also supervisor of the Auctions travelling team and attends every numismatic auction. She loves spending time with her family, especially her grandchildren, and working in her yard.

**Ron Brackemyre - Operations Manager**
Ron Brackemyre began his career at Heritage Auction Galleries in 1998 as the Manager of the Shipping Department, and was promoted to Consignment Operations Manager for Numismatics in 2004. He is responsible for the security of all of Heritage's coin and currency consignments, both at the Dallas world headquarters and at shows. His department also coordinates the photography, scanning, and cataloging of coins for upcoming auctions; coordination of auction planning; security and transportation logistics, and lot-view and auction prep. If you have attended a live Heritage coin auction, you are familiar with Ron's excellent work. Ron and his wife, Denice, have two teen-aged sons, and the family passion is riding dirt bikes.

**Cataloged by:** Jon Amato, John Beety, John Salyer

**Edited by:** Mark Van Winkle, Stewart Huckaby, Bob Korver

**Operations Support by:** Cristina Gonzales, Miguel Reynaga Sr., Edna Lopez, Alma Villa, Maria Flores, Celeste Robertson, Manuela Bueno, Cristina Ibarra, Maria Jimenez

**Catalog and Internet Imaging by:** Colleen McInerney, Tony Webb

**Production and Design by:** Michael Puttonen, Carl Watson, Mary Hermann, Mark Masat, Debbie Rexing

# Terms and Conditions of Auction

**Auctioneer and Auction:**

1. This Auction is presented by Heritage Auction Galleries, a d/b/a/ of Heritage Auctions, Inc., or its affiliates Heritage Numismatic Auctions, Inc., or Heritage Vintage Sports Auctions, Inc., or Currency Auctions of America, Inc., as identified with the applicable licensing information on the title page of the catalog or on the HA.com Internet site (the "Auctioneer"). The Auction is conducted under these Terms and Conditions of Auction and applicable state and local law. Announcements and corrections from the podium and those made through the Terms and Conditions of Auctions appearing on the Internet at HA.com supersede those in the printed catalog.

**Buyer's Premium:**

2. On bids placed through Auctioneer, a Buyer's Premium of fifteen percent (15%) will be added to the successful hammer price bid on lots in Coin and Currency auctions, or nineteen and one-half percent (19.5%) on lots in all other auctions. There is a minimum Buyer's Premium of $9.00 per lot. In Gallery Auctions (sealed bid auctions of mostly bulk numismatic material), the Buyer's Premium is 19.5%.

**Auction Venues:**

3. The following Auctions are conducted solely on the Internet: Heritage Weekly Internet Auctions (Coin, Currency, Comics, and Vintage Movie Poster); Heritage Monthly Internet Auctions (Sports, and Stamps). Signature® Auctions and Grand Format Auctions accept bids from the Internet, telephone, fax, or mail first, followed by a floor bidding session; Heritage Live and real-time telephone bidding are available to registered clients during these auctions.

**Bidders:**

4. Any person participating or registering for the Auction agrees to be bound by and accepts these Terms and Conditions of Auction ("Bidder(s)").
5. All Bidders must meet Auctioneer's qualifications to bid. Any Bidder who is not a client in good standing of the Auctioneer may be disqualified at Auctioneer's sole option and will not be awarded lots. Such determination may be made by Auctioneer in its sole and unlimited discretion, at any time prior to, during, or even after the close of the Auction. Auctioneer reserves the right to exclude any person from the auction.
6. If an entity places a bid, then the person executing the bid on behalf of the entity agrees to personally guarantee payment for any successful bid.

**Credit:**

7. Bidders who have not established credit with the Auctioneer must either furnish satisfactory credit information (including two collectibles-related business references) well in advance of the Auction or supply valid credit card information. Bids placed through our Interactive Internet program will only be accepted from pre-registered Bidders; Bidders who are not members of HA.com or affiliates should pre-register at least 48 hours before the start of the first session (exclusive of holidays or weekends) to allow adequate time to contact references. Credit may be granted at the discretion of Auctioneer. Additionally Bidders who have not previously established credit or who wish to bid in excess of their established credit history may be required to provide their social security number or the last four digits thereof to us so a credit check may be performed prior to Auctioneer's acceptance of a bid.

**Bidding Options:**

8. Bids in Signature. Auctions or Grand Format Auctions may be placed as set forth in the printed catalog section entitled "Choose your bidding method." For auctions held solely on the Internet, see the alternatives on HA.com. Review at HA.com/common/howtobid.php.
9. Presentment of Bids: Non-Internet bids (including but not limited to podium, fax, phone and mail bids) are treated similar to floor bids in that they must be on-increment or at a half increment (called a cut bid). Any podium, fax, phone, or mail bids that do not conform to a full or half increment will be rounded up or down to the nearest full or half increment and this revised amount will be considered your high bid.
10. Auctioneer's Execution of Certain Bids. Auctioneer cannot be responsible for your errors in bidding, so carefully check that every bid is entered correctly. When identical mail or FAX bids are submitted, preference is given to the first received. To ensure the greatest accuracy, your written bids should be entered on the standard printed bid sheet and be received at Auctioneer's place of business at least two business days before the Auction start. Auctioneer is not responsible for executing mail bids or FAX bids received on or after the day the first lot is sold, nor Internet bids submitted after the published closing time; nor is Auctioneer responsible for proper execution of bids submitted by telephone, mail, FAX, e-mail, Internet, or in person once the Auction begins. Internet bids may not be withdrawn until your written request is received and acknowledged by Auctioneer (FAX: 214-4438425); such requests must state the reason, and may constitute grounds for withdrawal of bidding privileges. Lots won by mail Bidders will not be delivered at the Auction unless prearranged.
11. Caveat as to Bid Increments. Bid increments (over the current bid level) determine the lowest amount you may bid on a particular lot. Bids greater than one increment over the current bid can be any whole dollar amount. It is possible under several circumstances for winning bids to be between increments, sometimes only $1 above the previous increment. Please see: "How can I lose by less than an increment?" on our website. Bids will be accepted in whole dollar amounts only. No "buy" or "unlimited" bids will be accepted.

The following chart governs current bidding increments.

| Current Bid | Bid Increment |
|---|---|
| <$10 | $1 |
| $10 - $29 | $2 |
| $30 - $49 | $3 |
| $50 - $99 | $5 |
| $100 - $199 | $10 |
| $200 - $299 | $20 |
| $300 - $499 | $25 |
| $500 - $999 | $50 |
| $1,000 - $1,999 | $100 |
| $2,000 - $2,999 | $200 |
| $3,000 - $4,999 | $250 |
| $5,000 - $9,999 | $500 |
| $10,000 - $19,999 | $1,000 |
| $20,000 - $29,999 | $2,000 |
| $30,000 - $49,999 | $2,500 |
| $50,000 - $99,999 | $5,000 |
| $100,000 - $199,999 | $10,000 |
| $200,000 - $299,999 | $20,000 |

| $3,000,000 - $4,999,999 | $250,000 |
| $5,000,000 - $9,999,999 | $500,000 |
| >$10,000,000 | $1,000,000 |

12. If Auctioneer calls for a full increment, a bidder may request Auctioneer to accept a bid at half of the increment ("Cut Bid") only once per lot. After offering a Cut Bid, bidders may continue to participate only at full increments. Off-increment bids may be accepted by the Auctioneer at Signature® Auctions and Grand Format Auctions. If the Auctioneer solicits bids other than the expected increment, these bids will not be considered Cut Bids.

**Conducting the Auction:**

13. Notice of the consignor's liberty to place bids on his lots in the Auction is hereby made in accordance with Article 2 of the Texas Business and Commercial Code. A "Minimum Bid" is an amount below which the lot will not sell. THE CONSIGNOR OF PROPERTY MAY PLACE WRITTEN "Minimum Bids" ON HIS LOTS IN ADVANCE OF THE AUCTION; ON SUCH LOTS, IF THE HAMMER PRICE DOES NOT MEET THE "Minimum Bid", THE CONSIGNOR MAY PAY A REDUCED COMMISSION ON THOSE LOTS. "Minimum Bids" are generally posted online several days prior to the Auction closing. For any successful bid placed by a consignor on his Property on the Auction floor, or by any means during the live session, or after the "Minimum Bid" for an Auction have been posted, we will require the consignor to pay full Buyer's Premium and Seller's Commissions on such lot.
14. The highest qualified Bidder recognized by the Auctioneer shall be the buyer. In the event of any dispute between any Bidders at an Auction, Auctioneer may at his sole discretion reoffer the lot. Auctioneer's decision and declaration of the winning Bidder shall be final and binding upon all Bidders. Bids properly offered, whether by floor Bidder or other means of bidding, may on occasion be missed or go unrecognized; in such cases, the Auctioneer may declare the recognized bid accepted as the winning bid, regardless of whether a competing bid may have been higher.
15. Auctioneer reserves the right to refuse to honor any bid or to limit the amount of any bid, in its sole discretion. A bid is considered not made in "Good Faith" when made by an insolvent or irresponsible person, a person under the age of eighteen, or is not supported by satisfactory credit, collectibles references, or otherwise. Regardless of the disclosure of his identity, any bid by a consignor or his agent on a lot consigned by him is deemed to be made in "Good Faith." Any person apparently appearing on the OFAC list is not eligible to bid.
16. Nominal Bids. The Auctioneer in its sole discretion may reject nominal bids, small opening bids, or very nominal advances. If a lot bearing estimates fails to open for 40–60% of the low estimate, the Auctioneer may pass the item or may place a protective bid on behalf of the consignor.
17. Lots bearing bidding estimates shall open at Auctioneer's discretion (approximately 50% of the low estimate). In the event that no bid meets or exceeds that opening amount, the lot shall pass as unsold.
18. All items are to be purchased per lot as numerically indicated and no lots will be broken. Auctioneer reserves the right to withdraw, prior to the close, any lots from the Auction.
19. Auctioneer reserves the right to rescind the sale in the event of nonpayment, breach of a warranty, disputed ownership, auctioneer's clerical error or omission in exercising bids and reserves, or for any other reason and in Auctioneer's sole discretion. In cases of nonpayment, Auctioneer's election to void a sale does not relieve the Bidder from their obligation to pay Auctioneer its fees (seller's and buyer's premium) and any other damages or expenses pertaining to the lot.
20. Auctioneer occasionally experiences Internet and/or Server service outages, and Auctioneer periodically schedules system downtime for maintenance and other purposes, during which Bidders cannot participate or place bids. If such outages occur, we may at our discretion extend bidding for the Auction. Bidders unable to place their Bids through the Internet are directed to contact Client Services at 1-800-872-6467.
21. The Auctioneer or its affiliates may consign items to be sold in the Auction, and may bid on those lots or any other lots. Auctioneer or affiliates expressly reserve the right to modify any such bids at any time prior to the hammer based upon data made known to the Auctioneer or its affiliates. The Auctioneer may extend advances, guarantees, or loans to certain consignors, and may extend financing or other credits at varying rates to certain Bidders in the auction.
22. The Auctioneer has the right to sell certain unsold items after the close of the Auction. Such lots shall be considered sold during the Auction and all these Terms and Conditions shall apply to such sales including but not limited to the Buyer's Premium, return rights, and disclaimers.

**Payment:**

23. All sales are strictly for cash in United States dollars (including U.S. currency, bank wire, cashier checks, travelers checks, eChecks, and bank money orders, all subject to reporting requirements). All are subject to clearing and funds being received In Auctioneer's account before delivery of the purchases. Auctioneer reserves the right to determine if a check constitutes "good funds" when drawn on a U.S. bank for ten days, and thirty days when drawn on an international bank. Credit Card (Visa or Master Card only) and PayPal payments may be accepted up to $10,000 from non-dealers at the sole discretion of the Auctioneer, subject to the following limitations: a) sales are only to the cardholder, b) purchases are shipped to the cardholder's registered and verified address, c) Auctioneer may pre-approve the cardholder's credit line, d) a credit card transaction may not be used in conjunction with any other financing or extended terms offered by the Auctioneer, and must transact immediately upon invoice presentation, e) rights of return are governed by these Terms and Conditions, which supersede those conditions promulgated by the card issuer, f) floor Bidders must present their card.
24. Payment is due upon closing of the Auction session, or upon presentment of an invoice. Auctioneer reserves the right to void an invoice if payment in full is not received within 7 days after the close of the Auction. In cases of nonpayment, Auctioneer's election to void a sale does not relieve the Bidder from their obligation to pay Auctioneer its fees (seller's and buyer's premium) on the lot and any other damages pertaining to the lot.
25. Lots delivered in the States of Texas, California, or other states where the Auction may be held, are subject to all applicable state and local taxes, unless appropriate permits are on file with Auctioneer. Bidder agrees to pay Auctioneer the actual amount of tax due in the event that sales tax is not properly collected due to: 1) an expired, inaccurate, inappropriate tax certificate or declaration, 2) an incorrect interpretation of the applicable statute, 3) or any other reason. The appropriate form or certificate must be on file at and verified by Auctioneer five days prior to Auction or tax must be paid; only if such form or certificate is received by Auctioneer within 4 days after the Auction can a refund of tax paid be made. Lots from different Auctions may not be aggregated for sales tax purposes.
26. In the event that a Bidder's payment is dishonored upon presentment(s), Bidder shall pay the maximum statutory processing fee set by applicable state law. If you attempt to pay via eCheck and your financial institution denies this transfer from your bank account, or the payment cannot be completed using the selected funding source, you agree to complete payment using your credit card on file.
27. If any Auction invoice submitted by Auctioneer is not paid in full when due, the unpaid balance will bear interest at the highest rate permitted by law from the date of invoice until paid. If the Auctioneer refers any invoice to an attorney for collection, the buyer agrees to pay attorney's fees, court costs, and other collection costs incurred by Auctioneer. If Auctioneer assigns collection to its in-house legal staff, such attorney's time expended on the matter shall be compensated at a rate comparable to the hourly rate of independent attorneys.

28. In the event a successful Bidder fails to pay any amounts due, Auctioneer reserves the right to sell the lot(s) securing the invoice to any underbidders in the Auction that the lot(s) appeared, or at subsequent private or public sale, or relist the lot(s) in a future auction conducted by Auctioneer. A defaulting Bidder agrees to pay for the reasonable costs of resale (including a 10% seller's commission, if consigned to an auction conducted by Auctioneer). The defaulting Bidder is liable to pay any difference between his total original invoice for the lot(s), plus any applicable interest, and the net proceeds for the lot(s) if sold at private sale or the subsequent hammer price of the lot(s) less the 10% seller's commissions, if sold at an Auctioneer's auction
29. Auctioneer reserves the right to require payment in full in good funds before delivery of the merchandise.
30. Auctioneer shall have a lien against the merchandise purchased by the buyer to secure payment of the Auction invoice. Auctioneer is further granted a lien and the right to retain possession of any other property of the buyer then held by the Auctioneer or its affiliates to secure payment of any Auction invoice or any other amounts due the Auctioneer or affiliates from the buyer. With respect to these lien rights, Auctioneer shall have all the rights of a secured creditor under Article 9 of the Texas Uniform Commercial Code, including but not limited to the right of sale. In addition, with respect to payment of the Auction invoice(s), the buyer waives any and all rights of offset he might otherwise have against the Auctioneer and the consignor of the merchandise included on the invoice. If a Bidder owes Auctioneer or its affiliates on any account, Auctioneer and its affiliates shall have the right to offset such unpaid account by any credit balance due Bidder, and it may secure by possessory lien any unpaid amount by any of the Bidder's property in their possession.
31. Title shall not pass to the successful Bidder until all invoices are paid in full. It is the responsibility of the buyer to provide adequate insurance coverage for the items once they have been delivered to a common carrier or third-party shipper.

**Delivery; Shipping; and Handling Charges:**

32. Buyer is liable for shipping and handling. Please refer to Auctioneer's website www.HA.com/common/shipping.php for the latest charges or call Auctioneer. Auctioneer is unable to combine purchases from other auctions or affiliates into one package for shipping purposes. Lots won will be shipped in a commercially reasonable time after payment in good funds for the merchandise and the shipping fees is received or credit extended, except when third-party shipment occurs.
33. Successful international Bidders shall provide written shipping instructions, including specified customs declarations, to the Auctioneer for any lots to be delivered outside of the United States. NOTE: Declaration value shall be the item'(s) hammer price together with its buyer's premium and Auctioneer shall use the correct harmonized code for the lot. Domestic Buyers on lots designated for third-party shipment must designate the common carrier, accept risk of loss, and prepay shipping costs.
34. All shipping charges will be borne by the successful Bidder. Any risk of loss during shipment will be borne by the buyer following Auctioneer's delivery to the designated common carrier or third-party shipper, regardless of domestic or foreign shipment.
35. Due to the nature of some items sold, it shall be the responsibility for the successful bidder to arrange pick-up and shipping through third-parties; as to such items Auctioneer shall have no liability. Failure to pick-up or arrange shipping in a timely fashion (within ten days) shall subject Lots to storage and moving charges, including a $100 administration fee plus $10 daily storage for larger items and $5.00 daily for smaller items (storage fee per item) after 35 days. In the event the Lot is not removed within ninety days, the Lot may be offered for sale to recover any past due storage or moving fees, including a 10% Seller's Commission.
36. The laws of various countries regulate the import or export of certain plant and animal properties, including (but not limited to) items made of (or including) ivory, whalebone, turtleshell, coral, crocodile, or other wildlife. Transport of such lots may require special licenses for export, import, or both. Bidder is responsible for: 1) obtaining all information on such restricted items for both export and import; 2) obtaining all such licenses and/or permits. Delay or failure to obtain any such license or permit does not relieve the buyer of timely compliance with standard payment terms. For further information, please contact Bill Taylor at 800-872-6467 ext. 1280.
37. Any request for shipping verification for undelivered packages must be made within 30 days of shipment by Auctioneer.

**Cataloging, Warranties and Disclaimers:**

38. NO WARRANTY, WHETHER EXPRESSED OR IMPLIED, IS MADE WITH RESPECT TO ANY DESCRIPTION CONTAINED IN THIS AUCTION OR ANY SECOND OPINE. Any description of the items or second opine contained in this Auction is for the sole purpose of identifying the items for those Bidders who do not have the opportunity to view the lots prior to bidding, and no description of items has been made part of the basis of the bargain or has created any express warranty that the goods would conform to any description made by Auctioneer. Color variations can be expected in any electronic or printed imaging, and are not grounds for the return of any lot.
39. Auctioneer is selling only such right or title to the items being sold as Auctioneer may have by virtue of consignment agreements on the date of auction and disclaims any warranty of title to the Property. Auctioneer disclaims any warranty of merchantability or fitness for any particular purposes. All images, descriptions, sales data, and archival records are the exclusive property of Auctioneer, and may be used by Auctioneer for advertising, promotion, archival records, and any other uses deemed appropriate.
40. Translations of foreign language documents may be provided as a convenience to interested parties. Auctioneer makes no representation as to the accuracy of those translations and will not be held responsible for errors in bidding arising from inaccuracies in translation.
41. Auctioneer disclaims all liability for damages, consequential or otherwise, arising out of or in connection with the sale of any Property by Auctioneer to Bidder. No third party may rely on any benefit of these Terms and Conditions and any rights, if any, established hereunder are personal to the Bidder and may not be assigned. Any statement made by the Auctioneer is an opinion and does not constitute a warranty or representation. No employee of Auctioneer may alter these Terms and Conditions, and, unless signed by a principal of Auctioneer, any such alteration is null and void.
42. Auctioneer shall not be liable for breakage of glass or damage to frames (patent or latent); such defects, in any event, shall not be a basis for any claim for return or reduction in purchase price.

**Release:**

43. In consideration of participation in the Auction and the placing of a bid, Bidder expressly releases Auctioneer, its officers, directors and employees, its affiliates, and its outside experts that provide second opines, from any and all claims, cause of action, chose of action, whether at law or equity or any arbitration or mediation rights existing under the rules of any professional society or affiliation based upon the assigned description, or a derivative theory, breach of warranty express or implied, representation or other matter set forth within these Terms and Conditions of Auction or otherwise. In the event of a claim, Bidder agrees that such rights and privileges conferred therein are strictly construed as specifically declared herein; e.g., authenticity, typographical error, etc. and are the exclusive remedy. Bidder, by non-compliance to these express terms of a granted remedy, shall waive any claim against Auctioneer.
44. Notice: Some Property sold by Auctioneer are inherently dangerous e.g. firearms, cannons, and small items that may be swallowed or ingested or may have latent defects all of which may cause harm to a person. Purchaser accepts all risk of loss or damage from its purchase of these items and Auctioneer disclaims any liability whether under contract or tort for damages and losses, direct or inconsequential, and expressly disclaims any warranty as to safety or usage of any lot sold.

**Dispute Resolution and Arbitration Provision:**

45. By placing a bid or otherwise participating in the auction, Bidder accepts these Terms and Conditions of Auction, and specifically agrees to the alternative dispute resolution provided herein. Arbitration replaces the right to go to court, including the right to a jury trial.
46. Auctioneer in no event shall be responsible for consequential damages, incidental damages, compensatory damages, or any other damages arising or claimed to be arising from the auction of any lot. In the event that Auctioneer cannot deliver the lot or subsequently it is established that the lot lacks title, or other transfer or condition issue is claimed, In such cases the sole remedy shall be limited to rescission of sale and refund of the amount paid by Bidder; in no case shall Auctioneer's maximum liability exceed the high bid on that lot, which bid shall be deemed for all purposes the value of the lot. After one year has elapsed, Auctioneer's maximum liability shall be limited to any commissions and fees Auctioneer earned on that lot.
47. In the event of an attribution error, Auctioneer may at its sole discretion, correct the error on the Internet, or, if discovered at a later date, to refund the buyer's purchase price without further obligation.
48. Arbitration Clause: All controversies or claims under this Agreement or arising from or pertaining to: this Agreement or related documents, or to the Properties consigned hereunder, or the enforcement or interpretation hereof of this or any related agreements, or damage to Properties, payment, or any other matter, or because of an alleged breach, default or misrepresentation under the provisions hereof or otherwise, that cannot be settled amicably within one (1) month from the date of notification of either party to the other of such dispute or question, which notice shall specify the details of such dispute or question, shall be settled by final and binding arbitration by one arbitrator appointed by the American Arbitration Association ("AAA"). The arbitration shall be conducted in Dallas, Dallas County, Texas in accordance with the then existing Commercial Arbitration Rules of the AAA. The arbitration shall be brought within two (2) years of the alleged breach, default or misrepresentation or the claim is waived. The prevailing party (a party that is awarded substantial and material relief on its claim or defense) may be awarded its reasonable attorney's fees and costs. Judgment upon the award rendered by the arbitrator may be entered in any court having jurisdiction thereof; provided, however, that the law applicable to any controversy shall be the law of the State of Texas, regardless of its or any other jurisdiction's choice of law principles and under the provisions of the Federal Arbitration Act.
49. No claims of any kind can be considered after the settlements have been made with the consignors. Any dispute after the settlement date is strictly between the Bidder and consignor without involvement or responsibility of the Auctioneer.
50. In consideration of their participation in or application for the Auction, a person or entity (whether the successful Bidder, a Bidder, a purchaser and/or other Auction participant or registrant) agrees that all disputes in any way relating to, arising under, connected with, or incidental to these Terms and Conditions and purchases, or default in payment thereof, shall be arbitrated pursuant to the arbitration provision. In the event that any matter including actions to compel arbitration, construe the agreement, actions in aid or arbitration or otherwise needs to be litigated, such litigation shall be exclusively in the Courts of the State of Texas, in Dallas County, Texas, and if necessary the corresponding appellate courts. For such actions, the successful Bidder, purchaser, or Auction participant also expressly submits himself to the personal jurisdiction of the State of Texas.
51. These Terms & Conditions provide specific remedies for occurrences in the auction and delivery process. Where such remedies are afforded, they shall be interpreted strictly. Bidder agrees that any claim shall utilize such remedies; Bidder making a claim in excess of those remedies provided in these Terms and Conditions agrees that in no case whatsoever shall Auctioneer's maximum liability exceed the high bid on that lot, which bid shall be deemed for all purposes the value of the lot.

**Miscellaneous:**

52. Agreements between Bidders and consignors to effectuate a non-sale of an item at Auction, inhibit bidding on a consigned item to enter into a private sale agreement for said item, or to utilize the Auctioneer's Auction to obtain sales for non-selling consigned items subsequent to the Auction, are strictly prohibited. If a subsequent sale of a previously consigned item occurs in violation of this provision, Auctioneer reserves the right to charge Bidder the applicable Buyer's Premium and consignor a Seller's Commission as determined for each auction venue and by the terms of the seller's agreement.
53. Acceptance of these Terms and Conditions qualifies Bidder as a client who has consented to be contacted by Heritage in the future. In conformity with "do-not-call" regulations promulgated by the Federal or State regulatory agencies, participation by the Bidder is affirmative consent to being contacted at the phone number shown in his application and this consent shall remain in effect until it is revoked in writing. Heritage may from time to time contact Bidder concerning sale, purchase, and auction opportunities available through Heritage and its affiliates and subsidiaries.
54. Rules of Construction: Auctioneer presents properties in a number of collectible fields, and as such, specific venues have promulgated supplemental Terms and Conditions. Nothing herein shall be construed to waive the general Terms and Conditions of Auction by these additional rules and shall be construed to give force and effect to the rules in their entirety.

**State Notices:**

Notice as to an Auction in California. Auctioneer has in compliance with Title 2.95 of the California Civil Code as amended October 11, 1993 Sec. 1812.600, posted with the California Secretary of State its bonds for it and its employees, and the auction is being conducted in compliance with Sec. 2338 of the Commercial Code and Sec. 535 of the Penal Code.

Notice as to an Auction in New York City. These Terms and Conditions are designed to conform to the applicable sections of the New York City Department of Consumer Affairs Rules and Regulations as Amended. This is a Public Auction Sale conducted by Auctioneer. The New York City licensed Auctioneers are Kathleen Guzman, No.0762165, and Samuel W. Foose, No.0952360, who will conduct the Auction on behalf of Heritage Auctions, Inc. ("Auctioneer"). All lots are subject to: the consignor's right to bid thereon in accord with these Terms and Conditions of Auction, consignor's option to receive advances on their consignments, and Auctioneer, in its sole discretion, may offer limited extended financing to registered bidders, in accord with Auctioneer's internal credit standards. A registered bidder may inquire whether a lot is subject to an advance or reserve. Auctioneer has made advances to various consignors in this sale.

Notice as to an Auction in Texas. In compliance with TDLR rule 67.100(c)(1), notice is hereby provided that this auction is covered by a Recovery Fund administered by the Texas Department of Licensing and Regulation, P.O. Box 12157, Austin, Texas 78711 (512) 463-6599. Any complaints may be directed to the same address.

## Additional Terms & Conditions: COINS & CURRENCY

COINS and CURRENCY TERM A: Signature. Auctions are not on approval. No certified material may be returned because of possible differences of opinion with respect to the grade offered by any third-party organization, dealer, or service. No guarantee of grade is offered for uncertified Property sold and subsequently submitted to a third-party grading service. There are absolutely no exceptions to this policy. Under extremely limited circumstances, (e.g. gross cataloging error) a purchaser, who did not bid from the floor, may request Auctioneer to evaluate voiding a sale: such request must be made in writing detailing the alleged gross error; submission of the lot to the Auctioneer must be pre-approved by the Auctioneer; and bidder must notify Ron Brackemyre (1-800-8726467 Ext. 1312) in writing of such request within three (3) days of the non-floor bidder's receipt of the lot. Any lot that is to be evaluated must be in our offices within 30 days after Auction. Grading or method of manufacture do not qualify for this evaluation process nor do such complaints constitute a basis to challenge the authenticity of a lot. AFTER THAT 30-DAY PERIOD, NO LOTS MAY BE RETURNED FOR REASONS OTHER THAN AUTHENTICITY. Lots returned must be housed intact in their original holder. No lots purchased by floor Bidders may be returned (including those Bidders acting as agents for others) except for authenticity. Late remittance for purchases may be considered just cause to revoke all return privileges.

COINS and CURRENCY TERM B: Auctions conducted solely on the Internet THREE (3) DAY RETURN POLICY: Certified Coin and Uncertified and Certified Currency lots paid for within seven days of the Auction closing are sold with a three (3) day return privilege. You may return lots under the following conditions: Within three days of receipt of the lot, you must first notify Auctioneer by contacting Client Service by phone (1-800-872-6467) or e-mail (Bid@HA.com), and immediately ship the lot(s) fully insured to the attention of Returns, Heritage, 3500 Maple Avenue, 17th Floor, Dallas TX 75219-3941. Lots must be housed intact in their original holder and condition. You are responsible for the insured, safe delivery of any lots. A non-negotiable return fee of 5% of the purchase price ($10 per lot minimum) will be deducted from the refund for each returned lot or billed directly. Postage and handling fees are not refunded. After the three-day period (from receipt), no items may be returned for any reason. Late remittance for purchases revokes these Return privileges.

COINS and CURRENCY TERM C: Bidders who have inspected the lots prior to any Auction, or attended the Auction, or bid through an Agent, will not be granted any return privileges, except for reasons of authenticity.

COINS and CURRENCY TERM D: Coins sold referencing a third-party grading service are sold "as is" without any express or implied warranty, except for a guarantee by Auctioneer that they are genuine. Certain warranties may be available from the grading services and the Bidder is referred to them for further details: Numismatic Guaranty Corporation (NGC), P.O. Box 4776, Sarasota, FL 34230; Professional Coin Grading Service (PCGS), PO Box 9458, Newport Beach, CA 92658; ANACS, 6555 S. Kenton St. Ste. 303, Englewood, CO 80111; and Independent Coin Grading Co. (ICG), 7901 East Belleview Ave., Suite 50, Englewood, CO 80111.

COINS and CURRENCY TERM E: Notes sold referencing a third-party grading service are sold "as is" without any express or implied warranty, except for guarantee by Auctioneer that they are genuine. Grading, condition or other attributes of any lot may have a material effect on its value, and the opinion of others, including third-party grading services such as PCGS Currency, PMG, and CGA may differ with that of Auctioneer. Auctioneer shall not be bound by any prior or subsequent opinion, determination, or certification by any grading service. Bidder specifically waives any claim to right of return of any item because of the opinion, determination, or certification, or lack thereof, by any grading service. Certain warranties may be available from the grading services and the Bidder is referred to them for further details: Paper Money Guaranty (PMG), PO Box 4711, Sarasota FL 34230; PCGS Currency, PO Box 9458, Newport Beach, CA 92658; Currency Grading & Authentication (CGA), PO Box 418, Three Bridges, NJ 08887. Third party graded notes are not returnable for any reason whatsoever.

COINS and CURRENCY TERM F: Since we cannot examine encapsulated coins or notes, they are sold "as is" without our grading opinion, and may not be returned for any reason. Auctioneer shall not be liable for any patent or latent defect or controversy pertaining to or arising from any encapsulated collectible. In any such instance, purchaser's remedy, if any, shall be solely against the service certifying the collectible.

COINS and CURRENCY TERM G: Due to changing grading standards over time, differing interpretations, and to possible mishandling of items by subsequent owners, Auctioneer reserves the right to grade items differently than shown on certificates from any grading service that accompany the items. Auctioneer also reserves the right to grade items differently than the grades shown in the prior catalog should such items be reconsigned to any future auction.

COINS and CURRENCY TERM H: Although consensus grading is employed by most grading services, it should be noted as aforesaid that grading is not an exact science. In fact, it is entirely possible that if a lot is broken out of a plastic holder and resubmitted to another grading service or even to the same service, the lot could come back with a different grade assigned.

COINS and CURRENCY TERM I: Certification does not guarantee protection against the normal risks associated with potentially volatile markets. The degree of liquidity for certified coins and collectibles will vary according to general market conditions and the particular lot involved. For some lots there may be no active market at all at certain points in time.

COINS and CURRENCY TERM J: All non-certified coins and currency are guaranteed genuine, but are not guaranteed as to grade, since grading is a matter of opinion, an art and not a science, and therefore the opinion rendered by the Auctioneer or any third party grading service may not agree with the opinion of others (including trained experts), and the same expert may not grade the same item with the same grade at two different times. Auctioneer has graded the non-certified numismatic items, in the Auctioneer's opinion, to their current interpretation of the American Numismatic Association's standards as of the date the catalog was prepared. There is no guarantee or warranty implied or expressed that the grading standards utilized by the Auctioneer will meet the standards of any grading service at any time in the future.

COINS and CURRENCY TERM K: Storage of purchased coins and currency: Purchasers are advised that certain types of plastic may react with a coin's metal or transfer plasticizer to notes and may cause damage. Caution should be used to avoid storage in materials that are not inert.

COINS and CURRENCY TERM L: Storage of purchased coins and currency: Purchasers are advised that certain types of plastic may react with a coin's metal or transfer plasticizer to notes and may cause damage. Caution should be used to avoid storage in materials that are not inert.

COINS and CURRENCY TERM M: NOTE: Purchasers of rare coins or currency through Heritage have available the option of arbitration by the Professional Numismatists Guild (PNG); if an election is not made within ten (10) days of an unresolved dispute, Auctioneer may elect either PNG or A.A.A. Arbitration.

COINS and CURRENCY TERM N: For more information regarding Canadian lots attributed to the Charlton reference guides, please contact: Charlton International, PO Box 820, Station Willowdale B, North York, Ontario M2K 2R1 Canada.

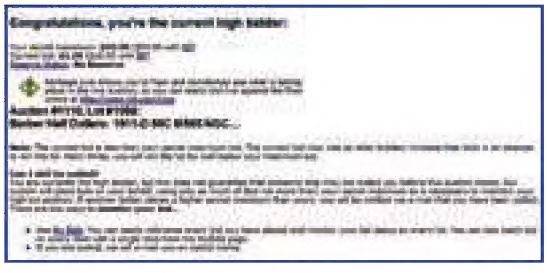
# Your five most effective bidding techniques:

## 1 Interactive Internet™ Proxy Bidding

### (leave your maximum Bid at HA.com before the auction starts)

**Heritage's exclusive Interactive Internet™ system is fun and easy! Before you start, you must register online at HA.com and obtain your Username and Password.**

1. Login to the HA.com website, using your Username and Password.
2. Chose the specialty you're interested in at the top of the homepage (i.e. coins, currency, comics, movie posters, fine art, etc.).
3. Search or browse for the lots that interest you. Every auction has search features and a 'drop-down' menu list.
4. Select a lot by clicking on the link or the photo icon. Read the description, and view the full-color photography. Note that clicking on the image will enlarge the photo with amazing detail.
5. View the current opening bid. Below the lot description, note the historic pricing information to help you establish price levels. Clicking on a link will take you directly to our Permanent Auction Archives for more information and images.
6. If the current price is within your range, Bid! At the top of the lot page is a box containing the Current Bid and an entry box for your "Secret Maximum Bid" – the maximum amount you are willing to pay for the item before the Buyer's Premium is added. Click the button marked "Place Bid" (if you are not logged in, a login box will open first so you can enter your username (or e-mail address) and password.
7. After you are satisfied that all the information is correct, confirm your "Secret Maximum Bid" by clicking on the "Confirm Absentee Bid" button. You will receive immediate notification letting you know if you are now the top bidder, or if another bidder had previously bid higher than your amount. If you bid your maximum amount and someone has already bid higher, you will immediately know so you can concentrate on other lots.
8. Before the auction, if another bidder surpasses your "Secret Maximum Bid", you will be notified automatically by e-mail containing a link to review the lot and possibly bid higher.
9. Interactive Internet™ bidding closes at 10 P.M. Central Time the night before the session is offered in a floor event. Interactive Internet™ bidding closes two hours before live sessions where there is no floor bidding.
10. The Interactive Internet™ system generally opens the lot at the next increment above the second highest bid. As the high bidder, your "Secret Maximum Bid" will compete for you during the floor auction. Of course, it is possible in a Signature® or Grand Format live auction that you may be outbid on the floor or by a Heritage Live bidder after Internet bidding closes. Bid early, as the earliest bird wins in the event of a tie bid. For more information about bidding and bid increments, please see the section labeled "Bidding Increments" elsewhere in this catalog.
11. After the auction, you will be notified of your success. It's that easy!



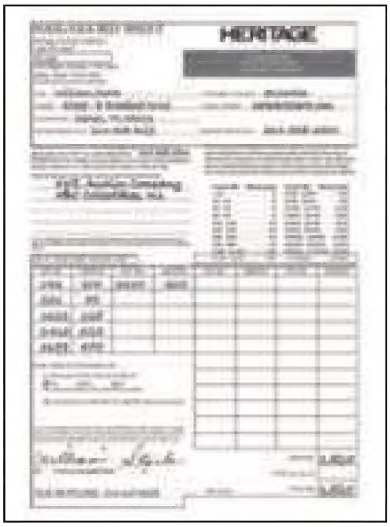
6-30-08

## 2 HERITAGE Live!™ Bidding
**(participate in the Live auction via the Internet)**

1. Look on each auction's homepage to verify whether that auction is "HA.com/Live Enabled." All Signature® and Grand Format auctions use the HERITAGE Live!™ system, and many feature live audio and/or video. Determine your lots of interest and maximum bids.
2. Note on the auction's homepage the session dates and times (and especially time zones!) so you can plan your participation. You actually have two methods of using HERITAGE Live!™: a) you can leave a proxy bid through this system, much like the Interactive Internet™ (we recommend you do this before the session starts), or b) you can sit in front of your computer much as the audience is sitting in the auction room during the actual auction.
3. Login at HA.com/Live.
4. Until you become experienced (and this happens quickly!) you will want to login well before your lot comes up so you can watch the activity on other lots. It is as intuitive as participating in a live auction.
5. When your lot hits the auction block, you can continue to bid live against the floor and other live bidders by simply clicking the "Bid" button; the amount you are bidding is clearly displayed on the console.

## 3 Mail Bidding
**(deposit your maximum Bid with the U.S.P.S. well before the auction starts)**

**Mail bidding at auction is fun and easy, but by eliminating the interactivity of our online systems, some of your bids may be outbid before you lick the stamp, and you will have no idea of your overall chances until the auction is over!**



1. Look through the printed catalog, and determine your lots of interest.
2. Research their market value by checking price lists and other price guidelines.
3. Fill out your bid sheet, entering your maximum bid on each lot. Bid using whole dollar amounts only. Verify your bids, because you are responsible for any errors you make! Please consult the Bidding Increments chart in the Terms & Conditions.
4. Please fill out your bid sheet completely! We also need: a) Your name and complete address for mailing invoices and lots; b) Your telephone number if any problems or changes arise; c) Your references; if you have not established credit with Heritage, you must send a 25% deposit, or list dealers with whom you have credit established; d) Total your bid sheet; add up all bids and list that total in the box; e) Sign your bid sheet, thereby agreeing to abide by the Terms & Conditions of Auction printed in the catalog.
5. Mail early, because preference is given to the first bid received in case of a tie.
6. When bidding by mail, you frequently purchase items at less than your maximum bid. Bidding generally opens at the next published increment above the second highest mail or Internet bid previously received; if additional floor, phone, or HERITAGE Live!™ bids are made, we act as your agent, bidding in increments over any additional bid until you win the lot or are outbid. For example, if you submitted a bid of $750, and the second highest bid was $375, bidding would start at $400; if no other bids were placed, you would purchase the lot for $400.
7. You can also Fax your Bid Sheet if time is short. Use our exclusive Fax Hotline: 214-443-8425.

## 4 Telephone Bidding (when you are traveling, or do not have access to HERITAGE Live!™)

1. To participate in an auction by telephone, you must make preliminary arrangements with Client Services (Toll Free 866-835-3243) at least three days before the auction.
2. We strongly recommend that you place preliminary bids by mail or Internet if you intend to participate by telephone. On many occasions, this dual approach has reduced disappointments due to telephone (cell) problems, unexpected travel, late night sessions, and time zone differences. Keep a list of your preliminary bids, and we will help you avoid bidding against yourself.

## 5 Attend in Person (whenever possible)

Auctions are fun, and we encourage you to attend as many as possible – although our HERITAGE Live!™ system brings all of the action right to your computer screen. Auction dates and session times are printed on the title page of each catalog, and appear on the homepage of each auction at HA.com. Join us if you can!

We're collectors too, and we understand that on occasion there is more to buy than there is cash. Consider Heritage's Extended Payment Plan [EPP] for your purchases totaling $2,500 or more.

**Extended Payment Plan [EPP] Conditions**

- Minimum invoice total is $2,500.
- Minimum Down Payment is 25% of the total invoice.
- A signed and returned EPP Agreement is required.
- The EPP is subject to a 3% *fully refundable* Set-up Fee (based on the total invoice amount) payable as part of the first monthly payment.
- The 3% Set-up Fee is refundable provided all monthly payments are made by eCheck, bank draft, personal check drawn on good funds, or cash; and if all such payments are made according to the EPP schedule.
- Monthly payments can be automatically processed with an eCheck, Visa, or MasterCard.
- You may take up to four equal monthly payments to pay the balance.
- Interest is calculated at only 1% per month on the unpaid balance.
- Your EPP must be kept current or additional interest may apply.
- There is no penalty for paying off early.
- Shipment will be made when final payment is received.
- All traditional auction and sales policies still apply.

**There is no return privilege once you have confirmed your sale, and penalties can be incurred on cancelled invoices. To avoid additional fees, you must make your down payment within 14 days of the auction. All material purchased under the EPP will be physically secured by Heritage until paid in full.**

To exercise the EPP option, please notify **Eric Thomas** at **214.409.1241** or email at **EricT@HA.com** upon receipt of your invoice.

We appreciate your business and wish you good luck with your bidding.

Dear Platinum Night Bidder,

This is another thrilling Platinum Night Auction that is so incredible, with so many wonderful rarities that we had to hold it over two nights! The dual catalogs showcase the finest numismatic items available at Heritage's Official Auction of FUN 2009. Our Platinum Nights have a global reputation for presenting the finest coins that Heritage Auction Galleries offers. FUN 2009 contains treasures from more than 700 consignors, and it is during these sessions that our bidders will determine if another world record for the world's most valuable numismatic auction will be established. Heritage set that record at FUN 2005 ($62 million), then set a new record at FUN 2007 ($78 million+). We thank the community for your continued support, regardless of the final accounting!

While Platinum Night contains the 'best-of-the-best' gleaned from all of our FUN consignors, many of these rarities were contributed by our anchor consignors:

• The Peter J. Adasek, M.D. Collection • The Arno Collection • The Calvin Collection • The Deb-Ann Collection • The Martin L. Diffenbaucher, Jr. Collection • The Findley Collection • The Dale Friend #2 PCGS Registry Set of Barber Half Dollars • The Good Morgan Sunshine #3 PCGS Registry Set of Proof Morgan Dollars • The Commander David R. Hinkle Collection, Part Three • The Jack Lee Estate Collection • The Lemus Collection – Queller Family Collection Part Two • The Malibu Collection, Part Two • The James Mossman Collection • The Omaha Collection • The Jim O'Neal Collection of Saint-Gaudens $10 Indians • The Plymouth Collection • The Scott Rudolph Collection • The San Jose Collection of Colonial Coinage • The Sanderson Family Collection of Morgan Dollars •

I invite you to read more about them in the main Signature® catalog.

Every Platinum Night is special, which means that FUN 2009 will be twice as special! These wonderful numismatic treasures are a thrill to inspect and then to own after spirited competition! Heritage started the Platinum Night concept at FUN in 2004, and they have earned their legendary reputation – but we never forget that it is the collector who has made these auctions such a delight.

If you want to stretch your budget to buy a special coin, consider our Extended Payment Plan – the details can be found online at HA.com, e-mail EPP@HA.com, or contact Eric Thomas at 214.409.1241.

If you are attending FUN in person, please stop by our booth and introduce yourself. If you cannot join us in person, please consider the HERITAGE Live! bidding system at HA.com – this technology allows you to easily bid through the Internet at the live session, so you can directly participate in all of the excitement of the auction floor action. Good luck with your bidding!

Sincerely,

Greg Rohan
President

## COLONIALS

### Impressive MS62 Large 2, Noe-34 1662 Oak Tree Twopence

**3532** **1662 Oak Tree Twopence MS62 NGC.** Large 2. Crosby 1-A1, Noe-34, R.5. 10.9 gn. The lengthy horizontal die crack left of the 1 in the date distinguishes Noe-34 from Noe-32 and Noe-33. All three varieties were struck from the same die pair. A well centered example with undisturbed gunmetal-gray surfaces. The tree is intricately brought up, and all letters are crisp and complete. Mildly wavy, as made. A desirable example of the smallest Massachusetts silver denomination, which carries a date ten years later than the threepence, sixpence, and shilling introduced in 1652. Listed on page 36 of the 2009 *Guide Book*. As of (11/08), NGC has certified five Large 2 Oak Tree twopence, three in XF40, the present piece, and a single MS63 (11/08). (#17)

### Elegant Noe-30 1662 Oak Tree Twopence MS62, Ex: Ford

**3533** **1662 Oak Tree Twopence MS62 PCGS.** Noe-30, R.4. 11.1 grains. An elegant survivor that combines golden-tan, silver-blue, and violet shadings in its rich and delightful patina. Considerable, pleasing luster shines through on each side. The design is properly centered on the obverse with all details visible and the center sharp, while the reverse is slightly misaligned with an unstruck crescent at the lower part and the tops of the letters NGL in ENGLAND off the flan. Noteworthy visual appeal and excellent surface quality.
*Ex: F.C.C. Boyd; The John J. Ford, Jr. Collection of Massachusetts Silver (Stack's, 10/05), lot 66.* (#17)

## Very Rare Late Die State
## Noe-8 Oak Tree Shilling XF45

**3534** **1652 Oak Tree Shilling XF45 NGC.** Crosby 5-A, Noe-8, High R.6. IN at Bottom. 71.0 gn. An important example of this rare Oak Tree variety. A late die state (not seen in the Hain Family Collection) with a prominent break on the obverse near the peak of the tree, and the reverse die is failing near the L in ENGLAND. Mint luster nonetheless shimmers throughout, and the apple-green and tan-gold surfaces are unblemished. Described for its ANR auction appearance as "graded Uncirculated in the Stearns sale, the cataloguer completely agrees with that assessment. ... A really remarkable example, far finer than the Ford coin which realized $18,000." Somewhat wavy, as usual and as made. Listed on page 37 of the 2009 *Guide Book*.
*Ex: C.H. Stearns Collection (Mayflower, 12/1966), lot 34; Glode M. Requa Collection (American Numismatic Rarities, 9/2006), lot 3.*
*From The Deb-Ann Collection.* (#20)

## Lovely AU Oak Tree Shilling
## Noe-13.6, Ex: Richard Picker Collection

**3535** **1652 Oak Tree Shilling AU50 NGC.** Noe 13.6, R.6. 69.8 gn. IN at bottom. The dies are similar to the well known Spiny Tree variety (Noe-14), but the die break between the lower right branch and the second T in MASATHVSETS has yet to be removed by an assiduous Boston Mint employee. The diagonal die line through the upper tree branches (as seen here) was also removed from the die before Noe-14 was coined. This shimmering and well defined Oak Tree shilling is toned olive-green and walnut-brown. Unabraded and attractive with full legends save for minor mint clips on the lower obverse. Listed on page 37 of the 2009 *Guide Book*.
*Ex: Richard Picker Collection (Stack's, 10/1984), lot 11; Americana Sale (Stack's, 1/2007), lot 6348.*
*From The Deb-Ann Collection.* (#20)

## Attractive Choice AU Noe-9
## 1652 Oak Tree Shilling

**3536** **1652 Oak Tree Shilling AU55 NGC.** IN at Bottom. Crosby 4-C, Noe-9, R.5. 71.0 gn. Sea-green and rose-red toning visits this partly lustrous scarce variety Oak Tree shilling. The tree is magnificently detailed and has no striking inconsistency. The peripheral legends are complete aside from the tops of the NG in ENGLAND. Somewhat softly brought up at 6 o'clock on each side, and the reverse has a small depression on the rim near the DO in DOM. Moderately wavy, as produced, and the reverse is misaligned a few degrees toward 12 o'clock. Listed on page 37 of the 2009 *Guide Book*. Census: 5 in 55, 11 finer (11/08).
*From The Martin L. Diffenbaucher, Jr. Collection.* (#20)

## Choice AU Large Planchet
## Noe-2 Straight Tree Shilling

**3537** **1652 Pine Tree Shilling, Large Planchet AU55 NGC.** Crosby 4-F, Noe-2, R.5. No pellets at trunk. 71.4 gn. The popular Straight Tree variety, A lustrous and beautiful chocolate-brown and sea-green Choice AU shilling. A straight mint clip at 4 o'clock takes the coin slightly out of round, but most peripheral letters are fully present. Patience and a strong loupe locates faint marks on the field near the tree and a concealed mark on one of the branches, but these have little effect on the blatant eye appeal. The S-wave shape is characteristic of rocker press production. Listed on page 37 of the 2009 *Guide Book*. Census: 6 in 55, 20 finer (11/08).
*Ex: Stack's, 9/2006, lot 73.*
*From The Deb-Ann Collection.* (#23)

## No H Large Planchet Noe-11
## Near-Mint 1652 Pine Tree Shilling

**3538** **1652 Pine Tree Shilling, Large Planchet AU58 NGC.** Crosby 2a-A1, Noe-11, R.4. All N's retrograde, No H in MASATVSETS. 69.8 gn. A high grade example that has noticeable mint luster and original, slightly wavy surfaces. Toned forest-green and lilac-gray. A few trivial marks near the denomination, but exemplary overall, with the obverse nearly devoid of contact. The tree is well brought up, and all peripheral letters are complete aside from peak of the M in MASATVSETS. Listed on page 37 of the 2009 *Guide Book*. As of (11/08), the single finest of three examples certified by NGC as the No H variety. (#23)

## Important MS62 Noe-8.2
## Large Planchet Pine Tree Shilling

**3539** **1652 Pine Tree Shilling, Large Planchet MS62 NGC.** No Pellets at Trunk. Crosby 1b-D, Noe-8.2, R.6. 72.24 gn. The 'Monogram NE' variety, which fuses the right upright of the N in NEW with the upright of the E. A fully lustrous example with splendid detail, especially on the tree. All peripheral legends are intact aside from the tops of the HVS in MASATHVSETS, absent due to a straight mint-made clip. Another mint clip near 3 o'clock removes a few beads but does not affect any letters. Practically all Massachusetts silver coinage has mint clips, in order to bring the weight of the piece within standards. A wave across the tree to 4:30 and a second wave on the reverse near 6 o'clock are also as made, due to its rocker press emission. The unblemished surfaces are originally toned in apple-green, lilac, and tan-gold. Listed on page 37 of the 2009 *Guide Book*. No Pellets NGC Census: 6 in 62, 6 finer (11/08). (#23)

## Very Rare Lord Baltimore Groat VF30

**3540** **(1659) Lord Baltimore Fourpence VF30 NGC.** Crosby, Pl. III, 3. Breen-74. The "Large bust and shield" variety, perhaps better described as the off-center bust, since it is placed too low in the field and closely approaches the exergue legends. Rarer than the sixpence, the fourpence or groat has only two die varieties. Just two examples of Breen-75 are known, which focuses demand on Breen-74. The present piece has complete, bold legends and deep lavender and steel-blue toning. The lower left obverse field has parallel marks, but the surfaces are otherwise smooth. The late die state with a prominent break between the V in IV and the right shield border. Listed on page 38 of the 2009 *Guide Book*. Census: 1 in 30, 1 finer (11/08). (#32)

## Rare XF Lord Baltimore Sixpence Hodder 2-B, Small Head

**3541** **(1659) Lord Baltimore Sixpence XF40 NGC.** Small Head. Crosby Pl. III, 2, Breen-68, Hodder 2-B. Cream-gray legends and devices contrast with the deep gunmetal-gray fields. A well centered piece that is sharp aside from the right-side dentils. Cecil Calvert retains substantial hair detail. The insignia and the upper obverse field display unimportant marks. All Lord Baltimore coinage is very rare, especially when compared to the other contemporary American silver series from the Boston Mint. Listed on page 38 of the 2009 *Guide Book*. Census: 1 in 40, 3 finer (11/08). (#33)

## Uncirculated Diagonals Variety
## London Elephant Token
## Breen-185, Single Finest Certified

**3542 (1694) London Elephant Token, Diagonals MS61 Brown NGC.** Breen-185. Hodder 1-A. Any Mint State Elephant token is a significant piece, but this is the rare Diagonals variety. The diagonals are at the center of the reverse shield, and are absent on the usually seen Hodder 2-B. This well struck chocolate-brown piece lacks visible abrasions, and is also devoid of carbon. A strong loupe and patience reveals a couple of thin horizontal marks on the flank of the pachyderm. Luster shimmers across each side when the piece is rotated beneath a light.

Most survivors of this variety are softly defined at the centers due to a combination of strike and wear, and the all-important diagonals are faint. On the present piece, however, the diagonals are fully defined, and delicate die polish marks are visible within the shield near the diagonals.

Elephant tokens are important to an Early American Collection because of the very rare varieties that reference Carolina or New England within the reverse legends. The obverse of the Diagonals variety also struck the PROPRIETERS Carolina variety. The extremely rare New England variety shares an obverse die with the 'common' Hodder 2-B London variety.

As of (11/08), NGC and PCGS combined have certified only five examples of the Diagonals variety. The present piece is the single finest certified by either service, and is also the sole Diagonals token certified as Mint State. A search of our records indicates that just two other examples have appeared in a Heritage auction: a PCGS AU50 that brought $25,300 as lot 14 in our June 2006 Long Beach Signature, and an NGC XF40 that realized $7,475 in our September 2005 Long Beach Signature. Listed on page 44 of the 2009 *Guide Book*. *Ex: FUN Signature (Heritage, 1/2007), lot 722, which realized $69,000.* (#61)

## The Garrett-Ford 1722 Rosa Americana Penny GEORGIVS / VTILE DVLCI Finer of Two Known

**3543 1722 GEORGIVS PR65 Brown PCGS.** Ex: Garrett. Breen-111. **The Breen plate coin in his *Complete Encyclopedia*.** The rich brown color and considerable traces of original orange mint color clearly identify this piece as a copper impression (Breen-111) rather than bath metal (Breen-110). John Ford owned both of the known examples of this variety, the other one graded Very Fine from the F.C.C. Boyd Estate. When this piece was cataloged for the Garrett Collection, it was described as "apparently unique." A few years earlier, Walter Breen discussed the Boyd Estate coin in his *Proof Encyclopedia,* and stated that it was the only one known.

In the Stack's catalog of the Ford Collection (Part IX, May 2005), Michael Hodder wrote that "there is nary a mark on the coin and it must look much as it did the day it was struck." The fields are fully reflective with nicely detailed central devices, save for slight weakness at the very center on each side, from dies that were apparently spaced a bit too far apart. Some faint, rather fresh appearing pinscratches can be seen on the rose petal below ER of AMERICANA, from an attempt to remove a tiny spot, and clearly visible on the Ford catalog color plate. Otherwise, we concur that there is nary a mark on either side.

Struck on a wide 28.2 mm. planchet, the border beads on each side are fully and completely visible. Breen described this variety as a pattern, a term used in the Garrett catalog, although more recently Hodder has called it an off-metal strike. Regardless of what name it is given, this is the finer of just two known examples, and a must have piece for the advanced colonial specialist. (#108)

## Important 1723 Hibernia Farthing Pattern in Silver MS65, Nelson-7 One of the Finest Specimens Known

**3544** **1723 Hibernia Pattern Farthing, Silver MS65 PCGS.** Breen-173, Nelson-7, Martin 3.2-Bc.10, R.5. Struck in silver with a plain edge. An exceptional survivor of what was once a seemingly impossible issue to obtain, regardless of grade. Breen wrote in 1988 that a group of 20 silver farthing patterns were discovered in Europe in the early 1970s, although the Stack's cataloger of the Ford Part VII sale suggests that the total was actually 43 pieces. The best example sold in that same sale was described as "Gem Uncirculated" and crossed the auction block at $22,000 in January 2005. The current offering is one of only three Gem pieces certified by PCGS, with none grading finer (11/08). The other 17 examples in the *Population Report* are well distributed between the grades of VG and MS64.

Lovely rose and russet coloration throughout with occasional splashes of electric-blue toning make this a memorable piece. Adding to the eye appeal are lovely prooflike surfaces and bold details. Rare as a pattern and even more rare in terms of condition, this specimen is destined for the most sophisticated of early American cabinets. Listed on page 42 of the 2009 *Guide Book*. (#179)

## Exquisite SP66 Brown 1724 Hibernia Halfpenny Nelson-13, Ex: Ford

**3545** **1724 Hibernia Halfpenny SP66 Brown PCGS.** Nelson-13, unlisted in Breen. 123.7 grains. The cataloger for the Ford auction described this piece as a "Gem Brilliant Proof," and PCGS similarly acknowledges the coin's special nature. Certainly, the strike is distinctive and sharp, and the smooth, virtually flawless violet-brown and mahogany surfaces are indicative of unusual care. As written in the Ford catalog, "The piece, overall, is absolutely stunning and is without question **the finest known** [bold theirs]." The collector who takes this coin in-hand should have no reason to disagree.
*Ex: Henry Chapman, 1910; believed Newcomer-Green (per the Ford catalog); F.C.C. Boyd Estate; The John J. Ford, Jr. Collection Part VII (Stack's, 1/05), lot 92.* (#190)

## Rare SP65 1723 Hibernia Halfpenny

**3546 1723 Hibernia Specimen Halfpenny SP65 Brown PCGS.** No stop before H, stop after date, Narrow 3, 11 harpstrings, beaded cincture. Martin 4.40-Gc.18, R.2. An early die state without the obverse legend crumbling associated with obverse 4.40. Intricately detailed with rich crimson and burnt-gold coloration over smooth, glossy surfaces. The fields are decidedly prooflike. Rare as a specimen striking, with only a handful of auction appearances over the past decade. The Roper Collection specimen realized $3,630 in 1983. Listed on page 42 of the 2008 *Guide Book*. Population: 3 in SP65 Brown, 1 finer (11/08).
*Ex: FUN Signature (Heritage, 1/2007), lot 68, which realized $12,650. From The San Jose Collection of Colonial Coinage.* (#196)

## Very Rare PR66 Brown 1773 Virginia Penny, Newman 1-A Ex: Brand, Boyd, Ford Guide Book and Newman Plate Coin

**3547 1773 Virginia Penny PR66 Brown PCGS.** Ex: Ford. No Period, Six Harpstrings. Newman 1-A. 135.7 gn, per Ford catalog. The very rare proof pattern penny, identified by a wide beaded rim. The strike is needle-sharp, and the deep brown and steel-blue surfaces are gorgeously undisturbed by the passage of time. The 2009 *Guide Book* Plate Coin, page 43. Also photographed in Eric Newman's ANS-published 1956 attribution reference. PCGS has certified only seven pieces in all grades. Population: 2 in 66 Brown, 0 finer (12/08).
*Ex: Richard B. Winsor Collection (S.H. & H. Chapman, 12/1895), lot 68; John G. Mills Collection (S.H. & H. Chapman, 4/1904), lot 102; Virgil Brand Collection; F.C.C. Boyd Collection; John J. Ford, Jr. Collection, Part VII (Stack's, 1/2005), lot 45.* (#246)

## Historical 1776 Continental Dollar
## Newman 2-C, AU Details

**3548 1776 Continental Dollar, CURENCY, Pewter—Corroded—NCS. AU Details.** Crosby Pl. VIII, 16, Newman 2-C, Breen-1092, R.3. Evenly toned deep gunmetal-gray. A bold example of this famous early American type, which has designs attributed to Benjamin Franklin, later copied for the 1787 Fugio cent. The example offered here has a few verdigris spots on the obverse, mostly on the ON in CONTINENTAL and the second R in CURRENCY. On the reverse, a small area of metal loss is noted at the 1 o'clock rim, and the edge is filed between 2:30 and 3:30. A desirable souvenir of the American struggle for independence. The dies are rotated approximately 90 degrees. Listed on page 81 of the 2009 *Guide Book*. (#791)

## Lustrous 1776 Newman 1-C Continental Dollar, MS62

**3549 1776 Continental Dollar, CURENCY, Pewter MS62 NGC.** Newman 1-C, Hodder 1-A.3, Breen-1089, R.3. A late die state, this piece has the often seen internal cud over GI of FUGIO, with a break to the left, or downward, to the N and O of CONTINENTAL and on to the border, a break forming at the left base of N. Another break extends to the right, or upward, to NTA of the same word, forming a large cud at the base of NT. This piece is the same die state as the latest state Ford coin, lot 4 in Part One of that series, and the present coin is nicer in overall appearance. Ten different Continental dollars in the Ford sales represent one of the most significant offerings in recent memory. Even four pieces, as the present sale offers, is an extremely important opportunity for collectors.

In addition to information found in Breen's Complete Encyclopedia and in the first Ford catalog, the principal references about the Continental dollars are by Eric Newman ("The 1776 Continental Currency Coinage," *The Coin Collector's Journal,* July-August 1952, pp. 1-9) and Michael Hodder (The Continental Currency Coinage of 1776," *The American Numismatic Association Centennial Anthology,* Wolfeboro, NH: Bowers and Merena, 1991, pp. 7-18). Writing in the Ford catalog, Hodder references his own variety data, but assumes the reader knows where to find his article, providing no biographical details.

A magnificent Mint State piece, the present example has brilliant pewter-gray surfaces with frosty luster and wispy splashes of deeper gray toning on each side. Although a few trivial surface marks reside on each side, there are no significant blemishes. This highly desirable example is certainly to be enthusiastically contested when it crosses the auction block. Listed on page 81 of the 2009 *Guide Book*. (#791)

A 15% BUYER'S PREMIUM ($9 MIN.) APPLIES TO ALL LOTS.

## Lovely 1776 Newman 1-C Continental Dollar, MS63

**3550 1776 Continental Dollar, CURENCY, Pewter MS63 PCGS. CAC.** Newman 1-C, Breen-1089, R.3. Although there has been some debate about the actual denomination that was originally intended, the existence of a small number of pieces in silver seem to confirm that they are indeed dollar coins, rather than cents or any other denomination. Dave Bowers considers the pewter pieces to be a type of fiat (non-intrinsic) currency, much like the paper money of that era, and he believes that they probably did circulate in place of the dollar Continental notes. Few or no contemporary accounts of the Continental coinage have been located for additional clues.

One variety is known with EG FECIT on the obverse, and EG is thought to be a reference to Elisha Gallaudet. Eric Newman was the first to identify Gallaudet as the likely engraver in 1967, when he noted that a similar design on Continental Currency notes of February 17, 1776, that were engraved by Gallaudet.

The following commentary appears on the American History website of the Smithsonian Institution (americanhistory.si.edu): "Elisha Gallaudet, a New York engraver, was the person responsible for translating Franklin's concepts into metal. It is thought that he struck the coins at a makeshift private mint in Freehold, New Jersey. Earlier issues of Continental currency had included a bill worth a dollar. This practice was suspended in the spring of 1776, apparently because the Congress intended for a new, one-dollar coin to take its place." Others suggest that the first pieces were made in New York, with later examples coined in Philadelphia after the New York workshop was threatened by British takeover.

More about Gallaudet appeared in the *Catalogue of an Exhibition of Early American Engraving Upon Copper,* published in 1908 by the Grolier Club. "Born and died in New York State. He was born of Huguenot parents in New Rochelle, N.Y., and was in business as an engraver in New York in 1759. His chief work was book-plate engraving."

This intermediate die state has an internal die break joining the tops of GI in FUGIO. A few additional obverse die cracks are evident, but less advanced than those of the latest die state. An outstanding Mint State piece, this example has attractive slate-gray surfaces that retain substantial bright gray luster on both sides. The surfaces exhibit the usual quota of trivial surface marks that are so common to these old coins. Even the most careful handling over the last 233 years will fail to prevent a few blemishes. We have handled nearly two dozen Mint State Continental dollars over the past 15 years, suggesting that pieces are available on a frequent basis, yet examples with the excellent eye appeal of this piece seldom appear in the numismatic marketplace. Listed on page 81 of the 2009 *Guide Book.*

*From The James Mossman Collection.* (#791)

***See: Video Lot Description***

## Census Level 1787 Massachusetts Cent
## Ryder 6-G , MS65 Brown

**3551 1787 Massachusetts Cent, Arrows in Left Talon MS65 Brown PCGS.** Ryder 6-G, Low R.4. In the Ford catalog (Stack's, October 2004, Michael Hodder labeled this variety the "Stout Indian." Lot 104 in the Ford sale, graded Choice Uncirculated, was called "one of the finest seen of a variety whose Condition Census includes an About Uncirculated coin." The present example appears to be finer than the Ford specimen, and easily ranks near the top of the Condition Census.

PCGS has certified this Gem with the Brown designation, although a solid case can be made to describe it as Red and Brown, especially with the significant portions of original pale orange luster on the obverse, blended with rich medium olive toning. The reverse is mostly medium brown with traces of original mint color. (#302)

A 15% BUYER'S PREMIUM ($9 MIN.) APPLIES TO ALL LOTS.

## Formidable MS63 Brown Maris 20-N 1786 Wide Shield New Jersey Copper Ex: Ryder, Boyd, Ford

**3552 1786 New Jersey Copper, Wide Shield MS63 Brown NGC.** Maris 20-N, R.4. 171.7 gn. A remarkable medium brown New Jersey copper that shimmers with mint luster and retains delicate die polish lines throughout the reverse field. Crisply struck despite a failing obverse die near the end of the plow beam. A heavy crack travels through most of the date to the rim beneath the plow.

As on Maris 18-N and 19-M, the date is amateurishly engraved (as made), the 1 entered at an extreme angle to keep it from touching a dentil. The head of the horse was punched too high, and leans precariously to the left. On the reverse, E PLURIBUS is closely spaced, while UNUM is unduly wide. The reverse die was better made, however, since it lasted through pairings with the Maris 18, 20, and 21 obverses, while Maris 20-N marks the only appearance of the obverse die.

Although in well circulated grades the Maris 20-N is merely scarce within the New Jersey series, it would take a Herculean effort to secure a different Uncirculated example, provided such a coin even exists. Listed on page 66 of the 2009 *Guide Book*. As of (11/08), NGC has certified only a single example (the present coin) of the Wide Shield variety. PCGS has certified just one piece as Uncirculated, also as MS63 Brown. That New Jersey copper is a Maris 16-J and appeared in November 2006 Stack's auction, where it realized $36,800.

*Ex: John G. Mills Collection (S.H. & H. Chapman, 4/1904), lot 402; Hillyer Ryder Collection; F.C.C. Boyd Collection; John J. Ford, Jr. Collection, Part 1 (Stack's, 10/2003), lot 105.*

*From The Deb-Ann Collection.* (#498)

## Important MS63 Brown 1787 New Jersey Copper Outlined Shield, Maris 46-e

**3553 1787 New Jersey Copper, Outlined Shield MS63 Brown PCGS.** Maris-46e, R.1. Struck from an advanced state of the dies as evidenced by the lack of detail on the inner curve of the horse's neck and the pronounced bulging of the die in the date area (which still shows full digits). The center of the reverse is weak, from die damage rather than wear, as always seen on this variety. Remarkably well centered, this piece shows full sawtooth denticles on both sides and the brown patina is glossy with minor planchet porosity. Heavily die clashed with strong evidence of the outline of the shield in the right obverse field. A 1% curved clip at 5:30 is mint-made. One of the finest, if not *the* finest 46e extant. Listed on page 66 of the 2009 *Guide Book*.
*Ex: FUN Signature (Heritage, 1/2006), lot 3005; Troy Wiseman Collection, Part Two (Heritage, 1/2007), lot 737.* (#503)

## 1788 New Jersey Copper, Head Left Maris 50-f XF40 Conditional Rarity

**3554 1788 New Jersey Copper, Head Left XF40 PCGS.** Maris 50-f, R.2. Forget the rarity factor here. Although this is the most available by far of the three known Head Left varieties cataloged by Maris—with the N in NOVA CAESAREA closest to the beam of the plow—the average grade of certified survivors is only in the range of Fine to Very Fine at best. This is a conditionally much rarer piece, and in fact this is only the second time since we began maintaining our Permanent Auction Archives that we have offered an XF example of the Head Left variant.

This Extremely Fine specimen should make a pleasing acquisition for some fortunate bidder. The smooth, milk-chocolate fields are essentially free of contact, but the strike, as often seen, is off-center toward 8:30 on the obverse, with the dentilation bold opposite at 2:30 and correspondingly on the reverse. Some minor strike softness and a small planchet lamination also occur on the central reverse. Listed on page 67 of the 2009 *Guide Book*. (#527)

## Norweb's Silver New Haven Restrike
## 1787 Fugio Cent, MS63

**3555 1787 Fugio Cent, New Haven Restrike, Silver MS63 NGC.** Dies of Newman 104-FF, but struck in silver instead of the usual copper. Probably struck prior to the copper pieces, since there are no die cracks along the left obverse. Die rust is nonetheless present on the lower right reverse field, as is typical for this circa-1860 production. Well struck and unabraded with satin luster and deep golden-brown toning. Listed on page 84 of the 2009 *Guide Book*. The finest of three examples certified by NGC (11/08).

*Ex: Purchased by Emery May Holden Norweb from J.C. Morgenthau on 10/11/1935; Norweb Collection, Part III (Bowers and Merena, 11/1988), lot 3566.*

*From The Deb-Ann Collection.* (#915)

## Amazing 1783 Chalmers Threepence, MS63
## The Eliasberg Specimen
## Perhaps the Finest Known

**3556 1783 Chalmers Threepence MS63 PCGS.** Ex: Eliasberg. Breen-1018. The famous John Chalmers' threepence has clasped hands on the obverse, with the legend I CHALMERS ANNAP'S around. The reverse has a floral spray with a ring of three-leaf clusters and the legend 1783 THREE PENCE around.

John Chalmers, a Maryland silversmith, produced small silver threepence, sixpence, and shillings, clearly intended to serve the needs of his local economy in Annapolis at a time when the public was leery of accepting the Spanish cut coins otherwise known as bits. Chalmers threepence are rarer than the shillings, although not as rare as the sixpence. Most survivors are extensively worn, indicating that they saw extensive contemporary circulation.

In the Eliasberg catalog, Dave Bowers noted the writing of Dr. John David Schopf, who visited from Germany. Quoting Bowers: "It was customary at the time to cut a Spanish silver dollar into halves, quarters, and eighths, with the eighths being known as 'one bit' or 12-1/2 cents. Unscrupulous persons would attempt to cut five 'quarters' or nine or ten 'eighths' out of one coin, thereby realizing a proportional profit. Schopf reported that Chalmers redeemed various fractional parts and exchanged his own coins for them, charging a commission to do so."

The Eliasberg specimen is an outstanding Mint State piece, easily in the Condition Census for the denomination. It is arguably the finest known example, as none appeared in the Ford sales. The fields are fully lustrous beneath attractive lilac, blue, and gold toning. The quality is such that all of the intricate die work, including the engraving and fine die finishing lines are fully visible.

*Ex: Louis E. Eliasberg, Sr. (Bowers and Merena, 5/1996), lot 47.* (#592)

## 1783 Short Worm Chalmers Shilling Borderline Uncirculated, Among Finest Certified

**3557** **1783 Chalmers Shilling, Short Worm AU58 NGC.** Crosby Pl. IX, 5. Breen-1011. An impressive pearl-gray Borderline Uncirculated representative of this desirable Early American silver issue. A good strike with even definition save for blending on the obverse inner ring near 7 o'clock and on the reverse inner ring near 4 o'clock. The obverse has tiny edge flaws at 4 and 5 o'clock, as produced, but neither side exhibits any remotely consequential marks. Struck a couple of degrees off center toward 3 o'clock, affecting only the right-side dentils. Portions of ONE SHILLING are strike doubled, as made.

John Chalmers was an Annapolis, Maryland silversmith. In 1783, he decided to do something about the absence of silver coins in circulation, save for worn-out Spanish Colonial eight reales and their fractional counterparts. Chalmers struck several denominations, all of which are rare but collectible. The key Chalmers variety is the Rings shilling, of which only five are known. The Short and Long Worm varieties are comparatively available, with the Long Worm believed slightly rarer. The 'worm' referred to is the vertical element shared by the two birds, which Crosby believed to be a branch. Above the two birds is a hedge or fence, and above that is another worm or snake. The snake on the Short Worm shilling is longer than the snake on the Long Worm shilling. The best diagnostic for distinguishing between these two varieties is the placement of the hedge. If the hedge is between the N in ONE and the second I in SHILLING, it is a Long Worm shilling. The Short Worm shilling depicts the hedge between the N in ONE and the N in SHILLING. Regardless of esoterica involving the fence, hedge, worm, branch, or snake, any Worm shilling is highly desirable, particularly at the AU58 level. As of (11/08), PCGS has certified none above AU55, and NGC has certified only one finer, an MS63. Listed on page 49 of the 2009 *Guide Book*. (#596)

A 15% BUYER'S PREMIUM ($9 MIN.) APPLIES TO ALL LOTS.

# Extraordinary 1790 Standish Barry Threepence, AU55
# Third Finest Known
# Second Finest Collectible Specimen

**3558 1790 Standish Barry Threepence AU55 PCGS.** Crosby, pl. X, 23, Breen-1019, R.6. Located at 20 North Gay Street in Baltimore, Maryland, at least as early as 1796, Standish Barry (1763-1844) was a prominent Baltimore merchant, silversmith, and watchmaker. According to contemporary city directories, he remained at the same address until at least 1810. It is reasonable to speculate that he was at the same address in 1790, when as a young man of 27 years he produced the small silver threepence that bear his name. Alternatively, Walter Breen wrote in his *Complete Encyclopedia* that Barry was "a silversmith on Market St., Baltimore (1784-85), thereafter in partnership with Joseph Rice as Rice & Barry (1785-87), later alone on Baltimore St., and still later as a merchant on North Gay St., 1796-1808."

Standish Barry, believed to be the son of Lavallin Barry of Dublin, Ireland, was born in Baltimore on November 4, 1763, and spent his early years as an apprentice to David Evans, a watchmaker and silversmith, according to Michael Hodder in the May 2004 Ford catalog. He began his own business in 1784, and apparently prospered over many years. In addition to his business affairs, he also served in the military, rising to the rank of Lieutenant Colonel. According to Col. J. Thomas Scharf in *Chronicles of Baltimore* (Baltimore, 1874), Col. Standish Barry died on November 6, 1844, in his 81st year. There was apparently another Col. Standish Barry, perhaps the son of the silversmith, who served as Assistant United States Treasurer at Baltimore, and died October 20, 1866, at the age of 70, according to Scharf. The elder Barry was married to Nancy Thompson, on October 11, 1788, so the timing is proper for a son born in 1796.

The purpose of his small silver pieces is unknown. They are the only American Colonial coins that bear a specific date, rather than the conventional placement of the year on the coin. The pieces are dated July 4, 1790, perhaps as a tribute to American independence, or possibly for some unknown local celebration. They certainly served as advertising cards for his business, and may have supplemented local coinage in the Baltimore economy. Breen stated that they were most likely made for "the opening of his new store on Baltimore St." There were doubtless very few made, given the rarity today. There are probably less than 15 pieces still in existence today.

The actual coins were produced from planchets that were smaller than the dies created to strike them. As a result, legends are often or usually missing, since a properly centered strike was nearly impossible to obtain.

The obverse depicts a male head in profile view facing left, believed to represent George Washington, or according to some, Standish Barry himself. The profile is framed by an inner border, with BALTIMORE TOWN JULY 4 90 between the inner border and the outer border of dentils. The reverse has THREE PENCE on two lines inside an inner border, with STANDISH BARRY between the inner border and the outer border of dentils. Crossing beads separate each letter in the reverse legend. The reverse die was damaged early in the production run, likely accounting for the small production and current rarity of these pieces.

Just four submissions of the Standish Barry threepence have been certified at NGC and PCGS, representing three different pieces. PCGS has certified one VG, one XF45, and this AU55. NGC has certified a single AU55, the same coin.

The present Standish Barry threepence is a remarkable example with excellent luster and only a trace of rub on the highest points of the design. Slight weakness is evident below the bust tip, obliterating the Y in JULY and the second S in STANDISH. Both sides are toned deep gray-brown, with speckles of deeper olive-brown on each side. The surfaces have several tiny planchet flakes, but no other imperfections. A small planchet void is located at the weak area below Y and the opposing point on the reverse.

We have compiled a roster that actually shows what appear to be 17 distinct examples:

**1. Gem.** Maryland Historical Society.
**2. AU55.** Virgil Brand; Brand Estate; John J. Ford, Jr. (Stack's, 5/2004), lot 282. Graded Uncirculated in the Ford catalog.
**3. AU55. The present specimen.** This piece appears to be a new example in the roster, dissimilar to any others listed here.
**4. AU.** 1976 ANA (Stack's, 8/1976), lot 27.
**5. AU.** Louis E. Eliasberg, Sr. (Bowers and Merena, 5/1996), lot 92.
**6. XF45 PCGS.** New Netherlands (60th Sale), lot 433; John L. Roper, 2nd Collection (Stack's, 12/1983), lot 339; Colonial Williamsburg Foundation.
**7. Mossman Plate, page 200.** XF or thereabouts. This piece appears to be different from any of the following.
**8. XF.** Morris Collection; Col. James Ellsworth; John Work Garrett; Johns Hopkins University (Bowers and Ruddy, 10/1980), lot 1517. Plated in Breen's *Complete Encyclopedia*.
**9. VF30.** Dana Linett (3/1990), lot 2345; Kingswood Galleries (8/1990), lot 6155; 1996 ANA (Heritage, 8/1996); 1999 ANA (Heritage, 8/1999), lot 5052.
**10. VF.** Stack's (10/1987), lot 53.
**11. Fine.** Seavey Collection (William Strobridge, 1873), lot 188; Lorin G. Parmelee; later, Laird U. Park (Stack's, 5/1976), lot 21; Bowers and Ruddy (12/1977), lot 5078.
**12. Fine.** Oechsner Collection (Stack's, 9/1988), lot 1353; Vintage Auctions (2/1989), lot 54.
**13. Fine.** Vintage Auctions (2/1989), lot 55; Stack's (3/1993), lot 2062; Stack's (12/1993), lot 933.
**14. Fine.** Stack's (4/1976), lot 131; Robison Collection (Stack's, 2/1982), lot 212.
**15. VG.** Bowers and Ruddy (12/1975), lot 256; Bowers and Ruddy (11/1976), lot 369.
**16. XF, plugged.** Bowers and Ruddy (11/1973), lot 653.
**17. VF, plugged, damaged, NCS.** Heritage (1/2002), lot 5159; Heritage (5/2008), lot 2002.

Additional Auction Appearances:
A. VG. Kreisberg (10/1978).
B. XF. Kagin's (8/1985).
C. VF. Dana Linett (1/1988). (#609)
***See: Video Lot Description***

## Extremely Rare Albany Church Penny Breen-1169 Plate Coin, No D, VG10

**3559 (1790) Albany Church Penny, No D VG10 NGC.** Breen-1169. In fact, this is the Breen plate coin, one of approximately six pieces known when he wrote his *Encyclopedia* in 1988. NGC and PCGS have each certified two pieces. The variety with a D (an abbreviation for penny) above CHURCH is equally rare. Per Breen, these church pennies were used as a proof of membership. The present piece is toned medium brown and has mildly granular surfaces. The few faint marks are inconsequential for the assigned grade. Most Early American collectors have never seen an Albany Church penny, such is their rarity. Uniface, as made. Listed on page 71 of the 2009 *Guide Book*. Census: 1 in 10, 1 finer (11/08). (#612)

## Full Red MS66 1794 Talbot, Allum & Lee Cent

**3560 1794 Talbot, Allum & Lee Cent, NEW YORK MS66 Red PCGS.** Breen-1029. This is the most extraordinary TAL cent we have ever seen. This is the only full red example graded by either service in any grade. The surfaces are bright and show uniform, unmellowed color over both sides with sparkling, semiprooflike fields. Sharply struck throughout. The curious part of the full red and high grade of this TAL is the date. This is a 1794, not a 1795. According to Breen's *Encyclopedia,* "Those dated 1795 were formerly considered rare, but a hoard found in Britain after WW II yielded many Unc. examples, mostly brown to light olive, fewer original red." Population: 1 in 66 Red, 0 finer (11/08). Listed on page 72 of the 2009 *Guide Book*. (#636)

## Finest Certified No NEW YORK 1794 Talbot, Allum, & Lee Cent MS62 Brown, Only Piece Certified Above XF40

**3561 1794 Talbot, Allum, & Lee Cent, Without NEW YORK MS62 Brown PCGS.** Fuld-1, Breen-1028. The most important rarity within the Talbot, Allum, & Lee Early American token series. Presumably, the principals of the New York merchant firm objected to the absence of the city, which promptly led to the common Fuld-2 (large ampersand) and Fuld-4 (small ampersand) 1794 New York varieties. The obverse die was also replaced, as it is failing near the OM in COMMERCE and on the figure of Liberty above her feet.

A well-worn example of Fuld-1 can be attributed by the location of Liberty's cap, between the Y in LIBERTY and the ampersand. All other Fuld varieties place the cap beneath the right edge of the Y. Such a diagnostic is unnecessary for the present piece, as it has full design detail along with satin luster and a generous amount of faded mint red within protected areas. Elsewhere, the piece is medium brown and is free from noticeable marks. PCGS has certified just four examples, **and the other three are graded XF40.** One of those XF40 pieces realized $16,100 in our March 2006 Palm Beach Signature. This coin has never appeared in a U.S. auction previously as it was recently discovered in Europe. None have been certified by NGC. Listed on page 72 of the 2009 *Guide Book*. (#637)

***See: Video Lot Description***

## PR66 ★ Silver 1796 Myddelton Token

**3562 1796 Myddelton Token, Silver PR66 ★ NGC.** Breen-1073. Englishman Philip Parry Price owned a large land holding in Kentucky, which had recently entered the Union in 1792. Myddelton planned to form a farming community there, stocked with English immigrants. He enlisted Matthew Boulton's private Soho Mint to produce pattern tokens in silver and copper. The designs for the token are generally acknowledged as artistically superior, and among the best of the various Early American issues. Myddelton's plans for his Kentucky community went awry when he was jailed in England for his efforts to export skilled workers. A marvelously toned Premium Gem that displays apple-green, caramel-gold, and russet-brown patina. Crisply struck and essentially pristine. Listed on page 73 of the 2009 *Guide Book*.
*Ex: Boston ANA (Steve Ivy, 8/1982), lot 1472.*
*From The Deb-Ann Collection.* (#649)

## Choice XF Born Virginia Cent Inscribed Reverse, Baker-60

**3563 1792 Washington Born Virginia Cent, Inscribed Reverse XF45 PCGS.** Baker-60, R.6. The usual reverse die with the 1 in 1775 directly beneath the I in AMERICAN. All Born Virginia cents are rare, and are typically encountered in Fine to VF grades. The legends describe key dates in Washington's life through 1789, omitting the 1759 marriage to Martha that made him among the wealthiest men in the colonies. This example has consistently bold legends and only moderate wear on Washington's portrait. Smooth aside from a tiny dig above the PR in PRESIDENT. Listed on page 78 of the 2009 *Guide Book*. (#723)

## Challenging VF30 1820 North West Company Brass Token, Breen-1083

**3564 1820 North West Brass VF30 NGC.** Breen-1083. A mid-range representative of the exceptionally challenging 1820 North West Company brass token, or "beaver," as it is sometimes nicknamed for the reverse device. Moderately worn, holed as usual through the letter K of TOKEN, mushroom-brown and brassy surfaces that show the typical scattering of light marks and suggestions of having been unearthed, the state of a majority of survivors. Walter Breen describes this company trade token, originally struck in Birmingham by John Walker & Co. and later shipped to the Canadian-influenced area that is now Oregon, as the only issue to qualify "as a colonial circulating medium for the Pacific Northwest." Listed on page 74 of the 2009 *Guide Book*. (#952)

## HALF CENTS

### Choice AU Cohen-4 1793 Half Cent

**3565** **1793 AU55 NGC.** C-4, B-4, Low R.3. Manley Die State 2.0. This impressively defined Choice AU example displays shimmering luster across the devices and legends. Toned deep golden-brown with additional ice-blue tints on the reverse. Minor incompleteness of strike is seen on the right-side borders, most noticeable on the AM in AMERICA. Surprisingly smooth overall aside from an inconspicuous mark above the 7 in the date. A brief lintmark near the final A in AMERICA is strictly of mint origin. An important representative of this first year, single year type. EAC 40. Census: 1 in 55, 6 finer (11/08). (#1000)

## Amazing 1793 Half Cent
## AU58, C-2, B-2

**3566** **1793 AU58 NGC.** C-2, B-2, R.3. Obverse: L in LIBERTY is low, and TY is very low; the cap has three elaborate folds or wrinkles; the date is almost in a straight line at the top; and a defect is present as a spur at the top left of the 9. Reverse: There are 15 leaves on each branch; there is a large centered dot between HALF and CENT; the long fraction bar is bent downwards; and the 2 in the denominator nearly touches the left ribbon end.

Walter Breen, in his *Encyclopedia of United States Half Cents*, writes that the first half cent delivery of 7,000 pieces occurred on July 20, 1793. A second group of 24,934 coins followed on July 26, and a final batch of 3,400 on September 18, giving a grand total of 35,334 half cents.

This one-year type coin is usually available only in lower grades, particularly from Fair to Very Fine. Extremely Fine pieces are located with patience and searching, as are examples in lower About Uncirculated. High-end AU and Mint State specimens are elusive.

This is an amazing near-Mint State example that displays light to medium golden-orange patination and a good amount of luster. An attentive strike leaves strong definition on the well centered design elements. There are no marks of consequence on either side, and some minute die rust on the lower obverse does not detract from the coin's outstanding eye appeal. The reverse is rotated a few degrees clockwise relative to the obverse. Connoisseurs of early half cents will not want to miss out on this infrequent high-grade offering. Census: 17 in 58, 15 finer (11/08). EAC 45.

*From The James Mossman Collection.* (#1000)

***See: Video Lot Description***

## Significant 1793 C-2, B-2 Half Cent
## MS61 Brown
## Ex: Richard Picker Collection

**3567** **1793 MS61 Brown PCGS.** C-2, B-2, R.3. Manley Die State 1 as always, with the obverse die rusted and the reverse die perfect. The obverse die was used for C-1 and C-2, and is quickly recognized by the smoothly curved bust line just above the date. This is the most visible diagnostic, although some advise noting the position of the forecurl below the I in LIBERTY. The other obverse has this line sharply bent where it joins the hair and the forecurl below the L. The reverse has the legend widely spaced with the final A joined to the right stem end. Each branch of the wreath has 15 leaves.

Ronald Manley notes in *The Half Cents Die State Book* that this variety is normally found in low grades, but at least two Mint State pieces exist. Walter Breen recorded five Uncirculated pieces along with six AU coins, although he noted that some of those listings may be duplicates. This specimen is one of the AU pieces listed in Breen's roster, from the Richard Picker Collection where it was cataloged as Uncirculated.

For the benefit of those who have no access to the September 1968 Merkin catalog where this piece was offered, we reprint the description of lot 27 from that catalog:

> 1793 Gilbert 3. Forelock below I; fraction bar bent between ribbons; heavily rusted dies. Unc., light brown, plenty of faded mint color. No significant blemishes inflicted after striking. Between Y and hair are two shallow pre-striking flan chips; opposite D and 200 are two edge planchet defects superficially looking like rim dents, though careful examination with a glass shows their true origin. Obv. die rust is as advanced as we have ever seen' rev. die rust is as on some Gilbert 1's [Cohen-3], unpublished die state, hitherto unknown. At present only six are recorded in mint state; which of these is finer is principally a matter of color preference. From a very old noncollector estate; never before auctioned.

Today, we are unable to add more to the description or to clarify any parts there of. The coin has lovely intermingled light and medium brown, with considerable gold that has faded from mint red, and with pale blue and lilac patina especially on the obverse. EAC 55.
*Ex: Richard Picker Collection (Lester Merkin, 9/1968), lot 27.* (#1000)

## Gorgeous C-2, B-2 1794 Half Cent, MS63 Brown

**3568** **1794 MS63 Brown PCGS.** C-2, B-2. Edge not visible through holder and not identified by the label, but more likely the C-2a, B-2b or Small Letters edge (the Large Letters edge, C-2b, B-2a, is very rare when associated with this die pair). Manley Die State 2.0, with clashes at neck and cap but minimal negative definition at the far leaves on the obverse.

Though the U.S. Mint struck only copper coins (cents and half cents) in 1793, that facility expanded its repertoire to silver the next year. The emphasis, however, remained on the copper coinage, and 1794 brought with it several changes to the half cent manufacturing process. Roger S. Cohen, Jr., in his *American Half Cents: The Little Half Sisters*, notes that 1794 marked the beginning of hub use in creation of half cent dies, and that half cent planchets, though they maintained the same weight as 1793 flans, had broader diameters and proportionally decreased thicknesses.

Of the nine die pairs and their main die varieties (discounting edge-lettering variants), two of them, C-2 (B-2) and C-9 (B-9) are the most readily available and the most popular with those collecting by type or *Guide Book* variety. This attractive, unworn example of the former is pleasingly detailed for the issue with rich violet-brown surfaces. Though a few minor abrasions are scattered on each side, with a single flaw of note located on Liberty's cap, the overall eye appeal is surprisingly strong for the grade assigned. Population: 5 in 63 Brown, 5 finer (11/08). EAC 50.
*From The James Mossman Collection.* (#1003)
***See: Video Lot Description***

A 15% BUYER'S PREMIUM ($9 MIN.) APPLIES TO ALL LOTS.

## Glossy 1795 Lettered Edge Half Cent C-1, B-1, AU58

**3569** **1795 Lettered Edge AU58 PCGS.** C-1, B-1, R.2. Manley Die State 1.0. The Cohen-1 die combination is the only variety of the 1795 Lettered Edge, With Pole type as listed in the *Guide Book*. As such, it is in great demand, from variety and type collectors. This outwardly attractive example has minor impairments on both sides that deserve careful examination. The obverse has surface marks on the cap, upper hair, and cheek. The reverse has similar marks near the left ribbon, and inside the border above ED, the final S, F, and AME. Nicely toned in steel and olive. EAC 20.
*Ex: Chris Victor-McCawley (privately, 12/2001).* (#1009)

# PROOF CLASSIC HEAD HALF CENT

## Pleasing 1836 Original Half Cent, C-1, B-1 PR64 Red and Brown

**3570** **1836 Original PR64 Red and Brown NGC.** C-1, B-1, Low R.6. A very rare proof half cent issue with originals distinguished from first restrikes by the absence of buckling in the center of the obverse. The fields are pleasingly reflective and the devices are all intricately detailed, as seen only on proofs from the often-weak Classic Head era. The surfaces overall display a warm red color with elements of blue-brown patina that deepen around the borders. A few faint hairlines on the face of Liberty and in front of and below the bust of Liberty account for the grade. EAC PR63. Census: 1 in 64 Red and Brown, 1 finer (11/08). (#1208)

## Curved Bust 1793 Chain Cent, S-2, XF40

**3571** **1793 Chain AMERICA XF40 PCGS.** S-2, B-2, High R.4. The Chain cents were the first coins produced at the fledgling Philadelphia Mint in late February and early March 1793. The earliest dated delivery of these coins was March 1, 1793. Based on the research of R.W. Julian, Breen suggested that the first "Chain cents may have been ceremonially struck on Washington's birthday, Friday, February 22." Production continued less than two weeks, with the final Chain cent delivery dated March 12, 1793. An average of 3,000 coins per day seems quite small until the inexperience of the entire Mint staff is considered. Assuming a 12-hour workday, that is an average of four coins per minute, or one every 15 seconds.

Five die varieties were produced, including the famous AMERI variety, the somewhat less well-known Periods variety, the Wide LIBERTY rarity with just two known, the Curved Bust variety offered here, and the Straight Bust variety that makes up about half of the entire surviving population of the design. In his *Large Cent Encyclopedia,* Walter Breen suggested that the AMERI cents and these Curved Bust cents were all part of the initial delivery of 11,178 pieces on March 1.

This example is a later die state with a bulge at the base of 793 in the date. Both sides exhibit a few small rim bruises and other minor defects, but the surfaces are smooth with a dark chocolate obverse, and a wood grain reverse. EAC 20.

*From The James Mossman Collection.* (#1341)

***See: Video Lot Description***

## Distinctive 1793 Vine and Bars Edge S-5, B-6 Cent, AU53

**3572** **1793 Wreath Cent, Vine and Bars AU53 PCGS.** S-5, B-6, R.4. Breen Die State I. An early impression, with faint reverse bulges, but no other die defects. The S-5 obverse is the only Wreath cent with large letters in LIBERTY, and perhaps deserves a separate *Guide Book* listing. The remaining obverse dies all have small letters, and the difference is recognized at a glance.

This wonderful piece has medium brown surfaces with hints of olive patina. A few tiny abrasions and planchet flakes are evident, the most recognizable positioned just off the point of the bust. EAC 40. *Ex: Anthony Terranova (8/2002).* (#1347)

## Sumptuous Near-Mint 1793 Wreath Cent Vine and Bars Edge, S-6, B-7

**3573 1793 Wreath Cent, Vine and Bars AU58 PCGS.** S-6, B-7, R.3. Die State II, with bulge at left obverse extending to the jaw but no further. This feature, present on all examples of the S-6 to some degree, has led to nicknames such as the "Warped Die" or "Sprung Die," two examples suggested by Crosby. As described by Noyes, *"There is always a bulge or convexity on the obverse, running from back of the hair to the rim,"* and Noyes continues by mentioning the extension to the right obverse field present on most examples (though not all, as the present piece shows).

The initial year of production at the First U.S. Mint saw only copper coins struck, but the cent, larger of the two denominations issued, saw a rapid evolution of the design, beginning with the free-flowing hair of Liberty and eponymous circular chain on the first cents and ending with a Liberty-and-cap obverse motif and a wreath on the reverse. In between was the Wreath cent, pairing the windswept look of the obverse with the reverse wreath, that actually made up a majority of the cent mintage for the year.

Wreath cents have a further subdivision in their *Guide Book* listing, between Lettered Edge pieces and Vine and Bars Edge coins. This S-6 example is one of the latter, though this feature is not visible in the holder. What is readily apparent is its impressive overall preservation, with just a touch of friction at the highest design elements. Though a few peripheral planchet flaws affect the chocolate-brown surfaces, the fields and well struck devices show few post-production abrasions. For the Wreath cent, Vine and Bars category, Population: 12 in 58, 28 finer (11/08). EAC 40.
*From The James Mossman Collection.* (#1347)

A 15% BUYER'S PREMIUM ($9 MIN.) APPLIES TO ALL LOTS.

## Sharp 1793 S-13, B-20 Liberty Cap Cent, VF Details

**3574 1793 Liberty Cap—Environmental Damage—NCS. VF Details.** S-13, B-20, Low R.4. As a date and type combination, the 1793 Liberty Cap cents are the rarest of all large cent issues from 1793 to 1857. The mintage was 11,056 pieces, all delivered on September 18, just before the Mint closed for the first time to deal with the yellow fever epidemic. The cents designer, Joseph Wright, had succumbed to the disease just a few days earlier, on September 12 or 13.

The present piece is nicely detailed with rather smooth olive and dark brown surfaces that suffer from slight corrosion and minor rim bruises on each side. Despite the surface quality, the overall appearance is excellent. EAC 10.

*From The Martin L. Diffenbaucher, Jr. Collection.* (#35489)

## The Husak 1794 S-47, B-39 Cent, AU50

**3575 1794 Head of 1794 AU50 PCGS.** S-47, B-39, R.4. Die State II, with light clash marks on the obverse and a faint crack through the tops of ATE. Medium brown surfaces with splashes of darker steel and lighter reddish-brown in the obverse field. A small mark on Liberty's neck and a few faint scratches are visible on the obverse, along with several minor rim bruises on each side. Bill Noyes and Del Bland both agree with our grade of EAC 25.

*Ex: Fred Coops, Jr.; Steven Teoli (5/1984); Jack Beymer; Midwest Collection (5/1990); Thomas D. Reynolds (6/1995); Walter Husak (Heritage, 2/2008), lot 2049.* (#901374)

## Condition Census 1794 S-21 Cent
## MS62 Brown
## The Garrett Specimen

**3576** **1794 MS62 Brown PCGS.** S-21, R.3. Breen Die State III. Labeled the Sans Milling variety by Dr. Edward Maris in his 1869 reference on the subject, and later the Flat Pole variety by Dr. William Sheldon in his 1958 treatise, *Penny Whimsy*. "Sans milling" refers to the typically weak dentilation found on the obverse, whereas the "flat pole" simply identifies the flattened feature at the end of Ms. Liberty's pole.

The S-21 example offered here is important not only because of its outstanding state of preservation, but also its provenance. Through plate matching, we are confident that this piece is the Frossard/Garrett specimen that originated from the core collection of Dr. Maris. The cataloger of the November 1979 Garrett sale described this specimen as follows: "Identifiable by a dark spot in the hair behind the ear and below the cap, otherwise with perfect reddish-brown surfaces. Well struck with the lettering, numerals, and devices all sharply defined." In the same sale this coin was listed as being "mid-range in the Condition Census." Currently, Noyes classifies this piece as tied with the Clark cent for number the number five slot, while Bland places it at number 11 in their respective Condition Census compilations.

The dark spot mentioned by the Garrett cataloger is a superficial area of toning observed on the third major lock of hair below the cap. A smaller spot is found on the base of the first lock, but well into head and above the previously mentioned dark area. Neither feature is immediately noticeable or distracting. In fact, both are plainly visible only with the aid of magnification. We make note of these anomalies solely for the benefit of future collectors and numismatic researchers. Otherwise, the light red-brown surfaces are surprisingly free of distractions and a pleasure to behold. EAC 50.

*Ex: Dr. Edward Maris; Édouard Frossard Collection; Sale #37 (Édouard Frossard, 10/1884), lot 853; T. *From The James Mossman Collection.* (#901374)

## Second Finest 1794 S-55, B-47 Cent, MS63 Brown

**3577** **1794 Head of 1794 MS63 Brown PCGS.** S-55, B-47, R.2. Breen Die State II, with minor lapping evident among the lower hair curls. Some small planchet marks on each side point to the provenance from the Naftzger and Brown Collections. Del Bland grades this coin AU55, and calls it second finest known, while Bill Noyes grades it XF45 and calls it fourth finest known. In addition to the planchet marks mentioned above, both sides have numerous other minuscule planchet marks that were not struck out. Attractive mahogany surfaces have hints of lilac and blue toning. EAC 55.
*Ex: Paul S. Seitz (11/1946 fixed price list); R.E. Naftzger, Jr. (New Netherlands, 11/1973), lot 376; John W. Adams (9/1974); Robinson S. Brown, Jr. (Superior, 9/1986), lot 74; David Henderson; later, Anthony Terranova.* (#901374)

## Desirable 1794 Head of 1793 Cent S-18b, B-2b, XF40

**3578** **1794 Head of 1793 XF40 PCGS.** S-18, B-2. Die State III, with right ribbon in polished-out fragments. Edge not visible through holder, but the S-18b or B-2b judging by die state, which is R.4. The most pursued of the *Guide Book* varieties for the year save for the borderline-unobtainable Starred Reverse. This interesting piece has generally chocolate-brown surfaces with deeper color at the worn zones of the high points. Softly luminous surfaces show a number of fine abrasions, but serious marks are nearly nonexistent. The obverse has a minor rim nick at 8 o'clock. EAC 15. For all Head of 1793 varieties, Population: 3 in 40, 7 finer (11/08). (#1362)

## Famous 1794 Starred Reverse Cent, Fine 12

**3579** **1794 Starred Reverse Fine 12 NGC.** S-48, B-38, R.5. The famous Starred Reverse large cent can be called the Holy Grail of 1794 large cents. It is clearly the most widely known and highly popularized variety of the date, and equally so among all large cents of any date. It is one of few coins that can be identified without saying what the coin is! When one mentions the Starred Reverse, even the novice collector understands that the speaker is talking about this 1794 large cent variety. Even coins such as the 1913 Liberty nickel, the 1894-S dime, and the 1804 silver dollar require some identification of what the coin is. That is not so with the Starred Reverse. It is also one of very few coins that have an entire book written about it.

As always, the reverse is weaker than the obverse from a die that was shallowly engraved. Because of that, the obverse exhibits sharpness of at least Fine 12, while the reverse sharpness is VG8. For that reason, these pieces are typically graded by the remaining obverse details. Like most middle circulated grade large cents, this example has some imperfections, including an old scratch at the top of the obverse, and some minor pitting on both sides. The surfaces are dark steel-brown, with lighter tan on the obverse devices. Most of the stars are clearly visible. Bill Noyes grades this piece Good 6, but we feel that it should grade EAC 7.

*Ex: Walter Garrabrant (Stack's, privately, 1947); Dr. Jacob N. Spiro; Willard C. Blaisdell; Dr. Edward R. Bush; Denis W. Loring (12/1979); G. Lee Kuntz (Superior, 10/1991), lot 55; Grant O. Reed (Superior, 9/1998), lot 1119.* (#1374)

## Important 1795 S-75, B-3 Lettered Edge Cent, MS63 Brown

**3580** **1795 Lettered Edge MS63 Brown PCGS.** S-75, B-3, R.3. Breen Die State V, although there are no reverse clash marks, indicating the die has been lapped since Breen's State IV. The surfaces have a splendid combination of dark olive and tan, the latter faded from original red. Although a few faint traces of corrosion and minor surface marks are evident, both sides are far above average. While the 1795 plain edge cents are usually available in higher grades, the similarly dated lettered edge pieces are generally only available when major collections cross the auction block. This is an excellent opportunity for the specialist or advanced type collector. EAC 60.
*Ex: Dr. Thomas Turissini; Anthony Terranova (1994).* (#1377)

## Lovely 1795 S-76b, B-4b Cent, MS62 Brown

**3581** **1795 Plain Edge MS62 Brown PCGS.** S-76b, B-4b, R.1. Breen Die State IV, with minor clash marks on both sides. The S-76b and S-78 cents are the two most plentiful 1795 varieties, and both are readily available in all grades including Mint State. This delightful piece has satiny medium brown surfaces and cartwheel luster on both sides. The upper obverse and lower reverse are weak with minor planchet flakes on the weakly struck areas. An exceptional example, this cent will be a nice addition to a specialized cent collection or a high-grade type set. EAC 55.
*Ex: Anthony Terranova (1997).* (#1380)

## Lovely 1795 S-78, B-8 Cent, MS63 Brown

**3582** **1795 Plain Edge MS63 Brown PCGS.** S-78, B-8, R.1. Housed in a early PCGS holder with white foam insert. The S-76B and S-78 are the two most plentiful 1795 large cent varieties, and the only two plain edge pieces that are obtainable without difficulty in Mint State grades. This pleasing olive and light tan piece has a few dull toning splashes on each side that should serve for identification. The surfaces have the usual tiny planchet marks, along with other post-mint abrasions that are entirely insignificant. Typical of the variety, the peripheral details are weak and the central design elements are sharper. EAC 55. (#1380)

***See: Video Lot Description***

## Celebrated 1795 Jefferson Head Cent, Good 4

**3583** **1795 Jefferson Head, Plain Good 4 PCGS.** S-80, B-11b, Plain Edge, High R.5. The so-called Jefferson Head cents are private productions by John Harper who was hoping to land a contract for production of federal cents. These cent products were intended to be samples of his work, passed out to Congress in anticipation of a coinage contract that never materialized. Listed and numbered in Sheldon's reference, these cents are popular with all early cent collectors.

The sharpness of this piece seems to be quite a bit finer than the grade that PCGS has assigned, although both sides have prominent surface fissures, probably as made. Otherwise, the deep steel-brown surfaces are quite smooth with only microscopic granularity. EAC 4. (#1386)

## Condition Census 1796 S-85, B-6 Cent, AU50

**3584 1796 Liberty Cap AU50 PCGS.** S-85, B-6, R.5. Breen Die State I, although with minor reverse lapping, this example was struck before the reverse die was extensively reground. Attractive dark brown and steel surfaces with excellent sharpness, and a pleasing piece overall, despite some faint scratches and abrasions. Del Bland places this piece in a tie for second place in his Condition Census, with a grade of VF35. He writes: "Sharpness of AU-50 but two obverse edge dents, one of which has been repaired, and some abrasions." Bill Noyes calls it VF25 with the sharpness of XF40 and "Average minus" surfaces. Our own opinion is right in the middle, with sharpness that approaches AU50, and a net grade of EAC 30.
*Ex: Alan J. Brotman (Numismatic Gallery); Dr. Robert J. Shalowitz; William K. Raymond; George Korsing; William and Norman Pullen (8/1975); later, Michael Kramer; Bowers and Merena (9/1994), lot 1129; Anthony Terranova (4/1995); Robinson S. Brown, Jr. (Superior, 1/1996), lot 120; Walter Husak; later, Chris Victor-McCawley (privately, 8/2001).* (#1392)

## Gorgeous 1797 S-135 Nichols Find Cent, MS65 Brown

**3585 1797 Reverse of 1797, Stems MS65 Brown PCGS. CAC.** S-135, B-5, R.3. Breen Die State IV with evidence of a faint die bulge at D ST, but no obverse or reverse clash marks of the latest die state. Undoubtedly from the famous Nichols Find of 1796 and 1797 large cents, providing collectors the only reasonable opportunity to acquire high-grade early Draped Bust cents. It is believed that about 1,000 coins were in the original hoard, all from three die combinations, 1796 S-119, 1797 S-123, and 1797 S-135.

One of the two most famous large cent hoards (the other is the Randall Hoard of 1816 to 1820 cents), tradition states that Senator Benjamin Goodhue (1748-1814) of Massachusetts obtained the parcel of cents shortly after they were coined, perhaps directly from the Mint. Goodhue reportedly passed the parcel to his daughters, and they were eventually dispersed by David Nichols with whose name they are now associated. The previous story has often been recorded in numismatic literature, although there seem to be few actual facts to support the tradition.

Typical of the Nichols Find coins, this piece is struck on a glossy planchet that exhibits reflective fields. Numerous tiny planchet defects on each side remain from the original planchet stock before the coin was struck. Aside from a few inactive spots on each side, the surfaces are pristine and nearly free of any post-mint blemishes. Both sides have lovely light brown color with considerable faded mint red on the reverse. EAC 63.

*From The James Mossman Collection.* (#1422)

## Sensational 1797 S-135, B-5 Stems Cent, MS65 Brown

**3586** **1797 Reverse of 1797, Stems MS65 Brown PCGS.** S-135, B-5, R.3. Breen Die State V with faint clash marks visible on both sides. In his photo book on 1795 to 1797 large cents, Bill Noyes listed and illustrated 12 different examples of S-135 that he graded between MS60 and MS63. While different from any of the 12 that Noyes illustrated, the present example is clearly the equal of the finest pieces in his reference, in our opinion. It can be identified by an old inactive spot on the reverse border over the right side of the second T in STATES.

Both Nichols Find examples in the present sale have a similar appearance, with glossy and reflective medium brown surfaces. The planchets came from Matthew Boulton in England, and were shipped overseas in large casks that contained between 15,000 and 20,000 blanks in each. Mint Director Elias Boudinot said that the Boulton planchets were "perfect and beautifully polished." The Boulton planchets arrived at the Mint on August 28, 1797, the day the Mint closed for the annual yellow fever outbreak. They finally went to press in November 1797, making cents dated 1796 and 1797, including all three Nichols Find varieties.

The present piece has considerable faded mint red on both sides, enough that it may deserve a Red and Brown designation. Nearly all of the tiny marks, especially visible on the reverse, are from the original planchet, and not fully struck out. The central obverse and reverse are weakly defined as usual, but the impression is nicely centered with full and sharp border dentils on both sides. Minor low areas in the reverse field are common to several examples of the variety, resulting from remnants of grease or oil on the die. EAC 64. (#1422)

## Near Census 1797 S-131, B-27 Cent, AU53

**3587** **1797 Reverse of 1797, No Stems AU53 NGC.** S-131, B-27, R.3. Die cracks and chips in the right obverse field suggest an intermediate die state. The No Stems type is listed singularly in the Guide Book, and it is highly popular with collectors for type collections. A lovely example of the most plentiful 1797 No Stems variety, with excellent design details and splendid olive and chestnut surfaces that exhibit splashes of darker toning. Despite the plentifulness of the variety, the finest known is just XF45, based on the grading of Del Bland and Bill Noyes. Our EAC grade places this piece among the top 10 examples known, EAC 30. (#1425)

## Attractive 1799 S-189, B-3 Cent, Fine 12

**3588** **1799 Fine 12 PCGS.** S-189, B-3, R.2. Even though both sides of this piece have modest surface marks that are consistent with the grade, it is a wonderful example with mostly medium brown surfaces that exhibit a few splashes of darker steel patina. An earlier die state, with a small die chip on the reverse. The variable size die chip is located between the E of ONE and the T of CENT, and is a hallmark of genuine examples from this normal date die pair. While a few genuine pieces exist without the die chip, the absence of that feature is a good reason to suspect an altered date. EAC 8. (#1443)

A 15% BUYER'S PREMIUM ($9 MIN.) APPLIES TO ALL LOTS.

## Remarkable 1799 S-189 Cent, VF25

**3589** **1799 VF25 PCGS.** S-189, B-3, R.2. Although many aspects of the 1799 cent coinage have been and continue to be debated by numismatic scholars, there is universal agreement that it is one of the three famous key-date large cent issues along with 1793 and 1804. Joseph J. Mickley, who was born in 1799, is credited as the "Father of American Coinage" because of the story that surrounds his vain attempt to find a cent from the year of his birth.

Mint records indicate that 904,585 large cents were produced throughout the year, although we know today that nearly every one of those nearly 1 million coins was actually dated 1798. It is impossible to determine with accuracy how many coins struck in 1799 and 1800 were dated 1798, how many were dated 1799, and how many were dated 1800. There is clear die state evidence that proves that the 1799 overdates were struck prior to the last of the 1798 cents. The 1799 normal date coins were probably struck after the 1798 cents, and some of those may have been struck in 1800. Mint records show a total production of 4,706,460 cents during those three years. A total of 78 different die varieties were produced, and analysis of current rarity ratings shows that about 32,000 1798 through 1800 dated large cents still survive. Our analysis suggests the following actual mintages for coins that carry a given date: 3.24 million for 1798; 145,000 for 1799; and 1.32 million for 1800. Like any similar survey, the data is skewed toward the rarer issue, in this case 1799. Because of the value, any 1799, even if barely identifiable, is included in the rarity ratings, while similar quality 1798 and 1800 cents are not included in the rarity figures.

The present piece, with the sharpness of an exceptional coin, has smooth deep olive surfaces with a few faint marks on each side that are consistent with the grade and time in circulation. Faint surface roughness is of little concern. In fact, the surfaces are actually quite smooth for a 1799 cent. Usually they are heavily corroded, and this piece is a wonderful, problem free coin. EAC 15.
*Ex: Anthony Terranova (2/2001).* (#1443)

## Sharply Defined 1799 S-189, B-3 Cent, XF40 Details

**3590 1799—Environmental Damage—Uncertified. XF40 Details.** S-189, B-3, R.2. This sharply detailed example will prove desirable to many collectors who have been searching for an example of the key large cent issue. If you are a modern day "Joseph Mickley," searching with little success for an example of this issue, you will want to consider the present opportunity. Although both sides have old greenish verdigris, the surfaces are far finer than usual, and both the date and LIBERTY are strong, an unusual trait as experienced collectors know. The surfaces have mottled tan, dark brown, and maroon patina on both sides. EAC 20. (#1443)

## Historic Census Level 1801 S-216, B-6 Cent, MS63 Brown

**3591 1801 MS63 Brown PCGS.** S-216, B-6, R.2. Breen Die State II, before the rim break develops over the STA of STATES. This impressive example has frosty cartwheel luster with attractive olive and steel surfaces blended with lighter tan that is faded from original red. While a few tiny scratches are visible in the left obverse field, exceptional aesthetic appeal is presented to the connoisseur. The S-216 die combination is one of the more plentiful varieties, with several nice Mint State pieces surviving. Bill Noyes grades the present piece MS60, and ranks it tied for fourth finest, while Del Bland also calls it MS60 and lists it as tied for sixth finest known. In the 1973 Naftzger catalog, it was graded MS60 and in the 1986 Robinson Brown catalog, it was called MS63. This coin was consigned to the 1996 Superior auction by Douglas McHenry, and it was one of few coins that did not actually belong to Brown. EAC 60.

*Ex: Thomas L. Elder (7/1920), lot 689; William Festus Morgan (J.C. Morgenthau, 6/1932), lot 34; B. Max Mehl; T. James Clarke (10/1954); R.E. Naftzger, Jr. (New Netherlands, 11/1973), lot 530; Douglas Kaselitz; Gordon J. Wrubel; Bowers and Ruddy, 1974-75 Rare Coin Reviews; Douglas C. McHenry (Superior, 9/1996), lot 318; Larry Hanks (1/1987); Denis W. Loring (8/1988); John B. MacDonald (3/1997); Dr. Eugene Sherman; Superior (9/1998), lot 1216.* (#1458)

## The Naftzger 1802 S-232 Cent, MS64 Brown Tied for Second Finest Known

**3592** **1802 MS64 Brown PCGS.** S-232, B-12, R.1. The reverse has a heavy rim break over ATE. Del Bland grades this piece MS60 and calls it second finest, tied with three other pieces in his Census. The reverse of this piece is plated in Bill Noyes' 1991 photo book, where he graded the coin MS60 and called it second finest, much as Del Bland did. However, by 2005, after the Naftzger coins had been sold to other collectors, Noyes inexplicably dropped his grade to AU50, and placed its Census rank in a tie for eighth finest. Today, we fully agree with the earlier assessment by Noyes, and the opinion of Bland, and grade this piece EAC 60. (#1470)

## Near Census 1807/6 S-273, B-3 Cent, MS63 Red and Brown

**3593** **1807/6 Large 7 MS63 Red and Brown PCGS.** S-273, B-3, R.1. Breen Die State IV, with a short die crack from the border into the left obverse field at 7 o'clock. Weakness from die failure is evident at the upper right obverse and lower right reverse. This lovely cent has splendid golden-brown surfaces with darker steel toning on the high points, and considerable original mint red on both sides. We concur with the AU55 grade that Bill Noyes assigns. He places this piece in a tied for seventh finest in his Condition Census. Del Bland also grades this piece AU55, placing it in a ninth place tie in his roster. EAC 55. *Ex: Robert L. Hughes (2/1978), lot 59; Harold Anderson; Heritage (6/2004), lot 7020; Chris Victor-McCawley (privately, 8/2004).* (#1529)

## Census Level 1808 S-278 Cent, MS64 Brown

**3594** **1808 MS64 Brown PCGS.** S-278, B-2, R.2. Breen Die State III. Prominent rim crumbling is visible below the date, and clash marks are evident inside the wreath. **This example is the 1991 Noyes plate coin.** In 1991 Bill Noyes ranked this piece as tied for finest known and graded it MS65. By 2005, he had dropped his grade opinion to MS60, and ranked it as tied for fifth finest known. Del Bland grades this piece MS62, and lists it as tied for fourth finest known. It is a fully lustrous piece has light brown surfaces with complete cartwheels on both sides. The reverse is darker steel with a crescent of light brown that is faded from original red. EAC 63.
*Ex: Lester Merkin (6/1971), lot 565; Bowers and Ruddy (5/1972), lot 604; Julian Leidman; George Rodgers; Herman Halpern (12/1986); R.E. Naftzger, Jr. (2/1992); Eric Streiner; Jay Parrino; Superior (5/1995), lot 2029; Jay Parrino (4/1996); Jack Wadlington; Chris Victor-McCawley (9/2005).* (#1543)

## Excellent 1810/09 S-281 Cent, MS63 Brown

**3595** **1810/09 MS63 Brown PCGS.** S-281, B-1, R.1. Breen Die State IV, or later, with heavy flowlines and a raised ridge over STATES, but no evidence of clash marks on either side, probably lapped off the die. This is the popular and one time controversial overdate variety, although there seems to be little question of its status today. In the past it was known either as 1810 over 09, or 1810 over 08. The surfaces are frosty with full cartwheel luster and dark brown patina with splashes of deeper steel toning and subtle traces of original mint red. A faint, old scratch is visible from the back hair curls to the rim just left of star 8. Tied for seventh finest in Del Bland's Census and 10th finest in Bill Noyes' Census. EAC 50.
*Ex: Dr. Juan XII Suros Collection (Superior, 2/1999), lot 17; Robert C. Clark (Bowers and Merena, 8/2000), lot 327; Denis W. Loring (8/2001).* (#1552)

A 15% BUYER'S PREMIUM ($9 MIN.) APPLIES TO ALL LOTS.

## Splendid 1811 S-287, B-1 Cent, MS64 Brown

**3596** **1811 MS64 Brown PCGS.** S-287, B-1, R.2. The 1811 cent, with both a Normal Date and an Overdate variety known, has long been considered a scarce date in the Classic Head series. The present offering is an excellent opportunity for the connoisseur to acquire a lovely piece.

An outstanding example of the Normal Date variety with frosty medium brown surfaces that exhibit considerable maroon patina, and lighter tan on the reverse. Quite a number of high grade examples of this issue survive today, with at least a dozen Mint State pieces known, including the present coin. EAC 60.
*From The James Mossman Collection.* (#1555)

## Elusive 1823 Silver Restrike Large Cent, MS63

**3597** **1823 Silver Restrike MS63 PCGS.** Judd-46, R.7. Although listed in the pattern references, the 1823 "Restrike" large cents in copper and silver are most avidly collected by large cent collectors. These pieces were produced from a muling of the 1823 Normal Date obverse die and the reverse die of 1813 S-293. Both dies actually still exist today.

As illustrated, both dies were extensively rusted and badly broken. The dies that were used for these so-called "Restrikes" were supposedly acquired by Joseph Mickley in the 1830s, when they were sold as scrap iron. He acquired many dies that were later combined to produce various unusual mulings, some mixing different denominations, and others like this variety that mixed different date dies of the same denomination. These pieces were made sometime in the 1860s.

A silver example that was tested many years ago proved to be approximately sterling silver, rather than the usual coin silver. The present piece has bold design details with fully reflective fields on both sides. The pewter surfaces are accented by attractive sky-blue toning with traces or iridescence. It is one of a small number of survivors. We are unaware of any specific condition census for the silver restrikes, although we estimate a total surviving population of only five or six pieces. NGC and PCGS have each certified exactly one 1823 silver restrike, including the present PCGS coin and a PR64 NGC example. EAC 60. (#12202)

## PROOF FLYING EAGLE CENTS

### PR62 1856 Flying Eagle Cent, Snow-9 Rare Gold CAC Sticker

**3598** **1856 PR62 PCGS. Gold CAC.** Snow-9, as seen by the tiny die spur from the left wreath stem and the horizontal die line from the rim to the I in UNITED. An exactingly struck specimen with flashy mirrored fields and attractive sea-green and almond-gold toning. A few unimportant flecks are noted above the tail. The Snow-9 proofs are believed to have been struck by the Mint a few years after 1856, for sale to collectors who considered the issue essential for an advanced cabinet. By then, the growing celebrity of the 1856 Flying Eagle cent was a major factor in the development of an American numismatic community. Housed in a green label holder that possesses a highly elusive *gold* CAC sticker, which indicates that the piece meets the standards of a higher grade. (#2037)

### Desirable Gem Proof 1856 Flying Eagle Cent

**3599** **1856 PR65 NGC.** Snow-2. The "Pointed U" obverse paired with Reverse 1857 B, noted for the die lines next to the ends of the left ribbon. While technically a pattern, the 1856 Flying Eagle cent was produced in sufficient quantities as to be challenging, but not overly so, and through the decades it has gained numismatic acceptance as nearly a "regular" issue and certainly one worthy of collecting. Luminous mahogany and mushroom-brown shadings dominate each side of this crisply detailed Gem. The broad fields offer considerable mirrors, an unusual state after so many years, and post-striking flaws are minimal. Immensely appealing.
*From The Martin L. Diffenbaucher, Jr. Collection.* (#2037)

## Gem 1856 Flying Eagle Cent, Snow-9

**3600** **1856 PR65 PCGS.** Snow-9. The S-9 variety is the most frequently encountered die pairing for 1856 Flying Eagle cents. These coins were produced from late 1857 until 1860. A considerable (but unknown) number were struck and apparently stockpiled in the Mint for sale to collectors. Snow speculates that after the start of the Civil War sales stagnated, and those pieces that remained were mistakenly released into circulation. This is a lovely example that has lustrous surfaces that display variegated golden, brown, and lilac coloration with the reverse being somewhat deeper in hue. A pleasing, high-grade example of this fabled 19th century rarity. Population: 38 in 65, 3 finer (1/03). (#2037)

## Lovely 1858 Small Letters Flying Eagle Cent, PR64

**3601** **1858 Small Letters PR64 PCGS. CAC.** As Rick Snow enthuses in his *A Guide Book of Flying Eagle and Indian Head Cents:* "Proof Flying Eagle cents are some of the most attractive coins in numismatics!" They are also some of the most elusive, as there are actually many more proof 1856 pattern Flying Eagle cents than there are proof 1858 Small Letters pieces, which have an estimated original mintage of only 200 pieces, per Snow.

This near-Gem offers sharp devices and associated squared rims, and the pleasing surfaces are light chocolate-brown with occasional hints of olive. Modest hairlines in the fields have little effect on the overall eye appeal. PCGS has graded just seven finer specimens (11/08). (#2043)

## INDIAN CENTS

### Elusive 1864 Indian Cent
### "L" on Ribbon
### MS66 Red

**3602** **1864 L On Ribbon MS66 Red NGC.** Compared with its Bronze, No L counterpart, the 1864 L On Ribbon business strike cent is elusive, though in most grades it is available for a price. Coins above the Gem level are rarities, however, particularly with fully Red surfaces. Warm peach and orange shadings prevail on this well-defined and attractive Premium Gem, and a tiny spot at the lower obverse margin is the only appreciable flaw. One of just seven MS66 Red coins in the combined certified population, four at NGC and three at PCGS, with none numerically finer at either service (11/08). (#2081)

### Full Red MS66 1866 Indian Cent
### Eagle Eye Certified

**3603** **1866 MS66 Red NGC.** Eagle Eye Photo Seal. This magnificently struck Premium Gem displays pale reddish-tan color that is vaguely suggestive of a copper-nickel cent. The surfaces are devoid of any mentionable defects. Light die clashing is evident on each side, most notably between the tips of the feathers in the headdress and on the inside of the right portion of the wreath. The obverse die was deeply hubbed, and the devices and legends are boldly outlined, as made. The 1866 is scarcer than the 1864 and 1865 issues, and full red Gems are irrefutably rare. Census: 1 in 66 Red, 0 finer (11/08). (#2087)

## Sharp 1869 Cent, MS66 Red

**3604** **1869 MS66 Red NGC.** A large portion of the 1869 Indian Head cent mintage (6.420 million pieces) was apparently released into circulation at the time of issue, as the nation was still emerging from the coin shortage of the Civil War, and there were real needs for coinage in the channels of commerce. Additionally, relatively few pieces were saved, as the fairly large mintage resulted in no special attention given to the date by collectors.

The orange-gold surfaces of this Premium Gem are laced with wisps of light green, crimson, and sky-blue. A precise strike sharpens the design features, including strong detail in all four diamonds and in the feather tips. Both sides are devoid of mentionable contacts or unsightly spots. Census: 2 in 66 Red, 0 finer (11/08). (#2096)

## Astonishing 1902 Cent, MS68 Red
## The Finest Certified

**3605** **1902 MS68 Red NGC.** Both sides of this incredibly vibrant orange-gold example are ablaze with satiny luster and totally void of unsightly blemishes. Although slight weakness is noted at the tips of the Indian's feathers—typical for the issue—this example possesses an above average strike as evinced by the bold shield details and complete dentilation. This is as close to a perfect Indian Cent as one is likely to find. As of (11/08), NGC has certified only one 1902 cent at the MS68 Red level, with—unsurprisingly—none finer. More astonishing is the fact that both services combined have only certified five coins at this lofty grade in the entire series (1864-1909). Certainly a fleeting opportunity to purchase one of the very finest examples of this popular issue.

*Ex: The Rarities Sale (Bowers and Merena, 8/1998), lot 44 where it realized $5,060; Central States Signature Sale (Heritage, 5/2005), lot 5234 where it realized $10,350.* (#2213)

A 15% BUYER'S PREMIUM ($9 MIN.) APPLIES TO ALL LOTS.

## Desirable High Grade Six-Piece Set of 1909-Dated Cents, MS65 to MS67 Red

**3606 Six-Piece 1909-Dated Cent Set MS65 to MS67 Red PCGS.** All but one of the cents bear a CAC sticker on their PCGS holders. A rare opportunity to acquire all major varieties of 1909-dated cents in high grade in one fell swoop. The set includes:

**1909 Indian Cent MS65 Red PCGS. CAC.** This beautiful sun-gold Gem has a powerful strike, and the fields are remarkably devoid from marks. Even the cheek has only trace contact, and since the obverse is nearly carbon-free, the grade is limited solely by a few tiny flecks on the reverse.

**1909-S Indian Cent MS65 Red PCGS. CAC.** The low mintage and key date Gem has rich orange-gold color. The strike is precise, and since abrasions are virtually absent, only the occasional minuscule carbon fleck on the reverse prevents a finer grade. Housed in a green label holder.

**1909 VDB Lincoln Cent MS67 Red PCGS. CAC.** This fire-red Superb Gem has imposing eye appeal and outstanding cartwheel luster. A strong loupe is required to locate the few microscopic imperfections. Exactingly struck except for the center of the VDB initials.

**1909-S VDB Lincoln Cent MS66 Red PCGS. CAC.** A wonderful Premium Gem with dazzling luster and an essentially unabraded obverse. The canary-gold fields and devices appear smooth, and the reverse has only a couple of tiny flecks. Fully struck, even on the VDB initials. A traditional series key, due to its low mintage and numismatic importance.

**1909 Lincoln Cent MS67 Red PCGS.** A practically pristine Superb Gem whose lovely peach-gold and lime surfaces are virtually bereft of both carbon and contact. Well struck at the centers, with unimportant inexactness seen on peripheral elements.

**1909-S Lincoln Cent MS66 Red PCGS. CAC.** Original blends of olive and pumpkin-orange grace this lustrous and impeccably preserved piece. Meticulously struck, and the reverse appears pristine, as does the obverse save for pinpoint flecks near the profile. A popular low mintage first-year branch mint issue. (Total: 6 coins)

# PROOF INDIAN CENTS

## Splendid PR67 Cameo 1862 Indian Cent

**3607** **1862 PR67 Cameo NGC.** Even though the mintage for proofs from this year is not substantially higher than that for other years in the copper-nickel series, the 1862 is significantly more available. Most likely this is because a hoard of approximately 200 pieces that surfaced many years ago. Few, however, can rival the sheer visual appeal of this wondrous coin. The fields are nicely, but not deeply reflective with significant frost over the devices, giving the coin its cameoed appearance. The obverse has an even, light red color while the reverse retains much of the original "whiteness" of the copper-nickel alloy. Census: 4 in 67 Cameo, 1 finer (11/08). (#82259)

## Shimmery 1862 Cent, PR67 Cameo

**3608** **1862 PR67 Cameo PCGS.** An amazing Cameo representative of this desirable copper-nickel proof cent, the glorious surfaces would stand for nothing less than a Superb Gem grade. There is not a single distracting blemish, and the shimmering fields form a splendid backdrop to the crisp, fully brought up devices. A few isolated swirls of orange tinged iridescence interrupt the otherwise honey-tan coloration. As of (11/08), PCGS reports only three 1862 Indian cents at the PR67 Cameo grade level, and, not surprisingly, there are none finer—a statistic that has not changed in the past several years. One should be able to trace the pedigree of this important specimen by a small, out-of-the-way planchet flaw (as produced) at 12 o'clock on the obverse rim. (#82259)

## Magnificent 1864 Indian Cent Copper-Nickel, PR67 ★ Cameo

**3609** **1864 Copper Nickel PR67 ★ Cameo NGC.** In 1864, most proof sets included the copper-nickel cent, as they were the first coins made that year. Only a few additional sets and singles sold in the middle months had bronze proofs, and those sold at the end of the year included proofs with the designer's initial, L.

Copper-nickel Indian cents with cameo contrast are few and far between, especially in Superb Gem quality. This amazing piece has frosty light tan devices, with deeply mirrored fields. Both sides have rose and gold toning that becomes more vibrant near the border. Census: 2 in 67 Cameo, 0 finer (11/08). (#82265)

## Stunning 1895 Cent, PR67 Red

**3610** **1895 PR67 Red PCGS.** Per Rick Snow's *Guide Book of Flying Eagle and Indian Head Cents,* three of the five known 1895 proof cent dies display varying degrees of repunched dates. On the current offering, the 1 and the 9 in the date are boldly repunched. While such die anomalies are known to the issue, it certainly adds to the charm of this already magnificent specimen. Meticulously preserved, reflective fields shimmer around well defined design elements and, when viewed at a certain angle, the surfaces erupt as a powerful burst of orange-red coloration. As of (11/08), PCGS has certified only four 1895 cents at the PR67 level—regardless of surface designation—with none finer. (#2374)

## Fantastic 1909-S VDB Cent, MS66 Red Nearly as Struck 100 Years Ago

**3611** **1909-S VDB MS66 Red PCGS.** Uninterrupted luster flows over rich copper-red surfaces on both sides of this Premium Gem cent. The strike is bold with all details sharply defined, including the all-important designer's initials at the 6 o'clock reverse rim. Even with the aid of magnification, only a few trivial flecks can be found.

It was 100 years ago that the Lincoln cent made its debut. Since then, the series has been widely collected by even the most amateur of collectors, who quickly learn of the 1909-S VDB cent's legendary status. The example offered here has survived one century in nearly the same condition as the day it was struck. The result is exceptional eye appeal without the multi-fold price increase of the next grade increment. Only nine pieces have been graded finer as of (11/08). (#2428)

## 1909-S VDB Cent, MS66 Red

**3612** **1909-S VDB MS66 Red NGC.** The smooth, golden-orange surfaces of this lovely Premium Gem are free of all but the most minute contact evidence. Lincoln's coat and bow tie are well struck, and there is complete separation of the shirt and coat all the way to the back of Lincoln's neck, one of the marks of a well-struck example of this key date. The reverse similarly offers no visible softness on any of the devices, and all three periods show in the designer's initials. A tiny scrape appears under a loupe above the O in ONE, mentioned for accuracy but undistracting. Census: 41 in 66 Red, 1 finer (11/08). (#2428)
***See: Video Lot Description***

## Centennial 1909-S Lincoln Cent, MS67 Red

**3613** **1909-S MS67 Red NGC.** Everyone would agree that the 1909 San Francisco cent issue with Victor D. Brenner's initials on the reverse is more famous than the unsigned version. However, it must be noted that more 1909-S VDB cents have been certified than its 1909-S cousin. The reason could be attributed to the fact that more of the prior cents were saved due to early publicity, or that there's a greater incentive to certify the rarer issue. Whatever the case may be, the population at NGC and PCGS is similar for both issues in the higher Mint State grades.

Lightly variegated orange-red and lime hues streak across both sides of this Superb Gem cent. The example offered here is one of only three certified at the MS67 Red level by NGC, with none finer (11/08). Housed in a wide, older generation holder. (#2434)

## Enchanting Red Gem 1914-S Cent

**3614** **1914-S MS65 Red PCGS.** Though its close proximity to the 1914-D key date has left the 1914-S cent underrated throughout most of its lifetime, recent years have seen a greater appreciation of it among series enthusiasts as a condition rarity, particularly in mid-level Mint State grades with fully Red surfaces. The present representative offers considerable rouge and honey-orange luster with a certain degree of fire. Carefully preserved central devices are boldly executed, and the fields are smooth. A lovely Gem, housed in a green label holder. Population: 32 in 65 Red, 3 finer (11/08). (#2476)

## Scarce 1919-S Cent, MS65 Red

**3615** **1919-S MS65 Red PCGS.** Despite its very high mintage of nearly 140 million pieces, desirable 1919-S Mint State cents are in short supply. David Lange writes of this issue in his *The Complete Guide to Lincoln Cents* that: "Most are from heavily worn dies, while the planchet stock used (as with most S-Mint cents from this decade) precluded the survival of many pieces with bright, mint red."

Lange appears to be pretty much on target in his assessment. PCGS and NGC have graded fewer than 210 fully Red Mint State 1919-S cents, the vast majority through MS64. The current Gem offering displays orange-gold luster, imbued with traces of light green, more so on the obverse. The design elements are better defined than is usually seen for this issue, though the right side of the right wheat stalk is weak. Some light grade-consistent marks are noted, as are a few minute reverse flecks. Population: 21 in 65 Red, 1 finer (11/08). (#2521)

## Gorgeous 1922-D Cent, MS66 Red Tied for Finest Certified

**3616** **1922-D MS66 Red PCGS.** Since 1793 the Philadelphia Mint has produced a one cent piece in 214 different years missing only 1815 and 1922. In 1815, coinage production was limited to quarters, half dollars, and half eagles. In 1922, coinage in Philadelphia was limited to silver dollars, double eagles, and Grant commemorative half dollars and gold dollars. Meanwhile in Denver only cents and silver dollars were minted. This green-label PCGS Premium Gem is an excellent representative of the Denver cent coined that year, with highly lustrous and brilliant orange fields that framed the pinkish devices. Population: 10 in 66 Red, 0 finer (12/08). (#2539)

## Desirable Select Mint State No D Strong Reverse 1922 Cent

**3617** **1922 No D Strong Reverse MS63 Brown NGC.** FS-401, formerly FS-013.2. Die Pair 2. A remarkable example of this conditionally rare key date variety. The Strong Reverse No D cent is always available for a price in Fine through XF, but Select Uncirculated pieces are seldom encountered. Evenly toned chocolate-brown, and fully defined where obverse die wear permits. Both sides shimmer with satin luster, and prolonged evaluation beneath a glass fails to locate any visible abrasions. A beautiful and important example certain to see animated floor bidding. Census: 10 in 63 Brown, 2 finer as Brown (11/08). (#3285)

## Bright Orange-Red MS64 1926-S Lincoln Cent

**3618** **1926-S MS64 Red PCGS.** This is an extremely important offering for the Set Registry collector and is just one of several important condition rarities in the series. Nearly every branch-mint Lincoln cent from the 1920s is rare with full red color. The condition rarity of the '26-S is legendary among collectors. Only two pieces have been certified as MS65 (one at each service), and the PCGS MS65 Red coin we sold in our FUN Sale two years ago realized an astonishing $149,500. With this in mind one can easily see the value represented by a high-end MS64 Red coin such as this one. Each side has highly attractive pale orange luster with only a few grade limiting blemishes. The next owner should be very pleased with this Choice coin. Population: 67 in 64, 1 finer (11/08). (#2575)

## Fiery MS66 Red 1928-D Cent

**3619** **1928-D MS66 Red PCGS.** A magnificent fire-red Premium Gem that boasts vibrant luster and exceptional preservation. Abrasions are essentially absent, and flyspecks are equally elusive. The strike is intricate, even on the usual trouble spots, Lincoln's shoulder and the O in ONE. Branch mint cents from the 1920s are notoriously difficult to locate in quality Mint State, but the present piece will satisfy even the most demanding collector. Sheltered in a green label holder, and struck from lightly rotated dies. Population: 11 in 66 Red, 0 finer (11/08). (#2590)

## Coveted Near-Mint 1969-S Doubled Die Cent

**3620** **1969-S Doubled Die Obverse AU58 PCGS.** Breen-2252, FS-101. The 1969-S doubled die cent is a variety of sufficient rarity that knowledge of authentic pieces' diagnostics has been essential from the start. In his "Detecting Counterfeits" column for the April 1, 1996 edition of *Coin World*, Michael Fahey pointed out an interesting set of diagnostics. Since all known 1969-S doubled die cents come from the same die *pair*, not just the same obverse die, the reverse can offer valuable clues as well:

> "Before being placed into service, the reverse die was rather harshly polished, leaving a number of strong die polish lines.
>
> Every genuine 1969-S Doubled Die cent I have seen has exhibited these raised lines, even the circulated specimens. The most easily seen are the two lines at the E of UNITED, the line through the M of AMERICA, and the lines that extend down from the lower edges of the R and I of AMERICA."

If the Mint worker who did the polishing on that die did such a poor job, if said worker handled the obverse, it is little wonder that the doubling, prominent as it is, went unnoticed.

The present example, primarily chocolate-brown, is temptingly close to a Mint State designation, but examination under a light reveals slightly deeper color on the high points that turns bright copper-gold when tilted. This effect is pleasing rather than a distraction. A handful of stray marks scattered on each side have little influence on the visual appeal. In sum, a highly desirable representative of this immensely challenging and increasingly popular *Guide Book* variant. Population: 7 in 58, 4 finer (11/08). (#2921)

A 15% BUYER'S PREMIUM ($9 MIN.) APPLIES TO ALL LOTS.

## Spectacular Full Red MS64 1969-S Doubled Die Cent, MS64

**3621 1969-S Doubled Die MS64 Red PCGS.** FS-028. In *The Cherrypickers' Guide to Rare Die Varieties*, Bill Fivaz and J.T. Stanton use a system of stars to assess demand for different varieties, ranging from one star for low-demand, minor variants to a stated high of five stars for bold and popular oddities such as the 1955 Doubled Die cent. The 1969-S Doubled Die Obverse listing shows six stars.

This important, interesting, and generally unavailable variety has one of the most surprising backgrounds in 20th century American numismatics. As described in several publications, counterfeit Doubled Die cents dated 1969 have appeared, and government agents confiscated any examples it came across. The legitimate 1969-S Doubled Die pieces were caught up in this dragnet; Fivaz and Stanton report that the coins were later authenticated by the Mint and returned, while Lange's *The Complete Guide to Lincoln Cents* states that the Mint destroyed at least a few of the S-mint coins. That early excitement greatly increased the notoriety of the 1969-S Doubled Die coins, though the population of survivors remains excessively low.

The piece offered here, however, has no such story of confiscation and redemption. In fact, its history is essentially blank until October 3, 2007, when collector Michael Tremonti discovered the coin in a heretofore-unsearched roll of 1969-S cents. As related by Ken Potter in a report for the October 29, 2007 edition of *Coin World*, the noted numismatist was understandably skeptical: " ... I just assumed that his find was one of the exceedingly common examples of strike doubling found on this date. ... I advised [Tremonti] of this, but he shrugged it off as not being what he found."

While Potter agreed to examine the coin, he was not expecting to find an actual Doubled Die: "Even though [Tremonti] sounded like he knew what he was talking about, I was still prepared to find an example of strike doubling. To my surprise, what I beheld was a Brilliant Uncirculated example of the 1969-S Lincoln, Doubled Die cent."

Interest in the 1969-S Doubled Die cents has increased dramatically in recent years, and prices have skyrocketed in tandem. A recent sale by Bowers and Merena included an MS64 Red and Brown example, which sold for $85,100, the current high price for this issue. Collector and dealer speculation has suggested that this representative might set a new record at auction. Among the authorities who have brought up the possibility is David Hall, one of the co-founders of certification service PCGS. His commentary, as printed in the November 13, 2007 edition of *Numismatic News*: "I was totally amazed that this coin could turn up out of nowhere. The coin is completely original and full mint red. ... What an incredible find! This could be a six-figure coin."

The shining surfaces of this important cent are fresh copper-orange with a triangular area of peach-umber behind Lincoln's head. The strike is crisp, and the peripheral elements of the obverse show this variant's characteristic doubling, with the effect most prominent at LIBERTY and the date. Though a handful of marks are present in the fields, the devices are attractively preserved, and the overall effect is tantalizingly close to an even finer designation.

The combined certified populations of NGC and PCGS show just three Choice 1969-S Doubled Die cents as the highest-graded examples, all of which were certified by the latter firm (11/08). One was graded as Red and Brown, while the other two (including the present piece) were graded as Red. This recent discovery, at the acme of desirability for this challenging Doubled Die, presents an important opportunity for the series specialist. (#2923)

***See: Video Lot Description***

# PROOF LINCOLN CENTS

## Outstanding 1909 VDB Cent PR64 Red and Brown

**3622** **1909 VDB PR64 Red and Brown NGC.** The original mintage of the 1909 VDB proof cent has been open to question for some time. David Bowers, writing in his 2008 *A Guide Book of Lincoln Cents*, says:

> "The mintage ... has been stated as 420 for many years. As researcher Roger W. Burdette and others have reported, figures for proof mintage of this era, particularly for the cent, nickel, and gold coins are subject to question. The mintage of 1,194 Matte Proofs has been suggested by Kevin Flynn. Although Mint data supports this suggestion, surviving examples, including the number seen by certification services, suggest that far fewer ever reached numismatic channels."

Along this vein, the 2009 *Guide Book* gives the "reported mintage" of the 1909 VDB proof cent as 1,194 pieces, but then says 400 to 600 are estimated to have been issued.

Irrespective of the number of 1909 VDB proof cents minted or issued, close to 150 examples in all three color designations have been certified by NGC and PCGS. This near-Gem specimen displays bright copper-gold surfaces imbued with traces of crimson, sky-blue, and tan. A penetrating strike delivers exquisite definition to the design elements, and close inspection reveals no significant contact marks or unsightly spots. This is an outstanding example for the aficionado of Lincoln cents, and will repose comfortably in a high grade collection. Census: 6 in 64 Red and Brown, 19 finer (10/08). *From The Omaha Collection.* (#3301)

## Gem Red and Brown Proof 1909 VDB Cent

**3623** **1909 VDB PR65 Red and Brown NGC.** David Lange points out in his *Complete Guide to Lincoln Cents* that the detection of proofs of this issue by sharpness alone is a risky business, since the business strikes of this date are also well produced. Nonetheless, there are a couple of die markers on the proofs that distinguish them. The woodgrain patina of this example makes detection of the obverse die markers difficult, but the extraordinary sharpness, not only of the squared-off rims and thick borders but the squared-off date digits and lettering, rule out business-strike status here—as does the diagnostic crescent-shaped die chip on the reverse, to the right of (UNU) M. A nice Gem with considerable luster and some mint red under the woodgrain. (#3301)

## TWO CENT PIECES

### John Work Garrett's MS65 Red Small Motto 1864 Two Cent Piece

**3624** **1864 Small Motto MS65 Red PCGS.** Ex: Garrett Collection. In its appearance in the Garrett auction, the present coin was cataloged as "MS-65. ... Both the obverse and the reverse are fully brilliant. The reverse shows traces of a fingerprint. A very beautiful specimen of this elusive variety. Any pristine, uncleaned two-cent piece is difficult to find."

Although the PCGS Population is 17 in MS65 Red with three finer (11/08), this figure likely includes resubmissions, since we are locate only two prior auction appearances in the present decade as PCGS MS65 Red, a March 2005 ANR example and another as lot 256 in our recent Dallas Signature, which realized $21,850. Housed in an oversized "Premium" PCGS holder from the early to mid 1990s.

*Ex: 189th Auction, Thomas L. Elder, 2/1923; Garrett Collection, Sale I (Bowers and Ruddy, 11/1979), lot 220.* (#3581)

***See: Video Lot Description***

## THREE CENT SILVER

### Rare PR66 1857 Three Cent Silver

**3625** **1857 PR66 NGC.** Ex: Pittman. Pre-1858 proof three cent silver is rare. Akers in 1997 estimated that only 40 to 50 proof 1857 three cent silvers are known. The flashy mirrors and razor-sharp strike of the present specimen leaves no doubt concerning its status as a proof. The outlines of the shield are fully brought up, as are the centers of each tiny star that adorns the reverse margin. Attractively toned with delicate autumn-gold and jade-green on the obverse, while the reverse is peach aside from a brilliant center. Flawless except for a couple of trivial mint-made strike-throughs on the Roman columns. Census: 5 in 66, 3 finer (11/08).

*Ex: 91st Sale, Barney Bluestone, 2/1946; John Jay Pittman Collection, Part One (David Akers, 10/1997), lot 407.* (#3704)

## SHIELD NICKEL

### Lightly Toned 1883/2 Gem Five Cent

**3626** **1883/2 MS65 NGC.** FS-013.1. The underdigit 2 is plainly visible to the left of the 3 under a loupe. Visible without a loupe is a wide network of die breaks, including one passing through the 3, through the ball of the shield and over the date; another beginning at the rim to the left of the left arrow and extending upwards through the left side of the coin; a third beginning at the I and extending through the cross of the shield to the first T in TRUST; a fourth connecting the rim to the N; and a fifth above the U. With this many visible breaks, it is certainly conceivable, indeed likely, that this is the terminal die state for this desirable overdate, and while the die used to strike the coin may have had its better days, the coin itself is a lustrous, no-questions Gem. The attractive tan-gray surfaces reveal a minimum of abrasions and a strong, if not quite full, strike, with weakness confined to portions of the obverse motto. A fine representative of this desirable variety, with the added numismatic interest of the late die state.
*From The Scott Rudolph Collection.* (#3814)

## PROOF SHIELD NICKELS

### Breathtaking 1866 Rays Five Cent PR67 Cameo

**3627** **1866 Rays PR67 Cameo PCGS.** This is an absolutely breathtaking type coin that represents the first year of issue for the five-cent nickel piece. The surfaces are essentially perfect, as one can infer from the extremely high grade given this piece. The fields are predictably deeply reflective, with intense mint frost over the devices. Although the coin presents as untoned, close examination reveals a hint of pale pastel-golden color, slightly more noticeable on the obverse. Perfect for the collector of high grade type or a date collector who must have only the best. Population: 3 in 67 Cameo, 0 finer (9/08).
*From The Scott Rudolph Collection.* (#83817)
***See: Video Lot Description***

## Popular PR64 1867 With Rays Nickel

**3628** **1867 Rays PR64 PCGS.** There is little room to dispute that the 1867 With Rays is the rarest of the proof Shield nickel issues, though how much rarer it is than its nearest rival (likely the proof-only issue of 1877) remains open to interpretation. The traditional mintage figure of 25 specimens, reprinted in the *Guide Book* as an estimate with the possibility for more and elsewhere as a hard number, is almost assuredly incorrect, since the dedicated collector should be able to trace at least 25 distinct representatives of the issue on his or her own.

Various sources suggest 50, 60, 75, 100, or even more pieces as more plausible production figures; in addition, recent research by John Dannreuther suggests that an initial batch of 15 examples was the "original" production run for the proof issue and that all other pieces known are restrikes. Certain other collectors have argued for an even more extreme version, that *none* of the 1867 With Rays proofs were struck in that year, making this issue the Shield design's version of the 1913 Liberty Head nickel.

Whatever the truth, specimens such as this Choice piece will continue to be in high demand for the foreseeable future. Elegant nickel-blue patina drapes the present coin's considerable mirrors, and the strike is razor-sharp, even on the often-weak reverse stars. Though a few faint hairlines hidden under the toning preclude a finer designation, the overall eye appeal is grand. Population: 16 in 64, 20 finer (11/08). (#3818)

***See: Video Lot Description***

## Outstanding 1867 Shield Nickel
## Rare "With Rays" Variety
## PR65 Cameo

**3629** **1867 Rays PR65 Cameo NGC.** Poor striking quality plagued the shield nickel design from its inception. The copper-nickel alloy was extremely hard, and caused problems with metal flow in the deeper recesses of the design. The alloy's hardness also caused excessive die wear and breakage. Each die was only good for about 10,000 strikes, compared to almost 400,000 strikes for Morgan dollar dies. To help solve these problems, A. Loudon Snowden and James Longacre removed the rays from the reverse design early in 1867. Snowden wrote to Mint Director Millward, proposing the change take effect on February 1, 1867, but the exact date of the change is uncertain. This measure had the desired result, and striking quality was much improved on the Without Rays issues.

The mintage of 1867 With Rays proof Shield nickels is unknown. It is generally accepted that the coins were produced in both original and restrike issues, but records for either mintage are nonexistent. John Dannreuther has estimated perhaps 15 originals were struck, with three times that number produced as restrikes, in five different production runs. In *A Guide Book of Shield and Liberty Head Nickels,* Q. David Bowers states, "The 1867 With Rays Proof is a classic rarity. Probably no more than several dozen or so are known." The issue has been over-represented in population reports, with many duplicate submission events.

The present coin is a delightful specimen of this rare issue. The fields are reflective and free of distractions. The strike is unusually sharp for this design, exhibiting crisp detail on all design elements. NGC has awarded this specimen the coveted Cameo designation. Overall eye appeal is outstanding. Census: 4 in 65 Cameo, 3 finer (12/08). (#83818)

A 15% BUYER'S PREMIUM ($9 MIN.) APPLIES TO ALL LOTS.

## LIBERTY NICKELS

### Lightly Toned, Key Date 1885 Nickel, MS66

**3630** **1885 MS66 PCGS.** The 1885 is the key date among regular-issue Liberty Head nickels. It is scarce in circulated grades, and rare in Mint State (David Bowers, *A Guide Book of Shield and Liberty Head Nickels*).

This Premium Gem example is a fully struck piece with lovely soft golden toning, joined by subtle highlights of lilac on the obverse and powder-blue on the reverse. As one would expect from an MS66, there are no mentionable marks on either side. A terrific opportunity for the Liberty nickel collector. Population: 15 in 66, 2 finer (9/08).
*From The Scott Rudolph Collection.*
***See: Video Lot Description*** (#3846)

### Vibrant 1894 Five Cent, MS67 One of Two Finest Certified

**3631** **1894 MS67 NGC.** The 1894, with a business strike mintage of 5,410,500 pieces, is among the lowest for the Liberty Head nickel series. NGC and PCGS have certified a fair number of coins through the Gem level of preservation, after which the population drops precipitously. The MS67 specimen in this offering is tied with one other for the finest certified

Scintillating luster and original apricot and salmon-pink toning adorn both sides of this magnificent piece, each of which is nicely preserved. Precisely struck except for the first two stars. Actually, the design elements exhibit a much better than average strike, as Liberty's hair and the left side of the wreath, areas that are typically very weak, display relatively strong definition.
*From The Scott Rudolph Collection.* (#3855)

## PROOF LIBERTY NICKEL

### Sumptuous PR66 Deep Cameo 1891 Nickel

**3632** **1891 PR66 Deep Cameo PCGS. CAC.** Gloria Peters and Cynthia Mohon, in their *Complete Guide to Shield and Liberty Head Nickels,* say of the 1891 proofs, with a mintage of 2,350 pieces, that "This date will be tough to find in Gem condition." The PCGS/NGC data, however, would seem to indicate that examples through PR65 are somewhat available. In Deep Cameo, on the other hand, the 1891 is a rarity.

The PR66 Deep Cameo offered in this lot displays amazing white-on-black contrast when the piece is observed from an overhead angle. An occasional wisp of light gold-tan color occurs at the margins, and the design elements are crisply struck. A couple of minuscule flaws do not detract in the least from this outstanding piece. Population: 2 in 66 Deep Cameo, 0 finer (11/08).

*From The Scott Rudolph Collection.* (#93889)

***See: Video Lot Description***

## BUFFALO NICKELS

### Imposing, Condition Rarity 1913 Type One Nickel, MS68

**3633** **1913 Type One MS68 PCGS. CAC.** Ex: Larry Shapiro. 1913 Type One nickels are readily available through Premium Gem, and even MS67 pieces can be located with patience and searching. The current offering, however, is one of just a dozen that PCGS has certified as MS68, the highest quality seen by either NGC or PCGS. Both sides exhibit a crisp strike with intense mint frost beneath pleasing gold, ice-blue, and lavender toning. The surfaces have a matte-like texture, typical of all Type One nickels (David Lange, *The Complete Guide to Buffalo Nickels*). As expected, immaculate preservation prevails throughout. This is a most imposing coin, well deserving of the CAC green label.

*From The Scott Rudolph Collection.* (#3915)

***See: Video Lot Description***

## Key Date 1913-S Buffalo Nickel Type Two, MS67

**3634** **1913-S Type Two MS67 NGC.** The 1913-S Type Two Buffalo nickel, with the buffalo standing on a thinner mound of grass with a straight line at the base, is the first acknowledged series key, and one that is popular and available in all grades, from the many low-grade circulated pieces available at coin shows to the Gems that are occasionally available, albeit for a price.

In MS67 grade, however, this piece is tied with a half-dozen other examples at NGC and PCGS combined for the finest certified (and likely the finest known, as it is extremely unlikely that there are any uncertified examples so fine remaining undiscovered, ungraded, and unauthenticated of this elusive issue). Splendid lilac and hazel low points accent the golden high points on the obverse, and the reverse offers lilac and golden coloration throughout. The coin appears to be an early die state, as it lacks the "beard" die clash that so many later examples show. Both sides are expectedly free of distractions, and the strike is excellent for the issue. Census: 6 in 67, 0 finer (11/08). (#3923)

## Stunning 1913-S Type Two Five Cent, MS67

**3635** **1913-S Type Two MS67 NGC.** James Earle Fraser made his only contribution to America's circulating coinage in 1913, when his Buffalo nickel design made its debut. Once the pieces made their way to circulation, Fraser's inclinations as a sculptor and a medalist ran afoul of coinage needs: the denomination FIVE CENTS, raised on a mound at the lower reverse, was prone to wearing away. The Mint moved to redesign the pieces, and the bison stood on flat ground for the new Type Two nickels, which made their debut late in the same year.

This is a simply stunning example of the 1913-S Type Two nickel, widely known as one of the most elusive Buffalo nickels, particularly in high grades. The strike is considerably above-average, particularly on the Indian's braid and bison's shoulder. Impeccably preserved surfaces exhibit wonderful luster with a thin veneer of champagne patina. Census: 6 in 67, 0 finer (10/08).
*From The Scott Rudolph Collection.* (#3923)
***See: Video Lot Description***

## Appealing 1915-D MS67 Five Cent

**3636** **1915-D MS67 NGC.** While the Type One Buffalo nickels of 1913 were saved in quantity, by 1915, far fewer pieces were saved for their novelty, and Gem and better representatives of the branch mint issues for that year are challenging. Pleasing luster and delicate peach and gold patina greatly enhance the visual appeal of this noteworthy and exquisitely preserved nickel. Lange offers words of caution about the 1915-D, calling it "the first date from the Denver Mint in which weakness of strike becomes a factor." On this piece, however, the bold detail on both sides rises above all but the most petty criticism. The only Superb Gem graded by NGC, with just three such pieces across both major services and none finer at either (10/08).
*From The Scott Rudolph Collection.* (#3928)
***See: Video Lot Description***

## High Grade 1916/16 Nickel, AU55

**3637** **1916 Doubled Die Obverse AU55 NGC.** FS-101, formerly FS-016. The lower left obverse is widely die doubled, with the most dramatic offset on the date. Curiously, this major variety was not discovered until 1962, and did not command a significant premium for more than a decade afterward. Since that time very few examples have turned up in any grade, and high grade coins are especially difficult to locate. Only 10-12 coins are believed known today in Uncirculated condition with perhaps twice that many in the various grades of AU. This is a gray example with pronounced areas of reddish patina. Ample luster is seen on each side, and there are no mentionable abrasions. One cannot fault the lack of high point detail as no 1916/16 nickels are known with complete definition. Otherwise, the surfaces are virtually fault-free with no mentionable abrasions on either side. This is an important opportunity for the Buffalo nickel specialist to acquire what is very likely the rarest coin of the 20th century that is generally included as part of a regular U.S. series.
*From The Scott Rudolph Collection.* (#3931)
***See: Video Lot Description***

## Excellent Choice AU 1916 Doubled Die Obverse Nickel

**3638** **1916 Doubled Die Obverse AU55 PCGS. CAC.** FS-101, formerly FS-016. In his March 15, 2005 "Item of the Week" column for *Numismatic News*, Paul M. Green discussed the 1916 Doubled Die Obverse nickel (referred to in the column as the "1916/16" since the date is the location of the most prominent doubling). Two paragraphs encapsulate how the 1916 Doubled Die Obverse nickel, a *Guide Book* variety which went undiscovered for more than 50 years, was worn nearly into oblivion:

> "With no one checking, the 1916 Buffalo nickel simply began to circulate. What must be remembered is that it was a 1916/16 [noting the prime focal point of the doubling] and that is critical, because as Buffalo nickels saw use in commerce, the very first part of the design that disappeared was the date.
>
> The evidence of that is overwhelming, as by the 1950s, it was possible to buy rolls of Buffalo nickels that had lost their dates. The rapid disappearance of all or part of a date is absolutely devastating when you are looking for a 1916/16, yet this is precisely what happened, meaning that no matter what the potential supply of 1916/16 nickels was, a large number were simply lost."

The fortunate collector who first discovered this piece, which circulated only briefly before being pulled out of the channels of commerce, found a miniature treasure. Luminous nickel-gray and olive-gold surfaces show scant evidence of wear, and the strike is solid. Though a few wispy parallel marks are present on the portrait, these are not readily seen without magnification, and the coin displays attractively to the unaided eye. The all-important date is boldly doubled. For the variety, Population: 19 in 55, 9 finer (11/08). (#3931)

A 15% BUYER'S PREMIUM ($9 MIN.) APPLIES TO ALL LOTS.

## Prized MS62 1916 Doubled Die Obverse Nickel

**3639 1916 Doubled Die Obverse MS62 PCGS.** FS-101, formerly FS-016. The image of the doubled date on the 1916 Doubled Die Obverse nickel has been a fixture in the *Guide Book* for years, and today, even collectors who have only casually browsed that reference would be able to identify the variety. As bold as the doubling is, though, the 1916 Doubled Die Obverse was not always so recognizable. In fact, for more than four decades after its creation, the variety remained incognito, and even the earliest published report (based on a submission by California collector Herbert S. Perlin in *Numismatic Scrapbook* magazine, July 1962, according to David Lange's *The Complete Guide to Buffalo Nickels*) did little to inspire collector interest. As Lange later notes, "Not until it was described and illustrated in the September 1976 issue of the *Coin Dealer Newsletter Monthly Summary* did this coin gain proper recognition." A *Guide Book* listing followed, and the rest is history, or rather, a history of almost continually increasing appreciation, in both the numismatic and the fiduciary senses. By then, however, the vast majority of known survivors had experienced circulation to some degree, unlike those doubled dies that were popular almost from the time of release, such as the prominent 1955 and 1995 cent varieties.

It seems strange that so obvious a doubled die would escape detection for so long, but by surveying the certified population data, one can appreciate just how elusive the variety is, which goes a long way toward explaining how the 1916 Doubled Die Obverse went unheralded for the better part of six decades. Looking at the PCGS *Population Report*, as of (11/08), there are a total of 138 examples certified in all grades, with a relatively even distribution among Very Good, Fine, Very Fine, Extremely Fine (with both XF40 and XF45 taken into consideration), and About Uncirculated (again, when all AU grades are combined).

A comparison to the data for the 1916 nickel without the variety reveals several interesting results. PCGS has graded 2,217 of the non-variety pieces, with only handfuls of examples in each grade until AU58, which shows the first substantial population concentration. Most pieces are Select, Choice, or Gem, reinforcing the variety's selection bias toward high end examples, as opposed to the 1916 Doubled Die Obverse nickel, which justifies the price of certification regardless of grade. PCGS has graded over 2,000 Mint State 1916 nickels, compared to just five (three in MS62 and two in MS64) of the 1916 Doubled Die Obverse nickels in the same grade range. One can imagine the multitudes of circulated 1916 nickels that have never been certified, and when one considers the circumstances of the 1950s, with few examples hiding among the survivors from an original mintage of nearly 63.5 million pieces, the third-largest production run in the series, it is little wonder that the 1916 Doubled Die Obverse nickel proved to be a late discovery.

The piece offered here, though graded MS62, exhibits substantially better eye appeal than that designation might suggest. Each side offers soft but delightful luster beneath rich, captivating patina. The obverse shows a crescent of gold at the left with nickel-blue, violet, and mint-green shadings elsewhere, while the reverse displays similar colors with a smaller golden crescent to left. The strike is pleasing, and the surfaces are minimally marked save for a handful of inoffensive stray abrasions in the busy areas of the central devices. All factors considered, an important, outstanding representative of this fascinating and dramatic variety.

## Magnificent 1916 Doubled Die Obverse Nickel, MS64

**3640 1916 Doubled Die Obverse MS64 PCGS.** FS-101, FS-106. While certain older references describe this legendary Buffalo nickel variety as a "doubled date" variant, the source of the doubling is not from repunching, as likely would have been the case were this a 19th century piece, but is the result of hub doubling. The nature of the doubling is Class V, or Pivoted Hub Doubling, in John Wexler's taxonomy. To quote *The Authoritative Reference on Buffalo Nickels*, written by Wexler, Ron Pope, and Kevin Flynn, "Pivot hub doubling occurs when a die is pivoted about a point near the rim during rehubbing. Because the point of the pivot is near the rim, the spread of doubling will be the strongest at the point directly opposite the pivot point and will decrease as you move away from that point."

In the case of the 1916 Doubled Die Obverse nickel, that pivot point is somewhere between 1 and 2 o'clock on the obverse, within the letters of LIBERTY. As a consequence, that word shows no doubling to the unaided eye, being too close to the pivot to show anything but a microscopic spread. Moving away from that particular area, however, doubling is widespread across the rest of the devices, from a small shift visible at the Indian's brow and lips (most examples show doubling below the nose as well, though this piece does not, likely due to die polishing), to more dramatic doubling on the feathers and braid. The most dramatic doubling of all appears directly across from the pivot point; happily for this variety, that area contains the digits of the date and the lower hair ribbons, both of which exhibit the characteristically bold doubling that has attracted collectors since the variety became widely publicized in the mid- to late 1970s. Wexler *et al.* note that the 1916 Doubled Die Obverse variety " ... actually has a wider spread on the date than the 1955 Lincoln cent doubled die obverse."

The 1916 Doubled Die Obverse nickel is coveted by collectors, almost regardless of condition, since it rates as a URS-9 according to most sources, with between 126 and 250 pieces known. Even low-grade pieces with the date completely worn away, identified by the residual doubling on the hair ribbons, command substantial sums. (Such a state is more common than one might think; the date, exposed as it was at the base of the portrait, wore quickly. A similar, contemporaneous occurrence took place with the Standing Liberty quarter.)

Naturally, as grade increases, so does rarity and price. Lower and mid-range circulated pieces appear in the numismatic marketplace with some frequency, but they are ready sellers, whether in dealers' cases or on the auction block. Extremely Fine and About Uncirculated coins are borderline condition rarities. Regarding Mint State examples, David Lange's *The Complete Guide to Buffalo Nickels* notes that as of 2006, "Mint state examples of this variety are extremely rare and number fewer than ten."

Since then, a handful of other certification events have appeared in the combined certified population, but whether these represent new discoveries is open to question. Even after decades of intense searching, only a handful of unworn 1916 Doubled Die Obverse nickels have turned up, and the likelihood of previously unknown survivors turning up decreases with each passing year. Neither NGC nor PCGS has certified an example of this variety finer than MS64, with NGC acknowledging five pieces and PCGS grading just two (11/08). Heritage sold the first of the PCGS coins at our September 2005 Long Beach auction, and with the arrival of this piece, we shall have had the privilege of offering both MS64 coins known to that service.

The present example is delightfully, dramatically toned with centers that are generally light nickel-gray and colorful yellow, gold-orange, peach, and rose margins. The obverse shows traces of mint-green near the rims, while on the reverse, elements of golden-brown grace parts of the bison. Smoothly lustrous with few flaws overall, though small, identifying abrasions are visible on the portrait's nose and at the hair above and to the left of the braid. Absolutely spectacular eye appeal, entirely worthy of a coin that has few rivals within its widely collected series.

*From The Scott Rudolph Collection.* (#3931)

***See: Video Lot Description***

## Highly Attractive 1916-D Nickel, MS66

**3641** **1916-D MS66 NGC.** Perusal of NGC/PCGS population data reveals that the 1916-D nickel is available through the near-Gem level of preservation. MS65 coins are more challenging, and anything finer is rare. Indeed, no pieces have been certified above MS66.

This Premium Gem displays a veneer of attractive gold toning over fully lustrous and frosty surfaces, imbued with hints of rose and sky-blue. The design elements are somewhat better struck than usually seen on this issue, including full definition on the central braid. Both faces are impeccably preserved. Census: 4 in 66, 0 finer (10/08).

*From The Scott Rudolph Collection.* (#3932)

***See: Video Lot Description***

## Bright 1917-D Five Cent, MS66

**3642** **1917-D MS66 PCGS.** Both sides of this Premium Gem have satiny surfaces with bright luster beneath pleasing light gold toning. The overall strike is exceptional for this issue, of which David Lange (2006) says: "Nearly all examples seen suffer from poor detail definition. This is due in large part to ... die erosion." The date and LIBERTY, for example, both seem to jump off the surrounding field, and the horn and tail are strong. The surfaces are pristine with only a few tiny flecks on the reverse. PCGS and NGC have certified fewer than 20 Premium Gems, and none finer (10/08).

*From The Scott Rudolph Collection.* (#3935)

***See: Video Lot Description***

## Fantastic Near-Gem 1918/7-D Nickel

**3643** **1918/7-D MS64 NGC.** A nationwide minor coin shortage during the last two years of World War I led to most cents and nickels disappearing from circulation, and accordingly the U.S. Mint began an unprecedented output of those coins in an effort to alleviate further shortfalls. Mintages of the Lincoln cent jumped from 56 million pieces in 1915 (all mints) to 190 million pieces in 1916 and to 284 million pieces in 1917.

Meanwhile the Buffalo nickel emissions leapt from 30 million coins in 1915 to 89 million pieces in 1916, to 65 million coins in 1917, and to 45 million coins in 1918 between Philadelphia, Denver, and San Francisco. In the midst of this flurry of hub-, die-, and coin-making, it is little wonder that dies from both 1917 and 1918 would be in preparation during the waning months of 1917. One of those 1917-dated dies was inadvertently hubbed after annealing with a 1918-dated hub, creating this rare overdate.

Most surviving examples of this issue are well circulated, so that the average grade of those coins is only Very Good. Only in 1930 was the first mention made of the variety, even though the overdate is startlingly obvious. According to the Lange reference (2006), only later in that decade did collecting Buffalo nickels by date and mint-mark really catch on, by which time the existing specimens of this rare variety had been in circulation nearly 20 years. Most were quite worn. Lange speculates that "accounting for possible resubmissions of the same coins to grading services, it's likely that about two dozen or so [Uncirculated pieces] have survived." As of this writing NGC has certified 32 Mint State pieces, while PCGS adds 49 pieces. Both of those figures likely include multiple resubmissions, so that Lange's estimate appears to be in the ballpark.

This specimen shows delightful lilac-blue patina over problem-free surfaces that offer good luster and enormous eye appeal. The downstroke and the top crossbar of the 7 are both quite bold inside and over the 8, as on all high grade examples. A strong coin worthy of a premium bid. Only six finer examples appear in the combined certified population, three at NGC and three at PCGS (9/08).
*From The Scott Rudolph Collection.* (#3939)
***See: Video Lot Description***

## Elusive 1918-S Gem Five Cent

**3644** **1918-S MS65 NGC.** Specialists have long recognized the 1918-S as the rarer of the two mintmarked issues from this year. It is rarely seen with complete definition on each side. This piece shows well above-average sharpness on the reverse, while the obverse is typically a bit soft on the Indian's hair above the knot. Bright mint frost covers each side with an overlay of attractive pale champagne-gold and ice-blue patina. Just a couple of minor bagmarks are seen, none worthy of singular mention. The "beard" clash mark below the Indian's chin is from the motto on the reverse, an interesting foible that several early S-mint Buffalo issues show. An elusive and in-demand Gem. Census: 13 in 65, 2 finer (10/08).
*From The Scott Rudolph Collection.* (#3940)
***See: Video Lot Description***

## Appealing, Condition Rarity 1919-S Nickel, MS65

**3645** **1919-S MS65 PCGS.** Enormously appealing, with a light bluish-gray patina on the obverse, with tinges of gold at the rim, and a light gold cast on the reverse. The obverse strike is pleasingly bold, with good details on the Indian's hair and LIBERTY. The reverse shows the usual weak strike, although die erosion is also suspected, as numerous heavy die flow lines are noted in the fields. The horn is sharp, but much of the hair detail on the buffalo's back and head is soft. The reverse luster is radiant, while the obverse luster is somewhat diffuse (because of the toning). Despite the technical issues, this piece nonetheless has abundant eye appeal, and is decidedly rare in Gem grade. Population: 31 in 65, 2 finer (10/08).
*From The Scott Rudolph Collection.* (#3943)
***See: Video Lot Description***

A 15% BUYER'S PREMIUM ($9 MIN.) APPLIES TO ALL LOTS.

## Lightly Toned 1923-S Gem Five Cent

**3646** **1923-S MS65 PCGS. CAC.** David Lange notes in *The Complete Guide to Buffalo Nickels* that despite its relatively small mintage (6.142 million pieces), the 1923-S nickel is available in all grades short of Gem. PCGS and NGC have graded forty or so MS65 coins, and fewer than five finer. This Gem specimen displays light golden-gray color resting upon lustrous surfaces. The design elements are better struck than usually seen on the issue, though minor softness in seen in portions of the hair on the bison's head. Significant marks are absent. Population: 31 in 65, 2 finer (10/08).
*From The Scott Rudolph Collection.* (#3950)
***See: Video Lot Description***

## Sharply Struck MS65 1924-S Buffalo Nickel

**3647** **1924-S MS65 PCGS.** Among Buffalo nickels from the 1920s, the 1924-S has the second-lowest production, greater than only the key 1926-S. In addition, Lange (2006) grants them a tie for first place for the most elusive issue in Mint State. This satiny Gem has rich honey and slate-gray patina over each side and is surprisingly mark-free with only the barest trace of carbon. The strike is razor-sharp throughout the margins, and only a touch of softness is noted on the Indian's braid. The obverse displays this issue's often-found "chin whiskers" die clash and the corresponding impression of the Indian's chin on the opposite side, near the motto. An excellent candidate for the Registry collector who insists upon the finest. PCGS has awarded a higher grade to only one coin (4/07).
*From The Scott Rudolph Collection.* (#3953)
***See: Video Lot Description***

## Radiant 1925 Nickel, MS67
## None Finer

**3648** **1925 MS67 PCGS.** The 1925 Buffalo nickel, with a mintage exceeding 35 million pieces, is readily available in all grades short of Gem, and even the latter can be located with some patience and searching. This issue becomes more challenging in Premium Gem, and is rare any finer. PCGS and NGC have certified a mere 10 pieces in MS67, and none higher.

This Superb Gem displays radiantly lustrous surfaces bathed with a veneer of light champagne-gold color. The design elements reveal a sharp strike, including crispness on the date, LIBERTY, the horn, and tail. Impeccably preserved, with no mentionable contacts or flecks. Population: 6 in 67, 0 finer (10/08).
*From The Scott Rudolph Collection.* (#3954)
***See: Video Lot Description***

A 15% BUYER'S PREMIUM ($9 MIN.) APPLIES TO ALL LOTS.

## Exceptional 1925-D Five Cent, MS66

**3649** **1925-D MS66 NGC.** The 1925-D Buffalo nickel has the reputation of being a challenging coin that is difficult to locate in well struck condition. David Lange, in his *Complete Guide to Buffalo Nickels* treatise, writes: "Well struck examples may be found but are rare in all grades. Even Mint State coins may show little or no sign of the bison's horn, while very few have complete horns. Some 1925-D nickels are known with the E in FIVE filled, and all are characteristically weak in the first two numerals of the date."

David Bowers, in his *A Guide Book of Buffalo and Jefferson Nickels*, categorizes 1925-D nickels according to sharpness of design details: Weak, 33%; Typical, 44%; Sharp, 20%, and Full, 3%.

The Premium Gem we present in this lot displays above average striking characteristics. The horn is bold and pointed, and the date and all of the lettering are sharp. The only softness we discern occurs on portions of the hair on the heads of the Indian and bison, but these are minor. Overall, we rank this particular coin within Bowers' "Sharp" category. Highly lustrous, well preserved surfaces appear untoned to the naked eye, but magnification reveals whispers of pastel iridescent sky-blue, gold, rose, and light green. A truly exceptional '25-D!

As a point of interest, we mention that the Museum of Connecticut History possessed several high grade 1925-D nickels, along with the 1924-D. Dozens were sold by Heritage in its June 1995 Long Beach auction. Census: 11 in 66, 0 finer (10/08).

*From The Scott Rudolph Collection.* (#3955)

***See: Video Lot Description***

## Colorful Gem 1925-S Nickel

**3650** **1925-S MS65 NGC.** Ex: Pittsburgh Collection. Blushes of fire-red, sky-blue, lemon, and lime-green enrich this coruscating and essentially immaculate Gem. A good strike with the expected minor softness on peripheral elements such as LIBERTY and the curve of the tail. The borders exhibit an orange-peel texture, typical of long-in-use dies, but the mintmark can be identified. Like other branch mint issues from the 1920s, the 1925-S is scarce in VF and higher grades. Uncirculated examples are desirable, and Gems are coveted by advanced collectors attempting to assemble high grade sets. Census: 20 in 65, 1 finer (11/08).
*From The Scott Rudolph Collection.* (#3956)
***See: Video Lot Description***

## Splendid, Sharp Premium Gem 1926-D Buffalo Nickel

**3651** **1926-D MS66 PCGS.** This sumptuous Premium Gem is one of the distinct minority of examples of this strike-challenged issue that are *not* weakly struck. The 1926-D has a reputation that is notorious even in this series, which is replete with softly struck mintmarked issues. While such notoriety is a thrice-told tale, we would mention that here, the tie holding the braid together is complete and the hair above nearly so, LIBERTY and the date are bold, while on the reverse the horn is sharp and the hair on the buffalo's shoulder well-detailed if not complete, and the tail is faintly split. Although short of a full strike, the piece is head and shoulders above most examples. The splendid patina, in shades of lavender and ice-blue, adds to the stunning appeal. Registry Set collectors, this piece is worth seven points in the PCGS Circulation Strikes Basic Set—and there is only one certified finer, currently residing in the top-rated set. Population: 23 in 66, 1 finer (11/08). (#3958)

A 15% BUYER'S PREMIUM ($9 MIN.) APPLIES TO ALL LOTS.

## Incredible Superb Gem 1926-D Nickel

**3652** **1926-D MS67 NGC.** According to Lange's *The Complete Guide to Buffalo Nickels*, the 1926-D is an elusive issue in Mint State grades, though not so rare as its background as a mintmarked 1920s issue might suggest, since a degree of hoarding took place in the years immediately following its release. Much of this hoarding took place after a delay in distribution for the pieces; while the earlier years of the Great Depression created a backup of coinage, including minor coinage, in bank vaults, increased prosperity in the later 1930s meant that roll quantities suddenly surfaced.

Lange also speculates that the population of " ... certified coins would likely be higher if not for the fact that the poor quality of most uncirculated 1926-D nickels discourages submissions." Indicators of this poor quality that he notes include a weak strike (evident on the bison's horn, often either flat or missing) and poor luster, which he terms "average or below average" in most cases, or with "subdued brilliance."

As one of just three MS67 examples in this issue's combined certified population (two graded by NGC and one by PCGS) with none finer, this Superb Gem ranks among the most important representatives known (9/08). Even at a glance, the innate quality of this coin is readily apparent. Luster that is strong for the issue shines through nickel-blue patina with crescents of mustard-gold at the left obverse and reverse. The strike is pleasing, and only a trace of softness is visible on the always-weak shoulder of the bison. Marvelous all-around eye appeal.

*From The Scott Rudolph Collection.* (#3958)

***See: Video Lot Description***

## Lustrous 1926-S Five Cent, MS64

**3653** **1926-S MS64 PCGS. CAC.** Golden-brown streaks cross this lustrous and unabraded near-Gem. The mintmark is sharp, and the grade is only limited by the strike, which is nonetheless is relatively strong for this characteristically softly defined issue. The 1926-S is famous for its mintage of 970,000 pieces, the lowest of any regular issue Buffalo nickel. The scarcity of the 1926-S in Mint State ensures its status as the regular issue series key. As of (10/08), PCGS and NGC combined have certified just 17 pieces in MS65, and two coins finer. The overall eye appeal confirms the CAC green label.
*From The Scott Rudolph Collection.* (#3959)
***See: Video Lot Description***

## Crisp 1927-S Gem Five Cent

**3654** **1927-S MS65 NGC.** Bluish-gray centers are imbued with traces of rose, and surrounded by pale gold, rose, and ice-blue toning. The strike is crisp, particularly on LIBERTY, the mintmark, and the reverse legends. A hint of softness is seen on the base of the date and on the hair directly above the Indian's braid. Lustrous surfaces are devoid of significant marks. Only 3,430,000 pieces were struck, and most went directly into circulation. Uncirculated survivors are concentrated in the MS62 to MS64 grade range, with few achieving status as a Gem. Census: 18 in 65, 5 finer (10/08).
*From The Scott Rudolph Collection.* (#3962)
***See: Video Lot Description***

## Beautiful 1930-S MS67 ★ Five Cent

**3655** **1930-S MS67 ★ NGC.** The mintage of the 1930-S Buffalo nickel was a moderate 5.435 million pieces, in line with several other S-mint emissions of the series. Regardless of the sufficient mintage, this piece is a most special coin, as it is the only piece to receive *both* an MS67 grade *and* Star designation from NGC. Each side is intensely toned with vibrant crimson, gold, blue, and red in perfectly organized concentric rings, with radiant luster beneath. The strike is bold for the date and mint, and the surfaces are quite clean. One must wonder if a more beautiful and desirable Buffalo nickel of this date *could* exist. *From The Scott Rudolph Collection.* (#3970)
***See: Video Lot Description***

## Popular Premium Gem
## 1937-D Three-Legged Nickel

**3656** **1937-D Three-Legged MS66 NGC.** The Three-Legged variant for the 1937-D Buffalo nickel has been popular almost since the time of issue and in every grade imaginable. Regarding availability of this variety, Lange writes: "Mint state coins are scarce but sometimes available. They turn up at coin shows less often than their certified population would suggest, due to an unceasing demand. Choice examples are scarce, gems rare."

Another aspect to the scarcity is where the pieces were released; while the coins were recognized as unusual by collectors, most deliveries of the pieces were made to Montana, as reported by Aubrey Beebe in a letter to *The Numismatic Scrapbook Magazine*, quoted by Lange. Mr. Beebe wrote that while traveling with his wife in the American West, they encountered several dozen examples of the variety which they extracted from circulation in Montana. Later, when they "toured Idaho, Washington, Oregon and other western states ... the only 3-legged Buffaloes ... found were in the possession of collectors."

Certainly, this delightful survivor must have been saved early, to be in such pristine shape. Both sides offer soft, swirling luster that is uncommonly pleasing for this variety. It is pleasingly detailed for its advanced die state and offers light gold-gray toning across each side with occasional hints of pink. Though the variety's natural die flaws are in full force on this Premium Gem, the post-striking quality is virtually unimpeachable. NGC has certified only one higher-graded example, and PCGS knows of only four coins in MS66 with none finer (9/08). *From The Scott Rudolph Collection.* (#3982)

## EARLY HALF DIMES

### Interesting 1792 Half Disme
### Judd-7, Flattened (XF Details)

**3657 1792 Half Disme, Judd-7, Pollock-7, R.4—Flattened—PCGS Genuine.** Almost exactly the size of a 1796 dime, when we first saw this coin over a year ago we thought it might be a special coin. It has XF45 Details, and when one considers it has been flattened it is surprising how much definition there is on this piece, with the details as balanced and even as would be seen on a normally circulated coin. In last year's FUN auction, several experts spotted this coin in an unqualified PCGS holder and commented that it had been flattened. It seemed illogical but examination showed that the coin was indeed wider than a normal half disme, so PCGS bought it off the market in a deal negotiated with our consignor, then re-consigned it to this auction.

Most likely over two centuries ago, this piece had apparently been placed between two pieces of leather then meticulously and lightly struck with a mallet. It was wide enough to pass as a disme or an early dime. The diameter of a half disme is approximately 17 mm, while a disme measures approximately 22 mm. This coin has a diameter of 20 mm. So, after flattening it was closer to the diameter of a disme than a half disme.

All that considered, this is an unusually pleasing half disme. The flattening does not appear to have materially affected any of the design elements. The hair of Liberty and the eagle's breast feathers are significantly stronger than one usually sees, leading us to the conclusion that the flattening must have occurred shortly after it was produced. There is a curved scratch through LF and to the eagle's right (facing) wing, and there is also an area of planchet cracking on the lower left portion of the reverse. Otherwise, the surfaces are unremarkable for a half disme and the coin only shows the small marks one would expect. Both obverse and reverse are light gray with deeper gray accents in the recesses and brightness over the high points. All in all, this is a remarkable half disme with an interesting story to tell. (#11020)

## Gem 1792 Half Disme
## One of the Finest Examples Known of This Historic Issue

**3658** **1792 Half Disme, Judd-7, Pollock-7, R.4, MS65 NGC.** For the past 150 years, these coins have intrigued collectors as well as Mint officials. Much has been written about the origins of the half dismes, some of it embellishment, some outright fabrication. The real breakthrough in research seems to have come in the past ten years, the results of which were published in the ANS' *American Journal of Numismatics 15"* for 2003. In that article, the authors, Joel Orosz and Carl Herkowitz, explore all aspects of the production of these first official United States coins. The article, "The Fabled 1792 Half Dimes," is well worth the effort for anyone interested in early U.S. coinage. The authors discovered an obscure reference to a tipped-in note that was discovered in a European coin book in 1943 and the contents of the note were subsequently published in *The Numismatist*. A subsequent misinterpretation of the author of the note by Charles McSorley, Jr. led to one of the major pieces of misinformation regarding the 1792 half dismes. McSorley misidentified the author of the note as officer and refiner in the Mint, Jonas R. McClintock. The signature was faded and only read J—Mc—. Orosz and Herkowitz identified the actual author of the note as John McAllister, Jr., a fascinating individual who was a close friend of Adam Eckfeldt, who was present at the striking of the 1792 half dismes. The actual content of the tipped in note reads,

> "In conversation with Mr. Adam Eckfeldt (Apr 9, 1844) at the Mint, he informed me that the Half Dismes above described, were struck, expressly for Gen. Washington, to the extent of One Hundred Dollars, which sum he deposited in Bullion or Coin, for the purpose. Mr. E. thinks that Gen. W. distributed them as presents. Some were sent to Europe, but the greater number, he believes, were given to friends of Gen. W. in Virginia. No more of them were ever coined. They were never designed as Currency. The Mint was not, at the time, fully ready for being put into operation. The Coining Machinery was in the cellar of Mr. Harper, saw maker, at the corner of Cherry and 6th Sts, at which place these pieces were struck."

While the facts in the note above may have been well known to a small group in the mid-1840s, later retellings of the story stretched and greatly enhanced the basic facts until the present day, when it is still believed by many that Martha Washington was the model for the figure of Liberty, the coins were struck from Washington's Sheffield silver plate, only $75 worth of coins were struck, and that George and Martha were in attendance when the coins were presented. Skipping to the end of this masterful article, Orosz and Herkowitz conclusions are:

- The half dismes were not struck from sterling silver or silver-plated tableware but rather, as Eckfeldt states, from bullion or coin.
- The half dismes survive today at an unusually high rate, consistent with early presentation to at least some degree.
- The amount struck (1500 pieces or $75) is consistent with an initial deposit of $100, with the loss due to preparation.
- After the planchets were prepared, they were deposited with the cabinet officer in charge of the Mint. Jefferson personally delivered the blanks to the Mint to be struck, and the struck coins were returned to his care.
- Jefferson recorded all transactions regarding the 1792 half dismes as private records, not public records.

As noted above, numerous half dismes were handed out as favors by George Washington, while others were shipped to Europe. This particular piece must have been highly prized by its owner, as it is in essentially the same condition as when it left John Harper's saw shop 113 years ago. The only difference is the addition of multiple layers of gray, blue, and golden toning over each side. Magnification shows a few light abrasions, but none that are worthy of individual mention. The striking details on the obverse are stronger than on the reverse. Also worthy of note is the absence of the planchet flakes that are usually seen on half dismes. This is one of the finest pieces known of this historic issue. NGC has only graded one other piece MS65 with two finer, while PCGS has certified one Gem with three finer (11/08). (#11020)

## Richly Toned 1794 Half Dime, AU58 V-4, LM-4

**3659** **1794 AU58 NGC. CAC.** V-4, LM-4, R.4. Four varieties are known for half dimes dated 1794, coins that were all struck early in 1795, according to Mint records. It was not until March 1795 that the first half dimes were delivered by the chief coiner to the Mint treasurer. In the past, some have speculated that the coins were actually struck in 1794 but not delivered until March 1795, but standard operating procedure at that time precludes such a possibility. When a deposit of silver was made at the Mint, coins were minted as soon as possible and returned to the depositor in a timely manner, thus no coins sat around the Mint for months without a claim. This pleasing piece has vibrant gold, teal, and blue toning with underlying proof-like surfaces and only a trace of wear on the high points. An upper-end example of this important first-year issue. (#4250)

## Pleasing V-3, LM-3 1794 Half Dime, MS62

**3660** **1794 MS62 PCGS. CAC.** V-3a, LM-3, R.4. The die pair distinguished by the reverse, which has the lowest leaf to the left away from the center of the U in UNITED and two berries parallel to the I in UNITED. This variety is very scarce in an absolute sense, and high-end examples especially so. Previously offered as part of the Medio Collection, wherein it was described in part as "Choice and appealing for the grade." With its originality, sharp strike, sumptuous blue and violet color, and vibrant underlying luster, the present cataloger has no reason to disagree. Excellent eye appeal that is best appreciated in-hand. For all varieties, Population: 8 in 62, 42 finer (11/08). *Ex: Medio Collection (Stack's/ANR, 6/04), lot 2610.* (#4250)

## Bold 1795 Flowing Hair Half Dime
## V-4, LM-10, MS64

**3661** **1795 MS64 PCGS.** V-4, LM-10, R.3. The cud affecting TY of LIBERTY through star 9 confirms this piece as a late die state example of LM-10. Heavy clash marks were removed by lapping, which also reduced the depth of some design features, such as the obverse stars. A peculiar planchet defect—technically a minor lamination—extends from the rim, through star 1, and terminates at the lower hair. The flaw is inoffensive and, at first, resembles a more familiar die break. As a result of the reduced metal in the aforementioned area, a minor depression is observed from between the 7 and 9 in the date to star 1.

This piece is well struck for the variety and refreshingly original. Soft, satiny luster reveals traces of semiprooflikeness in the fields of this beautifully preserved relic from the early days of our first Mint. Population: 20 in 64, 17 finer (11/08).
*From The James Mossman Collection.* (#4251)

## Appealing 1795 Half Dime
## MS64 V-5, LM-8

**3662** **1795 MS64 PCGS.** V-5, LM-8, R.3. A mintage of 78,660 half dimes was achieved in 1795. This mintage was divided into 10 different die marriages, most of them quite scarce. The coin offered here is a representative of the LM-8 variety, characterized by the position of star 1 between curls 1 and 2 on the obverse and the wreath with no berries under the left wing of the eagle on the reverse. The LM-8 variety is one of the more available marriages, and is a popular choice with early type collectors. The coin's availability is explained by its presence in a hoard of more than 100 Mint State Flowing Hair half dimes discovered in the 1870s.

The present coin is a tiny masterpiece, with an intricately detailed design and well preserved surfaces. Much original color remains on the centers, yielding to lilac and gold at the periphery. This example is a most appealing choice for the discriminating collector. Population: 20 in 64, 17 finer (11/08).
*From The Findley Collection.* (#4251)

## Marvelous 1795 Half Dime, V-4, LM-10, MS66 ★

**3663** **1795 MS66 ★ NGC.** V-4, LM-10, R.3. This is the Logan-McCloskey Obverse 8-Reverse G combination: On the obverse star 1 grazes the tip of star 2, and star 15 connects with the forward bust truncation. The base of the digit 1 is centered over two dentils with its top flag touching the bust, as does the top right of the 5 in the date. The I in LIBERTY is below the adjacent B, and TY are close at their tops. On the reverse there is no inner berry under the eagle's left (facing) wing, while the one outer berry extends nearly to the N in UNITED. The upper right serif of the I in UNITED connects to the lower tip of the left wing.

This is the sole use of this obverse die, which apparently clashed early with the reverse and was subsequently lapped, leaving the peripheral stars on the obverse with a "spindly" appearance. This is a late-state coin: The die crack above TY and star 9 has here formed into an extensive retained cud that extends from the left side of the upright of T to halfway between stars 9 and 10. There are numerous wispy die cracks among and around each of stars 9 through 15.

The present coin also encapsulates the single use of Reverse G, although here the dies seem to be in a relatively earlier state than the obverse shows. A small die crack runs from the rim above the D in UNITED through two leaves.

Although a couple of small adjustment marks are noted in the center obverse, they pale in comparison to the wealth of detail apparent throughout both sides. The hair curls are sculptural in their definition, and the central reverse betrays mentionable softness only on the center eagle's breast and the top of the left (facing) wing, far more detailed than normal.

Both the notable lack of contact and the marvelous original rim toning, in shades of gold, sky-blue, and cinnamon, with untoned silver centers, more than merit the Star designation for exceptional eye appeal.

## Stellar 1795 Half Dime, MS67 ★, V-4, LM-10
## Given as a Birthday Present in 1795?

**3664** **1795 MS67 ★ NGC.** V-4, LM-10, R.3. A very late die state with a fully developed cud from the T of LIBERTY to star 9. Weak dentilation and an atrophied star 1 are evidence of repeated die lapping, probably to remove clash marks and hide die cracks. According to our research, this is the latest state of LM-10, which was also the final die marriage in this issue's emission sequence.

For decades a story regarding a small cache of 1795 half dimes has been told, embellished, and recounted many times. Not surprisingly, it was Dave Bowers who set the record straight—or at least provided all known information regarding the hoard in a scholarly manner—in his 1997 *American Coin Treasures and Hoards*. Bowers indirectly cautions numismatists of the various spins that Walter Breen put on the tale between the early 1950s and the late 1980s. The earliest account of this mini-hoard was in W. Elliot Woodward's sale of the John F. McCoy Collection in May 1864. As such, reports that the hoard came out hiding in the 1870s, or even 1880 as suggested by Breen, are almost certainly erroneous. The same goes for the misnomer "Wadsworth-Rea hoard," which also originating with Breen.

It is believed that a young lady by the name of Rea received a small group of freshly minted half dimes in 1795, reportedly as a birthday present. As the story goes, Rea retained possession of the Flowing Hair coins possibly as late as the early 1860s, at which time they were sold to an unknown numismatist. Woodward apparently got involved shortly thereafter, as evinced by the appearance of one piece in his May 1864 auction. As Bowers notes, "the quantity has been estimated at from a dozen or so up to 100 pieces," the latter figure being another Breen concoction.

Of course it is not possible to state with absolute assurance that the current offering was part of Rea's hoard. However, based on the die variety, LM-10, the low population totals of MS67 survivors, and the stunning state of preservation, chances are that this splendid little half dime was part of her birthday present in 1795. A study of this issue suggests that the majority of the cache comprised LM-9 and LM-10 variants. Interestingly, we have had the privilege of auctioning three 1795 half dimes at the MS67 level during the past 15 years, and all were of different varieties: one each of LM-7, LM-8, and LM-9. The piece offered here—LM-10—completes the sequence. All three of the past specimens realized six-figure prices except for the July 2003 sale of the LM-9 coin, which "only" realized $94,875. Of course that was over five years ago. More recent appearances of MS67 Flowing Hair half dimes have witnessed more dramatic results. For example, a PCGS-certified LM-9 realized $184,000 in the January 2007 Orlando Sale by Stack's.

This specimen is as eye appealing as it is well preserved. Liberty's silver-gray bust is framed by a sea of variegated ultramarine and amber iridescence on the obverse. The reverse coloration is dominated by russet and golden centers, with a blend of emerald, electric-blue, and chartreuse peripheral toning. Rich, unbroken luster illuminates the toning and the resulting eye appeal is breathtaking. Rea would be proud to know that her prized half dimes are as treasured today as they were to a young birthday girl in 1795. (#4251)

## Beautiful Near-Gem 1796 LIKERTY Half Dime, V-1, LM-1

**3665 1796 MS64 PCGS.** V-1, LM-1, R.3. The more available of the two die varieties for this issue, though scarce in its own right, known in the *Guide Book* as the LIKERTY variation for the breaks near the vertical stroke at the upper and lower loops of the B. Interestingly, there are more *Guide Book* entries for this issue than there are die marriages; the 1796, 6 Over 5 corresponds to the V-2 or LM-2 and the 1796 LIKERTY is the V-1 or LM-1. These are the only two die varieties established for the year and denomination, leaving the "plain" 1796 entry sandwiched between the two an enigma.

The year 1796 marked the half dime's transition from the Flowing Hair obverse to the Draped Bust design, a shift that took place a year earlier for the half dollar and dollar, the other silver denominations then in production. With a stated mintage of just 10,230 pieces split between the two 1796 half dime varieties, it is little wonder that the date as a whole is scarce in an absolute sense, nor does it come as a surprise when Logan and McCloskey describe both variants as "usually seen well worn."

Such truths make the existence of coins such as the present near-Gem all the more remarkable. Its luster is gorgeous, and the strike is remarkably bold on the fine details of Liberty's hair. Ice-blue, violet, and russet shadings are dominant, but occasional elements of light silver-gray glimmer at the margins. A remarkably appealing representative that is easy to appreciate. For all 1796 half dime varieties combined, Population: 4 in 64, 4 finer (11/08).

*From The James Mossman Collection.* (#4254)

## Attractive 1797 Half Dime 16 Stars
## MS62, V-4, LM-2

**3666** **1797 16 Stars MS62 NGC.** V-4, LM-2, R.4. Obverse: the first 7 in the date is small, and centered over a dentil; the second 7 is large, and centered between two dentils; crack from rim to star 8 and between stars 7 and 8. Reverse: there are two inner berries and one outer berry; first leaf extends to center of N in UNITED; shallow rim cud over ME of AMERICA. Russell Logan and John McCloskey (1998) indicate that this scarce die marriage is difficult to locate in Mint State.

Medium grayish-blue patina covers both sides of this MS62 example. Most of the obverse design elements display strong definition, except for the usual softness in the lower middle part of Liberty's hair. The peripheral reverse elements are sharp, while most of the eagle's plumage is typically incomplete. Devoid of mentionable contact marks. Clash marks are visible in the lower right obverse field. This is a highly attractive early half dime.
*From The Findley Collection.* (#4259)

## Lustrous 1800 Half Dime
## MS63, V-1, LM-1

**3667** **1800 MS63 PCGS.** V-1, LM-1, R.3. A gorgeous early Draped Bust half dime with full details on Liberty's hair, strong stars, and some bluntness on the drapery. The Heraldic Eagle reverse has excellent definition with the exception of the eagle's breast, the base of the right facing wing, and the clouds between S and O. Both sides have brilliant silver luster with satiny surfaces. Faint lilac and gold toning is especially evident at the borders, with splashes of pale blue accompanying. This is an excellent example of the variety, almost certainly within the Condition Census.
*From The James Mossman Collection.* (#4264)

## Rare V-3 1803 Small 8 Half Dime, XF40

**3668** **1803 Small 8 XF40 PCGS.** V-3, LM-1, R.6. The 1803 Small 8 half dime is one of the great unheralded rarities in U.S. numismatics. It is significantly rarer than the Large 8. PCGS has certified just 11 pieces in all grades, the lowest as AG3, and the single finest as MS63. The strike definition on this XF40 example is bold throughout, aside from minor bluntness on the bust truncation and the pair of clouds directly opposite. The dove-gray, golden-brown, and aqua-blue toning is both light and attractive. Lightly abraded for the grade, the overall appearance is pleasing, but to identify the piece for future researchers, we note a thin vertical mark in the hair beneath the E. Early silver specialists will certainly recognize the significance of the present opportunity. Population: 2 in 40, 3 finer (11/08). (#4270)

## SEATED HALF DIME

### 1838 V-8 Half Dime, MS68 ★
### One of the Finest Known

**3669** **1838 Large Stars, No Drapery MS68 ★ NGC.** V-8. A stunning Superb Gem. As of (11/08), only two examples of this date have been certified at the seemingly unobtainable grade of MS68 at NGC, with one such piece at PCGS. The other NGC MS68 coin has crossed Heritage's auction block twice: the first time in our January 2007 FUN sale where it realized $23,000, and then again in our August 2008 Baltimore ANA sale, where the price paid increased dramatically to $37,375. In our previous descriptions of the other MS68 1838 half dime, we noted that it was the only one of the two thus graded to receive the coveted ★ designation by NGC. The other MS68 coin—the piece offered here—was also awarded a ★, even though the latest NGC *Census Report* shows one with and one without the designation. This is simply an error.

Astonishingly, both Superb Gem specimens have similar appearances, being awash in a sea of electric-blue and amber iridescence. At first glance, they appear to be the same coin, but closer examination reveals that they are only cousins; the coin offered here is attributed as V-8, whereas the other is a V-11 variant. Considering their amazing state of preservation and incredibly similar toning pattern, one can only wonder if they both originated from the same vintage collection.

Well defined features, mark-free surfaces, and radiant luster define the technical grade, while a combination of the aforementioned qualities and the aesthetically pleasing coloration explains the ★ notation on the NGC label. The attribution of this V-8 specimen is confirmed by the potion of star 1 to the rock on the obverse and a die crack from the reverse rim through the left side of M in AMERICA. Partial dentilation from 6 o'clock to 12 o'clock on the reverse is common to the issue. Census: 2 in 68 ★, 0 finer (11/08). (#4317)

## PROOF SEATED HALF DIME

### Attractively Toned 1855 Arrows Half Dime, PR66

**3670** **1855 Arrows PR66 NGC.** No official or recorded mintage exists for the 1855 Arrows proof half dime. In this regard, Al Blythe (1992) says that proofs are "unverified." Walter Breen, on the other hand, in his 1989 proof coin *Encyclopedia*, lists 12 appearances. David Akers (1997), estimates 50 to 60 1855 Arrows half dimes were struck for inclusion in 1855 proof sets, with perhaps 25 to 30 coins known today. The latter figure more or less correlates with the 25 pieces certified by NGC and PCGS.

Splashes of low intensity sky-blue, lavender, and golden-grown patina adorn this Premium Gem specimen. An attentive strike sharpens the design elements, whose frosty surfaces stand out against the reflective fields. Both sides have been well cared for. Census: 7 in 66, 0 finer (12/08). (#4433)

## EARLY DIMES

### Colorful 1796 Dime AU53, JR-4

**3671** **1796 AU53 PCGS.** JR-4, R.4. The TY in LIBERTY touch at the peak of the letters, and the first star is distant from the curls. A pair of berries below the upright of the E in UNITED further confirms this scarce die marriage.

Whispers of purple, electric-blue, and golden-brown patina concentrate at the margins of this AU53 example, being somewhat more extensive and deeper in hue on the reverse. The central reverse is silvery in color, while that on the obverse reveals traces of light tan. Liberty's hair and drapery exhibit sharp definition, as do most of the eagle's wing and tail feathers. The design features are well centered on the planchet, and all of the dentilation shows on both sides. The surfaces retain traces of luster in the recesses, and are only lightly marked. (#4461)

## Sharp 1796 Dime
## MS61, JR-1

**3672** **1796 MS61 PCGS.** JR-1, R.3. The following diagnostics identify this variety: a die cud break at star 1, digit 6 touches the bust, two leaf points under the left foot of the A in STATES, and five berries on the left branch, two of which are outer.

The luminous surfaces of this MS61 display medium intensity grayish surfaces splashed with reddish-brown. An attentive strike manifests itself with strong definition on the design features, with the sole exception of the usually-seen softness on the eagle's breast and legs. A faint hair-thin mark on Liberty's lower neck is concealed in the toning and barely visible. This is a very sharp coin for the designated grade. Housed in a green-label holder. (#4461)

## Impressive Near-Gem 1796 Draped Bust Dime, JR-6

**3673** **1796 MS64 NGC.** JR-6, R.3. There are two key diagnostics for this variety: (1) all of the letters in LIBERTY are separated, and (2) there is a thick die crack that extends horizontally through 17 in the date. In this later state of the dies, this crack lengthens to travel from the rim along the left side of 9, upward onto Liberty's neck, through the hair detail and the upper left obverse field to star 8. On the reverse, another prominent crack appears along the rim near 10 o'clock, angling diagonally downward between ST in STATES, through the left branch to the top of the eagle's left (facing) wing, across the right wing and branch to the left side of M, to the rim.

According to the John Reich Collectors' Society reference work on early United States dimes (1984), there were 10,244 examples of this die marriage produced: 3,864 pieces on February 28, 1797, and 6,380 coins on March 21, 1797. These JR-6 examples were struck in addition to the 22,135 pieces that constitute the official mintage figure for 1796-dated dimes, pushing the actual mintage number to 32,359 coins (this information is credited to researcher Robert P. Hilt II, among others). The authors estimate, further, that representatives of the JR-6 variety account for approximately thirty percent of all 1796 dimes extant.

This near-Gem is in a much better state of preservation than the usual survivors, which tend to appear in grades ranging from Good to Very Fine, and are often impaired by improper cleaning or other problems. Lovely electric-turquoise toning occurs near the peripheral regions, mingling with gold, rose, and violet iridescence. The design elements are sharply struck, save for typical softness on the eagle, and there are no readily visible marks or blemishes on either side of this impressive specimen. Census: 20 in 64, 21 finer (11/08).
*From The James Mossman Collection.* (#4461)
***See: Video Lot Description***

## Well Struck 1801 Dime
## MS61, JR-1

**3674** **1801 MS61 NGC.** JR-1, R.4. The JR-1 is the more frequently encountered of the two varieties from this year, constituting approximately two-thirds of the coins known. Attributed by the following: a spine from the tip of the curl to the E in LIBERTY, the R of that word is recut, star 12 on the reverse touches both beaks and almost touches the motto ribbon, arrow tips extend to center of left upright of N in UNITED, and the branch has five small berries, three of which are outer.

David Davis, et al. write in their *Early United States Dimes* reference that this variety is of the highest rarity in MS60 (not more than two known); VF30 or better specimens are scarce; and lower grades are readily available.

NGC and PCGS have certified approximately 75 1801 dimes (both varieties) in all levels of preservation, mostly in VF25 and below. The two services have graded eight Mint State coins.

This MS61 example displays considerable luster, especially the obverse. A well executed strike imparts strong definition to the design elements, including most of Liberty's hair and drapery, the eagle's wing and tail feathers, and clouds. The eagle's breast and neck reveal the usual softness. Mauve, gray, and blue fields accentuate the silvery devices, slightly more so on the obverse. A hair-thin mark on Liberty's portrait limits the grade. Scattered as-made die rust pimples do not detract. Census: 3 in 61, 3 finer (11/08). (#4471)

## Elusive Mint State 1802 Dime, JR-4

**3675 1802 MS60 PCGS.** JR-4, R.4. This is the fourth and most "common" variety of the 1802 dime, an issue that is very scarce to rare overall, with two of the four die marriages considered very rare to unique. The JR-4 die pairing mates the Obverse 2-Reverse D dies according to the authors' schema, with the obverse used only for this single dime variety: The tip of Liberty's back wave of hair atop her head is under the curves of the B in LIBERTY. Star 8 is relatively far from the Y in LIBERTY, which is evenly spaced and has no touching letters. The present piece is an early die state, with no trace of the later massive crack that would form from star 7 through the lower part of BE to the rim.

The reverse of this die pairing, however, is among the more famous and illustrious in early U.S. numismatics, having been used not only for the 1802 JR-4 and 1804 JR-1 die marriages among the dimes, but also for the 1802 BD-2 and 1804 BD-1 pairings among the quarter eagle denomination. The Mint used several different reverse dies interchangeably among the dime and quarter eagle denominations, as most notably collected by Ed Price, whose unique assemblage of dimes and quarter eagles produced from these dual-denomination dies we offered in Platinum Night of our July 2008 ANA Signature Sale.

The reverse of this dime was also used for the famous 1804 13 Stars dime and quarter eagle rarities, JR-4 and BD-1, respectively. The eagle's lower beak pierces star 12, and all three E's are missing their upper left serifs. The U is much closer, nearly touching an arrow shaft, than to the border. The first S in STATES is low. The arrows extend below the center of the left upright of the N. The 13 stars are arranged normally, with six in the top row and five below. Star 12 joins the upper and lower points of the beak, while star 13 is high above the scroll and pointing to the left upright of the U.

Although this piece is strictly Mint State, the MS60 grade, possibly conservative, is explained by the central strike weakness and somewhat subdued mint luster. The original surfaces show small areas that are still silvery, complementing areas of amber-gold and light blue toward the rims on each side. In MS60 this piece is probably near the lower end of the Condition Census for both the date and the variety. (#4472)

## Gorgeous 1802 JR-2 Dime, MS61
## The Finest Known

**3676** **1802 MS61 NGC.** JR-2, R.5. Any serious student of the Draped Bust dime series will immediately recognize that the example offered here is actually well struck, despite profound weakness in Liberty's face and an obvious lack of detail in the lower right quadrant of the reverse. The aforementioned poorly defined areas are the result of die deterioration. In fact, in this middle to late die state, a portion of the reverse die is sinking. The unintentional void created by the reverse die damage prevented proper metal flow and both sides were affected.

Despite its inopportune beginnings—being the product of a crippled die—this example boasts considerable eye appeal. The surfaces are pleasantly original and possess a semiprooflikeness that has been observed on other late die state, high grade JR-2 survivors. Amber hues dominate both sides of this Mint State piece while attractive electric-blue iridescence clings to the devices throughout. A marvelous display!

Disregarding the four individual varieties of this date, NGC has certified only five Uncirculated examples of 1802 dimes: three in MS61 and two at the MS62 level (11/08). However, this is believed to be the finest known and only Mint State 1802 JR-2 dime extant. It was part of our July 2008 sale of the Ed Price Collection, as noted on the NGC label. For that auction catalog, Ed Price offered the following personal commentary: "This has always been one of my favorite coins in the collection. The weak obverse die state is a wonderful example of the varied output of the first U.S. Mint."

*Ex: Robinson Collection (Stack's, 2/1982), lot 979; William L. Subjack (1/1992); Ed Price Collection (Heritage, 7/2008), lot 1430.* (#4472)

## Rare Choice VF 1804 Dime
## 13 Reverse Stars, JR-1

**3677** **1804 13 Stars on Reverse VF35 PCGS.** JR-1, R.5. What a difference a year makes. Two die varieties each are known for the 1804 and 1805. However, the 1805 is plentiful, at least by the standards of Heraldic Eagle dimes, as suggested by its recorded mintage is 120,780 pieces. Compare that figure with the 1804 production of 8,265 pieces, and the rarity of the 1804 is obvious. In fact, the two 1804 varieties, JR-1 and JR-2, are both listed as R.5, the same rarity factor as the famous 1802 half dime. JR-1 and JR-2 each receive a separate *Guide Book* listing due to different reverse star counts. This gunmetal-gray and chestnut-tan representative has pleasing hair definition and lacks any singularly mentionable marks. Population: 2 in 35, 6 finer (12/08). (#4474)

## Nearly Brilliant MS64 1807 Dime, JR-1

**3678** **1807 MS64 PCGS.** JR-1, the only known variety, R.2. This workhorse die had previously been used to strike 1805, 1806/4, 1806/5, and 1807 quarter eagles. Then well over 100,000 dimes of this date were produced from the same die pairing. As a result, the 1807 is the most frequently encountered Draped Bust Heraldic Eagle dime. Several dozen examples were set aside in high grade. Virtually all show the same die clashing in the right obverse field and weakness on the stars on the left portion of the obverse. Nevertheless, the surfaces on this piece display bright mint luster throughout and the striking definition is strong (except on the left obverse stars as mentioned). Nearly brilliant, there are just a couple of streaks of light golden color on each side. Population: 20 in 64, 8 finer (11/08). *From The James Mossman Collection.* (#4480)

## BUST DIMES

### Spectacular 1820 Large 0 Dime JR-11, MS66

**3679** **1820 Large 0 MS66 PCGS.** JR-11, R.3. The T in UNITED is high, and this serves to identify this variety. Each side has a tiny center dot, located below Liberty's ear on the obverse and on the left center of the horizontal shield lines on the reverse. Dies from this era were laid out using a compass, and the compass point, depressed on the die, is raised on all pieces that were struck from it. According to the standard reference for the series, the John Reich Collector Society's *Early United States Dimes,* JR-2 and JR-3 are the Small 0 varieties, while JR-8, JR-9, and JR-13 are Large 0 varieties. On JR-11, the digits 20 in the date are roughly the same size, although both are larger than the preceding digits 18. This meticulously struck Gem has flashy semiprooflike luster and exceptionally clean surfaces. Dusky golden-brown patina encroaches upon the centers of this otherwise untoned example. The dies are slightly rotated counterclockwise. Population: 6 in 66, 2 finer (11/08).
*From The James Mossman Collection.* (#4492)

### Lustrous 1833 JR-5 Dime, MS66

**3680** **1833 Last 3 High MS66 PCGS.** JR-5, R.1. A boldly struck example with rich, satiny luster that is unbroken throughout all fields and design devices. The originality of this piece is sealed in an even cream-gray patina. Due to the extremity of the misplaced final 3 in the date, this variety has earned an individual listing in the *Guide Book*—the only die marriage out of 10 varieties of the year to earn such a distinction. As of (11/08), PCGS has certified a total of five 1833 dimes at the MS66 level, including three JR-5 examples. No example of this date—regardless of variety—has achieved a finer designation. (#4523)

## Splendiferous 1834 JR-1 Dime, MS67 ★ One of the Finest Graded

**3681 1834 Small 4 MS67 ★ NGC.** JR-1, R.1. The only 1834 dime yet to receive a ★ designation by NGC for exceptional eye appeal, and one of only five pieces thus certified at the MS67 level, with one finer coin—an MS68 specimen (11/08). The authors of the early dime reference comment on this die marriage: "Obverse strike generally strong and even. Reverse strike strong except for poorly formed denticles over UNITED STATES OF. Three proofs have been reported; none have been seen by authors."

Since that time, a few proof 1834 JR-1 dimes have been certified by NGC and PCGS, including the fabled King of Siam specimen. The current offering has the appearance of a proof coin and when compared to other certified proofs of the same variety, the differences are nearly indistinguishable. It is likely, however, than the mirrored fields on this piece were not reflective enough to earn a proof designation. Freshly lapped dies will produce prooflike coins for the first 50 or so strikes, although that amount is debatable and would vary based on certain mechanical factors. Regardless, this piece was clearly from recently serviced dies and, even if by sheer happenstance, received a fiercely powerful strike. The result is razor-sharp definition of the stars, date, and legends, all of which are reminiscent of a medal striking. In fact, the stars stand so proudly on the obverse surface that they actually cast a shadow! As previously noted, the delicate fields have a semiprooflikeness and are free of distractions. Subtle amber and rose coloration evenly grace both sides, while an eye appealing ring of azure iridescence clings to the peripheries. A Superb Gem for the finest of cabinets.
*From The Deb-Ann Collection.* (#4525)

## Highly Lustrous JR-3 1837 Dime, MS66

**3682** **1837 MS66 PCGS. CAC.** JR-3, R.2. Of the four 1837 varieties, two share the same reverse, JR-3 and JR-4. The JR-3 variety is distinguished by the obverse that is common to JR-1, JR-2, and JR-3, which shows star 7 pointing to the top of the curl. While JR-3 dimes are fairly common in circulated grades, they are scarce in mint condition. Only nine coins have been certified in MS66 of all varieties by both of the major services and none are finer (11/23). This is a splendid coin that shows luxuriant mint luster and is virtually free from toning. The striking details are sharp throughout, and there are no mentionable or noticeable marks on either side.
*From The James Mossman Collection.* (#4529)

## Important Gem 1844 'Little Orphan Annie' Dime

**3683 1844 MS65 PCGS.** Few coins have attracted so much lore (and so much subsequent controversy!) as the 1844 dime, but through 1930, it was a rather placid issue, not much collected in the absence of Seated coinage enthusiasts, its low mintage largely ignored. Frank C. Ross, a collector surprisingly little-known in the numismatic world at large but deserving a place alongside Farran Zerbe as a coin promoter extraordinaire, made the 1844 dime his "pet crime," touting its low mintage and perceived rarity at every juncture.

Many of the legends that have sprung up to "explain" the perceived disappearance of 1844 dimes have been laid at the doorstep of Mr. Ross, though more than a few must have started out as some other collector's tall tale. Tom LaMarre, in his article "The mysterious 1844 dime" for the September 2007 edition of *Coins* magazine, gives a partial list of mysterious fates: buried following their looting from a Conestoga wagon, washed away by the Johnstown Flood of 1889, sunk to the bottom of the ocean in the hold of a doomed ship, melted in the Chicago Fire of 1871, and turned into jewelry in Mexico. Sensational demises all, none plausible.

As LaMarre writes, "It's hard to tell whether the 1844 Seated Liberty dime struck at the Philadelphia Mint is a great rarity or a somewhat elusive coin that has been promoted for the purpose of making a profit. As the debate goes on, however, so does the dime's rise in market value." The finest examples, such as this Gem, are particularly prized today. This piece offers elegant blue-green, peach, and gold patina over strongly lustrous, well-preserved surfaces. Pleasingly detailed and remarkably attractive. Population: 5 in 65, 0 finer (11/08). (#4585)

## Extremely Rare 1846 Select Dime
## One of Two Finest Certified

**3684** **1846 MS63 PCGS.** The low-mintage 1846 Stars Obverse Seated dime (31,300 pieces) is scarce in all grades, and rare in XF and above. Mint State examples are extremely rare. Brian Greer (1992) assigns them an R.7 rarity rating in his *The Complete Guide to Liberty Seated Dimes* (4 to 12 known). PCGS and NGC have graded a mere three Uncirculated specimens, and the MS63 offering in the present lot is one of the two finest certified!

A medley of silver-gray and electric-blue patina is joined by a splash of lavender, most noticeably on the reverse. An attentive strike leaves strong definition on the design features, except for minor softness in Liberty's hair, which is typical for the issue. A few minute, grade defining marks do not detract.
*From The Findley Collection.* (#4588)

## Exceptional MS67 1858-O Dime
## The Finest Certified

**3685** **1858-O MS67 NGC.** The mintage for 1858-O dimes was an impressive 290,000 pieces. This number is deceptive, however, as the vast majority of those produced entered the channels of commerce and stayed there. To date (11/08), only 31 "submission events" have been recorded for both NGC and PCGS in mint condition, representing perhaps two dozen actual pieces. At the MS67 level, this is the sole coin at either service. The surfaces are exceptionally bright and lustrous, which is atypical for what is expected from most New Orleans products and this issue specifically. In 1992 Brian Greer stated, "Mint state pieces usually do not show strong luster." The devices on each side are fully struck, and the coin is brilliant throughout with no observable marks. An amazingly well-preserved O-mint dime. (#4617)

## Seldom Encountered 1872-CC Dime Key Date, XF45

**3686** **1872-CC XF45 NGC. CAC.** Coins of the Carson City Mint have an inherent appeal to collectors and students of history. In *The Complete guide to Liberty Seated Dimes* Brian Greer states this date is the key to the whole series in grades above XF. The tiny mintage of 35,480 pieces was released into circulation, and Mint State coins are prohibitively rare today. At the XF45 level, Greer considers this an R.5 coin. The same reverse was used to strike all Carson City dimes from 1871 to 1874.

The present coin is an attractive specimen, with minimal wear for the grade. Much detail remains in the seated figure, and LIBERTY is fully legible on the ribbon. The issue is very rare above this grade, so astute collectors will bid accordingly. Census: 2 in 45, 3 finer (11/08). (#4657)

## Original VF35 1873-CC Arrows Dime

**3687** **1873-CC Arrows VF35 PCGS. CAC.** Fortin-101, High R.5 for the grade. A later die state with a thin die break—only observed on a few other specimens—through the right side of the corn cob and curving right where it terminates at the rim. The diagnostic die break through the mintmark is present.

The gunmetal-gray example offered here displays the highest degree of originality and is completely free of distractions, which is uncommon for the issue. The rims are well defined and the level of detail is reminiscent of a coin grading finer. Interestingly, this piece shows bold strike doubling throughout the wreath. Of the 89 1873-CC With Arrows dimes certified as of (11/08) by NGC and PCGS combined, only 13 coins have been graded better than VF, making this near-EF example a special opportunity for the Seated dime connoisseur. (#4666)

## PROOF SEATED DIMES

### Important 1843 Seated Dime, PR65

**3688** **1843 PR65 NGC.** Ex: Pittman, from his 1843 proof set. When we offered the amazing Kaufman Collection coin, we presented a roster of nine different specimens known to us, and we abbreviate that roster here:

1. **PR66 Cameo NGC.** Kaufman Collection (Heritage, 7/2008), lot 1807.
2. **PR66 NGC.** John Jay Pittman Collection (David Akers, 10/1997), lot 595.
3. **PR65 NGC.** Superior (1/2004), lot 214.
4. **PR65 NGC.** Pittman Collection (David Akers, 10/1997), lot 832. **The present specimen.**
5. **PR64 NGC.** Superior (6/2002), lot 4159.
6. **PR63.** Norweb Collection (Bowers and Merena, 10/1987), lot 469.
7. **PR62 PCGS.** Bowers and Merena, 9/1989), lot 185.
8. **Proof.** Amon Carter Collection (Stack's, 1/1984), lot 630.
9. **Proof.** Smithsonian Institution.

This example from the Pittman 1843 proof set is tied for third finest of the nine known examples. It has deep steel and lilac toning over fully mirrored fields, with few marks of any sort on either side.

*Ex: John Jay Pittman (David Akers, 10/1997), lot 832; Richmond Collection (David Lawrence, 3/2005), lot 1238.* (#4730)

### Doubled Die 1856 Seated Dime, PR66 Cameo

**3689** **1856 PR66 Cameo NGC.** Doubled Die Obverse. Breen-3295, Greer-105. The number of surviving proof 1856 Seated dimes is likely rather small, perhaps 20 or so pieces. They were apparently all struck from this single doubled obverse die, according to Walter Breen. The doubling is plainly visible on the shield and ribbon, with LIBERTY, the ribbon borders, and all horizontal and vertical shield stripes boldly doubled.

This amazing Premium Gem proof has exquisite cameo contrast with deeply mirrored fields beneath intense blue and lilac toning. The central devices are lighter gold, presenting exceptional aesthetic appeal. Census: 2 in 66 Cameo, 1 finer (12/08). (#84745)

## BARBER DIME

### Superb 1900-O Barber Dime
### Better Date, MS67

**3690** **1900-O MS67 NGC.** The present piece is the single highest-graded 1900-O dime. The 1900-O is a significantly better date, partly due to a lower mintage but also because of a shortage of contemporary Southern dealers setting aside high grade examples. In Fine 12, the *Guide Book* value is $110, compared with $7 in the same grade for its Philadelphia Mint counterpart. The 1900-O is rare in Mint State, and nearly unobtainable above Gem. This lustrous Superb Gem is beautifully toned in medium golden-brown and aquamarine. The strike is bold aside from the uppermost portion of the wreath, and the reverse appears immaculate. The obverse is also uncommonly smooth, as careful rotation reveals only a few faint grazes on the portrait. A fleeting opportunity for the Barber specialist. Census: 1 in 67, 0 finer (11/08). (#4822)

## PROOF BARBER DIMES

### Specimen Striking 1892-O Dime, SP64
### The Only Certified Specimen Striking

**3691** **1892-O SP64 NGC.** This is the second time we have seen this specimen dime, and we have handled one other piece, that one in the 1997 FUN Sale. That coin was uncertified and yet it was still convincing enough to bring roughly twice what a regular MS64 coin would be worth. There were 3,841,700 dimes produced in New Orleans in 1892. While there is no record of presentation strike dimes being struck, there is a listing in Breen's proof encyclopedia (1977) of a branch mint proof 1892-O dollar, suggesting the possibility that at least one set of all the denominations could have been struck. The only reason we can think of for striking such coins in 1892 is to commemorate the passing of the old Seated design and the initial year of Charles Barber's design used on the dime, quarter, and half dollar.

The fields on this piece are deeply mirrored with complete reflectivity all the way to the rims and no fadeaway around the devices. The design elements are crisply defined and rise sharply above the even, glassy fields. The surfaces are covered with a light, hazy, gray-lilac tone that reveals faint traces of rose coloration beneath. There are no obvious or distracting contact marks on either side; and in fact, both the obverse and reverse show hardly any abrasions, which is what one would expect from a proof or specimen striking. Business strikes almost always show some evidence of coin-to-coin contact. This coin represents a rare opportunity to acquire a certified branch mint proof striking. (#4875)

A 15% BUYER'S PREMIUM ($9 MIN.) APPLIES TO ALL LOTS.

## 1906-D SP64 Dime
## Probably a Unique Specimen Striking

**3692** **1906-D SP64 NGC.** Our familiarity with this special striking is limited to a brief entry in Breen's 1977 *Proof Encyclopedia*: "Top of 6 recut. Seen at San Francisco convention, Sept. 1976." To our knowledge, another specimen 1906-D has not turned up, so we must conclude this was the piece he viewed 33 years ago. The top of the 6 is indeed repunched (or recut as he said).

The reason for striking such a coin is obvious: To commemorate the opening of the branch mint in Denver. Branch mint proofs are also known of the 1906-D eagle and double eagle, and it would be logical to assume that a set of all denominations would have been produced that were struck in Denver that year. If that assumption is correct, then a quarter, half dollar, and half eagle would still remain to be discovered.

The polishing on this die is superior to the work done on many branch mint proofs. Most are struck from relapped business strike dies. Most also show incomplete die polishing in the narrow areas of the devices. That is not the case on this coin as the devices are all fully outlined by die polish. The only areas that are not are within the letters on the reverse; for example, on the O in ONE and the ME of DIME. The striking details are fully articulated in all areas. From the standpoint of what makes a coin a specimen striking, this piece fully measures up.

The surfaces are toned in rich, variegated shades of blue, rose, and golden in equal amounts on each side. The toning is enlivened considerably by the depth of mirrored reflectivity in the fields. Probably a unique branch mint proof, and as such a rare opportunity for the specialist. (#4890)

# MERCURY DIMES

## Key-Date 1916-D Dime, AU55

**3693** **1916-D AU55 PCGS.** The entire 264,000 piece 1916-D dime mintage was released in November, 1916. Apparently, dime coinage was then halted so that mint personnel could devote full time to making quarter dollars (Walter Breen, 1988).

The key to the Mercury dime series, the 1916-D has been in demand by collectors in all grades since the mid-1930s. According to David Lange (2005), this early awareness largely resulted from the introduction of inexpensive coin boards in 1934.

This Choice AU specimen retains a good amount of luster, and displays occasional dapples of russet patina, especially on the central devices. The design elements are well defined, and just a few minute contact marks are visible on each side. (#4906)

## Impressive 1916-D Dime, MS64 Full Bands

**3694 1916-D MS64 Full Bands PCGS. CAC.** The 1916-D Mercury dime is a perennial favorite among coin collectors. This situation manifests itself in the coin's price, which continues to climb in all grades. In a July 26, 2005 *Numismatic News* article titled "1916-D Dime Still Maintains Strong Appeal," Paul Green writes:

> "Clearly, the years have done little or nothing to tarnish the reputation of the 1916-D. Demand for it seems to be constant, with some who are not collecting Mercury dimes still wanting a 1916-D for their collection."

Variegated champagne-gold and soft violet patina, joined on the obverse by mint-green, visits the lustrous surfaces of this near-Gem offering. An exacting strike completes the design elements, including the diagonal as well as the middle bands. Close examination reveals fewer marks than what might be expected for the grade designation. *From The Plymouth Collection.* (#4907)

## Condition Rarity 1918-D Dime MS65 Full Bands

**3695 1918-D MS65 Full Bands PCGS.** Boldly struck across all features without exception, qualifying this specimen as a true condition rarity. Rich luster sweeps the soft pewter-gray surfaces, which are lightly dappled with occasional russet hues at the peripheries. No distractions are immediately noticed under normal examination. Only when a loupe is applied does a small abrasion on Liberty's cheek appear. A short die break extends from the rim through the left side of the first S in STATES, suggesting a later die state.

1918-dated dimes struck at the Denver Mint are common overall, but they are extremely challenging in high grade—especially if well struck. As of (11/08), PCGS has certified only 18 pieces at the Gem level with the Full Band designation, and just two examples—both MS66 coins—have achieved a finer grade. (#4919)

## Rarely Seen 1919-D Dime, MS65 Full Bands

**3696** **1919-D MS65 Full Bands NGC.** The 1919-D dime comes from a mintage of nearly 10 million pieces, and is generally obtainable through the mid-Uncirculated grade level. Higher grade examples with Full Bands, however, are much more difficult to come by. Indeed, Paul Green, in a January 18, 2005 article in *Numismatic News* entitled "1919-D Mercury Dime Catches Up With Peers," states:

> "The 1919-D Mercury dime in MS-65 with full-split bands has soared in price ... since 1998. That alone is enough to make anyone sit up and take notice, but there is more, as at today's price, it is close to the price of the 1916-D and no one would have thought that was possible. It is not out of the question for the 1919-D in MS65 with full-split bands to pass the 1916-D and increase its lead over the 1942/41 to become the most expensive Mercury dime in top grade."

Radiant luster swirls around both sides of this Full Band Gem. While the surfaces look untoned at first glance, magnification reveals hints of incipient gold-tan color. A powerful strike results not only in fully split, rounded middle bands, but bold diagonal bands as well. Moreover, excellent definition is apparent at the peripheries, where weakness is common to this issue (David Lange, *Complete Guide to Mercury Dimes*). There are no mentionable marks, but some interesting obverse die cracks are noted. Census: 6 in 65 Full Bands, 0 finer (11/08). (#4925)

## Lustrous 1942/1-D Gem Full Bands Dime

**3697** **1942/1-D MS65 Full Bands NGC. CAC.** FS-101, formerly FS-010.8. Claims for the discovery of the 1942/1-D dime have come from a number of individuals, outlined by David Lange in his *Complete Guide to Mercury Dimes*. Walter Breen (1988) reports one Delma Romines made the discovery in 1962. David Bowers credits Frank Robinson with its discovery around the same time, while Bill Fivaz believes that James Greenwich made the first public inquiry about the variety. Lange, on the other hand, says he came across a reference to the coin in the November 1960 *Numismatic Scrapbook Magazine*.

Untoned, highly lustrous surfaces of the current Gem offering exhibit well struck design elements, culminating in Full Bands. The diagonal bands are also bold. A handful of minuscule marks probably prevents an even higher grade. Census: 7 in 65 Full Bands, 6 finer (11/08). (#5041)

## PROOF MERCURY DIME

### Stunning PR68 ★ 1936 Mercury Dime

**3698** **1936 PR68 ★ NGC.** Examples of this issue are always in demand due both to their low mintage and to their status as the first year of the proof emissions. (Although Walter Breen's *Complete Encyclopedia* has made some claims concerning the existence of early [1916-17] proofs, no such examples have ever been certified at either service.)

The present piece, in addition to its pristine preservation, justly merits the Star designation awarded by NGC for exceptional eye appeal. Here the award-winner is the stunning peripheral patina in shades of emerald, amber, and cerise, with the occasional dollop of violet. This piece is the only PR68 Star certified at NGC, and there are none finer (11/08). (#5071)

## TWENTY CENT PIECES

### Attractive MS65 1875-CC Twenty Cent

**3699** **1875-CC MS65 NGC.** An essentially untoned Gem with satiny luster and refreshingly unabraded surfaces. Though the strike is a trifle soft at the margins, central details are pleasing. Despite a relatively low mintage, the 1875-CC is scarce but not rare in circulated grades. Gems, however, are very elusive, and are under strong demand. Since the 1876-CC is a legendary rarity, Carson City type collectors are obligated to select an 1875-CC for their holdings, and the issue offers an interesting option for the type generalist as well. Census: 32 in 65, 5 finer (11/08). (#5297)

## Highly Lustrous and Beautifully Toned MS65 ★ 1875-CC Twenty Cent Piece

**3700** **1875-CC MS65 ★ NGC.** Awash in sky-blue, lemon, magenta, cream-gray, and aqua colors, this needle-sharp Gem displays remarkable, swirling mint luster and remarkably unabraded surfaces. Many times scarcer than its S-mint counterpart, the 1875-CC is also important as a Carson City type coin, since the 1876-CC is noncollectible by those unwilling to mortgage their residence to facilitate a purchase. As of (11/08), only the present 1875-CC has received the coveted star designation from NGC. Just five pieces are certified finer by that service, all as MS66. (#5297)

## Phenomenal 1875 Twenty Cent PR67 ★ Cameo

**3701** **1875 PR67 ★ Cameo NGC.** The twenty cent piece was authorized on March 12, 1875 at the behest of Senator John Percival Jones of Nevada. The justification for the denomination was a misguided attempt to solve short-changing problems in the West, where small change did not circulate. The coins were easily mistaken for quarters; due to similarities in design, color, and diameter. The issue was rejected by the public, in a scenario reminiscent of the Anthony dollar fiasco in recent times. Business strikes were discontinued after 1876, and proofs were only produced through 1878.

The proof coinage of 1875 is a mystery. The six gold denominations have a recorded proof mintage of only 20 specimens each. The dollar, half dollar, quarter, dime, nickel, three cent piece, and cent had a more generous production total of 700 pieces per denomination. Interestingly, a relatively huge total of 2,790 twenty cent pieces were coined. Walter Breen reports that 2,200 of these coins were delivered in 1875; with 590 still on hand at year's end. Since the coins were despised by the public, it is hard to understand the driving force behind these production figures. No large hoard of 1875 proof twenty cent pieces has ever surfaced, so the coins must have been distributed at the time of issue. Perhaps Senator Jones, or another silver lobbyist, ordered a large quantity of coins to hand out for inspection or display purposes. In any case, the proof examples did find a popularity with collectors that the business strikes never experienced with the public. As early as the Type Table sale (Haseltine, 11/1881), lot 1447, the 1875 twenty cent piece in proof was selling for one dollar. This was at a time when gold proof coins often sold for face value. The issue is popular with type collectors, as well as Seated Liberty specialists.

The present coin is a magnificent example of this popular issue, and undeniably deserves its coveted ★ designation, which has only been awarded to this piece and one other PR67 specimen at NGC—no other proof twenty cent piece, regardless of grade, has received a ★ as of (11/08). The surfaces are free of distractions. The strike is particularly strong, with exquisite detail on all design devices. Contrast is formidable, with deeply mirrored fields under iridescent russet, gold, and blue toning. The piece is a realistic candidate for Condition Census, with only four examples in PR67 Cameo at NGC and none at PCGS. No example has been graded finer at either of the major grading services. Census: 4 in 67 Cameo, 0 finer (11/08). (#85303)

A 15% BUYER'S PREMIUM ($9 MIN.) APPLIES TO ALL LOTS.

## Elegant Gem Cameo Proof 1876 Twenty Cent

**3702** **1876 PR65 Cameo NGC.** With a mintage of 1,260 pieces, the 1876 twenty cent proof issue ranks between the 1875, which has more than twice the official proof production, and the proof-only issues of 1877 and 1878 with fewer than 1,000 specimens struck between the two dates. For the high-end collector of this (admittedly short) series, the present Gem, with its significant contrast, is an excellent candidate. Moderate frost graces sharply struck devices, and the well-preserved mirrors are powerful. Only a hint of golden patina graces the rims. Census: 20 in 65 Cameo, 14 finer (11/08). (#85304)

## Glittering 1877 Twenty Cent Piece, PR67 ★ Cameo

**3703** **1877 PR67 ★ Cameo NGC.** This is the first of two proof only 20 cent pieces that were produced in 1877 and 1878. There are a few small areas within the eagle that are missing feather details, as if the die was lapped, except that the surface in those spots show frosty rather than prooflike luster. It appears that this same reverse die carried over to 1878.

Walter Breen conducted an extensive analysis of the 1877 and 1878 proof 20 cent pieces in his Proof Encyclopedia, trying to determine a net mintage that accounts for pieces struck and melted soon afterward. Mintage figures are recorded as 510 proofs in 1877 and 760 in 1878, but it is known that many of those coins were melted, leaving a net distribution of 300 in 1877 and 500 in 1878, according to Breen who based his estimates on a 3 to 5 ratio. Today, our estimated ratio is 5 to 7, implying a new estimate of 350 for 1877 to 450 for 1878. Our estimate is based on the total number of pieces certified by NGC and PCGS, and is very nearly identical to the original mintage figures.

An absolutely amazing Superb Gem Cameo proof that has earned NGC's coveted star designation for its exceptional quality. Both sides have frosty bright silver devices that exhibit bold design definition. The surrounding fields are unendingly deep mirrors that are brilliant silver close to the design motifs, changing to russet, violet, and electric blue at the borders. The connoisseur will quickly recognize and appreciate the desirability of this gorgeous twenty-cent piece.
*From The Findley Collection.* (#85305)

## EARLY QUARTERS

Fine 12 1796 Quarter, B-2

**3704** **1796 Fine 12 PCGS.** B-2, R.3. Distinguished from the scarcer B-1 by the proximity of star 8 to the L in LIBERTY, in addition to other diagnostics. Richly toned in sea-green, powder-blue, lemon, and plum-mauve. Although the eagle's breast is worn, the wings display pleasing feather definition, and the lower hair curls exhibit some detail. The dentils, stars, legends, and other peripheral elements are clear. The 1796 is important as the first date of the quarter denomination, aside from uncollectible 1792 patterns. It is also the only date with a Small Eagle reverse. Bullion depositors of the day preferred to be paid in silver dollars, which required fewer coins to count and stack. Encapsulated in an old green label holder.
*From The Scott Rudolph Collection.* (#5310)
***See: Video Lot Description***

Pleasing 1796 Quarter
Fine 12, B-2

**3705** **1796 Fine 12 PCGS.** B-2, R.3. On this variety, the 6 in the date is high and very near the bust; in LIBERTY, T and Y do not touch at the top; and the lower right star is spaced farther from the bust than star 1 is from the curl.

Light to medium gray patination bathes both sides of this Fine 12 example, and shows occasional splashes of bluish-purple color. The obverse dentilation is bold, as always on the 1796, while that on the reverse is weak in the upper right quadrant. The remaining design elements are nicely defined for the grade. The surfaces are remarkably clean for a coin that has seen moderate circulation.
*From The Martin L. Diffenbaucher, Jr. Collection.* (#5310)

## Impressive 1796 Quarter
## AU55, B-1, R.4

**3706** **1796 AU55 PCGS.** B-1, R.4. The rarer of the two varieties, it is attributed by a low 6 in the date, and a lump between the 9 and the dentil. The quarter dollar was struck sporadically during the early years of the Republic. Some years had low mintage, and some had no production at all. Steve Tompkins writes in his recent treatise *Early United States Quarters, 1796-1838*:

> "This was due in part to the actual needs of commerce, but added to this was a lack of the mint having a bullion fund to purchase silver and the need to process and strike each deposit in the order it was received. The mint was at the mercy of the depositor. If bullion was not deposited to be coined, the mint would sit idle. The depositor was also the one who determined what denomination they wished to have their deposit coined it to. There was a glut of Spanish colonial silver 2 Reales already in circulation. Many of these pieces even being very worn, traded at par, so the need was small for new coins of the quarter denomination. Consequently, few depositors wished to have their deposits returned in quarter dollars.
>
> "In fact, the new quarter denomination was not only unneeded, it was in all probability unwanted as well. Due to the lack of a denomination states on the coin, the public even had trouble knowing what it was worth and how to use it for making change in daily commerce."

This Choice AU specimen features medium intensity bluish-gray and burnt-orange patina, along with traces of luster in the recessed areas. An attentive strike leaves strong definition on the design elements, including Liberty's hair curls and drapery, and the eagle's wing and tail feathers. The dentilation is bold on both sides, a characteristic of the type. A few light circulation marks are concealed in the toning, and are not at all distracting. Adjustment marks are completely absent. In sum, this piece generates impressive eye appeal. *From The James Mossman Collection.* (#5310)

## Historic 1796 Quarter, B-2, MS62

**3707** **1796 MS62 PCGS.** B-2, R.3. The first year of issue, with a mintage of only 6146 pieces. The obverse was engraved by Robert Scot, after a sketch by famous portraitist Gilbert Stuart. Stuart's portrait of George Washington is familiar to all Americans, as it appears on the one dollar bill. The model for Liberty is thought to be Anne Willing Bingham, a Philadelphia socialite and daughter of Thomas Willing, president of the Bank of the United States. The Small Eagle reverse design was probably engraved by John Smith Gardner. Two obverse dies and one reverse die were employed in producing the initial mintage of this denomination. The present coin is classified as the more available B-2 variety, characterized by the high 6 in the date. In *Early United States Quarters 1796-1838,* Steve Tompkins notes that the B-2 coins were actually struck before the B-1 issue, based on observations of wear on the common reverse die. The eagle's head on the reverse of almost all B-2 examples is weakly struck.

There was little commercial demand for quarters in 1796, and the public did not really appreciate the coin. Twenty five cents was an unwieldy denomination in 1796, too small to be convenient for large purchases and too large for small change, much like the half dollar is today. The demand for quarters was so small that the tiny mintage of 1796 was able to satisfy all needs for the next eight years. The denomination was not produced again until 1804. The reverse was changed to the Heraldic Eagle design for the second issue, making the 1796 quarter a one-year type coin. Since they were unneeded in commerce, many examples were saved in bank vaults and the issue is available in all grades today.

Abe Kosoff reported that Colonel E.H.R. Green had a hoard of approximately 100 Uncirculated 1796 quarters in his magnificent collection. Green was the son of Hetty Green, the "Witch of Wall Street." Green was known to acquire multiple examples of rarities that he particularly enjoyed, but this was an incredible accumulation, even for him, Burdette Johnson, of the St. Louis Stamp and Coin Company, originally acquired this hoard from the Green estate. He sold the coins to James MacAllister, a well-known Philadelphia dealer. Kosoff relates the following visit from MacAllister in *Abe Kosoff Remembers*:

> "When he reached New York City on his return trip he stopped in to see me at the Numismatic Gallery. 'Mac' used to wear a homburg hat and a heavy overcoat. From one inside pocket he took out a long package, about 15 to 18 inches, narrow, wrapped in brown wrapping paper. On the show counter he 'unwrapped' it and displayed row after row of 1796 quarters, every one uncirculated.
>
> 'Ninety bucks, take your pick,' he said. Before the 'wow' got out of my mouth, out of another inside pocket Mac took out another package, very much like the first. 'These will cost you $125 each,' he advised. This group contained the so-called Proof 1796 quarters, brilliant gems, each and every one. The first parcel contained the frosty coins. I don't really recall how many I bought, perhaps five or six of each. All in all I would say there were about 100 pieces possibly a few more or less."

Kosoff may have exaggerated the number of pieces, but the hoard must have been fantastic. Kosoff tried to contact MacAllister later the same day to purchase more quarters, but could not catch up with him for the next two days. By the time Kosoff tracked him down, all the coins had been dispersed to other buyers. Numismatists believe that most Uncirculated examples known today come from this hoard.

The present coin has excellent eye appeal. The obverse is sharply struck, with only slight softness in the hair strands above the ear. The reverse shows the weakness on the eagle's head and top of wreath that is typical of this issue. The devices show few abrasions, and the surfaces are remarkably free of distractions for the grade. Lovely shades of lilac toning enhance both sides of the coin. A beautiful, historic prize.

## Classic Rarity, 1796 Quarter, B-2, MS64

**3708** **1796 MS64 NGC.** B-2, R.3. The year 1796 was significant as the first time that the Mint was able to actually produce all coinage denominations authorized by the Mint Act of 1792. The quarter, dime, and quarter eagle were all minted for the first time in this year. Earlier, priority had been given to the more prestigious large denominations, and to the smaller coins that were indispensable in daily transactions. The small demand for the quarter is reflected in its minuscule mintage of 6,146 pieces. The public must have found the new coins interesting, if not very useful. A relatively large number of examples were saved as curiosities, or in bank vaults, and the issue is available in all grades today. After 1796, the denomination was not produced again until 1804, by which time the reverse had been changed to the Heraldic Eagle design. Thus, the 1796 quarter is one of the few one-year type coins.

The quarter was an inherently difficult coin to produce. The specified weight was 6.74 grams, with a composition of .8924 silver and .1076 copper. The designed diameter of the coin was 27.5 mm. The edge was reeded. To contain the specified amount of metal in a coin with such a large diameter the planchets had to be unusually thin. The planchets were cut from sheets of metal of the required composition that were repeatedly drawn through horse powered rollers. The distance between the rollers was reduced with each pass until the desired thickness was attained. Before each pass, the metal sheets were annealed to make the metal softer and more ductile. It was necessary to repeat this process more times than usual to prepare the quarter planchets. In addition to the extra work involved in rolling, many of the planchets became brittle because of the repeated annealing. When the coins were struck on the screw press, some of the brittle planchets developed edge splits, and small pieces of metal broke off. The effects of this process can be seen on many 1796 quarters today.

Collectors have prized the 1796 issue since the earliest days of the hobby. An auction appearance is recorded as early as the A.C. Kline Sale (M. Thomas & Sons, 6/1855), lot 261. In his new book, *Early United States Quarters 1796- 1838,* Steve Tompkins notes the following combination of special factors that account for the outstanding popularity of the issue:

1. It is a one-year type coin.
2. It is the first date of issue for the denomination.
3. It is listed as a separate type in the *Red Book.*
4. It is the only quarter with an 18th century date.

The small mintage of 1796 quarters was split between two obverse die varieties, identified by the position of the numeral 6 in the date. The present coin is from the more available B-2 obverse design, characterized by the high 6 in the date. Tompkins notes that the B-2 variety appears at auction approximately three times more often than the B-1. Extrapolating from the recorded mintage figure, Tompkins theorizes that slightly more than 4,000 examples of the original mintage may have been B-2s and a little less than 2,000 were B-1s. Mint records show four deliveries of 1796 quarters. Warrant # 61 of 1,800 pieces was delivered on 4/9/1796. Warrant # 63 of 2,530 pieces was delivered on 5/27/1796. Warrant # 65 of 1,564 pieces was delivered on 6/14/1796. Finally, Warrant # 81 of 252 pieces was delivered on 2/28/1797. If Warrant # 61 and Warrant # 63 were B-2s, then the total number of coins of this variety would have been 4,330 specimens. If the other warrants contained B-1 examples, the total would be 1,816 pieces. These numbers correspond closely to the estimates extrapolated from the auction appearance ratio. Tompkins acknowledges that this result may be just mathematical coincidence, but the statistics fit well with the observed data.

The strike is particularly sharp on this example, especially on the obverse. Crisp detail shows in all devices, even star centrils and hair strands are bold. The reverse has a better than average strike, with some detail showing on the eagle's head. The eagle's nostril shows plainly, a detail rarely seen on this variety. The fields are free of distractions and lovely lilac and gray toning accent both sides. Stunning eye appeal. Steve Tompkins lists this coin as tied for #4 in his Condition Census.

*From The Scott Rudolph Collection.* (#5310)

***See: Video Lot Description***

## Well Defined 1804 Quarter
## VF25, B-1

**3709** **1804 VF25 PCGS.** B-1, R.3. The more available of two 1804 quarter varieties for the year, distinguished by an obverse that shows a gap between the 4 in the date and the truncation of the bust. A die gouge is also visible between stars 8 and 9.

After a seven-year hiatus, quarter production resumed in 1804, this time with a Heraldic Eagle reverse. With only 6,738 coins struck, 1804 is the key-date of this four-year series.

Light silver-gray patina in the central areas transitions to deep electric-blue and lavender at the margins of this VF25 example. The design elements are better defined than ordinarily seen on the type, particularly the rims and shield, features that are usually weak. Both sides are pleasing for the grade, though some diagonal marks on the upper part of the eagle are mentioned for complete accuracy. (#5312)

## Scarce 1806/5 Quarter
## MS62, B-1

**3710** **1806/5 MS62 NGC.** B-1. R.2. The variety is attributed by a missing lower left serif of 1 in the date, with the 1 touching the hair, and the top of 5 in the denomination embedded in the arrow feathers.

Luminous surfaces are peripherally toned with vibrant splashes of blue and gold while the centers are a much lighter gold to silver in color. Fairly well struck on all but the uppermost hair curls of Liberty, and we note strong breast and neck feathers on the eagle. Both the obverse and reverse show clash marks, particularly so on the reverse which shows much of the outline of Liberty in the fields. A few minuscule handling marks do not significantly detract. Always in strong demand for the overdate feature, and a scarce coin to find so well preserved. The overdate is strong, with the lower knob and loop of the 5 very clear to the unaided eye, apparently no effort was made to efface the undertype. Census: 2 in 62, 5 finer (10/08).
*From The Scott Rudolph Collection.* (#5315)
***See: Video Lot Description***

## Beautifully Toned 1806 Quarter, MS63 B-2, Die State IV

**3711** **1806 MS63 NGC.** B-2, R.2, Breen Die State IV. The variety is attributed by defects in the foot of 1 in the date and T in LIBERTY at the left, and the foot of I at right, and on the reverse, the C of 25 C touches the tail and the inverted A in AMERICA. A noticeable die crack from the 2 in 25 up through the arrows, shield, and E in STATES confirms the die state. A somewhat parallel crack extends from O(OF) down to the last A in AMERICA. Breen calls this die state "Rare."

This Select specimen is blanketed in blue and gray shades with underlying gold and pink colors. All primary features are well defined, though the peripheral stars on the left side of the obverse show a little striking flatness. Well preserved surfaces reveal just a few minute, unobtrusive marks. Overall, a pleasing early quarter. Census: 8 in 63, 16 finer (11/08).

*From The Scott Rudolph Collection.* (#5314)

***See: Video Lot Description***

## Possibly the Finest 1806 B-3 Quarter, MS65

**3712** **1806 MS65 NGC.** B-3, R.1. An intermediate die stage, showing the reverse rim crumbling over M of stage 2, and the die crack of stage 4, but no evidence of the stage 3 clash marks. All die stage descriptions are from the new early quarter reverse by Steve Tompkins. This example is the finest of those six pieces that he lists in his 1806 B-3 Condition Census.

The obverse and reverse dies were both used for varieties in addition to the B-3 combination. The obverse die was also used for B-2, and the reverse die was also used for B-4. Tompkins has present a detailed remarriage chart for the three varieties, showing that 1806 B-2 was struck first, B-3 was struck second, B-4 was struck third, and finally more examples of B-3 were struck fourth. The final use of the dies for B-3, struck after B-4, is called a "remarriage" since the same dies were joined together for a second time. Documenting any remarriage among early coins is an extremely difficult challenge, since multiple examples of all varieties have to be studied, and exact die state differences must be documented.

Faint traces of champagne toning appear on the obverse of this otherwise fully brilliant white quarter. Both sides have highly lustrous and frosty surfaces with few imperfections of any kind, other than a planchet impurity that is visible on the obverse rim over IB. The lower part of the obverse and upper part of the reverse show considerable weakness. Struck on a screw press, this piece is a couple turns short of a full strike. Since all of the peripheral detail is fully defined, the weakness may not be attributable to improper operation of the screw press. Instead, the possibility exists that one of both dies were slightly sunken at the center, making it impossible to achieve a full strike. (#5314)

## Toned Uncirculated 1807 Draped Bust Quarter, B-1

**3713** **1807 MS60 PCGS.** B-1, R.3. The relatively modest grade on this coin might best be explained by the planchet, which is streaked with small but obvious impurities. Nevertheless, this is a fully Mint State coin, with full luster, a noticeable lack of abrasions for the grade, and a degree of eye appeal much finer than one might expect from the grade. Generally deep blue and coal-gray in color with rose-golden highlights that are most evident on the hair and LIBERTY. Areas of striking softness are noted in the right periphery. The usual reverse clash marks are present. (#5316)

## Gold Toned 1807 B-1 Quarter, MS64

**3714** **1807 MS64 PCGS.** B-1, R.3. Die stage 2 per Steve Tompkins in *Early United States Quarters 1796-1838*. This new reference on the series was published in May 2008. Beginning with a history of collecting, identification methods, and an overview of the entire series, Tompkins follows with his individual die analysis. Two pages are devoted to each variety, including an enlarged color image, enlarged images where necessary, die descriptions, die stages, collecting comments, rarity ratings and a brief Condition Census. While Walter Breen updated the original 1925 Browning reference nearly two decades ago, an updated, comprehensive reference for the early quarter dollar series has been a major gap in the numismatic literature for quite a long time. Among several appendixes can be found a review of the mysterious E and L counterstamps of 1815 and 1825.

The reported mintage of 220,643 quarters in 1807, struck from January through April, is the largest of the Draped Bust design, and it is slightly more than the 1806 record of 206,124 coins struck in May through July. Based on the number of die varieties known for each year (10 in 1806 and only two in 1807), it seems likely that many of the quarters struck in 1807 were dated 1806. An analysis of the number of die marriages and their rarity suggests that there were probably just 70,000 quarters minted with the 1807 date.

Both sides of this ivory near-Gem are boldly detailed and highly lustrous with frosty silver surfaces and lovely pale gold toning near the borders, reminiscent of many coins from old-time collections. Both sides exhibit exceptional eye appeal and outstanding desirability. This piece will certainly be a highlight of any advanced type, date, or variety collection.

*From The James Mossman Collection.* (#5316)

## BUST QUARTERS

Lustrous 1815 Quarter
MS65, B-1

**3715** **1815 MS65 NGC.** Ex: Ashland City Collection. B-1, the only known dies, R.1. This is the premier issue in the Capped Bust quarter series. While it is popular for first-year type purposes, the 1815 is probably more desirable as a low mintage, conditionally challenging date. A mere 89,235 pieces were produced from a single obverse and reverse die marriage. While circulated and lower Mint State survivors are available with more or less frequency, Gems are undeniably rare with just 10 MS65 examples known to NGC and PCGS.

The present example is an early die state with no clash marks, and reverse repunching on the base of the second T in STATES. The A in STATES is also repunched. This is an uncommonly well struck representative of the design with fully denticulated borders and crisp definition over virtually all features. Both sides display frosty luster, and present as nearly untoned, save for some wispy light gray streaks. A handful of grade-consistent ticks are noted, and a tiny planchet void in the obverse field before Liberty's nose is a worthwhile pedigree marker. Census: 7 in 65, 6 finer (10/08).

Toned 1815 Gem Quarter, B-1

**3716** **1815 MS65 NGC.** B-1, the only known dies, R.1. Following a delivery of 220,643 pieces in 1807, the Philadelphia Mint idled its quarter dollar presses in favor of the half dollar denomination. Revived in 1815, John Reich's Capped Bust design had substituted Robert Scot's Draped Bust, Heraldic Eagle motif of 1804-1807. Only 89,235 quarters were produced in 1815. The present Gem specimen is richly toned in golden-purple patina with softer cobalt-blue and apricot undertones. The coin is perfectly centered with uncommonly crisp striking detail, and the surfaces are distraction-free with a thick, frosty texture. A wonderful coin for the advanced quarter specialist or Gem first-year type collector. Census: 7 in 65, 6 finer (10/08).

***See: Video Lot Description***

## Sharp 1815 Quarter
## MS66, B-1

**3717** **1815 MS66 NGC.** B-1, R.1, the only dies. U.S. quarter production was quite high in 1807, when 220,643 pieces were minted. This was due to a decrease in the number of two reales in circulation. No more quarters were made until 1815. In a *Numismatic News* article titled "Revised Liberty Appeared on Quarters in 1815," Robert Julian outlines the events leading up to the resumption of quarter coinage in that year. He writes that the Planter's Bank of New Orleans sent several kegs of Mexican dollars, worth about $14,400 dollars, to the Mint, accompanied by a June 15 letter from bank cashier Bailly Blanchard requesting that the entire amount be struck into quarter dollars. Mint Treasurer James Rush replied on July 15 "that it was not very convenient to provide quarter dollars," and would the Planter's Bank take dimes instead? Blanchard replied on August 14 that dimes would not be acceptable, as they were not widely used in the area, the public instead preferring the one-real pieces, worth 12 and-one-half cents. The Mint then suggested half dollars, which Blanchard again refused.

The Mint finally agreed to honor the Planter's Bank request for quarter dollars. Julian says that additional deliveries of 1815 quarters were made to the Bank of Pennsylvania, and to Jones, Firth & Co.

Gunmetal-blue toning hugs the margins of this Premium Gem example, transitioning into purple and golden-brown, the entire color palette being somewhat more extensive on the reverse. Lustrous surfaces exhibit sharply struck design elements, and have been well cared for. In sum, this is a great early quarter that will find a home in a high-grade collection. Census: 5 in 66, 1 finer (10/08).

## Extraordinary 1815 Quarter
## B-1, MS67
## The Finest Certified

**3718** **1815 MS67 NGC.** B-1, R.1. Die State II. Only one variety is known of this important date. The mintage comprised 69,232 pieces delivered December 16 of 1815 per warrant # 732, and 20,003 coins delivered January 10, 1816 per warrant # 733. All coins in the first warrant were delivered to the Planters Bank in New Orleans (Steve Tompkins, *Early United State Quarters*, 2008, p. 70). Tompkins goes on to say that: "The coins contained in warrant 733 were most likely delivered to the Bank of the United States in Philadelphia." This latter point is questionable, as the First Bank of the United States ceased operation in 1811 when Congress refused to renew its charter. The Second Bank of the United States was not chartered by Congress until early 1816. Were the warrant 733 quarters delivered to some other Philadelphia bank, perhaps the Bank of Pennsylvania or the Bank of Philadelphia?

This is the finest example known of this popular and widely collected date. As a Die State II coin the fields show evidence of die clashing. However, aside from these light clash marks, the impeccably preserved surfaces reveal virtually nothing that interrupts the flow of the thick, frosted mint luster that covers each side. Both obverse and reverse are deeply patinated with gray, gold, and emerald-green centers that are surrounded by deep scarlet-gray, forest-green, and gunmetal-blue toning around the margins. The striking definition is strong throughout with even pressure applied to all the design elements. An extraordinary coin and a singular opportunity for the type or date collector.

*From The Scott Rudolph Collection.* (#5321)

***See: Video Lot Description***

## Nicely Preserved, Lustrous 1818/5 Gem Quarter, B-1

**3719** **1818/5 MS65 NGC.** B-1, R.2. An important opportunity to secure one of the finest known examples of this important *Guide Book* overdate variety. The flag of 5 shows in the upper loop of the 8, and a die line connects the loop of 5 in the denomination.

Gently toned in golden-gray color, this highly lustrous Gem is splendidly preserved, and would command an even higher grade were it not for an incomplete strike in the centers. A later die stage, a bold die crack journeys from the rim through the second T in STATES, the scroll, the eagle's beak, and terminates at the eagle's left (facing) shoulder. Die polish has weakened the eagle's tail feathers and fletchings, nonetheless, both sides exhibit prominent mint-made clash marks. Census: 8 in 65, 2 finer (10/08).

*From The Scott Rudolph Collection.* (#5323)

***See: Video Lot Description***

## Stunning Gem 1818 Quarter Dollar, B-8

**3720** **1818 MS65 PCGS. CAC.** B-8, R.3. Steve Tompkins, in his newly released *Early United States Quarters,* provides six entries in the Condition Census for this variety, with the finest four pieces certified MS64 quarters. Number six in the census is AU58 with the notation "multiples." As such, it is conservative to say that the specimen offered here has a place in the Condition Census for the variety. B-8 is most quickly identified by observing the three closely grouped dentils under the first 1 in the date. Since this obverse die was used with three other 1818 die marriages, the reverse die must also be attributed. Doing so is quickly accomplished by noting that the I in PLURIBUS is centered under the left side of the second T in STATES. This is an earlier die state.

This splendidly original example displays bold cartwheel luster and pleasing amber coloration throughout. Population: 20 in 65, 4 finer—all varieties considered (11/08).

*From The James Mossman Collection.* (#5322)

## Awesome 1818 Quarter
## MS66, B-2

**3721** **1818 MS66 NGC.** B-2, R.1. There is a center dot on neck below the ear, there are lumps below and to the left of 2 in the denomination, and all Ts are defective at the bottom right. This piece is Breen Die State II, with a die crack from the field above Liberty's cap and through stars 8, 9, and 10.

This is one of the more easily obtainable varieties of this Capped Bust quarter production, but the awesome technical quality of this coin certainly sets it apart from most, if not all other representatives of this die marriage. This is a simply gorgeous Premium Gem with richly toned gray, green, gold, red, and blue surfaces. Both sides are frosty in texture with well centered, sharply defined features. There are no mentionable abrasions on this coin, destined for a fine type or date set. Census: 12 in 66, 1 finer (10/08).

*From The Scott Rudolph Collection.* (#5322)

***See: Video Lot Description***

## Outstanding 1818 Quarter
## B-3, Die State II, MS66

**3722** **1818 MS66 NGC.** Ex: Foxfire. B-3, R.3. Die State II. The variety is attributed by the following: on the obverse, the very wide, equally spaced date is relatively high above the border, the second 8 is not centered under the curl, star 1 points to between the first and second fold in the drapery; on the reverse, the left end of the scroll is under the upright of the D, the right end is centered under the right foot of A, the I of PLURIBUS is slightly left of center of the second T in STATES, all Ts are defective at bottom right, and a crack extends from the edge through the lower arrow head and the two arrow rods above up toward the eagle. The die state is confirmed by the defective left feet in both 1s of the date.

The 1818 quarter, from a mintage of 361,174 pieces, is readily obtainable in circulated grades. Even Mint State coins are not that elusive through MS64 or MS65. Premium Gems, however, are very difficult to locate, as evidenced by the 15 coins certified by NGC and PCGS, some of which are likely resubmissions. A mere two pieces are seen finer.

The silvery surfaces of the amazing MS66 example are awash in full luster, and display whispers of cobalt-blue and light tan at the margins. A well executed strike brings out sharp definition on the design features. The dentilation is full on both sides, and neither exhibits any mentionable contact marks. Some light clash marks are visible on the reverse. This is an outstanding piece for a high grade type set. Census: 12 in 66, 1 finer (10/08).
*From The Scott Rudolph Collection.* (#5322)

A 15% BUYER'S PREMIUM ($9 MIN.) APPLIES TO ALL LOTS.

## Appealing 1820 Large O Quarter
## MS64, B-1

**3723** **1820 Large 0 MS64 NGC. CAC.** B-1, R.4. There is a small lump above the dentils between 2 and 0 in the date, and all reverse Ts are defective at the bottom right. Regardless of die marriage, the 1820 is rarely encountered in Mint State. Indeed, NGC and PCGS have graded fewer than 30 Uncirculated pieces, a number of which are likely resubmissions.

A penetrating strike leaves strong definition on the design elements of this near-Gem example. Orange-red patina occupies the centers, while electric-blue dominates the borders. Rotation beneath a light reveals just a few minute marks well concealed within the toning. Pleasing overall appeal. Census: 5 in 64, 5 finer (10/08).
*From The Scott Rudolph Collection.* (#5329)
***See: Video Lot Description***

## Exceptional 1821 Bust Quarter
## B-4, MS66 Prooflike

**3724** **1821 MS66 Prooflike NGC.** B-4, R.3. Mint records indicate 216,851 quarters were produced in 1821, but Steve Tompkins notes in *Early United States Quarters 1796-1838* that "due to the use of 1820 dated dies, the total amount of 1821 dated coins is less than the stated mintage would suggest." This example is remarkably preserved for a coin nearly two centuries old, sharply struck with no marks worthy of note. Reflective fields are edged with taupe patina that highlights silver centers on both sides. Circulated early Capped Bust quarters are not plentiful, but Mint State examples are rare. NGC has certified just four pieces as MS66 (not distinguishing by variety or Prooflike status), and only one finer (9/08).
*From The Scott Rudolph Collection.* (#5331)
***See: Video Lot Description***

## Richly Toned 1824/2 Quarter, MS64, B-1 Tied for Second Finest Certified

**3725** **1824/2 MS64 PCGS.** B-1, R.3. Only 16,000 quarters are believed to have been struck with the 1824 date. The new Tompkins reference on early quarters proposes an alternate theory regarding this date. It states that,

> "the quantity of 16,000 coins delivered in Warrant #935 on December 31st 1823 were actually dated 1824. The amount of coins and the frequency of their appearance seem to concur with this hypothesis.
>
> "As Robert Scot passed away on November 1st. 1823, this may have been one of the last dies he produced. Another theory would be that after Scot died, Christian Gobrecht was immediately hired to help out, and perhaps it was Gobrecht who over-dated the unused 1822 die to create the 1824/2 as well as re-engraved the reverse die that was used to coin the 1823 B-1 die marriage, which was incomplete at the arrowheads and arrow shafts. William Kneass was commissioned as the new Chief engraver on January 29th, 1824 to replace Robert Scot; therefore due to the date of the delivery warrant, he was certainly not the person responsible for this 1824/2 die.
>
> "Furthermore, it may be that long with the one 1824/2 obverse die, Gobrecht over-dated two other 1822 dated obverse dies with a 4 over the 2. A recent discovery that the 1825 B-1 obverse die, which has always been called an 1825/2 is in reality an 1825/4/2, sparked this theory."

Only six pieces have been certified by both PCGS and NGC combined (12/08). This coin is tied for second finest certified and is bettered by only one piece, an NGC MS66. The satiny mint luster is overlaid by rich reddish centers that are surrounded by deep blue at the margins. Sharply, but not quite fully struck. There are no observable abrasions on either side of this magnificent rarity.
*From The Findley Collection.* (#5335)

## Popular 1825/4/2 Quarter, MS64, B-2

**3726** **1825/4/2 MS64 NGC.** B-2, R.2. An attractive Choice example of this intriguing triple-digit overdate. Previously thought to be a 1825/3, the B-2 is actually an 1825/4/2. The strike is pleasing in the context of this issue, and the fields are luminous beneath deep plum and cerulean patina that has occasional honey accents. A handful of trivial marks are present on each side, but there are none of singular note. The finest examples of this scarce and popular issue are two MS66 pieces. This coin is tied with several others at the mid-Condition Census level. Census: 7 in 64, 4 finer (11/08).
*From The Scott Rudolph Collection.* (#5337)
***See: Video Lot Description***

## Attractively Toned MS65 1828 Quarter, B-1a

**3727** **1828 MS65 NGC.** B-1a, R.1. Toned with mottled deep green and gold on the lower two-thirds of the obverse, with the upper portions a light steel-gray color. Matched on the reverse where the lower portion is lighter, and the tonight ranges through deep blue, green, and russet with luster through the peripheral lettering. Sharp on all but the uppermost curls of Liberty, and all the stars show full radial lines to the centers. A very scarce coin in Gem condition, with just a handful seen that qualify at this level and just a single coin graded higher by the two major services. A coin for the type collector who demands excellent surfaces and attractive toning. Census: 3 in 65, 1 finer (11/08).
*From The Scott Rudolph Collection.* (#5342)
***See: Video Lot Description***

## Highly Attractive 1831 Small Letters Quarter MS66, B-4

**3728** **1831 Small Letters MS66 NGC.** B-4, R.1. Star 7 points to lower curl, the lower right star is close to the hair, square based 2 in the denomination, eagle has long tongue, 25 C closer to eagle than dentils, and the arrow heads are thin. A later die state of this variety with a fine die crack through the C of the denomination to the stem above, and another connecting the lower left base of the A in AMERICA with the middle serif of F in OF. Repunching shows on the 5 of the denomination.

The 1831 quarter comes from a mintage of 398,000 pieces, and is relatively available through the mid levels of Mint State. Gem specimens are more difficult to locate, and Premium Gems are elusive. NGC and PCGS have not certified any coins finer than MS66.

Steve Tompkins, in his recent treatise *Early United States Quarters, 1796-1838*, lists the present NGC MS66 coin in the B-4 Condition Census, along with another NGC MS66 piece that appeared in the Bowers and Merena sale of the Dr. Craig M. Morgan specimen (11/1998), lot 110.

This Premium Gem exhibits faint champagne toning over pleasing satin luster, and an attentive strike leaves uniformly crisp definition on the design elements. A few minor ticks do not detract in the least from the coin's overall eye appeal. A couple of light toning streaks are visible over each side. Census: 8 in 66, 0 finer (10/08). *From The Scott Rudolph Collection.* (#5348)

***See: Video Lot Description***

## Lustrous 1831 B-5 Quarter Large Letters, MS65

**3729** **1831 Large Letters MS65 NGC.** B-5, R.3. One of the three Large Letter variants out of the seven 1831 quarter die marriages. Repunching is observed in the date and various reverse features. According to Tompkins, in his *Early United States Quarters* (2008), Chief Engraver William Kneass experimented with the dies of 1831 in order to maximize the quality of strike for this first-year issue quarter. Modifications explored by Kneass included extensive reengraving of many details and accounts for the Small Letter and Large Letter variations on the reverse dies. The Large Letter issues—like the piece offered here—appear to be significantly scarcer than the Small Letter 1831 quarter variants.

Rich luster dominates the untoned surfaces of this Gem small-sized Bust quarter. A few wispy abrasions on Liberty's cheek are likely all that preclude an even finer grade.

*From The James Mossman Collection.* (#5349)

## Enchanting Gem Prooflike 1833 Quarter, B-2

**3730** **1833 MS65 Prooflike NGC.** B-2, R.2. No period on the reverse, the most obvious and lone necessary diagnostic for the die pair. The present example is a remarkable piece in all respects, from the blue-green, sapphire, violet, and rose toning that drapes each side to the considerable reflectivity that shines through the patina. Excellent striking definition with remarkable preservation; neither fields nor devices exhibit a single individually mentionable flaw. All factors combine for a gorgeous summation of eye appeal. The finer of just two Prooflike pieces certified by NGC (11/08).

*From The Scott Rudolph Collection.* (#5352)

***See: Video Lot Description***

## Appealing 1834 Capped Bust Quarter B-1, MS65

**3731** **1834 MS65 NGC.** B-1, R.1. The 1834 quarter has a reported mintage of 286,000 pieces. Engraver William Kneass prepared the quarter dies for the year, with a possible assist from Christian Gobrecht. Two obverse and four reverse dies were combined to strike the five known die varieties of this issue. The present coin is an example of the B-1 variety, characterized by the use of only two lines in the stripes of the shield. The B-1 type is the most available variety for this date, and probably comes second in the die emission sequence.

The present specimen features a sharp strike, with fine detail on all design elements. Attractive gray and lilac toning enhances the fields, with much original color and luster remaining in areas near the devices. This coin is an attractive example of an early quarter and would serve admirably in an advanced type set. Census: 10 in 65, 5 finer (12/08). (#5353)

## Outstanding 1834 Gem Quarter, B-4

**3732** **1834 MS65 NGC. CAC.** B-4, R.1. The left side of the 4 in the date is even with the edge of the curl, the eagle lacks a tongue, the feather end is centered over the 2 in the denomination, and the stem end is centered over the C. The obverse die is perfect, while the reverse is Tompkins (2008) die stage 2, displaying peripheral cracks.

The lustrous surfaces of this beautiful Gem exhibit cobalt-blue, purple, and golden-brown patina, slightly deeper in hue and more extensive on the reverse. An exacting strike leaves sharp definition on the design elements, except for softness in two or three of the star centers. Both sides are impeccably preserved. Fantastic overall eye appeal is confirmed by the CAC green label. Census: 9 in 65, 5 finer (10/08). *From The Scott Rudolph Collection.* (#5353)

***See: Video Lot Description***

## 1834 B-1 Quarter, MS66 ★ Prooflike

**3733** **1834 MS66 ★ Prooflike NGC.** B-1, R.1. The first star is distant from the forward tip of the bustline, and star 7 is repunched. On the reverse there is no period after 25 C on this available variety. This is the so-called O/F (in OF) reverse, one carried over from the 1833 B-2 die pairing, according to both Steve Tompkins and Breen-Browning before him. The *Guide Book* lists the O/F variety and therefore many series aficionados separately collect it, but there is little premium over other variants due to its commonplace nature. Tompkins' new work identifies this die as produced from a "unique master hub, Reverse-F," the only one that shows two line stripes in the reverse shield and an eagle with no tongue. Another new master hub, Reverse-G, was also employed to make the 1834 B-2 and B-5 and 1835 B-2 varieties. Tompkins mentions the possibility that someone other than Chief Engraver William Kneass engraved those hubs. Kneass would suffer a debilitating stroke in August 1835.

Christian Gobrecht, Kneass' successor and the most logical engraver of the new master hubs, had worked for the Mint off and on since 1823, after the death of Robert Scot and before Kneass' hiring in January 1824. Of course when Kneass had his stroke, Mint Director Robert Maskell Patterson immediately asked for permission to hire Gobrecht full-time as a second engraver. Regardless, after the use of Reverse F in 1834, no later Bust quarters show the two-line stripes. The working dies were obviously used to a great extent, judging by the number of survivors of the B-1 variety.

Clearly the present coin is an early strike off of the new working die, earning it the Prooflike designation from NGC. The surfaces are highly reflective on both sides, with much contrast between the devices and the mirrored fields. There is no discernible color, and the piece is only a few small contact marks away from an even finer grade. NGC has rightly seen fit to award its Star designation for superior eye appeal. For the 1834 date this piece is the second-finest graded at NGC, behind a single unattributed MS67 piece. This piece is also, in MS66 ★ Prooflike, by far finer than the two other 1834s certified as Prooflike. A wonderful and historic coin from the early days of the Mint, suited for the finest type or variety set. (#5353)

## Satiny, Toned MS66 1838 Capped Bust Quarter, B-1

**3734** **1838 MS66 NGC.** B-1, R.1. Lilac and apricot colors fill the centers, while the margins are adorned with blue-green patina. This intricately struck premium Gem has remarkably clean surfaces, and the satin luster is easily seen through the attractive toning. An outstanding final-year type coin. Although 366,000 pieces are reported to have been produced, only one die pair is known, which suggests that either the dies were unusually hardy, or some of the reported delivery may have been dated 1837. The production of Seated quarters began later in 1838. Census: 3 in 66, 0 finer (11/08). (#5357)

## Illustrious 1827/3 B-2 Restrike Quarter, PR66

**3735** **1827/3 Restrike PR66 NGC.** B-2, High R.6. Square Base 2 in 25C. Two varieties of the celebrated 1827 quarter exist, known as Original and Restrike pieces, and they are quickly distinguished by the base of the 2 in 25C, curved or curled on the Originals, and squared on the Restrikes.

The 1827 Restrike quarters are known from two distinct die states, called Period One and Period Two in the Eliasberg catalog. Perhaps these could be labeled with three different classifications like the 1804 dollars. The 1804 Original dollars are now called Class I, the unique Restrike over the Swiss thaler is called Class II, and the later 1804 Restrike dollars are called Class III. Similarly, the 1827 Original quarters could be called Class I, the Period One Restrikes could be called Class II, and the Period Two Restrikes could be called Class III. Naturally, collectors of these coins may resist such a nomenclature, as it means that three coins are required for a complete set.

Like all 1827 Restrike quarters, Class II and Class III, this piece has a die crack through the right side of U in UNITED, from the border to the ring. The Class II coins, a.k.a. the Period One Restrikes, have little die rust and are struck over Draped Bust quarters. The Eliasberg specimen, the example offered by Bowers and Merena in their 1992 Somerset sale, and possibly one other piece are members of this category. It is believed that these coins were struck in the late 1850s. In his 1992 revision of the Browning reference, Walter Breen identified 14 pieces, including four examples of this Class, and 10 examples of the Class III state.

The remaining examples including this piece, perhaps as many as a dozen specimens, along with the copper strikes, belong to Class III, the Period Two Restrikes. These pieces are immediately recognized by their heavy die rust on both sides. This piece is sharp enough in strike and quality that it also shows extremely heavy die polishing lines on both sides, obviously an attempt to minimize the appearance of the die rust. These later Restrikes were struck at an unknown date, probably many years after the early Restrikes.

This is the fifth appearance of an 1827 quarter (all Class III) in one of our auctions since 1993, and it represents the third distinct example we have handled. The surfaces are toned steel-gray with strong underlying elements of rose, blue, and sea-green. The surfaces display the characteristic raised bumps produced when rusted dies were used to produce this restrike. The strike is razor-sharp and a few tiny hairlines are visible but these are well concealed by the toning and are obviously so minor from the grade given that they pose no threat to the technical grade of the coin.

*Ex: Heritage (7/1997), lot 6234; Heritage (7/2007), lot 671.*
*From The Scott Rudolph Collection.* (#5374)
***See: Video Lot Description***

## Spectacular 1831 Proof Quarter, PR66 Cameo B-5, The Norweb Specimen

**3736 1831 Large Letters PR66 Cameo NGC.** B-5, R.7 as a proof. This cataloger spent substantial time studying the current offering before thinking to look at the assigned grade. The beauty of this incredible proof quarter is simply mesmerizing and technicalities, such as which company certified the coin and what grade was assigned, mean little.

Frosty, razor-sharp details seem to float atop intensely reflective fields that are reminiscent of a modern proof issue. Light amber centers gracefully transition to pleasing hues of electric-blue iridescence at the peripheries on both sides of this Premium Gem proof. The strike—or strikes, as the case may be—was so powerful and exacting that details not typically seen on even the finest business strike examples of this issue are clearly visible: the most intricate details within the recesses of Miss Liberty's hair and the nuances of every feather on the eagle's wings. A mint-produced flaw in the right obverse field stands as a pedigree marker for future numismatists.

Proof strikings of this variety are rare. Since only eight or so specimens are believed extant, it did not take long for us to trace this piece to a famous collection. Using plate matching techniques were are certain that the current offering is the Norweb coin. Other important 1831 proof quarter examples include the Eliasberg and Pittman specimens, both of which were described in their respective catalogs as having light hairlines and minor abrasions. This piece, although imperfect, is a true Premium Gem proof and likely one of the finest extant representatives.

The subject of pre-1834 proof coinage is controversial since freshly lapped dies will produce coins with reflective surfaces. However, even old-school students of early American coinage would have to agree that the coin offered here must have been specially prepared. Regarding the B-5 proof quarters Walter Breen, in his *Encyclopedia of United States and Colonial Proof Coins* (1977), offers a possible reason for their production: "Mint Director sent 20 'specimens' to President Jackson ... and 20 more to Treasury Secretary Ingham. These may not all have been proofs. Occasion: new modified design by Kneass, using beaded borders and close collar."

As of (11/08), only one other 1831 quarter—a PR65 coin—has received a Cameo designation at NGC. PCGS records one piece at the PR66 level, but without indication of the surface characteristic. The specimen offered here represents not only the finest quality available for the date, but also an important provenance.

*Ex: Richard Picker (late 1950s); Norweb Collection (Bowers and Merena, March 1988), lot 1548, where it realized $27,500.*
*From The Deb-Ann Collection.* (#5378)

## SEATED QUARTERS

### Brilliant 1838 No Drapery Quarter, MS65

**3737** **1838 No Drapery MS65 NGC.** Open Claws Reverse. This lustrous first-year Seated quarter is untoned throughout. The fields are splendidly void of consequential contact, and the strike is strong aside from minor softness on Liberty's toes. Struck from early, unclashed dies. Among Philadelphia issues, only the 1838 and 1839 lack drapery beneath Liberty's raised elbow. Some of the 1840-O halves are also No Drapery, and these three early dates complete the popular No Drapery subtype. The 1838 is plentiful in typical circulated grades, but is scarce above VF and emerges as a notable rarity at the MS65 level. Census: 4 in 65, 3 finer (11/08).
*From The Scott Rudolph Collection.* (#5391)
***See: Video Lot Description***

## Incredible 1838 No Drapery Quarter, MS67 The Finest Graded by NGC

**3738** **1838 No Drapery MS67 NGC.** Open Claws. Briggs 1-A, featuring a curved date that is well centered between the rim and the base of the rock. Another obverse die, Obverse 2, is documented in *The Comprehensive Encyclopedia of United States Liberty Seated Quarters,* although the author, Larry Briggs, suggests that "because of the mintage [of coins], other minor varieties surely exist." Obverse 2 is only known in the extremely rare Briggs 2-B die marriage, which is famously referred to as the "closed claw reverse" variety. All known 1838 Seated twenty-five cent pieces are of the No Drapery type—a designation pertaining to the lack of drapery under Ms. Liberty's left elbow. This feature was modified in 1840 by engraver Robert Ball Hughes who, among other things, added drapery to the effigy of Liberty in the name of "respectability," according to Breen (1988).

1838 was the inaugural year of the Liberty Seated quarter design, which replaced the Capped Bust quarter series. Interestingly, 1838-dated Capped Bust pieces were struck until mid-year, resulting in two distinctly different designs with the same date. A similar scenario occurred in 1837, when both the half dime and ten cent pieces transitioned from John Reich's Bust design to Christian Gobrecht's Liberty Seated concept.

The current offering is a stunningly beautiful survivor of this first-year issue quarter dollar. Russet and navy-blue iridescence frames cream colored centers on both sides of this Gem specimen. As typically found on most examples of this variety, weakness in the obverse dentilation is observed. The luster is satiny and the fields are seemingly free of abrasions or other poststrike flaws. However, we make note of planchet roller marks that affect the obverse rim and, more noticeably, Liberty's thigh and right forearm. These marks, being inherent to the minting process, do not detract from the eye appeal of this Superb Gem specimen. Census: 1 in 67, 0 finer (11/08).
*From The Scott Rudolph Collection.* (#5391)

## Magnificent 1839 No Drapery Quarter, MS66

**3739** **1839 No Drapery MS66 NGC.** The Seated Liberty quarter made its debut in 1838. Some numismatists, including Walter Breen, consider the first three issues, that is those with "No Drapery," to be separate design types. Breen writes in his *Complete Encyclopedia of U.S. and Colonial Coins* (1988):

> "During summer 1838, the new Engraver, Christian Gobrecht, completed device punches for the new quarter dollars. These copied neither the dollars of 1836 nor the half dollars of 1837-38, but combined the dollars' Liberty Seated motif by Thomas Sully with a version of the old Reich-Kneass eagle; the denomination was for the first time expressed as QUAR DOL.
>
> "Regular production coinage began Sept. 29, 1838. Only 466,000 were struck, a figure oddly close to the annual totals for 1839 and 1840-O of this design (491,146 and 382,200, respectively). That made this type, in the original Sully-Gobrecht conception, one of the shortest-lived of all.
>
> "Understandably, these "No Drapery" coins have lately become recognized as scarce in all grades and very rare in mint state."

The 1839 Premium Gem No Drapery example offered in this lot displays partially prooflike fields that yield notable contrast with the motifs when the coin is tilted slightly under a light source. An attentive strike leaves above average definition on the design elements, especially the star radials, gown lines, and eagle's feathers. Portions of Liberty's hair and foot reveal the usual weakness. Soft sky-blue, yellow-gold, and lilac patina adorns both sides, each of which exhibits just a few minor marks that might well preclude an even finer grade. Census: 1 in 66, 1 finer (10/08).
*From The Scott Rudolph Collection.* (#5392)
***See: Video Lot Description***

## Well Struck 1841 Quarter, MS64

**3740** **1841 MS64 PCGS. CAC.** The 1841 quarter has a mintage of 120,000 business strikes. It is obtainable in the lower circulated grades, but difficult to acquire in the better levels of preservation. Larry Briggs, in his *Comprehensive Encyclopedia of United States Liberty Seated Quarters* (1991), assigns the following rarity ratings for this issue: G/VG, R.3; F/VF, R.4; XF/AU, R.5; Unc, R-6.

This near-Gem displays pleasing luster emanating from essentially untoned surfaces, and a well executed strike manifests itself in strong definition on the design features. A few minute contact marks prevent Gem classification. Population: 4 in 64, 2 finer (10/08).
*From The Scott Rudolph Collection.* (#5399)

1852

A 15% BUYER'S PREMIUM ($9 MIN.) APPLIES TO ALL LOTS.

# Desirable 1852-O Quarter, MS63
# The Finest Certified

**3741 1852-O MS63 PCGS.** The 1852-O quarter, from a mintage of 96,000 pieces, is very scarce in all grades. Larry Briggs, in *The Comprehensive Encyclopedia of United States Liberty Seated Quarters*, 1991, assigns the following rarity ratings to the issue:

G/VG-R.3+ (approximately 250 or more pieces known);
F/VF-R.4 (approximately 76 to 250 pieces known);
XF/AU-R.6 (approximately 13 to 30 pieces known); and
Unc-R.7+ (approximately 4 or more pieces known).

PCGS and NGC have certified a total of 56 examples in grades from About Good 3 to Mint State 63, with the majority falling within the Very Fine 20 to About Uncirculated 50 grade range. A mere four pieces rate Mint State level of preservation—one NGC MS61, an NGC MS62 and a PCGS MS62, and the PCGS MS63 offering in this sale.

A combination of factors accounts for the rarity of 1852-O quarters. First, the mintage was relatively small. Second, most apparently circulated in the channels of commerce soon after being minted. Third, coin collecting was not yet all that popular in America at the time, thus few coins were saved, especially mintmarked ones. Finally, a large number, perhaps most, were melted.

Walter Breen, in his *Complete Encyclopedia of U.S. and Colonial Coins*, 1988, elaborates on this last factor:

> "After quantities of gold discovered in California 1848-49 began reaching world markets, price levels of gold (reckoned in silver dollars) sank, or what is the same thing, silver bullion prices rose sharply in terms of gold dollars: enough to stimulate mass meltings of silver coins as worth more than face value. The ensuing coin shortage led to reduction in official coin weights in 1853 (the quarter was reduced to 6.22 grams compared to the older quarter's 6.68 grams) and wholesale melting of old-tenor silver, so that many dates 1848-53 No Arrows have become very scarce."

The elusiveness of the 1852-O quarter in high grades is such that many collectors settle for worn, or even problem coins. The Eliasberg piece, for example, graded AU55 Scratched (Bowers and Merena, 4/1997, lot 1452), and the Pittman specimen XF Cleaned (David Akers, 5/1998, lot 1323).

The lustrous surfaces of this Select piece are nearly untoned, except for an occasional blush of light tan-gray, along with a couple of minor "milk" spots on each side. An uneven die alignment causes a typically weak strike on the upper part of Liberty's portrait, the adjacent stars, the left (facing) leg and claws, and fletchings. The remaining design elements are quite bold. A few minute, unobtrusive marks barely keep from an even finer grade. Population: 1 in 63, 0 finer (10/08).

*Ex: The Frog Run Farm Collection (American Numismatic Rarities, 1/2006), lot 346.*
*From The Scott Rudolph Collection.* (#5420)
***See: Video Lot Description***

## Gem 1853 Arrows and Rays Quarter

**3742** **1853 Arrows and Rays MS65 NGC.** Ex: Las Vegas Collection. Consistent caramel-gold toning graces this lustrous and gorgeously preserved Gem. The strike is precise aside from softness on a few of the left-side stars. A magnificent example of this conditionally rare single-year design subtype. Mint coiners must have been concerned that die breaks would form between the rays, which would reduce die life. This failed to happen, and few pieces are seen even with die cracks between the rays. Die stress is greatest near the borders, where the planchet expands toward the rim. Struck from moderately rotated dies. Census: 27 in 65, 9 finer (11/08).
*From The Scott Rudolph Collection.* (#5426)
***See: Video Lot Description***

## Exceptional 1853 Arrows and Rays Quarter Great Type Coin, MS65

**3743** **1853 Arrows and Rays MS65 NGC.** Mint Director George Eckert convinced Congress it was necessary to reduce the weight of minor silver coinage to discourage hoarding. The act of February 21, 1853 specified a new weight for the quarter of 96 grains, down from the previous weight of 103.125 grains. To mark this change, arrowheads were placed on either side of the date, and rays were placed above the eagle on the new coins. The arrows remained on the quarter design until 1856, creating a three year type coin. A large mintage of 15.3 million pieces was achieved

The present coin is a pleasing example of this interesting date. All design elements are sharp, and the fields are blemish free. Abundant mint luster is evident, under accents of gold and lavender toning. A better type coin would be difficult to find. Census: 27 in 65, 9 finer (11/08).
*From The Findley Collection.* (#5426)

## Richly Toned MS65 1853 Arrows and Rays Quarter

**3744 1853 Arrows and Rays MS65 NGC.** In order to denote a weight reduction from 6.68 grams to 6.22 grams, Mint Director George N. Eckert ordered James Barton Longacre to modify the Seated quarter by adding arrows on both sides of the date and rays in the reverse field around the eagle. The sudden influx of gold in the world market forced an increase in the relative value of silver, thus making the United States' silver coins worth more as bullion than as circulating currency. This weight reduction, which the Mint also applied to the half dime, dime, and half dollar, solved this problem and allowed silver to circulate once again.

With a record-setting (for the era) original mintage of 15.2 million pieces, the 1853 Arrows and Rays is an understandably common coin in most grades. High grade Mint State survivors, however, are elusive, and few display the colorful toning that graces the peripheries of the present Gem. Cobalt-blue, salmon-pink, orange-gold, and sea-green shadings are seen on both sides in varying intensity. The areas in and around the centers are either brilliant or lightly toned. Sharply struck, carefully preserved, and bound for inclusion in a high quality type set. (#5426)

## Captivating 1854 Arrows Quarter, MS66

**3745 1854 Arrows MS66 PCGS.** The Arrows, No Rays, No Motto subtype of Liberty quarter lasted for just two years, 1854 and 1855, and 1854-dated pieces from Philadelphia make up a majority of all survivors. Unsurprisingly, such coins enjoy tremendous popularity with type collectors, and Gem and better survivors are particularly prized.

Both sides of this delightfully preserved Premium Gem offer impressive luster beneath peach, blue, and violet patina that is vibrant, yet subtle. The strike shows slight softness toward the right obverse, but the detail is crisp elsewhere. Carefully preserved, as demanded of the grade assigned, with only a handful of trivial flaws visible in out-of-the-way areas. Previously certified as MS66 by NGC; insert accompanies lot. Population: 6 in 66, 5 finer (11/08).
*From The James Mossman Collection.* (#5432)

## Attractively Toned 1855 Arrows Gem Quarter

**3746** **1855 Arrows MS65 PCGS. CAC.** It remains a numismatic mystery why newly appointed Mint Director Col. James Ross Snowden decided to continue to use arrows at both sides of the date for 1854 and 1855 quarters, but not incorporate the reverse ray design as found on quarters dated 1853. The result of his decision was a two-year type coin in the Seated quarter series of which representatives are common in circulated grades, but exceptionally challenging to locate in Gem Mint State.

This MS65 piece has lovely, soft mint frost and each side shows varying degrees of golden-russet toning with significant arcs of gunmetal-blue at the margins, where it is joined by whispers of lavender on the obverse. Boldly struck, and free from mentionable contact. Population: 6 in 65, 2 finer (11/08).
*From The Scott Rudolph Collection.* (#5435)
***See: Video Lot Description***

## Elegant Gem 1855 Arrows Quarter

**3747** **1855 Arrows MS65 PCGS.** Though it was not struck to the same extent as its 1854 counterpart (under 2.9 million pieces compared to the nearly 12.4 million examples for the 1854 quarter), the 1855 is nonetheless valued nearly the same, as a prominent alternative for the type collector. This enchanting Gem is softly lustrous beneath beautiful patina, navy, violet, and gold-rose. Sharply struck central devices are refreshingly well-preserved, as are the fields. Impressive and interesting eye appeal from the challenging two-year Arrows at Date, No Rays subtype. Population: 6 in 65, 2 finer (11/08). (#5435)

## Vibrant 1855-S Arrows Quarter, MS64

**3748** **1855-S Arrows MS64 PCGS. CAC.** The 1855-S quarter circulated widely among the California mining communities, resulting in most survivors being well worn or damaged. Mint State pieces are few and far between. Indeed, Larry Briggs assigns these a high R.6 rarity rating in his 1991 *Liberty Seated Quarters* reference. PCGS and NGC have graded only 15 Uncirculated examples.

While most Mint State 1855-S quarters are weakly struck, this near-Gem specimen exhibits crisp definition, save for very minor softness in the hair atop Liberty's head. Whispers of light gray and olive-tan reside on both sides, each of which displays vibrant luster. A few light contact marks and grazes deny Gem status. Population: 3 in 64, 1 finer (11/08).

*From The Scott Rudolph Collection.* (#5437)

***See: Video Lot Description***

## Exceptionally High Grade 1867-S Quarter MS64, Second Finest Certified

**3749** **1867-S MS64 NGC.** Eliasberg-Richmond. Briggs 1-A. This reverse die was used to strike the 1866-S, the 1867-S, as well as 1869-S quarters. The mintage of the 1867-S was 48,000 pieces, but as is well known silver coinage circulated widely on the West Coast. Which means, of course, that few high grade examples have survived. If we take the number of coins certified by both of the major services, the number in all Mint State grades is a paltry six pieces (11/08). This is the second-finest certified, with the finest an incredible MS67!

The surfaces show the bright cartwheel luster common to most San Francisco products. This flashy mint luster enlivens the pale overlay of golden toning on each side. The devices are fully struck, and there are no observable abrasions on the obverse or reverse. This is a rare opportunity for the Seated quarter collector.

*Ex: Eliasberg Collection (4/1997), lot 1489; Richmond Collection (David Lawrence, 3/2005), lot 1465.* (#5471)

***See: Video Lot Description***

## Fine Sharpness 1870-CC Quarter

**3750** **1870-CC—Improperly Cleaned—NCS. Fine Details.** "Prior to 1997, the only quarter eagle with the 'CC' mintmark that had sold for $100,000 or more was the 1873-CC Without Arrows. Then in April of 1997 the most spectacular 1870-CC quarter crossed the auction block for $187,000! This event was another in the slowly rising 'CC' price evaluations that began at the Menjou Sale in 1950."

So writes Carson City Mint pundit Rusty Goe in his utilitarian *The Mint on Carson Street*. While this piece is not quite in the company of the Eliasberg specimen that traded hands in 1997—the only Mint State example known—it is nonetheless a desirable specimen of one of the rarest and most desired coins from that fabled Western mint. Goe favors an estimate of only 40 assay pieces as being released into circulation, pointing out that most examples seen are "... in the Very Fine grade or lower. Many of the lowest grade specimens are seen with corrosion, porosity, severe scrapes, scratches, graffiti, and cleaned surfaces."

The present example, while cleaned, probably long ago, shows a goodly amount of pleasing detail on both sides, and there are no mentionable problems, only some minor abrasions and moderate wear consistent with the Fine details grade. (#5477)

## Captivating Choice VF 1870-CC Quarter

**3751** **1870-CC VF35 PCGS.** While the mintage figure of 8,340 pieces already suggests that the 1870-CC quarter is a rarity, that number alone may not tell the whole story, since several numismatic writers (among them Walter Breen and Rusty Goe) have questioned whether part or nearly all of that production was withheld from circulation. It is known that of those pieces which escaped the Mint, most circulated heavily. The present coin, though moderately worn, is actually upper-end for the issue. Dappled lavender and gold patina drapes still-lustrous surfaces. Though several surface abrasions are visible on the obverse under close scrutiny, these flaws have little impact on the eye appeal. Population: 4 in 35, 7 finer (11/08). (#5477)

## Sharp, Rare 1872-S Select Quarter
## The Eliasberg Specimen

**3752 1872-S MS63 NGC.** Ex: Eliasberg. The 1872-S quarter (83,000 pieces minted) is rare and very difficult to locate in any condition. Indeed, NGC and PCGS have certified only 41 examples, ranging in grade from AG through Mint State. The latter are extremely rare. In his *Liberty Seated Quarter* reference, Larry Briggs assigns Uncirculated specimens an R.7 rarity rating (4 to 12 known). NGC and PCGS have certified 12 pieces, an unknown number that may be resubmissions.

The current Select example displays satin-like luster, along with occasional splashes of gold-tan color. An attentive strike leaves strong definition on the design features. Indeed, except for minor softness in the hair atop Liberty's head, these appear to be fully delineated. Light, unobtrusive handling marks limit the grade. This is a sharp coin for the designated grade, and also has a great pedigree!
*Ex: Harlan P. Smith Collection (S.H. and H. Chapman, 5/1906; John H. Clapp; Clapp Estate, 1942, to Louis E. Eliasberg, Sr.; The Louis E. Eliasberg, Sr. Collection (Bowers and Merena, 4/1997), lot 1501.* (#5483)

## Splendid 1873 Closed 3 Quarter, MS63
## The Finest Certified

**3753** **1873 Closed 3 MS63 NGC.** The Philadelphia quarters of 1873 come in three distinct varieties: the 1873 Closed 3, the 1873 Open 3, and the 1873 With Arrows. Of these variants, the last has the highest mintage, with over a million pieces struck, and the 1873 Open 3, though it has a mintage of only 172,000 coins, is one of the most available Motto quarters issues in Mint State. The 1873 Closed 3 version, however, is highly elusive, with a total production of just 40,000 business strikes, and most survivors showing a degree of wear. NGC and PCGS have certified just 20 examples ranging from Very Fine to Mint State.

Though the 1873 Closed 3 remains an underrated issue in most grades, connoisseurs are aware of how elusive the issue is in Mint State condition. NGC and PCGS have certified a mere five Mint State representatives between them, and the MS63 coin offered here is the single finest for either service (10/08). A well executed strike leaves crisp definition on the design elements, and both sides offer strong, shining luster. The obverse displays violet-inflected iridescence, while the reverse is essentially brilliant. A scattering of fine obverse marks precludes a finer designation.

*Ex: The Henry W. Bass, Jr. Collection, Part I (Bowers and Merena, 5/1999), lot 2010 (Bowers and Merena catalogers report this coin pedigreed to the Harry X. Boosel "1873" Collection, RARCOA, 4/1972, lot 601, unplated).*

*From The Scott Rudolph Collection.* (#5484)

***See: Video Lot Description***

## Scarce and Appealing 1873-CC Quarter The Only CC With Arrows Date VF25

**3754** **1873-CC Arrows VF25 NGC.** The Mint Act of 1873 established a new weight for the quarter of 6.25 grams, an increase of .45 grams. To mark the change, arrowheads were placed on both sides of the date, as had been done 20 years earlier when the weight had been increased. At Carson City, only an extremely small mintage of 12,462 pieces was coined. This date is the only With Arrows CC quarter, and is avidly pursued by type collectors.

The present coin is an attractive example of this rare issue. Much detail remains on all design elements and the fields are problem free. Larry Briggs indicates this issue is prohibitively rare in grades of XF and above, so trying to improve on this handsome specimen is a daunting challenge. Census: 2 in 25, 6 finer (11/08).
*From The Findley Collection.* (#5492)

## Boldly Struck 1874-S Arrows Quarter, MS66

**3755** **1874-S Arrows MS66 PCGS.** Examples of this issue are scarce in Mint State; most come from an old West Coast bank hoard of 80 to 100 pieces dispersed in 1949 (Larry Briggs, *Liberty Seated Quarters,* 1991, p. 186).

The present MS66 specimen is boldly struck. Only a couple of the right-side peripheral stars show a blunt strike in the centrils. Coruscating luster radiates from the silver-gray surfaces, accented on the obverse by blushes of light sunset-orange, and powder-blue on the reverse. A top-notch example of this scarce type coin. Population: 27 in 66, 1 finer (11/08).
*From The Scott Rudolph Collection.* (#5495)
***See: Video Lot Description***

## Elusive 1875-CC MS64 Quarter

**3756** **1875-CC MS64 PCGS.** 1875-CC quarters are much more elusive than their 140,000 piece mintage would suggest. Rusty Goe, in *The Mint on Carson Street*, estimates that 300 to 500 examples are extant in all grades, of which 45 to 70 are in Uncirculated condition. PCGS and NGC have certified slightly more than 30 Mint State specimens.

This satiny surfaces of this near-Gem representative display light silver-gray color and pleasing luster. A well executed strike leaves strong definition on the design features, except for the usual softness in portions of Liberty's hair and on the centrils of stars at the right border. Just a few minor ticks prevent Gem status. Population: 6 in 64, 2 finer (11/08).

*From The Scott Rudolph Collection.* (#5499)

***See: Video Lot Description***

## Deeply Toned 1877 Seated Quarter, MS68

**3757** **1877 MS68 NGC.** The deep, iridescent mottled toning on the obverse is an unusual blend of deep amber, cinnamon, and ocean-blue, heaviest around the rims and with centers that are still silver-colored. The reverse has much lighter golden patina around the rims, occasionally deepening to brown and blue. An interesting, small patch of prooflikeness is noted on the reverse at ED, but elsewhere the surfaces show mostly consistent, satiny luster. The strike is exceptionally bold, bringing out the detail and also articulating the clash marks visible in the obverse fields, from the high points of the reverse. Numerous small die cracks appear on both sides, most notably one on the reverse that joins most of the peripheral lettering. Of the nearly 11 million examples of this plentiful issue, this piece appears to have been struck from one of the dies that was approaching the end of its useful life. Census: 7 in 68, 0 finer (11/08). (#5504)

## Exceptional MS67 1877-CC Seated Quarter

**3758 1877-CC MS67 PCGS.** In 1877, the fabled Carson City Mint produced a near-record 4.2 million quarters, second in quantity only to the 4.9 million pieces for the Centennial-year issue. Accordingly, collectors desiring a CC-mint quarter for type sets usually select the 1876-CC and 1877-CC quarters to fulfill that purpose. Although it was not yet known, the 1877-CC quarter production would be the last million-plus-coin quarter emission, as the introduction of the Morgan or "Bland" silver dollar in the following year would reduce the manufacture of other silver coins to token levels in order to accommodate the flood of the new cartwheels.

This splendid Superb Gem offers stunning, original amber-gold and cinnamon coloration on the obverse, with the reverse offering peripheral tinges of ice-blue and lilac centers. Despite the moderate intensity of the colors, there is much luster radiating forth, producing a visual treat and a coin of exceptional beauty. Population: 6 in 67, 0 finer (11/08). (#5505)

***See: Video Lot Description***

## Finest Certified Superb Gem 1878 Carson City Quarter

**3759 1878-CC MS67 NGC.** Relatively early in 1878, the Carson City Mint began production of Morgan dollars, and apparently no quarters were struck thereafter at the Western facility, due to the pressing Treasury obligation to fulfill the Bland-Allison Act. The 1878-CC quarter mintage ended at 996,000 pieces, significantly less than that of its 1876-CC and 1877-CC predecessors.

Thus it comes as little surprise that only a single 1878-CC quarter has met the lofty standards of the MS67 grade. That important numismatic prize is offered in the present lot. The surfaces are fully brilliant and remarkably devoid of marks, almost as if it was lifted with gloved hand from the dies as the last of its kind. Briggs' "cancelled obverse" variety (1-A) with a heavy straight diagonal die scratch (as made) across Liberty's waist. Census: 1 in 67, 0 finer (11/08).

*Ex: FUN Signature (Heritage, 1/2002), lot 6764.*
*From The Scott Rudolph Collection.* (#5509)

***See: Video Lot Description***

## Radiant 1880 Quarter, MS67

**3760** **1880 MS67 PCGS. CAC.** Type Two Reverse, attributed by short serifs on the lower part of the A in STATES, well distant from the lower serifs of T and T. As per Larry Briggs, *Liberty Seated Quarters,* there is a diagonal die scratch deep within the eagle's mouth, and a small die lump on the right inside portion of the O in GOD.

This low-mintage (13,600 business strikes) Superb Gem quarter displays radiant luster and dramatic splashes of blue-green, purple, and gold-tan patina. The strike is intricate aside from a few of the upper right star centers. Near-pristine surfaces prevail on both sides. Population: 8 in 67, 0 finer (10/08).

*From The Scott Rudolph Collection.* (#5512)

***See: Video Lot Description***

## Low-Mintage 1886 Quarter, MS66

**3761** **1886 MS66 PCGS. CAC.** The 1886 has the second lowest mintage in the Seated Liberty quarter series (5,000 business strikes), and is considered the rarest Philadelphia Mint issue (Larry Briggs, 1991). PCGS and NGC have graded fewer than 100 specimens in all grades.

Prooflike fields on this near-Gem example establish strong contrast with frosted design elements. A thin layer of golden-gray patina races over both sides, and a well executed strike leaves sharp definition on the devices. A few minute obverse marks possibly keeps this better date quarter from an even higher grade. Population: 11 in 66, 1 finer (11/08).

*From The Scott Rudolph Collection.* (#5518)

***See: Video Lot Description***

LIBERTY
1841

# PROOF SEATED QUARTERS

A 15% BUYER'S PREMIUM ($9 MIN.) APPLIES TO ALL LOTS.

## Breathtaking 1841 Quarter, PR66
## The Finest Certified Example

**3762** **1841 PR66 NGC.** Ex: Pittman-Kaufman. The only Gem-quality proof 1841 Seated quarter in existence, this piece is the finest of just four proofs that are available to collectors, so far as we know. In his May 1998 cataloging of this 1841 quarter when it was part of the John Jay Pittman Collection, David Akers writes: "This Proof 1841 Quarter, especially given its considerable superiority in terms of condition to the only other Proofs known, is one of the rarest and most important of the many Proof Liberty Seated coins in the John Jay Pittman Collection."

And rare and important this Premium Gem is. In his 1988 *Encyclopedia*, Breen says there are "4 proofs known." Larry Briggs, in his *The Comprehensive Encyclopedia of United States Liberty Seated Quarters,* writes of the mintage: "2+ proofs-2 verified." A mere four specimens have been reported in the population reports-NGC has only certified this PR66 Pittman-Kaufman specimen, while PCGS has graded a PR58 and two PR61s.

Based on our auction records research, we believe the following are the only known 1841 proof quarters:

1. **PR66 NGC. The present specimen.** Sam Kabealo (1941); 1959 ANA Sale, lot 2480; New Netherlands (54th Sale, 4/1960), lot 1113; John Jay Pittman (David Akers, 10/1997), lot 1302; The Phil Kaufman Collection of Early Seated Proof Sets, Part Two, (Heritage, 1/2008), lot 3020.
2. **PR60.** Superior (6/1985), lot 757, Possibly the piece later certified PR61 by PCGS.
3. **PR58 PCGS.** Superior (10/1990), lot 3531.
4. **Proof.** Smithsonian Institution.

There are only a few useful die characteristics on each side. The shield point on the obverse is directly over the right side of the upright of the first 1. The digits in the date appear to slant to the left, and the 41 are slightly closer than other pairs of digits. Several of the vertical elements in the shield on the reverse extend through one or more horizontal crossbars.

A solid strike brings out exquisite definition on all of the design elements of this of this incredible PR66 coin. Liberty's hair and the eagle's plumage are fully delineated, as is the foot with its complete separation from the sandal and its straps. Deep mirrored fields establish pronounced contrast with the design elements when the coin is tilted beneath a light source, and medium intensity violet, cobalt-blue, and gold in the fields further serves to highlight the lighter champagne-gold and soft blue hues of the central motifs. Both faces exhibit impeccable preservation, though we make mention of what Akers referred to as "... a few very light contact marks hidden under the toning in the right obverse field." In summary, enough cannot be said about the fantastic eye appeal exuded by this finest-certified 1841 proof quarter, which will undoubtedly find a new home in a top shelf collection.

## Choice Proof 1843 Quarter Dollar
## Last Offered in 1957

**3763** **1843 PR64 NGC.** Although a few light hairlines and other tiny contact marks are evident in the fields, the surfaces are fully mirrored with light cameo contrast, and the entire piece has lovely pale gold surfaces with outstanding pewter-gray, steel-blue, and iridescent toning.

The date is about centered in the space between the border and Liberty, and appears to slant up slightly to the right. The shield point is between the 1 and 8, nearly over the left edge of the 8. Heavy die polish lines are visible along the right side of the obverse shield, and into the drapery to the right of the shield. Star 7 is slightly recut. Most of the vertical shield lines on the reverse extend far into the horizontal crossbars, and line 2 of stripe 2 appears to reach the top of the shield.

When we offered the Kaufman specimen in July 2008, we presented a roster of five pieces, along with two additional appearances. This coin is different from any of the five specimens in the roster, and, in fact, matches the plate of the June 1957 Stack's sale of the Thomas L. Smith Estate. Our revised roster now includes six different examples, with just one additional appearance, labeled A in the list below.

1. **PR66 NGC.** 1946 ANA Sale (Numismatic Gallery, 8/1946), lot 442 (unplated); John Jay Pittman Collection (David Akers, 5/1998), lot 1309; Phil Kaufman Collection (Heritage, 7/2008), lot 1808.
2. **PR64 NGC.** Thomas L. Smith Estate (Stack's, 6/1957), lot 529. **The present specimen.**
3. **PR64 NGC.** Dr. Christian A. Allenburger Collection (B. Max Mehl, 3/1948), lot 1015; Floyd T. Starr Collection (Stack's, 10/1992), lot 403; Bowers and Merena (8/1998), lot 155.
4. **PR64 NGC.** Judge Joseph F. Sawicki (5/1948); John Jay Pittman Collection (David Akers, 10/1997), lot 832 (part of an 1843 Proof Set); Heritage (8/2006), lot 5187.
5. **Brilliant Proof.** Will W. Neil Collection (B. Max Mehl MBS, 6/17/1947; Amon G. Carter, Jr. Family Collection (Stack's, 1/1984), lot 630 (part of an 1843 Proof Set).
6. **Proof.** Smithsonian Institution.

A. **Proof.** Davis-Graves (Stack's, 4/1954), lot 354, impaired. Not plated and unlikely to be identified in the future. It is either the same as the present specimen, an entirely different piece, or never a proof in the first place.

*From The Findley Collection.* (#5537)

***See: Video Lot Description***

LIBERTY
1844

1844

UNITED STATES OF AMERICA
QUAR. DOL.

# Spectacular 1844 Quarter, PR66
# Probably the Finest Known

**3764** **1844 PR66 NGC. CAC.** Ex: Pittman-Kaufman. The rarity of the 1844 proof quarter is attested to by the solitary example certified by either NGC or PCGS, this NGC-graded PR66 coin pedigreed to the John Jay Pittman and the Phil Kaufman collections.

Additionally, Larry Briggs, in his *The Comprehensive Encyclopedia of United States Liberty Seated Quarters*, says of the 1844 quarter that there are "approximately five proofs," and Walter Breen, writing in his 1988 *Complete Encyclopedia of United States and Colonial Coins*, also contends that there are "Five proofs traced." He elaborates on these in the 1989 *Encyclopedia of United States and Colonial Proof Coins, 1722-1989*: (1) "Smithsonian Institution, from Mint." (2) "Ex Dr. Judd cased set." (3) "J.H. South: 507." (4) "LM 6/71:717." (5) One other impaired piece seen years ago, but I have long since lost track of it."

We feel the estimates by Breen and Briggs are clearly too high. David Akers presents a more complete discussion of the 1844 proof quarter in his October 1997 catalog of the *Pittman Collection*:

> "This is the rarest silver denomination of the year in proof with possibly only three examples known; other than the one reportedly in the Smithsonian Institution and the example in the Mathew Stickney original Proof set (Lot 1788 in the 1907 auction of his collection), I have not seen or heard of another. Breen's two other proofs mentioned in his *Proof Encyclopedia* are J.H. South: 507 and Lester Merkin 6/71:717, the latter cataloged by Breen himself, but not really a Proof. If the South coin was a legitimate coin, then there are four known. Still, this is one of the greatest rarities among all Liberty Seated Proof coins, comparable to the 1841 Dime and the 1840 and 1841 Quarters."

Aside from the appearances mentioned above, our search of auction records has turned up no further examples. Our roster supports the comments made by Akers:

1. **Proof 66 NGC. The present coin**. Numismatic Gallery (4/1948); The John Jay Pittman Collection (David Akers, 10/1997), lot 833; The Philip Kaufman Collection of Early Seated Proof Sets, Part Two (Heritage FUN Sale, 1/2008), lot 3025.
2. **Proof.** Smithsonian Institution.

***Additional Appearances***
**A. Proof.** Lester Merkin (6/1971), lot 717.
**B. Proof.** J.H South (Stack's, 2/1951), lot 507.

The current Premium Gem offering displays beautiful natural toning with various iridescent colors, including reddish-gold, cobalt-blue, and gold-beige, the palette being slightly deeper on the obverse. A penetrating strike delivers uniformly sharp definition to every design feature; even the sandal and straps on Liberty's foot exhibit complete separation. The date is level and centered, and shows repunching on the upper part of the lower loop of the 8, and on the lower crossbars of the two 4s. There are a number of very tiny spikes from the denticles into the field by the 11th, 12th, and 13th stars, along with some faint die polish lines intermixed with a few unobtrusive hairlines in the reverse fields.

The overall technical quality and aesthetic appeal of this spectacular coin validates the CAC green label designation. As previously mentioned, it is not only extremely rare, it is the only one certified, and is probably the finest known.

A 15% BUYER'S PREMIUM ($9 MIN.) APPLIES TO ALL LOTS.

# Magnificent 1845 Quarter, PR66
# The Finest Certified

**3765** **1845 PR66 NGC.** Ex: Pittman-Kaufman. The 1845 proof quarter being offered in the present sale once resided in John Jay Pittman's proof set sold intact by David Akers in May 1998 as lot 1711. Akers writes that the coins were contained in an original wood presentation case bound in burgundy-colored Morocco leather. He also notes that this was not an original set, since Pittman purchased most of the coins individually, but says: "... the gold coins undoubtedly constitute an original set and it would also seem that the Half Dime, Dime and Quarter came from the same original set. Therefore, I have decided to offer the set intact rather than break it up and sell the individual pieces."

Akers estimated that five or six 1845 proof quarters survive when he cataloged the Pittman coin more than a decade ago. Larry Briggs wrote in his *Liberty Seated Quarters* book that about six proof are known, and Walter Breen gave a similar total of six pieces known in his *Complete Encyclopedia*. NGC and PCGS have graded a combined total of nine submissions, this PR66 being the finest.

The following roster of 1845 proof quarters results from our survey of auction records:

1. **PR66 NGC. The present specimen.** Menjou Collection (Numismatic Gallery, June 1950), lot 715; John J. Pittman (David Akers, May 1998), lot 1711, as part of a complete 1845 proof set; the Phil Kaufman Collection (Heritage FUN Sale, 1/2008), lot 3030.
2. **PR65 NGC.** William Dickinson Collection (Chapman Brothers, March 1894); J. M. Clapp; Clapp Estate (1942); Louis E. Eliasberg, Sr.; Eliasberg Estate (Bowers and Merena, April 1997), lot 1437; Phil Kaufman; Bowers and Merena (January 1999), lot 1112.
3. **PR63.** Earle Collection; Ryder Collection; New Netherlands (49th Sale, June 1957), lot 1152.
4. **Proof.** Smithsonian Institution.

***Additional Appearances***

**A. PR64.** Harmer Rooke (November 1989). This piece is either the same as number 3, or it is a fifth example.

The present 1845 proof quarter is attributed as Briggs 5-E, based on the classification system published by Briggs in his Seated Liberty quarter treatise. Obverse 5 is described as a proof die with the date recut, the extra digits left of the final figures. Briggs did not give details about Reverse E, but stated that it is also a proof die. All 12 vertical stripes on the reverse shield appear to pierce the horizontal stripes above, with 8,9,10 the most prominent, and extending to horizontal stripe 5. This differs from the reverse of the Eliasberg coin, where Bowers and Merena catalogers note that vertical stripes 1,2,5,10, and 11 pierce the above horizontal stripes, with 10 and 11 being the most prominent.

This Premium Gem is beautifully toned, with the obverse primarily a medium reddish-gold color with blue and violet at the periphery. The reverse is equally attractive, but the color is somewhat deeper reddish-gold turning to blue at the border. A solid strike manifests itself in sharp definition on the design features, further enhancing the coin's outstanding eye appeal. Close scrutiny with a glass reveals impeccable surface preservation, such that we are hard pressed to identify pedigree markers. Perhaps a minuscule tick left of the date will help serve this purpose. This issue is obviously a great rarity, and the present coin is the finest of the few known pieces.

***See: Video Lot Description***

# SEATED QUARTERS

UNITED STATES OF AMERICA
QUAR. DOL.

# Marvelous 1853 Arrows and Rays Quarter, PR66 Cameo

**3766** **1853 Arrows and Rays PR66 Cameo NGC.** Ex: P. Kaufman. The 1853 issues are considered the rarest and most desirable proof Seated Liberty proof. All denominations are rare, especially the quarter dollar and half dollar. The Premium Gem Cameo proof offered here is second finest of four or five certified proofs.

Walter Breen recorded a proof mintage of five coins for each silver issue through the half dollar. However, it is not known where he obtained these figures. Breen also claims that the proofs were coined on March 3, 1853, on the strength of a comment made by Harold Newlin in 1883. Newlin claimed that the first half dimes with arrows were made on March 3, 1853. Since April 29 was the first coinage of record, Breen decided that the proofs of all denominations were made on March 3.

David Akers published a census of 1853 Arrows and Rays quarters in the May 1998 John Jay Pittman Collection catalog, which we have expanded as 10 years have passed since that sale. Our roster lists seven different examples, although one or two of these can be discounted as prooflike business strikes. Only four of the following seven pieces have been certified as proofs.

1. **PR66 Cameo NGC. The present coin.** The Phil Kaufman Collection of Early Proof Sets, Part One (Heritage, 8/2007), lot 1785. This piece does not match any of the following.
2. **PR65 NGC.** Louis E. Eliasberg, Sr. (Bowers and Merena, 4/1997), lot 1454; Heritage (1/1998), lot 6782; David Lawrence (3/2005), lot 1522. In the Eliasberg catalog, Dave Bowers described this piece as MS64, prooflike, noting "possibly a candidate for 'proof' attribution." Since the time of that sale, it has been certified as a proof.
3. **PR64 NGC.** Jerome Kern Collection (B. Max Mehl, 5/1950), lot 1445; John Jay Pittman (David Akers, 5/1998), lot 1325; Bowers and Merena (8/1999), lot 141; Goldberg Coins (2/2002), lot 704; Superior (1/2004), lot 287.
4. **MS64, prooflike.** Thomas L. Elder; Norweb Collection (Bowers and Merena, 3/1988), lot 1594. Dave Bowers cataloged this as a prooflike business strike in the Norweb catalog, but a decade later Dave Akers included it in his census of proofs.
5. **PR63 PCGS.** Stack's, Auction '80, lot 1184; Stack's, Auction '90, lot 143; Stack's (5/1992), lot 2659; Superior (6/1999), lot 2099; Superior (10/2000), lot 4360; Goldberg Coins (5/2001), lot 561; Superior (1/2004), lot 2354.
6. **Proof.** Lester Merkin (6/1968), lot 291; Stack's (10/1990), lot 1638.
7. **Proof.** National Numismatic Collection; Smithsonian Institution.

NGC has certified a PR67 piece in addition to those listed above. We have no further notes about that piece, probably a resubmission of one of the above listed coins.

The obverse field is deeply mirrored, and the reverse field is lightly mirrored, with numerous die polish lines visible on both sides. Slight mirrored surface appears between the vertical shield stripes on the reverse. No clash marks, die cracks, or other defects can be found. Both arrowheads and the date are recut, visible mostly on the 53 and right arrowhead. The shield point is over the right base of the 1, or about centered between the 1 and 8. The reverse has faint die scratches inside the Q. Short die lines extend up to the left from the dentils outside of stars 11, 12, and 13.

Bold design elements on each side suggest the proof status of this Premium Gem. Every individual detail is bold and completely defined. Every central line in each of the 13 stars are complete. The head detail is stronger than any seen to date. No toning is present on either side, thus the brilliant silver surfaces allow maximum contrast between the fields and devices. The left obverse field has a shallow blemish between Liberty's arm and star 2. A partial wire rim is visible around much of the obverse and reverse circumference. Census: 1 in 66 Cameo, 1 finer (10/08).

*From The Scott Rudolph Collection.* (#85548)

***See: Video Lot Description***

## Outstanding 1854 Arrows Quarter, PR66
## The Eliasberg-Kaufman Specimen

**3767** **1854 Arrows PR66 NGC.** Ex: P. Kaufman. Briggs 6-F. Pedigreed to the Eliasberg collection, this Premium Gem is likely one of the finest known. Dave Bowers wrote that the Eliasberg coin "stands in the front rank of this elite group." Today it is tied with one other coin for the finest proof certified by NGC.

Walter Breen mentions four 1854 proof quarters in his *Proof Coins* reference, with the comment that this variety is "about as rare as the dime." He is apparently implying that about 10 examples are known. The actual number of survivors is probably about 15 pieces, the quantity estimated by Dave Akers in the May 1998 Pittman catalog.

Positioned high in the exergue, the date and arrows are separated from the device and border, and the shield tip is over the left curves of the 8. The lower edge of the left arrow is doubled near its tip. The lowest crossbar of the reverse shield extends left through the shield border, into the wing. Faint vertical striations are visible above QU and the reverse arrows. These die characteristics are identical to Breen's description in his *Proof Encyclopedia*. Incorrectly identified as "Briggs Reverse A" in the Eliasberg catalog, although the descriptions of Reverse A and Reverse F in the Briggs reference are quite similar.

Every individual element of the design is full and sharp. Liberty's head and drapery, along with each of the 13 stars have bold definition. Feather and claw details are intricately defined. Strong cameo contrast is created by deep mirrored fields and highly lustrous devices, subdued by the lovely magenta, blue, and gold toning. All aspects of this Premium Gem are beautiful and appealing. Census: 2 in 66, 0 finer (10/08).

*Ex: John G. Mills (S.H. and H. Chapman, 4/1904); J.M. Clapp; John H. Clapp; Clapp Estate via Stack's (1942); Louis E. Eliasberg, Sr. (Bowers and Merena, 4/1997), lot 1456; The Phil Kaufman Collection of Early Proof Sets, Part One (Heritage, 8/2007), lot 1790.*
*From The Scott Rudolph Collection.* (#5550)
***See: Video Lot Description***

## Rare and Important 1854 Arrows Quarter, PR66, Tied With One Other As Finest Ex: Parmelee-Woodin

**3768** **1854 Arrows PR66 NGC.** For its appearance in the second Pittman auction, David Akers wrote, "In 1854, the Mint increased its production of proof sets and, although they were not yet available to the general public (the practice of selling to the public-at-large did not begin until 1858), they were available to individuals who contacted the Mint directly with a special request to purchase a proof set. The exact mintage of 1854 proof sets is unknown, but perhaps as many as 30-40 silver and copper proof sets were minted and distributed. Although others have stated a contrary opinion, I feel it is most likely that the proof 1854 quarters were struck only for inclusion in those sets and that all survivors today come from the original 30-40 pieces minted. All denominations of 1854, except perhaps the silver dollar, are rarer in proof than generally realized, and it is my opinion that no more than 12-15 proofs of this denomination still exist. This specimen is certainly among the finest and it is also the one with perhaps the most famous pedigree."

This is a fully struck Premium Gem with pearl-gray centers and light peripheral sun-gold toning. There are no obvious hairlines, and a line on the lower right obverse field, parallel with the lower left inner point of star 12, appears to be of mint origin. This line can be used to confirm the Parmelee-Woodin-Pittman pedigree in any future market appearances.

Tied with one other PR66 NGC for the honor as the finest certified (11/08). The other PR66 is the Eliasberg-Kaufman specimen, which sold in Heritage's 2007 Milwaukee ANA Signature for $138,000.

*Ex: Lorin G. Parmelee Collection, (New York Coin & Stamp, 6/1890), lot 1248; William H. Woodin Collection, 1911, lot 454; Wayte Raymond, 2/1947, lot 407; John Jay Pittman Collection, Part Two, 5/1998, lot 1328.* (#5550)

## Extraordinary 1856 Quarter
## PR67 Cameo

**3769 1856 PR67 Cameo NGC.** Ex: P. Kaufman. Briggs 10-H. NGC has certified just two Cameo proofs as Superb Gem pieces, and they are the two finest examples of the date known to us. The current offering is one of these two pieces.

Perhaps as many as 100 proof quarters were minted in 1856, with this total combining the distribution of sets and a few individual examples of the denomination. Based on estimates by Walter Breen (1989), Larry Briggs (1991), and David Akers (1998), survivors are thought to number between 25 to 30 coins. NGC and PCGS have certified 51 1856 proof quarters to date, including eight Cameos. Several of these specimens are undoubtedly resubmissions.

Upright 5 in the date as always for the 1856 quarters. The date is high and slightly closer to the base of Liberty, about centered horizontally with the shield point midway between the 1 and 8. Faint die lines are evident in the date area, extending up from the border, with others elsewhere in the obverse fields. The first five stars show faint recutting and the lower edge of the skirt line is minutely doubled. All known 1856 proof quarters have a peculiar and characteristic reverse die bulge extending entirely through the wing from AM of AMERICA, to the arrows and OL of DOL. Called the "signature die" for this proof issue by Dave Bowers. Heavy die polish lines are located below the eagle.

This is an amazing Cameo proof with full brilliance on both sides. An exacting strike leaves complete delineation on the design features, even on the minute details. Impeccably preserved surfaces reveal just a couple of faint ticks left of the rock, and a couple of more to the right of the eagle's neck. These are mentioned solely for pedigree purposes. Census: 1 in 67 Cameo, 1 finer (10/08).

*Ex: The Phil Kaufman Collection of Early Proof Sets, Part One (Heritage, 8, 2007), lot 1795.*

*From The Scott Rudolph Collection.* (#85552)

***See: Video Lot Description***

A 15% BUYER'S PREMIUM ($9 MIN.) APPLIES TO ALL LOTS.

## Gorgeous 1858 Quarter, PR67
## The Finest Certified

**3770** **1858 PR67 NGC.** Ex: P. Kaufman. This Superb Gem proof ranks high in the lineup of proof 1858 quarters, probably the finest known. It is the best ever certified by NGC over 20 years of certification.

The original mintage of 1858 proof silver coins is open to question. The long estimated number struck is 80 pieces. However, this mintage figure did not originate with mint records, but apparently with one of the Chapman brothers. Later estimates of the 1858 silver proofs rose to between 225 and 300 coins, based largely on David Bowers' research on the 1858 proof dollar for his Silver D*ollars and Trade Dollars of the United States* treatise. The 300-piece figure was extrapolated to the other 1858 silver proof denominations, and found its way into the current *Red Book*. Based on the certified population, at least for the quarters (95 certified specimens), it would appear their mintage was probably between 80 and 200 and some specimens. In any event, 1858 proof quarters are rare in the Gem and finer levels of preservation.

The base of the 1 is lightly doubled, and the final 8 appears to lean slightly to the right, and is low. Faint die lines connect the D and S and others connect the S and O. Both dies are otherwise well made with few diagnostic features. Larry Briggs assigned proofs the variety number 5-E in his *Liberty Seated Quarter* reference, although the present coin lacks the "Small die crack from second arrowhead, through third arrowhead, facing into field over 'O' of 'DOL'."

The obverse has a few minor lint marks, similar to most proof quarters of the date. The fields are deep mirrors beneath pale champagne toning with intense peripheral gold, lilac, and blue near the borders, especially on the obverse. The central devices are dominated by champagne-gold. Both sides yield modest field-motif contrast when the coin is tilted ever so slightly beneath a light source. A sharp strike is indicated by full design features, and a high wire rim with bold dentilation over each side. Census: 1 in 67, 0 finer (6/07).

*Ex: Louis E. Eliasberg, Sr. (Bowers and Merena, 4/1997), lot 1468; The Phil Kaufman Collection of Early Proof Sets, Part One (Heritage Auction Galleries, 8/2007), lot 1800.*

*From The Scott Rudolph Collection.* (#5554)

***See: Video Lot Description***

## Magnificent 1860 PR67 ★ Quarter

**3771** **1860 PR67 ★ NGC.** In 1860, the Mint struck exactly 1,000 proofs for the quarter issue, a figure that would remain tied for the highest such mintage for the denomination until 1876. Yet examples remain elusive in the numismatic marketplace today, particularly with strong eye appeal. Likely, a number of them went unsold and were melted.

The magnificent specimen offered here has not merely survived for over a century. Its magnificent preservation bespeaks careful custodianship, and the coin's bold definition and vibrant patina combine for amazing eye appeal. Bands of rose, green-gold, aqua, violet, mustard-gold, magenta, and sky-blue grace the obverse, while the reverse has an outer band of sapphire that surrounds a rose-violet center. A small depression to the left of Liberty's shield arm may assist with future identification. Census: 1 in 67 ★, 0 finer (10/08).
*From The Scott Rudolph Collection.* (#5556)
***See: Video Lot Description***

## Gorgeous PR67 Cameo 1862 Quarter Ex: Eliasberg.

**3772** **1862 PR67 Cameo NGC.** Ex: Eliasberg. Astonishing quality for this low mintage Civil War date with only 550 proofs struck. Brilliant throughout, the design elements are completely articulated on each side, and the fields show unfathomable depth of reflectivity. Contrasted against the fields are the frosted devices that give this splendid proof its cameo effect. An impeccable pedigree that stretches back to 1894.
*Ex: William Dickinson Collection (Henry and S.H. Chapman, 3/1894); J.M. Clapp to John H. Clapp; Clapp Estate to Louis E. Eliasberg, Sr., 1942; Eliasberg I (Bowers and Merena, 4/1997), lot 1479; J.B. Worthington Collection (ANR, 5/2005), lot 210.*
*From The Scott Rudolph Collection.* (#85558)
***See: Video Lot Description***

## Gorgeous 1870 PR67 Quarter
## One of Three Finest Certified

**3773** **1870 PR67 NGC. CAC.** The 1870 quarter saw a mintage of 1,000 pieces. NGC and PCGS have certified approximately 230 coins, primarily in the PR61 to PR64 grade range. The two services have graded 25 Gems, nine Premium Gems, three MS67 specimens, and none finer.

Gorgeous toning adorns this Superb Gem. Medium intensity cobalt-blue, lavender, and golden-brown coloration resides on the obverse margins, ceding to soft gold in the center, while a subtle blend of light powder-blue and champagne-tan covers the reverse. Exquisitely struck design elements are moderately frosted, and stand out from the mirrored fields. Impeccably preserved throughout.

*Ex: Superior Galleries (8/1992), lot 355 (sold from an original 1870 Proof Set).*

*From The Scott Rudolph Collection.* (#5569)

***See: Video Lot Description***

## Exceptional 1874 Arrows Quarter, PR67

**3774** **1874 Arrows PR67 NGC.** This Superb Gem is an exquisite proof with excellent eye appeal created by a presentation of gunmetal-blue, lilac, and gold around a brilliant central obverse area. The reverse is evenly toned in attractive powder-blue and gold-beige color. An impressive strike delivers full definition to the design features. Contrast between the fields and devices is evident on both sides, slightly more so on the reverse. This is an exceptional proof quarter, as Walter Breen (1989) contends that the majority of 1874 proof quarters have been cleaned, some harshly so. Census: 6 in 67, 1 finer (10/08).

*From The Scott Rudolph Collection.* (#5575)

***See: Video Lot Description***

## Profoundly Contrasted 1877 Quarter
## PR66 Deep Cameo
## The Only Deep / Ultra 1877 Quarter Certified

**3775** **1877 PR66 Deep Cameo PCGS.** The 1877 business strike is one of the most frequently seen issues in the Seated quarter series with more than 10 million pieces struck. Proofs, on the other hand, are seldom seen with an original mintage of only 880 examples. This is an extraordinary piece that shows profound white-on-black cameo contrast on each side. The coin is brilliant throughout, and there are no obvious or mentionable post-striking contact marks on obverse or reverse. The only mark of note is a roughly circular and shallow planchet void at the end of the Liberty cap. This is the only Deep / Ultra Cameo certified in any grade by both PCGS and NGC (12/08). (#95578)

## Stunning PR67 Ultra Cameo 1878 Quarter

**3776** **1878 PR67 Ultra Cameo NGC.** Briggs 4-D. If this sharply struck coin is indicative of the issue, we cannot understand why Briggs (1991) states that the proof 1878 quarter was "very sloppily made." This coin is anything but poorly produced; the surfaces are exceptionally smooth with nary a distracting hairline to report. Rich gunmetal-blue and antique-copper surrounds the peripheral areas of each side, while the centers are brilliant. Fully struck with diagnostic rust lumps (as struck) throughout the reverse shield and no singularly mentionable identifiers. The lone Ultra Cameo or Deep Cameo coin at this grade level in the combined certified population with none finer (11/08). *From The Malibu Collection.* (#95579)

## Deeply Reflective PR67 1880 Quarter
## Ex: Eliasberg

**3777** **1880 PR67 NGC.** Eliasberg. Lustrous silver centers meld into iridescent blue, amber-gold, and fuchsia at the rims. The field-device contrast nearly merits a Cameo designation, and the piece is extremely eye-appealing. The issue was produced during an era when Morgan silver dollars were being minted by the millions, largely to the neglect of silver quarters and halves. This paucity of business strikes exerts added pressure on the proofs of the 1879-1890 era. This is a boldly struck survivor of the proof mintage of 1,355 pieces, complementing the 13,600 business strikes.
*Ex: Eliasberg Collection (Bowers and Merena, 4/1997), lot 1529.*
*From The Scott Rudolph Collection.* (#5581)
***See: Video Lot Description***

## Enchanting PR68 Cameo 1882 Quarter

**3778** **1882 PR68 Cameo NGC.** Distinctly contrasted with dynamic eye appeal. The sharply struck central devices are amply frosted and stand out from the surrounding fields, gunmetal-gray close to the centers with vibrant colors near the rims. Peripheral shadings are gold-orange and teal on each side with broader coverage on the reverse. Virtually pristine, as expected of the grade. With a mintage of 1,100 specimens, this proof issue is popular with type collectors, and the discerning enthusiast should recognize the importance of the present piece. It is the only Cameo example at this level in the combined certified population, with none finer (11/08).
*From The Malibu Collection.* (#85583)

## Magnificent 1884 Quarter, PR68 Cameo

**3779** **1884 PR68 Cameo NGC.** Writing about the 1884 proof quarters in his *Encyclopedia of United States and Colonial Proof Coins*, Walter Breen says: "... the first strikes I have seen have mostly shown inferior surfaces (often peppered with tiny nicks), poor borders and shallow relief details compared with any proofs of the period."

The PR68 specimen we offer in this lot digresses significantly from Breen's profile. Sharply impressed, heavily frosted design elements stand amidst deeply mirrored fields, and crisply defined, dentiled borders completely encircle the faces of both sides. Whispers of cobalt-blue, purple, and golden-tan patination gravitate to the rim areas, being better defined and displaying deeper hues on the obverse. A few tiny planchet flakes in the fields do not distract in the least. Census: 2 in 68 Cameo, 1 finer (10/08).

*From The Scott Rudolph Collection.* (#85585)

***See: Video Lot Description***

## Spectacular 1890 Quarter PR68 ★ Cameo

**3780** **1890 PR68 ★ Cameo NGC.** Ice-white devices and mirrored fields appear to merit an Ultra Cameo designation, although NGC has instead bestowed a Star. This was likely awarded because the specimen is fully brilliant. The strike is precise aside from the star centers, and extensive evaluation is required to locate even trivial surface imperfections. A scant 590 proofs were struck, in addition to a mere 80,000 business strikes. Mintages were low since the Mint was busy producing millions of silver dollars that then sat unwanted in Treasury vaults. Census: 5 in 68 ★ Cameo, 1 finer (11/08). (#85591)

# BARBER QUARTERS

## Impressive 1896-O Quarter, MS67

**3781** **1896-O MS67 NGC.** The 1896 New Orleans quarter, coming from a mintage of 4.484 million pieces, is available in the lower circulated grades, but becomes very scarce in the Fine and above levels of preservation. David Lawrence, in his second edition *The Complete Guide to Barber Quarters*, provides the following rarity levels for the '96-O:

F/VF, R.4;
XF, R.4;
AU, R.5; and
MS, R.6.

NGC and PCGS have certified approximately 75 examples in Mint State grades, mostly between MS62 and MS64.

This Superb Gem is a memorable coin that represents one of the classic key-dates in the Barber quarter series. While most collectors, novice and advanced, recognize the 1896-S as the important rarity in the series, its New Orleans Mint cousin is every bit as elusive in top condition, especially with a full strike.

Nearly every design feature is boldly rendered, including the star details and all of the hair strands on the obverse and the eagle details on the reverse. Only the arrow feathers near the eagle's claw show slight weakness. Each side of this coin has impeccable surfaces with only minuscule impediments on Liberty's cheek. The central obverse and reverse have creamy luster with peripheral gold, magenta, and electric-blue on the obverse and a narrower ring of the same color palette on the reverse. This piece yields impressive technical quality and aesthetic appeal. Census: 1 in 67, 1 finer (10/08).

## Extremely Rare Lustrous Gem 1901-S Quarter

**3782** **1901-S MS65 PCGS.** Three dates in the Barber quarter series stand out as rarities. Dave Bowers (2006) gives an overview: "Along the way [in the production of Barber quarters], three varieties of exceptionally low mintage were created: 1896-S, of which just 188,039 were minted; 1901-S, with 72,664; and 1913-S, with 40,000. Interestingly, the most available of these three in Mint State is the lowest-mintage 1913-S ... choice and gem pieces that are well struck and very attractive are extremely hard to find, except in just a few varieties."

PCGS currently shows 494 grading events for the 1901-S quarter (9/08). Most of those submissions grade Good 4 or lower. There are more coins certified About Good 3 than any other grade; in fact, the weighted average grade is just above Very Good 10. The number of certified 1901-S quarters from NGC and PCGS combined at any grade above Very Good 10 is 10 pieces or less, which means every example of the date graded finer than Very Good 10 can be considered very rare to extremely rare.

The reason for the preponderance of heavily worn 1901-S quarters in population data is, reasonably, that most of the quarters were used rather than put aside. It is interesting that all three of the rare Barber quarter dates are more heavily represented by low grades than high grades in comparison to the other years in the series. Those three rarities are also San Francisco issues, and the citizens of Western states tended to prefer coins rather than paper notes. Perhaps with relatively few coins to start with, the quarters kept moving from pocket to cash drawer and back again, and they were simply used up. Whatever the reason, a Mint State 1901-S quarter is rare, and a Gem example extremely rare.

The history surrounding the Barber design is enlivened by events of intrigue and self-interest, not surprising for the era. The Liberty Seated quarter design had been around since the late 1830s, and some thought it time for a change. Either because of legitimate confusion over past legislative intent, or perhaps due to other motives, Mint Director James P. Kimball worked with Senator Justin Morrill to have a bill introduced that would simplify the approval process for new coin designs. The resultant Act of September 26, 1890, allowed the Treasury to change coin designs, without Congressional approval, after an existing motif had been in use for 25 years.

Walter Breen (1988) colorfully describes what happened next: "Implementing Kimball's eccentric idea, the Treasury shortly afterward announced a competition among 10 of the best-known American artists for new coin designs — only to find that they jointly rejected the terms ... the Treasury's riposte was to throw the competition open to the public ... [Mint Chief Engraver Charles Barber's] presence among the judges was the kiss of death. The Treasury circular of April 4, 1891, giving details of the competition, elicited about 300 entries. Of these 300, only two were thought worth even an honorable mention; Barber made certain that no prize would be awarded. The new Mint Director, Edward O. Leech, called the contest 'too wretched a failure' ever to be tried again, and ordered Barber to prepare the designs himself—which is exactly what Barber had wanted all along."

Director Leech was more magnanimous toward Barber. In a letter to art critic R.W. Gilder, Leech noted that "Mr. Barber comes from three generations of mint engravers and designers, and has done excellent work in coin designing, and is in every way equipped for this important duty." Perhaps anticipating further concern about Barber, he added "artistic designs for coins, which would meet the ideas of an art critic like yourself, and artists generally, are not always adapted for practical coinage." (Don Taxay, *The U.S. Mint and Coinage,* 1966). Even today Barber's artistic abilities are debated, but nonetheless the coins bearing his designs are avidly collected.

For Barber quarter enthusiasts, the 1901-S is the premium issue of the series. The surfaces of this example are lustrous and well struck, though with a bit of softness at the hairline of Liberty and on the right edge of the reverse shield and nearby wing. The surfaces boast a pleasing palette of rose and cinnamon toning, accented with blue and silver highlights (including a blue blush on Liberty's cheek). There are no distracting marks or spots. Many collectors are happy to find a 1901-S quarter at any grade, but an example at this level of preservation and with such a remarkable appearance is a rare opportunity. This coin is sure to be a standout of the advanced Barber or type collection, admired and appreciated for many years to come. Population: 7 in 65, 6 finer (9/08).

## Magnificent MS66 1901-S Quarter

**3783** **1901-S MS66 PCGS.** Jeff Starck, in an article on the 1901-S Barber quarter for the December 26, 2005 edition of *Coin World*, highlights an unusual trend in production of the quarter denomination in San Francisco from the mid-1890s to the turn of the century. Production had slipped from the million-plus mintages turned out from 1893 to 1895 to low- to mid-range six-figure strikings in 1896 and 1897, the former issue being one of the three prominent Barber quarter keys. Production from 1898 to 1900, by contrast, was elevated. Starck asserts that "[s]ome of the increase in 1898 and 1899 was diverted to the Philippines (the United States occupied the islands beginning with the Spanish-American War of 1898, stationing land and naval forces there), but that need subsided by 1900."

These apparent American coinage residuals, as well as a smattering of older coins and certain private token issues, held the currency situation together until 1903, which saw the first dedicated coinage of the Philippines under American sovereignty, struck at both Philadelphia and San Francisco. As noted, though, the elevated production of quarters did not last. Starck quotes Barber enthusiast John Frost, who wrote in an e-mail: "By 1901, with little need for additional coins out west, and no more demand in the Philippines, the treasury simply did not need to order very many quarters in 1901, so production was very small."

The characterization is apt; according to official records, San Francisco shipped a mere 72,664 quarters dated 1901. This is one of just two five-figure mintages for the entire series. While the other, the 40,000-piece-strong 1913-S issue, has the lower production, it is substantially more available than its 1901-S counterpart, because the former issue was recognized as a low-mintage issue at the time of release and heavily saved. By contrast, the 1901-S attracted little notice. Starck cites Bill Cregan, who wrote about the issue in the Summer 1990 edition of the journal for the Barber Coin Collectors' Society: "Unlike other twentieth century rarities such as the 1916 Standing Liberty quarter, or the 1909-S V.D.B. cent, the 1901-S quarter was not recognized as such at the time of issue, and was poured into circulation to serve as pocket change." As a consequence, according to Cregan, "When Barber quarter collecting became the 'thing to do' among collectors starting in the 1930s, most of the surviving 1901-S quarters were worn slick."

A touch of numismatic fortune, however, led to one or more rolls of the low-mintage 1901-S quarter being saved at the time of release, according to several sources, these accounting for the few Mint State examples surviving today. The available supply, however, is wholly inadequate compared to demand, and the best examples continue to rise in popularity. Coins such as the present Premium Gem are particularly prized. This piece was struck late in the die life of the "B" obverse and reverse, to use David Lawrence's identification system; on the obverse, die cracks are visible through the lower peripheral elements, and the reverse shows a substantial die defect in the stars with extensive die polish lines around, perhaps an attempt to undo or minimize some injury. Neither strike nor luster is unduly affected by any of these flaws, as the shining fields and finely detailed devices attest. Occasional hints of golden-tan and pink visit otherwise silver-white fields. Aside from a single tiny mark along Liberty's jawline, mentionable solely in the name of accuracy, the surfaces are virtually pristine. In sum, a fabulous representative of this most famous Barber quarter key. Population: 3 in 66, 3 finer (11/08).
*From The Plymouth Collection.* (#5630)

## MS67 1909 Quarter With Outstanding Mint Luster

**3784** **1909 MS67 NGC.** This brilliant and lustrous Superb Gem has an intricate strike and exceptional eye appeal. As expected from its production of more than 9 million pieces, the 1909 is a common date. However, any Barber quarter is rare in MS67, and the 1909 is no exception. As Breen related in his 1988 *Encyclopedia*: "William Pukall, A.C. Gies, and Wayte Raymond during the 1930s accumulated rolls of all Barber coins ... Scarcity levels generally follow mintage figures." This coin was most likely from one of these early hoarders of Barber coinage. Census: 2 in 67, 0 finer (11/08).
*From The Scott Rudolph Collection.* (#5653)
***See: Video Lot Description***

# PROOF BARBER QUARTERS

## Imposing 1892 Quarter, PR68

**3785** **1892 PR68 NGC. CAC.** Ex: Hugon Collection. Type Two Reverse. The 1892 has the highest proof mintage in the Barber quarter series (1,245 pieces). Along with the high production, many were saved, making proofs relatively common through the Premium-Gem level. This is apparent from the approximately 500 proof coins certified, all of which except about 50 grade PR67 and PR68.

The obverse of this PR68 specimen has a mixture of iridescent crimson, lavender, gunmetal-blue, and gold colors, while the reverse is bright overall excepting a golden-brown ring about the border. The strike is razor-sharp, and the surfaces are gloriously preserved. Mirrored fields highlight frosted motifs at all angles. An outstanding coin, fully deserving of the CAC green label. Census: 9 in 68, 0 finer (11/08).
*From The Scott Rudolph Collection.* (#5678)
***See: Video Lot Description***

## Finest Certified 1895 Quarter, PR68

**3786** **1895 PR68 PCGS. CAC.** The cherry-red centers cede to ocean-blue and forest-green margins with deeply mirrored fields that give the coin even more flash. A powerfully struck specimen that shows cameo contrast on the lightly toned central reverse. A raised lintmark near the eye is as made and diagnostic for the issue. However, the surfaces are essentially perfect with no observable contact marks. A mere 880 proofs were struck (an easy-to-remember number as that is the same number struck of the 1895 proof dollar). Population: 1 in 68, 0 finer (11/08).
*From The Scott Rudolph Collection.* (#5681)
***See: Video Lot Description***

## Appealing 1896 Quarter PR68 Deep Cameo

**3787** **1896 PR68 Deep Cameo PCGS.** The mirrors of this delightful Superb Gem have seemingly limitless reflectivity, and establish strong contrast with the frosty motifs. Wisps of barely discernible light tan color race over both sides, and a decisive strike delivers complete delineation to the design elements. As carefully preserved as one could expect for a century-old coin, this example has remarkable and enduring visual appeal. A couple of minor grazes on the cheek and neck are inconsequential. This is a wonderful choice for the discerning collector. Population: 3 in 68 Deep Cameo, 0 finer (10/08).
*From The Scott Rudolph Collection.* (#95682)
***See: Video Lot Description***

## Superb 1896 Barber Quarter PR69, Ultra Cameo

**3788** **1896 PR69 Ultra Cameo NGC.** From a proof mintage of 762 pieces, this issue is one of the more available proof quarters of the era. Charles Barber's classic profile of Liberty shows to best advantage on this superb specimen. Clearly, the Mint engravers and technicians had fully mastered the techniques of proof coinage at this juncture. This coin can hold its own with any proof issue produced today.

The present specimen is a magnificent example of the minters art. The liquid, deeply mirrored fields are flawless. All design elements are frosty, and strongly delineated. The contrast is truly breathtaking. The spectacular eye appeal of this piece will inspire spirited competition from connoisseurs of Barber coinage. Census: 3 in 69 Ultra Cameo, 0 finer (11/08). (#95682)

## Exceptional 1897 Quarter, PR68 ★ Cameo

**3789** **1897 PR68 ★ Cameo NGC. CAC.** Ex: Childs Collection. A wonderfully preserved PR68 ★ Cameo with no toning on either side. The devices are snow-white and frosty while the mirrors are deep and appear black with their uniform reflectivity. As expected, a precision strike has delivered complete delineation to the design features. There are some die polish lines and faint roller marks on the obverse.

The NGC Star designation identifies coins with exceptional eye appeal, and this amazing specimen certainly meets that criterion. This piece will fit comfortably in a top-notch collection. Census: 3 in 68 ★ Cameo, 0 finer (11/08).

*From The Scott Rudolph Collection.* (#85683)

***See: Video Lot Description***

## Exquisite PR68 1905 Quarter

**3790** **1905 PR68 PCGS. CAC.** In the post-Cameo era of proof Barber coinage, often the most attractive specimens are those with considerable patina. The toning drapes what would be minimally contrasted surfaces, adding substantial visual interest. This beautifully preserved, sharply struck example meets that description, with a vibrant melange of sapphire, amethyst, green-gold, and rose patina across each side. Magnificent eye appeal. One of the finest survivors out of just 727 struck; NGC has graded just three PR68 pieces and PCGS just two, with none finer at either service (11/08).
*From The Scott Rudolph Collection.* (#5691)
***See: Video Lot Description***

## Colorful PR68 1908 Quarter

**3791** **1908 PR68 PCGS.** The 1908 proof Barber quarter, like many of its 20th century fellows, does not rate highly for attractiveness when brilliant, but patina is the great equalizer, and toned survivors can rate as well on scales of beauty as their 19th century counterparts. This exquisitely preserved specimen sports delicate blue-green and gold-orange shadings across much of each side. The strike is bold, and even under magnification, the fields come across as virtually flawless. One of just 545 pieces struck. Tied with nine others, five graded by NGC and four by PCGS, for numerically finest (11/08).
*From The Scott Rudolph Collection.* (#5694)
***See: Video Lot Description***

## Splendid 1910 Quarter
## PR68 ★ Ultra Cameo
## Tied for Finest Certified

**3792** **1910 PR68 ★ Ultra Cameo NGC. CAC.** Exactly two Ultra Cameo proof examples of this date have been certified by NGC. Almost remarkably, the only other piece to receive this designation was certified as PR68, also with the coveted Star. It is interesting to speculate whether these are in fact two separate specimens, or whether both grading events may represent this single coin. In any event, the present offering is fully brilliant with only slight violet iridescent toning on the reverse. Both sides have intense silver surfaces with deep mirrors and snowy devices. An exacting strike results in crisp definition on the design elements.
*From The Scott Rudolph Collection.* (#95696)
***See: Video Lot Description***

## Stunning 1911 Quarter
## PR68 Cameo

**3793** **1911 PR68 Cameo NGC. CAC.** This enthralling Superb Gem presents a stunning black and white appearance on both sides, and an attentive strike results in bold definition on the design features. Even under close inspection with a magnifier, no surface or rim marks are found, although an interesting "e"-shaped lint mark (as struck) is noted near the obverse rim, between stars 1 and 2, and a different shaped one occurs to the left of star 4. Surely one of the finest surviving examples of this low mintage proof issue. Only 543 pieces were struck. Census: 12 in 68 Cameo, 2 finer (10/08).
*From The Scott Rudolph Collection.* (#85697)
***See: Video Lot Description***

## Charming PR68 1914 Quarter

**3794** **1914 PR68 PCGS. CAC.** The year 1914 marked a low point for silver proofs in the 20th century, with a published mintage of just 380 pieces and many of those experiencing some form of attrition or impairment. The present piece, by contrast, has come through the decades beautifully. Powerful mirrors shine through light, dappled rose and gold patina with occasional elements of periwinkle and violet. Magnificent preservation and visual appeal, as demanded of the grade. Housed in a green label holder. Neither NGC nor PCGS has graded a numerically finer representative (11/08).
*From The Scott Rudolph Collection.* (#5700)
***See: Video Lot Description***

## STANDING LIBERTY QUARTERS

## Well Struck 1916 Quarter, MS63 Full Head

**3795** **1916 MS63 Full Head PCGS.** The 1916 quarter has been the most sought-after coin in the Standing Liberty series. Unfortunately, this issue was weakly struck. In his 2007 treatise *Standing Liberty Quarters*, J.H. Cline writes that three percent or less were struck with Full Heads. He goes on to say that the 1916 has weak horizontal and vertical shield lines, and that the rivets are usually missing on many coins, even those in Mint State.

The current Select specimen deviates from Cline's strike profile. Not only is Liberty's head Full, but all of the rivets are clearly visible, as are the shield lines, with the horizontal ones being quite crisp. Liberty's gown lines and toes are also strong, as is the eagle's plumage. Freckles of reddish-gold are scattered over lustrous surfaces, and a few unobtrusive marks just barely preclude the next highest numeric grade. This is an exceptional coin for the Standing Liberty quarter specialist, or for any collector desiring an example of this key date. (#5705)

## Desirable, Key-Date 1916 Select Full Head Quarter

**3796** **1916 MS63 Full Head PCGS.** Whispers of light tan and ice-blue coloration on this Select key-date quarter show up under magnification. Both sides yield intense luster, and each displays somewhat above-average definition on the design features. This includes not only Liberty's "Full Head," but nearly complete detail on the inner shield's horizontal lines, the outer shield's rivets, Liberty's gown lines and toes, and the eagle's plumage. Some minute contact marks concealed within Liberty's flowing gown limit the grade. Nevertheless, this is a highly attractive, desirable piece. (#5705)

## Pleasing 1916 Quarter MS64 Full Head

**3797** **1916 MS64 Full Head PCGS. CAC.** Walter Breen writes of the new 1916 Standing Liberty quarter in his 1988 *Encyclopedia*: "... the Philadelphia Mint coined some 52,000 quarters of the new design, Dec. 16-31, 1916, telling the general public nothing of the act; these were released , with the first 1917's, on Jan. 17, 1917."

The silver-white surfaces of this near-Gem specimen yield pleasing luster, and are visited by occasional whispers of powder-blue. An attentive strike results not only in fullness on Liberty's head, but also in crispness on the shield, Liberty's gown lines and toes, and the eagle's plumage. A couple of minor marks barely precludes full Gem classification.

*From The Scott Rudolph Collection.* (#5705)

***See: Video Lot Description***

## Interesting MS64 Full Head 1916 Standing Liberty Quarter

**3798** **1916 MS64 Full Head PCGS.** Though not the lowest-mintage regular-issue quarter of the 20th century (the 40,000-piece-strong 1913-S Barber quarter takes that honor), the 1916 Standing Liberty has attracted plenty of attention since its incognito debut with its more prevalent 1917 Type One sisters. This piece offers solid detail for the issue, particularly on the head and shield. Luster is impressive, with generally silver-white centers and only occasional splashes of gold and orange that visit the rims. Housed in a green label holder. PCGS has graded 83 finer Full Head examples (11/08). (#5705)

## Desirable 1916 Gem Full Head Quarter

**3799** **1916 MS65 Full Head NGC.** The 1916 quarter is usually weakly struck, especially on Liberty's head and the shield. J.H. Cline offers an explanation for this in his *Standing Liberty Quarters* book: "The dies were completed in July 1916 and lay idle until December 16 before any striking took place. Striking dies are made of high speed steel, which is difficult to rustproof. As a result, accumulated rust combined with subsequent polishing to remove the rust eroded and diminished most high points on the dies." Cline also indicates that three percent or less of 1916 quarters are struck with Full Heads.

While the current Gem offering reveals some of the typical shallowness on the design elements, they are for the most part better defined than typically seen. Liberty's head is full, some of the stripes are visible in the inner shield, all of the rivets show, and the eagle's plumage, including that on the breast and legs, is crisp. The surfaces exhibit pleasing frosty luster, are well preserved, and show just a few light toning specks. Census: 45 in 65 Full Head, 21 finer (11/08). *From The Plymouth Collection.* (#5705)

## Outstanding 1916 Standing Liberty Quarter, MS66 Full Head

**3800** **1916 MS66 Full Head PCGS.** For many years Miss Doris Doscher, better known to millions as Miss Liberty, claimed that she posed for the provocative, bare-breasted figure of Liberty on designer Hermon MacNeil's Standing Liberty quarter—a figure that, in the words of expert and author Jay Cline (whose contributions we gratefully cadge here), " ... sent women into shock, children giggling and pointing, and men taking a second look at the exposed bust on the newly designed quarter." Miss Doscher, whose stage name was Doris Doree, as she "did some acting on Broadway," was a "long-time friend and tennis partner" of the MacNeil family. Miss Doscher posed for other leading sculptors of the time, as well, and starred in several silent movies.

However, in 1972, *one day* after the death of her mother, the daughter of one Mrs. Irene MacDowell wrote to Mrs. MacNeil (Hermon's widow), saying that Mrs. MacDowell was, in fact, the model for the quarter. Mrs. MacDowell, age 92, intimated to her family and closest friends shortly before her death that *she* had posed for Hermon MacNeil, over a total of 10 days. Mrs. MacDowell had also been a former Broadway actress, and was the wife of a tennis partner of Hermon MacNeil. Since her husband would have disapproved of her posing for MacNeil, she concluded that sole credit should go to Doris Doscher. While it is entirely possible, even probable, that *both* women posed for MacNeil, given the strict standards of the era, such a decision is unsurprising.

This example of the premier Standing Liberty quarter certainly portrays Mmes. Doscher and/or MacDowell in the most flattering light. Both sides are enriched by light gray-gold patina, further enhanced on the obverse by daubs of russet, lilac, and smoke-gray. While the 1916 is always softly struck in the head and shield, this lovely Premium Gem boasts as bold a strike in those areas as is ever found, and elsewhere the strike is impeccable. Soft, satiny luster emanates from the nearly flawless surfaces. PCGS Population: 10 in 66 Full Head, 4 finer (7/08).

*From The Scott Rudolph Collection.* (#5705)

***See: Video Lot Description***

## Conditionally Rare 1916 Standing Liberty Quarter, MS67 Full Head

**3801** **1916 MS67 Full Head NGC.** The 1916 Standing Liberty quarter is a curious issue. Few examples (in absolute terms) were set aside at the time of issue, making it a seldom-encountered date in all grades. However, because of the high prices the issue commands in all grades it is generally available in major auctions, which makes it seem more available than it really is. In the ultimate grade of MS67 with a Full Head designation, though, there can be no doubt about the rarity of the 1916 quarter. This piece is one of only three so-certified at NGC, with none finer, while at PCGS there are four pieces in MS67 Full Head, again with none finer (10/08).

Much of the speculation about the redesign of the Type One Standing Liberty quarter centers around the alleged "indecency" of the exposed breast of Liberty, speculation that persists today. Novice historians (including Walter Breen) tended to overstate the role of the Society for the Suppression of Vice in the redesign process. In reality, someone with considerably more political clout was responsible for the design change. On April 16, 1917, Treasury Secretary William G. McAdoo wrote to Representative William Ashbrook of Ohio to protest the Type One quarter design. On April 30, Ashbrook introduced McAdoo's bill before Congress. The document called upon the Mint to modify the original design by increasing the concavity of the fields and repositioning the eagle with relation to the stars. To support this legislation, McAdoo asserted (erroneously) that the Type One coins would not stack properly. However trivial the complaints from the Society for the Suppression of Vice may have seemed to many Americans, an ambitious politician such as McAdoo could not afford to ignore them. Accordingly, the Treasury Secretary fabricated the charge of improper stacking to mask his real intentions. While the Mint did carry out the authorized modifications, it also significantly altered the basic design by using a chain mail vest to cover Liberty's exposed breast.

This is a truly amazing 1916 quarter. It is, in fact, a truly amazing Standing Liberty quarter regardless of date. The surfaces, brilliant throughout, exude thick mint frost that covers each side, unimpeded by the post-striking defects one would expect on a lower-graded coin. The striking details are notable, especially for the normally weak 1916 quarter, with strong horizontal shield lines, unusually sharp definition on the ear, neck, and throat of Liberty, and a sharp line separating the hair. This is an exceedingly rare opportunity for the specialist that should be carefully considered, as this date is seldom offered for sale in such a superior state of preservation. NGC Census: 3 in 67 Full Head, 0 finer (10/08).

*From The Scott Rudolph Collection.* (#5705)

***See: Video Lot Description***

## Sharply Struck 1917-S Type Two Quarter MS66 Full Head

**3802** **1917-S Type Two MS66 Full Head PCGS. CAC.** This lovely Premium Gem is a beautiful example of this early mintmarked issue. The strike is impressive for a Standing Liberty quarter, irrespective of date. We call special attention to Liberty's Full head (J.H. Cline notes that three percent or less are struck with full heads), the inner shield (displaying horizontal and vertical stripes), the gown lines, and, on the reverse, the eagle's breast feathers. Scintillating mint frost overlays both sides. Only the lightest overlay of golden iridescence is noted as the surfaces rotate under the light. Encased in a green label PCGS holder. Population: 10 in 66 Full Head, 7 finer (10/08).
*From The Scott Rudolph Collection.* (#5719)
***See: Video Lot Description***

## Lightly Toned 1918 Quarter MS67 Full Head

**3803** **1918 MS67 Full Head PCGS. CAC.** This is a remarkable Superb Gem specimen with brilliant silver surfaces that are only lightly toned in iridescent gold and violet, along with occasional splashes of yellow-green. The design elements are sharply struck, with all rivets showing. Even the top of the date is fully defined, an unusual circumstance for this date. Both sides are impeccably preserved.

The '18-P ranks among the most common dates in the Standing Liberty quarter series. However, most examples are seen in lower grades. Jay Cline (2007) notes that the 1918 is: "Probably the sleeper of the P mints in the entire series in higher grades." Population: 9 in 67 Full Head, 1 finer (11/08).
*From The Scott Rudolph Collection.* (#5721)

A 15% BUYER'S PREMIUM ($9 MIN.) APPLIES TO ALL LOTS.

## Delightful 1918-S Quarter MS66 Full Head

**3804** **1918-S MS66 Full Head NGC.** The head details on this delightful Premium Gem specimen are nothing short of phenomenal. The earhole is bold, there is complete separation of hair from forehead all the way down the length of the hairline, and the cheek, nose, mouth, eye, and rear hair details are all crisply articulated. All but three of the shield rivets are bold. The highly lustrous surfaces display just a tinge of gold, and are near-flawless. Strong die polish lines are visible in the fields, especially those of the reverse. A light vertical scratch on the obverse *holder* above Liberty's portrait does not detract at all from the coin. Census: 2 in 66 Full Head, 2 finer (10/08).
*From The Scott Rudolph Collection.* (#5725)
***See: Video Lot Description***

## Excellent AU55 1918/7-S Quarter

**3805** **1918/7-S AU55 PCGS.** An enchanting and minimally marked Choice AU representative of this popular overdate, the only error variety for the series listed in the *Guide Book*. The trace of wear visible on Liberty's knee and shield is hardly a distraction, and the luster of the lemon-toned fields is largely intact. The all-important overdate is bold, with strong delineation on the individual sides of the overlapping 8 and 7. Marvelously appealing and impressively preserved for a variety with a mean grade that does not reach XF, according to the combined certified population (11/08). (#5726)

## Notable MS63 Full Head 1918/7-S Quarter

**3806** **1918/7-S MS63 Full Head NGC.** FS-008.5. Most authentication questions involving Standing Liberty quarters surround the high-profile key 1916 issue. More rarely, the 1918/7-S overdate comes in for scrutiny, this because most attempts to replicate it are merely crude chasings of metal in the area of the date, easily identified by even those with a rudimentary sense of alteration detection.

Mary Sauvain, in her October 2, 1991 *Coin World* column "The coin detective", highlights a diagnostic that, while not present on all overdated Standing Liberty quarters, is nonetheless a solid indicator of authenticity where found. After a minority of strikes from the obverse die, it became clashed, and the most prominent evidence of that clash is found near Liberty's lower legs, most notably an incuse "E" visible to the left of her bare left (facing) leg. (Interestingly, the present example does not show the other die diagnostic highlighted by Sauvain in the same column, a die chip to the left of the star next to the artist's monogram.)

The present Select example is authentically attractive and well-defined by the standards of this *Guide Book* variety, satisfying the qualifications for Full Head status. Generally satiny luster enlivens each side, and delicate gold and silver-blue tints drape the surfaces. The date area is bold, particularly the all-important final digit, and the eye appeal is impressive. A few light abrasions in the head area account for the grade. Census: 2 in 63 Full Head, 5 finer (11/08). *From The Plymouth Collection.* (#5727)

## Condition Rarity 1918/7-S Quarter MS64 Full Head

**3807** **1918/7-S MS64 Full Head NGC.** FS-008.5. The 1918/7-S Standing Liberty quarter represents one of the most sought-after of American minting varieties, and is an important key to the series. In his fourth edition *Standing Liberty Quarters* treatise, J.H. Cline writes of this issue: "Discovered in 1937, most had circulated by then. Since there are no records to substantiate the total mintage of this piece, the total mintage could be considerably less than 7,500 pieces. Perhaps as few as 2,000-2,500?"

The availability of 1918/7-S quarters in circulated grades is evident from inspection of NGC/PCGS population figures, that indicate several hundred examples grading About Good to About Uncirculated. Slightly more than 100 Mint State coins have been graded, primarily in MS62 to MS64 grades.

Full Head 1918/7-S quarters are rare. Cline says simply: "A few struck with Full Heads: about 12 pieces." NGC and PCGS have certified fewer than 40 Full Head coins, mainly in Very Fine to About Uncirculated. Full Head Mint State examples are nearly unobtainable.

The present near-Gem is thus a very special offering. It is basically brilliant, with just the slightest blush of silver-gold on the radiantly lustrous surfaces. Three clear olive sprigs show on Liberty's headdress, and there is a clear separation between the hair and forehead. A few minor ticks barely preclude Gem classification. Census: 5 in 64 Full Head, 0 finer (10/08).

*From The Scott Rudolph Collection.* (#5727)

***See: Video Lot Description***

## Stunning 1919 Quarter, MS68 Full Head

**3808** **1919 MS68 Full Head NGC.** With a mintage exceeding 11 million pieces, the 1919 Standing Liberty quarter is available in all levels of preservation. It is also, according to J.H. Cline (*Standing Liberty Quarters*, 2007), "one of the most available with a Full Head in the teens." Cline estimates that 25% are struck with this designation. This should not be taken to mean that high-quality 1919 quarters meeting Full Head requirements are common, especially in MS68, the grade of the present offering.

In the above reference, Cline provides the diagnostics of full head examples. For the Type Two design, he requires the following: "a distinct line of separation of the hair from the temple, the cheekbone, and the throat area. It will also have an indentation, or hole, in the hair in the area of the ear. The three olive leaves will be complete down to the connecting point and perhaps raised in some very early strikes."

This Superb Gem is a coin that will be appreciated by the connoisseur, with its original frosty luster and brilliant, immaculately preserved silver surfaces. Only the faintest champagne toning can be seen on either side. Not only does the head detail meet Full Head requirements, but the balance of the design elements are also fully defined, with the sole exception of two indistinct rivets on the shield. Although NGC has certified a single finer example of this date, this piece should be fine enough to satisfy even the most fastidious collector. *From The Scott Rudolph Collection.* (#5729)
***See: Video Lot Description***

A 15% BUYER'S PREMIUM ($9 MIN.) APPLIES TO ALL LOTS.

## Interesting MS64 Full Head 1919-D Quarter

**3809** **1919-D MS64 Full Head PCGS.** The 1919-D is a notoriously poorly produced Standing quarter issue, and series enthusiasts have long been aware of just how elusive properly Full Head examples are. The present near-Gem, though it shows slight softness at the lower rivets of the shield, meets all criteria for the coveted designation, according to PCGS. Strong luster enlivens fields graced with thin mauve, lilac, and gold patina that appears in vertical bands on the obverse with a more dappled effect evident on the reverse. Highly appealing. Population: 19 in 64 Full Head, 13 finer (11/08). (#5731)

## Sharp 1919-S Quarter, MS67

**3810** **1919-S MS67 NGC.** The 1919-S is one of the key coins in the Standing Liberty quarter series, and is also one of the dates that is almost never fully struck. In this regard, Standing Liberty quarter specialist J.H. Cline estimates that only two percent are struck with Full Heads.

This Superb Gem, while showing less than full definition on Liberty's head, displays crisp detail on most of the other elements, including the chain mail, gown lines, inner shield, date, and eagle's wing feathers. All the rivets on the outer shield show, though a couple near the abdomen are weak. Lustrous surfaces display whispers of reddish-gold toning, and are well preserved. Census: 3 in 67, 0 finer (11/08). *From The Plymouth Collection.* (#5732)

## Wonderful 1919-S Quarter, MS64 Full Head

**3811** **1919-S MS64 Full Head PCGS.** The branch mint quarters of 1919 are among the most challenging issues to find with Full Head details, with the Denver and San Francisco pieces engaged in a "race to the bottom" of sorts. Only a handful of pieces reach the level of this lovely Choice coin, distinctly detailed on the head and generally well-defined with great luster. Essentially silver-white at the centers with subtle golden-tan near the rims. Minimally marked for the grade with striking eye appeal, and housed in a green label holder. Population: 13 in 64 Full Head, 13 finer (11/08). (#5733)

## Subtly Toned MS66 Full Head 1920-D Quarter

**3812** **1920-D MS66 Full Head PCGS. CAC.** Although the mintage of 3.5 million coins suggests that this is a common date, the 1920-D is actually difficult to locate in high grades, and especially so with a strong strike. This example is sharply detailed, most notably on the head of Liberty. The only weakness we see is on the lower portion of the shield where a few of the rivets are softly defined, as usual. Both sides exhibit light gold toning over frosty luster. Mint luster is uncommonly pronounced on most high grade Standing Liberty quarters and this piece is no exception. Population: 8 in 66, 4 finer (11/08).
*From The Scott Rudolph Collection.* (#5737)
***See: Video Lot Description***

## Desirable MS64 Full Head 1920-S Quarter

**3813** **1920-S MS64 Full Head PCGS.** Though the 1920-S is not quite as hard to find in Full Head Mint State as its counterpart from the previous year, such availability is relative, and Choice and better examples with sharp detail are conditionally rare. This interesting near-Gem, housed in a green label holder, offers impressive luster beneath light champagne and pink patina, the former color dominant. Solidly struck in general with only slight softness visible on the lower rivets of the shield. Eye appeal is superb for this challenging S-mint issue. Population: 30 in 64 Full Head, 21 finer (11/08). (#5739)

## Lustrous 1921 Quarter MS66 Full Head

**3814** **1921 MS66 Full Head PCGS. CAC.** Quarter dollars were only coined at Philadelphia during the year 1921, and today they are elusive in all grades, especially in Gem and higher levels of preservation. This piece is one of the finest existing examples from a mintage that approached 2 million coins. The surfaces are highly lustrous, and exhibit minuscule speckles of nearly imperceptible gold-tan color. All of the design features on both sides are sharply detailed, including full head and shield definition. Only five percent of this date are struck with Full Heads, according to J.H. Cline (2007). Population: 19 in 66, 1 finer (10/08).
*From The Scott Rudolph Collection.* (#5741)
***See: Video Lot Description***

## Amazingly Lustrous 1923 Quarter MS67 Full Head

**3815** **1923 MS67 Full Head NGC.** This is an exceptionally smooth, well struck representative of this obtainable P-mint issue—discounting the presence of Full Head details, which Cline estimates occur on only about 10% of the issue. Bagmarks and other surface blemishes are conspicuously absent, and every design element is not only present, but also crisply detailed. All 10 toes on Liberty's feet are visible, and all the rivets in the shield are sharp. Intense mint frost radiates over fully brilliant surfaces. NGC has seen only this single 1923 quarter at this grade level, with one finer (11/08).
*From The Scott Rudolph Collection.* (#5743)
***See: Video Lot Description***

## Flashy 1923-S Quarter MS66 Full Head

**3816** **1923-S MS66 Full Head PCGS.** The 1923-S, with a mintage of 1,360,000 pieces, is one of the key coins of the Standing Liberty quarter series. Only five percent are estimated by J.H. Cline (2007) to have been struck with Full Heads.

This Premium Gem features not just Full Head detail, but displays strong definition on the chain mail, all of the rivets, and near completion of the vertical and horizontal lines of the inner shield. A medley of pastel olive-green, violet, and orange-gold patination adorns the radiantly lustrous, well preserved surfaces of each side. Population: 27 in 66, 4 finer (10/08).
*From The Scott Rudolph Collection.* (#5745)
***See: Video Lot Description***

## Vibrant 1923-S Quarter MS67 Full Head

**3817** **1923-S MS67 Full Head NGC.** The 1923-S Quarter, one of the most asked-for issues in the entire series regardless of grade, is an elusive coin from the standpoint of both absolute and condition rarity. Only 1.36 million pieces were struck, and Jay Cline (2007) estimates that just five percent attain full head status.

This Superb Gem example shows vibrant, frosted mint luster over both sides and nearly perfect surfaces. Hints of champagne-golden color are slightly more noticeable along the lower half of the reverse. An attentive strike brings sharp (though not quite full) detail to the inner and outer shields. Census: 6 in 67 Full Head, 0 finer (11/08).
*From The Plymouth Collection.* (#5745)

## Highly Lustrous 1926 Quarter, MS68 One of Two Finest Certified

**3818** **1926 MS68 NGC.** One of the two finest known 1926 quarters at either NGC or PCGS, the present MS68 example boasts a luscious, lightly patinated obverse in apricot-gold and jade-green hues, with a brilliant reverse. A just-miss Full Head coin, lacking that designation only because not much of the ear hole is visible, and only two of the three olive sprigs. Even close scrutiny with a loupe fails to reveal any mentionable abrasions, large or small. All of the shield rivets are present, but none of the shield lines are visible. Bold luster emanates from each side of this beautiful and unimprovable specimen.
*From The Scott Rudolph Collection.* (#5754)
***See: Video Lot Description***

## Charming, Condition Rarity 1926 Quarter MS67 Full Head

**3819** **1926 MS67 Full Head NGC.** With a sizeable original mintage of 11.3 million pieces, the 1926 does not seem like a coin that would be hailed as rare, or even scarce, in most grades. Nevertheless, specialists in this series realize that the 1926 is as poorly produced as many S-mint issues in this series, and only about 10% (per Cline) of the original mintage was produced with Full Head definition.

This sharp Superb Gem is far better detailed on Liberty's head than the typical Uncirculated piece. Charming ice-blue and lilac patina covers the pleasing surfaces, more heavily on the obverse. The preservation is nearly perfect, with no mentionable marks on either side. A thin, horizontal die crack extends through the top of Liberty's head to the E of LIBERTY. Despite the moderate toning, full mint luster bursts through, providing the punch to make this coin what it is, a condition rarity MS67 example. Census: 2 in 67 Full Head, 0 finer (11/08). *From The Scott Rudolph Collection.* (#5755)
***See: Video Lot Description***

## Lovely MS64 Full Head 1926-S Quarter

**3820** **1926-S MS64 Full Head PCGS.** In general, the strike is above-average, and a small but distinct indentation at Liberty's ear ensure Full Head status. Luster is pleasing, and subtle gold and blue elements visit otherwise pale silver-gray surfaces. A handful of small ticks on Liberty's figure account for the grade. While this San Francisco issue is not so elusive as its famous 1927-S neighbor, it must be recognized as one of the more challenging Standing Liberty quarter issues with Full Head details. Housed in a green label holder. Population: 21 in 64 Full Head, 22 finer (11/08). (#5759)

A 15% BUYER'S PREMIUM ($9 MIN.) APPLIES TO ALL LOTS.

## Sharply Struck 1926-S Quarter MS66 Full Head

**3821** **1926-S MS66 Full Head NGC.** The 1926-S quarter, sporting a mintage of 2,700,000 pieces, is among the most weakly struck of all San Francisco coins in the 1920s. Indeed, J.H. Cline, in his fourth edition *Standing Liberty Quarters*, estimates that one percent or less were struck with Full Heads.

Weak strikes are not the only problem with 1926-S quarters—there simply are not that many Mint State pieces available. Paul Green, in an August 12, 2003 *Numismatic News* article titled "1926-S Standing Liberty Quarter Attractive," presents a tentative explanation for this paucity:

> "... quarters (were) a good deal of money for collectors of the day. Back in 1926, there were not that many people collecting quarters, and if some did save nice new quarters each year, just a few years after the 1926-S was released the stock market crashed and the Great Depression began. A lot of nice coins almost certainly were returned to circulation by financially strapped owners during the tough years that followed, and a date like the 1926-S would have been a leading candidate."

The Premium Gem offered in this lot is one of the few coins struck with a Full Head. Strong definition is apparent on the chain mail and stars as well, though two or three of the lower rivets reveal the usual weakness. Vibrant luster invigorates both sides, each of which is color free and impeccably preserved. Die polish lines are visible in the fields, especially those on the reverse. In summary, this piece exhibits great technical quality and aesthetic appeal. Census: 4 in 66 Full Head, 0 finer (11/08). (#5759)

## Superb 1927-D Quarter With Full Head Definition

**3822** **1927-D MS67 Full Head NGC.** Bold head details, radiant luster, and the iridescent toning seen on the right portion of the obverse are the hallmarks of this delightful and exceedingly rare piece. Cline's latest edition on the series estimates that only 3% of the recorded mintage of 976,000 pieces comes with Full Head details. Confirming the rarity, this piece is one of only two coins so graded at NGC, while PCGS has yet to certify a piece as MS67 Full Head (4/07). Of course, the fame and rarity of the 1927-D is much overshadowed by its sibling, the 1927-S, which has a recorded mintage about 40% of the 1927-D. And of course, both pieces are, along with the fabled 1916 Standing Liberty, the only coins in the series boasting mintages of less than 1 million coins (although it must be said that the mintage of the 1916 is a whole order of magnitude less than those of the 1927 issues).

The present specimen shows a clear earhole, three complete olive sprigs, and complete articulation of the hairline from the head all the way down to the back of Liberty's neck. All of the shield rivets are present, although a couple on each side are weak. The bottom two stars are flat, and most of Liberty's toes are missing, but these are fairly trivial complaints given the overall quality of the piece and the sharp striking details present elsewhere. The reverse is mostly brilliant, with just a touch of silver-gray patina in evidence and a dash of ice-blue and almond near the lower rim. Distracting abrasions are, as expected for the grade, entirely absent. Census: 2 in 67 Full Head, 0 finer (11/08).

*From The Scott Rudolph Collection.* (#5763)

***See: Video Lot Description***

## Elusive 1927-S Quarter, MS66

**3823** **1927-S MS66 PCGS.** The 1927-S, with a very low mintage of 396,000 pieces, is one of the most elusive issue of the Standing Liberty quarter series, especially in Very Fine and better grades. Moreover, the '27-S comes weakly struck, particularly on Liberty's head and the shield lines. J.H. Cline (2007) writes that less than one percent are struck with Full Heads.

The current Premium Gem offering is awash with bright luster, and displays a few blushes of light brown patina, a bit more so on the reverse. The design elements reveal the typical weakness on the shield, though Liberty's head, while not full, exhibits better definition than normally seen. Well preserved surfaces show just a few grade-consistent marks. Population: 29 in 66, 4 finer (10/08).
*From The Scott Rudolph Collection.* (#5764)
***See: Video Lot Description***

## Gorgeous MS66 1927-S Quarter

**3824** **1927-S MS66 NGC. CAC.** This lot offers a truly fine Premium Gem representative of this important 20th century quarter issue. The surfaces possess full luster that shines powerfully through warm and faintly dappled champagne-gray patina. Select angles also reveal olive-tinged rim accents, as well as a blush of powder-blue iridescence on the obverse at the date. Well-defined overall, if softly struck as usual on Liberty's head, and an attractive representative of this most notable condition rarity for the series. NGC has graded a mere four numerically superior examples (11/08).
*From The Plymouth Collection.* (#5764)

## Exceptional 1927-S Select Full Head Quarter

**3825** **1927-S MS63 Full Head NGC.** This attractive Select 1927-S quarter is one of the few examples of this issue that displays a Full Head; J.H. Cline (2007) contends that less than one percent exhibit this feature. The date and mintmark are also bold, though some of the other design elements, such as the shield and eagle's torso feathers, reveal the usual softness. Each side displays pleasing luster and is covered with medium density mauve-blue toning. A few trivial marks, more so on the reverse, define the grade. Only two other pieces have been so graded by NGC, with 11 coins in finer condition (10/08). This is a rare opportunity for the specialist to acquire a Full Head 1927-S quarter in a pleasing Uncirculated grade with problem-free surfaces.
*From The Scott Rudolph Collection.* (#5765)
***See: Video Lot Description***

## Sharp 1928-D Quarter MS66 Full Head

**3826** **1928-D MS66 Full Head PCGS. CAC.** A 1928-D quarter is not easy to locate with a Full Head. In his treatise on *Standing Liberty Quarters*, J.H. Cline contends that one percent or less of this issue is struck with a Full Head, and says: "In Full Head, the MS65 or better is a much sought-after coin and not readily available." The population data bear out Cline's contention about the availability of Full Head Gem and finer pieces: PCGS and NGC have certified a little more that 40 MS65s, fewer than 30 MS66s, and a mere three MS67 Full Head coins.

A solid strike on this Premium Gem transcends Liberty's Full Head to include crisp definition in the chain mail, the vertical stripes of the inner shield, and a considerable amount of the eagle's plumage. The surfaces possess strong luster, and display whispers of barely discernible sky-blue and golden-tan color. A few minuscule obverse marks are well within the parameters of the grade classification. Population: 16 in 66 Full Head, 2 finer (10/08).
*From The Scott Rudolph Collection.* (#5769)
***See: Video Lot Description***

## WASHINGTON QUARTER

### Superlative MS66 1932-S Quarter

**3827** **1932-S MS66 NGC. CAC.** The 1932-D and 1932-S Washington quarters are the classic key-date issues in the series, elusive and necessary to complete a collection. This piece is amazing with remarkable satiny luster and exceptional design definition. Both sides are deep golden-brown, accented by lighter gold and iridescent toning. Seldom does an opportunity appear to acquire an exceptional Premium Gem 1932-S quarter. In fact, the combined population of NGC and PCGS totals just nine examples at this grade, and none that are any finer. Census: 5 in 66, 0 finer (11/08). (#5792)

## PROOF WASHINGTON QUARTER

### Imposing PR69 1937 Quarter
### The Finest Certified

**3828** **1937 PR69 NGC.** The 1937 quarter saw a proof mintage of 5,542 pieces. Numerous examples have survived to the present day, as evidenced by the several hundred coins certified by NGC and PCGS. Most of these are concentrated in the PR63 to PR66 range. Superb Gems can be located with some searching, but higher level coins are nearly unobtainable.

The present lot offers the single finest certified 1937 proof quarter, a PR69! Brilliant surfaces display a dusting of pastel green, orange, blue, purple, and violet colors, and are virtually pristine. Well executed design elements complement these attributes, all of which add up to imposing eye appeal. (#5976)

## EARLY HALF DOLLARS

### Moderately Toned 1794 Fifty Cent VF25, O-101

**3829** **1794 VF25 PCGS.** Ex: Meyer Collection. O-101, High R.3. Star 1 pierces lowest curl near center, the point of star 15 joins lower edge of bust, there are 21 berries, 10 left and 11 right, and there is a die crack from the reverse edge at 9:00 to the pair of leaves below the first S in STATES. There is a light crack from the edge through the F of OF to the leaf below, but it does not appear to turn upward toward the last S, precluding O-101a designation.

Light orange patina dominates the obverse, accented with electric-blue and lavender at the margins, while electric-blue dominates the reverse, which is splashed with orange-gray. Sharply defined, including strong dentilation. A few small circulation marks are not serious. (#6051)

### 1795 2 Leaves Half Dollar, O-116, R.4, XF40

**3830** **1795 2 Leaves XF40 PCGS.** O-116, R.4. On this R.4 variety the first star extends "entirely through a tight lower curl," according to Overton, and star 2 touches the second-lowest curl. The "rough, lumpy" die break runs from beneath star 1 to star 3, but not yet to star 3. Another nearby crack runs up the milling to the rim near star 5. Another crack runs from stars 6 through 9, yet another from BERTY to star 10. On the reverse, the stars are arranged 7x9, and the left base of the T in UNITED and the right base of the R in AMERICA are embedded in the eagle's wings. The surfaces on this piece are silver-gray, with some deep blue peripheral accents and moderate luster remaining. (#6052)

## Choice AU 1795 Two Leaves Half, O-121

**3831** **1795 2 Leaves AU55 NGC.** O-121, High R.4. This variety is quickly identifiable by the bold remnants of a star under the Y in LIBERTY. Apparently the engraver sunk star 9 before realizing that the upper legend was incomplete. The star detail was then partially effaced and the Y properly entered into the die. And thus the famous "16 Star, LIBERT" variety that could have been was averted! Such is the joy of early American coinage. Other die imperfections are observed on O-121. The obverse shows a 2-mm graver's slip emanating from Liberty's second lowest curl and the upper serif of the 5 in the date is boldly recut. On the reverse, traces of another letter—possibly an E—are visible under the upper portion of the last S in STATES. In addition, C and A in AMERICA are heavily repunched. Heavy clash marks are typically found on both sides of this die marriage.

The current O-121 half dollar is the second finest example, in terms of certified grade, that we have offered since the beginning of our online auction archives in 1993; the best being the AU58 piece sold as part of our January 2008 FUN sale. That coin realized $46,000 with the buyer's premium. The fourth edition of the Overton reference lists five coins in its Condition Census: three Mint State coins, an AU55 example, and an XF45 piece. Although the subject of Condition Census rankings is subject to scrutiny, it is safe to say that this piece resides in the upper echelon of known survivors for the variety.

Light gray surfaces are the canvas for the boldly struck details of this attractive offering. Traces of luster are observed in the protected areas, but more so on the reverse. For the sake of accuracy, we note a small area of light planchet roughness to the left of stars 14 through 16, and a few minor adjustment marks on the right reverse rim. Census: 34 in 55, 79 finer—all varieties considered (11/08). (#6052)

## Outstanding 1795 2 Leaves Half Dollar MS62, O-116

**3832** **1795 2 Leaves MS62 PCGS. CAC** O-116, R.4. On this variety, star 1 pierces the first curl, and star 2 touches second curl above end, and the letters UNIT from UNITED are clashed beneath LIB and star 8. On the reverse, there are seven berries left and nine right, with four under the right (facing) wing, three inside and one outside, the left base of T in UNITED and left base of R in AMERICA are embedded in wings, and clashed dentils are noted above UNIT.

The year 1795 saw a relatively large production of nearly 300,000 half dollars. Most survivors are well worn. Mint State pieces are quite elusive and command hefty premiums.

Even, medium gray fields with bluish undertones on this MS62 example contrast nicely with the lighter gray devices, and a splash of pale violet occurs on the reverse. The surfaces are smooth and somewhat reflective, and soft luster is evident. The design elements are well centered and nicely struck. Liberty's hair displays excellent definition, as do the eagle's wing, tail, and neck feathers, while those on the breast and legs reveal the usual softness. Strong dentilation is noted on both sides, and adjustment marks are not evident on either. A crack begins below star 1 and runs up between the milling and the stars in the left.

This is an outstanding example of the variety, and will undoubtedly have significant appeal to both the variety specialist as well as the type collector with the most discriminating eye. Population: 6 in 62, 13 finer (11/08).

*From The James Mossman Collection.* (#6052)

***See: Video Lot Description***

## Pleasing 1796 15 Stars Half Dollar
## Fine 15, O-101, R.5

**3833** **1796 15 Stars Fine 15 PCGS.** O-101, R.5. One of the rarest of U.S. type coins in any level of preservation, the two-year Draped Bust Small Eagle half dollar owes its existence to the Bank of the United States. This quasi-government institution was given a twenty-year charter (1791-1811) by Congress. According to Mint records, the Bank deposited silver ingots toward the end of 1796 or the beginning of 1797 to be minted into U.S. coinage. Perhaps this was done at the urging of Mint Director Elias Boudinot as part of his "make work" program to alleviate a temporary "silver famine" that was occurring during this time, or maybe the Bank had a real need for half dollars for its customers. Whatever the reason, had the Bank not made this deposit, or had it not specifically requested the delivery of half dollars, it is quite likely there would have been *no* coinage of Draped Bust Small Eagle halves!

Delicate silver-gray patination bathes both sides of this Choice Fine example. Strong definition characterizes the design elements, especially Liberty's lower hair strands and most of the dentilation. Some minor circulation marks are scattered over each side, and a few short, light near-horizontal adjustment marks are visible in the hair curls beneath the ear. These adjustments, along with a darkly toned planchet chip on the lower right portion of the right bow, identify the coin. This is a very pleasing example of the 1796 15 stars variety. (#6057)

## Important 1797 Half Dollar
## Fine 15, O-101a

**3834** **1797 Fine 15 PCGS.** O-101a, High R.4. The 1796-1797 half dollar, with its small 3,918-piece mintage, is perhaps *the* most desirable and sought-after type U.S. type coin. Previous estimates of surviving specimens range from fewer than 100 to about 300 coins; empirical research being conducted by this cataloger (Jon Amato) has accounted, to date, for about 240 or so examples.

Al Overton, in his *Early Half Dollar Die Varieties,* recognizes four varieties of the Draped Bust Small Eagle half. Coins dated 1796 display either 15 stars (O-101) or 16 stars (O-102). The two 1797-dated varieties (O-101 and O-102), each of which contains 15 stars, are differentiated by the alignment of the reverse laurel and palm-branch wreath with respect to the peripheral lettering. The 1797 O-101 developed numerous reverse cracks (O-101a), and was eventually replaced by a new reverse (O-102).

The O-101a Choice Fine example offered here exhibits the reverse cracks typical for the later die state of the variety, along with the diagnostic light crack through the second star to the hair curl. Light gray hues are seen on the motifs, which are highlighted against the darker gray-violet fields. The design elements are nicely centered on the planchet and display relatively strong definition for the designated grade. Indeed, many of Liberty's hair strands are delineated, and there is an overall sharpness to the facial features and the bust. The usual weakness is noted along the right obverse and reverse borders. It is our opinion that PCGS downgraded the coin because of an old, toned-over pinscratch that traverses the obverse from star 4 to star 13. It is almost imperceptible, however, until the piece is examined with a magnifier. Close inspection reveals no other significant abrasions or mint-made adjustment marks. This piece will fit comfortably into any mid to high-grade date/variety or type collection. (#6060)

## Attractive 1797 Fifty Cent
## VF25, O-101a

**3835** **1797 VF25 PCGS.** O-101a, High R.4. The 1796-1797 Draped Bust half dollar with Small Eagle reverse was produced using three obverse and two reverse dies. The 1797 Overton-101 variety employed the third and final obverse paired with the same reverse die that was used for both 1796 issues (O-101, 15 stars, and O-102, 16 stars). 1797 O-101 eventually develops a light crack from the rim through star 2 to Liberty's curl, and more significantly, myriad reverse cracks (O-101a).

Aside from the light obverse crack, the present VF25 1797 O-101a variety displays a later state of the reverse die. A rather heavy crack runs from the rim through the right side of the O in OF through the wreath to the lower middle part of the right (facing) wing. Another crack from the bottom of the O travels through the three uppermost palm leaves to the eagle's head. A heavy crack extends from the rim between D of UNITED and S of STATES through the four laurel leaves and the upper part of the wing to the lower neck. Another crack branches from this one to connect the lower parts of ST in STATES, where it joins a crack running from the rim through the first T and the wreath to the eagle's upper neck. A light crack is visible between the left (facing) leg and wing, and yet another travels from the rim to the upper right serif of the U in UNITED.

Bluish-gray toning on the obverse margin cedes to light silver-gray centers, while the former color dominates the reverse fields and highlights the lighter gray design elements. The devices exhibit nice detail, including separation in much of Liberty's hair and about half of the eagle's wing plumage. The few small contacts scattered about are of little consequence, and adjustment marks are absent. A couple of minute marks on the forehead above Liberty's eye are mentioned for pedigree purposes. This is a great, attractive coin for a type or date/variety collection.

A 15% BUYER'S PREMIUM ($9 MIN.) APPLIES TO ALL LOTS.

## Sharp 1797 Half Dollar, VF30
## Desirable O-102 Variety, Low R.6

**3836** **1797 VF30 NGC.** O-102, Low R.6. The appearance of a Draped Bust Small Eagle half dollar in a public auction sale is always a cause for excitement. This two-year design type, bearing the dates 1796 or 1797, is after all, necessary to complete a collection of U.S. type coins. Its minuscule mintage of 3,918 pieces, and its survival rate of between 240 and 300 examples, results in keen competition when a specimen does come up for sale.

Each date consists of two varieties: the 1796 Overton 101 variety displays 15 obverse stars, while the 1796 Overton 102 has 16 stars; the two 1797 varieties - Overton 101 and Overton 102 - (both of which contain 15 stars) are distinguished by the alignment of the reverse wreath relative to the peripheral legend. The 1797 Overton 101 reveals a leaf tip ending at the left serif of the base of the second T in STATES, while the leaf extends entirely beneath the base of the T on the 102 variety. Also, a leaf tip ends mid way between the O and F of OF on the 1797 Overton 101, but extends only to the left serif of the base of the F on the Overton 102.

For a considerable period of time, it was thought that the 1796 16 stars (Overton 102) was the scarcest of the four varieties. However, revised rarity ratings by the Bust Half Nut Club (see Stephen J. Herrman, *John Reich Journal*, June 2005), lowered the 1796 16 stars variety from R.6 to high R.5, and elevated the 1797 Overton 102 from R.5 to low R.6. These new R values are consistent with independent findings published by this cataloger (Jon Amato) in the February 2005 issue of the *John Reich Journal,* Volume 16, Issue 2, p.14.

The 1797 Overton 102 offered in the current lot displays light silver-gray surfaces that take on whispers of lavender and sky-blue along the borders, especially on those of the obverse. The design features are nicely centered on the planchet, and retain sharp detail throughout. Most of the reverse dentilation is bold, while that on the right obverse reveals the usual weakness. Both sides are devoid of adjustment marks. A small abrasion about mid way between the ear and curl on the neck serves to pedigree the piece, as does a small mark to the right of the eagle's beak. A few other minute contact and slide marks scattered over each side, that are certainly within the parameters of the grade designation for a 200 plus year-old coin, are also noted.

Advanced collectors seeking to complete a U.S. type set or a date/variety collection of early half dollars are encouraged to give this classic piece of Americana serious consideration. There are relatively few opportunities for one to acquire a 1796-1797 Draped Bust half dollar specimen of this quality. Consequently, we expect this lot to generate spirited bidding.

*From The Scott Rudolph Collection.* (#6060)

***See: Video Lot Description***

## Notable 1797 XF Details Fifty Cent Elusive O-101 Variety, R.5

**3837 1797—Improperly Cleaned—NCS. XF Details.** O-101, R.5. The reverse die of the 1797 O-101 variety evidently cracked quite early, resulting in the vast majority of 1797 O-101 coins having myriad reverse die cracks, this later die state designated O-101a. Stephen Herrman recognizes this in his *Auction & Mail Bid Prices Realized for Bust Half Dollars, 1794-1839*, Autumn 2008, Number 33, where he gives the early die state an R.5 rating, and the later die state (O-101a) a high R.4. The 2005 Overton *Early Half Dollar* reference, on the other hand, assigns an R.5 rarity rating to both dies states. We concur with Herrman, as we have seen far fewer O-101 appearances at auction compared to O-101a examples.

One cannot help but to be struck by the sharp delineation on the design elements of this XF Details 1797 O-101 example. Liberty's hair detail is very strong, as is that on the drapery and the eagle's wing and tail feathers. Moreover, the dentilation is bold on both sides. A mix of sky-blue and purple toning concentrates at the obverse margins, leaving the center area mostly light silver-gray. The former color palette is more extensive throughout the reverse. Close examination reveals no significant abrasions, though some fine hairlines and light granularity show up under high-power magnification. Moderate adjustment marks, slanting just slightly from upper right to lower left, extend through Liberty's head from the chin on up. These are essentially the only pedigree markers on the coin.

All in all, this is a perfectly acceptable piece for a high-grade type or date/variety collection, regardless of the NCS disclaimer. The cleaning is light, and does not take away from the coin's overall appeal. Advanced collectors are sure to give this piece special attention.

## O-114a 1806 Half Dollar, MS62

**3838** **1806 Pointed 6, Stem MS62 NGC.** O-114a, R.4. The first use of obverse 9, with TY boldly doubled. Later uses of this obverse, especially for O-117, have less of the recutting visible. The reverse has a bisecting die crack from the second wing feather to the E of AMERICA. On this later state piece, the crack is bold and dramatic, forming a series of small internal cuds. The later die state is slightly more plentiful, however, the present coin may be the terminal state, and is seldom seen with such a heavy reverse die crack.

A remarkable Mint State piece with highly lustrous surfaces beneath rich orange, lilac, and blue toning on the obverse, with muted toning on the reverse. The fields are slightly reflective, especially on the obverse.

*Ex: Sheridan Downey (10/2005).* (#6071)

## Attractively Toned 1807 Draped Bust O-110 Half Dollar, MS63

**3839** **1807 Draped Bust MS63 PCGS.** O-110, R.2. Obverse: the stars have long, sharp points, the 180 in the date are large and the 7 small, the center dot in hair is 2 mm. below and slightly left of ear, and fine die cracks encircle legend and stars. Reverse: five berries with stems, the crack from top of ED in UNITED touches tip of wing, STATES at top, through last S, but terminates before reaching clouds.

A melange of cobalt-blue, gray, and orange patina runs over both sides of this Select specimen, each of which is devoid of significant marks. A well directed strike leaves near-uniform definition on the design elements, including virtually full detail on the eagle's plumage, save for minor softness on the neck. Luster resides in the recessed areas. (#6079)

***See: Video Lot Description***

## Exceptional 1807 Draped Bust Half Dollar MS64, O-110a

**3840** **1807 Draped Bust MS64 PCGS.** O-110a, R.2. The point of 1 in the date lightly touches the curl, and five berries all have stems. Heavy die cracks encircle the obverse, extending through the date and all of the stars, and across the tops of LIBERTY. On the reverse, a heavy die crack from above ED in UNITED touches the tip of the eagle's left (facing) wing, travels over the tops of STATE, and extends through the last S in STATES to the cloud below.

This near-Gem specimen exhibits sharp definition on the design features, including excellent detail on the drapery and in most of Liberty's hair, and on the eagle's breast, wing, and tail feathers. Luminous surfaces are nearly untoned except for barely discernible hints of light tan at the margins. A few minor handling marks just barely preclude full Gem status. Housed in a green-label holder. Population: 10 in 64, 7 finer (11/08).

1807 Specimen 65 PCGS

1807 Specimen 65 PCGS

A 15% BUYER'S PREMIUM ($9 MIN.) APPLIES TO ALL LOTS.

# Unique 1807 Draped Bust Half Dollar, SP65
# The Reed Hawn-David Queller Example

**3841 1807 Specimen 65 PCGS.** O-109, unique as a specimen strike. The superb, talented engraver Joseph Wright, designer of the Liberty Cap cent and half cent, was the first full-time engraver hired at the Philadelphia Mint. Tragically, he died in September 1793 during one of the annual yellow fever epidemics that killed so many early Philadelphia residents. Robert Scot was hired only two months later as chief engraver, a post he held until his death in 1823. Scot was born in 1744 and was already 50 years old when he began working for the Mint. Although Scot was later criticized for his modest talent and slow work style, among his improvements at the Mint were the use of device punches; for example, the whole head of Liberty, so that only the date, stars, and letters required addition to the working dies.

By 1807 Scot, then 63, faced serious competition from a younger rival, John Reich, who was much more talented judging from each man's artistic accomplishments. Breen writes in his *Complete Encyclopedia:*

> "John Reich sold himself into indentured service to escape to the USA from the Napoleonic Wars. As early as 1801 his name came to official attention as one of the finest engravers in the country. Opposition from Robert Scot prevented the Mint from hiring him except for occasional odd temporary assignments. But in 1807, Scot's health (for which read failing eyesight) was a source of serious concern to officialdom; accordingly, the Mint hired Reich as assistant engraver at a pittance of $600 per year.
>
> "Reich's first assignment was to create new designs for gold and silver denominations: an insult to Scot. The first ones to benefit from Reich's attention were the denominations most in demand at banks: half dollars and half eagles."

In 1796 and 1797 only the Draped Bust (a.k.a. Fillet Head) obverse was combined with the Small Eagle reverse, which was in turn replaced in 1801 by the Heraldic Eagle reverse, an imitation of the Great Seal of the United States. Both designs are attributed to Robert Scot. In 1807, when Reich joined the Mint as assistant engraver, the half dollar designs were modified yet again, this time to the familiar and ubiquitous Capped Bust or Turban Head design. Liberty now faced left and wore the Martha Washington-style "mob cap" on her head. The reverse features a more naturalistic eagle, although it bears a small shield attached to the center of its breast.

This special coin is accompanied by comments from David Hall and from PCGS co-founder John Dannreuther. David prefaced J.D.'s comments by stating:

> "The United States Mint began selling proof sets to the public for a premium price starting in 1860. Prior to that time, starting approximately 1817 and certainly in 1821 as there are examples in the Smithsonian, the Mint struck what we would recognize as proof strikings on request and sold them for face value.
>
> "From 1792 to 1817 (or 1821), the Mint did not strike what we would now call proofs. They did however, strike some coins that were so carefully and unusually struck that PCGS calls them 'Specimens' and designates them 'SP.'
>
> "The Reed Hawn/Queller 1807 Draped Bust Half Dollar graded SP65 by PCGS is one of these special coins. It has so much design detail and such unusual surfaces that one could only conclude that some special care was taken when this coin was struck. PCGS founder John Dannreuther did extensive research on this special coin and came to some interesting conclusions, which he subsequently published."

John gave an even more detailed explanation of the special nature of this coin.

> "I have studied this coin on several occasions. I believe the concentric lines are some type of polishing. For those unfamiliar with this coin, it is one of the most unusual early US coins in existence. The surfaces are like no other Draped Bust silver issue. One of my ideas (I wrote an article about this coin several years ago) included the possibility of this coin being some type of experimental striking.
>
> "It is a very unusual coin. There was no reducing machine to leave concentric lines, as the reducing machine was not installed until 1837. This led to the conclusion that the concentric lines were some type of polishing. Others may come to a different conclusion, of course, as I came to the polishing conclusion because I could think of no other reason for the lines. The coin has the deepest proof-like surface that I have seen on a Draped Bust half dollar.
>
> "When first shown the Reed Hawn/Queller 1807 half dollar, my response was stunned silence. I had known about this coin since the 1970s, around the time Walter Breen published his work on Proof coinage. Someone had come up to me at a coin show in the spring of 2004 and asked had I seen it, to which

my response was 'no,' but knew it just sold in auction and hoped for the opportunity to view it.

"Sometimes, coins that are famous are a disappointment upon viewing them, but this coin did not fall into that category. I have never seen a Draped Bust half dollar that looked like this coin—not before or since. It had deeply mirrored surfaces, especially on the obverse. Upon magnification, the reason became apparent.

"There were incuse lines on the obverse, which are the result of burnishing the planchet before striking. Burnishing lines are incuse on the coin, while die polish is raised on the coins, as they are incuse on the die. Of course, these dies were also polished, the obverse seemingly more so than the reverse die. It is possible the reverse planchet was also burnished, but the evidence is no longer visible. The increased striking pressure likely applied to this coin may have obliterated the burnishing lines on the reverse die.

"It was obvious that this coin received special care, in both its striking and preservation. It had never jangled about with others of its kind. The Draped Bust series is notorious for striking weakness in the hair of the obverse and the eagle on the reverse for the years 1806 and 1807, however, this coin is the exception. Prior to 1817, PCGS uses the prefix SP for those special coins or specimens, while Mint terminology of the era most often called them Master coins. These equate to Proof coinage of later years, when the Mint equipment allowed superior coins to be struck. These include the introduction of the tight close collar in 1827, the rim in 1828, and steam presses in 1836. Prior to these innovations, the quality of the special coinage is uneven. This coin is an exception to that adage, too, as its strike and surface quality are nearly equal to the post-1827 coinage.

"Whether one calls this a one-sided Proof, a Specimen, a Master coin, or a Special Strike, 'it is what it is.' That was the title of the article I wrote about this example in 2004. In that article, I speculated that because the 1807 was the last year of issue that it was analogous to the one-sided Proof Large Size 1829 half eagle, which was also the last year of its type. They possibly were struck as examples of the last of the series.

"Just like the 1829 half eagle, the 1807 Draped Bust half dollar had the obverse planchet burnished, the obverse die polished, and was specially struck—possibly on the press used for dollars. It shows evidence of double striking on the obverse and has the sharpest stars of any Draped Bust half dollar seen. The 1807 half dollar examined shows no evidence of contact with other coins, thus leading to the conclusion that not only was it specially struck, it has been carefully handled by its owners. It is the most spectacular Draped Bust Heraldic Eagle half dollar I have ever seen! It is what it is.

"Perhaps, it is a stretch to suppose that the 1807 half dollar and the 1829 half eagle exist for similar reasons. There are no Mint records to support this conclusion, but there are no Mint records of most Proof coinage prior to 1859, when the production figures were first published. The only reason I can imagine to have struck this numismatic caviar would have been to preserve examples of discontinued coin series.

"We may never know why these coins were struck, but collectors today are lucky, as they can examine what was the pinnacle of the Mint's output during its formative years. We can thank the early Mint personnel, especially Henry Voight (Assistant Coiner 1796-1814, Chief Coiner 1814-1839) for the striking and preservation of these treasures."

The obverse has an even layer of golden-blue patina, and the mirrored surfaces flash brightly through the color. The reverse is more deeply toned, with most of that side exhibiting cobalt-blue with a rose-colored center and brilliance at the top. This is a unique opportunity to acquire a coin from the earliest years of the Philadelphia Mint, a coin that was obviously made for some special purpose.

## BUST HALF DOLLARS

### Unimprovable 1808 O-109a Half, MS67 Tied for Finest Certified

**3842** **1808 MS67 PCGS.** O-109a, R.3. A total of 18 Lettered Edge halves—1808 through 1836, inclusive—have been certified at the MS67 level by PCGS as of (11/08). Most of the Superb Gems in the *Population Report* are concentrated in the later dates of the series although, surprisingly, four such pieces are dated 1808. A study of the O-109a die marriage suggests the possibility that a small cache of this variety was saved shortly after being minted and remained under careful custodianship until being dispersed at some point. Two of the finest 1808 half dollars—both NGC-certified MS66 coins—ever to cross the auction block at Heritage were O-109a specimens, and other evidence supports the theory that a small sampling of this variety received special treatment way back in 1808.

Regardless of variety, the piece offered here is the finest 1808 half dollar that we have had the privilege of handling. Save for nonexistent reverse milling and weakness at stars 9 and 10—typical for the variety—the strike is bold. The surfaces display a light gold patination throughout, with a heavier concentration of amber iridescence and a dapple of cobalt toning at the peripheries. Mindboggling luster and incomprehensively clean surfaces defy logic; how could a coin minted in 1808 manage to survive two-hundred years in such a remarkable state of preservation?

For the numismatic scholar, the exemplary condition of the current example offers an uncommon research opportunity. Certain features, such as die flow lines, tool marks, minute die breaks, and intricate design details—typically lost after a short time in circulation—are boldly visible. Apparently Overton and Parsley did not have access to the aforementioned high grade O-109a halves, for both the third and fourth edition of their Bust half tome lists the finest known pieces as four MS60 coins for the O-109 variety (a separate census is not provided for the late die state pieces). They also failed to identify all of the die cracks found on this and the other Premium Gem O-109a halves that we have observed. For example, a fine, circular die crack arcs from the left side of the 0 in the date and terminates at the rim between stars 1 and 2. In addition, a fine break extends from the rim above star 8, spiders through the cap, and joins the long die break mentioned in the Overton reference. Extensive die clashing—clearly visible on this piece—was likely the cause for the extensive die deterioration and a terminal state must have occurred shortly after these late die state pieces were struck. Population: 4 in 67, 0 finer (11/08). *From The Deb-Ann Collection.* (#6090)

## Lustrous 1809 O-106 Half, MS65 Possible Condition Census Piece

**3843** **1809 Normal Edge MS65 NGC.** O-106, R.3. The Normal Edge variant. Since the obverse die used to strike this variety is quite similar to the O-104 die, it is easiest to attribute O-106 by observing key characteristics of the reverse die; the N in UNITED is recut and a long, heavy engraver's scratch extends diagonally from the right corner of the shield into the eagle's right (facing) wing. A heavy die break connecting all stars on the left side of the obverse confirms the variety.

It is believed that the finest known example of this variety is the Eliasberg specimen—an NGC-certified MS65 coin that was last sold as lot 16 of Bowers and Merena's January 1999 Orlando sale. The Condition Census for this variety per the fourth edition of the Overton reference lists an MS65 half as the finest known, followed by a string of four MS63 coins. Steve Herrman's Autumn 2008 edition of *Auction Prices Realized for Bust Half Dollars* suggests that the Eliasberg piece is the finest known. He shows no other Gem 1809 O-106 halves in his compilation of auction records (1998-2008).

It is more than likely that the current offering is firmly positioned within the Condition Census for the die marriage. As with most certified Bust halves, the variety is not noted on the label, therefore the NGC *Census Report* is of limited use. However, grouping all varieties and edge types together, it is clear that only nine 1809 halves have been graded at the MS65 level, with just two finer pieces—both graded as MS66 (11/08). Soft rose and golden hues evenly blanket both sides of this lustrous Gem. The strike is bold—for the issue—and the overall eye appeal is memorable. (#6092)

## Finest Graded 1811 Half Dollar
## Small 8, O-105a, MS68

**3844** **1811 Small 8 MS68 NGC. CAC.** O-105a, R.2. Early half dollars were important instruments of commerce in the early 19th century. With the cessation of silver dollar coinage in 1804, the half dollar became the largest silver coin of the U.S. series. Banks found it convenient to keep large numbers of half dollars in their vaults to meet their reserve obligations. When silver dollar coinage was resumed, the larger coins were more suitable for this function, and most of the half dollars were eventually released into circulation. Mint State coins are rare today, and collectors prize any high grade specimen.

The coin offered here is a strong candidate for the finest known 1811 half dollar. In the 1990 edition of *Early Half Dollar Die Varieties 1794-1836*, the highest grade listed in any Condition Census for an 1811 half dollar of any variety was MS65. The current example grades a full three points higher. In more recent times, researcher Stephen Herrman has compiled *Auction & Mail Bid Prices Realized for Bust Half Dollars 1794-1839*. According to Herrman's spring 2008 report, the present coin is still the undisputed champion, with the closest contenders grading MS66. This example was featured as lot 5571 in The Museum of Connecticut History Sale (Heritage, 6/1995). In that sale, the cataloger described the specimen as follows, "This is an exceptional piece that is virtually blemish free. The surfaces are highly lustrous with warm, glowing mint frost beneath the light gray patina that covers both sides. The peripheries deepen to an iridescent golden, blue, and rose coloration. Very sharply struck with almost complete details on each design element. Simply amazing quality and easily the finest known example of the variety." The present coin is the highest graded example at both NGC and PCGS.

*Ex: Shepherd (Superior, 8/1991); Museum of Connecticut History (Heritage, 6/1995), lot 5571; Gainsborough II (Superior, 2/1997), lot 1820.*

***See: Video Lot Description***

## Marvelous 1814 Half, O-103, MS68 ★

**3845** **1814 MS68 ★ NGC.** O-103, R.1. What a marvelously interesting piece of early numismatic Americana this piece is! Both dies had obviously seen a great deal of service by the time this wonderfully well preserved piece was struck—and that service has left many, many signs of use on both the dies and this coin.

First for the attribution: The second digit 1 is lower than the remaining digits and the 8 and that following 1 are much closer than the remaining digits, obvious diagnostics for this available variety. A series of parallel vertical thin die lines appears under the bust truncation, to the left of the date. On the reverse a thick die line connects the bottom of the scroll under E to the eagle's left (facing) wing.

This piece has many, many clashes, perhaps the most interesting of which are the "ear bars" from the clashing of the reverse shield on Liberty's hair curls and ear. While we have seen them more often on the O-105 and O-106 die marriages and have even occasionally seen them in a different position on the O-103, we do not recall seeing them in precisely this position on this die marriage, running at about a 45-degree angle from northwest to southeast.

The number of 1814-dated half dollars produced from all marriages was in excess of 1 million coins produced from a mere nine known die pairings, so it is unsurprising that the dies show their apparent capacity stretched to the limit.

The obverse shows multiple clashes, slightly off-center from each other, most notably between the date and the bust, behind the hair curls, and in the field before Liberty's face. On the reverse doubled clash marks appear beneath the BUS, under the arrowheads, and around D S in UNITED STATES.

Aside from the interesting die state, however, this coin is incredibly well struck and well preserved, despite the advanced state of both dies. There is literally no evidence of post-strike contact visible anywhere, and marvelous, glowing luster emanates liberally from both sides. The original toning is a blend of pink-champagne in the center with sky-blue at the rims; the reverse adds a tinge of sage at the extreme margin. The Star award for superior eye appeal is more than justified on this incredibly high-grade coin.

Stephen Herrman's current price guide lists three other pieces in MS67, but this piece in MS68 Star is obviously atop the Condition Census.

*Ex: 1998 FUN (Heritage, 1/1998), lot 6887.* (#6105)

## Pleasing 1817 Half Dollar MS66, O-107

**3846** **1817 MS66 NGC.** O-107, R.3. A line is visible on the bases of BE in LIBERTY, there are die lines above Liberty's cap, and there is a strong die line to the left of the beginning of the middle arrow shaft.

Pleasing luster emanates from both sides of this lovely Premium Gem, each of which displays crisply struck design features, including bold dentilation. A mixture of ice-blue, orange, and bluish-gray patination resides on the obverse, while the ice-blue reverse is splashed with reddish-gold and medium gray. This is a nicely preserved piece that is devoid of mentionable marks. Census: 3 in 66, 1 finer (11/08). (#6109)

## Remarkable Premium Gem 1833 Capped Bust Half, O-112

**3847** **1833 MS66 NGC.** O-112, R.2. Ex: Eliasberg. Obverse star 10 is noticeably recut. On the reverse, line 3 of stripe 1 extends to the third crossbar, and the A in STATES is slightly higher at the base than T2. The design elements are well struck overall, even if slightly weak on stars 8, 9, and 13; and on the eagle's right (facing) talons, the arrow heads, and the stem. Intensely lustrous with lovely sea-green and reddish-brown patina near the borders, and golden-gray coloration over the fields and central devices. Both sides of the piece are free of any distracting marks. This remarkable Premium Gem is the single finest-graded example of O-112, at NGC (11/08). PCGS has not designated any comparably-graded pieces as examples of the O-112 variety.

*From The James Mossman Collection.* (#6163)

# REEDED EDGE HALF DOLLARS

## Lustrous MS63 1836 Reeded Edge Half

**3848** **1836 Reeded Edge MS63 PCGS.** The 1836 Reeded Edge half dollar is an important and scarce transitional issue with slightly modified design elements on both sides, and with a reeded edge rather than the usual lettered edge. It is also the first U.S. coinage issue that was struck with steam power. A quick glance suggests a coin that is substantially finer than the grade suggests, and only close examination reveals the few minor marks that limit the grade. Both sides are brilliant silver-white with faint traces of wispy champagne toning. The surfaces have frosty luster and the design elements have bold details. Population: 7 in 63, 3 finer (11/08). (#6175)

## Amazing 1837 Reeded Edge Half Dollar Two Year Type Coin, MS65 ★

**3849** **1837 Reeded Edge MS65 ★ NGC.** The 1837 Reeded Edge half dollar boasts a substantial mintage of 3.6 million pieces. The denomination on the reverse was changed from 50 CENTS to HALF DOL. in 1838, to conform with the style used on the quarter and silver dollar. This change made the Reeded Edge half dollars of 1836-1837 two year type coins. The 1837 date is more available than the 1836, so the issue is much in demand from type collectors.

The present coin is an outstanding example of this desirable type. The surfaces have semi-glossy gray and blue toning that sets off the intricate detail of the devices to good advantage. The fields are virtually undisturbed, and overall eye appeal is excellent. NGC has awarded this piece the prestigious star designation. Census: 38 in 65, 12 finer (11/08).

*From The Findley Collection.* (#6176)

A 15% BUYER'S PREMIUM ($9 MIN.) APPLIES TO ALL LOTS.

## Lustrous, Richly Toned Gem 1837 Reeded Edge Half

**3850** **1837 MS65 PCGS. CAC.** The newly designed Reeded Edge half has the distinction of being the first United States coin struck on a steam press. According to Breen this had been the goal of Mint directors since 1797, but "for a variety of reasons, no foundry in the USA could build a steam coinage press until 1836." Most likely a number of these pieces were set aside as the first of their kind as several dozen are known today in Gem and better grades. This piece has the full strike on all the devices that one would expect from an early demonstration of a steam press. It also has lovely, variegated toning on each side with rich, softly frosted mint luster. (#6176)

## Radiant JR-6 1837 Reeded Edge Half Dollar, MS66

**3851** **1837 MS66 NGC.** JR-6, R.5. Die State b. Quickly identifiable by extensive die breaks on each side. The obverse displays a fine crack from star 4 through star 9, inclusive. In addition, we observe a fine break from the 7—which is recut—in the date to the rim, as well as a delicate horizontal break on Liberty's lower bust. The reverse breaks are more extensive, with spidery die breaks through the legend and denomination encircling the entire periphery. Faint clash marks are visible on both sides.

Light gold iridescence radiates from both sides of this Premium Gem Reeded Edge half dollar. The luster is as rich as the strike is bold, and there is no flaw or distraction worthy of mention. This piece combines the benefits of an accurate technical grade with the pleasure of exceptional eye appeal. Census: 9 in 66, 3 finer (11/08).
*From The James Mossman Collection.* (#6176)

## Gem 1838 Reeded Edge Half, JR-6b

**3852** **1838 MS65 PCGS.** JR-6b, R.5. On the reverse, a heavy die break extends from the left stand of L in HALF, travels clockwise through the base of UNITED STATES OF, and finally terminates at the midpoint of the left leg of A in AMERICA. Jules Reiver—a renowned research of this series and author of its only reference book—had an AU53 representative of this variety in his core collection.

Turquoise iridescence liberally intermingles with hazel and rose toning on both sides of this radiant Gem. With the exception of weakness in the obverse dentilation—which is inherent to the variety—the strike is bold. Unmistakable originality adds to the desirability of the current offering. All Reeded Edge halves are scarce—even rare—in Gem or better condition. Population: 7 in 65, 1 finer (11/08).
*From The James Mossman Collection.* (#6177)

A 15% BUYER'S PREMIUM ($9 MIN.) APPLIES TO ALL LOTS.

## Reflective 1839-O Half Dollar, MS64 Possible Presentation Piece

**3853** **1839-O MS64 NGC.** Although a few half dollars were coined late in 1838 at the New Orleans Mint, those pieces are extreme rarities that command strong six-figure prices today. For all practical purposes, the 1839-O half dollars represent the first year of issue for the denomination at that Mint, and for that reason they are highly desirable within the collecting fraternity. They are the only collectible New Orleans Mint Capped Bust half dollars, and they also rank among the few U.S. branch mint issues with the mintmark on the obverse.

This is the usual variety with slightly repunching at the outer bottom curve of the mintmark. Splashes of pale blue and violet on both sides accompany the delicate gold toning on this remarkable piece. It is boldly detailed with virtually full features on both sides. The underlying fields are reflective, contrasting nicely with the satiny devices. When they offered this piece in October 2000, Stack's wrote: "Due to the sharpness of strike and degree of field reflectivity in evidence, we cannot entirely rule out the possibility that this coin is indeed a specimen / presentation striking." The sharpness of strike is nearly equal to two examples that have appeared in our auctions as certified proofs, although the fields are less reflective. Breen noted that the five known proofs had the dies oriented in medal-turn rather than coin-turn; however, every example we have seen had the dies aligned in coin-turn position, eliminating a possible proof authentication characteristic.
*Ex: Stack's (10/2000), lot 989.*
*From The Findley Collection.* (#6181)

## Popular 1839 No Drapery Half, MS63

**3854** **1839 No Drapery MS63 PCGS.** Being a single-year subtype adds to the already strong demand for this first-year Seated half dollar issue. 1839 No Drapery halves are relatively common in circulated grades, but their availability drops dramatically in Mint State condition. As of (11/08), PCGS has certified 11 examples at the MS63 level, and only 10 pieces have been graded finer—the best being two MS65 coins.

The current offering was obviously an early strike from freshly serviced dies; semiprooflikeness in the fields replaces the cartwheel luster that is ubiquitous to the series. Experts agree that flow lines start to develop after 100 or strikes and prooflike fields become lustrous. Time has naturally blanketed the surfaces with a pleasing gunmetal-gray patina. However, when viewed at an angle and under a light source, this piece erupts into a fireball of amber and magenta coloration and the mirrored fields are most obvious. A splendid specimen.
*From The James Mossman Collection.* (#6230)

## Rarely Encountered 1842-O Half Dollar WB-101, Small Date, Small Letters R.8 in Mint State, MS62

**3855** **1842-O Small Date, Small Letters MS62 PCGS.** In *The Complete Guide to Liberty Seated Half Dollars,* Randy Wiley and Bill Bugert identify three major varieties of 1842-O half dollars. The present coin is an example of the WB-101 variety, characterized by the small date and small letters on the reverse. The mintage of the small date variety is believed to be a minuscule 203,000 pieces. This tiny mintage is further divided into two sub-varieties, distinguished by the placement of the mintmark. The present example has a low mintmark, centered over the F in HALF, and a die crack between AL. This reverse die was also used in combination with an obverse from 1841. Die state analysis convinces Wiley and Bugert that this variety of 1842-O half dollar was actually struck before the 1841-O. WB-101 is extremely rare in Mint State grades, with Wiley and Bugert awarding it an R.8 rating at this level.

The present coin features attractive gray toning over muted Mint luster. The strike is a little soft, as always seen on this issue. Handling marks are minimal for the grade. This example is a delightful, interesting prize for the Seated Liberty specialist. Population: 1 in 62, 1 finer (11/08).
*From The Findley Collection.* (#6238)

## Lovely 1854-O Arrows Half Dollar, MS66

**3856** **1854-O Arrows MS66 PCGS.** The New Orleans Mint struck 5,240,000 half dollars in 1854. Perusal of PCGS and NGC population data indicate several hundred coins have survived in grades ranging from Good 4 to MS68. The majority of certified specimens appear to fall between the Choice XF and near-Gem levels of preservation.

Light to medium intensity aqua-blue and lavender patination resides in the obverse fields of this lovely Premium Gem, highlighting the lighter champagne-tan Liberty motif. Light golden-gray color dominates the reverse, becoming slightly deeper at the margins. A well directed strike leaves uniformly strong definition on the design elements. A few unobtrusive, grade-consistent handling marks do not disturb. Housed in a green-label holder. Population: 12 in 66, 1 finer (11/08).

*From The James Mossman Collection.* (#6280)

## Conditionally Rare 1854-O Arrows Half Dollar, MS68

**3857** **1854-O Arrows MS68 NGC.** A desirable New Orleans first-year example of a two-year type. The 1854 Arrows Seated half dollar issues followed the one-year Arrows and Rays Seated type, both styles indicating a reduction in the weight of the half dollar from 13.36 gm (used since the introduction of the Seated half dollar design in 1839) to 12.44 gm. Only the weight of the coin changed; the fineness, diameter, and design remained the same.

Though the amount of weight change might seem insignificant, the reduction was necessary for an important reason—to keep half dollars in circulation. The production of gold from California and other places in the late 1840s and throughout the 1850s flooded U.S. and world markets, enough to distort the ratio between gold and silver prices. Silver prices increased, which meant the bullion value of U.S. silver coins exceeded their face value. Brokers, speculators, and regular citizens hoarded the coins, many of which were eventually exported and melted. Silver coins virtually disappeared from circulation.

The Act of February 21, 1853, allowed Mint Director George N. Eckert to reduce the weight of the half dime, dime, quarter, and half dollar. On the 1853 half dollar, the change was indicated by the placement of arrowheads on both sides of the date, and by the addition of a sunburst of rays around the eagle on the reverse. The rays were problematic, compromising the ability of die makers to produce and maintain needed dies, and so were dropped from the 1854 issues.

This example is well struck, though with minor softness in some of the details. Both sides are lustrous and covered by a warm russet patina with a trace of rose, and the obverse is peppered with dark toning highlights. "Halos" are present around the obverse devices, a doubling phenomenon attributed to excessive striking force during production. The reverse shows die cracks, most obvious between the U of UNITED and the H of HALF.

The New Orleans Mint produced over 5 million Seated halves in 1854, and the type is relatively common in grades up to and including near-Gem. However, Superb Gem examples such as this coin are extremely rare. NGC and PCGS combined have certified only two pieces in MS68, with none finer from either service (9/08). Overall, the coin is superbly presented, and is a rare opportunity for the serious type or Seated Liberty collector.

*From The Scott Rudolph Collection.* (#6280)

***See: Video Lot Description***

## Magnificent 1860 Half Dollar, MS66

**3858** **1860 MS66 PCGS. CAC.** The 1860 half dollar is very scarce in any grade, and is particularly difficult in the higher levels of Mint State. Randy Wiley and Bill Bugert (1993) assign a high R.4 rarity rating to Uncirculated coins.

Glowing luster exudes from both sides of this magnificent Premium Gem, each of which gives off a soft silvery color. A superior strike imparts complete delineation to the design elements, that characterizes most examples of this issue. Remarkably smooth surfaces reveal just a few minor marks. This piece is well deserving of CAC's green label. Population: 3 in 66, 1 finer (11/08).
*From The James Mossman Collection.* (#6299)

## Amazing MS66 1874 Arrows Half

**3859** **1874 Arrows MS66 PCGS. CAC.** The two years of Arrows, With Motto production for half dollars saw little production, only about 5 million pieces total, with the 1874 issue making up nearly half that figure. It is little surprise that the 1874 should become a dominant type issue, and the present piece is the cream of the crop. Spectacularly lustrous surfaces host sharply struck devices, and each side shows only faint hints of pink and cloud-white patina. Preservation and eye appeal are equally impressive. One of just three examples graded MS66 by PCGS with none finer (11/08).
*From The James Mossman Collection.* (#6346)

## Scintillating 1881 Half, MS67

**3860** **1881 MS67 PCGS. CAC.** This year saw Philadelphia alone produce half dollars, with that Mint coining just 10,000 business strikes. The present Superb Gem survivor offers top-notch preservation for the issue, being one of just three graded at that level by PCGS with none finer (11/08). Considerable frostiness enlivens the sharply struck devices. The shining, profoundly reflective fields are generally silver-white save for a crescent of tan and umber at the left obverse which has a faint echo on the reverse. An excellent representative that should appeal to the high-end date collector.
*From The James Mossman Collection.* (#6363)

## PROOF SEATED HALF DOLLARS

1839 No Drapery PR64 PCGS

1839 No Drapery PR64 PCGS

A 15% BUYER'S PREMIUM ($9 MIN.) APPLIES TO ALL LOTS.

# Impressive 1839 No Drapery Half, PR64
# Believed the Finest Known Proof

**3861 1839 No Drapery PR64 PCGS.** When Walter Breen compiled his *Encyclopedia of United States and Colonial Proof Coins* in 1977, he believed that just three examples of the proof 1839 No Drapery half dollar existed. He enumerated the Reed Hawn and F.C.C. Boyd coins, numbers 2 and 3 in our list below, and also stated that an example was in the Norweb Collection. However, the Norweb coin in the sale of their collection graded just AU50 and was clearly not a proof, meaning only two of Breen's recorded examples were actual proofs. A third example was offered in the Stack's October 1996 sale (our number 5), with no prior provenance, and the present example (our number 1 and probably the finest of the five) is a fourth, apparently also with no prior provenance unless it is the Neil coin that has is untraced since 1948. We believe that a fifth proof example (number 4 in our roster) is the coin that we offered in our September and December Internet auctions, apparently different from all the others, although our archive illustration of that coin is somewhat muted and hard to plate match.

All known proof 1839 No Drapery half dollars have a fine die crack through HALF DOL and MERICA. The obverse of this piece has faint clash marks visible below Liberty's elbow. The reverse also has faint clash marks within the vertical shield spaces. The middle lines of stripes 3, 4, and 6 extend upward into the horizontal crossbars. This die was later used for business strikes, with a second crack from below the olive leaves through the shield to the R in AMERICA.

An impressive Choice proof, this piece has pale gold toning at the centers with violet and sea-green at the borders. Both sides are impeccably sharp, with fully mirrored fields and lustrous devices. A small lint mark inside star 12 and a few faint hairlines are evident on the obverse. The reverse also has minor hairlines. Aside from the die cracks described above, there are no die markers to distinguish proofs from prooflike business strikes.

1. **PR64 PCGS.** Different from 2-5 below, but it is possibly the 1948 ANA example. **The present specimen.**
2. **PR64 PCGS.** Reed Hawn (Stack's, 8/1973), lot 125; Bowers and Merena (8/1999), lot 199; Goldberg Coins (2.2001), lot 1752; 2002 ANA Sale (Superior), lot 973; Heritage (1/2004), lot 5941; Richmond Collection (David Lawrence, 3/2005); Heritage (1/2007), lot 988.
3. **PR62 NGC.** F.C.C. Boyd (World's Greatest Collection, Numismatic Gallery, 4/1945), lot 246; 1946 ANA (Abe Kosoff), lot 812; Stack's (3/1965), lot 440; 1976 ANA (Stack's, 8/1976), lot 1172; Stack's (12/1985), lot 942; Worrell Collection (Superior, 9/1993), lot 712; Phil Kaufman Collection (Heritage, 4/2008), lot 2376.

1846

UNITED STATES OF AMERICA
HALF DOL.

# Important 1846 Seated Half Dollar, PR64

**3862 1846 Medium Date PR64 PCGS.** Light champagne toning covers both sides of this gorgeous near-Gem proof, with deeply mirrored fields and satiny devices. On both sides the toning deepens slightly to light gold. Every design element is extremely sharp, including the star, head, and sandal details on the obverse, and the feather, claw, and leaf details on the reverse.

The die notes that Breen recorded for proofs of this date are all visible on this specimen, along with heavy die lines in the spaces between the vertical shield stripes on the reverse. The obverse has the 4 minutely doubled below its crossbar at its left corner. Otherwise, there is nothing unusual or notable about either die.

The following roster is the most complete that we have presented for the 1846 proof half dollars, including one proof Tall date and 12 proof Medium Date specimens:

**Tall Date**

1. **PR63 PCGS.** Stack's (6/1999), lot 2222; George "Buddy" Byers Collection (Stack's, 10/2006), lot 1138. Apparently the only known proof 1846 Tall Date half dollar, although two others have been described in auctions over the last 20 years.

**A. PR63.** Superior (1/1988), lot 1802. Described as a Tall Date, but it does not match the Byers coin (#4 above), so it is either a second known proof Tall Date, or it is a prooflike business strike.

**B. PR60.** Heritage (10/1994), lot 6450. The coin illustrated is a Tall Date and was withdrawn from the sale. It was most likely not a proof.

**Medium Date**

1. **PR65 PCGS.** Superior (2/1974), lot 1623; Auction '79 (Paramount, 7/1979), lot 79; Bowers and Merena (9/1988), lot 275; Heritage (10/2008), lot 922; Superior (10/1989), lot 3711; Heritage (5/2008), lot 721.
2. **PR65 NGC.** Numismatic Gallery (7/1949); John Jay Pittman (David Akers, 5/1998), lot 1712; Phil Kaufman (Heritage, 4/2008), lot 2386.
3. **PR64 PCGS.** Prior provenance unknown. **The Present Specimen.**
4. **PR64 PCGS.** Central States (Heritage, 5/2005), lot 7208; Stack's (2/2008), lot 3270.
5. **PR64 NGC.** Phil Kaufman; Bowers and Merena (8/1999), lot 202; Superior (10/2000), lot 4374.
6. **PR63 Cameo NGC.** Mid American (1/1990), lot 608; David Lawrence Rare Coins (3/2005), lot 1790.
7. **PR63 PCGS.** Reed Hawn (Stack's, 8/1973), lot 153; Superior (1/1990), lot 3574; Heritage (6/2008), lot 720.
8. **PR63 PCGS.** Lester Merkin (2/1971), lot 744; Stack's (1/1974), lot 1440; Stack's (2/1982), lot 1629; Queller Collection (Stack's, 10/2002), lot 497; Heritage (2/2007), lot 3509.
9. **PR62 NGC.** R. McAusland (6/1953); James Butterfield Collection (Mid American, 5/1987), lot 2543; Heritage (1/2002 FUN Sale), lot 6997; Rarities Sale (Bowers and Merena, 7/2005), lot 552; Superior (11/2005), lot 779; Goldberg Coins (5/2006), lot 2923.
10. **PR61.** The Louis E. Eliasberg, Sr. Collection (Bowers and Merena, 4/1997), lot 1935.
11. **Proof.** James A. Stack Collection (Stack's, 10/1994), lot 512; George "Buddy" Byers (Stack's, 10/2006), lot 1137.
12. **Proof.** Smithsonian Institution.

Additional appearances recorded in the Breen *Proof Encyclopedia, Auction Prices Realized,* and John Dannreuther's auction record are:

**A. Proof.** George H. Earle (Henry Chapman, 6/1912), lot 2989.

**B. Proof.** F.C.C. Boyd, WGC (Numismatic Gallery, 4/1945), lot 285. Unplated.

**C. Proof.** Newcomb, Part Two (J.C. Morgenthau & Co., 5/1945), lot 857

**D. Proof.** Frederic Geiss (B. Max Mehl, 2/1947), lot 532

**E. Choice Proof.** Terrell (Bowers and Ruddy, 5/1973), lot 858; Rothert Collection (Bowers and Ruddy, 11/1973), lot 865; New England (3/1977), lot 375; New England (7/1978), lot 879. We believe this is the same as #6 in the list above.

**F. Proof.** Stack Estate (Stack's, 3/1975), lot 444. This piece does not appear to match any of those above.

**G. Proof.** Paramount (11/1978). Catalog unavailable.

**H. PR60.** Steve Ivy (8/1983), lot 3489. Unplated.

**I. Proof.** Auction USA (8/1991), lot 108. Catalog unavailable.

**J. Proof.** Stack's (12/1993), lot 602. The plate does not appear to match any of those above.

**K. PR63 NGC.** Superior (5/2006), lot 589. Catalog unavailable.

*From The Findley Collection.* (#6390)
***See: Video Lot Description***

## Nearly Perfect 1879 Half Dollar, PR68

**3863** **1879 PR68 NGC.** Astonishing quality for this low total mintage issue. Only 4,800 halves were struck for circulation, plus another 620 proofs. This low mintage of business strikes has placed a great deal of date pressure on the proofs. This is one of the three finest examples certified, all graded PR68 at NGC (11/08). This is an especially attractive coin that has a different look on each side. The obverse is light, almost brilliantish in the center with deeper reddish-golden patina at the margin. The reverse, however, is deep cobalt-blue. The mirrors are deeply reflective, and there are no discernable marks on either side.
*From The Malibu Collection.* (#6440)

## Attractively Toned PR67 Cameo 1882 Half Dollar

**3864** **1882 PR67 Cameo NGC.** One of the finest examples known of this scarce, low mintage issue. Also one of the most visually impressive. The surfaces are virtually perfect on this high grade, cameoed half. The centers are nearly free from color with ever-deepening shades of golden-brown toward the rims. Perfectly matched in appearance on each side, the fields are deeply reflective which helps establish the cameo effect against the frosted devices. Only 1,140 proofs were struck in 1882 plus another 4,400 business strikes, thus making the 1882 a rare coin in any condition and in any method of manufacture. Census: 5 in 67 Cameo, 1 finer (12/08).
*From The Malibu Collection.* (#86443)

## BARBER HALF DOLLARS

Remarkable PR67 Ultra Cameo
1890 Half Dollar

**3865** **1890 PR67 Ultra Cameo NGC.** The 1890 half was struck at the end of a long string of low-mintage dates that began in 1879. Only 12,000 coins were struck for circulation and another 600 proofs were produced in 1890. This run of dates from 1879 through 1890 has long been known for confusion of first-strike business strikes with proofs, and the substitution of proofs for circulation strikes in date sets. There is no question about the status of this coin. The fields are deeply mirrored and the devices heavily frosted, presenting a well-balanced appearance from side to side. Not a speck of toning is seen, and there are no observable contact marks on this remarkable coin. Census: 4 in 67 Ultra Cameo, 1 finer (11/08). (#96451)

Incredible 1892 Barber Half, MS67

**3866** **1892 MS67 PCGS.** The coinage Act of September 26, 1890, amended section 3510 of the U.S. Revised Statutes, clearing the path to new designs for the dime, quarter, and half dollar. Specifically, the amendment gave the director of the Mint power to cause new designs to be prepared, except "no change in the design or die of any coins shall be made oftener than once in twenty-five years." Charles Barber created patterns the following year, and publicly introduced his new design in 1892.

For his collection, Dale Friend chose this incredible Superb Gem, a boldly defined example with frosty luster beneath outstanding rainbow iridescence. It will improve four of the next five PCGS Registry sets. Following the number two Friend Collection, PCGS Registry sets three, four, and five are complete, while sets six and seven are each more than 90% complete. Every example in the Friend Collection will improve at least three of the next five sets. Population: 11 in 67, 1 finer (10/08).

*From The Dale Friend #2 All-Time PCGS Registry Set of Barber Half Dollars.* (#6461)

A 15% BUYER'S PREMIUM ($9 MIN.) APPLIES TO ALL LOTS.

# The Finest Known 1892-O Micro O Half, MS68
# The Eliasberg Specimen

**3867** **1892-O Micro O MS68 PCGS.** Augustus Heaton wrote in *Mint Marks,* published in 1893: "After a long interval the Half Dollar was struck in 1892 with the new bust and heraldic eagle dies. The date is small, and a small o is directly under the middle of the eagle's tail and over the D. There is one rare variety of this piece with an exceedingly small o, hardly larger than a period." Even today with the large number of collectors interested in varieties of all types, the limited amount of time that elapsed from coinage of the variety until its numismatic discovery would be impressive. In the 1890s, when mintmark collecting was in its infancy, and die variety collecting was pursued by only a handful of dedicated numismatists, the 1893 discovery of the 1892 Micro O half dollar was miraculous.

J.M. Clapp purchased this coin from Lyman Low's sale of July 1903. Lot 969 in that catalog was described: "1892 Minute O. From the Randall collection. Unc. Very rare." The price realized was $2.25, while the very next lot, an 1892 Medium O realized 80 cents. The name Randall probably refers to J. Colvin Randall, who died in 1901. Our thanks to Karl Moulton for providing the catalog information.

In part 9 of his series "Barber Half Dollar Mintmark Types" (*Journal of the Barber Coin Collectors' Society,* volume 17, number 1, 2006), Steve Hustad writes: "Likely the quarter punch was used mistakenly on this one die. I have to think that either this reverse die failed quickly, or the anomaly was discovered early on and the die replaced, because there are so few of these to be found today." In *The Cherrypickers' Guide,* Bill Fivaz and J.T. Stanton write: "Most often referred to as a micro O, this variety was created when an O mintmark punch for quarters was used in place of the regular, larger mintmark intended for use on half dollar dies."

Most numismatists agree, as we do, that the O mintmark was from a punch intended for quarter dollars. But was this actually a mistake, or was it intentional? We believe the latter is a strong possibility. The 1892 Barber half dollar was the first of that denomination that New Orleans issued since it closed in 1861. The New Orleans facility remained closed until 1879, when limited coinage operations again commenced. From 1879 to 1891, the Mint issued the following coins: 1891-O dime, 1891-O quarter, 1879-O through 1891-O silver dollars, 1879-O through 1883-O eagles, 1888-O eagles, and 1879-O double eagles. When new dies arrived for the Barber half dollars early in 1892, there was likely no available punch of the proper size for those dies. Using the quarter dollar punch from the previous year on one die would have been a stop-gap measure until new punches of the proper size were available. Once new punches were received, the single reverse die would have been taken out of service, unintentionally creating a rarity for variety collectors. If our scenario actually happened, and there is no documentation to prove or disprove it, the 1892-O Micro O half dollars were the first Barber halves coined at that Mint. The earlier mentioned discovery of the variety in 1893 lends support to this hypothesis.

Dale Friend was fortunate to acquire this piece from the buyer at the Eliasberg sale, and it appears today exactly as it did a decade ago. Aside from some delicate toning acquired over the past 105 years, we believe that it appears today exactly as it does when J.M. Clapp purchased this piece from Lyman Low's July 1903 auction. The surfaces are pristine and essentially perfect. Both sides are fully frosty and lustrous, with delicate gold and iridescent toning. PCGS has currently certified 10 MS68 Barber half dollars, including this piece, with none finer. While it is hard to say which of the 10 is the finest, each and every one is a remarkable piece. PCGS Population: 1 in 68, 0 finer (10/08).
*Ex: J. Colvin Randall (Lyman H. Low, July 1903), lot 969; J.M. Clapp; John H. Clapp; Clapp Estate (1942); Louis E. Eliasberg, Sr.; Eliasberg Estate (Bowers and Merena, 4/1997), lot 2965; unidentified collector.*

## Alluring 1892-S Barber Half, MS66

**3868** **1892-S MS66 PCGS.** Looking at a list of Barber half dollars in any standard reference such as the *Guide Book*, the 1892 branch mint issues are the first keys in the series. The 1892-S had a mintage of just over 1 million coins, nearly three times that of the 1892-O, yet the current 2009 *Guide Book* gives similar prices for both issues. Attractive pieces do appear on the market from time to time, usually when fine collections are dispersed. However, true Gems and especially Premium Gems represent a major hurdle for the advanced specialist.

Dale Friend acquired this piece for his collection based on its combination of technical quality and exceptional aesthetic appeal. Both sides have bright ivory luster with frosty surfaces beneath light to medium gold toning with hints of iridescence. A faint scattering of tiny marks is mostly hidden beneath the outstanding toning. PCGS Population: 2 in 66, 1 finer (10/08).

*Ex: Finest Known, Inc.*

*From The Dale Friend #2 All-Time PCGS Registry Set of Barber Half Dollars.* (#6464)

## Underrated 1893-S Half Dollar, MS65

**3869** **1893-S MS65 PCGS.** There are 21 different Barber half dollar issues, including the 1893-S, with mintages that fell short of 1 million coins. In San Francisco, the 1893-S half dollar had a total production of only 740,000 coins. It is considered an underrated issue in Gem condition. While lower quality pieces are available with only modest effort, the opportunity to acquire a true Gem seldom appears. In the Thaine Price catalog, offering another example, David Akers suggested that fewer than five true Gems survive.

Dale Friend's Gem is satiny and lustrous with a reflective obverse and a fully prooflike reverse. The surfaces have light ivory color with traces of delicate blue and gold toning predominately along the borders. While shy of a full strike, most design elements are boldly defined. Population: 5 in 65, 1 finer (10/08).

*Ex: Pinnacle Rarities, Inc.*

*From The Dale Friend #2 All-Time PCGS Registry Set of Barber Half Dollars.* (#6467)

## Beautiful 1894-O Barber Half, MS67

**3870 1894-O MS67 PCGS.** Ex: Price. More than 2 million 1894-O Barber half dollars were minted, and for that reason this date is usually thought to be quite plentiful. However, like so many Barber halves, it is hardly plentiful in Gem or finer quality. PCGS, for example, has only certified 16 pieces that grade MS65 or finer. A reasonable estimate places the total number of known Gems at 15 or fewer coins.

When he offered this identical coin in the Dr. Thaine Price catalog, David Akers considered it to be "one of the finest known specimens." Of course, the Eliasberg coin and the Pryor coin were also each called "possibly the finest known" when they were offered at about the same time. Although PCGS has certified a single finer MS68 coin, we agree that the present specimen is easily in the Condition Census for the issue, and dare we say, "possibly the finest known."

Dale Friend must have thought so when he acquired this specimen. It is sharply struck with slight weakness at the usual locations, around the head band on the obverse, and at the right side of the shield on the reverse. The surfaces are nearly pristine with only a few minuscule contact marks. Both sides have sensational ivory luster with frosty surfaces and lovely red-gold, rose, lilac, and sky-blue color close to the borders. Population: 2 in 67, 1 finer (10/08).

*Ex: Dr. Thaine Price Collection (David Akers, 5/1998), lot 131.*

*From The Dale Friend #2 All-Time PCGS Registry Set of Barber Half Dollars.* (#6469)

## Fantastic 1894-S Barber Half, MS66

**3871 1894-S MS66 PCGS.** Here is an underrated Barber half dollar issue from a mintage that exceeded 4 million coins. Possibly based on the high mintage alone, the date has garnered relatively little attention from all but the most enlightened specialists. With a mintage twice as great as the 1894-O, it is telling that the total PCGS population for all Mint State grades are within 10% of each other, 118 for 1894-O and 129 for 1894-S, and in MS63 or finer grades, PCGS has graded fewer 1894-S half dollars, 90 versus 93 for the 1894-O.

Dale Friend acquired this piece from U.S. Coins, Inc., of Houston. Both sides are full prooflike with mirrored fields and excellent contrast. The strike is amazing with exquisite obverse and reverse design details. Both sides have a base of light champagne toning over silver surfaces, serving as a backdrop for lovely gold, blue, and iridescent toning. Population: 4 in 66, 1 finer (10/08).

*Ex: U.S. Coins, Inc.*

*From The Dale Friend #2 All-Time PCGS Registry Set of Barber Half Dollars.* (#6470)

## Spectacular 1895-O Half Dollar, MS67

**3872** **1895-O MS67 PCGS.** As a rule, the New Orleans half dollars in the Dale Friend Collection are much sharper than usual for halves from that Mint. Typically, the hair, leaf, and band details on the obverse are indistinct, while wing details just right of the shield are flat, as are the details of the arrow feathers.

Dale Friend's 1895-O half is clearly sharper than the typical New Orleans piece, with excellent details in nearly all of those locations, and elsewhere. The only indication of a New Orleans Mint strike is at the arrow feathers and claw above LL. The central devices are frosty with satiny fields. Both sides have considerable ivory luster, gradually changing to gold, russet, lilac, and blue nearer the borders. The surfaces are pristine and the whole is a lovely presentation. Population: 2 in 67, 0 finer (10/08).

*Ex: Park Avenue Numismatics.*

*From The Dale Friend #2 All-Time PCGS Registry Set of Barber Half Dollars.* (#6472)

## Elusive 1896 Barber Half, MS66

**3873** **1896 MS66 PCGS.** Unlike most P-Mint Barber half dollars, the 1896 had a mintage below 1 million coins, with a total production of only 950,000 coins. It is one of just seven Philadelphia Mint issues with "six figure" mintages, along with 1892, 1905, 1910, 1913, 1914, and 1915. While the last three years are generally known to most collectors as key dates, the first four, including this 1896, are less recognized for their elusive nature.

This example from the Dale Friend Collection looks just like a proof at first glance, with fully mirrored fields around the satiny devices. Both side have a bold strike with excellent definition, even at the usual points of weakness that are clearly defined on this piece. The obverse exhibits gorgeous album toning with rose at the center, changing to sky-blue and pale yellow at the border. The reverse has delicate gold toning with hints of light blue and pale violet. Population: 3 in 66, 1 finer (10/08).

*From The Dale Friend #2 All-Time PCGS Registry Set of Barber Half Dollars.* (#6474)

## High-End, Low Mintage 1896 Half Dollar Tied for Finest Certified, MS67 ★

**3874** **1896 MS67 ★ NGC.** The 1896 has one of the lowest business strike mintages (950,000 pieces) in the Barber half dollar series, and is scarce in all levels of preservation. In the better Mint State grades (MS65 and finer), NGC and PCGS have certified just 29 coins: 21 examples in MS65, five in MS66, and three in MS67, including two Superb Gems with Star.

The present MS67 ★ offering displays intense luster radiating from surfaces splashed with cobalt-blue, beige-gold, magenta, sky-blue, and violet patination. A penetrating strike leaves virtually complete delineation on the design elements, heightening even more the outstanding eye appeal. Close inspection reveals a handful of trivial, grade-consistent marks, barely precluding an MS68 numerical grade. This captivating piece will delight the new owner. Census: 2 in 67, 0 finer (11/08). (#6474)

## Classic 1896-O Barber Half Rarity, MS65

**3875** **1896-O MS65 PCGS.** Considered one of the great condition rarities in the Barber half dollar series, the 1896-O is rare in any Mint State grade, but especially in Choice or Gem preservation. PCGS has only certified 24 submissions that grade MS60 or finer, and just six of those coins are certified as MS65 or finer. Of all 74 Barber half dollar issues, only the 1892 Micro O has a lower Gem population with four pieces graded. Like the 1896-O half, the 1893-S, 1900-O, 1901-O, 1902-O, and 1904-S halves are tied with just six PCGS Gem or finer pieces certified.

A comment that Dave Bowers wrote in the 1997 Eliasberg catalog bears repeating here, as it clarifies incorrect comments that Walter Breen made in his *Complete Encyclopedia*: "Walter Breen mentioned in his *Complete Encyclopedia,* page 410, that rolls exist of virtually all of the Barber half dollars, these being the Gies-Pukall-Raymond group. However, this comment is not valid, as John J. Ford, Jr., who worked with the Gies and Raymond coins, explains in detail in a contribution to the new book *American Coin Treasures and Hoards*. Moreover, the present cataloger (QDB) knew William Pukall and also his son, both now deceased, discussed with them the early activities of the firm, and learned that while cents and nickels were set aside in quantity, Barber half dollars never were."

A fully brilliant and frosty Gem, Dale Friend's 1896-O Barber half is the sharpest struck example that we have ever seen. Only the slightest weakness is evident along the right side of the shield, and at the arrow feathers, but it is much sharper than the Pryor coin, and also clearly sharper than either the Price or Eliasberg examples. The brilliant ivory surfaces exhibit subtle peripheral gold toning. Population: 3 in 65, 3 finer (10/08).

*Ex: Dennis Nagy.*

*From The Dale Friend #2 All-Time PCGS Registry Set of Barber Half Dollars.* (#6475)

## Marvelous 1896-S Half, MS65
## The Price-Duckor-Friend Specimen

**3876** **1896-S MS65 PCGS.** Ex: Price/Duckor/Friend. Among the current generation of Barber half dollar collectors, the names of Price, Duckor, and Friend come to the fore, as names such as Pryor, Eliasberg, and Norweb did just a few years earlier. Every generation has its "named" collections, and current specialists always appreciate owning coins that their contemporaries and collecting heroes have previously selected.

While the 1896-S half is more plentiful than the 1896-O, it is still a key issue in the Barber half dollar series. This bold Gem has a hint of weakness at the top of the wings, especially right of the shield. Slight strike doubling is evident at the lower reverse, including most letters of the denomination, and the mintmark. Satiny surfaces have creamy luster with lovely peripheral russet and gold toning. Light, nearly vertical roller marks are evident on the obverse, from the planchet preparation process at the San Francisco Mint. Such marks are routinely seen on half dollars and silver dollars, among others, from the late 1890s into the first few years of the 20th century. Population: 7 in 65, 7 finer (10/08).

*Ex: Dr. Thaine Price Collection (David Akers, 5/1998), lot 138; Dr. Steven Duckor.*

*From The Dale Friend #2 All-Time PCGS Registry Set of Barber Half Dollars.* (#6476)

## Landmark 1897-O Half Dollar, MS67

**3877** **1897-O MS67 PCGS.** The 1897-O Barber half dollar is one of the great rarities of the series, although it is not as rare as issues such as the 1896-O, 1901-O, or 1904-S. Today, it may come as a surprise to many that there are 43 other Barber half dollar issues that have lower PCGS populations for grades from MS65 to MS68. However, all may not be as it seems, and resubmission of individual examples will inflate the population of rare dates. Dealers and speculators sometimes resubmit coins on multiple occasions to seek a single higher grade point in the current numismatic arena, on the premise that a single point will more than pay for the cost of multiple submissions. Needless to say, rare dates with higher values are more likely to be the object of such resubmissions, inflating population figures and rendering population comparisons like the one above obsolete.

With a discerning eye for quality, Dale Friend acquired this amazing Superb Gem for his collection. It has above average design definition with frosty silver luster beneath lovely gold, heather, blue, and lime toning on the obverse. The reverse is mostly ivory with pale gold and iridescent toning along the border. Population: 2 in 67, 1 finer (10/08).

*Ex: U.S. Coins, Inc.*

*From The Dale Friend #2 All-Time PCGS Registry Set of Barber Half Dollars.* (#6478)

## Elegant 1897-S Barber Half Dollar, MS67
## The Cataloger's Choice

**3878** **1897-S MS67 PCGS.** Other than the stunning 1892 Micro O half dollar, this 1897-S is the cataloger's favorite among all of Dale Friend's half dollars. It combines technical superiority, aesthetic desirability, and rarity, all into a single silver package. PCGS has only certified 42 submissions of the issue in all Mint State grades, and that population probably represents just a couple dozen actual coins.

Among all different Barber issues, the 1897-S ranks holds the 10th lowest PCGS population of any date and mintmark combination, other than the 1892 Micro O. A top-10 list of the lowest population issues reads like a who's who of Barber half dollar rarities. In order: 1896-O (24), 1901-O (26), 1904-S (30), 1900-O (31), 1898-S (32), 1902-S (34), 1902-O (37), 1901-S (38), 1904-O (40), and 1897-S (42). The data is current as of October 2008.

This coin, finer than either the Eliasberg or Pryor specimens, and equal to the Dr. Thaine B. Price coin, is fully brilliant and proof-like with excellent cameo contrast on both sides. Nearly perfect surfaces reflect a few tiny flakes or nicks, although some may remain from the original planchet. The fields exhibit microscopic striae from die preparation or polishing. Both sides are boldly defined down to the most intricate details. Wispy gold toning is faintly visible, primarily along the reverse border. Population: 4 in 67, 0 finer (10/08).
*From The Dale Friend #2 All-Time PCGS Registry Set of Barber Half Dollars.* (#6479)

## Iridescent 1898 Half, MS67
## The Finest Certified

**3879** **1898 MS67 PCGS.** Contemporary collectors preferred proofs to business strikes, as we have noted from time to time. Since Mint State pieces were generally not saved by collectors, few high grade pieces have survived since the time that they were issued. Nearly 3 million Barber half dollars were minted at Philadelphia in 1898, yet PCGS has only certified 145 submissions in all Mint State grades, and only 21 in MS65 or finer grades, including resubmissions.

Dale Friend was fortunate to acquire this Superb Gem, the only MS67 certified by NGC or PCGS. It is a sharp, boldly defined piece with frosty silver luster beneath amazing rainbow toning. Mostly light to medium gold is intermingled with amber, lilac, blue, and green, concentrated near the borders. Population: 1 in 67, 0 finer (10/08).
*Ex: Pinnacle Rarities.*
*From The Dale Friend #2 All-Time PCGS Registry Set of Barber Half Dollars.* (#6480)

## Elusive 1898-O Barber Half Dollar, MS65

**3880** **1898-O MS65 PCGS.** The date is minutely repunched with extra curves outside the lower left parts of the first 8 and the 9.

For many years the 1898-O half has resided in obscurity as collectors always paid more attention to the 1896 and 1897 branch mint issues. Now, with grading service population data available, the '98-O has taken its rightful seat as one of the premier rarities in the Barber half dollar series. PCGS, for example, has only certified eight Gem or finer examples of this date, with a total of just 68 submissions certified in all Mint State grades.

While showing considerable weakness on the reverse, the Dale Friend specimen has virtually pristine surfaces with satiny luster beneath ivory, gold, blue, lilac, and russet toning. The strike didn't prevent the purchase of such a beautiful coin. Population: 4 in 65, 4 finer (10/08).
*From The Dale Friend #2 All-Time PCGS Registry Set of Barber Half Dollars.* (#6481)

## Conditionally Rare 1898-S Half, MS65

**3881** **1898-S MS65 PCGS.** Although there exist a few more Gem examples of this issue than of the 1898-O, the overall Mint State population is lower than for the New Orleans issue. PCGS has only certified 32 submissions as MS60 or finer. More than 2 million coins were struck, and the vast majority were sent to the Philippines to alleviate that nation's coin shortage.

An exceptional Gem, Dale Friend's 1898-S Barber is boldly detailed on both sides without the usual weakness right of the shield. The surfaces are frosty with mostly brilliant luster and a frame of light gold and blue toning. Population: 5 in 65, 5 finer (10/08).

*Ex: Larry Whitlow.*

*From The Dale Friend #2 All-Time PCGS Registry Set of Barber Half Dollars.* (#6482)

## Exceptional 1899-O Half Dollar, MS66 Tied for Finest Certified

**3882** **1899-O MS66 PCGS.** The mintage of 1.7 million 1899-O half dollars was sufficient to ensure that enough Mint State pieces have survived for any collector to acquire one, as long as quality is unimportant. However, Gem examples are elusive, with just 12 PCGS certified submissions grading MS65 or finer. If a bold strike is a further requirement, then top grade examples of this issue are every bit as rare as any other date in the series.

This coin from the Dale Friend Collection is the total package, with exceptional satin luster, brilliant silver surfaces, and faint champagne toning. The strike is wonderful, with only the slightest weakness on the hair behind Liberty's eye, and at the junction of the wing and right shield. Population: 6 in 66, 0 finer (10/08).

*Ex: Dennis Nagy.*

*From The Dale Friend #2 All-Time PCGS Registry Set of Barber Half Dollars.* (#6484)

## Notable 1899-S Half Dollar, MS67

**3883** **1899-S MS67 PCGS.** The 1899-S is rarer overall than the 1899-O, although the two issues are similar in high-grade rarity. Both issues are quite rare in top quality. PCGS has only certified 14 examples in MS65 or finer, and just two pieces in Superb Gem MS67. A single finer piece has been certified, and the 1899-S is one of just eight issues (10 coins) that PCGS has certified an MS68 specimen.

Dale Friend's 1899-S Barber half is finer than the Norweb-Price coin, the Eliasberg piece that J.M. Clapp bought directly from the San Francisco Mint, and the James Bennett Pryor coin that Bowers and Merena sold in January 1896.

Both sides have lovely heather and champagne patina with peripheral russet, steel, and lime toning. It is a well struck piece with bold design details. Population: 2 in 67, 1 finer (10/08).

*From The Dale Friend #2 All-Time PCGS Registry Set of Barber Half Dollars.* (#6485)

## Sumptuous 1900 Barber Half, MS66

**3884** **1900 MS66 PCGS.** The 1900 Barber half dollar is one of the common dates in the series, from a mintage that approached 5 million coins. Circulated pieces and Mint State coins through MS65 grade are all rather plentiful, although above MS65 this issue is a major rarity.

This piece features incredible deep blue and sea-green toning on the obverse, with gold, cobalt, and violet on the reverse. The Friend specimen is boldly struck and exhibits frosty underlying luster with pristine surfaces. Population: 5 in 66, 1 finer (10/08).

*Ex: U.S. Coins, Inc.*

*From The Dale Friend #2 All-Time PCGS Registry Set of Barber Half Dollars.* (#6486)

## Fantastic 1900-O Barber Half Dollar, MS66

**3885** **1900-O MS66 PCGS.** The 1900-O ranks among the major "hidden" rarities of the Barber half dollar series in top grade. That is certainly due in part to the mintage of nearly 3 million coins. The mintage is the 13th *highest* production of the entire Barber half dollar series, including coins of all mints. While low mintages do not necessarily mean a given coin is rare, a high mintage normally does mean a coin is common. There are certainly exceptions, but such a mintage in the Barber half series is no reason to suspect an issue is hard to find. In the case of the 1900-O, it is priced higher than common issues in all grades, circulated and Mint State. The 1900-O has the fourth lowest Mint State population of all dates that PCGS has certified. Only 31 submissions have been certified in all Mint State grades. That population compares favorably with the 1904-S (30 Mint State pieces), and it is fewer than the 1901-S (38 pieces).

The Dale Friend Collection boasts an exquisite 1900-O half dollar. It has finer technical quality than the Pryor coin and a sharper strike than the Price coin. Overall, it appears about equal to the Eliasberg example.

Slight weakness is noted at the centers of this specimen, in the usual locations, but this piece is still sharper than the normal New Orleans Mint Barber half dollar. The surfaces have frosty silver luster, the obverse subdued by faint rose-gold toning with traces of pale blue. The reverse is brighter with hints of champagne. Population: 2 in 66, 0 finer (10/08).

*Ex: U.S. Coins, Inc.*

*From The Dale Friend #2 All-Time PCGS Registry Set of Barber Half Dollars.* (#6487)

## Notable 1900-S Barber Half, MS66

**3886** **1900-S MS66 PCGS.** David Akers describes the 1900-S as "one of the unheralded rarities of the Barber half dollar series." Our experience is similar, with few top quality pieces appearing in past auction sales. In the past 15 years, we have only offered three pieces graded better than MS65; two NGC MS67 coins and a PCGS MS66 that is a different example than this coin. This piece is finer than the Pryor coin and fully equal to the outstanding Price and Eliasberg specimens.

From different dies than the Dr. Thaine Price coin, though with a nearly identical die crack across the base of the neck truncation. The mintmark is in a different position, centered beneath the tail feathers. On the Price coin, the mintmark is right of center and canted to the right. Subtle splashes of champagne and deeper gold toning accompany delightful gray-brown surfaces on this sharply defined 1900-S half dollar. PCGS Population: 3 in 66, 1 finer (10/08).

*Ex: Dennis Nagy.*

*From The Dale Friend #2 All-Time PCGS Registry Set of Barber Half Dollars.* (#6488)

## Elusive 1901-O Half Dollar, MS66

**3887** **1901-O MS66 PCGS.** Of all the different Barber half dollar issues, the 1901-O has the second lowest Mint State population of any, behind the 1896-O. PCGS has only certified 26 submissions in all grades from MS60. It is also tied for the second lowest Gem population, as just six of those 26 submissions grade MS65 or higher. Ask specialists about the most difficult Barber half dollars, and the 1901-O will certainly be mentioned. Ask non-specialists, and this issue might be mentioned one time out of 20, if even that often.

Ivory surfaces exhibit frosty luster with gorgeous peripheral iridescence. The surfaces are outstanding and the aesthetic appeal is most desirable. Faint strike doubling is evident on the reverse. As usual, the junction of the right shield border and wing shows weakness, but all other details are bold. Population: 2 in 66, 1 finer (10/08).

*Ex: Harry Laibstain Rare Coins.*

*From The Dale Friend #2 All-Time PCGS Registry Set of Barber Half Dollars.* (#6490)

## Splendid 1901-S Barber Half, MS66

**3888** **1901-S MS66 PCGS.** The San Francisco Mint, in 1901, spent most of their effort producing gold coins. Including all denominations, the California Mint struck 3,796,720 coins through the year, and coined 8,056,750 gold coins during the same period, more than twice as many.

In all Mint State grades, the 1901-S has the eighth lowest PCGS population, although it is sometimes considered one of the rarest and most famous, because of the 1901-S Barber quarter rarity. Still, the 1901-S half dollar certainly holds its own credentials as a rarity in the series. In Gem quality, PCGS has certified five pieces in MS65, three in MS66, and two in MS67. NGC has certified two in MS65 and one in MS67. Of course, those figures from both services include possible resubmissions. The advanced Barber half dollar specialist, seeking the best possible quality, has little opportunity to be selective when seeking an example of this issue.

The Dale Friend Collection boasts one of the three certified MS66 coins, and a remarkable example it is. The surfaces are fully lustrous and satiny, beneath amazing heather, champagne, blue, and iridescent toning on both sides. It is a sharply detailed piece, despite some faint horizontal roller marks on both sides. The obverse is cracked through the lower part of the neck, just above its truncation, extending from star 1 to the right edge of the neck. Another crack extends along the bust tip to and through star 13. Population: 3 in 66, 2 finer (10/08).

A 15% BUYER'S PREMIUM ($9 MIN.) APPLIES TO ALL LOTS.

## Incredible 1902-O Barber Half, MS66 Tied for Finest PCGS Certified

**3889** **1902-O MS66 PCGS.** Although NGC has certified a single finer example, Dale Friend's 1902-O half dollar is an incredible coin that easily ranks near the top of the Condition Census for the date. It compares favorably to the Dr. Thaine Price specimen that David Akers called "possibly the finest known specimen." It is far finer than the weakly struck Pryor coin, and it is also finer than the Eliasberg coin that J.M. Clapp purchased directly from the New Orleans Mint in 1902. In addition to the three submissions that PCGS has certified as MS66, including this coin, that service has also certified exactly three submissions in MS65. The 1902-O ranks in the top 10 for PCGS Mint State population, and it is tied for the second lowest PCGS population in MS65 or finer grades, behind the 1892 Micro O. There is no denying the rarity and importance of this particular Barber half dollar.

This example has one of the sharpest strikes that we have ever seen on a 1902-O half dollar. In fact, a strong strike is a common thread among most of Dale Friend's coins, apparently one of the important factors in his collecting endeavor. Both sides have full silver brilliance beneath attractive gold and iridescent toning that is mostly concentrated along the borders. It is an aesthetically pleasing Premium Gem that will easily please any collector. Population: 3 in 66, 0 finer (10/08).

*Ex: Harry Laibstain Rare Coins.*

*From The Dale Friend #2 All-Time PCGS Registry Set of Barber Half Dollars.* (#6493)

## Amazing 1902-S Half, MS67

**3890** **1902-S MS67 PCGS.** Ex: Pryor. This 1902-S half dollar from the James Bennett Pryor Collection ranked among the important highlights of that collection, much as it does among coins from the Dale Friend Collection. In the Pryor catalog, Dave Bowers called this coin a "Memorable Gem" and wrote: "Very rare with this combination of high grade and superb quality. Where could you find another even close to this one." In January 1996, when the Pryor Collection was sold, this coin was PCGS certified MS66, and at the time it was only the second example so graded. Today, PCGS has certified six MS66 submissions, along with two as MS67. As always, it is virtually impossible to determine how many of those represent resubmissions.

A boldly detailed piece, Dale Friend acquired the Pryor Collection coin a dozen years ago, and today it remains tied for the finest certified. Both sides are brilliant with frosty silver luster and lovely pale gold toning. Population: 2 in 67, 0 finer (10/08).

*Ex: Stack's (10/1975), lot 396; James Bennett Pryor Collection (Bowers and Merena, 1/1996), lot 287.*

*From The Dale Friend #2 All-Time PCGS Registry Set of Barber Half Dollars.* (#6494)

## Astounding 1903 Half, MS66 Tied for Finest Certified

**3891** **1903 MS66 PCGS.** The 1903 is one of the most underrated Barber half dollars from the Philadelphia Mint, especially in Gem quality. The Pennsylvania facility coined more than 2.2 million coins, but few were saved by contemporary collectors. Proof coins were considered better quality than business strikes, and were the quality of choice by most early 20th century collectors. While five different submissions are PCGS certified as MS66, it is uncertain how many different coins that population represents.

The Dale Friend specimen is similar in quality to the Pryor and Price coins. The Eliasberg collection had a proof. In fact most contemporary collections had proofs, while nearly all business strikes entered circulation. If proofs had never been struck, 1903 business strikes would rank among the rarest and most important Barber half dollars in the entire series. Our Permanent Auction Archives covering sales over the last 15 years confirm the high-grade rarity of this issue. The Dale Friend coin is the first MS66 example of the issue that we have offered in 15 years! Previously, 10 MS65 examples have appeared in our auctions.

A frosty and delightful Premium Gem, the Dale Friend coin is essentially brilliant with a faint trace of gold patina on each side. It is boldly defined with excellent details on both sides, save for very slight weakness at the normal spot along the right edge of the shield. A few minuscule marks on each side prevent a Superb Gem assessment. Population: 5 in 66, 0 finer (10/08).

*Ex: Dennis Nagy.*

*From The Dale Friend #2 All-Time PCGS Registry Set of Barber Half Dollars.* (#6495)

## Rainbow Toned 1903-O Barber Half, MS66

**3892** **1903-O MS66 PCGS.** Compared to some other New Orleans issues, the 1903-O is relatively plentiful in Mint State grades, yet it is still conditionally rare, with only 11 submissions certified as MS65 or finer by PCGS. This piece is similar to the Pryor coin, and it is technically finer than the Eliasberg coin although with a little weaker strike.

The central obverse and reverse have light silver surfaces with pastel sea-green and gold toning that gives way to a remarkable rainbow presentation, consisting of gold, orange, blue, green, steel, lilac, and iridescent toning. The obverse has slight weakness at a few of the leaves and along the hair over the ear, and the reverse has some weakness in the vicinity of the right shield border, as usual. Population: 3 in 66, 1 finer (10/08).

*From The Dale Friend #2 All-Time PCGS Registry Set of Barber Half Dollars.* (#6496)

## The Pryor 1903-S Half, MS66

**3893** **1903-S MS66 PCGS.** Ex: Pryor/Friend. Although the 1903-S is in the minor league when compared to issues such as the 1901-S and 1904-S half dollars, it is still conditionally rare, with only 12 PCGS certified submissions in grades of MS65 through MS68. Called a "Museum Quality Gem" in the Pryor catalog, Dave Bowers wrote: "If you were to have visited the San Francisco Mint in one particular day in 1903 and were to have picked this coin from the hopper near the press, it probably would have looked like it does now."

An amazing Premium Gem that Dale Friend acquired from the James Bennett Pryor auction, this piece has ivory luster with brilliant mint frost and little evidence of toning on either side. It is exceptionally well detailed, with slight weakness along the right side of the shield, with original mint-caused roller marks in that same area. Population: 4 in 66, 3 finer (10/08).

*Ex: Harold April (12/1965); James Bennett Pryor Collection (Bowers and Merena, 1/1996), lot 290.*

*From The Dale Friend #2 All-Time PCGS Registry Set of Barber Half Dollars.* (#6497)

## Elusive 1904-O Half Dollar, MS65

**3894** **1904-O MS65 PCGS.** This is only the fifth time that we have offered a Gem MS65 example of the rare 1904-O Barber half dollar in any of our actions since January 1993. While a few other issues are rarer in Gem grades, the 04-O is easily one of the stoppers toward a complete set. Dale Friend's Gem is nearly equal to the Price and Eliasberg coins, and similar to the Pryor-Hugon coin in quality.

The obverse has medium gold toning that deepens slightly near the border. The reverse has lighter ivory color with peripheral gold at the upper half of the border. It is quite boldly defined with slight weakness only at the junction of the wing and right shield border. A single small mark on the cheek prevents a higher grade. Population: 5 in 65, 6 finer (10/08).

*Ex: Heritage Galleries.*

*From The Dale Friend #2 All-Time PCGS Registry Set of Barber Half Dollars.* (#6499)

## Remarkable 1904-S Barber Half Dollar, MS66 The Eliasberg Specimen

**3895** **1904-S MS66 PCGS.** Ex: Eliasberg. While there may be others, two specific 1904-S Barber half dollars stand out from the crowd. They are the Emory-Nichols coin that later appeared in the Dr. Thaine B. Price Collection, and the present example, the Dale Friend coin that was purchased out of the Eliasberg sale. Both coins are incredible quality, and either one might qualify as the finest known. In 1904, S. Benton Emory almost certainly purchased his half dollar directly from the San Francisco Mint, and in the same year J.M. Clapp ordered his from the San Francisco Mint. Judging from the appearance of these two coins, it seems that perhaps they were hand selected by Mint officials at the time, those in charge undoubtedly being aware of the two important numismatic cabinets.

The 1904-S has the fourth lowest PCGS Mint State population of any Barber half, behind the 1892 Micro O, 1896-O, and 1901-O. PCGS has only certified 30 pieces in all grades from MS60 through MS67, and just six of those coins grade MS65 or finer.

An impressive Premium Gem, the Eliasberg-Friend specimen is about to find only its fifth owner since the day it was made. J.M. Clapp bought the coin from the San Francisco Mint, Louis E. Eliasberg, Sr. bought the entire Clapp Collection, Dale Friend bought the 1904-S from the Stellar Collection, and today another lucky collector can add his or her name to the pedigree. The coin is boldly defined with delightful gold toning over ivory-silver surfaces and frosty luster. A single small mark in the right obverse field prevents an MS67 grade assignment. Population: 1 in 66, 2 finer (10/08).

*Ex: San Francisco Mint; J.M. Clapp; John H. Clapp; Clapp Estate (1942); Louis E. Eliasberg, Sr.; Eliasberg Estate (Bowers and Merena, 4/1997), lot 2102; Stellar Collection.*

*From The Dale Friend #2 All-Time PCGS Registry Set of Barber Half Dollars.* (#6500)

## Lustrous 1905-O Half, MS67

**3896 1905-O MS67 PCGS.** Although PCGS has certified two submissions as MS68, this coin and the Hugon coin that we sold in January 2005 are the only two MS67 examples that the same service has graded, and they are tied for the finest that have appeared in any Heritage auction over the last 15 years. In May 1998, the Dr. Thaine Price coin was also certified PCGS MS67, possibly recertified since that time. There are probably only five or six truly Superb examples of this issue still in existence.

The Dale Friend specimen is an amazing, highly lustrous coin, with brilliant and satin silver surfaces. A trace of iridescence on each side adds to its overall aesthetic appeal. It is boldly struck, save for the usual reverse weakness at the right shield border. Population: 2 in 67, 2 finer (10/08).

*Ex: Superior Galleries.*

*From The Dale Friend #2 All-Time PCGS Registry Set of Barber Half Dollars.* (#6502)

## Exceptional 1905-S Half Dollar, MS66

**3897 1905-S MS66 PCGS.** While the 1905-S half is falls short of the rarity levels of early branch mint Barber half dollars, Gem and finer pieces are still quite elusive. The Friend specimen is finer that the Pryor coin, and just below the Eliasberg-Hugon and Price specimens. Over the last 15 years, we have previously handled two PCGS MS67 pieces and three MS66 coins.

Dale Friend's Premium Gem is deeply toned with satiny luster beneath heather, sea-green, russet, and gold toning. It is boldly defined on both sides, even through the fine roller striae on the obverse. Population: 3 in 66, 3 finer (10/08).

*Ex: Pinnacle Rarities.*

*From The Dale Friend #2 All-Time PCGS Registry Set of Barber Half Dollars.* (#6503)

## Wonderful 1906-O Half, MS66

**3898** **1906-O MS66 PCGS.** PCGS has certified a mere 12 Gem examples of this issue, five in MS65, five in MS66, and two in MS67. In fact, only 61 PCGS submissions have been certified in all Mint State grades, most in MS63 or MS64 grades. Finding an example in either of those two grades would be a major hurdle, but finding a Gem or better yet, a Premium Gem such as Dale Friend's coin will be all but impossible once the present opportunity is just a memory.

An amazing Premium Gem, with a fully prooflike obverse and lustrous reverse that retains its full quota of mint frost. Incredible aesthetic appeal is created by gold and peripheral toning around light ivory centers. It is boldly defined with reverse weakness only at the usual location near the right shield border. Population: 5 in 66, 2 finer (10/08).
*Ex: Heritage Galleries.*
*From The Dale Friend #2 All-Time PCGS Registry Set of Barber Half Dollars.* (#6506)

## Stunning 1906-S Half Dollar, MS67

**3899** **1906-S MS67 PCGS.** Ex: Price. The 1906 San Francisco earthquake is known to most everyone, and this Superb Gem is certainly an excellent memento of the event. If only coins could talk! Dale Friend acquired his 1906-S half from the incredible Dr. Thaine B. Price Collection that David Akers sold in May 1997. In the Price catalog, Akers called this piece "one of the finest known." It compares favorably with the Eliasberg coin, and it is clearly finer than the Pryor coin that Dave Bowers called "one of the very finest 1906-S half dollars in existence." Only the Hugon coin is clearly better, and that coin is now PCGS certified MS68!

An outstanding piece with russet, greenish-gold, pale blue, and violet toning. The underlying surfaces exhibit frosty silver luster with faint horizontal roller marks on each side, remaining from the original planchet. Akers further commented: "For those who love superbly toned, immaculate quality, well struck Barber half dollars, this coin will be a particular treat." Population: 4 in 67, 1 finer (10/08).
*Ex: Dr. Thaine Price Collection (David Akers, 5/1998), lot 169.*
*From The Dale Friend #2 All-Time PCGS Registry Set of Barber Half Dollars.* (#6507)

## Fabulous 1907-D Half, MS67

**3900** **1907-D MS67 PCGS.** By 1907 the Denver Mint was firmly established, having nearly a full year to work out any equipment and personnel conflicts, and coinage production was well under way. Nearly 4 million Barber half dollars were coined, and examples are readily available in all grades through MS64. However, Gem MS65 pieces are elusive and finer quality examples are nearly impossible to locate. The present offering of Dale Friend's half dollars provides an excellent and unusual opportunity to acquire a Superb Gem 1907-D half dollar. This specimen is finer than the Pryor coin, and about equal to the Eliasberg-Hugon coin and the Price coin. When we sold the Hugon coin in January 2005, it was the first and only previous time that we handled a Superb Gem 1907-D half dollar in 15 years.

An amazing coin, both sides of Dale Friend's Superb Gem 1907-D have light ivory centers, framed by multi-colored toning, including lemon-yellow, green, blue, lilac, and russet toning. Population: 3 in 67, 0 finer (10/08).

*Ex: U.S. Coins, Inc.*

*From The Dale Friend #2 All-Time PCGS Registry Set of Barber Half Dollars.* (#6509)

## Sensational MS66 1907-S Barber Half Dollar

**3901** **1907-S MS66 PCGS.** Unrecorded in the Pryor Collection catalog is the sharply repunched mintmark, with "ears" of the S extending upward from the upper left and right curves. In his *Complete Encyclopedia,* Walter Breen commented "Positional vars., one with repunched S," although he failed to itemize this as an important variety worthy of its own encyclopedia number. David Lawrence describes the variety as number 101 in *The Complete Guide to Barber Halves,* and mentions that it is a fairly common variety.

Time was that the 1907-S was considered a major sleeper in the series, meaning the value was too low in comparison to its rarity. Much has changed over the last decade or so, and today it is no longer an underrated or hidden rarity. The true rarity of this issue is known, yet finding an example remains extremely challenging.

The words that Dave Bowers wrote in 1996 are equally appropriate today, only changing Pryor to Friend at the end of this quote: "This coin could not have been any nicer on the day it was made. The 1907-S is well known for its elusive character in high grades, and even an MS-60 coin would be worth special mention in an advanced collection. The James Bennett Pryor coin is absolutely incredible, and although it is not one of the most famous half dollars in the Barber series, in this grade it certainly is in the front rank of rarity. It is easy to contemplate that the bidder who does not take this 1907-S home may well have to wait years before seeing its equal, and then who knows what the price might be. Here, indeed, is one of the great prizes of the Pryor Collection."

A few faint diagonal roller marks on both sides remain from the planchet before this coin was struck. It is a remarkable Premium Gem with amazing luster. The surfaces are full brilliant and frosty, with incredible details. The only strike weakness is at areas also affected by the roller striations. Population: 4 in 66, 3 finer (10/08).

*Ex: Numismatic Enterprises (2/1966); James Bennett Pryor Collection (Bowers and Merena, 1/1996), lot 304.*

*From The Dale Friend #2 All-Time PCGS Registry Set of Barber Half Dollars.* (#6511)

## Lovely 1908-S Barber Half Dollar, MS66

**3902** **1908-S MS66 PCGS.** The 1908-S Barber half is an elusive condition rarity in Gem quality, with only 13 examples certified by PCGS in MS65 or finer grades. Dale Friend's Premium Gem is similar to the Hugon coin that we sold in January 2005, the only other MS66 PCGS example that has appeared in any of our auctions over the last 15 years. It is much finer than the Pryor coin, and similar also to the Eliasberg and Price coins. In top grades, this issue compares favorably to the 1907-S, one of the most important issues in the entire Barber half dollar series. PCGS has certified three MS66 coins and two MS67 examples, compared to four MS66 1907-S halves, and three of them in MS67.

While the strike is somewhat indistinct, especially on the reverse, the surfaces are pristine with few marks of any kind. Faint roller striae can be seen on the obverse, remaining from the original planchet. Satiny and lustrous surfaces are visible through splendid gold and iridescent toning. Population: 3 in 66, 2 finer (10/08).

*Ex: Heritage Galleries.*

*From The Dale Friend #2 All-Time PCGS Registry Set of Barber Half Dollars.* (#6515)

## Sensational 1909-S Half Dollar, MS67 Tied for Finest PCGS Certified

**3903** **1909-S MS67 PCGS. Inverted Mintmark.** FS-50-1909S-501. In Volume 17, issue 4, of the *Journal of the Barber Coin Collectors' Society,* Frank J. Colletti contributed "Barber Half Mintmark Varieties," a discussion of inverted S mintmarks. The Friend specimen clearly matches the characteristics of the 1909-Inverted S half dollar. The mintmark is narrower at the bottom, and the bottom curve is thinner. Study of inverted mintmarks is still in its infancy, although more numismatists are taking notice. The concept of an inverted S may seem strange to some, much as the idea of an inverted O would also seen strange. Alternatively, the concept of inverted C and D mintmarks would be readily grasped.

The Dale Friend Superb Gem is clearly finer than the Pryor coin, and much the same as the Eliasberg and Price examples. We sold an NGC graded MS68 example in our January 2005 Hugon sale, although we doubt that the Hugon coin was that much finer than the present example. Both sides are fully brilliant and lustrous with frosty silver surfaces that are accented by light champagne and gold toning. Only a couple tiny marks keep it from an even higher grade. The strike is bold with only slight weakness at the arrow feathers. Population: 7 in 67, 0 finer (10/08).

*Ex: U.S. Coins, Inc.*

*From The Dale Friend #2 All-Time PCGS Registry Set of Barber Half Dollars.* (#6518)

## Elusive 1910 Half Dollar, MS66

**3904** **1910 MS66 PCGS.** When discussions turn to the Philadelphia Mint Barber half dollars, collectors immediately think of the three keys, 1913, 1914, and 1915. But the 1910 rightfully deserves to keep company with the other three dates, especially in Gem or finer grades. Only 418,000 of these coins were struck, and few were saved by contemporary collectors.

This Premium Gem from the Dale Friend Collection is fully lustrous with brilliant silver surfaces and sharp design feature. Both sides have minimal surfaces marks that are hardly worth mentioning. The strike is bold with excellent design details, including strong details on the most intricate design elements. Population: 4 in 66, 0 finer (10/08).
*Ex: Heritage (6/2005), lot 6378.*
*From The Dale Friend #2 All-Time PCGS Registry Set of Barber Half Dollars.* (#6519)

## Delightful 1910 Barber Half Dollar, MS66 Tied for the Finest Certified

**3905** **1910 MS66 PCGS. CAC.** The 1910 Barber half dollar is one of the less recognized, but more important Philadelphia Mint issues in the series, with a mintage of only 418,000 coins. In the present sale, two Premium Gem examples of this date are offered, the other one in the Dale Friend Collection. With just four similarly graded pieces certified by PCGS (11/07), the present sale actually offers half of the PCGS certified population.

Aside from the usual weakness at the junction of the shield and right (facing) wing, this piece is boldly defined. It is fully lustrous with brilliant silver surfaces that exhibit a faint trace of speckled gold toning. (#6519)

## Outstanding 1910-S Half Dollar, MS67

**3906** **1910-S MS67 PCGS.** If PCGS had not certified a single MS68 example of this issue, we would state that the present coin from the Dale Friend Collection is probably the finest existing 1910-S half dollar. As it is, we cannot imagine that the single certified MS68 example has any finer aesthetic appeal than this sensational Superb Gem. Nearly 2 million 1910-S half dollars were originally minted in San Francisco, and quite a few Mint State pieces have survived. PCGS has certified 66 submissions in all grades, including 25 in Gem grades from MS65 to MS68, although at the top of that range, it is still a major condition rarity, as are virtually all Barber half dollars. The 1910-S is rarer than most of the later S-Mint Barber half dollars, although it is more plentiful than most of the earlier S-Mint issues.

Dale Friend's Superb Gem example appears to be finer than the Pryor and Price coins, and perhaps similar to the Eliasberg coin in overall quality. It is highly lustrous with a brilliant central obverse design motif that is framed by pastel russet, lilac, and blue near the borders. The reverse is mostly brilliant with faint peripheral iridescence. All of the design elements are boldly detailed, except as usual, the top right of the shield and the adjacent wing, although even those details are sharper than often seen. Population: 3 in 67, 1 finer (10/08).

*Ex: U.S. Coins, Inc.*

*From The Dale Friend #2 All-Time PCGS Registry Set of Barber Half Dollars.* (#6520)

## Extraordinary 1911-D Half, MS67

**3907** **1911-D MS67 PCGS.** The Eliasberg-Hugon Superb Gem with full prooflike surfaces apparently qualifies as the finest known 1911-D half, and it is followed by this piece from Dale Friend's cabinet. The Norweb-Price coin is another comparable example, but we are unaware of any others that approach these three examples for overall quality. Examples of this issue are much easier to locate if one is content with a coin that grades MS64 or below.

Dale Friend selected this gorgeous Superb Gem for its incredible aesthetic desirability. The central obverse is ivory with a frame of lemon-yellow and burnt-orange along the border. The reverse is similar, with additional concentric rings of lilac and blue. The arrow feathers are slightly weak, but all other details are bold. A single minor luster graze on the cheek is the only obvious mark, and even that requires careful examination. Population: 3 in 67, 0 finer (10/08).

*Ex: Dennis Nagy.*

*From The Dale Friend #2 All-Time PCGS Registry Set of Barber Half Dollars.* (#6522)

## Desirable 1911-S/S Half Dollar, MS66

**3908** **1911-S MS66 PCGS. Repunched Mintmark.** FS-501. The mintmark is slightly repunched, with doubling visible at the left edge of the lower serif. The variety is not noted on the PCGS holder. This doubled mintmark was unlisted in Breen's Complete Encyclopedia. Fivaz and Stanton mention that it is a recently discovered variety, listed in the fourth edition of the *Cherrypicker's Guide*.

Not only is Dale Friend's example the finest currently known representative of the Repunched Mintmark, but it is also a top quality piece for the date. The finest 1911-S is the MS67 that we sold in the Hugon Collection, followed by this piece, the Eliasberg coin, and the Price coin, all similar in quality. The present example is a boldly struck Premium Gem with frosty luster beneath delightful gray-brown and iridescent toning on the obverse, with lighter ivory and gold on the reverse. Population: 7 in 66, 1 finer (10/08) for all varieties, including a single MS65 coin that is identified as the Repunched Mintmark variety.

*Ex: Dennis Nagy.*

*From The Dale Friend #2 All-Time PCGS Registry Set of Barber Half Dollars.* (#6523)

## Lustrous 1914 Barber Rarity, MS65

**3909** **1914 MS65 PCGS.** This is one of the four key Philadelphia Mint Barber half dollars along with 1910, 1913, and 1915. PCGS has only certified 10 examples in MS65 or finer grades, the lowest Gem population of the four dates. Dale Friend's example is equal to the Hugon coin, and finer than either the Price or Pryor pieces. The Eliasberg Collection had a proof example, as was the custom so many years ago, when that collection was being formed.

Dale Friend acquired this amazing Gem for his collection, choosing it for its bold strike and amazing luster. Both sides are frosty and fully brilliant with only a subtle trace of champagne toning. It is slightly weak just right of the shield, as usual, but all other design elements are sharply defined. Population: 8 in 65, 2 finer (10/08).
*Ex: Dennis Nagy.*
*From The Dale Friend #2 All-Time PCGS Registry Set of Barber Half Dollars.* (#6530)

## Shining Superb Gem 1915-S Barber Half

**3910** **1915-S MS67 NGC.** The Barber half dollar design remained consistently unpopular throughout its tenure, and the competitions to replace his Liberty head and heraldic eagle ushered in a striking chapter in America's numismatic history. The year 1916 saw considerable enthusiasm for the first Walking Liberty halves, if not high mintages; by contrast, the 1915-dated Barber halves that were the last of their kind were virtually ignored. This Superb Gem, tied with three others in the combined certified population for numerically finest (11/08), is minimally toned with impressively lustrous silver-gray surfaces that show just a hint of gold. Well-defined and attractive.
*From The James Mossman Collection.* (#6534)

## PROOF BARBER HALF DOLLAR

Magnificent 1898 Half Dollar
PR67 Ultra Cameo

**3911** **1898 PR67 Ultra Cameo NGC.** A total of 735 half dollars were produced in proof format in 1898. A review of NGC and PCGS population data indicates that approximately 400 non cameo examples have been certified, along with about 115 Cameos, and fewer than 30 Ultra/Deep Cameos. A number of these coins are likely resubmissions.

This magnificent Superb Gem Ultra Cameo specimen displays a virtual white-on-black appearance, as the frosted motifs seems to be suspended above the deep watery fields. A precise strike imparts bold delineation to the design features, enhancing even more the field-device contrast. Untoned surfaces are impeccably preserved. Census: 7 in 67 Ultra Cameo, 4 finer (11/08). (#96545)

## WALKING LIBERTY HALF DOLLARS

Bright 1919-S Near-Gem Fifty Cent

**3912** **1919-S MS64 PCGS.** Jeff Ambio writes that the 1919-S is the second rarest Mint State Walking Liberty half dollar after the 1921-S. Even 1919-S examples grading MS60 to MS64 are rare (*Collecting and Investing Strategies for Walking Liberty Half Dollars*, 2008).

Bright, lustrous surfaces of this near-Gem specimen take on freckles of tan and violet on the obverse, while splashes of the same color palette visit the reverse. The design features exhibit a better-than-average strike on Liberty's head and branch hand. A handful of minute, wispy marks precludes Gem classification. Housed in a green-label holder. Population: 60 in 64, 49 finer (11/08).
*From The Calvin Collection.* (#6579)

## Well Struck 1920-D Gem Fifty Cent

**3913** **1920-D MS65 PCGS.** Numismatic writers present different opinions regarding strike on the 1920-D half dollar. Bruce Fox (1993), for example, writes that: "... low striking pressure and/or inadequate die spacing produced weaker than average strikes." Jeff Ambio, on the other hand, contends that the typical example is quite bold.

The strike is very well executed on the current Gem offering, including nearly complete definition on the branch hand. Soft frosted luster rolls gently beneath mostly light coppery-gold toning imbued with splashes of powder-blue, deepening slightly along the lower portion of the reverse. A few grade-consistent obverse marks do not significantly distract. Population: 41 in 65, 6 finer (11/08).
*From The Calvin Collection.* (#6581)

## Pleasing 1921 Gem Half Dollar

**3914** **1921 MS65 NGC.** The 1921 has the second lowest circulation strike mintage of the Walking Liberty half dollar series (246,000 pieces). Jeff Ambio (2008) indicates that "... Gems are ... rare in an absolute sense and more challenging to locate than those of such other issues in this series as the 1917-D Obverse, 1920-S, 1923-S, and 1927-S."

Pleasing frosty luster adorns both sides of the present Gem, each of which gives off light silver-gray color. A well executed strike imparts strong definition to the design elements, including Liberty's branch hand. Close inspection reveals nicely preserved surfaces that have just a few light ticks and grazes. Census: 30 in 65, 2 finer (11/08).
*From The Calvin Collection.* (#6583)

## Desirable Choice AU 1921-S Half

**3915** **1921-S AU55 PCGS.** As with many other issues struck during the recession that followed World War I, the 1921-S has a low mintage and a poor survival rate, since the few coins that were struck tended to circulate heavily. By contrast, the example offered here escaped with only light evidence of wear, mostly at the high points. Light golden overtones visit otherwise silver-white surfaces that retain immense luster. A trifle softly struck on the central devices, but the overall quality renders the strike an easily overlooked quibble. Minimally marked for the grade and gorgeous. (#6585)

## Outstanding 1923-S Gem Fifty Cent

**3916** **1923-S MS65 PCGS.** The 1923-S half dollar is rarer in Mint State than its rather sizable mintage of 2,178,000 pieces might suggest. In this regard, Jeff Ambio writes in his 2008 *Walking Liberty Half Dollar* reference: "... the 1923-S trails only the lower-mintage 1917-S Obverse, 1919-S and 1921-S as the rarest San Francisco Mint Walking Liberty Half Dollar."

Vibrant luster adorns the present Gem specimen, complementing the well executed strike. The gown lines are sharply incised, and relatively strong (though not quite full) definition is seen on Liberty's branch hand. Impeccably preserved surfaces are essentially untoned. All in all, an outstanding S-mint representative. Population: 41 in 65, 12 finer (11/08). (#6586)

# SMS KENNEDY HALF DOLLARS

## Rarely Seen Deep Cameo 1965 Half, SMS MS67

**3917** **1965 SMS MS67 Deep Cameo PCGS.** Government officials' response in 1964 to the rapid increase in silver prices and the consequent disappearance of circulating dimes, quarters, and halves was to blame the collector, eliminate proof sets and mintmarks (until 1968), reduce the silver content of the half dollar to 40%, and issue the so-called Special Mint Sets to collectors in 1965 through 1967. Coins from these sets, while supposedly a step up from regular circulation-strike coinage, for the most part lack even minimal contrast between the fields and devices. The 1965 is the most elusive with cameo or deep cameo contrast, respectively, followed by the 1966 and then the 1967, and the 1965 is hardest to find in high grade. Even Cameo 1965 pieces are seldom found. The grade of the present piece is determined by a hidden tick in the hair above the ear and a couple of ticks in the central reverse, but the contrast between the deep, mirrored fields and the frosty devices is profound. One of eight so certified at PCGS, with none finer (11/08). (#96845)

## Breathtaking 1966 SMS MS68 Deep Cameo Half

**3918** **1966 SMS MS68 Deep Cameo PCGS.** The 1966 Special Mint Set Kennedys are very nearly as elusive as the 1965 as Deep Cameos, well known to series specialists, yet the 1966s are not quite as elusive in high grade. Although the Special Mint Sets were supposedly produced to a lower standard than true proof sets, this piece is indistinguishable from such, with brilliant, limitless mirrored fields and breathtakingly thick mint frost coating all devices on both sides. The coin is brilliant throughout and close to perfection—one of only four pieces so graded at PCGS, with none finer (10/07). (#96846)

# PROOF KENNEDY HALF DOLLAR

## Profoundly Contrasted 1964 Accented Hair Half Dollar PR68 Deep Cameo

**3919** **1964 Accented Hair PR68 Deep Cameo PCGS.** A marvelous example of this first-year variety, one that was issued early in the year before the new Kennedy half design was modified to deemphasize the wavy hair below President Kennedy's part. It was rumored that the President's widow, Jacqueline Kennedy, disliked the strong detail in the hair. A practiced eye can spot the strong, incisive hair detail that marks the variety with little problem, but the easiest identifier, as noted in *Cherrypickers'* fourth edition, volume two, is the broken bottom-left serif on the I of LIBERTY. Few coins indeed can match the quality of the present silver-white, near-flawless specimen, and the contrast between the inky-black fields and crisply frosted devices is remarkable. PCGS has certified only eight coins in PR68 Deep Cameo, with none finer (10/07). (#96801)

# Attractive and Historic 1794 Silver Dollar B-1, BB-1 Better Than Average Strike, VF30

**3920 1794 VF30 PCGS.** B-1, BB-1, R.4. Collectors have avidly pursued the 1794 silver dollars from the earliest days of the hobby. An example of this date was featured in the first all coin auction sale held in this country, the Roper Sale (M. Thomas and Sons, 2/1851), lot 22, item number 4. From that time until the present day, the 1794 silver dollar has been a focal point for any auction catalog it has appeared in. The charisma of the issue cannot be overstated, and well-heeled collectors sometimes opt for this date over the much less expensive 1795 dollar when forming a top-of-the-line type set. Of course, no collection of early silver dollars can be complete without this premier date. Its status as a first-date-of-issue is another inducement for advanced collectors to compete for this special prize.

The coins are treated as numismatic treasures today, but initially they were greeted with less enthusiasm. An early newspaper account in the *New Hampshire Gazette* noted "... the touches of the graver are too delicate, and there is a want of that boldness of execution which is necessary to durability and currency." The author of this report was referring to a fault characteristic of nearly all 1794 dollars. The strike on the left obverse, and the corresponding area on the reverse of virtually all 1794 dollars is weak, sometimes to the point where the date is unreadable and only faint outlines of the stars can be seen. This defect is the result of inadequate equipment used by the Mint in its initial attempt at large silver coinage. In 1794, there was no screw press large enough to adequately strike coins of this size in such a hard metal. The equipment was adequate for half dollar size coins, and did a fine job on the softer copper large cents, but silver dollars were beyond its capability. To make matters worse, the coiners set up the dies unevenly in the press, so the already weak impression was especially soft on the left side of the coins. An estimated 2,000 specimens of the 1794 dollar were struck from a single pair of dies on October 15, 1794. Of these, 242 examples were judged to be unfit for release, and were held back to be reused as planchets for 1795 silver dollars. The remaining 1,758 coins were released to David Rittenhouse, the first Director of the Mint, who had supplied the silver bullion for their manufacture. Rittenhouse distributed the coins through gifts to friends and in the normal channels of commerce. Today, experts estimate a surviving population of approximately 130 examples. A larger, more powerful screw press was available in 1795, so later silver dollars do not suffer from this defect.

European collectors preserved many early United States federal issues. The numismatic hobby was well established there long before it became popular in this country. Nowhere is this circumstance more apparent than in the surviving high-grade population of 1794 dollars. There are eight 1794 silver dollars recognized as Mint State coins today. Of that number, no less than six coins made their first appearance in a foreign collection. The story of the two St. Oswald coins is well known, but the Murdoch specimen, the example in the British Museum, the Austrian specimen, and the Major Coles example also owe their early preservation to European collectors.

In contrast, the present coin was preserved for a long period of time in a domestic collection. S. Benton Emery, a New England banker, acquired the coin at some point in the 19th century. Emery was born in 1848 and discovered numismatics early in life. From the internal evidence of his collection, it seems he began ordering proof sets from the Mint in the 1870s. He joined the ANA in 1901, receiving membership number 251. Emery preserved his collection intact until he died in 1914. After his death, Emery's coins passed to his son-in-law, Walter P. Nichols. Nichols became a prominent numismatist himself, serving on the ANA board of governors and being in the forefront of the commemorative market in the 1930s. Nichols died in 1941, after which time the collection was held by the family as an heirloom, but no new pieces were added. The family maintained the collection intact for another 43 years, before consigning it to public auction. The coins were featured in The Emery and Nichols Collection (Bowers and Merena, 11/1984), with the 1794 dollar appearing as lot 911. Thus, the present coin was preserved in one family collection for a period of time that may have exceeded a century.

The present specimen is an attractive example of this classic issue. The obverse strike is much better than average, with only stars 5, 6, 7, and 8 and the first letters in LIBERTY being weakly impressed. The date is clear, and the hair and other design features are strongly delineated. There are relatively few surface marks for the grade. Adjustment marks, so prevalent with this issue, are minimal. A curved planchet flaw extends from the curls on the lower left, through the lowest three stars, and back to the curls. The reverse shows much weakness in the peripheral devices, but the central design elements are strong, with fine detail remaining in the eagle's feathers. A long planchet irregularity stretches from rim to rim below the wreath. Hints of champagne and gold accent the evenly toned surfaces to produce dramatic eye appeal. The astute collector will recognize this example as a rare and significant prize.

# The Historic Frothingham 1794 Dollar, XF45

**3921 1794 XF45 PCGS.** B-1, BB-1, R.4. In his unpublished manuscript about the 1794 dollars, Jack Collins called Alexander Hamilton the "Grandfather of the 1794 Dollar." He could equally be named the Father of the U.S. Mint. At the request of Congress, Hamilton prepared an exhaustive report on "a proper plan for the establishment of a national Mint." His report was delivered to Congress on January 28, 1791, and by all accounts was a brilliant and clear report on the principal issues. Prior to that time, the colonial American money situation was certainly undesirable. Aside from Spanish colonial dollars, available coins were limited to whatever immigrants brought with them. Currency was limited to local issues, some based on shillings and others based on dollars. To make matters worse, prior to the Declaration of Independence every individual colony had there own valuation. Neil Carothers wrote in *Fractional Money* (pp. 19-20): "the shilling was a nominal unit, serving as a local measure of values and basis of monetary calculations. Each colony chose for itself the shilling and pence valuations of the sundry coins and commodities upon which it conferred legal tender. This practice is the outstanding feature in the history of colonial currency. It influenced the currency development of the United States long after the achievement of independence."

At the beginning of his report, Alexander Hamilton discussed the valuation problem: "The immense disorder which actually reigns in so delicate and important a concern, and the still greater disorder which is every moment possible, call loudly for a reform. The dollar originally contemplated in the money transactions of this country, by successive diminutions of its weight and fineness, has sustained a depreciation of five per cent., and yet the new dollar has a currency, in all payments in place of the old, with scarcely any attention to the difference between them. The operation of this in depreciating the value of property, depending upon past contracts; and, (as far as inattention to the alteration in the coin may be supposed to leave prices stationary) of all other property, is apparent. Nor can it require argument to prove, that a nation ought not to suffer the value of the property of its citizens to fluctuate with the fluctuations of a foreign mint, and to change with the changes in the regulations of a foreign sovereign. This, nevertheless, is the condition of one which, having no coins of its own, adopts with implicit confidence those of other countries."

Hamilton continued: "The unequal values allowed in different parts of the Union to coins of the same intrinsic worth; the defective species of them which embarrass the circulation of some of the States; and the dissimilarity in their several moneys of account; are inconveniencies, which, if not to be ascribed to the want of a national coinage, will at least be most effectually remedied by the establishment of one—a measure that will, at the same time, give additional security against impositions by counterfeit as well as by base currencies."

Hamilton's entire plan for the Mint was based on a detailed analysis and answers to six questions, and the Mint Act of April 2, 1792, essentially followed to the letter the answers that Hamilton recommended:

1. What ought to be the nature of the money unit of the United States?
2. What the proportion between gold and silver, if coins of both metals are to be established?
3. What the proportion and composition of alloy in each kind?
4. Whether the expense of coinage shall be defrayed by the Government, or out of the material itself?
5. What shall be the number, denominations, sizes, and devices of the coins?
6. Whether foreign coins shall be permitted to be current or not; if the former, at what rate, and for what period?

The inclusion of any 1794 dollar as the centerpiece of a collection establishes that collection as one of importance in the present numismatic world. The present 2009 FUN auction gives collectors an opportunity to choose from three different examples of this landmark issue. Known as the Frothingham Specimen, this 1794 dollar has a rather unusual early history, being stored in an attic for many years, as noted in our provenance, below. It is an amazing coin with a bold strike. The date and first few stars are all sharply defined. The surfaces are smooth and retain considerable original mint flash from the time it was made. The obverse has delightful warm gold toning with some faint blue and iridescent overtones. Weakness at the left obverse rim, and at ED STATES, results from peripheral obverse adjustment marks, some remaining and others carefully smoothed in past years. Martin Logies writes in The Flowing Hair Silver Dollars of 1794: "A careful examination of auction photos reveals that Liberty's hair details have been expertly re-tooled, and the planchet adjustment marks at the left obverse rim have been partially smoothed out."

*Ex: Unidentified Troy, New York, collection formed between the 1840s and 1894; to the collectors heirs, who stored the collection for several decades in their attic; Charles French who purchased the collection intact in the late 1930s; Dr. Frothingham (French's 106th Sale, 11/1973), lot 737; purchased jointly by Julian Leidman, Mike Brownlee, and Ed Milas, Jr.; 1974 CSNS Sale (RARCOA, 5/1974), lot 257; The Coin Den; Bowers and Ruddy (6/1975), lot 963; purchased jointly by Julian Leidman, Robert Hughes, and Douglas Weaver; Robert J. Coulter; Jay Cammack; later, Superior (5/1987), lot 1932; John Koppell; Bowers and Merena (3/1989), lot 1932; American Rare Coin Fund; offered jointly with Bowers and Merena in A Cabinet of Rarities (Rare Coin Review, #78, 1990); Superior (10/1990), lot 3710; to a private collector; later to our consignor.* (#6851)

LIBERTY
1794

UNITED STATES OF AMERICA

# The George Earle – T. James Clarke 1794 Silver Dollar, AU Details

**3922 1794 B-1, BB-1, R.4—Environmental Damage—NCS. AU Details.** Alexander Hamilton sought answers to six questions in his report *On the Establishment of a Mint* that he communicated to Congress on January 28, 1791. The report was the basis for the Mint Act of April 2, 1792, that created the establishment.

1. What ought to be the nature of the money unit of the United States.

Hamilton clearly recommended the dollar as the appropriate money unit in the U.S., as opposed to the system of pounds, shillings, and pence that was prevalent in Great Britain, and in all of the individual colonies. Hamilton wrote: "The manner of adjusting foreign exchanges, would seem to indicate the dollar as best entitled to that character." Carothers remarked: "The silver unit of the United States would thus be a new coin, unlike any Spanish dollar ever minted, but very closely approximating in weight the actual coins in circulation."

2. What [should be] the proportion between gold and silver, if coins of both metals are to be established?

Hamilton felt that a system based on gold would be the most stable, but he clearly recommended a bimetallic system based on both gold and silver, with a value ratio of 15 to 1. He wrote: "The next inquiry towards a right determination of what ought to be the future money unit of the United States, turns upon these questions: Whether it ought to be peculiarly attached to either of the metals, in preference to the other, or not; and, if to either, to which of them?" While he preferred the gold standard, he recommended the double or bimetallic standard as a single standard was "liable to all the objections which rise from the comparison of the benefits of a full, with the evils of a scanty circulation."

3. What [should be] the proportion and composition of alloy in each kind?

Hamilton conducted assays of Spanish coins, and determined that the most appropriate proportion would be one part of alloy to 11 parts of gold or silver; in gold, this is the same as 22 Karat gold. The proportion was fixed by a Congressional resolution of August 8, 1786. The recommended alloy for silver coins was copper, and for gold coins a mixture of copper and silver. This is one area where the Mint Act deviated from Hamilton's plan. Carothers notes that "Hamilton had recommended an alloy proportion of 1/12 in all the gold and silver coins, and the law provided for this alloy in the gold coins. But the silver coins were given a gross weight of 416 grains per dollar, making the proportions 179 parts copper to 1485 parts silver. The silver coins were to have the clumsy fineness of 1485/1664."

4. Whether the expense of coinage shall be defrayed by the Government, or out of the material itself?

This is one of the most important questions addressed in Hamilton's report, as it would have a direct influence on the success of the entire Mint project, and Hamilton addressed the matter at quite some length. He essentially stated that he was against the idea of charging for coinage expense, but if it was necessary to do so, the charge should be nominal, at 1/2 of 1 percent; the charge should only be levied upon those who demanded coins at the time of their deposit. Others, who were willing to wait until their deposit was entirely processed would incur no fee.

5. What shall be the number, denominations, sizes, and devices of the coins?

Hamilton felt it would be best to start with a smaller number of denominations, stating that it would be easier to add additional values at a later date as necessary. He recommended gold ten dollar and one dollar pieces, silver dollars, dimes, cents, and half cents.

6. Whether foreign coins shall be permitted to be current or not; if the former, at what rate, and for what period?

Hamilton remarked: "The abolition of this, in proper season, is a necessary part of the system contemplated for the national coinage. But his it will be expedient to defer, till some considerable progress has been made in preparing substitutes for them. A gradation may, therefore, be found most convenient." Hamilton's proposal recommended that foreign coins could circulate freely for one year. Gold coins of Portugal, England, and France, along with silver coins of Spain, could circulate for a second year. Finally, after two years, foreign coins would no longer be permissible.

After his proposal was considered, Congress established the Mint Act of April 2, 1792, authorizing the Mint in Philadelphia. That opened the door to a national coinage, commencing with copper coins in 1793, and half dollars and silver dollars in 1794. Among the first silver dollars was the present piece. The existing details on are quite sharp with only slight evidence of wear on the high points. The surfaces are deep gray-brown and steel-blue, with noticeable corrosion and surface roughness on both sides. Despite the overall quality, this is a wonderful 1794 silver dollar that most collectors would be proud to own.

The following detailed surface analysis is provided for comparative purposes, as the plate in the New Netherlands catalog shows some differences. The 1 and the first two stars on the left are weak; faint adjustment marks extend in from the border at 17, and the first three stars; a tiny nick is located below a hair strand just right of star 4; and a similar tiny nick is positioned below the outer point of star 7. The reverse has minor rim disturbances over TAT, a couple small scrapes over the right terminal leaves; and a tiny pit mark left of the O in OF. The planchet defect through the R of LIBERTY in the New Netherlands plate has been repaired, as has the rim bruise over TE in STATES. A few other tiny rim disturbances are present today, but were not visible in the older plate. Minor adjustment marks from the 1 over to star 3 exactly match the New Netherlands plate, and tiny marks on the dentils at star 2 and over the right upright of N in UNITED also match exactly.

*Ex: A. Bridgman (S.H. and H. Chapman, 11/1891), lot 689; George H. Earle (Henry Chapman, 6/1912), lot 2668; later, Ira Reed; T. James Clarke (New Netherlands, 11/1956), lot 608; the present consignor.*

*From The Findley Collection.* (#39972)

***See: Video Lot Description***

## Lovely Toned 1795 Dollar, B-5, BB-27, AU53

**3923 1795 Flowing Hair, Three Leaves AU53 PCGS. CAC.** B-5, BB-27, R.1. This earlier intermediate die state was coined before the obverse die crack formed from the top of the 7. The reverse has a prominent flowline from the left stem to the border, described as a crack in the Bowers-Borckardt reference. The plentiful three leaves variety, identified by the diagonal bar in the upper left obverse field. While both surfaces are lightly abraded, the overall eye appeal is spectacular, with gray gold field, lighter gray devices, and outstanding peripheral blue and iridescent toning.
*From The James Mossman Collection.* (#6852)

## Attractive AU53 1795 Flowing Hair Dollar Three Leaves, B-7, BB-18

**3924 1795 Flowing Hair, Three Leaves AU53 NGC.** B-7, BB-18, R.3. Die State I, with both flaws present at the left ribbon end. This scarce Three Leaves variety enjoys considerable popularity with both die pair collectors and early type enthusiasts, the latter as a slightly more challenging alternative to the B-5 or BB-27. This well struck example shows light wear, mostly concentrated at the central high points, but the luster of the pink- and violet-toned fields is largely intact. Wispy abrasions close to the deeply patinated margins contribute to the grade but have little impact on the eye appeal. (#6852)

## Popular 1795 B-5, BB-27 Dollar, AU58

**3925 1795 Flowing Hair, Three Leaves AU58 PCGS.** B-5, BB-27, R.1. An early die state, although an exact determination of the die state may require rewriting the standard die states reported in the literature. At least one, and possible two, of the "die cracks" described in the Bowers *Silver Dollar Encyclopedia,* are actually flowlines from extensive die wear. The B-5, BB-27 die marriage is far more common than any other 1795 variety, so the dies used in production of these pieces suffered extensive die clashing, cracking, lapping, and erosion. In fact the 1795 B-5, BB-27 die combination accounts for nearly half of all 1795 Flowing Hair dollar varieties known today.

This piece is a splendid near-Mint representative with nearly full satin luster behind the deep lilac, blue, and iridescent toning on both sides. The diagnostic raised bar in the left obverse field, near the top hair lock, is full and sharp. All other details are similarly bold, except for the center of the reverse, with flat breast feathers as so often seen. A few light adjustment marks are visible at various points along the obverse rim. There is no evidence of die lapping, so this piece was probably struck rather early in the life of the die pairing.

Specific die details include die lines from the outer point of each star from star 9 to 13, extending to the border. The reverse has a die line from the left stem end to the border, and a faint die crack joining the tops of IC. (#6852)

A 15% BUYER'S PREMIUM ($9 MIN.) APPLIES TO ALL LOTS.

# Magnificent 1795 Silver Dollar, B-7, BB-18
# Three Leaves Variety, MS64
# The Eliasberg Specimen

**3926 1795 Flowing Hair, Three Leaves MS64 PCGS.** B-7, BB-18, R.4. The Flowing Hair silver dollars of 1795 are sometimes overshadowed by their famous cousins of 1794, but this specimen will stand out in any collection of early silver dollars. The coin possesses uncommon virtues in many areas. Its superlative condition makes the coin a prize for any connoisseur of early silver dollars. The advanced type collector cannot overlook this piece if he desires a truly superb example of the Flowing Hair type. The collector of Red Book varieties will be especially pleased to find such a high-end specimen of the coveted Three Leaves variety. Finally, no student of numismatic history can fail to be impressed by the coin's illustrious pedigree.

Production of silver dollars was suspended from October 1794 until May 1795 because the Mint did not have a screw press capable of striking silver dollars. The difficulties encountered in striking this denomination in 1794 convinced Mint Director David Rittenhouse that a larger press was necessary, and the Mint concentrated on the half dollar denomination, which could be coined without defect on the existing machinery. A larger, more powerful press was designed and built for silver dollar production. The press was ready for operation on May 6, 1795, and the first delivery of 1795 dated silver dollars took place the same day. The delivery of 3,810 pieces was more than twice the number of silver dollars produced in the previous year, indicating the Mint had found solutions for the production problems that had plagued the denomination the year before. Silver dollar coinage continued, with only short interruptions, until October 27, 1795. The deliveries totaled 203,033 pieces, but this includes many examples of the Draped Bust design, which was adopted in the middle of the year. Q. David Bowers believes that dies dated 1795 were used in later years to create more 1795 dated dollars. Bowers estimates that approximately 390,000 pieces of this date were eventually minted, with about 280,000 examples being Flowing Hair dollars.

The large estimated mintage of 1795 Flowing Hair dollars was divided into 17 different varieties, using nine different obverse dies and 10 different reverse dies. Two of the reverse dies display branches of three leaves on the inside of the wreath, underneath the eagle's wings. Of the 17 different die marriages of 1795 Flowing Hair dollars, only five combinations include a three leaf reverse. This important three leaf reverse has been listed as a Red Book variety since the first edition.

The present coin is an example of the B-7, BB-18 variety, distinguished by the three leaf reverse and the high placement of the letter E in LIBERTY on the obverse. The variety is one of the more available issues, but is extremely rare in high grades. Notable specimens of BB-18 include the famous Lord St. Oswald coin; the present specimen, which was a highlight of the fabled Eliasberg Collection; a coin in the October Sale (Superior, 10/1990), lot 3714; and an uncirculated example in Bolender's collection in 1952. When Bowers compiled his Condition Census in 1993, this coin occupied the number two position, behind the Lord St. Oswald coin. A number of coins have been certified at the Gem level since that time, but it is doubtful if any of them truly exceeds the present coin in terms of technical quality and eye appeal.

The coin offered here is one of the most desirable specimens ever to appear at auction. The coin features an extraordinary strike, with all details of the design sharply delineated. Minute details in the hair strands can be studied, two small artifacts near the end of the left ribbon are plainly visible, and details on the eagle's head stand out boldly. Mint luster is impressive and unbroken, complemented by the bold, frosty devices. A few adjustment marks can be seen on the reverse, and act as reliable pedigree markers. Hints of lilac and gold highlight the well preserved surfaces to create spectacular eye appeal. This coin is virtually unimprovable. Advanced collectors should appreciate this coin on many levels, and we expect intense competition when this lot is called.

*Ex: Peter Mougey Collection (Thomas Elder, 9/1910); John H. Clapp; Clapp Estate; Louis Eliasberg; Eliasberg Collection (Bowers and Merena, 4/1997), lot 2169.*

*From The Estate of Jack Lee Collection.* (#6852)

## Third Finest 1795 B-8, BB-15 Dollar, Fine Details

**3927 1795 Flowing Hair, Two Leaves—Repaired—NCS. Fine Details.** B-8, BB-15, R.7. E closer to hair than border; Die scratch from denticle left of A2. Reiver die state a. Bowers-Borckardt die state II. This is the Reiver plate coin for the variety, both obverse and reverse. On the obverse, this coin has been repaired by buffing down an "X" or an "A" which was on Liberty's face and neck, and also to a much lighter degree in the lower right obverse field. A minor rim bruise identifies this piece as the Jules Reiver specimen, although it has been retoned since that sale. This classic rarity remains a solid R.7, despite being known since its publication in the *Haseltine Type Table* more than a century ago.

There are only about five or six known examples of this extremely rare variety. Most of the known pieces are damaged in some way or another. Finest known is the Bolender-Ostheimer-Matthews coin. The Blevins coin is next, and like the present piece, it has also had something buffed out of the obverse. Third finest is the present piece. Fourth is the Spies coin that has considerable detail but heavy punch marks. One or two others are known, at least one with a hole. To the best of our knowledge, the top two examples are both in private collections that will probably not appear on the market anytime soon, making this example the finest available to every other early dollar collector. (#6853)

## Blundered Date 1795 Dollar, XF40 Two Leaves, B-1, BB-21

**3928 1795 Flowing Hair, Two Leaves, XF40 PCGS.** B-1, BB-21, R.2. Instantly recognizable by the remnants of an errant 1 under the 7 in the date, and sometimes referred to as the "1795 over 1195 variety." BB-21 combines a Head of '95 obverse die with a Two Leaves reverse die. Dave Bowers, in his *Silver Dollars of the United States,* writes that the BB-21 obverse die "had the head of Miss Liberty deeply impressed into the die, causing it to be in slightly higher relief than most other varieties of the year; because of this, the hair details wore away quickly as the coins circulated." On the current offering, ample detail remains, as does traces of luster within the protected recesses of the obverse and reverse devices. There are no flaws or distractions warranting individual mention on this pleasing, light gunmetal-gray representative. (#6853)

A 15% BUYER'S PREMIUM ($9 MIN.) APPLIES TO ALL LOTS.

## Choice XF B-2, BB-20 1795 Dollar

**3929 1795 Flowing Hair, Two Leaves, B-2, BB-20, R.3 XF45 NGC.** B-2, BB-20. Easily distinguished by a die scratch by star 4 on the obverse, and the positioning of one of the berries below the right corner of the I in UNITED on the reverse. A somewhat scarcer variety with only 200-400 pieces believed known in all grades, but most grade no finer than Fine. This much above average BB-20 is struck from dies rotated about 30 degrees clockwise and displays attractive orange-gold accents. Close examination to the right of the eagle's neck reveals a small round area that is quite similar to other examples from this year with known silver plugs. However, this is merely a circular die void. (#6853)

## Moderately Toned 1795 Flowing Hair Dollar Two Leaves, AU53, B-1, BB-21

**3930 1795 Flowing Hair, Two Leaves AU53 NGC. CAC.** B-1, BB-21, R.2. There are five prominent obverse hair curls, with a small curl below the third main curl. Star 1 just touches the lowest curl. On the reverse there are two leaves under each wing, with a leaf ending midway through the first S in STATES, and 19 berries are arranged nine left and 10 right.

Medium intensity gray patination dominates both sides of this AU53 specimen, and is imbued with traces of bluish-purple. The design features exhibit strong definition, especially Liberty's hair curls and the eagle's wing and tail plumage. There are no abrasions of consequence. Light adjustment marks are visible in Liberty's middle hair and in the lower left obverse quadrant. (#6853)

***See: Video Lot Description***

## Important Silver Plug
## 1795 Flowing Hair Dollar
## Three Leaves, B-7, BB-18, AU50

**3931 1795 Flowing Hair, Silver Plug AU50 PCGS.** B-7, BB-18, R.3. overall, but a much greater rarity with the silver plug. The first appearance of a Silver Plug 1795 dollar (that we know of) was in the 1964 ANA Sale. The coin was identified as having a silver plug, but it did not bring any more when sold. And that is how it remained for the next thirty years: an oddity but not worth a premium. Then, about 1993, a spate of articles began to appear in numismatic journals asking (and answering) just what the nature of these coins were. Prices rapidly escalated and the Silver Plug 1795s that formerly languished in dealer's boxes quickly disappeared from the marketplace.

What makes the present piece so distinctive is the presence, not only of the silver plug, but also of die adjustment marks. Apparently the scenario went: the coin was struck and found to be lightweight, rather than melt the coin a silver plug was inserted to bring it up to weight, on this coin (and several other Silver Plugs) too much silver was added and the struck coin was adjusted with a file to bring it to the exact weight. The reason the weight was so important on these coins is that the silver dollar was the flagship silver coin of the United States in the 1790s. When it was taken abroad, it represented the young republic in situations where no single person could represent the country. Therefore, it was vitally important that the coins weigh exactly 26.96 grams.

The striking details are strong around the margins with the only area of weakness being Liberty's hair just over the ear. Iridescent gray-rose and lilac toning is seen over each side in equal portions, and there are no obvious or mentionable surface blemishes other than the above-mentioned diagonal adjustment marks. A rare opportunity to acquire this example of the conscientiousness of the early Mint officials. For all Silver Plug pieces, Population: 3 in 50, 5 finer (11/08).

## Attractive, Toned AU50 1795 Draped Bust Dollar Centered Bust, B-15, BB-52

**3932** **1795 Draped Bust, Centered AU50 NGC.** B-15, BB-52, R.2. Bowers-Borckardt Die State IV, noted for its "jagged, vertically oriented lump" within Liberty's hair near the ribbon. B-14 and B-15 are the only two 1795 Draped Bust die varieties, and are historically significant as the first dies of the design type, which dominated the silver and copper denominations until John Reich's 1807 arrival. B-14 and B-15 receive separate entries in the *Guide Book* because the obverse device punch for the B-14 was entered too far to the left. The bust device was correctly centered for B-15, the scarcer of the two marriages.

This partly lustrous example has medium golden-brown and aqua toning. The eagle retains some breast feathers, and the stars have distinctive centers. The obverse has a couple of insignificant adjustment marks, as made, and moderate marks are noted on the back of the neck and above the D in UNITED. (#6858)

## Pleasing B-14, BB-51 Dollar, AU58

**3933** **1795 Draped Bust, Off Center AU58 PCGS.** B-14, BB-51, R.2. Two varieties of Draped Bust dollars dated 1795 are known, and high grade examples of both are available to collectors today. This is particularly true for the BB-51 variant. Dave Bowers, in his *Silver Dollars of the United States,* speculates: "Unquestionably, the average specimen of 1795 BB-51 circulated to a lesser extent than did most of its contemporaries. The reason for this is not known. Quite possibly, many were saved as souvenirs of Gilbert Stuart's Draped Bust design, a novelty at the time, a motif that would not appear elsewhere on coinage until the following year."

The near-Mint State piece offered here is likely one such survivor. Slight evidence of circulation is observed on highest points of the design, although the immediate fabric of this early dollar is reminiscent of an Uncirculated coin. Rose-imbued gray coloration is interrupted only by a dapple of sea-green iridescence clinging to the peripheries of both sides. A gorgeous example that would be a proud addition to any cabinet. (#96858)

## Excellent MS61 1795 Draped Bust Off-Center Dollar B-14, BB-51

**3934 1795 Draped Bust, Off-Center MS61 NGC.** B-14, BB-51, R.2. The B-14, BB-51 die pairing can be readily attributed by the Draped Bust obverse with the highest hair curl under the (LI)B, with the lowest curl distant from the 1 in the date and star 1 touching the lowest curl of hair. On the reverse a berry on the branch is midway under the A in STATES, a handy way to diagnose this die.

The BB-51 variety is likely the third most common of all the 1795 early dollar die pairings, with the first the 1795 Flowing Hair, Three Leaves B-5, BB-27 marriage, and the second the B-1, BB-21 Flowing Hair, Two Leaves variant.

Q. David Bowers in the *Silver Dollar Encyclopedia* comments concerning this variety:

> "I believe the BB-51 to be the earlier of the two Draped Bust varieties dated 1795, as evidenced by the following: 1. The Draped Bust motif on the obverse was placed slightly to the left of where it should have been; this was corrected for the next variety, BB-52, and on all later dates of the type. 2. BB-51 exists in high grades in significantly larger numbers than does BB-52, and most of these are prooflike—indicating that some may have been made as presentation specimens of the new Draped Bust obverse, Small Eagle reverse design. Indicative of the availability of the issue, at the 1993 Florida United Numismatists Convention, dealer Ed Milas had three high-level Mint State coins on display."

The present piece offers a wonderful mélange of pinkish-gold and ice-blue coloration on both sides. The reverse shows an area of pink-gold with an arc of darker gray patina and an extensive network of crisscrossing adjustment marks which, while not technically affecting the grade, come into consideration as an aesthetic consideration. # Spectacular 1795 Off Center Draped Bust Dollar From the Cardinal Collection B-14, BB-51, MS64

**3935 1795 Draped Bust, Off Center MS64 PCGS.** B-14, BB-51, R.2. The Draped Bust silver dollars of 1795 represent an attempt to improve the artistic quality of U.S. silver coinage. This goal was expressed by Mint Director Henry William DeSaussure upon taking office in June 1795. To accomplish this goal, respected portrait artist Gilbert Stuart was commissioned to prepare a new design for the nation's coinage. Stuart is remembered today for his portrayal of George Washington, used on the dollar bill. A suitable model for Liberty was found in Mrs. William Bingham, nee' Anne Willing, a prominent Philadelphia socialite. Stuart produced an attractive portrait of Liberty as a young woman, with her long tresses tied back by a ribbon, or fillet. Early auction catalogers referred to the design as the Fillet Bust. The eagle on the reverse was also modified slightly, becoming smaller and more delicate, and standing on billowing clouds instead of a rock.

After Stuart finished the drawings for the designs, the Mint secured the services of John Eckstein to translate the sketches into plaster models. Not much is known of Eckstein. He was an artist, and he resided in Providence, Rhode Island. Walter Breen regarded Eckstein as a hack, but his handling of this assignment shows skill and diligence. Records show Eckstein was paid $30 for "two models for dollars" on September 9, 1795. The models were probably for the Liberty bust and Small Eagle device punches.

Eckstein's models were used to engrave the punches for the Draped Bust obverse and the Small Eagle reverse dies. It is uncertain if Eckstein did the actual engraving himself, or if Mint Engraver Robert Scott took over the design process at this point. Whoever was responsible, the end result was a masterpiece for the early Mint. The Draped Bust design was artistically far superior to anything appearing on U.S. coinage earlier. This basic design was eventually used on all silver denominations in the federal coinage series, and slightly modified, on the copper large cent and half cent coinage. The Draped Bust obverse continued to be used on dollar coinage until the denomination ceased production in 1804.

Numismatists recognize two varieties of 1795 Draped Bust silver dollars today. The present coin is an example of the B-14, BB-51 classification, characterized by the off-center placement of Liberty's bust on the obverse. The bust is placed too far to the left, so that star 1 actually touches the curl. The other variety of 1795, (B-15, BB-52) shows the bust in a more central position on the obverse. Experts believe B-14, BB-51 was the first variety to be produced because the dies for all future years follow the central placement principle established by B-15, BB-52. The former variety is believed to be the more available of the two. It is interesting to note the B-14, BB-51 obverse die was never used again, in spite of the fact that no example seen of this coin shows serious die deterioration. The reverse die has a remarkable history, being used in combination with several different obverses to strike coins in every year until 1798.

The present coin is one of the most spectacular examples of this design available to collectors today. The surfaces are deep gray, with hints of violet, gold, and blue. Mint luster is unbroken, and readily shows the coveted cartwheel effect. All devices are fully brought up, with exquisite detail showing in all areas. Individual hair strands are strongly delineated, and one could actually count the feathers on the eagle's breast. Some minor adjustment marks are visible on the lower reverse border, and across the eagle's breast. The obverse surfaces are pristine, and the reverse shows only the most trivial handling marks. Overall, eye appeal is fantastic. This specimen ranks as one of the finest surviving examples of this scarce and sought-after date. Population: 1 in 64, 2 finer (11/08).

In addition to the coin's inherent beauty, the present coin has an exciting pedigree. The coin was part of the Cardinal Collection (American Numismatic Rarities, 6/2005), lot 15. The Cardinal Collection was the first collection to feature a Mint State example of each date and major type early dollar. This fantastic coin is now poised to become a focal point in another landmark collection of early dollars.
*From The Estate of Jack Lee Collection.* (#96858)

## Desirable 1796 Dollar, AU50
## Small Date, Large Letters, B-4, BB-61

**3936 1796 Small Date, Large Letters AU50 NGC.** B-4, BB-61, R.3. The usual Die State I, with curl at Liberty's forehead slightly weakened but still complete. Essentially the only collectible Small Date, Large Letters variety for the year, since the B-6, BB-64 die pair rates as an R.8. The present example, lightly circulated yet fundamentally pleasing, shows strong underlying luster beneath rich rose-gold, blue, and violet patina. The strike is strong, and the coin's modest wear is largely concentrated at Liberty's cheek, her drapery, and the upper wings and central body of the eagle; these areas show light tan toning. (#6860)

## Pleasing 1796 Silver Dollar
## B-5, BB-65, AU50

**3937 1796 Large Date, Small Letters AU50 PCGS.** B-5, BB-65, R.4. The silver dollars of 1796 are known in six different varieties. The present coin is a representative of the B-5, BB-65 variety, characterized by the large date on the obverse and the small lettering on the reverse. The 6 in the date has been double punched, and the reverse die has a noticeable lump above I in AMERICA. The R in LIBERTY has a broken right foot. Since the other varieties of 1796 dated dollars show this letter in its complete state, or only partly broken, the B-5, BB-65 obverse die must have been the last die produced for this date. Both obverse and reverse dies were only used on this variety. While the variety is available in lower grades, Q. David Bowers notes "BB-65 becomes a rarity in AU or finer."

The present coin is an attractive example of this early dollar. Wear shows only on the high points of Liberty's tresses and the eagle's leg. Much original luster remains on the devices, with original silver flash blending with mottled gray and lilac toning. The issue's rarity in higher grades makes improving on the present offering a difficult task. Population: 6 in 50, 15 finer (11/08). (#6861)

## Lustrous 1797 B-1, BB-73 Dollar, AU55 9x7 Stars, Large Letters

**3938 1797 9x7 Stars, Large Letters AU55 PCGS.** B-1, BB-73, R.3. Bowers-Borckardt Die State II. The near-perfect die state of this piece is perhaps the most available for the variety. It is certainly encountered more often than later states, such as the Gilhousen Die State VI specimen, which coincidentally appears in this sale.

Of the three 1797 dollar varieties, BB-73 appears to be the most common. Bowers and Borckardt (1993) ranked BB-71—the 10X6 Star variant— second to BB-73, but only by a thin margin. If the PCGS *Population Report* is any indication—and we feel that it is—then it appears that BB-73 is about twice as available as BD-71. However, in grades above AU50 the two varieties seem to be comparable in terms of scarcity, and BD-71 is actually more plentiful in Mint State condition, if one considers five coins "plentiful." All three die marriages are condition scarcities, and relatively few appear to have been saved before entering circulation.

This pale dove-gray representative boasts a bold strike and substantial luster throughout. We make note of only one minor, barely mentionable distraction: two diagonal abrasions connect Liberty's lower bust to the 5 o'clock rim. Otherwise, this piece is quite pleasing and sure to receive much attention when it crosses the auction block. As of (11/08), the online PCGS *Population Report* documents 12 pieces at the AU55 level, with only 6 finer examples, the best of which is a solitary MS61 coin. (#6863)

## Appealing 1797 9x7 Stars, Large Letters Dollar AU55, B-1, BB-73

**3939 1797 9x7 Stars, Large Letters AU55 PCGS.** Ex: Hesselgesser Collection. B-1, BB-73, R.3. The highest wave of hair, under the upright of E in LIBERTY, and the die lump in the field below stat 9, are both faint. On the reverse, a leaf ends under the center of the upright of (STAT)E(S).

A good amount of luster remains on this lovely Choice AU example, and hues of delicate orange-gold, grayish-blue, and lavender patina cover each side. Aside from slight high-point wear, the motifs display sharp detail, including Liberty's hair strands and drapery, and the eagle's plumage. A few minor circulation marks do not detract from the pleasing eye appeal. Population: 8 in 55, 5 finer (12/08). (#6863)

## Fascinating 1797 Draped Bust Silver Dollar Terminal Die State B-1, BB-73, AU58

**3940** **1797 9x7 Stars, Large Letters AU58 NGC.** B-1, BB-73, R.3. Die State VI. This is the latest die state we have seen of this variety, even later than lot 23492 in Reiver, described as the terminal die state for this variety. Indeed, Q. David Bowers specifically mentioned the Gilhousen coin as an example of this die state. In the catalog for that collection, Superior described this piece as "the most advanced die state known, shattered and bulged." Not only is this example remarkable for its die state, but it is also a gorgeous near-Mint example with traces of rub only on the highpoints. The surfaces retain nearly full luster with light golden toning. A small nick at the base of B positively identifies the pedigree.

In addition to heavy clash marks in the obverse fields, especially to the right of Liberty, the obverse has a prominent bulge obliterating stars 7 and 8. There are no less than 12 distinct die cracks around the obverse. It is difficult to enumerate these die cracks, but we will try. 1) From the border through the left top of T to Liberty's hair, crossing the hair ribbon to stars 5 and 4, reaching the rim over star 3. 2) From the border to star 12, reaching Liberty's chin and neck. 3) From the base of 97 to the drapery, eventually reaching stars 15 and 14. 4) From the border at 5 o'clock across the drapery and hair, terminating at crack 1 just right of the ribbon. 5) From the border through 9 to Liberty's shoulder and lower hair curls, eventually arcing back to star 2 and the border. 6) From the border just left of the digit 1, disappearing in the lowest hair curl. 7) A faint crack begins in the lowest curl just left of crack 6, continuing up to the hair ribbon and crack 1. 8) From crack 5 in the left field, past the inner points of stars 3 and 4 to crack 1. 9) Faintly between stars 5 and 6, curving up along the inside edge of the die bulge. 10) From the border through star 7 to the hair ribbon and crack 1. 11) From the lower point of star 9, down to the hair ribbon and crack 10. 12) From the upper right point of star 9 to the upright of L and the upper right serif of the same letter.

The reverse die is also shattered, although not as extensively as the obverse. A heavy die crack bisects the second T of STATES, directly through the upright to the left branch of the wreath, creating two planes for this letter. Another crack crosses this crack, through TES to the right branch of the wreath. A crack from the right base of A in STATES to the left wreath branch continues through the left wing, eventually reaching the N. Cracks extend from the top of D to ST and through the center of these letters. There are no apparent clash marks, and UN are both weak due to the obverse bulge.

*Ex: Farish Baldenhofer; A.J. Ostheimer; Clarke Gilhousen (Superior, 10/1973), lot 1225; The Royal Oak Collection (Heritage, 8/2006), lot 5289.* (#6863)

***See: Video Lot Description***

## Luminous Near-Mint 1798 Dollar
## Large Eagle, Pointed 9, B-14, BB-122

**3941** **1798 Large Eagle, Pointed 9 AU58 NGC.** B-14, BB-122, R.3. Several reverse diagnostics, including a short lowest arrow that only extends to the center of the left foot of the N in UNITED, help identify this scarce variety. The present example is near-Mint, kept from a finer designation by only a trace of friction that crosses the silver-gray high points. The fields, which retain virtually all of their original luster, shine beneath subtle cyan and champagne patina. The strike is crisp, and the surfaces are surprisingly mark-free, with only a handful of wispy flaws on each side. NGC has certified 43 finer examples (11/08). (#6873)

## Pleasing 1799 7x6 Stars Dollar, MS62

**3942** **1799 7x6 Stars MS62 PCGS.** B-16, BB-158, R.2. Obverse: the 1 and 7 of the date are close together, and star 6 has a raised die defect or trace of an extra ray to the left of the topmost ray (ray pointing upward). Reverse: U in UNITED defective at upper left part, which is cut off, the point of a star touches point of lower part of eagle's beak, and the first A in AMERICA rests on the 4th feather.

Luminous surfaces are covered in light to medium intensity electric-blue, lavender, and yellow-gold patina. An attentive strike leaves strong definition on the design elements; only the eagle's breast and neck feathers exhibit the usual softness. A few trivial, light marks are noted on each side. A pleasing early dollar.
*From The James Mossman Collection.* (#6878)

## Important 1799 Silver Dollar
## MS62, 7x6 Stars, B-8, BB-165

**3943** **1799 7x6 Stars MS62 NGC.** B-8, BB-165, R.3. Bowers-Borckardt Die State II with a crack through star 7 and the LIB in LIBERTY. On this obverse die, Liberty has an "open mouth." The 1 in the date is relatively far from the curl. This die was used only to produce this variety, as was the reverse die. It is also interesting to note that the N in UNITED was initially cut upside down and later corrected.

Both sides are toned golden-brown and steel-blue. There is an area of weakness of strike at the central portion of the reverse, typical for this die variety. One of the finest known specimens of Bolender-8, confirmed by the smooth surfaces and the extensive satin luster. (#6878)

A 15% BUYER'S PREMIUM ($9 MIN.) APPLIES TO ALL LOTS.

## Lustrous 1799 B-12, BB-160 Dollar, MS63

**3944** **1799 7x6 Stars MS63 NGC.** B-12a, BB-160, R.3. No berries in the branch, one of two varieties along with B-11 from this reverse die after the berries are lapped away. In earlier die states the reverse was used with B-16 and B-23 with the berries still intact. Bowers-Borckardt Die State III. The obverse die is shattered, although not in the latest die state known. The obverse is cracked from the base of the 1 to the border below the 7, curving up the other direction into the field next to the inner point of star 1. Another short crack extends up from the border to the first 9, with branches left and right to the 7 and second 9. Just right of the date, a crack begins at the border and curves up to the drapery, with a branch extending further right to the drapery. A crack begins at the border near the bust tip and curves up through the right field to star 9. Other minor cracks are evident in the right obverse stars. The reverse, aside from the missing berries, has flowlines from letters to the border, but no evidence of die cracks, clash marks, or other signs of lapping.

The obverse has frosty mint luster beneath intense gold toning that deepens to russet and pale blue at the border. Some light silver-gray color is evident on the high points of the devices. The reverse also has frosty luster with considerable silver-gray, intermingled with gold, sea-green, and lilac toning. A few faint hairlines and minor abrasions are evident, preventing a higher grade.
*From The Deb-Ann Collection.* (#6878)

## Terminal State 1799
## B-16, BB-158 Dollar, MS64
## Possibly Finest Known

**3945 1799 7x6 Stars MS64 NGC.** B-16, BB-158, R.2. Bowers-Borckardt Die State IV. The obverse die is shattered and was nearing the end of its die life. The reverse has heavy clash marks, the reason that die was aggressively lapped, removing the berries before it was restored to the press to coin BB-160 and BB-161. Heavy clash marks are clearly visible from the drapery, and the entire date can be seen behind ES and in the space to the right. Other clash marks are visible in the spaces between vertical shield stripes, and at the branch. In addition to light clash marks, we count at least 15 *different* die cracks on the obverse. It would be pointless to describe them all, when one look at the enlarged illustration with this lot will suffice.

In the Bowers *Silver Dollar Encyclopedia,* only six Mint State examples and one AU58 were listed in the Notable Specimens section. That section was compiled from an extensive review of many hundred auction catalogs, mostly from the late 1960s to the early 1990s, along with inventories from several prominent early dollar collectors at the time. While not intended to be a "Condition Census," it provides an excellent starting place for further research. The present specimen is different from any of those Notable Specimens and may qualify as the finest known example of the variety.

A sensational Choice Mint State dollar, this piece has highly lustrous, frosty surfaces beneath light gold toning with splashes of iridescence. The strike is well centered and mostly sharp, with slight weakness noticed on the reverse. It is a highly desirable early dollar that is fit for the connoisseur. (#6878)

A 15% BUYER'S PREMIUM ($9 MIN.) APPLIES TO ALL LOTS.

## Distinctive 1799/8 B-3, BB-141 Dollar, AU58 Unusual 15 Stars Reverse

**3946** **1799/8 15 Stars Reverse AU58 PCGS.** B-3, BB-141, R.3. Late die state, as Bowers-Borckardt Die State IV. The die engraver mistakenly engraved two extra stars, creating a reverse die with 15 stars above the eagle. To cover his mistake, he greatly enlarged the first and last clouds, covering most of the stars at the upper left and right, although leaving two tiny points visible at the bottom of each cloud. To attribute the reverse, it is unnecessary to actually count the stars. Simply look for the two large clouds for a positive identification.

The reverse die was used for this overdate variety, and also for B-13, BB-151 variety with a normal date. Die state analysis shows that the overdate was struck after the normal date, the opposite of what numismatic tradition suggests.

This frosty near-Mint example has brilliant silver surfaces and sharp design features. Aside from faint diagonal adjustment marks at the center of the obverse, the overall surfaces are exceptional in quality. This is an important and attractive early dollar. Population: 8 in 58, 8 finer (12/08). (#6883)

## Remarkable 1801 Dollar AU55, B-1, BB-211

**3947** **1801 AU55 PCGS.** B-1, BB-211, R.3. Wide date, a small dot to the left of the center dot, an arrowhead under the U of UNITED, the ray of a star pointing to the left side of the U in PLURIBUS, and the first A in AMERICA touching feathers 3 and 4 confirm the variety. A hairline crack to left of 1 in date slants down toward border.

Medium gray patina shows on both sides of this Choice AU specimen, and luster resides in the recessed areas. The design features exhibit uniformly strong detail, and are well centered on the planchet, framed by bold dentilation. The surfaces are remarkably clean for a coin that has undergone some circulation. (#6893)

## Pleasing 1801 Draped Bust Silver Dollar Tied for Finest Certified, MS62

**3948** **1801 MS62 NGC.** B-3, BB-213, R.3. Die State III with minor rust marks and tiny die cracks on the obverse. Four 1801 dollar varieties are known, and each is scarce or rare in Mint State grades. The varieties designated BB-211 and BB-213 were each coined from a reverse die that saw no other service. The other two varieties were coined from reverse dies that were also used in 1802 and 1803, and in both instances the 1801 dollars were coined after those dated 1802. Since the obverse die of this BB-213 variety is found in a later state than for BB-212, it is also certain that this die combination was struck no earlier than 1802. The study of emission sequences, in an effort to establish the events that took place at the first Mint, parallels the work of a detective who seeks to solve a crime. There is little or no documentation, and the primary evidence appears only on actual surviving coins.

This nearly flawless Mint State example has full satin luster beneath delicate ivory, gold, and iridescent toning. The surfaces have a few wispy hairlines and minuscule marks, fewer than normally associated with the grade. Perhaps just a trace of cabinet friction limits the numerical assessment of this lovely piece.

In his *Silver Dollar Encyclopedia,* Dave Bowers records a single Mint State example from the Bareford Collection, followed by two AU58 coins, two AU55 pieces, and two AU50 examples. This example appears different than any of those that Bowers listed in his reference. Currently, the present coin shares the honor of finest certified with one other example at PCGS. (#6893)

A 15% BUYER'S PREMIUM ($9 MIN.) APPLIES TO ALL LOTS.

## Rare Choice AU B-5, BB-242
## 1802 Wide Date Dollar

**3949** **1802 Wide Date AU55 NGC.** B-5, BB-242, R.5. Along with B-9, B-5 is the rarest business strike 1802 dollar. Aside from the uncollectible novodel proof, B-5 is the most valuable variety of the date. This is because it receives its own *Guide Book* listing, as the 'Wide Normal Date.' B-2, B-3, and B-9 also have wide dates, but those three marriages are 1802/1 overdates.

Rich golden-brown, olive-green, dove-gray, and powder-blue toning embraces this well defined and partly lustrous Choice AU dollar. The surfaces are smooth aside from faint marks on the right obverse field. Neither major grading service has certified an Uncirculated example, which clarifies the importance of the present piece. Census: 2 in 55, 0 finer (11/08).

*Ex: Auction '86 (RARCOA, 7/1986), lot 736.*

*From The Deb-Ann Collection.* (#6896)

## Exceptional, Deeply Mirrored PR64 1836 Gobrecht Dollar Judd-60 Original, Die Alignment I

**3950 1836 Name on Base, Judd-60 Original, Pollock-65, R.1, PR64 NGC.** Silver. Plain Edge. Die Alignment I (the center of Liberty's head is opposite DO in DOLLAR). The die scratch plainly shows above the eagle's wing pointing toward the AT of STATES. This die scratch is seen only on so-called First Originals struck in late December 1836 and the Second Originals from March 1837. After an initial production run in early December of approximately 400 coins, another 600 pieces were struck later that month. These pieces were deposited with a local bank and as a result many are found circulated. This piece obviously was seen as something special and set aside at that time.

Recently the status of the 1836-dated dollars have been questioned. Some pieces are more prooflike than proof, but a few examples show fields that are fully the equal of any proof coin struck after 1857. In the opinion of John Dannreuther, these dollars were struck on unburnished planchets which is why most of them are more akin to an early prooflike Morgan dollar than an actual proof. And yet here is a coin that has deeply reflective fields on each side. If the planchet was not burnished, then this must have been an early strike off the relapped dies when Gobrecht dollar production resumed in late December. We have no question about the proof status of this particular coin.

Both obverse and reverse are brilliant in the centers with a light ring of golden-rose toning around the peripheries. We struggle to find any contact marks, even with a magnifier, that would serve as a pedigree identifier in the future. The only mark of any note is a tiny one located on the reverse above the left pellet and to the left of the star above. A stunning example of this beautifully designed coin. Census: 14 in 64, 1 finer (11/08). (#11225)

A 15% BUYER'S PREMIUM ($9 MIN.) APPLIES TO ALL LOTS.

## SEATED DOLLARS

Pleasing 1840 Seated Liberty Silver Dollar, MS63

**3951** **1840 MS63 PCGS.** The 1840 Seated Liberty silver dollar was the first-year-of-issue for this design. For some reason, the public did not save large numbers of the new coins, breaking the usual pattern for new issues. Perhaps the financial hardships of the "Hard Times" era prevented casual collectors from acquiring specimens of this date for keepsakes. This circumstance resulted in a high degree of circulation for this issue. Today, specimens of this date are rare in Mint State.

The present coin features attractive gunmetal-blue toning, with original luster visible on the central devices. The design elements are finely detailed, and a few scattered handling marks are consistent with the grade. Population: 10 in 63, 3 finer (11/08). (#6926)

Magnificent MS64 1841 Seated Dollar

**3952** **1841 MS64 NGC. CAC.** The Seated dollar, like its minor silver counterparts from before the weight adjustment of 1853, was frequently targeted for domestic melting. Unlike those minor silver coins, the Seated dollar also experienced considerable attrition from international commerce, and this continued through 1873. As a result, Seated dollars from almost all years are elusive in any grade, much less MS64 like the present piece. Rich silver-gray, rose, and gold-orange patina drapes satiny fields and generally well-defined surfaces. Carefully preserved with impressive visual appeal. Census: 5 in 64, 1 finer (11/08).
*From The Estate of Jack Lee Collection.* (#6927)

## Prooflike 1851 Original Silver Dollar, MS62

**3953** **1851 MS62 PCGS.** Examples of the 1851 dollar that are described as Originals, meaning they were struck in 1851, are identified by the date position that is high in the field, much closer to the base of Liberty than the border, and slanting down slightly to the right. The tops of 51 are minutely doubled, although the doubling is trivial at best. The reverse is the same die that appeared earlier on 1850 proof dollars. It is now cracked through the base of O in ONE, slanting down to the border below the right serif of the N. Another crack begins at the border near the left (facing) wing tip, extending to the tops of UNI. A further die crack through the tops of TED reaches the border over the first S, with a branch down to the left top of the first T in STATES. Each crack is faint but clearly visible.

Dave Bowers described two "varieties" of 1851 Original silver dollars in his Silver Dollar Encyclopedia, but they are actually die states of the same variety. Earlier strikes are frosty Mint State pieces while later strikes, like this example, are struck from lapped dies and have prooflike surfaces. Sometimes, these prooflike pieces are called proofs. Walter Breen labeled five different examples from this die pair as proofs, although his text seems to indicate a lack of confidence in their proof status. Although clearly not a proof, the present piece is the same quality that has sometimes been described as a proof.

A brilliant prooflike example with full reflectivity in the fields on both sides, with pleasing cameo contrast. The fields have a few scuffs that prevent a higher grade. However, the overall eye appeal is excellent.

*From The Estate of Jack Lee Collection.* (#6939)

## Desirable AU55 Details 1852 Seated Dollar Original

**3954 1852 Original—Cleaned—ANACS. AU55 Details.** With just 1,100 business strike Originals produced, the 1852 has become one of the most prized Philadelphia Seated Liberty dollar issues. The present example is well struck overall, if a trifle soft on the right obverse stars. The surfaces have retoned gold-orange and violet from a past cleaning, though light, telltale hairlines are still visible beneath the patina. Small, scattered marks are the rule, though one abrasion deserves individual mention, this appearing below the eagle's beak. Only hints of light wear are present on the uppermost parts of the design. (#6940)

## Prooflike 1855 Seated Dollar, MS61

**3955 1855 MS61 Prooflike NGC.** Boldly struck and untoned with highly reflective fields that show a few faint, grade-limiting hairlines. Contact marks are minimal, and three or four tiny brown spots are noted on the obverse. This is a scarce low-mintage issue that is rare in Mint State, especially with Prooflike fields. Observation of many high grade Seated dollars from the 1840s and 1850s has shown that a high percentage of most dates show at least semiprooflike fields. However, with fully reflective fields, as seen on this piece, this is *the only Prooflike example so-designated by NGC,* at any grade level, as of (4/08). (#6943)

## Sharply Struck Gem 1860 Dollar

**3956 1860 MS65 NGC.** Seated Liberty dollars of 1860 were apparently intended mainly for use in the export trade to China, where many were melted. In his *Silver Dollars and Trade Dollars of the United States*, David Bowers writes:

> "They never were available from the Mint at face value, and all were paid out at $1.08 each to bullion dealers, banks, and others who fed them into the Orient trade. A small percentage of the mintage (217,600 business strikes) circulated domestically after the resumption of specie payments in autumn 1876."

Bowers also indicates that there was little interest in business strike Seated dollars during this time period. Collectors desiring date sequences of dollars were satisfied with Philadelphia Mint proofs.

The above factors account for the scarcity of 1860 dollars in all grades. NGC and PCGS have certified approximately 250 examples from Very Good through Mint State, many of which are undoubtedly resubmissions.

The current Gem offering displays attractive satiny luster. A precision strike imparts crisp definition to the design elements, including the star centers, Liberty's foot, and the eagle's plumage. Only the hair atop Liberty's head reveals minor softness. Smooth silver-white surfaces are nicely cared for, showing just a few minute grade-consistent marks. We mention a small indentation on Liberty's forehead solely as a pedigree marker. Census: 6 in 65, 1 finer (11/08). (#6949)

## Resplendent 1864 Seated Liberty Dollar, MS65

**3957** **1864 MS65 PCGS. CAC.** In 1864 the Philadelphia Mint coined a mere 30,700 business strikes, and few of those coins survive today, due to hoarding activities during and after the Civil War. Still fearful of the outcome, even into 1864, most people had little faith in paper currency that could become worthless. Instead, they desired to have actual hard money, gold and silver coins. Today, we think of hoarding activities as the source for increased numismatic supply, but along with the hoarding came melting. Who in the South, for example, would want to be caught with a stockpile of Northern coinage. Instead, they melted the coins into bars or lumps of gold and silver. Today, PCGS has only certified 22 examples in all Mint State grades, from MS60 through MS66. The total includes four in MS64, six in MS65 including the present piece, and a lone MS66 piece (11/08). In fact, this coin is one of just 61 No Motto Seated Liberty dollars that PCGS has certified in MS65 or finer grades.

Housed in a green-label PCGS holder, this satiny Gem has fully brilliant silver surfaces with vibrant luster and boldly detailed design elements. A few minuscule surface marks on each side are of no concern to the quality of this splendid specimen. This piece is only the third PCGS MS65 example of the date that we have handled in 15 years since we began archiving our sales in 1993, with none in finer grades.
*From The James Mossman Collection.* (#6954)
***See: Video Lot Description***

## Incredible Gem 1873 Seated Dollar

**3958** **1873 MS65 PCGS. CAC.** The Coinage Act of 1873, better known as the "Crime of '73" in some circles, was one of the most drastic changes ever to take place in America's numismatic history. The two cent piece, three cent silver, half dime, and domestic (Seated) dollar all faded out with the passage of the Act. Yet the Seated dollar was not at risk for most of the Act's history, and when the bill that would become the Act was passed by the House of Representatives, the lone provision relating to the Seated dollar was to increase its weight by less than one percent.

The Senate, however, was less kind to the Seated dollar. As Robert R. Van Ryzin wrote in his *Crime of '73*, "During its stay in the Senate Finance Committee, the House version of the mint bill was amended ... The committee, probably at the Treasury's urging, dropped the subsidiary [Seated] dollar ..." The Senate version replaced the Seated dollar with the heavier Trade dollar. When the House and Senate could not reconcile their versions of the bill, a conference committee made of members of both chambers created the final draft. The Senate provision for the Trade dollar prevailed, and the Seated dollar was done.

The Seated dollars of 1873, such as the present Gem, were the last of their kind. This well-defined example is highly attractive with pale silver-gray centers that yield to intermittent dabs of russet-orange near the rims. A few minor ticks are scattered on the obverse, but none of these flaws warrant individual mention. A noteworthy survivor that should appeal to even the most discerning collector. Population: 5 in 65, 1 finer (11/08).
*From The James Mossman Collection.* (#6971)

## Impressive AU 1873-CC Seated Dollar

**3959** **1873-CC AU50 NGC.** Carson City was the last Mint to begin striking Seated dollars, not "joining the party" until 1870, and a complete set of CC-mint Seated dollars spans just four issues, from 1870 to 1873. Of those four issues, the 1873-CC has the second-lowest mintage, though population data suggest that in higher circulated grades, this issue is even more elusive than the 1871-CC dollar and its famously low mintage of 1,376 pieces.

The present AU50 representative from the last of the Carson City Seated dollar issues is well struck with luminous, even silver-gray luster. Modest wear crosses the high points, and light, shallow marks that are consistent with brief circulation visit each side. In general, a highly attractive coin. Census: 2 in 50, 11 finer (11/08). (#6972)

## Amazing 1840 Seated Dollar, PR64 Triple Struck Reverse

**3960** **1840 PR64 PCGS. CAC.** B-2. The variety with two tiny defects on the right diagonal of the final A. All three lines of the first vertical shield stripe on the reverse extend upward into the horizontal crossbars. Other die details are somewhat obscured by the triple strike.

This boldly detailed Choice proof exhibits fully mirrored fields and lustrous silver devices, and may qualify for a Cameo designation. Both sides have delicate green-gold, violet, blue, and iridescent toning. Minute evidence of doubling on the obverse appears to be strike doubling rather than die repunching. The entire reverse is boldly triple struck, enough so that this piece should constitute a mint error. Some other proofs of this date, as of most or all early proofs, show slight evidence of two press impressions to bring out the detail, but no others that we have examined show this amount of tripled details on the reverse.

We have attempted to determine the provenance of this piece, with no success. The cataloger has a database of 48 auction appearances of 1840 proof Seated Liberty dollars, dating back to the late 1950s. The record is believed quite comprehensive, but this piece is unmatched to any of those auction appearances. It seems to be an entirely new example that is now making its first ever auction appearance. Our extensive record suggests that the often repeated opinion that 10 to 12 proof 1840 silver dollars still exist may be on the low side. *From The Estate of Jack Lee Collection.* (#6981)

A 15% BUYER'S PREMIUM ($9 MIN.) APPLIES TO ALL LOTS.

## The Pittman Proof 1842 Seated Dollar, PR62

**3961** **1842 PR62 PCGS.** The date is centered in the space between the base of Liberty and the border, and slants minutely down to the right. The shield point is over the extreme left serif of the 1, and the left base of the same digit is over the center of a dentil. The reverse is the die of 1840 with two small defects on the right diagonal of the final A.

The 1842 Seated dollar is a rare issue in proof, with perhaps 10 pieces existing. David Akers estimated 10 to 12 pieces in the Pittman catalog, while Dave Bowers estimated seven to 14 in his *Silver Dollar Encyclopedia*. Among the surviving examples are one in the Smithsonian Institution and one in the American Numismatic Society. Other important pieces include the Norweb and Carter specimens.

Both sides of this fully mirrored proof have deeply reflective fields with satiny, reflective devices, all beneath translucent champagne toning. Some hairlines and contact marks are visible, especially in the fields. A line near star 2 matches the Pittman plate and identifies the provenance of this piece. The top edge of the left (facing) wing is weak, but all other design details are quite sharp.

*Ex: Lester Merkin (9/1967), lot 271; Lester Merkin (10/1969), lot 376; John Jay Pittman (David Akers, 5/1998), lot 1673; Morris Silverman (Heritage, 4/2002), lot 4072; Bowers and Merena (5/2004), lot 253; Rod Sweet Collection (Bowers and Merena, 7/2005), lot 1003. From The Estate of Jack Lee Collection.* (#6983)

## The Boyd-Pittman Proof 1846 Seated Dollar, PR64

**3962** **1846 PR64 NGC.** Ex: Pittman/Richmond. This boldly blundered date has the first impression about 50% below the final date position. It is one of the most dramatic doubled dates in numismatics, certainly among early proof coins. In the World's Greatest Collection catalog, Abe Kosoff and Abner Kreisberg cataloged the variety as "1846 over 44." A half century before that, David Proskey called the variety "1846 over 45" in the Parmelee catalog.

Proof silver dollars of 1846 exist in two different varieties. David Akers wrote in the Pittman catalog that the 1846 Seated dollars were the only proofs of the 1840s with more than one variety, apparently overlooking the second variety of proof 1845. About 10 to 15 examples of the blundered date proof are known, and about five or six examples of the normal date are known. The known population includes an example in the Smithsonian Institution, along with numerous auction appearances. Our database includes 50 different auction appearances of proof 1846 dollars.

A wonderful proof, this example is fully and deeply mirrored around satiny devices, all beneath predominant steel-blue toning, with lighter gold and bright silver at the centers. Additional iridescent toning is visible with close scrutiny. Close examination reveals some hairlines on both sides, undoubtedly preventing a higher grade.

## The Pittman 1849 Seated Dollar, PR65

**3963 1849 PR65 NGC.** The obverse has a tiny imperfection within the triangular opening of the 4. Tiny projections or rust pits are attached to the tips of three dentils below and left of the 1. The reverse is the usual proof die that has two tiny defects on the right diagonal of the final A.

The number of surviving 1849 proof Seated dollars is unknown, although various past estimates have placed the quantity in the range of six to 10 examples. David Akers claimed just six proofs survive, while Walter Breen recorded eight in his Proof Encyclopedia. Our roster that follows below provides an accounting of exactly eight different pieces, along with a few older auction appearances that are unmatched to the eight.

This piece is boldly struck with excellent obverse and reverse details, including bold rims and borders, sharp head details, complete feather details, and sharp claws and leaves. The faint violet surfaces are accompanied by traces of gold and blue, with considerable remaining silver brilliance. The fields are fully mirrored around lustrous devices, with considerable cameo contrast.

*From The Estate of Jack Lee Collection.* (#6990)

## Enigmatic 1852 Seated Dollar, PR65 Cameo

**3964** **1852 Original PR65 Cameo NGC.** The date is about centered between the base of Liberty and the border, with a delicate base to the 1, as always for 1852 Seated dollars. The left corner of the base of the 1 is over the center of a dentil. The shield point is over the right edge of the upright of the same digit.

The reverse has a few faint diagonal lines down to the right in the spaces between vertical shield stripes, some unfinished or unpolished areas at the bottom of those spaces, and faint unpolished areas at the branch. The lower two arrowheads appear to touch, but are actually minutely separated. The first claw (farthest left) curls to join the lower berry stem, the next claw barely touches the first, and the third claw is separated from the second. On the right, the inside claw touches the arrow feather, and the other two claws are separated. The shield is well formed, with no vertical stripes encroaching on the horizontal crossbars, or extending beyond the lower shield border. None of the crossbars extend past the shield border on either side.

Distinguishing between an Original and Restrike 1852 Seated dollar is quite a numismatic challenge. In his *Proof Encyclopedia,* Walter Breen presented characteristics of four reverse dies, three for Original examples and one for Restrikes. This specimen seems to have characteristics of the third Original variety and the Restrike!

In his *Silver Dollar Encyclopedia,* Dave Bowers described as many as six different varieties, three for Original strikes and three for Restrikes, admitting that there may be some duplication. Like Breen before him, Bowers noted that all varieties are from the same obverse die. The reverse has one or more diagonal lines slanting down to the right in the shield spaces, as described for Bowers' variety 3. It also has some unfinished or unpolished areas in the shield as seen on his variety 4 (the same as his variety 6). Since Bowers calls his variety 3 an Original and his variety 4 a Restrike, the true status of these pieces seems no clearer today than at any time in the past.

This gorgeous Gem Cameo proof has exceptional aesthetic appeal created through the combination of blue and violet peripheral toning around light gold surfaces. Both sides are deeply mirrored and the devices are boldly defined with frosty luster.

*Ex: Share Collection (Superior, 9/2003), lot 2090; Rod Sweet Collection (Bowers and Merena, 7/2005), lot 1013.*
*From The Estate of Jack Lee Collection.* (#86994)

## Glittering 1854 Seated Dollar, PR65 Cameo

**3965** **1854 PR65 Cameo PCGS.** The Coinage Act of February 1853 served to reduce the weight of smaller denomination silver coins; however, it did not alter the weight of silver dollars. These coins continued to have a silver value greater than their face value, and were highly sought by bullion dealers as well as individual hoarders. The result is a lack of circulation strike survivors from the mintage of 33,140. An additional explanation may be found in Walter Breen's *Complete Encyclopedia*. He noted that 10,000 of these coins were shipped to San Francisco on November 11, 1854 to serve as "small change." It is unfortunate that Breen did not reveal his source for this information. With 10,000 of these circulating in California, where the higher melt value would not have mattered, those coins are essentially gone today. They likely would have stayed in circulation for a long time before being melted. It is certainly possible that many of this mintage were shipped overseas in the oriental trade. Businessmen in the Orient were simply not going to accept obsolete bank notes or any other kind of paper promise. These are some of the influences that turned circulation strike dollars of 1854 into rarities.

The obverse has a triangular defect near the base of Liberty, over the space between the digits 54. This characteristic looks very much like the top of a misplaced 4. Proof examples are extremely rare. The mintage of proof dollars is unknown; however, it was certainly a small quantity. The PCGS Population Report records the mintage as 30 pieces, and they have certified 20. For later years, they have certified roughly one-third the original mintage which would suggest that closer to 60 proofs of this date were struck. Regardless of the number struck or the number surviving today, these coins are rare. And this example is the finest Cameo proof 1854 dollar ever submitted to PCGS. In fact, it is one of just three 1854 Proof dollar given a Cameo designation, the other pieces numerically graded PR62 and PR63. It is also the finest numerical proof dollar of this issue, as the next best certified by PCGS is a Proof-64 coin. Both the obverse and reverse of this Cameo Gem have deeply mirrored fields, significantly lustrous devices, and sharp design features. The obverse has brilliant gold toning and the reverse is fully brilliant. This is an impressive Gem that will please everyone. Population: 1 in 65, 0 finer (11/08).

*Ex: Heritage (11/2004), lot 7614; Bowers and Merena (3/2005), lot 2032; Heritage (11/2005), lot 2241.*

*From The Estate of Jack Lee Collection.* (#86997)

## Seldom-Seen 1857 Seated Dollar, PR65

**3966** **1857 PR65 NGC.** Although proof mintages prior to 1858 are lost to today's collectors, Bowers (*Silver Dollars and Trade Dollars of the United States*, 1993) estimates an original mintage of 50-100 pieces for the proof 1857 Seated dollar, and claims the issue is "more available than the 1855, but scarcer than the 1856." He also warns that many prooflike 1857 business strikes masquerade as proofs. This example shows faint evidence of the diagnostic "beard" below Liberty's chin, assuring the NGC attribution. This is a conditionally rare member of a very scarce issue, the NGC *Census Report* reveals 4 in PR65, with just 4 examples finer (11/08). Neither side reveals a conspicuous handling mark, and the finish shows faint cameo tendencies over the devices and legends. Pinpoint detail is seen on all the design elements, and the surfaces show gray-rose toning in the centers with cobalt-blue around the margins. (#7000)

## Gorgeous 1859 Seated Dollar, PR67

**3967** **1859 PR67 NGC.** Of the 800 proof Seated dollars that the Philadelphia Mint prepared in 1859, no more than 450 pieces found their way into collectors' hands. As the anticipated public demand failed to materialize, the remaining pieces met their fate in the melting pot. Research indicates that fewer than 250 specimens probably have survived, including many impaired pieces. Certainly, very few survivors achieve the lofty Superb Gem designation of the coin offered in this lot. Indeed, it is one of the four finest examples certified by NGC (11/08). No 1859 dollars in PR67 or better condition have been seen by PCGS.

The present specimen displays repunching on the base of the 1 in the date. Only visible under a loupe, this feature is diagnostic of all proof 1859 dollars. This beautifully toned representative is one of the lucky few that saw meticulous care from the beginning. The strike is needle sharp in all areas, including bold definition on the sandal of Liberty's foot. Lovely cobalt-blue, lavender, and gold-brown toning gravitates to the borders, leaving the centers nearly brilliant. The surfaces are impeccably preserved, displaying just a few minor marks on the Liberty motif. A couple of lint marks beneath Liberty's right (left facing) breast, and a minute circular surface imperfection in the upper right obverse field, serve to identify the piece.
*From The Estate of Jack Lee Collection.* (#7002)

## Amazing 1860 Seated Liberty Dollar, PR67

**3968** **1860 PR67 NGC.** Although Mint records indicate that 1,330 pieces were coined, many were later melted and Walter Breen recorded a net mintage or distribution of just 527 proofs. Apparently just one die variety is known. The possibility of a second variety cannot be ruled out, but such a discovery is only possible after a detailed analysis of the first variety. The date is about centered between the border and the base of Liberty, or perhaps very slightly above center. The left edge of the base of 1 is over the right edge of a dentil. The shield tip is minutely left of the left upright of the 1. Breen described "horizontal marks in stripes 5, 6, and 7," and Bowers interpreted this to mean on the obverse. There is no visible evidence of such marks on the obverse, although the shield on the reverse has horizontal marks visible in the spaces between several shield stripes. They are especially visible at the top and bottom of each space.

This example is one of just nine 1860 Seated dollars graded PR67, seven with the additional Cameo designation. PCGS has certified two examples as PR67 Cameo. Neither service has graded any example finer than PR67.

Stars 4 through 6 on the obverse and the top edge of each wing on the reverse are the only soft points on this otherwise boldly struck Superb Gem proof. The surfaces are pristine, with deeply mirrored fields and fully lustrous devices beneath amazing gold, violet, and sea-green toning on the obverse, with lilac-gray, violet, sea-green, and electric-blue toning on the reverse. Probably deserving of a Cameo designation, although the deep toning masks the contrast. *From The Estate of Jack Lee Collection.* (#7003)

## Impressive 1861 Seated Dollar, PR65 Cameo

**3969** **1861 PR65 Cameo NGC.** Even though the 1861 dollar had an official mintage of 1,000 proofs, far fewer are known today than one would expect from such a "high" mintage. Most likely 600 or more proofs were melted as unsold in January 1862 along with other proof sets from this and previous years. Of the five Civil War years, the 1861 is the scarcest today. This is an especially attractive example whose deeply mirrored fields set up the cameo contrast seen against the frosted devices on each side. Almost brilliant, there is just the slightest touch of golden toning present over the denticles and rims on both obverse and reverse. Census: 1 in 65 Cameo, 2 finer (11/08). (#87004)

## Toned Gem Proof 1862 Seated Dollar

**3970** **1862 PR65 NGC.** Sky-blue and aquamarine intermingle throughout the peripheries, while the centers display deeper golden-brown and sea-green. This original proof Gem is unabraded save for faint contact between the beak and the first S in STATES. The strike is exemplary save for trivial blending of detail on the eagle's left (facing) leg feathers. 1862 business strikes dwindled to just 11,540 pieces, which places additional demand on proofs. Yet proofs are also elusive, since just 550 specimens were struck for this challenging No Motto Civil War date. Census: 18 in 65, 10 finer (11/08).
*From The Estate of Jack Lee Collection.* (#7005)

## Stunning 1866 Motto Dollar PR66 Ultra Cameo

**3971** **1866 Motto PR66 Ultra Cameo NGC.** NGC and PCGS have graded more than 400 1866 Seated Liberty proof dollars (725 piece mintage), a fair number of which display a Cameo format. Only 20 coins, however, rate an Ultra/Deep Cameo classification.

The deeply mirrored fields of this Premium Gem proof Ultra Cameo specimen highlight the frosted devices, yielding a white-on-black appearance at certain angles. An exacting strike delivers crisp definition to the design elements, enhancing the field-motif contrast. Nearly untoned surfaces show just an occasional hint of light color, and are impeccably preserved throughout. Census: 3 in 66 Ultra Cameo, 4 finer (11/08). (#97014)

## Magnificent 1870 Dollar
## PR66 Ultra Cameo
## One of the Two Finest Certified

**3972** **1870 PR66 Ultra Cameo NGC.** The 1870 Seated Liberty dollar was struck to the tune of 1,000 pieces in proof format, the first time since 1861 in which the mintage of proof dollars touched the 1,000 mark. David Bowers writes in *Silver Dollars and Trade Dollars of the United States: A Complete Encyclopedia*:

> "It is one of those little anomalies of numismatics, and a spur to numismatic research and inquisitiveness, to note that today 1870 proof dollars are slightly scarcer than are, for example, those dated 1867 (which has a considerably lower mintage of 625 pieces).
>
> "Apparently, most 1870 proof dollars were distributed with minor and silver proof sets. The scarcity of survivors suggests that quantities may have remained unsold at the end of the year and were melted, many after July 10, 1873."

Of the nearly 450 1870 proof dollars certified by NGC and PCGS, only about 65 are Cameos, and fewer than 10 are Ultra/Deep Cameos. The present Premium Gem Ultra Cameo is one of the two finest certified!

The surfaces on both sides are essentially untoned, and the satiny motifs of each stand in stark contrast with the highly reflective fields. A penetrating strike manifests itself in bold definition on the design elements, leaving no areas with even the hint of weakness. A handful of wispy handing marks that appear in the obverse fields under high magnification might well preclude an even higher grade. Census: 1 in 66 Ultra Cameo, 0 finer (11/08). (#97018)

## Phenomenal 1873 Seated Dollar, PR66 Ultra Cameo

**3973** **1873 PR66 Ultra Cameo NGC.** Ex: Sweet Collection. The doubled motto (specifically IN GOD WE) is indicative of a doubled die variety that has been observed on proof Seated dollars of 1872 and 1873, along with some patterns using the regular reverse design. It is possible that the motto was entered into the die in a separate step using a complete punch that only contains that element, although such a procedure seems rather pointless even at that time, as the motto seems to remain in a constant position on all different reverse dies of this design type.

The motto was either a separate punch used on every die from 1866 to 1873, or it was part of the hub that was used to manufacture individual dies. Each known reverse die has two common characteristics: the G in GOD is punched over a stray letter, possibly an E. The W in WE has an extra serif below the upper left serif.

This is a remarkable example with amazing contrast, the devices being highly lustrous and the fields deeply mirrored. It has a sensational black and white appearance. NGC has certified two examples in PR66 Ultra Cameo, one in PR67 Ultra Cameo, and one in PR68 Ultra Cameo. PCGS has examined just one each in PR66 Deep Cameo and PR67 Deep Cameo. Therefore, the present example is tied for fifth finest Ultra Cameo proof certified by both services.
*Ex: Rod Sweet Collection (Bowers and Merena, 7/2005), lot 1034; Heritage (11/2005), lot 2262.*
*From The Estate of Jack Lee Collection.* (#97021)

## TRADE DOLLARS

### Rare, High Grade 1873 Trade Dollar, MS66

**3974** **1873 MS66 NGC.** In our FUN 2005 Platinum Night catalog we noted that this piece was "A near-twin to the exceptional 1873 Trade Dollar sold last March at the Portland ANA Sale (at over $14,000), being very likely from the same original source." Both sides are attractively framed in speckled russet and violet toning, and are boldly struck in virtually all areas. The surfaces are sparingly abraded and display a soft, frosted sheen that is undeniably original. The first year 1873 issue is very scarce in Mint State and is flat out rare with the eye appeal and preservation of the coin offered here. Census: 3 in 66, 0 finer (11/08).
*Ex: 2005 FUN Sale (Heritage, 1/2005), lot 30288.* (#7031)

## Marvelous Near-Gem 1873-CC Trade Dollar

**3975 1873-CC MS64 NGC.** The Trade dollar, substantially heavier than its predecessor the Seated dollar, was the eventual destination of much of the silver mined from Nevada and California in the early to mid-1870s. In particular, the Comstock Lode's silver mines saw much of their output go to the various Mints to be made into Trade dollars, though the majority of Nevada silver actually crossed the border into California to be minted at San Francisco, rather than be struck in-state at Carson City.

The Carson City Trade dollars are particularly elusive due to a lack of savings, with the first and last issues, the 1873-CC and the heavily melted 1878-CC, the most challenging of all. To quote from the Q. David Bowers reference *Silver Dollars & Trade Dollars of the United States*, "So far as is known, not a single numismatist in 1873 was interested in collecting trade dollars by mintmark varieties. Nearly all coins were shipped to the Orient, although a few apparently saw domestic use. Many of the exported pieces saw heavy use and were chopmarked ..."

It is only through the purest happy accident that a handful of unworn examples have survived to the present day. This Choice coin is one of the best-preserved, crisply detailed and immensely lustrous beneath a melange of rich gold-orange, rose, claret, silver, and plum shadings. A handful of stray marks preclude Gem status, but the eye appeal remains impressive. Census: 5 in 64, 1 finer (11/08). (#7032)

## Warmly Toned 1875-S Trade Dollar, MS65

**3976** **1875-S MS65 PCGS.** Type One obverse and reverse. All 1875-S Trade dollars were coined from the Type One obverse while the majority were also from the Type One reverse. The transition from Type One to Type Two for both hubs took place in 1875 and 1876. In 1876, known combinations include Type One/One, Type One/Two, and Type Two/Two.

The present piece is a sharply detailed with satiny silver luster and warm gold toning. Both sides have exceptional eye appeal. Although the 1875-S was one of the highest mintage Trade dollars, few Gem quality survivors are known today. Population: 20 in 65, 13 finer (12/08). (#7039)

## Sumptuous Gem 1876 Trade Dollar

**3977** **1876 MS65 PCGS. CAC.** Obverse 1, Reverse 2, the usual dies. Since the Trade dollar was intended for international commerce, particularly in China, it is logical that by 1876, most production for the denomination took place in San Francisco, close to the West Coast ports. Inland Carson City struck only slightly over half a million pieces that year, while the 455,000 coins pressed by the East Coast Philadelphia Mint brought up the rear. From this last, smallest issue hails the present Gem. Gleaming, immensely lustrous surfaces shine through faint layers of silver-gray patina. This sharply struck example is carefully preserved with potent eye appeal. Population: 18 in 65, 8 finer (11/08).

*From The James Mossman Collection.* (#7041)

## Rarely Seen Doubled Die Reverse 1876-CC Trade Dollar, MS61

**3978** **1876-CC Doubled Die Reverse MS61 NGC.** FS-801, formerly FS-014. Type One Obverse and Reverse. This doubled die variety has long been pursued by Trade dollar specialists. Although the first hubbing was relatively light, the spread between hubbings is dramatic. The pick-up point is the branch above FINE.

This is among the nicest known examples. The devices and legends shimmer with luster, and the borders display the ocean-blue and plum-red shades associated with long-term storage in old Wayte Raymond-style holders. Close inspection beneath a loupe locates only minor marks, mostly on the reverse field near the left scroll end and 900. Census: 4 in 61, 2 finer (11/08). (#97042)

## Exceptional MS66 1877-S Trade Dollar Ex: Eliasberg

**3979** **1877-S MS66 PCGS. CAC.** Eliasberg. The Eliasberg catalog notes that "Under high magnification the top part of the S mintmark has some interesting diagonal lines in it." These lines appear to be die chipping. With a mintage in excess of 9 million pieces, one would expect there would be a significant number of Uncirculated coins extant today. And that is the case until one reaches the MS65 level. Above MS65 there are very few pieces known. Both services have only certified 10 coins as MS66 with two finer (11/08). It should not be surprising that Eliasberg had one of the finest examples known since he had such deep pockets for the purchase of coins. This piece has swirling mint luster beneath the iridescent blue, gray, and golden toning that covers each side. The design elements are fully struck on both obverse and reverse, and there are no noticeable abrasions. Population: 6 in 66, 1 finer (11/08).
*Ex: Eliasberg (Bowers and Merena, 4/1997), lot 2344.*
*From The James Mossman Collection.* (#7046)

## Stellar Superb Gem 1877-S Trade Dollar

**3980** **1877-S MS67 NGC.** An exceptional Superb Gem, luminous with glorious light champagne, slate, and silver-blue shadings over most of the surfaces that lend each side an aura of hallowed antiquity. Deeper gold adheres to the devices, which makes them stand out from the fields all the more on the obverse. Well matched on the reverse, with deeper gold, russet and blue tones which come alive when examined under a light. The surfaces really make this coin extraordinary, as they are virtually pristine. Even with the aid of magnification, one is hard-pressed to turn up more than the tiniest luster graze or other quibble. Said magnification also emphasizes the power of the strike, with even the intricate veins on the leaves of the branch in Liberty's hand boldly executed.

The combined certified population shows 10 pieces in MS67 and three finer—*for the entire Trade dollar series* (11/08). While one might assume that the 1877-S issue, with its record-high mintage of over 9.5 million pieces, would account for most of those pieces, that assumption would be incorrect. In fact, the combined certified population shows just two MS67 examples of this issue, the present piece certified by NGC and another known to PCGS, with none finer. Such figures underscore how vital a Superb Gem such as this can be, whether one seeks a top-notch type coin or a crowning condition high for a date set. A fantastic representative for the discerning numismatist. *From The Estate of Jack Lee Collection.* (#7046)

## Fantastic Near-Mint 1878-CC Trade Dollar

**3981** **1878-CC AU58 PCGS.** The 1878-CC trade dollar is the key-date among all business strike issues of the series. Although official records show a mintage of 97,000 coins during the first part of 1878, records also indicate that 44,148 trade dollars were melted in July of that year. While it is not known what dates were included in the melt, a reasonable assumption is that many or most were 1878-CC coins. Survivors are rare in all grades, as the PCGS population data indicates. This example has satiny light gray surfaces with considerable remaining luster beneath iridescent toning. Only a trace of wear is evident on the high points of the sharply struck design. A prize for the discerning Trade dollar or Carson City coinage specialist. Population: 12 in 58, 24 finer (11/08). (#7047)

## Series-Key 1878-CC Trade Dollar, MS63

**3982** **1878-CC MS63 NGC.** Not only does this issue have the lowest business strike mintage of the series, at 97,000 pieces, but it seems likely that approximately 44,000 of those coins were melted before the end of the year. Bowers (1993) notes that there are probably around 15 to 25 survivors at the MS63 grade level, and that estimate is consistent with current certified population data.

The current offering is a sharply struck coin that only hints at weakness on the upper half of Liberty's head. Fine, satiny luster illuminates the carefully preserved surfaces, that show a broad arc of deep charcoal-green toning on the left side of the obverse, and a coating of coppery champagne-gray and cobalt-blue iridescence on the reverse. Surface marks are minimal for the Select Mint State grade. Census: 7 in 63, 7 finer (11/08). (#7047)

## EISENHOWER DOLLAR

### MS67 1973-S Ike Dollar
### Struck on a Copper-Nickel Clad Planchet

**3983** **1973-S—Struck on a Copper-Nickel Clad Planchet—MS67 NGC.** 22.5 gm, similar to the 22.68 gm standard weight for a copper-nickel clad planchet. A 40% silver planchets should weigh 24.59 gm, per the 2009 *Guide Book*. The San Francisco Assay Office (it regained status as a full-fledged mint some years later) only struck Eisenhower dollars for collectors in 1973. Uncirculated dollars (called 'blue' Ikes by collectors) were intended to be struck only in 40% silver. Proofs (or 'brown' Ikes) were struck in both the 40% silver and copper-nickel clad alloys. More than 4.5 million pieces were struck in one of those three combinations, and it is perhaps inevitable that a copper-nickel clad planchet skipped burnishing steps and made its way between Uncirculated dies. Lightly toned in chestnut-gold. Lustrous, well struck, and essentially immaculate.
***See: Video Lot Description***

## SACAGAWEA DOLLARS

### 2000-P Cheerios Dollar, MS68

**3984** **2000-P Cheerios MS68 PCGS.** FS-901. Produced from a different reverse hub, the die of the popular "Cheerios" variety Sacagawea dollar had heightened definition of the eagle's tail feathers, with a raised central line, rather than incuse as seen on regular issue pieces. Radiantly lustrous brassy-gold surfaces exhibit exquisitely struck design elements, and are nearly pristine.

Included in this lot is a promotional **2000 Cent MS65 Red PCGS**, which was distributed at the same time. Both sides are exquisitely brought up, and copper-gold luster embraces each side. A scattering of the typically-seen light "stains" likely precludes an even higher grade.

Included is the plastic insert from the Cheerios box that once contained the two coins. (Total: 2 coins) (#147231)
***See: Video Lot Description***

## Popular MS68 2000-P 'Cheerios' Dollar

**3985** **2000-P Cheerios MS68 NGC.** FS-901. This increasingly popular variant was introduced to the United States through its inclusion as part of a promotion for General Mills cereals, hence the "Cheerios" nickname. Several years after the original distribution, Paul Gilkes wrote in *Coin World* about differences in the eagle's tail feathers between the "Cheerios" dollars and later 2000-P examples, and a collector craze was born.

The present "Cheerios" dollar has bright yellow-brass surfaces with crisp overall detail. The obverse is virtually pristine, and only a few faint ticks are visible under magnification. This lot also includes a promotional **2000 Cent MS66 Red NGC**, distributed at the same time. Both coins are housed in a custom-format large NGC holder; original cereal-box packaging not included. (Total: 2 coins) (#147231)

## GOLD DOLLARS

### Amazing 1849-D Gold Dollar, MS64 With Reverse Planchet Lamination

**3986 1849-D—Reverse Planchet Lamination—MS64 PCGS.** Variety 1-A. The variety of this piece may hold a clue why there is a planchet lamination on the reverse. These were the first D-mint gold dollars struck and Mint Director Robert Patterson said they were unsatisfactory due to a blurry reverse. This comment would lead one to suspect that quality control and striking standards were not sufficient when these pieces were first struck. If so, then it is not improbable that a lamination such as seen on this coin could have escaped the attention of the inspector.

This is one of the most attractive Type One gold dollars we have seen. The surfaces are completely untampered and both sides display rich reddish-gold and lilac color. The obverse die appears to have been basined as the field around the head of Liberty is bright and semiprooflike. The devices are fully struck throughout. A wonderful 1849-D and sure to be of interest to gold dollar and Dahlonega collectors, as well as error collectors who are always on the lookout for that elusive gold coin error. (#7507)

## Fantastic Superb Gem 1853 Gold Dollar

**3987 1853 MS67 PCGS. CAC.** As the single highest-mintage gold dollar issue, the 1853 is immensely popular with type collectors and is available for a price in virtually any grade, with easy accessibility even at the Gem level. Even the most populous type issue has its limits, however, and in Superb Gem the 1853 gold dollar is a condition rarity. This satiny survivor sports exquisite central detail with warm yellow-gold surfaces that sport occasional hints of honey close to the rims. Marvelously preserved and impressive in all respects. Population: 7 in 67, 4 finer (11/08).
*From The James Mossman Collection.* (#7521)

## Impressive 1858-D Gold Dollar
## Popular Branch Mint, MS62

**3988 1858-D MS62 NGC.** From a small mintage of 3,477 pieces, the 1858-D is surprisingly available in circulated grades. At the Mint State level, the situation is less clear. Q. David Bowers believes this issue is frequently overgraded, and notes population data seems deceptive on this issue. The typical coin shows a weak strike, due to improper placement of the dies. Clash marks and planchet irregularities are often seen as well. David Akers observed, "It is almost impossible to obtain an 1858-D in full Mint State (I have seen only two or three), VF and EF examples are reasonably obtainable."

The present coin is an attractive example of this uncommon date. The strike is typical of this issue, with softness on the central features of both obverse and reverse. The fields are brightly reflective, and handling marks are minimal. Overall eye appeal is excellent. Census: 15 in 62, 10 finer (11/08). (#7549)

## PROOF GOLD DOLLARS

### Rare PR64 1858 Gold Dollar With Unacknowledged Cameo Contrast

**3989** **1858 PR64 PCGS.** A significant proof striking as 1858 was the first year proof coins were available to the collecting public at large. As such, it marks the beginning of the modern era of proof coinage in this country. An unknown, but small, number of proof gold dollars were produced in this year with reliable estimates of only 10-12 pieces believed extant today. This is a deeply reflective specimen that shows generous portions of mint frost on the devices, producing an attractive two-toned cameo effect, even though this is not mentioned on the early design, green insert PCGS holder. A light milky haze has developed over the years, a sign of complete originality. Easily identified by a small lintmark adjacent to Liberty's mouth. Population: 8 in 64, 2 finer (11/08). (#7608)

### Elegant PR65 Cameo 1860 Gold Dollar

**3990** **1860 PR65 Cameo NGC.** The 1860 is one of two earlier gold dollar issues with a high published proof mintage, though Garrett and Guth note that this is misleading, writing in their *Encyclopedia of U.S. Gold Coins* that "... about the same number of 1860 and 1859 coins have appeared at auction the last decade or so." The 1859 has a substantially smaller mintage, but most estimates list 25 to 30 survivors across all grades for each issue. This gorgeous Gem offers profound contrast and sharply detailed, lightly frosted devices. Vibrant yellow-gold surfaces reflect careful preservation. Census: 2 in 65 Cameo, 1 finer (11/08).
*From The Peter J. Adasek, M.D. Collection.* (#87610)

## Superb 1885 Gold Dollar
## PR67 Cameo

**3991** **1885 PR67 Cameo NGC.** The 1885 date is one of the more available gold dollars in proof, if one believes the auction records. Some caution should be used in evaluating the number of auction offerings, as many deceptive, high-grade business strikes are found on the market. The difficulty in distinguishing real proofs from these high-end, regular-issue pieces probably resulted in many errant listings in earlier catalogs.

From a proof mintage of 1,105 pieces, this elegant coin ranks high in aesthetic appeal as well as technical grade. The deeply mirrored fields contrast boldly with the sharply detailed devices, producing the vivid Cameo effect. The rich, orange peel surfaces are diagnostic of true proofs. This specimen is nearly unimprovable. Census: 10 in 67 Cameo, 2 finer (11/08). (#87635)

A 15% BUYER'S PREMIUM ($9 MIN.) APPLIES TO ALL LOTS.

LIBERTY
1796

# EARLY QUARTER EAGLES

# Classic Rarity 1796 No Stars Quarter Eagle, BD-2, AU53

**3992 1796 No Stars AU53 NGC.** Breen-6113, BD-2. R.4. The 1796 No Stars quarter eagle has been a numismatic talisman from the very beginning of the hobby. The coin is a benchmark for any early gold specialist. It also has special status as the first year of issue and a one-year type coin. The combination of all these qualities creates intense competition whenever an example is offered at auction. A particularly fine specimen was offered in A Gentleman's Collection (American Numismatic Rarities, 6/2005), lot 1002. On that occasion, the coin sold for $1.38 million, a record for any early U.S. gold coin.

The year 1796 was a very important one for U.S. coinage. It was the first year in which the Mint was able to produce all of the coinage denominations authorized by the Mint act of 1792. The year saw the first production of dimes, quarters, and quarter eagles. The first delivery of quarter eagles, consisting of a mere 66 pieces, took place on September 21,1796. Harry Bass believed that this delivery included all the specimens of the extremely rare No Stars BD-1 variety, characterized by longer arrows on the reverse. Only four examples of this variety are known to collectors today. The next delivery did not take place until December 8, 1796 and consisted of 897 coins. Experts believe that this delivery consisted of coins of the present variety, No Stars BD-2. In *Early U.S. Gold Coin Varieties,* John Dannreuther states that the long hiatus between deliveries was probably due to the early failure of the reverse die and the difficulty of replacing it. This circumstance accounts for the extreme rarity of the BD-1 variety.

The dies for the 1796 No stars quarter eagle were probably engraved by Robert Scot and John Smith Gardner. The obverse of the coin has a medal-like appearance, similar to some varieties of the Gobrecht dollar coined in later years. The unadorned simplicity of the design is prized today, but it was quickly abandoned in favor of the With Stars design later in the year. The reverse has the distinction of being the first use of the Heraldic Eagle design on any U.S. coin. Earlier dated coins from different denominations exist, but experts believe they were actually produced in 1798, using leftover obverse dies from the earlier years combined with the new Heraldic Eagle reverses.

The 1796 No Stars quarter eagle has a long auction history, and the issue has always been popular at its relatively frequent appearances. Collectors realized the importance of the coin early on, and made it a popular prize for any dealer who could offer one. The prices realized at the early appearances seem surreal to collectors today. One early appearance was in the Fifth Semi-Annual Sale (Woodward, 10/1864), lot 1658. The lot was sold to J.O. Emery for $9.50, a respectable sum at the time. Woodward sold this coin again when he sold Emery's collection on March 9, 1880. The example featured in the Sixth Semi-Annual Sale (Woodward, 3/1865), lot 2789, was described as, "1796 Without stars; extremely fine, nearly proof, very rare." Woodward, like other coin dealers of the time, was not very precise in his use of the word proof. The lot sold to Thomas Cleneay for $13.50. Cleneay's collection was sold by the famous Chapman brothers in one of their landmark sales in 1890. The first appearance of the remarkable, record setting specimen in the American Numismatic Rarities sale mentioned above was in the Parmelee sale (New York Coin and Stamp, 6/1890), lot 719, where it sold for $17.50. The issue has remained a popular staple of auction catalogs down to the present day.

In *Collecting & Investing Strategies for United States Gold Coins,* Jeff Ambio estimates that fewer than 150 examples of the 1796 No Stars quarter eagle survive today. Ambio advises, "With so few coins extant and strong competition from type collectors and gold specialists, it is not wise to be overly concerned with grade when it comes to the 1796 No Stars quarter eagle. Any example certified by PCGS or NGC represents an important potential addition to a collection or investment portfolio." An attractive AU specimen, such as the currently offered coin, is eminently acceptable in even the most advanced collection.

The present coin displays a better than average strike, with a little softness in the hair and the area where the shield meets the eagle's breast. These areas are almost always weak on this issue. There is crisp detail on all other devices. The surfaces have some remaining mint luster, with only slight wear on the highest points. A planchet defect in the right obverse field is the only distraction of note. Superior eye appeal and great historical importance make this coin a major prize for the advanced collector. Census: 1 in 53, 36 finer (9/08). (#7645)

A 15% BUYER'S PREMIUM ($9 MIN.) APPLIES TO ALL LOTS.

# Attractive, Rare 1796 No Stars Quarter Eagle
# AU58, Breen-6113, BD-2

**3993 1796 No Stars AU58 PCGS.** Breen-6113, BD-2. R.4. This is the more "available" of the two varieties of 1796 No Stars quarter eagle that pairs one obverse die with two reverse dies. On BD-2, the arrowheads do not extend beyond the N of UNITED, with the lowest arrow point directly beneath the left stand of N.

The first U.S. quarter eagles were the 66 coins delivered on September 21, 1796 pursuant to Warrant 75. John W. Dannreuther and Harry W. Bass, Jr. write in their treatise on *Early U.S. Gold Coin Varieties: A Study of Die States, 1795-1834*:

> "Harry Bass believed that the 1796 No Stars coins of this delivery undoubtedly were the exceedingly rare variety with the arrowheads extending past the N of UNITED about to the left foot of I (variety BD-1). The common obverse die (it was later used for the other No Stars variety, BD-2) was in its earliest state for the four currently known BD-1 coins, these without clashing or die cracks and before the die was lapped. This proved to Bass that these coins from this rare die combination were struck before the more readily available variety (BD-2) of 1796 No Stars quarter eagles."

Dannreuther and Bass go on to say that Warrant 77 for 897 quarter eagles was issued on December 8, 1796, and is thought to consist exclusively of the BD-2 1796 No Stars variety. They also mention, however, that some of this mintage may have been for the 1796 with Obverse Stars issue.

Walter Breen, in his *Complete Encyclopedia of U.S. and Colonial Coins* points out three distinctions of the 1796 No Stars quarter eagle:

> "It is the first precious metal coin without stars issued for circulation by the USA prior to 1836; it is the first ever to show the heraldic eagle, which would become standard on all silver and gold denominations 1798-1807; it is the earliest made showing 16 reverse stars honoring Tennessee's admission"

Breen goes on to say:

> "The dies show evidence of careless haste, suggesting time pressure. Though documentation is lacking, quarter eagles may have been included in presentation sets commemorating the admission, June 1, 1796. Prooflike presentation coins of this date are known of all other denominations above the cent except the half eagle."

Why did the first 1796 quarter eagle have no obverse stars? This, of course, is anyone's guess. In a November 11, 2003 *Numismatic News* article titled "1796 U.S. $2.50 Gold Comes in Two Varieties," Paul Green suggests that this may have been an artistic decision, or it might have reflected a rush to quickly produce some quarter eagles, or a lack of manpower. Whatever the reason, the 1796 No Stars is a significant one-year type coin that is lacking in most early U.S. design-type collections. PCGS and NGC have certified just over 100 examples ranging from VF20 to MS65, and some of these are likely resubmissions.

The peach-gold surfaces of the near-Mint State offering presented in this sale display traces of light green. Both sides retain a fair amount of luster, and are remarkably clean for a coin that saw some circulation. The design elements are nicely centered on the planchet, and exhibit relatively strong definition, though the eagle's breast and neck show the typical incompleteness of feather detail. Light diagonal adjustment marks located in the center of Liberty's portrait slant from the upper left to the lower right. These are the only pedigree identifiers apparent on the coin. This is an excellent opportunity for early gold specialists or advanced type collectors. Population: 14 in 58, 7 finer (11/08). (#7645)

A 15% BUYER'S PREMIUM ($9 MIN.) APPLIES TO ALL LOTS.

# Exhilarating 1796 With Stars Quarter Eagle, MS62, BD-3
# The Eliasberg-Price Specimen

**3994** **1796 Stars MS62 NGC.** BD-3, R.5. Quarter eagles were the third gold coin denomination struck at our first Mint, preceded by the 1795-dated half eagles that were delivered on July 31, 1795, and shortly thereafter by the 1795 eagles. Interestingly, the 1796 quarter eagles represent the first use of the Heraldic Eagle reverse. This fact—together the introduction of the 1796 No Stars quarter eagle obverse—is an indication that the Mint was experimenting with new designs. Perhaps this small, odd denomination was chosen as a test bed due to its unimportance, relative to the half eagle and eagle coins which were used extensively in the channels of international commerce.

The exact reason why Robert Scot left the first quarter eagle obverse die "unfinished" may never be known. Researcher Robert Hilt believed that the star punch broke after adding 16 stars to the other 1796 obverse die, so the decision was made to harden the die without stars. This is illogical for more than one reason. Other theories make more sense, but none can be proven definitively. Could it be that the first die was accidentally hardened before the engraver realized that the die was incomplete? Stranger things happened in the early days of our first Mint! The Bass-Dannreuther reference opines that the stars were intentionally omitted from the die, but Mint officials later concluded that the final coins looked better with 16 stars occupying the obverse periphery; an uncomplicated and refreshingly rational theory. And since the new quarter eagles featured a radically different reverse design, the case could be made that the Mint was exploring alternative design concepts. Perhaps the No Stars variety was a pseudo-pattern, if you will.

An early Mint policy was to include one obverse star for each state of the Union. Since Tennessee became a state on June 1, 1796, the With Star pieces included in the January 1797 delivery of 1796 quarter eagles displayed 16 stars around the obverse periphery. It didn't take Mint Director Elias Boudinot long to conclude that the engravers would run out of die space if even a few more territories became states, so the following year the rule was to changed to a static 13-star obverse design, although there are a few exceptions. Some have speculated that the 16 stars were added to the No Stars obverse die; the logic being that the Mint would not have wantonly discarded a perfectly good die. This is unlikely for the simple reason that the die was already hardened and modification would have been possible, but challenging. Instead a new obverse die was prepared, as was the third reverse die for the year. The amazing point here is that by this time a mere 963 1796 BD-1 and BD-2 quarter eagles had been struck. Even within the estimated mintage of 432 BD-3 quarter eagles—minuscule by any standard—Bass and Dannreuther documented a staggering five die states, replete with clashing, die breaks, and lapping. The specimen offered here appears to be Bass-Dannreuther Die State b, as Liberty's lower hair curls have not been partially effaced from excessive lapping. However it is likely that this piece was struck with dies that were at least lightly serviced, as evinced by the semiprooflikeness of both the obverse and reverse fields.

Bass-Dannreuther estimate that only 40 to 50 1796 BD-3 quarter eagles have survived, regardless of condition. That is less than half of the suggested extant population of the No Stars type. Nonetheless, the No Stars variant has always been in demand due to the fact that it is major single-year type coin, undeniably making the 1796 Stars variety an underrated issue. The current offering is one of just a half dozen or so Mint State survivors known, although in terms of eye appeal it must rank close to the top of that short list. Fiery orange-gold coloration is illuminated by reflective fields on both sides and the resulting display is exhilarating. Unobtrusive adjustment marks on the reverse's central design elements result in a slight softness of Miss Liberty's portrait. Elsewhere the coin is sufficiently struck. The aesthetic qualities of the current offering are such that it was a cherished holding in the collections of more than one legendary numismatist, as evinced in the ensuing provenance listing.

Eliasberg, Sr. (Bowers and Ruddy, 10/1982), lot 80; Long Beach Connoisseur Collection; Bowers and Merena (8/1999), lot 337; Heritage (1/2005), lot 8761; Ed Price Collection (Heritage, 7/2008), lot 1452.* (#7647)

## Important 1802 BD-3 Quarter Eagle, MS63

**3995** **1802 MS63 PCGS.** Breen-6113, BD-3, R.5. The reverse has a tiny die crack from the wing tip to the border at 2 o'clock, and a die line or scratch upward from the left corner of the shield to the scroll. Dannreuther calls it a die crack. The same reverse in an earlier die state (according to the John Reich Dime book authors, later according to John Dannreuther) was used to coin 1802 JR-1 dimes (presently unique) and in a later die state to coin 1803 JR-1 dimes. The boldly recut star 1 on the reverse, showing nine distinct points, is another immediate diagnostic for the die.

1802 BD-3 is clearly the second rarest of three known varieties. Perhaps as many as 75 examples are known, but few have survived in top grades. In fact, this piece is tied for the finest PCGS has certified, along with six others that have received the MS63 grade, and that population includes all three varieties. There are probably less than 10 Mint State examples of the BD-3 die combination.

This lovely green-gold example has considerable central weakness as almost always encountered, due to the obverse and reverse design alignment that required substantial pressure to fully bring up. The obverse field is satiny and the reverse field is reflective. Only trivial abrasions on each side limit the grade. A small planchet flake in the reverse field near the border at 7 o'clock will aid in tracking its past provenance.

*Ex: Bowers and Merena (8/1999), lot 340; Heritage (10/2000), lot 7489.*

*From The James Mossman Collection.* (#7650)

## Flashy 1804 14 Star Reverse Quarter Eagle
## AU58, Breen-6119, BD-2

**3996** **1804 14 Star Reverse AU58 NGC.** Breen-6119, BD-2, R.4. This coin is easily recognized not only by the 14 stars on the reverse, but also because it is the only Robert Scot-designed quarter eagle "with an obvious cross pattern of stars," as John Dannreuther and Harry Bass, Jr. (2006) put it. The authors elaborate: "This reverse die was believed by Breen to be a leftover die from around 1798, as the pattern of stars around the eagle's head is in what is called the cross pattern. Virtually all of the later dies have an arc pattern. Whenever this reverse die was made, it was still in good shape and was used."

The partially prooflike fields of this near-Mint State example highlight the mildly frosty motifs at certain angles. Excellent definition is noted on the design features. A few minor circulation marks are visible on the obverse, including an unobtrusive hair-thin mark on Liberty. Adjustment marks are seen on the lower reverse. This piece yields considerable "flash."(#7652)

## 1806/4 Stars 8x5 Quarter Eagle, BD-1, MS61

**3997** **1806/4 8x5 Stars MS61 NGC.** Breen-6122, BD-1, High R.4. The 8x5 star arrangement (as well as the obvious overdate) is an easy tipoff to the attribution of this variety, as the 1806/5 BD-2 obverse shows the stars arranged 7x6. Bass-Dannreuther rank the 8x5 BD-1, the present example, as High R.4, meaning that 75-90 survivors are estimated, while the 7x6 BD-2 is ranked High R.5, meaning that only 25-35 exist today.

This is another early quarter eagle variant whose long-lived reverse die was also used in the production of early dimes, in this case the 1807 JR-1 variety, as well as on the 1805 BD-1, the 1806/5 BD-2, and the 1807 BD-1 quarter eagles.

On the obverse star 1 barely touches the faint hair curl second from the bottom, and the tops of the 1 and 6 touch the hair and bust, respectively. A point of star 7 is firmly embedded in the rear of Liberty's turban. Much of the lower 4 underdigit is visible both inside and outside the lower loop of the 6. On the workhorse reverse, the 13 stars are arranged in remarkably regular rows of six, five, and two, with star 11 showing repunching. The obverse is here in BD State b, with numerous tiny die cracks joining the letter tops of LIBERTY and most of the peripheral stars.

Concerning the reverse, Bass-Dannreuther comments it "... wins the most-coins-struck award for a die of this type. As one can see by the cracking of many of these early dies, this reverse die certainly was an exception to the rule, as most dies of this era never struck more than 10,000 or so coins—no other quarter eagle die of this type struck over a few thousand quarter eagles!"

There is some strike softness noted in the center, and there are numerous adjustment marks through Liberty's turban, face, neck, and hair, although they are only faintly seen without the aid of a loupe. Some central weakness is also noted on the reverse, and a small scrape runs from the right juncture of the wing and scroll top to the horizontal shield lines. Despite these minor distractions, the piece is pretty and appealing, with greenish-gold, semiprooflike surfaces and considerable mint luster. A nice example for an early gold type set. (#7654)

## Rare Choice XF 7x6 Stars 1806/5 Quarter Eagle, BD-2

**3998** **1806/5 7x6 Stars XF45 NGC.** Breen-6123, BD-2, High R.5. Bass-Dannreuther Die State b/b with an extremely faint die crack between stars 5 and 7. A die crack between the 80 in the date is present but unlisted in the Dannreuther reference. The hardy reverse die for BD-2 had a diverse life, coining 1805 BD-1, 1806 BD-1, 1806 BD-2, 1807 BD-1, and finally the 1807 JR-1 dime.

This is a pleasing example of this rare variety. Butter-gold color on Liberty's cheek, hair, cap, and drapery indicates light wear, but luster glistens from protected areas, and the only abrasion of any interest is relegated to the field near the D in UNITED. The eagle's neck and shield lack a full strike, but the remainder of the design is bold. Census: 2 in 45, 12 finer (11/08). (#7655)

## Popular BD-1 1807 Quarter Eagle, AU55

**3999** **1807 AU55 NGC.** Breen-6124, BD-1, R.3. Lone variety for the year. Obverse State a, Reverse State b, no die cracks on obverse. The 1807 marked the last of the Capped Bust to Right quarter eagle issues, and though it is scarce in an absolute sense, it is also the single most readily available variety for the design, making it irresistible to type collectors. Warm luster graces the yellow-gold and honey-orange surfaces of this Choice AU survivor. Only a touch of wear affects the central devices, and the small marks present in the fields have minimal impact on the considerable eye appeal.
*From The Martin L. Diffenbaucher, Jr. Collection.* (#7656)

A 15% BUYER'S PREMIUM ($9 MIN.) APPLIES TO ALL LOTS.

# Important 1808 Quarter Eagle, BD-1, AU50

**4000** **1808 AU50 PCGS.** BD-1, R.4. Die state b, with die crack behind Liberty's head but none through the date. A single delivery struck from a single set of dies, 2,710 quarter eagles dated 1808, were shipped to the Mint cashier on February 26 of that year. They would be the last quarter eagles struck until 1821, the only ones coined from dies created by John Reich's hands, and the only Capped Bust to Left pieces for the denomination. Today's survivors, estimated at 150 pieces total by Bass and Dannreuther in their *Early U.S. Gold Coin Varieties* with 125 discrete examples known, are the keys to the 19th century type set, and as such, they have been popular almost since the beginning of organized coin collecting in this country. As David Akers wrote in his 1975 volume on quarter eagles in his *United States Gold Coins* series,

> "The 1808 is one of the more famous and most desirable Quarter-Eagles, owing largely to its status as an essential one-year-only-type. Its tradition of recognition extends back to 'ancient' times of American Numismatics and its fame is forever secured. This fame has often been the impetus for many seemingly exaggerated claims about its rarity but, on the other hand, revisionist students often underestimate that rarity."

In one of the grandest traditions of numismatics, the more things change, the more they stay the same. The 1808 quarter eagle continues to be pulled between two main poles or modes of thought, those being the hype for this issue as a one-year-only type collector's nightmare and the superficial number-cruncher who points to certified population data and insists that the date is not nearly so elusive as numismatists make it out to be. As always, there is a grain of truth to each argument, but each one is similarly misleading alone. The 1808 quarter eagle is not an absolute rarity according to the Sheldon scale, being only an R.4, indicative of a "very scarce" die pair or issue. That scarcity, however, encompasses all grades, and assuredly there are fewer examples known than collectors who would like to own one.

The blind follower of certified population data could draw any number of incorrect conclusions from the current statistics for this challenging issue. As of (11/08), PCGS has graded 55 examples in all grades. Were one to look at certified populations alone, the 1808 quarter eagle would seem more available than the 1821, 1824/1, 1826, 1827, and even 1825 quarter eagle issues! Yet clearly it is not, judging from other available information. Rampant resubmission of coins has had the greatest impact where the financial stakes are highest, and the 1808 quarter eagle is no exception. That the mode of grades in the PCGS *Population Report* for the issue is AU58, an utterly implausible statistical point for students of the series, should be evidence enough. The true level of population inflation is impossible to gauge, but its presence must be taken into consideration.

The collector would be forgiven, however, if thoughts of populations and marketing hyperbole are forgotten in the wake of this lightly circulated, yet majestic 1808 quarter eagle. The honey-gold surfaces remain surprisingly luminous, with a generous degree of remaining luster in the reverse recesses, and in general, abrasions are wispy and of little concern. Two minor exceptions are noted, one in the left obverse field and one at Liberty's upper hair. The strike shows typical softness at the margins, which show adjustment marks to the right obverse, but the overall eye appeal remains strong. An excellent piece that is sure to please the purchaser.

*From The James Mossman Collection.* (#7660)

***See: Video Lot Description***

## Fabulous MS62 BD-1 1821 Quarter Eagle

**4001** **1821 MS62 NGC.** BD-1, R.5. The quarter eagle had a surprising level of continuity in strikings from its debut in 1796 to its exit in 1929, with only two gaps of any significance. The second took place near the end of the quarter eagle's time, with a decade's gap between the Indian quarter eagles of 1915 and the 1925-D issue. The only longer space without quarter eagle coinage took place earlier in the denomination's history, when production halted after the minuscule mintage of the 1808 two and a half and did not resume until a new batch of quarter eagles was made in 1821.

The creator of the 1808 dies, John Reich, had departed from the Mint in the interim, after nearly a decade of service; numismatic legend has it that he grew frustrated with his perpetually dim prospects of achieving the Chief Engraver's post. As recounted by Bass and Dannreuther in their *Early U.S. Gold Coin Varieties*, "For whatever reason he left, only Robert Scot was around when the new dies were prepared in 1821 and he is credited with the major punches—the head and eagle. Scot's eyesight was failing, so it is possible a contract engraver modified the Reich design."

Among the noteworthy characteristics of high-end 1821 quarter eagles is that many show substantial reflectivity in the fields. This yellow-gold piece is no exception, and a touch of frostiness to the exquisitely struck devices adds a touch of lovely contrast. The fields are remarkably clean; the shallow marks below Liberty's eye are adjustment marks, and only a long, thin abrasion at the cap and ear precludes Select status. Census: 3 in 62, 1 finer (11/08).
*From The James Mossman Collection.* (#7662)

A 15% BUYER'S PREMIUM ($9 MIN.) APPLIES TO ALL LOTS.

## Extraordinary 1826/5 Quarter Eagle, AU50

**4002** **1826/5 AU50 PCGS. CAC.** Breen-6130, BD-1, High R.5. A rarity among rarities, the 1826/5 overdate quarter eagle is an extremely elusive issue. Official mintage records indicate that just 760 pieces were coined. John Dannreuther feels that the overdate is actually a repunched 1826/6 variety, and he further believes that many of those reported in 1827 were dated 1826. There were a reported 2,800 quarter eagles struck in 1827, so the latter date should be roughly four times more plentiful than the former. Our auction archives show seven 1826 quarter eagles and 14 1827 quarter eagles offered since 1993.

The present piece is a wonderful green-gold example with typical bluntness on the obverse stars. Faint clash marks are evident on the reverse. Population: 1 in 50, 11 finer (12/08).
*Ex: Heritage (1/2000), lot 7599.* (#7665)

## Refreshingly Original 1830 Quarter Eagle, AU58

**4003** **1830 AU58 PCGS.** BD-1, R.4. Bass and Dannreuther suggest that less than 100 1830 quarter eagles are extant in all grades. Considering their low mintage of 4,540 pieces, and the fact that many old tenor gold coins were melted after July 31, 1834—the result of a weight reduction for our nation's gold coinage—the estimated number of survivors is understandable. This example saw brief circulation, as evinced by light luster breaks in the fields. Ample luster remains elsewhere and a pleasing orange-gold patina blankets each side. An early quarter eagle for those who appreciate originality. Population: 12 in 58, 35 finer (11/08). (#7670)

## Reflective 1830 Quarter Eagle, MS64

**4004** **1830 MS64 NGC.** Breen-6133, BD-1, R.4. From 1829 until 1834, only one die variety of each Capped Head quarter eagle issue was minted. The diameter was reduced slightly from the earlier Capped Head issues coined from 1821 to 1827. Each year saw a limited production that ranged from a low of 3,403 coins in 1829 to a high of 4,540 coins the following year. The average production was 4,170 coins.

New technology was introduced at that time, providing a more uniform diameter and appearance to the coin through the used of a closed color that imparted a reeded edge at the same time the coin was struck, eliminating the separate step of imparting the edge device before striking. Mint Director Samuel Moore stated that the new closed collar provided a "mathematical equality" to the coins.

Throughout the 1820s and into the 1830s, the price of gold increased to a point where the gold value was greater than the face value, inspiring people who had them to melt them down for their gold content. Today, the result of those actions is that few examples survive today, although those that do survive are apt to be in higher grades since they clearly did not circulate.

Both sides of this boldly detailed piece have minuscule scratches and planchet flakes. The greenish-gold surfaces are faintly prooflike with slight cameo contrast. All of the design elements are bold and the overall eye appeal is exceptional. This splendid quarter eagle is sure to please the connoisseur. Census: 1 in 64, 8 finer (10/08). *From The Omaha Collection.* (#7670)

A 15% BUYER'S PREMIUM ($9 MIN.) APPLIES TO ALL LOTS.

## 1831 BD-1 Quarter Eagle, MS64
## Amazing Reflective Surfaces

**4005** **1831 MS64 NGC.** Breen-6134, BD-1, R.4. Numerous Proof examples have been listed in literature over the years, no doubt with a number of duplicate entries. Circulation strikes often have prooflike fields, confusing the distinction between such coins and true Proofs, especially in the 19th and early 20th centuries. By today's standards, few of these actually qualify as Proof coins. The present piece is one such example that may have been called a proof in the past, although there is no doubt about its business strike status.

Despite a meager mintage of 4,520 pieces, quite a few (relatively speaking) higher grade examples still exist today. In all grades, NGC and PCGS have certified 118 submissions (undoubtedly including resubmissions as John Dannreuther only estimates that 110 to 125 exist), and the average grade for those 118 coins is exactly MS60. The two services have certified 21 examples, including this piece, in MS64, with 18 others in MS65 through MS67. Jeff Garrett and Ron Guth note in their Gold Encyclopedia: "Most of the known examples are in excellent condition, suggesting that virtually all of the coins outside of collections were destroyed." The 21st century type collector has an ideal opportunity to acquire an attractive, higher quality 1831 quarter eagle to represent the design.

An amazing prooflike Choice Mint State piece, exhibiting brilliant green-gold surfaces and sharp design elements, save for slight weakness just left of the shield. This lovely piece has hints of reddish-orange toning along the peripheries. An early die state with no evidence of die cracks, clash marks, or lapping.
*From The James Mossman Collection.* (#7671)

## Rare, High Grade 1833 Capped Head Quarter Eagle, MS64

**4006** **1833 MS64 NGC.** Bass-3030, Breen-6136, R.4. The only dies known for this rare low mintage date. Both 3s in the date are lightly recut, and the reverse shows broad repunching on the U in UNITED and the I in AMERICA. Only 4,160 pieces were struck, and most of these were promptly melted since the bullion value exceeded face value. It was not until the next year, 1834, that the weight of gold coins was reduced, which allowed such pieces to enter circulation. PCGS has certified two 1833 quarter eagles in VF grades, but these were likely carried as souvenirs by a 19th century owner. Most survivors are in AU or lower Mint State grades. NGC and PCGS combined have certified only six examples above the MS64 level.

This piece has remarkably smooth, unmarked olive-gold surfaces with a pronounced accent of red around the margins. Both obverse and reverse are sharply struck on the central devices with some localized softness on the peripheries, specifically flatness on the stars. There is also slight weakness on the curls of Liberty's hair and the left side of shield and adjacent eagle's wing, all the usual places one finds softness on these pieces. The open fields are semiprooflike with noticeable traces of mint luster surrounding the devices. While rarely encountered in any grade, such a high-grade example as this is seldom seen. This is a desirable, high-grade near-Gem worthy of the finest quality early gold date or type. Census: 6 in 64, 2 finer (11/08). collection. Census: 6 in 64, 2 finer (2/06). (#7673)

## CLASSIC QUARTER EAGLES

### Beautiful 1834 Quarter Eagle MS64 Prooflike, McCloskey-A Popular Classic Head Type Coin

**4007** **1834 Classic MS64 Prooflike NGC.** Large Head, Breen-6140, McCloskey-A, R.3. The Classic Head design made its debut in 1834, to mark a change in weight of the U.S. gold coinage. This change was necessary to halt the exportation and melting that plagued the old-tenor gold coinage. From a mintage of 112,234 pieces, the 1834 quarter eagle is one of the most available dates of the Classic Head design. The date is available in all grades, making it a favorite choice for type collectors, as well as gold specialists.

The present example is a beautiful specimen of this first-date-of-issue coin. The fields are deeply reflective, and the devices are strongly impressed. Handling marks are minimal for the grade. Overall eye appeal is outstanding. Census: 6 in 64 Prooflike, 2 finer (11/08). (#77692)

### Frosty 1836 Quarter Eagle McCloskey-D, MS64

**4008** **1836 Script 8 MS64 PCGS.** McCloskey-D, Head of 1835, Breen-6143, R.2. From a later state of the dies as evinced by the fine die break extending from the rim, through star 6, across the L of LIBERTY, over Ms. Liberty's hair, and finally terminating in the field between the final two stars. It is all too often stated that the 1836 Script 8 two and a half is more commonly encountered than the Block 8 variant. While this is true in a broad sense—PCGS has certified 501 Script 8 pieces and only 160 Block 8 examples, all grades considered—the two subvarieties are comparable in rarity in grades of MS64 or finer. In fact, the PCGS *Population Report* indicates a scant population of only 16 examples of the Script 8 type in MS64 with one piece finer—an MS65. The Block 8 entry shows 10 coins at the near-Gem level with four better pieces, including an MS66 quarter eagle (11/08).

The current example exhibits frosty surfaces and rich, apricot-gold coloration throughout. Save for the typical weakness in the reverse shield, this piece is well struck and—all positive attributes combined—exudes ample eye appeal.
*From The James Mossman Collection.* (#7694)

# LIBERTY QUARTER EAGLES

## Scarce, Low Mintage 1842-C Two and a Half, MS61

**4009** **1842-D MS61 NGC.** Variety 3-F. Only one die marriage is known for the issue, hardly a surprise since a mere 4,643 pieces were struck. This example was an early emission from the dies, since repunching is apparent beneath the bases of the 18 in the date. The strike is pleasantly sharp, with only unimportant softness noted on the shield lines and the curl beneath the ear. Minor, shallow, and mint-made planchet flaws are present near star 12, above the eagle's left (facing) shoulder and head, and beside the R in AMERICA. The borders display bright cartwheel luster, while the fields are mildly prooflike. The surfaces are remarkably free of identifiable marks. Census: 4 in 61, 1 finer (11/08). (#7725)

## Rare Date 1849-D Quarter Eagle Tied for Finest Graded, MS62

**4010** **1849-D MS62 PCGS.** From a small mintage of 10,945 pieces, the 1849-D quarter eagle is much rarer than the other Dahlonega issues of the late 1840s. Most examples seen are in medium level circulated grades, with full Mint State coins being very rare. The coin offered here is an example of Doug Winter's variety 11-M, characterized by the high date. The 11-M is the more available of the two varieties.

The present coin is tied with seven coins at NGC for the honor of finest certified. The surfaces exhibit rich, satiny luster, and the strike is one of the sharpest seen on a Dahlonega coin. There is some weakness on the reverse rim, as often seen on this issue, but crisp detail shows on all the central features. Outstanding eye appeal makes this coin worthy of a place in the most advanced collection of Southern gold. (#7754)

## Attractive 1855-D Quarter Eagle MS61, One of Two Finest Certified

**4011** **1855-D MS61 NGC.** Variety 18-M. The only variety known of this year. The 1855-D quarter eagle, having a mintage of 1,123 pieces, is the second rarest issue behind the 1856-D two and one-half dollar (Douglas Winter, *Gold Coins of the Dahlonega Mint, 1838-1861*, Second Edition, p. 131). Winter goes on to say that the '55-D is also the second rarest coin struck at this mint in terms of the total number of pieces which exist. When available, it is most often seen in Very Fine condition. Coins grading higher are rare to extremely rare.

NGC/PCGS population data underscore the rarity of the 1855-D quarter eagle. The two services have certified 54 examples, ranging in grade from Fine 12 to MS61. Three pieces are given an MS60 rating, and two MS61 (both NGC). The offering in the present lot is thus one of the two finest known.

Winter indicates that the 1855-D is one of the more poorly struck Dahlonega quarter eagles. Our example displays sharp definition on Liberty, save for the usual softness in the curl above the ear. The stars are also strong, with all exhibiting complete radial line detail. The eagle's left (facing) leg is weak, as always, but most of the remaining detail is fairly sharp. Typically weak dentilation is noted on the reverse, but about two-thirds of the segments are visible on the obverse.

A medley of attractive apricot-gold and mint-green patina runs over both sides, each of which is accented with whispers of lilac. Minimal marks are visible on surfaces that retain a fair amount of luster for the grade designation. (#7776)

## Rarely Offered 1859-D Quarter Eagle, MS61

**4012** **1859-D MS61 NGC.** Variety 21-L. An Uncirculated representative of this popular final year D-mint. The surfaces on this coin are bright and semi-reflective with lighter yellow-gold coloration and striking deficiencies that mirror the example just offered, but are a bit more pronounced. There are no planchet distractions worthy of mention and the most recognizable post-minting feature is a short hairline scratch that extends horizontally from the base of Liberty's neck to a point just above star 1. Seldom is the 1859-D quarter eagle offered for sale in mint condition. Census: 6 in 61, 2 finer (11/08). (#7789)

# PROOF LIBERTY QUARTER EAGLES

## Low Mintage 1865 Quarter Eagle
## Perhaps 15 Pieces Extant
## PR62 Cameo

**4013** **1865 PR62 Cameo NGC.** From a minuscule proof mintage of only 25 pieces, this issue boasts one of the lowest production figures for the decade. Experts estimate a surviving population of fewer than 15 pieces. Jeff Garrett and Ron Guth note the population data is deceptive for this issue, as many resubmissions have occurred. The tiny proof mintage is under additional pressure, because the business strike coinage of this date also had a small mintage, and is one of the rarest dates in the Liberty Head series.

The present coin is one of the finest surviving examples of this rare date. Brightly reflective fields contrast dramatically with the frosty devices to produce the attractive Cameo effect. A few scattered handling marks are consistent with the grade. Census: 1 in 62 Cameo, 3 finer (11/08).

*From The Findley Collection.* (#87891)

LIBERTY
1899

A 15% BUYER'S PREMIUM ($9 MIN.) APPLIES TO ALL LOTS.

## Stunning 1899 Quarter Eagle, PR68 Ultra Cameo

**4014 1899 PR68 Ultra Cameo NGC.** For various reasons—some quite obvious—certain issues are subject to multiple resubmissions to third party grading companies. The result is that the population data is less valuable as a research tool. Garrett and Guth comment in their *Encyclopedia of U.S. Gold Coins:* "The certification services have graded more than 250 examples of the 1899 Liberty Head quarter eagle in proof. Obviously, this includes rampant resubmissions. There are probably around 100 examples of the date known in proof." Considering the total mintage of 150 1899 proof quarter eagles, the Garrett-Guth estimate of extant survivors is consistent with the level of attrition typically observed with turn-of-the-century proof gold issues. The same authors documented just 49 auction appearances for this issue between 1991 and 2005, with the grades of those coins averaging PR63. And that's where the current offering parts company and enters a league of its own.

Jet-black fields burst into a display of brilliant reflectivity when rotated under a light source. The resulting contrast with the excessively frosty devices makes for a stunning show of beauty and unimaginable preservation. NGC's grade determination was obviously further influenced by the bold strike of this specimen. The resulting aesthetic quality seems incomparable, even though NGC has recorded eight examples at the PR68 Ultra Cameo level (11/08). However, as stated above, the *Census Report* data is clearly skewed to the high side, caused by resubmissions of those in pursuit of a higher grade.

At the PR68 Ultra Cameo tier, one would assume that the submitter would accept the lofty grade and be satisfied. Such is not the case. Since 2004, the population at this level has increased four-fold. Were the six additions to the *Census Report* new coins or simply resubmissions? That question can only be answered by the original submitters. We also note that five pieces have been awarded the seemingly impossible grade of PR69 Ultra Cameo within the series of proof Liberty quarter eagles. The dates of those Superb Gems are concentrated around the 1899 issue: one 1898 coin, three 1900 examples, and one 1901 piece. Therefore, one can easily conclude that it is possible for an 1899 PR68 Ultra Cameo Liberty two and a half to eventually make it into a PR69 Ultra Cameo holder, especially considering that the distinction between the two grades is nearly indistinguishable.

The current specimen is the finest 1899 proof quarter eagle to ever cross the block at Heritage. That's significant when one considers the mindboggling parade of rarities we have offered over the years. The next finest pieces were two PR67 coins that were part of two separate auctions over 10 years ago. Additionally, this piece represents only the second PR68 Ultra Cameo Liberty quarter eagle—regardless of date—to be offered in one of our sales. The other coin was an 1894 example that was part of our July 2005 Signature Sale held in conjunction with the ANA convention in San Francisco. All things considered, aggressive bidding competition is sure to ensue when this Superb Gem proof is called at auction. (#97925)

## Charming PR65 1903 Quarter Eagle

**4015** **1903 PR65 PCGS.** A gorgeous Gem proof that exemplifies the 1902-and-later "Brilliant Era" of proof Liberty gold coinage, gleaming as it does with lemon-gold mirrors. The strike is razor-sharp, and the few tiny disturbances visible to the unaided eye were present during its creation, such as a curling lint mark at the eagle's right (facing) wingtip. Uncommonly high quality for this proof issue of just 197 specimens and a coin that deserves serious consideration for the collector beginning to build a quality cabinet of 20th century proof gold. Population: 18 in 65, 6 finer (11/08). (#7929)

## Spectacular 1907 Quarter Eagle
## Last Year of the Series
## PR67 Cameo

**4016** **1907 PR67 Cameo NGC.** The Liberty Head design was discontinued after 1907, being replaced by Bela Lyon Pratt's incuse Indian Head type in 1908. Collectors often save examples of the first and last dates of coin types. Being the last date of the type has increased the coin's popularity, and may account for the survival of several superb specimens, such as the present coin. The recorded proof mintage of 1907 quarter eagles was 154 pieces. Perhaps 100 examples survive today.

The present coin is a stunning example of this scarce issue. The pristine fields are deeply mirrored, and contrast boldly with the strongly impressed design elements. Eye appeal is outstanding. Census: 17 in 67 Cameo, 8 finer (11/08). (#87933)

## INDIAN QUARTER EAGLES

### Sharply Defined, Lustrous MS62 1911-D Two and a Half

**4017** **1911-D MS62 NGC. CAC.** The strike is uncommonly bold on this luminous lemon-gold Indian quarter eagle key, with excellent definition on the Indian's necklace and the eagle's feathers. The mintmark is similarly crisp, an important consideration. Hints of aqua appear in the hollows of the portrait, and a touch of tan is seen over the reverse high points. Light, scattered abrasions in the fields preclude a finer designation. Still, this coin remains appealing and immensely desirable.

Few issues combine low absolute mintages with high series popularity in the manner of the 1911-D quarter eagle. Its mid-five-figure mintage stands out from issues that all have production numbers over 200,000 pieces, and demand for better examples, particularly lightly circulated and Mint State coins, is great. (#7943)

## Captivating 1911-D Gem Quarter Eagle

**4018** **1911-D MS65 PCGS. CAC.** The 1911-D two and one-half dollar, with a mintage of 55,680 circulation strikes, is the lowest-mintage date in the Indian Head quarter eagle series, and is the first of only three mintmarked issues (the others being the 1914-D and the 1925-D). David Akers, in his *A Handbook of 20th century United States Gold Coins, 1907-1933*, revised and expanded Second Edition by Jeff Ambio, writes:

> "In terms of total number of coins known, the 1911-D is the rarest Indian Quarter Eagle. Most examples are in lower Mint State grades, and coins that grade MS60 to MS62 are actually offered fairly regularly in the market. MS63s are seldom available, however, and the 1911-D is rarer any finer."

PCGS and NGC population data show a high frequency of 1911-D quarter eagles in the MS62 to MS64 grade levels (approximately 2,600 specimens). We suspect that a relatively large number of these are coins resubmitted in hopes of attaining a higher grade. In any event, the population falls dramatically from near-Gem to MS65, where about 85 pieces have been graded, and five finer.

The present Gem offering displays orange-gold color tinted with light green, along with pleasing luster. A precision strike leaves strong definition on the design features, including the feathers on the bonnet and the eagle's shoulder; the mintmark is also sharply defined, which is a real plus for a 1911-D. A couple of minute, inoffensive marks in the raised, exposed upper right reverse field may barely deny an even higher grade. The CAC green-label confirms the captivating eye appeal. Population: 17 in 65, 3 finer (12/08). (#7943)

## THREE DOLLAR GOLD PIECES

### Gorgeous Gem 1854 Three Dollar Gold

**4019** **1854 MS65 PCGS.** This first year of issue saw the only six-figure mintage for the odd denomination, with Philadelphia pumping out the vast majority of the pieces struck. Many examples were saved, but even among the unworn survivors, few match up to this amazing Gem. Vibrant, swirling luster enlivens generally sun-gold surfaces that show ample peach and orange elements. The strike is boldly executed, and the fields are refreshingly free of the wispy marks and more overt abrasions that mar so many otherwise attractive examples. Population: 17 in 65, 8 finer (11/08).
*From The James Mossman Collection.* (#7969)

### Challenging Choice AU 1855-S Three Dollar Piece

**4020** **1855-S AU55 NGC.** In its first calendar year of operation, the San Francisco Mint struck all gold denominations except the three dollar. This omission would avoided in 1855 by a small emission of 6,600 pieces. Those coins went into circulation, since bankers preferred the more convenient double eagle. NGC and PCGS combined have certified just five 1855-S gold dollars in Mint State, the single finest as MS63. Although the present coin has more than its share of apricot-tinged luster, Liberty's hair and the wreath display light wear. Both sides are devoid of consequential marks. Census: 16 in 55, 15 finer (11/08). (#7973)

## Important, Low Mintage 1881 Three Dollar, MS62

**4021** **1881 MS62 PCGS.** Those who believe that the 1911-D quarter eagle is a low mintage issue need consider the 1881 three dollar piece. Only 500 business strikes were produced, and even if the 54 proofs are also included, the mintage is less than 1% of the emission of 1911-D quarter eagles. Yet, both issues trade for approximately the same value in MS62 grade. True, the 1911-D benefits from key date status within a collectible gold series. But in an era when any Mint State three dollar piece is subject to powerful demand as a gold type, a decidedly better date such as the 1881 provides excellent comparative value. Not surprisingly, given its small mintage, the present piece is prooflike. The lemon-gold surfaces are void of identifiable marks, and the strike is fully brought up. Liberty's profile is lightly clashed within the reverse wreath. Population: 8 in 62, 12 finer (11/08). (#8003)

## MS63 1881 Three—Lowest Mintage in Series

**4022** **1881 MS63 PCGS.** The 1881 three dollar is one of the scarcest in the series. Of the 40 issues produced, this date is one of only seven with a recorded population of under 100 pieces at PCGS (11/08). Of course with a mintage of only 500 coins—the lowest in the entire series—this is not surprising. Dave Bowers and Doug Winter, in their *United States $3 Gold Pieces* (2005), estimate that between 100 to 150 business strike 1881 threes have survived in all grades. The same authors suggest that only 20 to 30 of the extant population are true Mint State pieces.

This Select Uncirculated three displays red-gold coloration with pleasing reflectivity in the fields. A couple of minor copper toning spots are noted on the T of LIBERTY and above the E of AMERICA on the obverse, with similar patches on the reverse below the 3 of the denomination and on the upper left (facing) wreath. The spots are common to the issue are the result of improper alloying. Population: 7 in 63, 5 finer (11/08).

*From The Findley Collection.* (#8003)

# PROOF THREE DOLLAR GOLD PIECES

## Rare Date 1860 Three Dollar Gold Piece
## Estimated 10-12 Pieces Extant, PR65

**4023** **1860 PR65 NGC.** Ostensibly, 119 proof three dollar gold pieces were delivered by the coiner on April 5, 1860. However, the issue's appearances on the market are extremely infrequent. Numismatists believe most of these proofs went unsold, and were melted at the Mint. Walter Breen speculates that many specimens were later spent or carried as pocket pieces until they became indistinguishable from business strikes. In *The United States $3 Gold Pieces 1854-1889,* Q. David Bowers reports, "Although Mint records state that 119 Proofs were struck, it is likely that no more than 20 were actually distributed. For decades the 1860 has been viewed as a first-class rarity among Proofs in the $3 series." Bowers goes on to estimate a surviving population of 10-12 examples.

Harry Bass noticed that proofs of this date were struck from the same dies as circulation strikes. The dies were simply repolished to produce a mirror finish. This process (called lapping) resulted in some loss of detail in certain areas. Longacre's initials , on the truncation of the neck, were nearly irradiated by the lapping, and the spacing of the obverse dentils was also disrupted.

The present coin is a small masterpiece of the coiner's art. Despite the aforementioned lapping, this coin features a sharp strike. Exquisite detail is present in the hair and feathers on the obverse, and in the wreath on the reverse. The fields are fully reflective, and complement the crisply delineated devices to produce fantastic eye appeal. This specimen is tied with two other pieces, one at PCGS and another at NGC, for the honor of finest certified. Census: 2 in 65, 0 finer (11/08). (#8023)

## Rarely Encountered 1860 PR66 Cameo Three Dollar

**4024** **1860 PR66 Cameo NGC.** The 1860 three started with a small mintage of only 119 proofs. The Bowers-Winter reference on the series from 2005 speculates that "most were never sold and were later either melted or placed into circulation." This would be consistent with the large-scale meltings that occurred with the various proof silver series struck in 1859 and 1860—apparently the Mint overestimated its ability to sell proofs to collectors of the day. The production date for proof threes is interesting as well: January 31. This production date means the Mint had eleven full months to sell 119 proof examples of this odd and popular denomination and could not, further underscoring the probability of meltings of proofs.

Another interesting aspect of the proof 1860 three dollar is that these pieces were struck from regular circulation strike dies. Again, according to the Bowers-Winter reference, "The dies were resurfaced and given a mirror finish. This was first pointed out by Harry W. Bass, Jr. The relapping caused further reduction of the J.B.L. initials and resulted in inconsistent spacing of the dentils on the obverse in certain areas."

Probably only 10 to 12 proofs are known today out of the original mintage of 119 pieces (minus the unknown number melted). There are three other PR66 Cameo coins certified by NGC and none by PCGS (11/08). We have to wonder how many of the four listed by NGC are actually resubmissions of this same coin as we can well imagine someone thinking this piece has a shot at an even higher grade. The fields are deeply reflective and set up a strong cameo effect against the thick mint frost over the devices. The fields are also slightly uneven because of the relapping of the dies prior to striking the run of proofs. As one would expect from this date, there are a few tiny lint marks on each side, but actual contact is highly restricted, as one would expect from a PR66. A slight area of porosity is noted in the field below UN in UNITED. (#88023)

A 15% BUYER'S PREMIUM ($9 MIN.) APPLIES TO ALL LOTS.

## Amazing 1881 Three Dollar Gold PR64 Deep Cameo

**4025** **1881 PR64 Deep Cameo PCGS.** The 1881 three dollar gold proof marks the beginning of elevated proof mintages for the last decade of the denomination, though the stated mintage of 54 pieces pales in comparison to certain later figures. Few specimens released then have contrast that can compare to that found on this wonderful Choice piece. Gorgeous, sharply struck central devices have no breaks in the frost, though the hollow of Liberty's neck shows a polished area that is consistent with Mint practices of the time. The yellow-gold fields are fantastically reflective, gleaming even at arm's length. Though a few hairlines are visible when the piece is tilted under a light source, the overall eye appeal is grand. Population: 1 in 64 Deep Cameo, 1 finer (11/08). (#98045)

## Low Total-Mintage Date 1885 Three Dollar, PR62

**4026** **1885 PR62 NGC.** With the second lowest mintage of business strikes, with only 801 produced, there is considerable date pressure on the proofs of this date. However, with only 109 proofs struck that does not significantly increase the number of 1885 threes available. A large percentage of the proofs minted appear to have survived, though, with a reliable estimate of 75 to 90 pieces believed extant today. The surfaces on this piece are bright yellow-gold with highly reflective mirrors in the fields. More noticeable than any post-striking defects are the heavy orange-peel surfaces seen on each side. Census: 5 in 62, 11 finer (11/08). (#8049)

## Choice Proof 1888 Three Dollar

**4027** **1888 PR64 PCGS.** The proof 1888 is scarcer than generally understood. The *Guide Book* reports a proof mintage of 291 pieces, but PCGS and NGC (as of 11/08) combined have certified just 220 pieces in all grades. Much of that quantity undoubtedly represents resubmissions over the past 22 years, particularly from PCGS to NGC in attempts to secure Cameo designations. The present piece does have noticeable contrast, particularly on the obverse, but it remains housed in the green label holder where it has resided since the 1990s. It has Breen's diagnostic, a patch of die rust on the neck seen on all 1888 proofs. Attractively toned orange-gold with the deepest shades near the rims. Gorgeously smooth despite a slender, faint grease streak (as made) near the D in UNITED. Population: 29 in 64, 41 finer (12/08). (#8052)

## Splendid 1888 Three Dollar, PR65 Cameo

**4028** **1888 PR65 Cameo NGC.** In 1888 the Philadelphia Mint struck 5,000 business strikes and 291 proofs of the 1888 three dollar gold piece. Apparently every business strike was coined from a doubled obverse die, and every proof was coined from a normal, non-doubled obverse.

The present specimen is a remarkable Cameo proof with fully brilliant yellow-gold surfaces. The fields are deeply mirrored and admirably display the boldly defined and frosty devices. A few tiny planchet flakes and other minute imperfections are of little significance. Census: 18 in 65 Cameo, 21 finer (12/08). (#88052)

LIBERTY
1879

# PROOF FOUR DOLLAR GOLD PIECES

A 15% BUYER'S PREMIUM ($9 MIN.) APPLIES TO ALL LOTS.

# Fabled 1879 Flowing Hair Stella
# Judd-1635, PR61 Cameo

**4029** **1879 PR61 Cameo NGC.** In his 1988 *Encyclopedia*, Walter Breen sardonically attacked the ideas that brought about the stellas and other "metric" patterns of the late 1860s through the early 1880s. He described an "alleged need for international trade coins" and called three members of the House of Representatives—Richard P. Bland, John Adam Kasson, and William Darrah Kelley—an "unholy trinity" dedicated to foisting unwanted proposals for ill-conceived cross-border currencies on Congress and the Mint. As is often the case with Breen's work, however, there is more to the story.

In the European Commission brochure "One Currency for One Europe: The Road to the Euro," a sidebar highlights a number of thematic predecessors to the modern economic union that dominates most of continental Europe:

> "Economic integration between independent states is not new. The Latin monetary union, comprising France, Belgium, Switzerland, Italy and Greece, existed from 1865 until 1927. The Scandinavian monetary union of Sweden, Denmark and Norway lasted from 1873 until 1924. The German *Zollverein* is perhaps one of the most successful examples, beginning with a customs union between German principalities in 1834 and producing a central bank, the Reichsbank, and a single currency, the Reichsmark, in 1875."

By the time the proposal for the stella advanced to the pattern-striking stage in 1879, the Latin Monetary Union had added Spain as a member, the Sweden-Denmark alliance had added Sweden's autonomous political union partner Norway, and the evolution of the German Empire under the leadership of Prussia and its diplomats added political reinforcement to the economic alignment of the previously independent participants in the *Zollverein*.

The United States experienced a degree of influence from these monetary unions, the Latin in particular; after the Mint Act of 1873, the adjustment of the minor silver denominations to a metric standard meant that the weight of pure silver in a dollar's worth of American minor silver (though notably *not* a silver dollar or Trade dollar) was equivalent to the silver weight of five Belgian francs or Italian lire. While certain other actions by the United States could be interpreted differently by viewing them through the lens of European monetary unions, these are likely coincidental. The twenty cent piece, though it would have made a good analogue to the silver "unit" coinage of the Latin Monetary Union nations, was sponsored by Nevada Senator John Percival Jones, who was more concerned with mine owners' interests than international commerce (though the two may have had plenty in common). In addition, the alignment of the American metric standard with the Latin Monetary Union was aided by their already close proximity; as has been noted elsewhere in numismatic literature, the change in weight of the minor silver pieces of the United States in 1873 was so small that properly proportioned planchets of the previous standard were within tolerance for the new benchmarks.

Though the stella as an international coinage concept proved unpalatable to Congress, its manifestation as a golden pattern was a different matter, and the 1879-dated Flowing Hair stellas (most of which were actually minted the following year) were immensely popular with government officials. As a result, the 1879 Flowing Hair stella is one of the most heavily minted American patterns, though unceasing demand for the issue has made the available supply seem tiny by comparison. This mildly contrasted honey-gold and green-gold piece shows a few scattered faint hairlines in the fields and a pinscratch that runs near-vertically through the left obverse field, but it offers strong overall eye appeal nonetheless. (#88057)

A 15% BUYER'S PREMIUM ($9 MIN.) APPLIES TO ALL LOTS.

# Glorious 1879 Flowing Hair Stella
# Judd-1635, PR64 Cameo

**4030** **1879 Flowing Hair, Judd-1635, Pollock-1833, R.3, PR64 Cameo NGC.** The 1879 Flowing Hair stellas were distributed in three-piece sets to Congressmen along with examples of the Judd-1617 and Judd-1626, two different goloid metric silver dollar designs. According to numismatic legend, about 25 "original" stellas were struck for distribution, and they proved so popular that more sets were restruck in 1880. The most commonly seen figure for the restrikes is 400, but some estimates are higher, making the 1879 Flowing Hair by far the most available of the four varieties: a simple 2x2 matrix, with 1879 and 1880 on one side, and Flowing Hair and Coiled Hair on the other.

Both the stellas and their counterparts in the three-piece sets, the goloid and goloid metric dollars, were the result of the increasing influence of Western silver mining interests and their cohorts, a cabal of Eastern politicians who were trying to increase domestic and international circulation of the precious metal via the guise of *sans*-borders metric and international currency concepts. According to the vision, gold or silver coinage with an "even" metric weight and purity—hence eliminating the need for assay testing—would obviate the need for individual country-states to issue their own precious metal coinage, a concept that would begin to be realized more than a century later with the introduction of the euro, the first truly international currency.

In the case of the stella, although it appears to be a standard-alloy gold coin, its purported "metric" alloy was composed of a "lot of gold with a little bit of silver" and the whole alloyed with copper.

Therein lay a major flaw.

Both the goloid metric silver dollars, which purportedly contained a "lot of silver with a little bit of gold [about 4%]," and the stellas were indistinguishable from their standard-coinage-alloy counterparts. That is, *they would have been indistinguishable,* even if they had been struck in those unusual alloys. The small amounts of added silver or gold were insufficient for visual detection, an instant invitation for forgers to manufacture lower-value imitations of the real McCoy.

We say "would have been indistinguishable" because we firmly believe that no 1879 Flowing Hair gold stellas were ever made as "originals" in that metric alloy. Rather, they were struck on regular .900 fine gold planchets rolled out to 80% of the thickness of a half eagle, accounting for the striations seen on all known examples of the 1879 Flowing Hair stella.

Another, more fundamental flaw lay in their reliance on intrinsic value to equal a number of international currencies. Like any bullion coin, its intrinsic value as measured in Austrian florins, French francs, or Dutch guilder fluctuated over time, and in this way it had no ready advantage over the more-familiar U.S. gold eagles and half eagles.

Regardless of the original intent or misconceptions behind the creation of the stellas, today they are among the United States' most desired and reverse numismatic treasures. While the 1879 Coiled Hair and both 1880 versions are seldom offered and fabulously expensive, the 1879 Flowing Hair is available for a price, and always in demand.

This piece shows glorious, rich golden-yellow color and bold eye appeal. The striations are visible through Liberty's cheek and brow on the obverse, and on the high points of the star on the reverse, particularly the lower segment where the strike through CEN(TS) is somewhat soft. Otherwise, there are few signs of contact or other distractions. A wonderful acquisition to finish off that gold type set.

*From The Omaha Collection.* (#88057)

A 15% BUYER'S PREMIUM ($9 MIN.) APPLIES TO ALL LOTS.

# Memorable 1879 Flowing Hair Stella, PR64 Cameo
# Judd-1635, Pollock-1833

**4031 1879 Flowing Hair, Judd-1635, Pollock-1833, R.3, PR64 Cameo PCGS.** The late 1870s was an interesting time in the history of America's coinage, especially with regard to experimental issues. Dr. Wheeler H. Hubbell, a citizen and inventor, pitched his patented precious metal alloy to congress. Dubbed "goloid metric alloy," Hubbell's concoction was a mixture of 5.46% gold and 84.54% silver—equal in value, but in different quantities—alloyed with 10% copper. He subsequently proposed another similar alloy by the same name. This mixture of gold and silver is referred to as a sym-metallic alloy and was first suggested by Senator Hunt in 1851.

The intended purpose of the goloid metric alloy was to allow for a weight reduction of the U.S. silver dollar from 412.5 grains to 385.8 grains, while maintaining the same intrinsic value (Pollock, 1994). That was one of two motives for the new metal mixture. Don Taxay opined in 1976 that "sym-metallism was believed by its adherents to be the only way to settle the age-long rivalry between the two metals, one or the other of which was constantly disappearing from circulation." Both were valid justifications for the proposed use of the alloy in our nation's circulating coinage, yet in the end Congress rejected the idea due to the fact that the goloid pieces had an identical appearance to the standard silver coinage of the time, and the opportunity for deception was too great.

Concurrently, another new coinage idea was being considered by Congress. John A. Kasson, the U.S. envoy and minister to Austria, proposed a plan to ease the burden of conducting business between America and five prominent European nations: Austria, France, Italy, Spain, and The Netherlands. His idea was to become known as the stella, or four dollar gold piece. The proposed coin was to be congruent to the popular issues of the aforementioned countries, but fluctuating exchange rates rendered the plan infeasible. Nonetheless, patterns designed by Charles Barber were struck at the Philadelphia Mint in late 1879 and early 1880 for distribution to members of Congress and others with ties to the Federal Government. Researchers maintain different opinions regarding the total number of Flowing Hair four dollar patterns struck in gold (Judd-1635), but it would appear that the mintage of this variant was between 600 and 700 examples. The ninth edition of *United States Pattern Coins* by J. Hewitt Judd (2005) indicates a certified population of 482 coins. Since that time NGC and PCGS have certified a combined total of 518 specimens (9/08), some of which are undoubtedly crossover submissions or resubmissions of the same coin. Considering the number of known examples that are grossly impaired and therefore not included in the population data, the high figure of 700 pieces seems more reasonable than the traditionally accepted total of 425 patterns released by the Mint.

Many of the Flowing Hair stellas were distributed in sets with two other pattern coins—an 1879 goloid dollar (Judd-1617) and an 1879 goloid metric dollar (Judd-1626)—both struck on planchets composed of Hubbell's proposed alloys. The USPatterns.com website elucidates the three-coin sets:

> "Charles Barber created 2 dollar and 1 Stella designs as part of this testing. 15 sets were made for the Congressional Committee on Coinage presumably using the goloid alloys. These were apparently popular with congressman and another 400 sets were ordered which are believed to be of 'standard' silver and gold. These sets were available to the congressmen at $6.10. Unsold sets were later offered to the collecting world for $15."

Contemporary accounts place the value of the sets higher than the $15 suggested by USPatterns.com. Our research brings to light a small entry in the July 1880 edition of *Mason's Numismatic Visitor:* "Stella and Goloid Patterns. These nondescript coins, or pattern pieces are now held at forty dollars, for the set of three." We find no record of how the three-pattern sets were packaged, assuming that they were in the first place. Perhaps the sets were systematically broken apart by the non-numismatist recipients over the ensuing years, with many being cleaned "to make them nice and shiny" along the way.

Fortunately, the current offering has remained in proper custodianship over the past 128 years and is essentially as minted. This orange-gold stella also appears to be a relatively early strike based on the existence of mirrored fields which contrast nicely with the frosty devices on both sides. Planchet striations—common to nearly every extant Judd-1635—are observed on Liberty's portrait and a small abrasion is noted above the star adjacent to the tip of her headband, thus serving as a pedigree marker for the sake of posterity. A memorable Flowing Hair stella, without deliberation, and one of the highlights of this sale. (#88057)

A 15% BUYER'S PREMIUM ($9 MIN.) APPLIES TO ALL LOTS.

# Striking 1879 Flowing Hair Stella, PR65 Cameo
# Judd-1635, Pollock-1833

**4032 1879 Flowing Hair, Judd-1635, Pollock-1833, R.3, 6, PR65 Cameo PCGS.** In 1879, production of the new silver dollar coin hit the eight-figure mark while lesser denominations—with the exception of the cent—saw precipitous reductions in the mintage of coins. With the business of regular coinage somewhat stabilized, three native Englishmen worked side-by-side at the Mint to create over a dozen pattern designs. Chief Engraver William Barber and his son, Assistant Engraver Charles E. Barber, were likely still adjusting to the addition of George T. Morgan to the design department. Morgan had been referred to Mint Director H.R. Linderman by London Mint Director Charles Fremantle, after Linderman sought his advice regarding the availability of talented die sinkers in England. Linderman had lukewarm confidence in the father-son Barber team. Ted Schwarz, in a November 1975 article in *The Numismatist*, quotes a letter from the mint director to Fremantle: "The engraving of coinage and medal dies has not been brought to much perfection in this country. In England it appears to have reached a standard equal if not superior to that of any other country." Morgan began working at the Mint in October 1876 and within a year had developed a series of half dollar patterns that would soon transform into the famous Morgan dollar that was minted in vast quantities from 1878 through 1904, and again in 1921.

William Barber died unexpectedly on August 31, 1879, but not before he had managed to produce four patterns for the year—his final creation was likely the Judd-1626 Goloid Metric dollar. The death of his father and other factors likely impacted Charles Barber's performance, as he only engraved five 1879-dated designs, compared to the eight patterns produced by Morgan. The final months of 1879 found a Mint without a chief engraver at the helm, as a successor had not yet been selected. Both Morgan and Barber sought the position, but in typical Mint—or government in general—fashion, the torch was passed to Charles Barber in early 1880.

The proposed coinage designs for 1879 included an unusual denomination—a four dollar gold piece that was denominated as a "stella" by the Committee of Coinage, Weights, and Measures in 1879 (*United States Pattern Coins* by J.H. Judd, ninth edition). Fittingly, a large star was selected by the same committee as a symbol of the denomination—stella is the Latin word for star—and as a national emblem. Andrew Pollock, in his *United States Patterns and Related Issues* (1994), reproduces a February 1879 letter from Alexander Stephens, chairman of the aforementioned committee, to Secretary of the Treasury John Sherman. In that letter, Stephens offers a suggestion for the reverse design: "The reverse—'United States of America. Four Dollars. E Pluribus Unum. Deo est gloria,' and a large star emblazoned, in the words, 'One stella, 400 cents.'"

Which engraver actually designed and cut the reverse die for the stella patterns is not known. Based on the date of Stephen's letter, the elder Barber cannot be ruled out, although the style and mediocre workmanship is more reminiscent of Charles Barber's hand than the other two engravers. With more certainty, most numismatic researchers and pattern specialists associate the Flowing Hair stella obverse to Charles Barber and the Coiled Hair design to George Morgan. Barber's Flowing Hair design is unnatural, particularly in the area of Miss Liberty's forehead and chin. Morgan's Coiled hair design, by comparison, is more balanced and realistic. We know that Morgan studied head modeling in-depth while at the Birmingham School of Art in England, whereas Barber developed his craft only through his apprenticeship to his father. Further evidence that the Flowing Hair design is the work of Barber can be observed by examining Liberty's headband; the letters of LIBERTY were applied by hand, but with poor spacing and positional relationship to each other, whereas Morgan's LIBERTY motto was artistically implemented.

The example offered here exudes abundant eye appeal. Deeply mirrored, orange-gold fields contrast beautifully with lighter honey-gold, frosty design elements, justly earning a Cameo designation from PCGS. Without the aid of magnification, we observe only splendidly preserved surfaces with no flaws worthy of mention. Intense examination reveals light planchet striations well concealed within Liberty's hair, but they are less pronounced on this piece than most other stellas that we have observed. PCGS has certified seven 1879 Flowing Hair stellas at the PR65 Cameo level, with 15 finer if including three specimens designated as Deep Cameo (12/08). (#88057)

# Magnificent, Deeply Patinated 1879 Flowing Hair Stella PR66 Cameo, Judd-1635

**4033** **1879 Flowing Hair, Judd-1635, Pollock-1833, R.3, PR66 Cameo PCGS.** The stella, or "golden star," is one of America's most curious coins. It is rare enough in its own right (condition aside) that it has been the dream of most collectors to own one, in any grade, even an off-metal experimental strike—a dream that mostly goes unfulfilled, and always has. The stella had its origins in controversy, and remains controversial. Yet its rarity remains undeniable, as does its desirability—and, to many eyes, its unusual beauty, born of European influence yet distinctly American.

Although its story has been told many times, it remains intriguing. When the monetary laws of the fledgling nation were promulgated in the 1790s, it was the national bird from which the gold coins took their name. The system of reckoning for the most precious of our money was founded on the concept of tens, named the eagle, half eagle, and quarter eagle. It remained pure for over half a century, until the flush of newly discovered gold in California created the need for an even larger coin, immediately named the double eagle, as well as a clamor for a precious gold dollar, exactly 1/10th the intrinsic value of the original eagle. Commercial demands on the West Coast seemed satisfied. Nothing more seemed needed, and in fact most gold coins went into hiding across the land during the frequent periods of financial unrest—including the depression that followed the War of 1812 and various bank panics. Yet, a novel denomination, the three dollar gold piece, which is sometimes called the Indian Princess, came into existence in 1854, reputedly to ease the purchase of postage stamps, then three cents apiece. But the three dollar was never truly popular and essentially died as a coinage type upon the outbreak of the Civil War, although it saw a brief resurgence in 1878. With all these kinds of gold coins, many of them out of circulation in hard times, why then should there ever have been a four dollar gold piece?

The name proposed for this coin in 1879 was the fancy version of our other national emblem, used on our flag since the beginning, the star. On the "face" side the image was to be Liberty, but as she never had appeared before. Charles Barber styled the Flowing Hair type, and his rival at the Mint, the British-American designer George Morgan, decided to coil Liberty's hair into a bun, not unlike the image that portrayed Queen Victoria on certain English coins at the time. Thus were born two versions. Specifics of the intrinsic content of the coin occupy the spot normally given to the obverse legend, digits and letters set among small stars (each five-sided, similar to the jumbo one that occupies the center of the reverse). Why these were placed on the coin at all, along with the inspiration for the coin itself, are central to understanding why the stella is such a rarity.

After the Civil War, nothing but paper money and tokens circulated, as well as copper, white-metal, and bronze minor coins. Precious metals went into deep hiding. The Comstock Lode flooded silver back into the commercial system in the early 1870s, and there was suddenly so much silver that it fell in value in terms of gold. At the same time in Europe, bimetallism was giving way to the gold standard for the backing of paper currency. Thus, gold was again more precious, and silver less so. To use the tons of silver ore, the U.S. silver dollar was reborn, and the Trade dollar invented, but it was not enough. Representatives of Western mine interests pushed for an internationally tradable silver coinage, and all sorts of patterns for silver coins resulted from this in the late 1870s, many of them conceived on the metric system popular in Europe but unfamiliar to Americans.

Rep. John Kasson wished to push the Mint's "needs" even further, and proposed the idea of a gold coin containing silver as an increased alloy, a coin that might compete in Europe with such pieces as the French 20 franc gold coin. He and others urged the acceptance of so-called goloid metric dollars and even a new double eagle made of this special alloy, but it was the four dollar gold piece that might compete, they felt, most satisfactorily with the European equivalents. Kasson's approaches to Congress succeeded in orders given to the Philadelphia Mint's talented die-engravers, Barber and Morgan, to come up with ideas fitting to the metric concept. The results were unappreciated in their day, and what was essentially a brilliant idea (to foster international trade) quickly died after just a few "samples" were coined. Restrikes were made for collectors not long after the original patterns, but the stella remains one of the rarest of all U.S. gold issues. Superb examples are very rare, because when they first appeared they were casually handled, and even disliked. Some were used by Congressmen in the barter that has been famously described many times. It is only the passage of time that reveals the genius of the idea, and the beauty of its few precious remnants in their (silvery) golden glory.

This magnificent example shows deeply mirrored fields that contrast sharply against the thickly frosted devices. Each side shows pronounced reddish color, an unusual occurrence as most stellas are bright yellow-gold with their silver alloy. One of the finest Flowing Hair stellas known and a rare opportunity for the dedicated gold collector. Population: 9 in 66 Cameo, 2 finer (10/08).

## Condition Census 1880 Flowing Hair Stella
## PR66 Cameo, Judd-1657

**4034 1880 Flowing Hair, Judd-1657, Pollock-1857, High R.6, PR66 Cameo NGC.** Year in and year out, the four dollar stellas have been among the auction price leaders in the entire U.S. numismatic market. Patterns that are nonetheless collected alongside the regular gold coin series, the stellas' beauty, rarity, and larger market appeal compared to most other patterns have led them to set one price record after another. Of the Top 250 Auction Prices as published in the 2009 *Guide Book,* stellas hold 17 of those records. It seems only a matter of time before a high-grade stella joins the "Million Dollar Club"; the current *Guide Book* record is $977,500. That record is for an 1880 Coiled Hair stella in PR66 Cameo, certified by NGC, that we offered in our FUN Signature Sale (Heritage, 1/2005, lot 30044).

The 1879 Flowing Hair stellas are by far the most plentiful of the four stella designs, with coinage estimates ranging from 400-plus up to 700-800 on the high side. This include the supposed production of 15 "originals" in 1879 lacking striations and a second, subsequent 1880 production of hundreds of coins to meet the demand for the popular patterns. The 1879 Coiled Hair and both of the 1880 types, Coiled and Flowing Hair, are extremely rare. The *Guide Book* maintains that 12 1879 Coiled Hairs are known (making it the rarest of the four), with 17 of the 1880 Flowing Hair (second rarest) and 18 of the 1880 Coiled Hair.

The 1880 Flowing Hair stellas were one of Charles Barber's designs, while the Coiled Hair versions were designed by Barber's more-talented assistant engraver, George T. Morgan. On the obverse the head of Liberty, hair flowing down below her neck, faces left, with the inscription (each character separated by stars) 6 G .3 S .7 C 7 G R A M S around the rim. She wears a coronet with the word LIBERTY in her hair; the date 1880 is below. On the reverse (common to all 1879 and 1880 stellas) a five-pointed star occupies the center, bearing the legend ONE STELLA / 400 CENTS. In an inner circle are E PLURIBUS UNUM and DEO EST GLORIA ("God is glory"), with UNITED STATES OF AMERICA and FOUR DOL. around the outer rim.

When one compares the obverse of the 1880 Flowing Hair stellas against the 1879 obverse and that of the 1880 Coiled Hair, one notes that the date is markedly smaller and shifted, nearly touching the lowest hair curls and well separated from the denticles. The date on the 1880 Coiled Hair is large and well-centered between the peripheral legends, the denticles, and the bust truncation. Examination of all four stella types at the same time—something we at Heritage very occasionally have the privilege to do—suggests that all of the devices on both sides *except for the date* were actually in the working hub. In particular, the double-pointed inner vertex on the 3 (on .3 S) is common to all four types, as is the double-punched D on UNITED.

While there is no record of exactly why the 1880 date is different on only the Flowing Hair—and indeed, there is curiously little comment in the numismatic literature regarding the difference—the small digits and their odd, off-centered placement suggests a rush job. It is generally acknowledged that all of the later three stellas—the 1879 Coiled Hair and the 1880-dated types—were clandestine issues, produced specifically as numismatic delicacies for well-heeled collectors and/or Mint personnel, a distinction which is blurry at best.

This coin has gorgeous orange-gold coloration with notable field-device contrast, and there are no mentionable distractions. For pedigree purposes, we note a tiny dotlike planchet indentation, as made, at the juncture of Liberty's chin and neck, and a faint dark toning spot between .3 and Liberty's mouth. This piece shows the striations, here running southwest to northeast, that we believe exist on all stellas, a function of reducing the planchet thickness from five dollar coins to four dollar coins. As of (11/08) NGC has certified five examples of the 1880 Flowing Hair in PR66 Cameo including this piece, with two finer. PCGS has graded one PR66 Cameo, with only a single PR67 non-Cameo finer. As such, the present coin represents a significant opportunity to obtain one of the finest examples of this issue currently available in the numismatic marketplace—a coin that appears destined in the future for even-greater glory. # The Kern-Carter 1880 Coiled Hair Stella, PR62

**4035 1880 Coiled Hair, Judd-1660, Pollock-1860, R.7, PR62 NGC.** The Morgan design. Obverse: Head of Liberty faces left, her hair coiled in a bun atop her head, this coil held in place by a band inscribed LIBERTY. Around, the inscription * 6 * G * .3 * S * .7 * C * 7 * G * R * A * M * S * and below, the date 1880 is from a curved logotype. Evidence of repunching is visible in the upper loop of the second 8 in the date. Reverse: A single large star serves as the central motif, inscribed with incuse lettering ONE STELLA 400 CENTS. Around, in small letters, are the mottoes E PLURIBUS UNUM and DEO EST GLORIA. In large letters, around the border, the legend UNITED STATES OF AMERICA above, and the denomination FOUR DOL. below. Struck in gold with a reeded edge. The D in UNITED is clearly doubled above, as it is on all four dollar gold pieces that we have seen from 1879 and 1880.

George T. Morgan accepted an invitation from Mint Director Henry Linderman to join the staff as assistant engraver in 1876. Earlier he studied at the Birmingham Art School and the South Kensington Art School before taking a position with the Royal Mint in London. At the Philadelphia mint, he worked under Engraver William Barber and later, his son, Charles Barber. Remaining at the Mint until his death nearly 50 years later in 1925, Morgan remained the assistant engraver until his promotion to engraver after Charles Barber died in 1917. There is little doubt that Morgan was more talented than Charles Barber, and there is also little doubt that Barber was jealous of Morgan's talent. Today, Morgan is best known for his Liberty silver dollar that now popularly carries his name, the Morgan dollar. He also created numerous pattern designs, and prepared other designs for the medal department.

This attractive proof has a faint green tint to the yellow gold. The fields are fully mirrored with slight field/device contrast on both sides. Both sides have diagonal striations up to the left on the obverse and up to the right on the reverse, in the same direction on both sides when the coin orientation is considered. Those striae result from the original planchet manufacturing process. Standard half eagle planchet strip was reduced to 80% thickness in the Mint's rolling mills and drawing bench, then planchets were cut using the standard half eagle planchet cutter. It was the process of rolling and drawing the planchet stock that left parallel striations on the planchet strip. We have never seen a gold Stella without the striae, although on some it is extremely faint.

The 1880 Coiled Hair issue is clearly the rarest of four varieties. In past rosters, we have only been able to account for eight different examples, but have now added a ninth example from the Dallas Bank Collection. For many years it was believed that just 10 pieces were struck, but it is more likely that 20 pieces were originally coined. A general rule for proof gold pieces from the mid to late 1800s is that approximately half the original mintage survives. Like the 1879 Coiled Hair and 1880 Flowing Hair coins, the 1880 Coiled Hair is a major rarity from an extremely small mintage. Only the 1879 Flowing Hair Stella could be called anything close to common, and that is the issue most often chosen by type collectors who want a single example of the Stella. Of course, advanced specialists will want all four varieties, and are advised to take advantage of this offering.

**Roster of 1880 Coiled Hair Stella:**

1. DuPont Specimen. Proof-66 (PCGS). Sotheby's (9/1982), lot 252, $102,300; Superior (8/1991), lot 707 $440,000.
2. Delp Specimen. PR66 Cameo NGC. Stack's (11/1972), lot 792 $35,000; Stack's (Summer 1997 FPL) offered as part of a four piece set for $875,000; Heritage (1/2005), lot 30444, $977,500.
3. Trompeter Specimen. Gem Brilliant Proof. B. Max Mehl (6/1947), lot 2603 sold as part of a set for $3,850; Grant Pierce; 1976 ANA (Stack's, 8/1976), lot 2920 sold as part of a set for $225,000; Stack's (12/1981), lot 1139, $135,000; Ed Trompeter Collection (Superior, 2/1992), lot 136 $264,000; Superior (8/1992), lot 599; Stack's (10/1995), lot 1548, $308,000.
4. Eliasberg Specimen. Proof-65. Louis E. Eliasberg, Sr.; Louis E. Eliasberg, Jr. (Bowers and Ruddy, 10/1982), lot 319 $99,000; Holecek Family Trust (Stack's, 10/2000), lot 1625.
5. Memorable Specimen. Proof-64 (NGC). J.F. Bell Collection (Numismatic Gallery, 3/1948), lot 282; Stack's (3/1999), lot 136; Bowers and Merena (1/2000), lot 352.
6. **Kern Specimen. PR62 NGC. The present specimen.** B. Max Mehl (5/1950), lot 245 sold as part of a set for $4,100; Amon Carter, Sr.; Amon Carter, Jr. (Stack's, 1/1984), lot 634 $72,250; Richmond Collection (David Lawrence, 7/2004), lot 1306; Superior (7/2005), lot 425.
7. Davies Specimen. PR61 NGC. Paramount (2/1975), lot 547 $67,500; Bowers and Ruddy Rare Coin Review #26, p. 64; Heritage (1/2000), lot 7519; Bowers and Merena (3/2004), lot 2620.
8. Dallas Bank. Impaired Proof. The Dallas Bank Collection (Sotheby's and Stack's, 10/2000), lot 363.
9. Lilly Specimen. Smithsonian Institution.

*From The Omaha Collection.* (#8060)

## Popular AU53 1795 Small Eagle Five, BD-3

**4036** **1795 Small Eagle AU53 NGC.** Breen-6412, BD-3, High R.3. Obverse State c, Reverse State b, a late state notable for the crack from the rim to the E in UNITED (noted in Bass-Dannreuther as a possible "graver's spike") and extensive die lapping on the obverse. The most prominent obverse diagnostic is noted at the right, with the Y of LIBERTY and the two closest stars all conjoined; reverse with wreath opening between STATES and OF.

The BD-3 variant of the 1795 Small Eagle half eagle is a celebrated type coin that has achieved almost universal recognition among collectors of 18th century coinage. To quote Bass and Dannreuther in their *Early U.S. Gold Coin Varieties*:

> "Although [the BD-3] is the common variety of 1795 Small eagle coinage, one must realize *common* [italics theirs] is a very relative term. Even if there are 200 extant for this pairing, it is still a rare coin. There are several tens of thousands 1909-S VDB Lincoln cents in existence and many numismatists call that coin rare. There is no doubt that there are fewer than 1,000 Small Eagle 1795 half eagles still available to today's collectors—combining all the 12 varieties!"

Though the early coin connoisseur may call the BD-3 *scarce* rather than rare, the point still stands. This AU53 coin is a pleasing representative, yellow-orange with soft glimmers of remaining luster in the faintly abraded fields. A small scuff is noted just past the stars on the left obverse, and modest wear crosses the high points of each side; still, a fundamentally pleasing example.
*From The Martin L. Diffenbaucher, Jr. Collection.* (#8066)

## Appealing 1795 Small Eagle Five Dollar AU55, Breen-6412, BD-3

**4037** **1795 Small Eagle AU55 PCGS.** Breen-6412, BD-3, High R.3. John Dannreuther and Harry Bass, Jr., in their treatise titled *Early U.S. Gold Coin Varieties: A Study of Die States, 1795-1834*, list the key identifiers for this variety: on the obverse, the tip of the 5 in the date barely overlies the drapery, star 1 is below and touches the curl, star 11 overlies the right diagonal of Y in LIBERTY and joins star 12; on the reverse, a palm leaf touches the bottom of the U in UNITED, another touches the right serif of the left foot of N and extends past the center of that letter, the upper leaf extends to the left foot of I, and there are four berries on the branch, two each side, inside and out.

The authors estimate a mintage of 2,000 to 3,000 pieces for the variety, and 8,707 to 12,106 for the date. They also suggest 175 to 225 examples of the variety to exist in all grades.

The fields of this Choice AU specimen exhibit semiproof-like fields that offer modest variance with the devices at certain angles. Yellow-gold surfaces display a slight greenish cast, and an occasional blush of apricot. Except for light high-point wear, sharp detail is visible on the design elements, including most of Liberty's hair and the eagle's wing and tail plumage. The presence of a few light circulation marks does not take way from the coin's overall appeal. This is an excellent candidate for a high-grade type collection. Encapsulated in a green-label holder.

*From The James Mossman Collection.* (#8066)

***See: Video Lot Description***

## Attractive 1795 BD-3 Half Eagle, AU58 ★

**4038** **1795 Small Eagle AU58 ★ NGC.** Breen-6412, BD-3, High R.3. Die State c/b. Bass-Dannreuther dies 2-B. The Y in LIBERTY and star 13 touch star 12. Since this obverse is used on three varieties for the year, attribution is narrowed to BD-3 by noting the location of the eagle's left wing in relationship to the E in AMERICA—they touch only on this variety.

The Bass-Dannreuther reference suggests that Reverse Die B must be known in a terminal state, since Obverse 2 was later paired with Reverse C; the logic being that Reverse B "must have incurred some injury to force its retirement." Dannreuther continues: "Bass had two examples of this variety and knew this obverse was used again, so he anticipated finding a coin with a fatal reverse crack." This reasoning assumes that dies were only retired when severely damaged. While that was often the case with our nation's early coinage, there were exceptions. Remarriages of dies are well known in most of the early series, proving that dies were removed from the press for various reasons and then mated with another die, or even the same die, at a later date. Eventually some dies would simply vanish—for lack of a better term—from usage. They may have suffered irreparable damage, or they may have been retired for other reasons. For example, an excess supply of dies may have simply kept a few tools out of the rotation. Or, maybe the damage was to the shank and not the die face, so evidence of a terminal die state would not be visible on the last few coins struck. There are many possibilities, although we may never know the exact scenario that occurred in the early days of our first Mint.

This example is, however, from the last known state of the reverse die. The Bass-Dannreuther book states that Reverse State b shows a crack from the edge to the E of UNITED, and is referred to in that reference as a "graver's spike or die crack." The flaw noted is clearly a die gouge and not a break. In fact, on this piece we note two other engraver marks above the E and an additional spike emanating from the right side of the adjacent T—neither of which are noted in any previous writings, to our knowledge. Perhaps, then, the current offering represents the latest die state known for the BD-3 marriage.

This early five dollar was awarded the coveted ★ designation by NGC to denote exceptional eye appeal. It is likely that the lovely semiprooflike surfaces of this piece influenced the grader's decision. Since we know that Obverse 2 was lapped towards the end of the BD-3 die marriage, this example was probably struck shortly after the performance of that maintenance task. This well struck, green-gold survivor is one of only four 1795 half eagles to receive a ★ and the other three pieces are all Mint State, including an MS66 piece. (#8066)

## Historic BD-3 1795 Half Eagle, MS61 First-Date-of-Issue

**4039** **1795 Small Eagle MS61 PCGS.** Breen-6412, BD-3, R.3. There are 12 varieties of 1795 dated Small Eagle half eagles known to collectors today. There are also three varieties of Heraldic Eagle half eagles with this date, but they were produced in later years, using leftover obverse dies. The present coin is a representative of the BD-3 variety, characterized by the joining of star 11 to the Y in LIBERTY on the obverse and the reverse with four berries and the last leaf ending at the foot of I. The BD-3 is the most available variety for the year, with approximately 200 specimens extant.

The 1795 Small Eagle half eagles were the first gold coins produced by the Philadelphia Mint. Production was limited in the early years by the lack of a dependable bullion supply. The Mint depended on depositors to supply all the precious metal used in coinage operations. The bullion was coined to order for each depositor and, when the supply of planchets ran out, the coiners removed the dies from the screw press, and went on with other work. The sporadic nature of this coinage probably contributed to the large number of varieties produced in the early years. Pairs of dies were used haphazardly to coin a particular delivery, then stored randomly. The coiner might chose a different combination of obverse and reverse dies for the next production run, unthinkingly creating a new variety in the process.

The present coin is a particularly attractive example of this exciting variety from the early Mint. The strike is sharp in all areas, even the feathers on the eagles breast are clearly delineated. This example retains its original luster and color, with only a minimum number of handling marks for the grade. Type collectors and early gold specialists will compete enthusiastically for this pleasing specimen. (#8066)

## High-End 1798 Five Dollar Gold Piece Large Eagle, Large 8, MS62, BD-4

**4040 1798 Large Eagle, Large 8, 13 Star Reverse MS62 NGC.** Breen-6428, BD-4, R.4. The present coin is from the BD-4 variety, easily identifiable by the cuds formed on the reverse die. The largest cud has formed above the O in OF, and another is centered above the space between E and S in STATES. It is unusual to find cuds on the reverse die, since this die was usually placed in the anvil position when striking coins. If a small piece of the die broke off, it would likely remain in place in this lower position, while a broken piece in the hammer die would be more likely to fall out, leaving a space for the cud to form in the broken spot. Of course the placement of dies in the hammer and anvil positions may not have been standardized at this early point in Mint history. This example demonstrates how little we know about procedures in the early Mint.

The present offering is an outstanding example of this early issue. All devices are finely detailed, except for one weak star on the reverse. The surfaces are free from important blemishes, and the luster is impressive. An interesting and well preserved specimen from the early days of the Mint. Census: 8 in 62, 6 finer (11/08).
*From The Findley Collection.* (#8078)
***See: Video Lot Description***

## Pleasing 1798 Half Eagle, AU55 Rare Variety, Breen-6427, BD-3

**4041 1798 Large Eagle, Large 8, 14 Star Reverse AU55 NGC.** Breen-6427, Miller-26, BD-3, R.5. Eight varieties of the half eagle denomination are known for the year 1798. The present coin is a representative of the BD-3 variety, characterized by the large 8 in the date and the 14 star reverse. In *Early U.S. Gold Coin Varieties,* John Dannreuther estimates the mintage of the BD-3 variety as being in the 2,500-3,500 piece range, out of a total mintage of 24,867 coins for the year. Whatever the initial production figure may have been, examples are decidedly rare today, with perhaps three dozen specimens surviving in all grades.

The coin offered here is a delightful specimen of this rare date. Extremely light, even wear shows on the highest points of the design, with all important detail still strongly delineated. Much original luster and color are present on all surfaces. Surface marks are minimal for the grade. Census: 3 in 55, 7 finer (11/08). (#8080)

A 15% BUYER'S PREMIUM ($9 MIN.) APPLIES TO ALL LOTS.

## Challenging 1799 BD-5 Five Dollar, AU55

**4042** **1799 Large Stars Reverse AU55 PCGS.** BD-5, High R.5. Although nine die marriages are known for the entire mintage of 1799 half eagles, most price guides combine all of those varieties into one listing. Of course when one considers an "entire" production of less than 14,000 pieces, it is understandable that all of the varieties are grouped as one. Compiling the low and high mintage estimates for each die marriage provided in the Bass-Dannreuther reference, we arrive at a mintage of between 9,300 and 13,600 five dollar gold pieces dated 1799. Early coin specialists, however, are more concerned with the estimated number of survivors than how many were recorded by the Mint, or actually produced. Bases on research by Bass and Dannreuther, only between 185 and 249 1799-dated half eagles are extant in all grades. It is logical, therefore, that few numismatists even attempt to collect this issue by individual die marriage.

An estimated 25 to 35 examples of BD-5 are believed to exist. This variety is easily narrowed to one of two varieties for the year based on the large star punch used on the reverse die. Small stars were used on the other seven reverse dies. The second Large Star variety is BD-8, which is slightly rarer than BD-5. For exact identification purposes of this die marriage, the last 9 in the date is recut and the final A in AMERICA touches both the stem and the eagle's claw. Straw-gold coloration and lightly circulated surfaces define this example. Population: 5 in 55, 9 finer (11/08). (#98081)

## Popular 1800 Half Eagle, AU58, BD-2

**4043** **1800 AU58 NGC.** Breen-6438, Miller-42, BD-2, R.3. From a substantial mintage of 37,628 pieces, the 1800 half eagle is one of the most available and affordable half eagles of the Capped Bust Right, Heraldic Eagle design. There have been nearly 200 auction appearances of this date since 1994. The easy availability of this date makes it a prime target for early type collectors.

There are five known varieties of 1800 half eagles. The present coin is an example of the BD-2 variety, characterized by the position of the second A in AMERICA, touching both the eagle's claw and the olive branch. The surfaces are well preserved, with only slight wear on the highest points of the design. Abrasions are minimal for the grade, and shades of mottled green enhance the lovely gold color. *From The Findley Collection.* (#8082)

## Frosty 1802/1 BD-7 Five Dollar, MS63

**4044** **1802/1 MS63 PCGS.** Breen-6440, BD-7, R.5. All 1802 half eagles show bold remnants of a 1 under the final 2 in the date; the result of two 1801 obverse dies being modified as such. The first five varieties for the year are mated with Bass Obverse 1, whereas the final three variants in the emission sequence were struck with Obverse 2. The current offering was produced with a marriage of Obverse 2 and Reverse F—the only die in which the reverse legend was prepared with a defective "T" punch.

Of the estimated 3,000 to 6,000 coins produced from the BD-5 die pairing, only 50 to 65 pieces are extant in all states of preservation, according to the Bass-Dannreuther reference on early gold coinage. The same source indicates that this variety appeared 37 times at auction between 1990 and 2005. Remarkably, we offer another example of this scarce die marriage in the current sale—that coin being an AU55 survivor.

Originality is the most memorable feature of this Mint State specimen, which also boasts frosty surfaces and boldly defined details. A superficial abrasion extending from star 3 to Liberty's hair is all that likely precludes an even finer designation. For future identification purposes, we note an area of darker toning that encompasses the field between the eagle's left wing and the ribbon on the reverse. Population: 29 in 63, 19 finer (11/08).

*From The James Mossman Collection.* (#8083)

## Desirable 1802/1 Half Eagle
## Dramatic BD-8 Overdate, MS64

**4045** **1802/1 MS64 NGC.** Breen-6440, BD-8, R.4. All known varieties of the 1802 half eagle are overdates. There are two obverse dies married with seven different reverses to produce a total of eight varieties for the year. The BD-8 variety features the high overdate obverse, paired with a reverse showing the second S in STATES positioned over the far right of the cloud. This design is the most available variety for the year, with perhaps as many as 200 examples extant. In later die states, a noticeable cud forms above ITE in UNITED, but the present example is from an early state and shows no trace of the cud.

Half eagle gold coins were first minted in 1795. Mint Engraver Robert Scot created the Capped Bust Right design for use on the obverse in that year, and the design remained virtually unchanged until 1807. Scot also designed the Heraldic Eagle reverse, inspired by the Great Seal of the United States, in 1797. One variety of 1795 half eagle is known with the Heraldic Eagle reverse, but the variety was actually coined circa 1798, using an obverse die leftover from the earlier year. The Heraldic Eagle reverse was also used with minimal changes until 1807.

The present coin is representative of the best craftsmanship of the early mint. Fine detail shows in all design elements, particularly in the hair and stars on the obverse, and in the eagle's breast feathers on the reverse. Undimmed luster radiates from the surfaces, creating fantastic eye appeal. A few tiny handling marks are consistent with the grade. Census: 15 in 64, 1 finer (11/08). (#8083)

A 15% BUYER'S PREMIUM ($9 MIN.) APPLIES TO ALL LOTS.

## Wondrous Gem 1802/1 Half Eagle, BD-8

**4046** **1802/1 MS65 PCGS. CAC.** Breen-6440, BD-8, R.4. The 2 in the date is high and touches the bottom edge of Liberty's bust. (Two obverse dies are known for this year and denomination, with either a centered 2 or a high 2 in the date. Both of these obverse dies show the 2 repunched over a previous numeral 1, indicating that both were made from unused 1801-dated dies.) The 1 in the date lacks its top serif. The lower right serif of E in LIBERTY is repunched. A long spine on the reverse runs from a leaf into the R in AMERICA.

This die state is described by John Dannreuther (2006) as "***Obverse state c***, further clashed; ***Reverse State b,*** **clashed, lapped, crack** at UNI(TED)". (*Early U.S. Gold Coin Varieties, A Study of Die States,* 1795-1834; p. 255) A later die state is also known, with a prominent cud situated on the reverse rim above ITE in UNITED.

The accepted mintage for this date, distributed between eight different die marriages, is 53,176 pieces. Of that total number, Dannreuther estimates that between 13,750 and 22,250 coins were produced of the so-called "High Overdate" type, consisting of three distinct die varieties: BD-6, BD-7, and BD-8. Of all eight die marriages, BD-8 has the highest estimated total mintage, of between 10,000 and 15,000 examples. This variety is also the most available in terms of survivorship, with 150 to 200 pieces believed to be extant.

The surfaces display tremendous mint luster, giving this piece a wonderfully flashy, frosty appearance. The striking quality is good, with Liberty's hair tresses well defined, and exceptionally sharp feathers on the eagle's breast. The bright yellow-gold color is imbued with strong undertones of lime-green, increasing the coin's overall visual appeal. Die clash marks are noted on both sides, including several of the reverse horizontal shield lines that appear within Liberty's hair detail, above the ear. Several paper-thin adjustment marks also occur on the obverse, along with a few trivial nicks and pinscratches in the fields.

Neither NGC nor PCGS has distinguished between the various die varieties, when grading examples of the 1802/1 half eagle. Thus, we do not possess a breakdown of certified pieces; nor do we know how many of the certified populations represent coins that were resubmitted after initial grading. We do know, however, that there are currently only two known Gems: one at NGC and the current coin at PCGS. A single specimen has been graded even finer, at MS66, by PCGS (11/08). This rather astonishing piece, therefore, is one of the three finest-graded examples of the 1802/1, and we anticipate great interest and highly-spirited bidding when it crosses the auction block. (#8083)

## Elusive MS62 1803/2 Half Eagle, BD-4

**4047** **1803/2 MS62 NGC.** Breen-6441, BD-4, R.4. Bass-Dannreuther Die State b-c/c, with the die crack well left of the 1 but no evidence of obverse die clashing. The reverse has unlisted clashmarks above the R in PLURIBUS and between the clouds beneath the E in STATES. All 1803 half eagles are overdates, but BD-4 is struck from a different obverse than BD-1 through BD-3. The underdigit is more prominent, revealing more of the base including the lower left tip of the 2.

This well struck Heraldic Eagle five is impressively unabraded save for minor marks concealed near the reverse stars and on the obverse near stars 4 and 5. Luster dominates the reverse, and fills the obverse legends, stars, and portrait. The eye appeal is imposing, and the present piece provides an important appearance for the early gold specialist.

*From The Omaha Collection.* (#8084)

## High Grade 1803/2 BD-3 Five, MS64

**4048** **1803/2 MS64 PCGS.** Breen-6441, BD-3, R.4. There are four documented varieties of 1802 half eagles—all produced from leftover 1802 dies that were crudely updated with an 1803 date. The first three die marriages of this year were struck from the same obverse die that is quickly identified by the broken lower right base of T in LIBERTY. BD-4 is distinguished by a perfect T in the legend. Attribution of the BD-3 variant is accomplished by observation of the position of the lower left reverse star in relation to the ribbon: on this variety only one star point touches the banner carrying E PLURIBUS UNUM. This is Bass-Dannreuther Reverse B. After striking approximately 7,500 coins, the reverse die was lapped and mated with a new 1803 die to produce a similar amount of BD-4 fives. The result of this maintenance procedure is evinced by the eagle's incomplete right (left-facing) shoulder on the second use of the die. Regarding Reverse B, the Bass-Dannreuther reference makes an interesting observation: "The reverse used here is the first of six varieties that employ this hardy die. Since it cracked in this use, one can conclude that cracking of well-made dies did not cause them to fail as quickly as those produced in the earliest years of the Mint." A quick review of early varieties—regardless of denomination—clearly confirms their suspicion.

The emission sequence of 1802, 1803, and 1804 half eagles is confusing. Even Bass and Dannreuther were not able to provide conclusive evidence of the die chain. They did, however, offer a likely scenario: "... the possible emission sequence for this group of coins [could] be: 1803 (BD-2, 3), 1804 (BD-3), 1803 (BD-4), 1804 (BD-1, 2, 1, 2), and finally the late states of BD-3 (1804)." It is obvious that even though the die construction techniques improved during this timeframe, the correlation of the dates on the dies to the calendar year remained illogical.

The strike on this example is only moderate, but the luster is strong and the eye appeal high. Weakness is noted on the eagle's right leg and on some portions of the milling—both obverse and reverse—and faint adjustment marks are visible on Liberty's bosom. PCGS has certified 322 1802/1 half eagles in all grades, but only 10 have achieved a near-Gem grade determination, with just 3 finer pieces (11/08). (#8084)

## Impressive 1804 Small 8 Five Dollar MS62, BD-3, R.5

**4049** **1804 Small 8 MS62 PCGS.** Ex: Carter Collection. Breen-6443, BD-3, R.5. The following confirm the variety: Obverse: the recut 4 in the date has a "line" under its base, the 1 is blunt (missing the flag); Reverse: the first A in AMERICA touches feather 3 and barely touches 4. Obverse and reverse cracks indicate a later die state.

The peach-gold surfaces of this MS62 example display traces of apricot, more so on the reverse. An attentive strike emboldens the design elements. Crisp dentilation is apparent on both sides, each of which reveals just a few inoffensive handling marks. The most potent luster resides in the recessed areas. (#8085)

## Uncirculated 1806 Five Dollar Round Top 6, 7x6 Stars, BD-6

**4050** **1806 Round Top 6, 7x6 Stars MS61 NGC.** Breen-6448, BD-6, R.2. Bass-Dannreuther Die State b/c. BD-6 is the only Bust Right variety with a 7x6 star alignment, which crowds the right obverse field. It is also the sole Round Top 6 1806 variety, since BD-1 through BD-5 depict a Pointed 6. This Mint State example has substantial luster and minimally abraded fields. The shield shows occasional weakness, but the remainder of the devices are precisely struck. Butter-gold toning is confined to the peripheries. Struck from lightly clashed dies. A worthy Mint State example of this formidable early gold type.
*From The Martin L. Diffenbaucher, Jr. Collection.* (#8089)

## Appealing Near-Gem 1806 BD-6 Half Eagle Round Top 6, Stars 7 x 6

**4051** **1806 Round Top 6, 7x6 Stars MS64 PCGS. CAC.** Breen-6448, BD-6, R.2. In 1806 a minor design change took place, with the star layout modified from eight left and five right to seven left and six right, the layout that continued through the end of the series in 1807. For specialized type collectors, an example of each star layout is necessary, and fortunately, the present BD-6 die variety is also one of the most plentiful of the entire Heraldic Eagle design that began with pieces dated 1795. From 1795 to 1797, layouts included those with 10 stars left and five right, and 11 stars left and five right. Beginning in 1798, all half eagles had the obverse stars arranged with eight left and five right until the final revision in 1806. Therefore, the advanced type collector will want to have four different Draped Bust, Heraldic Eagle half eagles for a complete collection.

A satiny green-gold near-Gem, this piece exhibits considerable pale orange toning on both sides. The excellent eye appeal trumps the minor surface marks and weak definition left of the shield and along the left reverse border. All of the design weakness is directly attributed to faint obverse adjustment marks along the left border, and across the upper hair and lower cap. The rust lump on the upright of R in LIBERTY identifies the obverse as Dannreuther state d, and faint clash marks on the both sides suggest that the reverse is his state e. (#8089)
***See: Video Lot Description***

## Delightful 1806 BD-6 Half Eagle, MS64 Round Top 6, 7x6 Stars

**4052 1806 Round Top 6, 7x6 Stars MS64 NGC. CAC.** Breen-6448, BD-6, R.2. The 1806 Round Top 6 half eagle is clearly the most plentiful individual variety of all Bust Right, Heraldic Eagle half eagles, with countless Mint State pieces known, and numerous other lightly circulated examples. However, few of those are as nice as the present piece, and only a couple finer examples have ever been certified. This is the only known variety with the Round Top 6, and the only 1806 half eagle with the stars arranged seven left and six right.

The present piece is a later die state with a rust lump on the upright of the R in LIBERTY, obverse state d in John Dannreuther's reference. The reverse, which is rotated counterclockwise, has a die crack through the N of UNITED to the arrows, and many prominent radial lapping lines that extend in from the border. The reverse is state c or d. There is no indication of any clash marks that occur in the terminal state, according to Dannreuther, the author of *Early U.S. Gold Coin Varieties, A Study of Die States, 1795-1834*. He described four different die states for the obverse and six for the reverse.

This near-Gem specimen has fully brilliant and frosty yellow luster with tinges of green and rose. A few scattered surface marks on each side are entirely consistent with the grade. The strike is bold, with no apparent weakness on either side. Census: 44 in 64, 2 finer (12/08). (#8089)

## AU58 1807 Bust Left Five, BD-8

**4053** **1807 Bust Left AU58 NGC.** Breen-6453, BD-8, R.2. A decisively struck representative that shows slight highpoint friction on Liberty's nose and forehead. The light green-gold surfaces display luster throughout the stars, legends, eagle, hair, and cap. Both sides are smooth aside from thin marks near the beak and stars 1 and 8. In between Breen-Dannreuther obverse die states c and d, with clashmarks from the shield over the ear and a clashmark from the scroll beneath the eagle. However, there is no evidence of a die crack near star 13, and the reverse is void of clashmarks. A splendidly detailed example of this popular and very scarce early gold type.
*From The Omaha Collection.* (#8101)

## Lovely Select 1807 Bust Left Five, BD-8

**4054** **1807 Bust Left MS63 PCGS.** Breen-6453, BD-8, R.2. This John Reich design was the first for the denomination to move away from Robert Scot's "Capped Head to Right" (sometimes the erroneously named "Turban Head") motif. The present Select example offers outstanding visual appeal and quality. Warm. yellow-orange surfaces show elements of rose and violet close to the margins, particularly at the date area. Wispy abrasions are visible in the fields, yet the portrait is well-preserved. An excellent addition to one's date or type set. For both 1807 Bust Left varieties, Population: 38 in 63, 35 finer (11/08).
*From The James Mossman Collection.* (#8101)

## Late Die State 1808 BD-3 Half Eagle, MS64

**4055** **1808 MS64 NGC.** Breen-6456, BD-3, R.4. The obverse of this Choice Mint State piece has heavy clash marks over the date, wrapping around both sides of the bust. The reverse also has extremely heavy clash marks, including a single line clash mark from the final A to 5D, apparently mistaken by John Dannreuther as a die crack. In Early U.S. Gold Coin Varieties, A Study of Die States, 1795-1834, he wrote: "Reverse State e, believed terminal, reclashed, now with crack from last A of AMERICA through denomination (later stages may exist, but the only example observed is Nebraska III: 1440 conducted by R.M. Smythe)." The Smythe sale was held in May 2000. The present example is probably the terminal die state for the variety, ending the extensive use of the reverse die that began the previous year.

The Capped Bust Left design type was John Reich's redesign for the half eagles, one of the first two coinage designs that he revised. While it had its critics, some who referred to Liberty as his "fat mistress," the design and all of his work are highly popular among numismatists today. The present example, in addition to its importance as a late die state, is also a remarkable quality piece.

Both sides have frosty and highly lustrous yellow-gold surfaces with a hint of green. A couple tiny marks are evident on each side but the overall quality is exceptional. Slight weakness is noted at the left (facing) claw with the balance of detail boldly defined.
*From The Estate of Jack Lee Collection.* (#8102)

## Pleasing 1809/8 Select Five Dollar, BD-1

**4056** **1809/8 MS63 NGC.** Breen-6458, BD-1, High R.3. Only one die pair was produced for the 1809 half eagles, and the obverse is apparently overdated from 1808. We say apparently as the underdate appears to be an 8. However, it could also be a repunched 9, as John Dannreuther and Harry Bass, Jr. (*Early U.S. Gold Coin Varieties*) think it might be.

The brass-gold surfaces of this Select example display hints of light tan, and exude pleasing luster. An attentive strike leaves strong and uniform definition on the design elements, which are nicely centered on the planchet. Most of the dentilation is also bold. A few minor, unobtrusive grazes preclude a higher grade. Diagonal adjustment marks are visible in the upper left reverse quadrant.
*From The Estate of Jack Lee Collection.* (#8104)

## Select Mint State 1810 Five Dollar BD-4, Large Date, Large 5

**4057** **1810 Large Date, Large 5 MS63 NGC.** Breen-6459, BD-4, R.2. Bass-Dannreuther Die State a/a with no evidence of clashmarks aside from a slender raised area (as produced) near star 4. A pleasing example that has smooth fields and good luster. The central reverse exhibits faint roller marks, as struck, but the design is otherwise well impressed. Light honey-gold except at the borders, which offer olive-green tints. Along with the Round Top 1806, the 1810 Large Date, Large 5 ranks among the more available varieties of early gold half eagles. Yet *any* Capped Bust Left example is very scarce in Select condition, and growing demand from gold type collectors ensures that few such pieces are to be found on the bourse. Census: 32 in 63, 39 finer (11/08). (#8108)

## Desirable MS64 1810 Half Eagle
## Large Date, Large 5, BD-4

**4058** **1810 Large Date, Large 5 MS64 NGC.** Breen-6459, BD-4, R.2. Bass-Dannreuther Die State b/b with dentils clashed near star 8 and the peak of the cap clashed near the denomination. A yellow-gold near-Gem that has hints of olive-green near the peripheries. Both sides display unbroken cartwheel shimmer, and the surfaces are carefully preserved, with only faint field grazes and a thin mark near the D in UNITED separating the piece from an even finer grade. The strike is precise at the borders, although the centers show minor incompleteness, which allows a few parallel mint-made roller marks near the shield to persevere through the strike.

BD-4 is available by the standards of First Philadelphia Mint gold coins, but is nonetheless very scarce with full mint luster across the open fields, and without friction on Liberty's curls. Three other varieties of 1810 half eagles are known. The rarest is the *other* Large Date variety, BD-3, which shares the same obverse die but uses a Small 5 to specify the denomination. Dannreuther questions the traditional Small and Large nomenclature. He writes, "Adams and Newcomer ... called the Large 5 a Small 5 because it *is* shorter than the Tall 5. ... The Large 5 is a misnomer; it should have been called the Squat 5 or the Fat, Squat 5." The Tall 5 that Dannreuther refers to is found on BD-1, the 'common' Small Date variety. The Small 5 is shared by the two rare marriages, BD-2 and BD-3, while only BD-4 has a Large 5. The Tall 5 die of BD-1 is reused on the 1811 BD-1.

A majority of collectors have never seen a Choice Capped Bust Left half eagle. As a gold type, examples are highly elusive, relative to later series. The demand for early gold coins has grown substantially over the past decade, as specialized knowledge about their rarity and die varieties has been disbursed. Census: 33 in 64, 6 finer (11/08). *From The Omaha Collection.* (#8108)

A 15% BUYER'S PREMIUM ($9 MIN.) APPLIES TO ALL LOTS.

## Select Mint State 1812 Half Eagle Wide 5 D, BD-1

**4059** **1812 MS63 NGC.** Wide 5D, Breen-6466, BD-1, R.3. Bass-Dannreuther Die State a/a, perfect dies. A beautiful orange-gold example that has blazing luster across the design elements. The open fields are only slightly subdued. Sharply struck throughout, and there are no consequential marks. The familiar curved die scratch within the horizontal shield stripes is strictly as made, and is diagnostic for BD-1. Only two die pairings are known for the 1812, with the Wide 5D BD-1 considered less rare than the Close 5D BD-2. Census: 40 in 63, 43 finer (11/08).
*From The Omaha Collection.* (#8112)

## Lustrous MS62 1813 Capped Bust Five

**4060** **1813 MS62 NGC.** Breen-6467, BD-1, R.2. Pale honey-gold color throughout with abundant mint frost over the surfaces. The strike is strong throughout, and full on the reverse with only isolated areas of weakness on the obverse. There are enough small abrasions on the surface to account for the MS62 grade, yet, unusually, none stands out individually. The Capped Bust half eagle series is one of the most famous in all of U.S. numismatics, and justifiably so, with the unusually high number of rarities it contains. The 1813 is a welcome contrast for collectors as its availability, even in relatively high grades, affords dedicated collectors the opportunity to own a coin of the type. The Mint State grade and eye appeal of this piece make it perfect for such a purpose. (#8116)
***See: Video Lot Description***

## Lustrous 1813 Five, BD-1, MS63

**4061** **1813 MS63 PCGS.** Breen-6467, BD-1, R.2. Quoting mintage figures for most early American coins is as useful as stating how many bottles of a particular fine wine were produced in a given year; many may have been made, but many were also consumed. Such is the case with all Capped Head to Left half eagles minted between 1813 and 1834. The most "common" date in the series is the inaugural 1813 issue. However, only 450 to 650 pieces are believed extant in all grades, per the Bass-Dannreuther reference. Out of a mintage of 95,428 1813 half eagles, that equates to a staggeringly low survivor rate of about half of 1%. This extreme rate of attrition is the result of extensive melting—both by overseas merchants who had accepted these gold coins in trade, and stateside, after lighter gold coins were introduced in 1834.

This conservatively graded survivor exhibits everything one would expect of a Select Uncirculated example. Sharp detail, uninterrupted luster throughout, and undeniable eye appeal. Remnants of planchet adjustment marks are visible on the obverse rim, but are neither immediately obvious or distracting.

# The Celebrated 1815 Half Eagle, MS64, BD-1
## A Classic Rarity, Ex: Garrett

**4062** **1815 MS64 NGC.** Breen-6469, BD-1, R.7. During much of the 19th century, the 1815 half eagle was believed to be the rarest coin in the U.S. federal coinage series. Unlike many of the old-tenor gold issues, the 1815 half eagle does not owe its rarity to the massive gold melts of the 1820s and '30s. With a minuscule mintage of just 635 pieces, the 1815 was rare from its date of issue. One set of dies was sufficient to coin the entire mintage, which was delivered on November 3, 1815. The depositors of gold bullion from which the coins were produced were Thomas Parker, Charles Kalkman, and the Bank of Pennsylvania. The design for this issue was engraved by John Reich, and his secret signature can be seen in a notched point on star 13.

Exactly when the 1815 issue came to the attention of the numismatic community is unknown, but it was squarely in the spotlight by 1865. In his Sixth Semi-Annual Sale, W. Elliot Woodward offered the discovery specimen of the 1798 Small Eagle half eagle and, seeking to impress potential bidders, he compared its rarity to the 1815. George Seavey exhibited his "complete" collection of gold coins to the Boston Numismatic Society in 1869, including a specimen of this date, and the *American Journal of Numismatics* declared the piece to be unique. In these early times, the issue even outshone the 1822 half eagle, of which only three are known. The first auction appearance of this issue was in the Parmelee/Seavey Sale (Strobridge, 6/1873). Parmelee had purchased the Seavey Collection intact, a tactic he often employed, and was using this sale to dispose of his duplicates. Surprisingly, Seavey had two 1815 half eagles in his collection by that time. Unfortunately, the coin was withdrawn from the auction.

By the time of the Bispham Sale (S.H. & H. Chapman, 2/1880), there were four specimens of the date known to the catalogers. The Chapmans listed the coin in the Swedish Mint Museum (discovered when Joseph Mickley visited Europe in the 1870s), the example in the Parmelee Collection (Ex: Seavey), the specimen being offered in the Bispham Sale (a Seavey duplicate), and a fourth example (from Edward Cogan's sale of the Cohen Collection). The number of known specimens gradually increased over the years, but numismatists could only confirm six or seven specimens as late as 1940. Then, the population of 1815 half eagles seemed to explode. In the 1940s and '50s, a flurry of appearances occurred, leaving the pedigree trails hopelessly tangled. Apparently new specimens came on the market at the same time the known examples were being sold and resold. No researcher has successfully established a complete census of known examples since this flood of new appearances, despite the best efforts of Walter Breen, Carl Carlson, and others. Today, experts believe approximately one dozen examples are extant.

Since the early 1990s, most pedigrees of the present specimen have begun with Joseph Mickley. However, in the opinion of the present cataloger, it is unlikely Mickley owned this coin. In his only published numismatic work *Dates of United States Coins and Their Degrees of Rarity,* Mickley omitted any comment on the 1815 half eagle, because he had never encountered one. Mickley collected actively for several years after he wrote this pamphlet, but if he acquired an 1815 half eagle in those years there is no record of it. Further negative evidence can be found in the correspondence between Woodward and T. Harrison Garrett in the early 1880s, when Garrett was actively seeking an example for his collection. In a letter dated January 23, 1883 Woodward wrote, "I have been looking up the subject of 1815 half eagles. I know of one abroad, and I am pretty certain there are three in this country. I knew of one in New York some twenty years ago which I have lost track of, and I am not certain if it is one of those referred to." Clearly, Woodward was referring to the four specimens listed in the Bispham Sale, none of which was a Mickley coin. Woodward sold Mickley's collection in 1867, with the gold portion going to Appleton in a private transaction. The 1815 half eagle was at the height of its fame during that period, and Woodward would surely remember if one had been involved in his sale to Appleton. His failure to mention any such coin to Garrett is telling evidence that Mickley did not have one.

A more likely pedigree for the coin begins with the Mendes I. Cohen Collection (Edward Cogan, 10/1875). According to a salesroom copy of the sale, annotated by William Poillon, the buyer of the 1815 half eagle was Heman Ely. When Woodward later sold Ely's collection, in January 1884, he noted in his lot description that the half eagle in the sale was the one he had lost track of twenty years before and it was the finest known to him. The coin failed to meet the reserve on the day of the sale, so Woodward kept it for stock. H.P. Newlin eventually purchased the coin, which he traded to Garrett in a blockbuster deal in October 1884. From this point on, the traditional pedigree is accurate.

The present coin features an extraordinary strike for such an early issue. Crisp detail is evident on the hair, star centrils and eagle's feathers. Full mint luster is present, and the undimmed gold color catches the eye enticingly. This coin is one of the finest examples of this classic rarity. Census: 2 in 64, 0 finer (11/08).

*Ex: Mendes I. Cohen Collection (Edward Cogan, 10/1875), lot 138; Heman Ely; Ely Collection (Woodward, 1/1884), lot 830; W. Elliot Woodward; H.P. Newlin, private treaty; T. Harrison Garrett, private treaty; Garrett Collection (Bowers and Ruddy, 11/1979), lot 460; Auction '84 (Paramount, 7/1984), lot 901.*

*From The Deb-Ann Collection.* (#8118)

## Desirable BD-1 1818 Five, MS61

**4063** **1818 MS61 NGC.** Breen-6471, BD-1, R.5. The so-called "Normal" dies, without STATESOF or 5D/50 error on reverse. Die State c, with obverse clashed and reverse lapped with several die cracks. Impressively lustrous for this rare die pair with strong detail and warm yellow-gold and peach colors. Minor luster grazes and a few more substantial abrasions visit the fields on each side, yet the overall visual appeal remains powerful. A noteworthy and shining exemplar that should find a place in a similarly graded cabinet of die varieties. Census: 2 in 61, 16 finer (11/08).

## Popular 1820 Square Base 2 Half Eagle, MS65 ★, BD-3

**4064** **1820 Square 2 MS65 ★ NGC.** Large Letters, Breen-6476, BD-3, R.5. Star 1 is distant from the bust, and star 13 does not quite touch the lowest hair curl behind Liberty's head. There are three joined dentils at the rim between stars 8 and 9. On the reverse, the TE in STATES is level.

The 1820 date is among the most curious and interesting of the many fascinating half eagles of the 1820s, if not on a par with the fabulously rare 1822, of which but three examples are known, or the 1825/4, which only has two pieces known. Going by the rarity estimates given in Bass-Dannreuther, from 375 to 476 examples of half eagles from 1820 through 1829 are known, of which the 1820-dated varieties constitute about one-third of the total. (The recorded mintage of 1820 half eagles, at 263,806 coins, was an overlarge one that was never again even approached during the 1820s.) However, since there are nine varieties of 1820 half eagle, all of them individually range from "rare" (R.5) to "extremely rare" (R.7). In fact, of the 25 known die pairings of half eagles dated from 1820 through 1829, one only single die pairing, the R.4 1823 (BD-1, the only known marriage for the year) can be considered less than rare, with an estimated 80 to 100 known survivors.

Focusing on only the varieties dated 1820, the current 2009 *Guide Book* lists three varieties for the year: the Curved Base 2, Large Letters; the Curved Base 2, Small Letters; and the Square Base 2 (all of which are Large Letters marriages; there are no known Square Base 2, Small Letters variants). Bass-Dannreuther lists four varieties with Square Base 2, Large Letters: BD-1, R.7; BD-2, High R.5; BD-3, R.5; and BD-4, High R.7. There are two Curved Base 2, Large Letters varieties, BD-5, R.6, and BD-7, High R.7; and there are three Curved Base 2, Small Letters varieties: BD-6, R.7; BD-8, High R.7; and BD-9, High R.7.

This coin, then, is among the most "common" varieties of Square Base 2, Large Letters, although all are rare. And regardless of the variety this piece is conditionally rare, as only a single Square Base 2 certified MS66 at PCGS is known to exceed the grade of the present example. (The population data are not especially helpful, particularly at NGC, which shows more than four dozen 1820 half eagles unattributed by variety—49 of them in Mint State.)

With so many different dies used in this single year, this piece displays the bright, shimmering prooflike fields one would expect. The devices are also nicely frosted. The striking definition is also complete in all areas, both obverse and reverse. There are no reportable abrasions on either side. All of which adds up to a coin with superior eye appeal for the grade. An outstanding Capped Bust half eagle. (#8125)

## Desirable 1832 BD-1 Half Eagle 13 Stars, MS62

**4065** **1832 13 Stars MS62 PCGS.** Breen-6495, BD-1, R.5. Just two varieties of 1832 half eagles are known, with either 12 or 13 stars on the obverse. The 12 Stars variety is a major rarity with less than 10 examples known. That makes the 13 Stars variety the only collectible die variety of the date, if any half eagle from this period could be called collectible. John Dannreuther estimates that just 40 to 50 examples of this variety are known, while Jeff Garrett and Ron Guth provided a higher estimate of 50 to 75 examples. NGC has certified 16 specimens that grade between AU55 and MS65, and PCGS has certified 15 specimens that grade from AU50 to MS64. The average grade of all those pieces is MS61, placing the present example slightly finer than average.

This example clearly shows a heavily repunched star 4, leading one observer to quip that it is a "14 Star" variety. Both sides have frosty luster with brilliant greenish-yellow gold surfaces, exhibiting great eye appeal. The strike is a little uneven with a weak date, and softness on the upper part of the left (facing) wing. Despite a substantial recorded mintage, there are apparently no observed die states, suggesting that the mintage may have been much smaller than recorded. Any early issue produced at the first mint with a mintage recorded at about 150,000 coins should show some signs of die deterioration, even if only clash marks or die lapping to remove clash marks. This may be an area for further study. Even with substantial melting, the number of survivors should be much greater for the mintage record of nearly all the dates in the 1820s and early 1830s. *From The James Mossman Collection.* (#8156)

A 15% BUYER'S PREMIUM ($9 MIN.) APPLIES TO ALL LOTS.

## CLASSIC HALF EAGLES

### Choice McCloskey 2-A
### 1834 Classic Head Five

**4066** **1834 Plain 4 MS64 PCGS.** Second Head, Breen-6502, McCloskey 2-A, R.2. The first of the new-tenor gold half eagles, the 1834 Classic Head coins of all stripes are the earliest representatives of the denomination to survive in quantity to the present day. This charming Choice representative is among the finest of those, well-defined overall with only a touch of softness evident on the central curls. Warm sun-gold surfaces are satiny and minimally marked. With just three finer examples known to PCGS (11/08), this would be a great example to add to a high-end date or type set.
*From The James Mossman Collection.* (#8171)

### Lustrous 1836 Five Dollar
### MS64, Breen-6508, McCloskey 5-D

**4067** **1836 MS64 PCGS.** Breen-6508, Second Head, Small Date, McCloskey 5-D, R.3. The variety is confirmed by the wide rounded end to the truncation, the double forelock, the 1 in the date at the same level as the 8, and the large 5 in the denomination.

The 1836 half eagle, showing a mintage of 553,147 business strikes, is the second most common date of the type after the 1834, Plain 4 (Jeff Garrett and Ron Guth, 2006).

This near-Gem specimen displays lustrous yellow-gold surfaces laced with hints of light tan. The design features are well defined throughout. A few minuscule obverse handling marks prevents Gem status. Population: 16 in 64, 2 finer (12/08). (#8174)

## Pleasing Near-Mint 1839-C Half Eagle

**4068** **1839-C AU58 NGC.** Variety 1-A—the sole variety of the year—in an earlier die state with no rim cud below the date. This well struck near-Mint piece is surprisingly bright, and the faintly granular lemon-gold obverse surfaces exhibit few significant faults. The 1839 half eagle issue is one of just two struck at the Charlotte Mint to bear the 'C' mintmark on the obverse, and the only issue of the Coronet design to do so (the other, the 1838, has a Classic Head portrait); as such, it is immensely popular with both type and date collectors of Southern gold. Census: 8 in 58, 13 finer (11/08). (#8192)

# Gorgeous 1842-C Small Date Half Eagle, MS62
# Prized Early Die State

**4069** **1842-C Small Date MS62 PCGS.** Variety 4-C. Die State I. Any 1842-C half eagle is a valuable and scarce coin, but when die varieties are considered, one sticks out: the Small Date, which forms a distinct, small minority of survivors. Doug Winter, in his *Gold Coins of the Charlotte Mint*, gives an excellent summation of this prized rarity:

> "There were two varieties of half eagle struck at the Charlotte Mint in 1842. It is easy to determine that the Small Date coins were struck first as they show the same date size as on the Charlotte half eagles dated 1840 and 1841.
>
> "The 1842-C Small Date is the rarest Charlotte half eagle. It is also the second rarest Charlotte coin, trailing the excessively rare 1849-C Open Wreath gold dollar. This variety has long been considered a full-fledged member of the Charlotte half eagle series and no date set is truly complete without an example."

Out of a blanket mintage of 27,578 pieces, Winter assigns a mintage of just 4,595 pieces to the Small Date variety, and comparison to nearby issues reveals how small this figure is, even in the context of early Charlotte half eagles. Further contemplating the scenario is the question of strike, which further subdivides the Small Date variety into State I and State II coins, based on whether or not the coins show a rim cud near 12 o'clock on the reverse. Winter speculates that the perfect-die coins are part of " ... the first 2,555 pieces which were produced on March 22, 1842."

Like an Olympic athlete chasing gold, the collector who was outbid on the opportunity to own the Elrod specimen of the 1842-C Small Date half eagle, sold by Heritage at the 2005 FUN auction, has had to wait four years for a similar opportunity to come again. This lot, while not the Elrod coin (note the absence of the small abrasion below the chin, visible in the Heritage photography as well as the images in Akers and Winter, for which it served as the plate coin), displays considerable visual and technical appeal, making it a worthy rival to the Elrod example. With the offering of this MS62 1842-C Small Date half eagle, Heritage has had the privilege of handling both pieces at that level certified by PCGS (11/08), with none finer at that service.

Many of the same features that made the Elrod piece so desirable and pursued are replicated here. As a Die State I (or Perfect Dies) piece, it has sharper detail than the majority Die State II pieces, with excellent definition on the central hair and without even a trace of the typical striking softness below the lower part of the coronet. Surfaces are minimally abraded, though a handful of the usual wispy marks are present in the yellow-gold to orange-gold fields, and the luster is frosty and delightful with a hint of reflectivity. The eye appeal is, in a word, gorgeous. The dedicated Southern gold specialist will not want to miss this opportunity. As Winter writes in his summation for the issue, "The 1842-C Small Date is the rarest half eagle from this mint and it is the rarest collectible coin from Charlotte." The Charlotte Mint's best date in the best state–what collector could ask for more?(#8208)

## Sharply Struck 1847-C Half Eagle, MS61

**4070** **1847-C MS61 PCGS.** Variety 9-E. On this variety, the 1 in the date is close to, but does not touch the bust. The 7, on the other hand, firmly touches the truncation. The 1847-C is one of the more common half eagles from the Charlotte Mint. It is easily located in Very Fine through low-end About Uncirculated. It is rare in mid and high-end AU, and extremely rare in Mint State (Douglas Winter, 1998).

Attractive yellow-gold color covers both sides of this MS61 specimen, each of which gives off a slight greenish cast. The design elements are much better defined than ordinarily seen, including the eagle's neck and leg feathers, areas that are often weak. The surfaces reveal somewhat prooflike tendencies, and show a scattering of light, grade-limiting marks. Population: 3 in 61, 3 finer (12/08). (#8233)

## Seldom Encountered 1862-S Half Eagle, AU55

**4071** **1862-S AU55 PCGS.** With a mintage of only 9,500 pieces, the 1862-S five should be scarce on that basis alone. What makes it especially elusive, however, is not only the low mintage but also the heavy usage of coinage in the western states from the 1850s through the 1870s. That explains why the 1862-S is a significant condition rarity and this AU55 piece is one of the finest examples obtainable. There are, in fact, coins that are finer but these represent only four pieces and the highest certified is an MS62.

This is a sharply struck piece except for the neck of the eagle, which is normal for S-mint gold. Each side has deep reddish color, and there are no obvious abrasions on either side. Noticeable traces of mint luster can be seen around the devices. Population: 3 in 55, 1 finer (11/08). (#8293)

## Lustrous 1863-S Half Eagle, AU58

**4072** **1863-S AU58 PCGS.** Much has changed in the field of early gold over the past 30 years since David Akers published *United States Gold Coins, An Analysis of Auction Records*. Volume IV, covering half eagles from 1795 to 1929, was published in 1979. At the time, Akers discussed the 1863-S half eagle:

> "The 1863-S is very rare in any condition and, as the auction data shows, most specimens that have appeared on the auction market were in the Fine to VF range. In my experience, this date is at least as rare as the 1863 and actually more rare in high grade. It is comparable to the 1858-S and 1860-S in overall rarity and is equally impossible to obtain in choice condition. Only one specimen as high as AU has ever been sold at public auction and I have personally seen only one piece better than EF, a coin in the possession of Robert Johnson at the 1973 Boston ANA that was subsequently sold to Harry Bass."

The specific coin that Harry Bass purchased was one of six different examples that Bass owned, including an AU55 PCGS coin that was purchased at the 1973 ANA, and sold in the May 2000 sale of his collection. The present example is finer than any of the six that Bass acquired.

In his auction study, Akers noted 31 appearances that ranged from Good to AU, with an average grade of VF-21. A decade later, Walter Breen wrote in his *Complete Encyclopedia* that the 1863-S half eagle is "prohibitively rare above VF." There is little doubt that Breen made liberal use of the earlier Akers study when he wrote his comments about individual gold issues.

There were 17,000 of these coins minted and most or all of them immediately entered circulation, much the same as nearly every gold coin struck in San Francisco. This specimen has bright lemon-yellow surfaces with a trace of greenish coloration. The surfaces are faintly marked, consistent with the grade. An outstanding example of an issue that, today, can still be called prohibitively rare above XF. Population: 2 in 58, 1 finer (12/08). (#8295)

## 1869-S Five Dollar, MS62
## Finest Certified and Probably Finest Known

**4073** **1869-S MS62 PCGS.** Even though 31,000 pieces were struck of this issue, attrition must have taken a heavy toll as '69-S fives are seldom located above VF condition. Mint State pieces are of the highest order of rarity with only two pieces certified by both of the major services. This is the finest example known. The surfaces are covered with soft mint frost and the orange-gold color of the coin also displays an accent of lilac patina on the obverse. A bit irregularly struck with the most noticeable areas of softness on the curls on Liberty's hair over her face, the eagle's neck, and the fletchings on the upper arrow. This is a significant opportunity for the collector of rare date gold to acquire the finest known example of this rare issue. (#8318)

## Pleasing 1873 Closed 3 Five Dollar, MS66

**4074** **1873 Closed 3 MS66 NGC.** The 1873 half eagle mintage is reported as 112, 480 business strikes, but that includes both the Closed and Open 3 varieties. Drawing on estimates from Harry X Boosel, Walter Breen (1988) reports the Closed 3 coinage to be about 49,280, and the Open 3 about 63,200.

The partially prooflike fields of this Premium Gem establish modest variance with the satiny motifs. Yellow-gold surfaces exhibit well struck design elements, and reveal just a few minute contact marks. All in all, this piece possesses great technical quality and aesthetic appeal. Census: 2 in 66, 0 finer (11/08). (#8329)
***See: Video Lot Description***

## Flashy 1877 MS61 Prooflike Five Dollar Mintage: 1,132 Pieces for Circulation

**4075** **1877 MS61 Prooflike NGC.** Whether a business strike or a proof, the 1877 five dollar is exceptionally rare. Only 1,132 strikes were produced for circulation and a paltry 20 proofs were struck. The difference between the two formats is not always immediately obvious, but close study shows the business strikes have a centered date and rust pits on the neck of Liberty whereas the proofs show rust pits on the chin of Liberty.

With such a small mintage it is not surprising that prooflike business strikes exist. NGC has certified seven Prooflike coins from AU55 to MS66. This is the second MS61 Prooflike we have handled (out of only two certified). The fields are remarkably deep in their mirrored reflectivity and the striking definition is strong on the obverse with slight softness noted on the eagle's plumage. A few small abrasions are scattered over each side but none are worthy of singular mention. Census: 2 in 61 Prooflike, 2 finer (11/08). (#78342)

## Lovely Near-Mint 1879-CC Half Eagle

**4076** **1879-CC AU58 NGC.** The 1879-CC five dollar saw a mintage of 17,281 pieces. Douglas Winter writes in his *Gold Coins of the Carson City Mint* that this is the first Carson City half eagle that is relatively easy to obtain, especially in lower grades. He goes on to say, however, that it is very scarce in the higher circulated grades and extremely rare in Mint State. The rarity of Uncirculated '79-CC half eagles is evident from NGC/PCGS population figures that reveal one MS60 piece, five MS61s, and none finer.

The present near-Mint State coin retains ample luster, and displays pretty brass-gold patina. An impressive strike leaves strong definition on the design elements, except for the typical weakness on the upper left obverse denticles. A few minor circulation marks are of little consequence. Census: 31 in 58, 4 finer (11/08). (#8349)

## Blazing 1907 Half Eagle, MS67

**4077** **1907 MS67 NGC.** From an initial mintage of 626,100 pieces, the 1907 half eagle is one of the more available dates of the Liberty Head series. This date was the penultimate year for this long series, as Bela Lyon Pratt's Indian Head design began production in 1908. The date is available in all grades, making it a favorite among gold type collectors.

The present coin is a magnificent example of this design type. Vibrant luster radiates from the flawless green-gold surfaces. The devices are frosty and fully detailed, with fully separated hair strands, crisp star centrils, and distinct individual stripes and bars in the shield. The stunning overall eye appeal makes this piece unforgettable. Census: 7 in 67, 2 finer (11/08). (#8416)

# PROOF LIBERTY HALF EAGLES

## 1842 PR64 ★ Cameo Five Dollar
## Ex: Farouk
## One of Only Two Proofs Known

**4078** **1842 PR64 ★ Cameo NGC.** Farouk. Unique in collectors' hands and one of only two pieces known. There has been no doubt about the status of this coin and the rarity of this date for at least the last 30 years. In his 1977 *Proof Encyclopedia* Breen made only brief reference to the 1842: "Small date, small letters; first type, probably coined only January-February." This entry was then followed by the roster of the two known coins, one of which is in the Smithsonian.

When David Akers cataloged John Pittman's collection, he was quite a bit more expansive in describing the coin and its die characteristics:

> "There is a die break that literally bisects the reverse; it runs from the bottom rim through the left side of the E in FIVE to the eagle, then exits from the top of the eagle's head past the right side of the T to the rim. Directly below the lowest arrow feather is a lint mark in the field; another lint mark appears at the right side of the E in AMERICA. There is also an unfinished area between the top of the E in AMERICA and the denticles."

Another interesting bit of background information about this coin is how John Pittman acquired it. It is well known he took out a second mortgage on his home in order to go to Cairo in 1954 to purchase coins from Farouk's collection. While taking out a second mortgage is not generally a good idea, Pittman's purchases at the Farouk Sale proved the wisdom of this unconventional decision. This coin was in a lot of 17 other pieces, most of which were early C and D-mint gold. While those coins were also worthy acquisitions, this coin was the main reason Pittman acquired that lot.

There is absolutely no doubt about the status of this piece as a proof when one views it. The fields are deeply mirrored with reflectivity that extends all the way to the denticles. The rims are sharp and squared off on each side. The striking details are absolutely full on all the devices. In short, this is a proof that is fully comparable to those struck 16 years later when commercial production of proof coinage was implemented for sale to collectors.

The surfaces show a few light hairlines, the most notable is in the field out from star 2. Otherwise, the coin is medium orange-gold with a slight touch of lilac. The devices are nicely frosted and present a noticeable cameo contrast against the deeply mirrored fields.

*Ex: Thomas Cleneay; William H. Woodin (displayed at the 1914 ANS exhibit, listed on page 30); Colonel E.H.R. Green; The Palace Collections of Egypt sale-Farouk (Sotheby's, 2/1954), lot 249; John Jay Pittman; Pittman I (Akers, 10/1997), lot 955; Harry Bass; Bass IV (Bowers and Merena, 11/2000), lot 371.* (#88432)

## Exquisite PR65 Ultra Cameo 1898 Five

**4079** **1898 PR65 Ultra Cameo NGC.** As the late 19th century progressed, the nature of American numismatics evolved, with greater sophistication and wealth appearing on the collecting scene with each passing year. One of the fields most affected by this advance was proof gold; previously, many years had had low mintages, but a number of later 19th century issues saw substantial increases in production, often to triple digits. The 1898 half eagle may be either a step back or a step forward, depending on one's interpretation. From Garrett and Guth, *Encyclopedia of U.S. Gold Coins*:

> "The mintage for the Proof 1898 half eagle drops somewhat from the mintages for the previous few years. The number of coins certified, however, is greater. This may be partially due to resubmissions, but the number of coins offered at auction is also higher. Surprisingly, the survival rate for the issue is quite high compared to most rare gold coins."

The numbers may be interpreted multiple ways; while the heightened availability combined with lowered mintage may be indicative of a high survival rate, it could also be that prior years' numbers were inflated, causing their survival rates to seem artificially low. Whatever the actual scenario, there is little doubt that the present Gem is among the most attractive examples imaginable. Exquisitely detailed central devices are richly frosted and sun-yellow, while the glassy fields bring new meaning to the phrase "black gold." Carefully preserved and delightful. Census: 2 in 65 Ultra Cameo, 11 finer (11/08). (#98493)
***See: Video Lot Description***

## Excellent PR65 Cameo 1903 Half Eagle

**4080** **1903 PR65 Cameo NGC.** Most gold proofs struck in 1902 and later are lacking in contrast, in accordance with the alteration of Mint procedures that led to the evolution of the brilliant finish (and later, the satin, matte, and Roman gold finishes as European influences waxed and waned). The present Gem, though it does not offer the thick frost that defined the devices on many earlier proofs, does display substantial contrast between the sharply struck portrait and the gleaming lemon-gold fields. Excellent preservation out of the 154 proofs struck. Census: 9 in 65 Cameo, 10 finer (11/08).
*From The Martin L. Diffenbaucher, Jr. Collection.* (#88498)

## Spectacular 1904 Half Eagle PR64 Cameo

**4081** **1904 PR64 Cameo NGC.** The 1904 half eagle is a rare date in proof, with a reported mintage of 136 pieces. In the *Encyclopedia of U.S. Gold Coins 1795-1933,* Jeff Garrett and Ron Guth estimate only 50-75 examples of this issue are extant. Most survivors seen are semi-brilliant, without the frosty devices seen on earlier years.

The present coin is a deeply mirrored specimen, with stunning contrast on the reverse. The frosty devices are unusual for this issue. The obverse displays sharply delineated, brilliant devices, typical of the date. NGC has awarded the coveted Cameo designation, probably due to the unusual quality of the reverse. (#88499)

## Elegant MS65 1908 Five

**4082** **1908 MS65 PCGS. CAC.** As a first-year issue, the 1908 half eagle experienced a savings bonus to high-grade examples, though this number was not as high as it could have been, owing to the design's initial unpopularity. Select and even Choice examples are readily available for a price, though the 1908 half eagle becomes elusive at the Gem level and is a condition rarity any finer. This immensely lustrous orange-gold piece shows hints of salmon that add vibrancy to the minimally marked surfaces. The strike is bold in the centers with only the slightest hint of softening visible at the margins. PCGS has graded 17 finer examples (11/08).
*From The James Mossman Collection.* (#8510)

A 15% BUYER'S PREMIUM ($9 MIN.) APPLIES TO ALL LOTS.

## Bold 1909-O Indian Five, MS62

**4083** **1909-O MS62 PCGS.** One of the classic rarities of 20th century American numismatics, the 1909-O is elusive in all grades and especially difficult to locate in Mint State grades. Just 34,200 half eagles were struck in New Orleans during the year, the only gold pieces made in the final year of operations at the Louisiana facility.

The typical 1909-O five is well-struck but with a weak mintmark. This piece has a bold and complete mintmark. The typical example has frosty luster. This one has satiny luster. The delicate rose-gold toning is unusual, as most example have light greenish-gold surfaces.

In the revised second edition of *A Handbook of 20th Century United States Gold Coins 1907-1933,* Jeff Ambio writes: "The 1909-O is a challenging issue to locate with strong eye appeal. Luster is usually a bit subdued, and most Mint State examples are confined to lower grades due to scattered abrasions." The revised reference was published late in 2008 by Zyrus Press. In the original edition, David Akers presented his opinion of rarity for each issue in various Mint State grades. In the revised edition, Ambio has taken that another step, and provided actual estimates of surviving population, and value, in four different Mint State grade categories. Ambio also provides a roster of significant examples for most issues throughout the four denominations. Collectors should find the revision every bit as valuable a resource as the original edition. (#8515)

Gorgeous 1913-S Half Eagle, MS65

## Gorgeous 1913-S Half Eagle, MS65 One of the Finest Graded

**4084** **1913-S MS65 NGC.** Five dollar gold pieces struck at the San Francisco Mint in 1913 present a challenge to collectors for two reasons: the issue was poorly made and most of the mintage of coins entered circulation. As a result, relatively few examples are available above the MS62 level and, when found, the quality is usually substandard. The limited availability of this issue is further exacerbated by the fact that many pieces found their way into the melting pots of the late 1930s and subsequent years. All of the above factors are reflected in the NGC *Census Report*. As of (11/08), the example offered here is the only 1913-S to be certified at the Gem level, with a single MS66 piece graded finer. Even near-Gems are challenging, with just five coins thus graded at the MS64 tier. The numbers at PCGS are quite similar.

Savvy numismatists understand that coins listed in the NGC and PCGS population totals do not necessarily represent available examples. In fact, the specimen offered here is the first appearance of a Gem or better 1913-S five at Heritage since we began our online auction archives in 1993. Since that time, we have only offered six MS64 pieces. Even data compiled by John Dannreuther and Jeff Garrett in their *Official Red Book of Auction Records, U.S. Gold Coins 2003-2007* failed to yield a single—all auction houses considered—appearance of a 1913-S half eagle grading finer than MS64, which further defines the issue as a condition rarity. Furthermore, it is apparent that high grade examples of this elusive date are held in firm hands when sold.

The mintmark on the current piece is weakly defined, although the balance of the design is crisp, including the typically soft periphery. The frosty surfaces display a subtle red tinge and have survived without suffering any objectionable abrasions or other visual distractions. This Gem offers connoisseur level quality that would please the fussiest of Indian half eagle aficionados. (#8526)

A 15% BUYER'S PREMIUM ($9 MIN.) APPLIES TO ALL LOTS.

## Lustrous 1914-D Half Eagle, MS66

**4085** **1914-D MS66 PCGS.** Although not a San Francisco Mint product, the 1914-D is nonetheless a scarcer issue among the Indian Head half eagle series, with a skimpy mintage of 247,000 pieces. In 2006, gold pundits Jeff Garrett and Ron Guth noted that this issue—the last of the circulating five dollar gold pieces struck in Denver—"is a scarcer date, and is frequently found well struck even on the feather tips and eagle's chest and wings. The surfaces are less granular and more lustrous than seen on many dates of this series." The present piece is an exceptional exemplar, not only by the standards of the issue, but for the series as a whole; PCGS has certified only 13 Superb Gem pieces—12 in MS67 and a lone representative in MS68 (11/08).

This coin offers so many superlative attributes that we hesitate to single one out to the detriment of the others. The surfaces are remarkably free of even the most picayune abrasions, from the exposed open fields on the reverse to the highpoints of the Indian's cheek on the obverse. Neither there nor in the left obverse field nearby—the focal points of the obverse—are there any abrasions above the microscopic sort. The color is a pleasing honey-gold laced with tinges of chartreuse iridescence. Generous luster and a bold strike round out the positive attributes of this Premium Gem. A small planchet flaw appears underneath OF on the reverse, but as a pre-strike anomaly it does not affect the grade. More importantly, it fails to affect the enormous appeal of this stunning coin. A spectacular opportunity for the date collector to acquire a top-flight 1914-D half eagle. (#8528)

## Series-Key 1929 Five Dollar, MS62

**4086** **1929 MS62 PCGS.** Frosty surfaces and brilliant yellow-gold luster is the typical appearance for nearly every surviving 1929 half eagle, as exhibited on this piece. Both sides of this piece have a few grade-limiting abrasions, yet not too severe for the numerical level assigned to this piece. Slight weakness is evident on the lower feathers of the obverse, but all of the remaining detail on both sides is sharply defined. This date represents the final year of issue for the denomination prior to the 1933 gold coinage recall and one of the key issues in the Indian Head half eagle series. (#8533)

# PROOF INDIAN HALF EAGLES

## Superb Matte Proof 1908 Half Eagle
## First Year of the New Pratt Design

**4087** **1908 PR67 NGC.** There were few proof gold collectors in 1908. Only 167 proof half eagles were struck, an increase from the 92 proofs produced the prior year. The 1908 quarter eagle had a comparable increase in proof mintage from its 1907 predecessor. The cause for the additional pieces struck was presumably the new designs by Bela Lyon Pratt. These replaced the long-lived Liberty types, which had been struck throughout the entire lifetime of most collectors of the era.

Some who ordered the new Indian half eagle proofs were surely surprised when they received and examined their specimens. Unlike prior designs, the devices were sunken into the field, with the high points at the same level as the field. These designs are often referred to as incuse, but this is a misnomer, since an incuse design would have opposite relief, with areas such as the cheekbone the lowest point of the design, instead of the highest. The proof finish of the Indian half eagle was also dramatically different than the Liberty type. Proof Liberty half eagles have mirrored fields and (at times) frosty devices, similar to the proof gold American Eagles in production today. The proof Indian and Saint-Gaudens types are matte proofs, with the same microgranular finish on both the fields and devices.

Proof Indian half eagles are easily distinguished from their business strike counterparts. The color is comparatively dark, since the fields lack reflectivity, and luster is diffused. Since the pieces were well made, the abrasions that plague bag-stored business strikes are absent on proofs. Finally, the proofs are fully struck, the extra detail most noticeable on the eagle's shoulder and the lower reaches of the headdress. The present piece shows all of these characteristics, and is essentially perfect, save for a tiny mint-made planchet flaw located directly beneath, but relatively distant from, the U in TRUST. This minuscule flaw serves as an identifier for any auction appearances. Census: 11 in 67, 1 finer (11/08). (#8539)

## Amazing 1908 Matte Proof Five, PR67

**4088** **1908 PR67 NGC.** In 1908, two types of half eagles were minted for circulation in Philadelphia. The With Motto, Liberty Head design—continuously struck since 1866—was being replaced by Bela Lyon Pratt's Indian Head design. Proof versions of the Type 2 Liberty fives were issued each year since 1866, with the lone exception of 1908, when proofs of the new so-called "incuse" Indian design were specially prepared for collectors. Technically, the design is not incused, but rather sunken. To achieve this affect, certain design elements had to stand higher than the open field, instead of being below the surface as it had been done since day-one at the Mint. As a result, the fields could not be lapped in the manner required to produce brilliant proofs. The Mint's solution was to invent a new type of proof format that would be popular with collectors. The answer was the matte proof and, although it was certainly new, popular it was not. After being struck on a hydraulic press, each coin was lightly sandblasted. The resulting coin was odd in appearance—the surfaces were grainy—and complaints from collectors were forthcoming.

The number of 1908 matte proof half eagles produced is a somewhat nebulous figure. The Mint—per one piece of contemporary correspondence—suggests that 500 pieces were struck. It is obvious, however, that not all were sold to collectors, probably due to their unfamiliar look. The official total recorded in the National Archives is 167 proof fives. Roger Burdette expounds in his *Renaissance of American Coinage, 1905-1908:* "Figures reported at the end of 1908, one hundred and one gold sets, were the quantity sold, with the balance melted." The current NGC and PCGS population data, when combined, indicates a total of 148 pieces in all grades, although that figure is likely affected by resubmissions. To further complicate matters, the Garrett-Guth reference suggests a total of 627 certified 1908 proof fives—a number that cannot be explained, especially considering that the same reference notes that the issue appeared at auction only 34 times between 1991 and 2005. So, the exact number of 1908 proof half eagles surviving beyond 1908 may never be known for sure, although it is clear that few have survived at the Superb Gem level. The current offering can only be described as a piece of perfection and is one of only 11 examples certified at the PR67 tier, with one finer specimen (11/08). (#8539)

## Exquisite 1910 Half Eagle, PR67 ★

**4089** **1910 PR67 ★ NGC.** The official mintage for proof half eagles from 1910 is the highest of any date of its type, listed at 250 pieces. This figure is either incorrect or a great many were melted at year's end as unsold because the 1910 is approximately twice as rare as the 1908, of which fewer pieces were struck, and of equal rarity with the 1909, an issue with only 78 proofs officially minted. Akers only recorded 17 auction sales of proofs over the decades he surveyed major gold auctions, and while more examples obviously exist, we estimate that no more than 50-55 coins are extant in all grades. Our own database includes 50 auction appearances of this date. 1910 continues the two-year tradition of using the Satin or Roman Gold finish on gold proofs, although at least one specimen is known with a dark grained matte finish. Many business strikes were similarly finished, but there can be no doubt about the method of manufacture of this lovely, fully struck proof. The surfaces have a very fine granular texture and appear to be essentially as struck. With the unaided eye, one fails to notice any blemishes, spots, or shiny areas that might lessen this splendid coin's pristine status, but under magnification, a microscopic flyspeck is mentioned in the obverse field under the ER of LIBERTY. This is noted for pedigree purposes only. Census: 5 in 67, 4 finer (11/08).
*Ex Heritage (11/2005), lot 2429.* (#8541)

## Superb Matte Proof 1911 Half Eagle
## Rare and Desirable, PR67

**4090** **1911 PR67 NGC.** The Mint experimented with many proof finishes in the early years of the 20th century. The artistic, European flavor of proof coins of this era is much appreciated by collectors today, but it did not find favor with contemporary numismatists. In 1911, the Mint abandoned the Roman Proof finish used in the previous two years, and returned to the darker Matte Proof format. The coins exhibit a finely grained surface texture and exquisite sharpness of detail. Unfortunately, collectors continued to reject these innovations, as they preferred the old brilliant proof format.

The proof mintage of 1911 was a mere 139 coins. Despite the small mintage, this issue is still the second most available proof date of the series, behind the 1908. Walter Breen notes proofs of 1908-1915 are much rarer than those of the preceding decade. Even the small recorded mintage totals do not convey the true rarity of these issues. Breen suspects the pieces were not recognized as proofs by many heirs, who may have unwittingly spent them, or turned them in during the Gold Recall of 1934.

Bela Lyon Pratt was the designer of this attractive, unusual design. Many numismatists did not appreciate the unique, incuse design feature. Samuel Hudson Chapman alleged the design was unhygienic and would not stack. These allegations proved false, and the basic design remained unchanged until half eagle production was discontinued in 1929.

The present coin is a marvelous representative of this rare issue. The dull, matte finish seems to add to the quality of realism Pratt aimed for with this design. The detail is crisp and impressive on all devices, but especially on the headdress and eagle's wing. The dark, honey-gold color catches the eye enticingly. Overall, this coin is virtually unimprovable. Census: 10 in 67, 4 finer (11/08). (#8542)

## EARLY EAGLES

XF Details 1795 Ten Dollar
13 Leaves, BD-1

**4091 1795 13 Leaves—Tooled, Whizzed—ANACS. XF40 Details.** Breen-6830, Taraszka-1, BD-1, High R.3. Bass-Dannreuther Die State a/a. An early die state example of the first variety of ten dollar gold pieces struck by the U.S. Mint. This piece appears to have AU sharpness and luster, but the reverse exergue is repaired and displays crude tooling marks. Both sides are bright and micrograniular, characteristic of whizzing. The reverse rim has a ding at 3 o'clock, and the obverse rim is softly defined at 1:30, perhaps as made. The demand for Small Eagle tens is formidable, and the present piece provides an opportunity to provide a sharp example at an affordable cost. (#8551)

Scarce 1795 BD-4 Small
Eagle Ten, AU Details

**4092 1795 13 Leaves—Improperly Cleaned—NCS. AU Details.** Breen-6830, Taraszka-4, BD-4, High R.3. Bass-Dannreuther Die State a/b. Pleasing eye appeal with unquestionable AU details, but the surfaces are a bit bright, suggestive of a light cleaning. We also note a rim disturbance between 12 o'clock and 2 o'clock on the obverse, with similar issues on the corresponding area of the reverse rim, and a large abrasion obliterates the R in AMERICA. The BD-4 die marriage is one of five 1795 eagle varieties. All but the BD-1 die pairing are scarce to rare, and Bass-Dannreuther estimate that between 60 to 80 BD-4 tens are extant in all grades. (#8551)

## Pleasing Choice AU 1795 13 Leaves Eagle, BD-1

**4093** **1795 13 Leaves AU55 NGC.** Breen-6830, Taraszka-1, BD-1, High R.3. Obverse State a, Reverse State a, none of the cracks mentioned in Bass-Dannreuther visible. Obverse distinguished by lumps near the left upper serif of the Y in LIBERTY and close nearby star; the most obvious reverse characteristic is the near-contact between a lower leaf and the U of UNITED.

The BD-1 is most notable for its relative availability in the context of the year. As noted in the Bass and Dannreuther reference *Early U.S. Gold Coin Varieties*:

> "The estimated mintage for the variety [between 2,795 and 5,583 pieces] is based on knowledge that this is the most often seen of the five varieties of 1795. There are more than 200 examples of this variety; only this and BD-2 ... are usually available Small Eagle varieties. BD-2, however, has less than half the number known, right around 100 coins. BD-4 has about half that number or a few more that have survived, while BD-5 likely has fewer than 50 known."

Despite its comparatively high survival rate, the BD-1 leaves hordes of early gold enthusiasts chasing examples of a die variety that is scarce in an absolute sense. The present Choice AU example is a well-detailed survivor, honey-gold with faintly granular surfaces that show a number of light ticks. The centers of the stars and the high points of the devices exhibit trifling wear, and neither side shows any individually mentionable abrasions. An interesting candidate for type and die variety collectors alike.
*From The Martin L. Diffenbaucher, Jr. Collection.* (#8551)

A 15% BUYER'S PREMIUM ($9 MIN.) APPLIES TO ALL LOTS.

## Brilliant 1795 BD-5 Eagle, MS61

**4094** **1795 13 Leaves MS61 NGC.** Breen-6830, Taraszka-5, BD-5, R.5. Half eagles, followed by eagles a short time later, were the first gold coins that the U.S. Mint produced, starting at the beginning of August 1795. Five die varieties of eagle's are known from the combination of three obverse dies and three reverse dies. Among the five varieties is the famous Nine Leaves reverse, a major rarity in early U.S. numismatics. The four varieties with 13 leaves on the reverse range from the plentiful BD-1, to the scarce BD-2, and the rare BD-4 and BD-5 die combinations.

This is the final use of both dies, the obverse lapped with several shortened star points, and the reverse lightly cracked, with the heavy die chip near the first A of AMERICA that developed in its earlier die marriage of BD-4. The reverse die cracks join the tops of UNITED STA, ATES, and OF, the latter crack continuing to the die chip.

Both sides are highly lustrous with lovely light green-gold color and hints of light orange toning on the high points. The obverse and reverse fields are reflective, and exhibit the usual quota of small surface marks that are expected for the grade. Slight adjustment marks at the center of the reverse obliterate the eagle's breast details. The obverse has a tiny rim bruise below the 5. A minuscule mark is located just right of the eagle's body, and it looks like a broken gas bubble in the original planchet.

*From The Estate of Jack Lee Collection.* (#8551)

## Conditionally Elusive 1796 Eagle, AU53

**4095** **1796 AU53 PCGS.** Breen-6832, Taraszka-6, BD-1, R.4. The only die variety, with 16 obverse stars. The 1796 eagle is much scarcer than its 1795 counterpart, despite a mintage that is only slightly lower at 4,146 pieces. A possible explanation for this anomaly is that the accepted mintage figures for the two dates, as they are currently stated, are simply incorrect. Certainly there were no mintages kept by the employees of the early Mint in Philadelphia, as we would understand them. Instead, mintage records were generated according to the number of coins produced, of each type, during the year. This number was not broken down by the date on the coins, however; and frequently dies were used from previous years, as long as they remained serviceable. Although Mint records indicate that 6,934 eagles were produced in 1796, it now seems likely that the majority of those coins were dated 1795. Indeed, based upon current population data from NGC and PCGS, where nearly three times as many 1795s have been certified, the generally accepted figure of 4,146 pieces for 1796 may be too high. This theory is supported by the observation that five different die pairs were utilized on coins dated 1795, but only this single die marriage has been verified for examples from 1796.

This is a boldly struck specimen that does not reveal noteworthy weakness on any of the obverse design elements. The reverse shows crisp definition on the peripheral devices, while the eagle's talons, legs, breast, and neck feathers evince typical softness. A shallow planchet void is noted just to the right of the 6 in the date. Slightly worn on the highpoints, there are two or three small abrasions on each side, and a few faint hairlines in the fields. A visually pleasing and conditionally elusive example of this ten dollar issue, from just the second year of our nation's official gold coinage.
*From The James Mossman Collection.* (#8554)

## Elusive 1796 BD-1 Eagle, AU55

**4096** **1796 AU55 NGC.** Breen-6832, Taraszka-6, BD-1, R.4. Only one die pair is known for the 1796 eagles. When Walter Breen wrote his manuscripts in the mid-1960s, he suggested that about 35 to 50 examples of the 1796 eagle survived. More recent research into auction records, along with the appearance of several old collections in the market over the last three decades, has allowed a revised estimate of 100 to 150 examples, or three times Breen's estimate. While it is almost certain that some of the 4,146 eagles recorded as minted in 1796 actually carried the 1795 date, it is similarly known with certainty that some of the 3,615 eagles struck early in 1797 were dated 1796. That knowledge is based on the extensive die state observations made over many years by Harry Bass, and more recently published in book form by John Dannreuther.

High grade examples of this date are quite hard to locate. NGC has only certified 19 Mint State pieces, and many of those are probably resubmissions; PCGS has graded 11 examples in MS60 or better. The finest example certified by either service is MS63. This piece, an earlier die state and therefore a true "1796" eagle, with satiny light yellow-gold surfaces, has faint adjustment marks through the center of the obverse, obliterating some hair detail and actually helping to define other detail. Like most known examples, the obverse has a vertical die crack from the E in LIBERTY to the bottom edge of the drapery. *From The Estate of Jack Lee Collection.* (#8554)

## Highly Attractive 1797 Large Eagle Ten Dollar XF45, BD-2

**4097** **1797 Large Eagle XF45 PCGS.** Breen-6834, Taraszka-12, BD-2, High R.4. The only obverse used with the Large Eagle reverse, having ten stars left and six right. On the reverse, a star touches cloud 4, whereas in BD-3 and BD-4 the star is distant from cloud 4.

Considerable luster resides on both sides of this Choice XF example, probably more than what might be expected for the designated grade. Strong definition is seen on the design elements, including Liberty's hair and drapery, the eagle's breast and neck feathers, the clouds, and the dentilation on each side. A scattering of circulation marks is visible, but these are light, and not worthy of individual mention. (#8559)

## Exciting 1797 Heraldic Eagle Ten Rare Variety, BD-3, AU55

**4098** **1797 Large Eagle AU55 NGC.** Breen-6835, Taraszka-11, BD-3, R.5. There are three known varieties of Large Eagle ten dollar gold coins dated 1797. The coin offered here is a specimen of the BD-3 variety, characterized by the irregular cross pattern of stars on the reverse. The BD-3 variety is considered the scarcest variety of the date, with a surviving population of 40-50 pieces. In *Early U.S. Gold Coin Varieties,* John Dannreuther surmises that this variety may have been struck after the 1798/7 varieties, based on die state evidence. Population data may be deceptive as early submissions were not attributed by variety.

The present coin is an attractive specimen of this scarce date. Only light wear shows on high points, such as the eagle's breast. Much original luster and color remain, mixed with areas of golden-brown. Scattered surface marks are not individually distracting. (#8559)

## Mint State 1797 Large Eagle Ten Dollar, BD-4

**4099** **1797 Large Eagle MS60 NGC.** Breen-6834, Taraszka-12, BD-4, High R.4. This variety of 1797 eagle has the stars arranged 10 and 6 on the obverse, the only obverse used with the Large Eagle reverses. The last 7 in the date shows a marked die crack running from the rim upward onto the drapery and the lower hair waves. On the reverse the eagle has a long and thick neck, almost appearing triangular underneath the scroll. The breast is thick, and the stars are arranged in an "unusual" cross pattern: Stars 7, 8, and 9 are in line, and star 3 is in the row with stars 7 and 8. The bundled arrowheads extend past the center of the N in UNITED, one nearly to the right side of the N.

John Dannreuther comments that this variant is a "little known subvariety of the Large Eagle type. It has a different style eagle with a long, thicker neck. It is a transitional reverse between the tall and short neck reverse. Because these devices are hubbed, the first reverse punch may have been modified to create this subvariety. This style eagle reverse is unique to this variety, as are the other two eagles for BD-2 and BD-3."

Dannreuther further notes that the 1797 eagles are like no other early gold coin, as four different reverse styles (counting the Small Eagle reverse) were used to make the two types for the year. The BD-4, at High R.4 (90-110 known), is considered "very scarce" and only slightly more available than the BD-3, rated R.5 (40-50 known, or "rare"). The BD-2 is another High R.4 variety, and the Small Eagle BD-1 is again considered R.5, or rare. The rarity rankings here mean that the BD-2 and BD-4 are the varieties most likely to appear at auction among 1797 eagles, for those attempting to assemble a type or date set.

The present coin offers much appeal for the MS60 grade, and indeed one wonders if the grading is not overly conservative. There are no adjustment marks noted on the obverse, and they appear only faintly through the horizontal shield stripes on the center reverse. The surfaces overall are bright yellow-gold and the reverse sparkles with semiprooflikeness. Sharply defined throughout.
*From The Omaha Collection.* (#8559)

## Lustrous 1797 BD-4 Eagle, MS61

**4100** **1797 Large Eagle MS61 NGC.** Breen-6834, Taraszka-12, BD-4, High R.4. Only one obverse was used with three different reverse dies to create the 1797 Heraldic Eagle eagles, and the BD-4 die combination is known to be struck in 1798, after production of the 1798 overdate eagles. The obverse has a heavy double die crack through the final 7, from the rim to the bust. The reverse has radial die cracks through the R and C of AMERICA, and from the border to the center tail feather.

When Walter Breen wrote his gold monographs in the early to mid 1960s, he described this variety as his number 2-C, and stated that it is extremely rare, giving it an R.7 rating, meaning less than 12 were known. Today, it is actually known as the most plentiful of all 1797 die marriages. John Dannreuther places the number known in the range of 90 to 110 pieces. Among the known examples are about 12 to 18 Mint State examples, with many other AU pieces. Although we are unaware of any actual published Census of early gold varieties, we believe that the present coin ranks among the 10 finest of the variety. NGC has certified 31 examples at this grade level, with 17 finer, but that population includes examples of all three die varieties.

Fully lustrous and frosty light green-gold surfaces exhibit the usual quota of tiny surface marks that are expected on these soft gold coins. The strike is nicely centered but somewhat soft, especially at the centers, with Liberty's profile somewhat blunt.
*From The Estate of Jack Lee Collection.* (#8559)

A 15% BUYER'S PREMIUM ($9 MIN.) APPLIES TO ALL LOTS.

## Late State 1797 BD-2 Eagle, MS61

**4101 1797 Large Eagle MS61 NGC.** Breen-6834, Taraszka-12, BD-2, High R.4. Three Heraldic Eagle varieties were coined from a single 1797 obverse die, although a different obverse die was used earlier for the 1797 Small Eagle tens. The obverse has a strong double crack from the border to the final 7 and the drapery, varying in intensity but seen to some degree on all three Heraldic Eagle die marriages. The BD-2 combination is considered the first of those three, and it should theoretically exist without the obverse die crack, but none have yet been identified. Therefore, Dannreuther's obverse state b is the earliest state known to exist.

The reverse is also state b, with a small rust lump on the top of the second T in STATES. There is also a short die crack that connects the top right wing feather to the right reveres border, not mentioned in Dannreuther's die state analysis, although clearly visible on his plate coin. A long crack joins the border to cloud 7 (or 5 depending on who is counting), also not mentioned in Dannreuther's description. Both cracks were described several years earlier in Anthony Taraszka's book on the series.

A splendid Mint State piece, this eagle has rich green-gold surfaces with fully brilliant and frosty luster. Both sides are sharply detailed, even at the usually weak centers. This exceptional piece is well suited for the connoisseur who appreciates early U.S. gold coinage. Census: 30 in 61, 17 finer (12/08). (#8559)

## Scarce 1799 Ten Dollar Gold Piece Breen-6841, BD-10, AU58

**4102** **1799 Large Stars Obverse AU58 NGC.** Breen-6841, Taraszka-22, BD-10, R.3. The present coin is an example of the BD-10 variety, distinguishable by the large stars on the obverse and the position of the leaf touching the foot of I in AMERICA. According to *Early U.S. Gold Coin Varieties,* the BD-10 variety is the most available variety for 1799. This circumstance makes the issue a prime target for collectors of early type coins, as well as early gold specialists.

The coin offered here is a particularly attractive example of this large, impressive issue of the early Mint. Much original mint luster remains, especially around the devices. The strike is a little soft on some stars, but central detail is strong. Bright, orange-gold color accounts for the considerable eye appeal this coin displays. This example is a prize for the discerning collector. *From The Findley Collection.* (#8562)

## Glorious 1799 Small Stars Obverse Eagle, BD-2, AU58

**4103** **1799 Small Stars Obverse AU58 NGC.** Breen-6839, Taraszka-14, BD-2, High R.5. BD Obverse State b/Reverse State b. Stars 1 and 13 are away from the bust and star 9 is away from the Y in LIBERTY. A small die crack runs from the rim through the left serifs of the L in LIBERTY, and lightly into the top of the cap. The reverse, previously used on the extremely rare BD-1 pairing, shows a small "rust-like crack" within C, through A, the talon, stem end, and tail feathers; another shows faintly through the O in OF to cloud 7.

Glorious mint luster cascades from both sides of this yellow-gold piece, which shows few abrasions but does have a couple of milky dark-gray toning spots. Nonetheless the piece is quite attractive, and it would make a superb acquisition for a type or date set. (#98562)

## Well Preserved 1801 BD-2 Eagle Popular Type Coin, AU53

**4104** **1801 AU53 NGC.** Breen-6843, Taraszka-25, BD-2, R.2. From a relatively large mintage of 44,344 pieces, the 1801 eagle has the second highest surviving population of the Capped Bust Right, Heraldic Eagle design. This date is available in all grades up to MS62, making it a favorite for early type collectors.

The present coin is a representative of the Breen-6843, BD-2 variety, characterized by the position of star 8 near the cap, and star 13 near the bust. The strike is a little soft on some stars and facial features, as often seen on this date. The surfaces show only moderate abrasions for the grade, with only slight wear on the highest points of the design. Overall, this specimen is an extremely attractive example of this popular date.

*From The Findley Collection.* (#8564)

## Uncirculated Details 1801 Ten Dollar BD-2, Taraszka-25

**4105** **1801—Obverse Scratched, Improperly Cleaned—NCS. Unc. Details.** Breen-6843, Taraszka-25, BD-2, R.2. A well struck and mildly prooflike piece that appears at first glance to grade MS62 or MS63. Careful study locates a cluster of pinscratches on the field near star 10 that likely removed an alloy spot. This area was then wiped in a hopeful attempt to efface the pinscratches. Otherwise, a highly desirable example of the coveted Heraldic Eagle type.

The Bass-Dannreuther book obliquely describes their die state b/b as "obverse ... clashed ... reverse ... lapped." The difficulty here is that neither the clashes nor the lapped details are further described. The present piece shows faint clashmarks beneath Liberty's ear, but the reverse shows no indication of lapping. Regardless of the technical die state, this early eagle and its flashy mint luster would provide the centerpiece of most gold type sets. (#8564)

## Popular 1801 Eagle, BD-2, MS61
## Favorite Type Coin

**4106** **1801 MS61 NGC.** Ex: Richmond Collection. Breen-6843, Taraszka-25, BD-2, R.2. From a mintage of 44,344 pieces, the 1801 eagle is a popular date with type collectors. To quote Jeff Garrett and Ron Guth in their *Encyclopedia of U.S. Gold Coins 1795-1933,* "The 1801 eagle has a high mintage and is noted for having the second-highest surviving population (after 1799), thus it is an excellent choice as one of the more affordable dates of the type." The issue is also known to be the most available early eagle in Mint State grades, but coins at the Gem level are exceedingly rare. Even the most advanced collectors usually settle for an example in the lower Mint State grades.

There are two varieties of 1801 dated eagles. The present coin is an example of the BD-2 variety, characterized by the longer, thinner points on the obverse stars. Harry Bass first noticed that the obverse star punch used on BD-2 was different from the punch employed on BD-1. Both dies used on BD-2 seem to have been particularly robust, and the great majority of 1801 eagle coinage was accomplished with the BD-2 dies. Today, experts estimate a surviving population of 600-800 pieces.

The present coin is an appropriate choice for an advanced type collection or a collection specializing in early gold. The impressive strike shows on all details of the design, with the hair and breast feathers being especially strong. Rich, satiny luster radiates from all the surfaces. Hints of green and honey enhance the vibrant yellow-gold color. Handling marks are minimal for the grade, and overall eye appeal is excellent. (#8564)

A 15% BUYER'S PREMIUM ($9 MIN.) APPLIES TO ALL LOTS.

## Popular BD-2 1801 Eagle, MS62

**4107 1801 MS62 NGC.** Breen-6843, Taraszka-25, BD-2, R.2. Apparent Obverse State a and Reverse State a, with no readily visible die clashing on either side. Primary obverse diagnostic is the lowest star to the left, which is away from the curl, unlike the BD-2 which has the curl seemingly nestled between two arms. For the collector of early type, the 1801 eagle is a boon, with examples ready for the taking provided one is prepared to pay a certain price and not particularly picky about quality. Comments from Bass and Dannreuther in their *Early U.S. Gold Coin Varieties* are illustrative: "This is the most available early eagle variety, as the dies were among the most productive of the type. The majority of the coins dated 1801 are of this variety, as the other ones with this date (BD-1) are quite scarce."

While the natural temptation is to assume that the BD-2 die pair accounts for the vast majority of eagles struck in 1801, that impulse has its own pitfalls, as suggested by Bass and Dannreuther, who state that " ... some of this calendar year's production was likely dated 1800; possibly even some 1799 coins were produced in this year."

Regardless of the actual eventual mintage for the 1801 eagle, it is enough to note that it is relatively available if one is unconcerned about quality, but finding an attractive coin such as this MS62 piece normally takes significant patience. Warm yellow-gold surfaces host well-defined devices. Though wispy abrasions are present in the fields, the overall eye appeal is strong for the grade. NGC has certified 78 numerically finer examples of 1801-dated eagles (11/08). *From The Martin L. Diffenbaucher, Jr. Collection.* (#8564)

## Splendid 1801 BD-2 Eagle, MS62

**4108** **1801 MS62 PCGS.** Breen-6843, Taraszka-25, BD-2, R.2. Two star points are close to the cap on this plentiful variety, distinguished from the scarce BD-1 variety that has two star points close to the low curl. John Dannreuther notes a slight change that first appears on the obverse of this variety. The old star punch was replaced with a new punch that has large stars with thin rays, rather than the heavy rays that were last used for the 1801 BD-1 eagles.

The 1801 BD-2 variety is clearly one of the two most plentiful die marriages of all early eagles from 1795 to 1804. There are more Mint State examples of this die combination known then there are pieces of all grades for some of the rare varieties. All of that is positive news for the type collector, who can easily acquire an example in virtually any desired grade through MS64. NGC and PCGS have combined to grade over 400 examples in MS60 through MS64, with four additional pieces that grade MS65. None have been certified finer than MS65.

This lovely piece has brilliant green-gold surfaces with a frosty obverse field and reflective reverse field. Minor obverse clash marks are confined to the center part of the cap, an unusual situation where clash marks appear on a design element. While lower quality than the finest known pieces, this splendid Mint State example will please nearly any collector with its excellent eye appeal.

## Impressive 1801 BD-2 Eagle, MS64

**4109** **1801 MS64 NGC.** Breen-6843, Taraszka-25, BD-2, R.2. The obverse shows spined clash marks in Liberty's cap, presumably from the vertical shield stripes of the reverse design. In *United States Ten Dollar Gold Eagles 1795-1804,* Anthony Taraszka writes: "Frequently seen with spines in cap which results from clash with vertical stripes in shield." Many years earlier, in *United States Eagles,* Walter Breen made much the same comment: "Late die states show no cracks but there are several spine-like vertical marks on cap just above hair, evidently clash marks from vertical stripes of shield."

However, the spines are evenly spaced and the spacing fails to match the spacing of the shield stripes on the reverse. Also, at least the present example has the reverse die rotated a few degrees, meaning the alignment is improper for such clash marks to occur. So what are these lines that appear on most or all known examples of this variety? Clearly some sort of die damage took place, much like the Spiked Chin half cent. We can speculate that something fell on the die, and was struck by the other die, imparting the damage. The identity of such an object, if that indeed is what happened, eludes us.

The 1801 eagle mintage was 29,254 coins in 1801 and 15,090 in 1802, for a total of 44,344 coins. Delivery warrants were dated from January 19, 1801 to November 4, 1801, and from February 17 to December 30, 1802. Today it is well known that many of those coins were dated either 1799 or 1800, in addition to pieces dated 1801. What remains unknown is how many of those coins actually carried the 1801 date.

From 1795 to 1804, there were 32 die combinations of ten dollar gold pieces minted (33 if one counts the 1804 proof restrike), and the present 1801 is the most plentiful individual variety in the entire series. The other plentiful varieties, those most often chosen for type collections, are the 1795 BD-1 Small Eagle variety, the 1799 BD-7 with Small Stars on the obverse, and the 1799 BD-10 with Large Stars on the obverse. All four varieties can be acquired in Mint State grades with some patience. As always, cherrypicking to find the best available quality for a given grade is highly advised.

This impressive near-Gem is fully lustrous with gorgeous light greenish-gold surfaces. Both sides have soft, frosty luster with hints of reflectivity in the fields and a higher degree of mint frost on the devices, resulting in modest cameo contrast. While a few minuscule surface marks are apparent, especially in the fields, they are entirely minimal in scope. The obverse shows slight signs of double striking, and also exhibits nearly imperceptible die crack through the top of LIB and TY. (#8564)

A 15% BUYER'S PREMIUM ($9 MIN.) APPLIES TO ALL LOTS.

## Stunning Gem Uncirculated 1801 Eagle, BD-2
## A Condition Census Specimen

**4110 1801 MS65 PCGS.** Breen-6843, Taraszka-25, BD-2, R.2. One of few Gem survivors of not only an early gold issue, but also of an entire series. Of all Capped Bust eagles struck between 1795 and 1804—inclusive of both the Small and Large Eagle subtypes—only 24 examples have been certified at the MS65 level by NGC and PCGS combined, with just three specimens, each MS66 coins, grading finer. That's only 27 Gem or better survivors from a collective mintage of over 130,000 ten dollar gold pieces for the entire series—a percentage too small to record. Specific to the date, PCGS has certified only three 1801 tens as MS65, with none finer. The total at NGC is even bleaker, with a single MS65 example being the finest graded (11/08). It is not surprising, therefore, that the current offering is the first MS65 1801 eagle to ever cross the auction block at Heritage.

How an early ten could have survived to this day in such pristine condition is difficult to contemplate. The number of dedicated coin collectors in America would have numbered in the teens, at most, and in 1801 the Mint was in the business of striking coins for circulation only, as opposed to the more commercial Philadelphia operations beginning in the mid-1800s, where numismatic items were struck with the intention of being sold to collectors. Even the production and distribution of coins during the early years of the first Mint was haphazard; attention was focused on proper weight with little regard afforded to aesthetic quality, and storage methods were designed around convenience as opposed to quality of preservation. So how did this piece survive the years without being subjected to even the most innocent of usage or, worse yet, succumbing to mishandling? Perhaps a banker set this eagle aside as a sample of the new issue, or maybe a wealthy family saved this coin as a memento of a child's birth. Could it have been a special sample saved by the Mint, only to subsequently be transferred to an employee's private collection at a later date? We can only speculate.

A mere two die pairings were necessary to strike the 44,344 or so 1801-dated tens. This fact is impressive to those familiar with early coin issues. Other die marriages of this era struggled to produce 1,000 coins before falling into disrepair. Of the two die varieties for the year, one is rare with fewer than 50 examples extant, while the other, BD-2, is considered relatively common with between 600 to 800 survivors in all grades. The latter die marriage produced the piece offered here. It is most easily distinguished from BD-1 by the location of star 1 relative to Liberty's lower curl and the position of star 13 to the bust, although some researchers prefer to differentiate the two varieties by classifying the obverse stars. On BD-1 the stars have shorter spines, whereas the stars on BD-2 are more spindly in definition. The reverse dies are also different, but quite similar in appearance. Attribution is best achieved by observing the relation of the star adjacent to the eagle's beak; on BD-1 the eagle's upper and lower beak touch one spine of the star, while only the upper beak is close to the star point on BD-2.

Lemon-gold coloration is illuminated by velvety luster on both sides of this well preserved ten. The strike is crisp and the overall eye appeal is reminiscent of the quality found on a modern coin production. This monumental offering will be recorded in future works on the subject as an important numismatic event. And, as with the sale of other great numismatic rarities, it is possible that this piece will remain in a tightly held collection for many years to come. Population: 3 in 65, 0 finer (11/08).

*From The Estate of Jack Lee Collection.* (#8564)

## Lustrous 1803 BD-3 Eagle, MS61

**4111** **1803 Small Stars Reverse MS61 NGC.** Breen-6844, Taraszka-28, BD-3, R.4. In addition to the smaller sized obverse stars, this variety is also attributable by the position of the E in STATES which is almost entirely left of the break in the clouds. Of the six varieties of 1803 tens, this is the most frequently seen die combination. The 1803 is a scarcer date among early tens. Of the 15,017 pieces believed to have been struck of this date, more than half (7,500-10,000 pieces) are believed to have been of the BD-3 variety. However, as with all early gold, attrition took a heavy toll. Today the most reliable estimate is that 150-200 pieces are extant of this die variant (making it an R.4). The Dannreuther-Bass reference mentions that only 93 auction appearances were recorded of this die marriage between 1990 and 2005.

On this piece, one of the most immediately obvious elements are the strong striking details on each side. The hair curls are sharp and the breast feather definition is far above average for the type. That being said, the peripheral stars on the obverse do show some weakness. The coin is bright overall with yellow-gold color, and the fields display the often-seen semi-prooflikeness common to many early gold coins. There are a few shallow adjustment marks on the lower reverse that are worthy of mention, but these do not detract from the overall beauty of this important early ten.
*From The Estate of Jack Lee Collection.* (#8565)

A 15% BUYER'S PREMIUM ($9 MIN.) APPLIES TO ALL LOTS.

## Extremely Rare 1803 BD-6 Eagle, AU53
## One of Just Six Known Specimens

**4112 1803 Large Stars Reverse AU53 NGC.** Breen-6845, B. 1-F, Taraszka-32, BD-6, R.7. Six die varieties of 1803 eagles are known, from one obverse and six reverse dies. The BD-6 eagle is clearly the rarest of all six varieties, with only six examples known to us.

In 1803, the initial punch used for the Small Stars Reverse type (BD-1 through 4) was replaced with a larger star punch (BD-5 and BD-6). BD-5 is also known as the "14 Stars" reverse, with an extra star superimposed on cloud 8, and BD-6, the variety offered here, is the true 13 stars reverse die of the Large Stars type. In 30 years of gold coin collecting, Harry Bass never acquired an example of this variety, the only early eagle that he never obtained. In our June 2008 auction, we offered an MS62 example, and at the time prepared a roster of those pieces known to us. The following is an abbreviated, slightly updated version:

1. MS62 NGC. Heritage (6/2008), lot 2106.
2. MS61 NGC. Heritage (8/1998), lot 7744.
3. AU58 PCGS. Superior (5/2006), lot 1192.
4. AU55. Bowers and Merena (9/1988), lot 538.
5. AU53 NGC. The present specimen. Ex: Superior (6/1981), lot 362.
6. Net AG3; VG details, ex-Jewelry ANACS. Heritage (3/2003), lot 6347.

This example is an attractive green-gold piece with some luster remaining on both sides. A few scattered surface marks in the field are quite consistent with the grade. The early gold variety specialist is provided an opportunity to acquire an extremely rare die variety, one that is missing from most collections. (#98565)

## Rare 1838 Ten Dollar, AU55

**4113** **1838 AU55 PCGS.** The 1838 ten dollar, coming from a mintage of 7,200 pieces, is rare in all grade levels. Most survivors are heavily circulated, usually in Extremely Fine or worse condition. Mint State examples are very rare; indeed, PCGS and NGC have certified only six specimens.

The bright yellow-gold surfaces of this Choice AU example reveal traces of luster in the recessed areas. Sharp definition is apparent on the design elements, except for softness in the star centers. Light to moderate contact marks are evenly distributed over the surfaces of each side. Population: 6 in 55, 8 finer (12/08). (#8575)

## Near-Mint 1839 Head of 1838 Eagle Large Letters Reverse

**4114** **1839 Type of 1838, Large Letters AU58 NGC.** The Type of 1838 is also known as the "Old Portrait" variety to collectors who have been around for a while. Including the 1838, only 33,000 pieces were produced of this distinctive subtype, which is perhaps 100 times scarcer than the much heralded Type Two gold dollar. Examples are very scarce and typically encountered in VF to AU grades. Sharply defined throughout, and luster persists across design details. Small abrasions are scattered over this Borderline Uncirculated example, but none deserve individual mention. Census: 34 in 58, 10 finer (11/08).
*Ex: Long Beach Signature (Heritage, 2/2003), lot 8313; FUN Signature (Heritage, 1/2004), lot 7762.*
*From The James Mossman Collection.* (#8576)

## High Grade 1844-O Eagle, MS60 Rare in Mint State

**4115** **1844-O MS60 NGC.** The 1844-O eagle is one of the more available dates from the New Orleans Mint, but it is still a scarce coin in high grade. Recently, 32 examples of this date were recovered from the wreck of the *S.S. Republic,* but they were primarily in AU grades. Garrett and Guth report Mint State coins are exceedingly rare.

The present coin features a better than average strike, with fine detail in the hair and feathers. Attractive yellow-gold color blends with honey toning on the surfaces. Scattered handling marks are consistent with the grade. Census: 5 in 60, 3 finer (11/08). (#8591)

## Terrific Choice 1855 Eagle

**4116** **1855 MS64 PCGS.** Profoundly lustrous and satiny. The surfaces are generally yellow-gold with occasional hints of pale amber. Central striking definition is solid, though the obverse stars show slight softness, and overall visual appeal is powerful. Near-Gem examples of this pre-Civil War gold eagle issue are highly elusive, owing to a low rate of savings. Despite a six-figure mintage, few examples are known in even About Uncirculated condition, much less at the Select or better level. Among Choice pieces graded by PCGS, the present coin is one of just three, with none finer (11/08). *From The James Mossman Collection.* (#8616)

## Attractive Choice AU 1874-CC Ten

**4117** **1874-CC AU55 NGC.** Peach-tinged luster is extensive, an unusual trait for a Carson City ten from the 1870s—a decade with many low mintage CC-mint issues. The present example also benefits from a crisp strike and a near-absence of detrimental marks. Only five 1874-CC eagles have been certified as Mint State, two of the most notable being an NGC MS65 formerly from the Warren Miller collection offered by Heritage in October 1995, and a PCGS MS63 once owned by Louis Eliasberg, Sr. and Harry W. Bass, Jr. While the present piece has witnessed brief circulation, its eye appeal is certain to please the advanced specialist. (#8670)

A 15% BUYER'S PREMIUM ($9 MIN.) APPLIES TO ALL LOTS.

## Spectacular Superb Gem 1905 Eagle

**4118** **1905 MS67 PCGS. CAC.** The Liberty eagles struck in the 20th century fall into one of two camps: either they are wildly plentiful in most grades, including most Mint State grades (Garrett and Guth, in their *Encyclopedia of U.S. Gold Coins*, suggest the 1901, 1901-S, and 1907 as such issues.) The rest are better dates; while there are no outstanding low-mintage rarities, each issue is nonetheless elusive in better grades, particularly Select Mint State and finer. With its mintage of just over 200,000 pieces, the 1905 eagle fits the description perfectly. It is not a distinctly low-mintage coin, but the numbers are not so great as to make it common.

The 1905 ten dollar piece also continues the theme of condition rarity. To quote from Garrett and Guth: "As is typical for coins of this period, low-end Uncirculated coins rule the day, whereas gem examples are rare. The most commonly seen Mint State grade is MS-62, followed by MS-61. Gem examples are very rare, but a few notable 1905 eagles are known to exist ..."

The present Superb Gem easily ranks as one of the "notables," with its smooth, virtually immaculate butter-yellow surfaces laced with peach and orange. The strike is bold, and the luster is powerful with a touch of satin. Registry collectors should note that PCGS has graded only three examples at this level, with none finer (11/08). An important opportunity that may not be replicated for years. (#8757)

## Second Finest Certified 1899 Proof Eagle
## PR67 ★ Ultra Cameo

**4119** **1899 PR67 ★ Ultra Cameo NGC.** The base of the 1 in the date is minutely doubled, and its left edge is over the center of a dentil. The entire date is about centered in the space between the bust and border. These characteristics are common to the proofs of this issue, although additional study is required to determine if the obverse die was also used on any business strikes.

This pristine proof eagle has amazing contrast between the wavy, mirrored, orange-peel fields, and the fully brilliant, lustrous yellow-gold devices. Only a few minuscule planchet flakes on the obverse and tiny orange spots on the reverse are visible to aid in pedigree research. Every aspect of this aesthetically desirable piece is all that the connoisseur could want. It is believed that only about 25 to 30 examples of this issue survive in proof format, and most of the survivors are in lower grades than the present piece. Among the survivors are two examples in the Smithsonian Institution, each grading PR64 Deep Cameo.

The typical NGC certified 1899 proof eagle has modest cameo contrast rather than the thick contrast of this example. That service has certified 39 proof eagles of this date, with 28 designated as Cameo, and only eight as Ultra Cameo. Among those in the latter category is a single finer PR68 ★ Ultra Cameo piece. The present example is the only PR67 ★ Ultra Cameo that NGC has certified, the second finest certified 1899 proof eagle. (#98839)

A 15% BUYER'S PREMIUM ($9 MIN.) APPLIES TO ALL LOTS.

Delightful 1904 Eagle
PR64 Cameo

**4120** **1904 PR64 Cameo, ANACS.** The 1904 proof eagle has a generous proof mintage of 108 pieces. Unfortunately, the surviving population seems to be quite small, with Walter Breen suggesting only 35-40 specimens extant. In their *Encyclopedia of U.S. Gold Coins 1795-1933*, Jeff Garrett and Ron Guth indicate population data may be deceptive on this issue, with a large number of undocumented resubmissions.

The present coin is an eye-popping example of this popular date. The deeply mirrored fields contrast boldly with the frosty devices to create the desirable Cameo effect. All design elements are strongly impressed, and only the presence of a few hairlines in the fields precludes a Gem certification for this lovely piece. (#8844)

## INDIAN EAGLES

Premium Gem 1907 No Periods Eagle

**4121** **1907 No Periods MS66 PCGS.** The inaugural year of Saint-Gaudens' Indian ten dollar design is represented by three variants: the Wire Rim and Rounded Rim eagles of the With Periods type, and the current offering, the No Periods variant. The prior versions are far less available than the No Periods eagles dated 1907, or which approximately 10,000 pieces have been certified at both services, all grades considered. This example, however, is in a smaller group of high-end survivors and destined for the most discriminating of cabinets. As of (11/08), PCGS has certified 66 pieces at the MS66 level, with a mere six coins grading finer.

Distraction-free surfaces combine with uninterrupted, satiny luster to define the Premium Gem grade of this early eagle. Predominately straw-gold in color, although we note the presence of light copper toning around Ms. Liberty's profile. Outstanding eye appeal. (#8852)

## Exceptional MS66 1910-D Ten Dollar Indian

**4122** **1910-D MS66 NGC.** As both specialists and type collectors know, the 1910-D is the third most frequently encountered issue in the ten dollar Indian series. However, high grade examples are not as easily located as one might imagine. While one has the right to expect much from a premium quality Gem coin, this one certainly exceeds expectations in all areas, easily qualifying it as an upper-end example even at this grade level. The surfaces are amazingly free from abrasions, the mint luster is thick and frosted, and the coin is toned with a delicate interplay of olive and orange-gold patina. Fully struck as well. (#8866)

## Impressive 1915 Eagle, MS65 Popular Type Coin

**4123** **1915 MS65 PCGS.** The 1915 is one of the more available Saint-Gaudens eagle issues in MS65, but it is still scarce at that level and a condition rarity any finer, with only seven such pieces known to PCGS (11/08). Both sides of this elegant Gem offer powerful luster with hints of frost and satin that enliven the carefully preserved surfaces. The strike is pleasing, particularly at the often-weak hair over Liberty's ear, and the eye appeal is impressive. An interesting candidate for the 20th century gold type collector seeking a slightly better date for this series. Population: 40 in 65, 7 finer (11/08). (#8878)

## Better Date 1915-S Eagle, MS63

**4124** **1915-S MS63 NGC.** The 1915-S eagle boasts a low mintage of only 59,000 coins. This issue was not shipped overseas in large numbers, probably because of economic issues arising out of World War I. As a result, this date suffered large scale melting during the 1930s, and few pieces were recovered later from European holdings. Today, this date is a key to the Indian Head series, and is avidly pursued by 20th century gold specialists.

The present coin is a most attractive example of this key date. The sharp strike has imparted crisp detail to all the design elements, and rich, satiny luster enhances the surfaces. Eye appeal is outstanding. Census: 17 in 63, 18 finer (11/08). (#8879)

## Rare Gem 1915-S Indian Head Eagle

**4125** **1915-S MS65 PCGS.** The authors of *The Coinage of Augustus Saint-Gaudens as Illustrated by the Phillip H. Morse Collection* offer these words concerning the rarity of the 1915-S eagle:

> "The 1915-S is in the upper echelon of rarity among ten dollar Indian gold pieces. Only 59,000 pieces were struck, and it appears that some attempt was made to actually place this issue in circulation as the majority of known survivors are in AU condition. The absolute and condition rarity of this issue is undisputed by those who are familiar with this difficult series. The 1915-S is comparable in Mint State rarity to the 1913-S and the much wider recognized 1920-S. Fewer than 200 pieces are believed known today in the various grades of Uncirculated. There are less than 40 pieces extant in MS63 condition with another 30 or so in MS64. Probably no more than 10 pieces exist in MS65 and finer conditions."

Further along, the authors—after discussing a couple of other examples that set the current auction records during the 1989 "investor-crazed market"—make another interesting observation concerning a particular Gem coin, the same MS65 grade as the current piece:

> "One of the better-known 1915-S tens is a PCGS MS65. While not the highest graded, it has been a part of three of the finest collections of ten Indians ever assembled: Thaine Price, William Thomas Michaels, and John Kutasi. This particular coin has exceptional mint luster and rich yellow-gold color with noticeably granular surfaces, which is unlike the finish seen on many 1915-S tens."

While we have not been able to track the provenance of this piece, we would mention that while it appears to have a noticeable granularity, it is not as heavy as the Gem mentioned in the quote above. We would also mention that this coin has stunning, trouble-free surfaces that lack any obvious dark spots or other mentionable impairments. For pedigree purposes we note a small scrape just below the lowest feather on the Indian's headdress. On the reverse there are a couple of tiny ticks in the right field below CA. This piece indeed appears high-end for the grade, with lovely yellow-orange color and a meticulous strike. Census: 4 in 65, 2 finer (11/08). (#8879)
***See: Video Lot Description***

## Key Date 1920-S Eagle, AU55

**4126** **1920-S AU55 NGC.** From a mintage of 126,500 pieces, the 1920-S is the third rarest date of the Indian Head design type, after the famous 1907 Rolled Edge variety and the fabulous 1933 date. Ten dollar gold coins were not minted at the other Mints in 1920. Indeed, the economic chaos surrounding the end of World War I had made the coins nearly obsolete. No eagles had been minted since 1916, and the denomination would not be coined again until 1926. The survival of any 1920-S eagle was purely a matter of chance, and the issue is scarce in all grades today.

The present coin is an attractive example of this key date. Wear shows only on the high points of the design, with all important detail unaffected. Much original luster and color remains, and some scattered abrasions are consistent with the grade. (#8881)

## Elusive 1920-S Eagle, MS63

**4127** **1920-S MS63 NGC.** The mintage for the 1920-S eagle is 126,500 pieces, only slightly less than that of its S-mint predecessor from four years before, the 1916-S. However, the 1916-S is fairly common until the Select Uncirculated grade is reached, while the 1920-S is a great rarity in all grades; even circulated pieces are quite rare and in demand.

The difference is due to distribution. Many 1916-S tens were shipped to foreign vaults, while the 1920-S eagles remained in Treasury vaults until Franklin D. Roosevelt's 1933 gold recall condemned them to the smelter. Nonetheless, a few 1920-S pieces escaped Treasury holdings; several of them were used in commerce due to the lingering hard money tradition in our nation's West. This both accounts for the circulated examples that are certified and explains why the average grade of certified survivors at NGC and PCGS combined is only AU58 or so.

The very rare Mint State examples were generally indifferently stored, since their numismatic significance would not be known for more than a generation. This lovely piece, however, has sweeping cartwheel luster and no individually relevant marks. The coloration is an attractive orange-gold, and the eye appeal is generous. The absence of a full strike on the obverse center is perhaps all that prevents a Choice designation.

There are currently some two dozen-plus Mint State examples certified at NGC, with PCGS adding another couple of dozen examples—as always, less duplications. Most of those coins are in the lower Mint State grades, however. NGC has certified only four coins in MS63 with eight finer, while PCGS has graded six MS63 examples, with nine finer (11/08). (#8881)

## Impressive MS64 1920-S Ten Dollar
## One of the Finest Pieces Known

**4128** **1920-S MS64 NGC.** In a *Coin World* article from seven years ago, Randy Camper makes an interesting observation about the ten dollar Indian series:

> "Indian Head eagles dated 1916 and earlier are all found today in almost the exact proportion to their original mintage. These coins were widely distributed to banks at the time they were struck and saw active use in the channels of commerce. By comparison, the availability of coins dated after 1916 is not always proportional to their mintage."

Using that passage as the theme sentence for the 1920-S ten, this issue is much easier to understand in terms of availability (or lack thereof) and price. The mintage was 126,500 pieces. Neither high nor low for the series. The lowest mintages were recorded for the 1911-D with only 30,100 pieces produced and the 1908-S with only 59,850 pieces coined. But both of these were struck prior to the 1916 cutoff mentioned in the above passage, and they are scarce but occasionally obtainable (the 1908-S more so). The rarest issue in the series is the 1933. The mintage for that year was an unimpressive 312,500 pieces. Second rarest is the 1920-S, followed closely by the 1930-S. With substantial mintages for each of these three later issues, the only answer to their rarity is melting. While we know large-scale meltings occurred in the mid-1930s after President Roosevelt's Gold Recall Act of 1933, no records were kept of the dates and mintmarks melted. Indeed, why would such records be kept?

The best estimate of the number of 1920-S tens that remain today is around 100 pieces. A substantial number (probably more than half) of the known coins are circulated, which indicates that the cutoff was not quite as neat as the 1916 date given above. Instead, the rarity of the 1920-S is based on two factors. First, the vast majority of the number minted was melted. Second, of those that were designated for distribution to banks in 1920-1921, most were indeed circulated. A few pieces that were not actually spent in the channels of commerce were set aside. But it appears that only accounts for 40-50 pieces.

The 1920-S is also a major condition rarity. A couple of dozen pieces are known in the lower grades of Uncirculated, and then the availability begins to rapidly thin out. Only nine pieces have been certified by both of the major services in MS64 (probably minus a couple of resubmissions). In Gem grade, only five have been graded, two in MS66, and the finest known is MS67 (the Duckor coin).

The surfaces of this piece show thick mint frost, the finish that is almost universally seen on the 1920-S, although Akers says several are known with satiny luster. The color is rich reddish-gold with little variation in hue. Sharply defined overall, only slight softness is seen at the top of the eagle's wing and on TY in LIBERTY. This latter weakness is almost diagnostic, but the Thaine Price coin showed no softness on the banner. Lightly abraded, the only noticeable surface flaw is a shallow vertical luster scrape above the eagle's left (facing) wing. A rare opportunity to acquire this key to the ten dollar Indian series. (#8881)

## Key Date 1930-S Eagle, MS64

**4129** **1930-S MS64 PCGS.** A particularly large mintage of more than one million ten dollar gold coins was accomplished at the Philadelphia Mint in 1926. This huge total satisfied all demand for this denomination during the next four years, and no coins were struck at any of the U.S. Mints until 1930. In that year, the San Francisco Mint produced the ten dollar gold denomination, probably to address some regional need. No eagles were struck at the other U.S. Mints in 1930 or 1931.

The 1930-S is a low mintage issue, with only 96,000 pieces coined. The great majority of this mintage was never released into circulation. The coins remained on hand in the Treasury vaults until the great Gold Recall, at which time they were melted and stored as bullion in Fort Knox. David Akers reports all examples seen are in Mint State grades, probably purchased from the Mint at the time of issue. In *A Handbook of 20th Century Gold Coins 1907-1933,* David Akers and Jeff Ambio rank this issue fourth in terms of overall rarity in the 32 coin series.

The present coin is an exciting example of this rare issue. The obverse is sharply struck, and the reverse shows only the slightest softness on the eagle's trailing leg, which is always seen on this issue. The coin has excellent luster, with vibrant yellow-gold color. The surfaces are free from the copper spots that often plague this date, and there are no distracting handling marks. The coin possesses excellent overall eye appeal, and is worthy of a place in any advanced collection. Population: 40 in 64, 19 finer (12/08). (#8883)

***See: Video Lot Description***

## LIBERTY DOUBLE EAGLES

### Pleasing 1855-S Double Eagle, MS63

**4130** **1855-S MS63 PCGS.** Ex: AWA Collection. From a large mintage of 879,675 pieces, this issue was once extremely rare in Mint State grades. The situation has changed somewhat in recent years, because the date has been well represented in shipwreck finds. More than 300 examples of the date were recovered from the *S.S. Central America* , and 57 coins were found in the wreckage of the *S.S. Republic*. Of these shipwreck coins, approximately 100 specimens were in lower Mint State grades.

The present coin is definitely a high-end example of this issue. The strike is a little soft on the central features, as often seen on this date, but peripheral detail is strong. Mint luster is unbroken, and the attractive gold color is enhanced with wisps of orange. Population: 2 in 63, 0 finer (12/08). (#8916)

A 15% BUYER'S PREMIUM ($9 MIN.) APPLIES TO ALL LOTS.

## Noteworthy Choice XF 1856-O Double Eagle

**4131** **1856-O XF45 PCGS.** Aside from the non-collectible pattern 1849 twenty, three mintmarked issues stand alone among Liberty double eagles as the titans of the series. The dominant force among Type Two pieces is the 1870-CC, the first double eagle issue struck by Carson City and the rarest, a perennial favorite among Old West gold collectors as well. The other two prominent issues are a pair of antebellum New Orleans dates, the 1854-O and 1856-O. The two of them are oft-compared and the occasional numismatic rivalry has been played up in various numismatic publications.

To claim that the two issues are rare is an understatement. Focusing on the 1856-O, just eight certification events are present in the NGC *Census Report* and a mere 12 pieces are identified in the PCGS *Population Report*; almost assuredly, there is some overlap between the two sources of certified data, as well as within them due to resubmissions. Add in a handful of impaired examples, and an estimate of 20 to 30 survivors, as published by Doug Winter in his *Gold Coins of the New Orleans Mint*, appears accurate. This is a slightly smaller pool of available pieces than is known for the 1854-O, which holds true through most grades, though in Mint State, the 1856-O actually offers a prospect for owning an unworn example, unlike its earlier counterpart.

Further evidence of the 1856-O double eagle's rarity is offered by a comment made by Doug Winter to the numismatic press. In the January 28, 2008 edition of *Coin World*, he was quoted as saying that a near-Mint representative of the issue, which he encountered while acting as a liaison between a dealer and a private collector, " ... was the first I have handled in a few years." That Winter, one of the most widely acknowledged authorities on (and one of the best-known dealers in) Southern gold, would go years without coming into contact with an example is perhaps the best contemporary illustration of its rarity.

Interestingly, the past year has been a "golden" opportunity for the collector of the higher New Orleans denominations; not only did the AU58 coin brokered by Winter change hands, but late October 2008 saw the Baltimore Collection specimen, a near-Mint representative, sell at Heritage's Dallas auction. Both of those pieces rank among the finest examples known; coins in less than About Uncirculated have traded only infrequently in years past, denying hundreds of New Orleans gold enthusiasts the opportunity to own a comparatively affordable survivor from this issue's mintage of just 2,250 pieces.

The present Choice XF survivor offers a chance to remedy that situation. While lightly worn as expected, marks are few, and the surfaces certainly are not "very heavily abraded," the way Winter describes the issue at large. Strike is typical, with the usual patches of weakness on the portrait and the eagle's outermost feathers. The green-gold and yellow-gold surfaces show glimmers of their original reflective luster, most notably on the reverse. A small cluster of marks to the left of Liberty's nose are the only flaws warranting specific mention. For one fortunate New Orleans gold collector who has long coveted this king of the series, the wait will end when this important lot is hammered down. Population: 2 in 45, 9 finer (11/08). (#8918)

## Luminous AU53 1857-O Twenty

**4132** **1857-O AU53 NGC.** Doug Winter, in his *Gold Coins of the New Orleans Mint*, lists three main complaints about surface quality for this issue: "There are only a few 1857-O double eagles that do not display very heavy abrasions. Many have been cleaned and are severely hairlined as a result. In addition, there are a number that have mint-made imperfections such as black streaks or areas of discoloration." The present lemon-gold example has no marks deserving individual mention and only light, wispy disturbances present in the fields. The strike is solid for the issue and only a touch of wear affects the high points. Census: 14 in 53, 49 finer (11/08). (#8921)

## Gem 1857-S Twenty Dollar From the *S.S. Central America* Shipwreck

**4133** **1857-S Spiked Shield MS65 PCGS.** Ex: *S.S. Central America*. Variety 20A. SSCA 1095. Despite its residence on the seabed of the Atlantic Ocean for more than a dozen decades, this coin looks as though it just fell out of the dies in the San Francisco Mint. This gloriously flashy, sun-gold specimen has dazzling luster and minimally abraded surfaces. Crisply struck aside from the M in UNUM. Housed in a gold label holder. Included with the lot is the forest-green Blanchard box, a faux book, and a certificate of authenticity signed by *S.S. Central America* expedition leader Tommy Thompson. (#70000)

A 15% BUYER'S PREMIUM ($9 MIN.) APPLIES TO ALL LOTS.

## Gem Spiked Shield 1857-S Twenty From the *S.S. Central America*

**4134** **1857-S Spiked Shield MS65 PCGS.** Variety 20A. Ex: *S.S. Central America*. A gorgeous high grade survivor from the legendary 1857 Atlantic Ocean shipwreck. Potent luster sweeps splendidly smooth fields and devices. The strike is penetrating, and the eye appeal is magnificent. Peach hues along the borders frame the light straw-gold centers. Remarkably free from the bagmarks and scuffs associated with large denomination Mint State 19th Century gold. The 'Spiked Shield' variety is identified by a pair of hair-thin die lines above the left (facing) claw, one of which passes through the left shield border. Housed in a gold label holder. (#8922)
***See: Video Lot Description***

## Impressive 1857-S Gem Twenty Dollar Ex: *S.S. Central America*

**4135** **1857-S MS65 PCGS. CAC.** Ex: *Central America*. Prior to the discovery of the *S.S. Central America* , 1857-S double eagles were mostly available in grades of Very Fine to Extremely Fine. Jeff Garrett and Ron Guth (2006) write that there were more than 5,000 examples of the 1857-S aboard when the ship sunk in an Atlantic hurricane. The 1985 discovery of the shipwreck and its treasure made many early double eagles available in high-grade condition.

Potent luster radiates from the brassy-gold surfaces of this Gem survivor, and a well executed strike delivers strong definition to the design elements. Were it not for a few minor grazes, this lovely coin might well grade even higher. Population: 27 in 65, 2 finer (11/08). *From The James Mossman Collection.* (#8922)

## Impressive Premium Gem 1857-S Spiked Shield Twenty, Ex: *S.S. Central America*

**4136 1857-S Spiked Shield MS66 PCGS.** Ex: *S.S. Central America*. Variety 20A. SSCA 0383. Although the 1857-S is the most numerous double eagle from the *S.S. Central America* shipwreck hoard, coins as lustrous and well preserved as the present Gem are scarce, especially when compared to the number of high-grade specialists in today's hobby. This is a beautiful double eagle, and the surfaces only show a handful of minor marks. A razor-sharp strike and frosty, orange-gold surfaces are included on this coin's list of positive attributes. A technically impressive piece with splendid eye appeal. (#70000)
***See: Video Lot Description***

## Attractive, Conditionally Scarce 1858-O Double Eagle, AU53

**4137 1858-O AU53 NGC.** After the San Francisco Mint opened in 1854, only small amounts of gold arrived in New Orleans for further coinage. Mintage figures quickly dwindled from that date until the end of operations at the start of the Civil War. From 1854 to 1861, New Orleans only coined an average of 14,000 double eagles per year, with the mintage of 35,250 coins in 1858 representing the largest annual production during the aforementioned period.

This double eagle is an attractive green-gold representative with a few minor bagmarks and hairlines, but generally pleasing surfaces. A few minute rim bruises are evident on the obverse. Traces of luster and hints of pale orange toning add to its overall eye appeal. Census: 36 in 53, 52 finer (11/08). (#8924)
***See: Video Lot Description***

## Rare, Well Struck 1858-O Double Eagle, AU55

**4138** **1858-O AU55 PCGS.** The 1858-O double eagle is scarce in any condition, which is apparent from PCGS/NGC population data that show somewhat over 200 coins, a number of which are likely resubmissions. Very Fine and Extremely Fine pieces are the best that can be readily obtained. About Uncirculated examples are rare, and Mint State coins are extremely rare, with a mere three certified specimens, none finer than MS62.

The yellow-gold surfaces of this Choice AU example display semiprooflike fields that highlight the devices. Above average definition is apparent on the design features, including the date, hair curls, and left obverse stars, areas that are often weak. Minute contact marks are scattered about. (#8924)

## Underrated 1859-O Twenty, AU50

**4139** **1859-O AU50 PCGS.** Indisputably, the 1859-O is an underrated issue in the Liberty double eagle series. As of (11/08), PCGS has certified only 41 pieces in all grades. Interestingly, other dates within the series are valued higher in hobby price guides. For example, the 1861-S Paquet twenty is listed at approximately twice the price of the 1859-O double eagle in AU50 condition, yet the PCGS population of 1861-S survivors is nearly double that of the 1859-O—-in AU50 and all grades combined. Even the two great O-mint Liberty double eagle rarities—the 1854-O and 1856-O—are valued at ten times that of the 1859-O, despite the fact that the PCGS *Population Report* indicates a ratio of approximately four 1859-O coins to one of each key-date survivor.

The documented mintage of 9,100 pieces is an immediate indication that the 1859-O is a rare date. Dave Bowers (2004) suggests an extant population of between 50 and 75 coins in all circulated grades up to AU58. He makes note of two Mint State examples, which correlates with current certified coin population data. PCGS shows one piece at the MS60 level, while NGC documents a single example graded as MS61 Prooflike. With such bleak statistics, even well heeled collectors are thrilled with the opportunity to own a AU50 example of this challenging date.

Moderately struck for the type, but well struck for the issue. The straw-gold coloration is even throughout. As always observed on 1859-O double eagle survivors, the surfaces are abraded and, at least on this example, mask the prooflike surfaces—traces of which can be seen within the recesses of the protected areas, and particularly so on the reverse. Population: 9 in 50, 18 finer (11/08). (#8927)

## Unusually Nice 1859-O Twenty, AU50

**4140 1859-O AU50 NGC.** Described by Doug Winter as "the fourth rarest New Orleans double eagle ... ." Combining NGC and PCGS population data reveals that the 1859-O twenty is indeed tied with the 1860-O as the fourth lowest in terms of population, inclusive of all grades. Treasure recovered from the *S.S. Republic* added two 1859-O double eagles to the NGC *Census Report,* with both pieces grading AU58. The *Republic* sank in October 1865 with a reported $400,000 of specie, mostly in the form of ten and twenty dollar gold pieces. The fact that only two 1859-O double eagles were recovered from the wreckage in 2003 reiterates the rarity of this issue.

This example is one of the latest die states observed. On the obverse, we note heavy clash marks, with bold remnants of the reverse's shield and glory rays present where Liberty's face meets her hair. The tips of two additional rays protrude from her throat. On the reverse attention is first drawn to a sizable die break extending from the rim through the left stand of E in UNITED and terminating at the tip of the eagle's right wing. Minor clash marks are visible in the field between the glory rays and the eagle.

In terms of eye appeal, the current offering is above average. Most 1859-O double eagle survivors are heavily abraded. And, although the assigned technical grade is accurate, the abrasions observed on this twenty are unusually subdued and not the least bit obtrusive. Semiprooflikeness in the protected areas and a firm strike add to the charm of this special coin. Census: 9 in 50, 34 finer (11/08). (#8927)

## Exceptional 1859-O Double Eagle, AU58

**4141 1859-O AU58 PCGS.** Every New Orleans double eagle coined after 1853 is an important rarity. While the 1854-O and 1856-O issues are recognized as premier U.S. coin rarities, other dates like this 1859-O (9,100-piece mintage) are less well-known. Doug Winter (2002) calls this issue the fourth rarest New Orleans twenty, following the 1855-O that ranks third. He writes:

> "The 1859-O double eagle is a very scarce issue in all grades. It is most often seen in Very Fine to Extremely Fine grades and it is rare in About Uncirculated. Most pieces in this grade range are no better than AU53, and the 1859-O becomes very rare in properly graded AU55."

PCGS and NGC combined have certified about 110 1859-O double eagles. The two services rate a mere three coins as Mint State.

This near-Mint State example exhibits a better strike than ordinarily seen. Specifically, all obverse stars are bold, and most of Liberty's hair is strong. The wing tips and tail feathers reveal some of the usual softness, but the remaining reverse motif details are sharp. The surfaces display exceptional, nearly complete medium yellow luster and hints of reflectivity near the devices. A few minute contact marks are scattered about, but these are fewer and of less severity than ordinarily seen. This is significant, because Winter writes: "Almost every known 1859-O double eagle shows deep abrasions on the surfaces."

Considering the above-average strike and lightly marked surfaces, this is a truly exceptional offering that will draw serious attention from New Orleans Mint collectors and those of high quality, rare gold coinage. Population: 4 in 58, 1 finer (11/08). (#8927)

## Rare Date 1860-O Double Eagle, AU53

**4142 1860-O AU53 NGC.** The coins of the Southern Mints have a strong appeal for collectors today. These antebellum issues speak eloquently to some element of the American psyche. Gazing at these coins conjures up visions of cotton fields, plantation houses, and the romantic allure of the Old South.

The present coin was part of the final full year of production before the Civil War. The New Orleans Mint was seized by the State of Louisiana in 1861, and then by the Confederate States of America. The Mint was then closed, not to reopen until 1879. That year saw the final production of double eagles at the New Orleans Mint.

From a small mintage of only 6,600 pieces, the 1860-O is a scarce coin in all grades. Most coins seen are in XF or lower grades and uncirculated examples are prohibitively rare. Unlike some other issues from this era, the available supply of this date has not been augmented by shipwreck finds. Only one specimen was found in the wreckage of the *S.S. Republic*. Experts estimate a surviving population of fewer than 100 pieces, and Q. David Bowers reports the coin is "impossible" in Mint State.

As a representative of this date, the present coin is difficult to improve upon, with a relatively high technical grade and outstanding eye appeal. As seen on most examples of this date, the hair details are lightly defined, but much original detail remains on all design elements. Wear is even and only shows on the highest points. The coin possesses prooflike, reflective surfaces, and abrasions are minimal for the grade. Eye appeal is strong in all areas. Census: 15 in 53, 20 finer (11/08). (#8930)

## Historical 1861-O Twenty Dollar, XF40

**4143** **1861-O XF40 NGC.** The 1861-O double eagle was struck under three different governing authorities: the United States, the State of Louisiana, and the Confederacy. It is impossible to state with certainty who struck which coins. Jeff Garrett and Ron Guth (2006) estimate that fewer than 200 coins are known in all grades, most of which are Very Fine, Extremely Fine, or low-end About Uncirculated.

The brassy-gold surfaces of this XF example retain traces of luster in the protected areas. The design features reveal the typical softness in portions of Liberty's hair and in some of the obverse star centers. Distributed minute marks are less numerous and severe than typically encountered on surviving examples. (#8934)

## Historic 1861-S Double Eagle
## Paquet Reverse, AU53

**4144 1861-S Paquet AU53 PCGS.** In late 1860, Anthony Paquet produced a new style of reverse die for the double eagle. Paquet's design was characterized by taller, thinner letters in the peripheral inscriptions and a narrow reverse rim. Dies were shipped to the branch Mints at New Orleans and San Francisco (four pairs), and production commenced at Philadelphia on January 5, 1861. Unfortunately, the narrow rim caused problems in the striking process, and Mint Director James Ross Snowden ordered a halt to production with the new dies. Messages were immediately sent to New Orleans and San Francisco to cancel production at those facilities. The message to New Orleans arrived by telegraph in a timely manner, and no coins were minted there. The situation in San Francisco was more complicated, as the telegraph lines were only completed as far as St. Joseph, Missouri. From that point, the message was carried by overland express. Snowden's instructions did not reach San Francisco until February 2, 1861. Production was halted immediately, but 19,250 double eagles had already been coined, using two of the new reverse dies, in the time required for Snowden's directive to reach authorities in San Francisco.

The coins struck in this time period were paid out to customers and circulated readily in the local economy, or were shipped overseas. Today, approximately 200 examples of this romantic issue survive, making it the rarest double eagle of the San Francisco Mint.

Little notice was taken of the Paquet reverse in contemporary numismatic circles. W. Elliot Woodward auctioned one of the extremely rare Philadelphia specimens on March 20, 1865, and took notice of the different design. Another Philadelphia example was featured in Edward Cogan's sale of the Cohen Collection in 1875. These two coins are believed to be the only extant specimens of the Paquet Reverse double eagle from the Philadelphia Mint. They continued to appear in various auction catalogs over the years, but no example of a San Francisco double eagle with this reverse was mentioned in auction catalogs of the 19th century. The July 1895 issue of the *American Journal of Numismatics* had some discussion of this issue, and Nathan M. Kaufman had one of the coins in his collection, but he may not have noticed the difference between his coin and the regular-issue 1861-S double eagles. All knowledge of the San Francisco Paquet Reverse double eagles eventually faded from the numismatic community.

Numismatists were startled when an 1861-S double eagle with a strange reverse was discovered under an old barn in Hull, Texas in 1937. Initially believed to be unique, the coin was widely publicized and discussed. With heightened awareness of the issue, numismatists began to discover more examples. Today approximately 200 pieces are known, all in circulated grades.

With respect to grade, the present coin is in the top 20% of surviving examples. A few specimens have been certified at the AU58 level, but no Mint State coins are known. The coin exhibits gentle, even wear on the high points, with a minimum of abrasions and no serious problems. Attractive yellow-gold color suffuses the surfaces, with hints of rose in the fields. We expect spirited competition for this scarce and elegant prize. Population: 10 in 53, 7 finer (11/08). (#8936)
***See: Video Lot Description***

A 15% BUYER'S PREMIUM ($9 MIN.) APPLIES TO ALL LOTS.

## Legendary 1861-S Double Eagle
## Paquet Reverse, AU58

**4145** **1861-S Paquet AU58 PCGS.** The Paquet reverse double eagle is one of the great "story" coins in American numismatics. Late in 1860, Anthony C. Paquet, assistant engraver at the Mint, designed a new reverse die for the double eagle. The new reverse followed the basic pattern of Longacre's classic design, but it differed in several important respects. Paquet used a new set of letter punches for the legend and denomination in the design. The new letters were taller and thinner, and the spacing between the letters was tighter. The oval of stars was located below the rays on the Paquet reverse, instead of mingling with them, as seen on the old design. Most important, Paquet's design featured an extremely narrow rim, in order to leave room for the taller letters. This narrow rim had unforeseen consequences for the production of double eagles in 1861. Four pairs of the new double eagle dies were sent to San Francisco in November 1860 and three pairs were sent to New Orleans.

When coinage began at Philadelphia on January 5, 1861, the coiners noticed problems with the new reverse die. Because the planchets for the double eagles had their edges upset before striking, and the edges were upset to accommodate the width of the old rims, the new narrow rims on the dies did not match up well with the upset rims on the planchets. This seems to have caused excessive wear and breakage of the dies. The coiners also felt the new narrow rims would wear down quickly in normal use. When these issues were brought to the attention of Mint Director James Ross Snowden, he ordered a halt to production with the new dies.

Snowden also sent telegrams to the Mints at New Orleans and San Francisco to halt production at those facilities. The message reached New Orleans in good time, and no coins of this type were minted there. The notification of the Mint at San Francisco could not be accomplished so readily. The telegraph lines had only been completed as far as St. Joseph, Missouri. Beyond this point, the message had to be hand carried overland to California. When Snowden's directive reached San Francisco on February 2, 1861, production of double eagles had been underway for some time. Superintendent Charles Hempstead replied on February 9, 1861, "I have the honor to acknowledge the receipt of your favor of the 5th, 'overland,' which however did not come to hand until the 2nd. I was, therefore, unable to prevent the striking and issuing of a large number of double eagles, coined with the new dies. The amount issued was $385,000." This mintage had been accomplished using two of the new reverse dies shipped to San Francisco.

A total of 19,250 Paquet Reverse double eagles was coined before the order to halt production was received. The entire mintage was released into circulation, with the result that there are no Mint State examples of this issue known today. The coins circulated extensively at the time, and some were sent overseas, to be discovered in European holdings many years later. The difference in the reverse design does not seem to have been much noticed by the general public at the time of issue. In time, the coins became scarce and the story of this remarkable design was little known or remembered.

The numismatic community was surprised and delighted when the San Francisco Mint Paquet Reverse double eagle was rediscovered in 1937. An example found under an old barn in Hull, Texas re-ignited interest in this issue, which had been completely forgotten in the interval. With new awareness of the issue, more specimens were found in old-time collections and European hoards. Today, perhaps 200 specimens are known, making the issue the rarest double eagle of the San Francisco Mint.

The present coin is one of the finest surviving specimens of this interesting design. While there are no known Mint State examples of this issue, this specimen only misses by a whisker. Only the slightest friction is evident on the highest points of the design. Most of the original mint luster remains, and the vibrant orange-yellow color is still undimmed. Overall eye appeal is excellent, and this coin is worthy of a place in the most advanced U.S. gold collection. Population: 2 in 58, 0 finer (12/08). (#8936)

***See: Video Lot Description***

## Appealing 1862 Double Eagle, AU58 ★ Scarce Civil War Date

**4146** **1862 AU58 ★ NGC.** The 1862 double eagle is one of the rarest Type One double eagles from the Philadelphia Mint. Wartime uncertainty caused rampant hoarding of "hard money" during this Civil War year. Accordingly, the Mint reduced mintages of all denominations. The double eagle mintage dropped dramatically at the Philadelphia Mint, from nearly 3 million pieces in 1861 to a mere 92,133 coins in 1862. Today, this issue is elusive in all grades.

The present coin is a desirable example of this scarce date. The strike is sharp, with crisp detail on the hair and feathers. The surfaces are prooflike, with grade defining hairlines and abrasions. The overall eye appeal has earned the prestigious star designation. (#8937)

## High-End 1865-S Double Eagle, MS64 From the *Brother Jonathan*

**4147** **1865-S MS64 PCGS.** The availability of the 1865-S has been drastically changed in the last 10 years by some remarkable shipwreck finds. The date was once considered a rarity in high grades, and Harry Bass had to settle for an XF specimen in his remarkable collection. The recovery of more than 500 pieces from the *S.S. Brother Jonathan* and 250 more from the *S.S. Republic* changed that situation dramatically. Today, the 1865-S is one of the most available dates in the Type One double eagle series, and a favorite choice of type collectors.

The present coin is a high-end example of this popular date. Recovered from the wreck of the *S.S. Brother Jonathan,* this specimen has been preserved virtually as struck. The surfaces are lustrous and attractive, and eye appeal is outstanding. Population: 128 in 64, 24 finer (12/08). (#8944)

## Uncommon 1866-S No Motto Double Eagle, XF45

**4148** **1866-S No Motto XF45 NGC.** Most San Francisco Mint double eagle issues are common in circulated grades. There are two major exceptions: the 1861-S Paquet Reverse, and the 1866-S No Motto. The latter has a *Guide Book* mintage of just 12,000 pieces, which compares favorably with the usual S-mint production of more than half a million coins. Double eagles had no collector value until decades later, and the 1866-S No Motto pieces circulated like any common gold coin into the 20th century. In 2004, Q. David Bowers estimated that only 175 to 250 examples have survived.

This is an attractive representative that shows ample luster within the protected areas. The obverse field has scattered minor marks as expected for the grade, but none are severe, and the overall eye appeal of the piece is superior for the XF45 level. (#8945)

***See: Video Lot Description***

## Low Mintage, High Grade 1871 Twenty, MS62 Ex: Norweb

**4149** **1871 MS62 PCGS.** Norweb. The 1871 is a low-mintage Type Two twenty with a production of only 80,150 pieces. It is also one of the best produced of all Type Twos. When Breen published his *Complete Encyclopedia* in 1988 he tersely stated: "Unobtainable Unc." In November of that same year the Norweb 1871 was offered at public auction and brought a remarkable $9900. In the Norweb catalog it was speculated this might be a coin that was set aside by the Assay Commission—that is how rare Uncirculated examples were of this date. Since that time a small number have surfaced and been certified by PCGS and NGC. From these few Uncirculated coins seen it is now known that there are two different finishes, one frosted and the other semiprooflike. This is definitely in the latter category with moderately reflective fields. As with many higher grade 1871s seen, this piece is fully defined. A few grade-limiting slide marks are seen over the high point of Liberty's face and in the left obverse field, but otherwise there are no defects that are worthy of individual mention. Deep reddish-gold color covers both sides of this exceptional Type Two issue. Population: 4 in 62, 3 finer (11/08).

*Ex: Peake Collection (New Netherlands, 6/1955), lot 28; Norweb III (Bowers and Merena, 11/1988), lot 4000.* (#8960)

## Fabulous Near-Mint 1871-CC Double Eagle

**4150** **1871-CC AU58 NGC.** Mintages from the first year of operation for the Carson City Mint were universally humble, but in 1871, though production was still small compared to Philadelphia or even San Francisco standards, it represented a great leap forward for that frontier Mint, with nearly five times as many double eagles struck in 1871 compared to 1870. The 1870-CC twenty is one of the great Carson City rarities, and while the 1871 has a substantially higher original mintage, in terms of survivors, it is surprisingly close to its counterpart from the year before.

A prime factor is the nature of double eagle circulation at the time. While other, later Carson City double eagle issues were used in international trade and stored in vaults for years or even decades at a time, the earliest CC-mint twenties, including the 1870 and 1871 issues, circulated extensively in and around Nevada. This makes substantially worn and heavily abraded coins the rule rather than the exception, and the collector who expects to find an attractive 1871-CC double eagle quickly and easily will be disappointed most of the time.

This near-Mint representative offers excellent eye appeal for the issue with immensely lustrous lemon-gold surfaces that show only a trace of friction. Though a number of light to moderate marks pepper the softly struck portrait and the nearby fields, the eye appeal remains impressive. A coin worthy of consideration for the finest Carson City cabinet. Census: 21 in 58, 6 finer (11/08). (#8961)

## Impressive Select 1876 Double Eagle

**4151** **1876 MS63 NGC.** The last of the Type Two double eagle issues from Philadelphia, represented here by a remarkable Select coin. The strike is solid overall, with only slight softness visible at the central hair, and the surface preservation is impressive for the grade assigned. Most striking about this piece is its luster, potent and lively with occasional glimpses of peach against otherwise yellow-gold fields. Despite the relatively high mintages that most Type Two double eagles enjoyed, few were saved, and Mint State pieces are challenging as a consequence. Census: 40 in 63, 9 finer (11/08).
*From The James Mossman Collection.* (#8976)

## Better Date 1878-CC Double Eagle, AU58

**4152** **1878-CC AU58 PCGS.** Variety 1-A, the only known. The 1878-CC twenty is a scarce, low mintage issue that enjoys perpetual demand from advanced gold collectors and Carson City specialists alike. Perhaps fewer than a dozen Uncirculated pieces survive, lending added importance to those that approach Mint State quality. This bright, shimmering AU58 representative is modestly abraded for the grade and mintmark, and shows only the slightest interruption of luster on the highpoints of the obverse. Sharply struck throughout. Desirable quality for this sought-after CC twenty. Population: 9 in 58, 6 finer (11/08).
*From The Baltimore Collection.* (#8986)

## Popular 1893-CC Twenty, MS62

**4153** **1893-CC MS62 NGC.** The surfaces are bright with a slight reddish tinge on each side. The devices are lightly frosted with a glimmer of semireflectivity in the fields on both obverse obverse and reverse—giving the coin a well-balanced appearance. Almost all the design features are sharp including Liberty's hair, the obverse stars, and the eagle's plumage. The 1893-CC us not one of the rarer CC twenties but it is always of interest to collectors as these pieces were produced during the final year of coinage operations at the Carson City Mint. At the MS62 level, it ranks as an important condition scarcity. (#9023)

# PROOF LIBERTY DOUBLE EAGLES

## Seldom Encountered 1872 Double Eagle Rare Proof Date, PR62 Cameo

**4154 1872 PR62 Cameo NGC.** Offerings of 1872 gold proof sets have been few and far between over the years. The National Numismatic Collection includes a full proof set of this year, delivered directly from the coiner on February 3, 1872. The American Numismatic Society Collection also boasts a set, courtesy of J.P. Morgan and R.C. Brock. T. Harrison Garrett once owned a set, but it was broken up. The only complete 1872 gold proof set offered at auction in recent times seems to be the one in the James Stack Collection (Stack's, 3/1995), lots 799-805. As the coins were offered singly, this set may no longer be intact.

Offerings of single specimens of this issue are also uncommon. A search of auction records reveals only two specimens offered by Heritage since 1993, one in the 2006 FUN Auction, and the other in the April 2006 ANA sale. Offerings from other auction firms have been similarly infrequent.

As may be surmised by the small number of auction appearances, the 1872 double eagle is a rare date in proof. From a tiny proof mintage of only 30 pieces, the surviving population is extremely small. in his encyclopedia, Walter Breen estimated only 8-10 specimens extant. In *Type Two Double Eagles 1866-1876,* Doug Winter and Michael Fuljenz concur, with an estimate of approximately 10 examples known. In *A Guide Book of Double Eagle Gold Coins,* Q. David Bowers lists 12 pieces certified, which may include duplicate submissions, and an estimated field population of 10-12 examples. In any case, twenty pieces would seem to be a generous estimate of the surviving population.

The present coin is an outstanding representative of this rare issue. The fields are deeply reflective, and contrast boldly with the strongly impressed devices. The coin richly deserves its Cameo designation. A few hairlines in the fields probably account for the grade. Census: 1 in 62 Cameo, 1 finer (11/08). (#89087)

## Extremely Rare 1878 Double Eagle, PR64 Deep Cameo

**4155 1878 PR64 Deep Cameo PCGS. CAC.** The date is low in the field and slants slightly up to the right, with the left base of the 1 over the right side of a dentil. The J in J.B.L. is over the center of the first 8. The reverse die is well executed, with a diagonal die line through the base of the P in PLURIBUS to the top of the scroll between the E and P.

A truly amazing Choice Deep Cameo proof double eagle, this piece has extraordinary orange-gold surfaces and deeply mirrored fields around highly lustrous, frosty devices, creating excellent aesthetic appeal. All design elements are boldly detailed from the careful proof production. Once this formidable rarity is sold, the opportunity to acquire a duplicate may be a long time away, regardless of the amount of money available. For rarities such as this proof twenty, finding the coin is the objective, and the price paid will be unimportant.

This extremely rare proof double eagle survives from a minuscule mintage of just 20 pieces that year. Few numismatists had a desire, or finances, to collect large proof gold coins at that time, so the mintage reflects the small number of collectors who actually did pursue such numismatic delicacies. Today, approximately half of the original mintage survives, including an example in the American Numismatic Society collection, and another in the Smithsonian Institution.

An exhaustive study of proof specimens that have appeared in past auctions, one of the niceties of numismatic study, yields a roster of exactly 11 pieces that we believe are different. Two of those are in museums as noted, and two others are impaired, leaving just seven attractive proof pieces available to collectors. Of those seven, the Eliasberg piece appears to be the finest known, followed by the present coin as second finest known. Our complete roster of all 11 examples is presented here, with the understanding that there is the possibility that one or two of the following examples may be duplicates. Currently, NGC and PCGS have certified a total of 14 submissions, showing with certainty the existence of resubmissions. Certified grades include the following: PR66 Deep Cameo (1), PR65 Cameo (2), PR64 Deep Cameo (7), PR64 Cameo (1), PR64 (1), PR63 (1), and PR62 Cameo (1).

1. **PR67**. David S. Wilson (S.H. Chapman, 3/1907); Clapp Collection (1942); Eliasberg Collection (Bowers and Ruddy, 10/1982), lot 948; later, Ed Trompeter Collection; Heritage Galleries.
2. **PR64 Deep Cameo PCGS.** N.M. Kaufman Collection; RARCOA (8/1978), lot 927; Auction '84 (Paramount, 7/1984), lot 968; Superior (6/1987), lot 2881; Bowers and Merena (8/1999), lot 450; Superior (6/2000), lot 2351; Heritage (8/2004), lot 7691. **The present specimen.**
3. **PR64 Deep Cameo.** Smithsonian Institution.
4. **PR64**. Superior (6/1987), lot 2882.
5. **PR64 PCGS**. Bowers and Merena (8/1996), lot 424.
6. **PR63 Star Cameo NGC.** Superior (7/2005), lot 585; Superior (5/2006), lot 1257; Heritage (8/2006), lot 5690; Heritage (1/2007), lot 3754.
7. **PR63 PCGS**. Stack's (6/6/1973); Harry W. Bass, Jr. (Bowers and Merena, 10/1999), lot 1868.
8. **Proof.** Garrett Collection (Stack's, 3/1976), lot 458.
9. **Proof.** American Numismatic Society.
10. **PR50**. Heritage (5/2000), lot 6868.
11. **PR40**. Heritage (10/1994), lot 7187.

## Extraordinary 1885 Double Eagle Rarity, PR65 Ultra Cameo

**4156 1885 PR65 Ultra Cameo NGC. CAC.** The date is about centered between the bust and the border, but placed far to the right, with the J in J.B.L. over the extreme left edge of the first 8. The left base of the 1 is over the center of a dentil. The reverse is nicely made, although the far right tail feather is broken.

The fields of this incredible Gem proof have the usual watery or wavy appearance that is so highly prized. Both sides are brilliant with fully mirrored fields of seemingly unending depth. The bright yellow devices are fully lustrous with frosty texture. A tiny planchet flake directly below star 8 is ineffective as a pedigree marker, as at least one other example has a similar planchet flake in almost exactly the same location. Most estimates suggest that 15 to 20 examples survive from the original 78 coin mintage. Our roster below, itemizes what we believe are 18 distinctly different pieces, although there is some possibility of duplication.

**1. PR66 Deep Cameo PCGS**. Bowers and Merena (10/2005), lot 7643; Bowers and Merena (5/2007), lot 414.
**2. PR66 Cameo NGC**. Stack's (10/1990), lot 1467; Bowers and Merena (3/2004), lot 3226.
**3. PR66 Cameo NGC.** Garrett Collection (Stack's, 3/1976), lot 488; Heritage (8/1998), lot 7919.
**4. PR65 Ultra Cameo NGC**. Stack's (3/2008), lot 1333 **The present specimen.**
**5. PR65 Deep Cameo.** Smithsonian Institution.
**6. PR65 Cameo NGC.** Heritage (3/2003), lot 8562; Heritage (11/2003), lot 7975.
**7. PR65**. Eliasberg Collection (Bowers and Ruddy, 10/1982), lot 968.
**8. PR65 PCGS**. Superior (2/1973), lot 934; later, Harry W. Bass, Jr. (Bowers and Merena, 10/1999), lot 1895.
**9. PR65 PCGS.** Bowers and Merena (9/1993), lot 3222.
**10. PR65** Stack's (5/1974), lot 529
**11. PR64 Deep Cameo.** Smithsonian Institution.
**12. PR64 PCGS** Superior (8/1991), lot 823
**13. PR64 NGC**. Ed Trompeter Collection (Superior, 3/1992), lot 3226.
**14. Choice Proof.** Ellis Robison Collection (Stack's, 2/1979), lot 851; Stack's (6/2003), lot 851.
**15. Choice Proof.** Stack's (1/2006), lot 3302
**16. PR63**. N.M. Kaufman Collection. Lot 936; RARCOA (Auction '80, 8/1980), lot 1986; Stack's (Auction '86, 7/1986), lot 444; Superior (6/1987), lot 2886.
**17. PR58 NGC.** Heritage (8/2001), lot 8201
**18. PR50.** Stack's (3/1990), lot 1444.
*Ex: Stack's (3/2008), lot 1333.* (#99101)

## Enticing PR63 Cameo 1891 Double Eagle

**4157** **1891 PR63 Cameo NGC.** Regardless of the mintage of this issue's business-strike counterpart, the proof 1891 double eagles would be important prizes, not least thanks to a stated mintage of 52 pieces. Thanks to the business-strike production of 1,390 pieces for the circulating coins of the same year, however, the proofs get an added boost. While not enhanced in value to the same extent as dates like the 1883, 1884, or 1887, where proofs are the only option for a Philadelphia double eagle of that year, the bonus is nonetheless perceptible when perusing auction records.

Though the mintage of 52 pieces is similar to that of the 1889 and 1890 twenties, it is slightly more available in general than its fellows. Garrett and Guth estimate that "20 to 25 coins remain of the original mintage." By contrast, the numbers supplied by the authors for the other issues are 15 or less. This additional availability is likely to remain a mystery, but it has little impact on the coin's collectability.

The present Select Cameo coin is impressively mirrored beneath thin layers of distinctly milky patina, and rich sun-yellow luster shines through. The strike is sharp, as demanded of proofs, and subtle violet overtones grace the margins. Contrast is solid if not absolute, with considerable frost gracing the portrait and eagle. Though a handful of faint hairlines are visible in the fields, the overall visual appeal is strong. Census: 1 in 63 Cameo, 7 finer (11/08).

# Breathtakingly Beautiful 1891 Proof Double Eagle
# PR67 Ultra Cameo
# One of the Finest Known Survivors

**4158 1891 PR67 Ultra Cameo NGC.** Shortly after the 52 1891 proof double eagles were struck, George Heath, William Jerrems, David Harlowe, J.A. Heckelman, and John Brydon, convened with 61 charter members at the Commercial Hotel at the corner of Lake and Dearborn streets in Chicago for the inaugural convention of the American Numismatic Association. The initial membership was scant, but the push for a numismatic organization nationwide was indicative of the growing movement of coin collecting in America. The August 1891 edition of *The Numismatist* made note of the growing number of collectors: "There are said to be over 20,000 collectors of coins in this country. While we believe this to be much too high an estimate, we will, in the absence of proof to the contrary, accept it." The suggested number of collectors was likely an exaggeration that included passive collectors of the type to assemble a date set from circulation, but not acquire a premium specimen of any coin directly from the Mint. That would explain the minuscule mintages of proof issues in the latter part of the 19th century; the logic being that the Mint, which was technically a coin dealer by then, would have increased production of proof issues to meet with collector demand.

Fortunately, at least some of the collectors who procured proof coins from the Mint were astute custodians of these numismatic delicacies. The November 1891 edition of *The Numismatist* provided the new membership with advice on the care of coins: "The less coins and medals are handled, the better; we should avoid allowing anyone unused to handling coins to do so; as damp or sweaty hands start a corrosion on the coins. ... Coin cleaning should never be indulged in except it be absolutely necessary. Many a valuable coin has been ruined by cleaning. More or less injury cannot be avoided in this process." This sage advice—at least partially—accounts for the relatively low attrition rate of 1891 proof twenties, and the exemplary condition of a few of the survivors. Of the 52 pieces struck, Akers estimated in 1982 an extant population of 20 to 25 examples. Writing a quarter of a century later, Garrett and Guth, in their *Encyclopedia of U.S. Gold Coins,* suggest the same rate of survival.

The NGC *Census Report* documents two 1891 proof double eagles at the PR67 Ultra Cameo level, with one piece grading higher as of (11/08). The finest graded specimen is the PR68 ★ Ultra Cameo coin that Garrett and Guth believe to be pedigreed to the Harry W. Bass, Jr. collection. In fact, Jeff Garrett noted the same coin to be the "finest proof ever seen." That immaculate work of art was sold as part of our 2006 FUN sale where it realized $299,000. The current offering is comparable in quality to the Bass coin, as evinced by NGC's lofty grade designation. Although examples do exist in wonderful states of preservation, the fact that only 25 or so pieces exist provides obvious barriers for even the wealthiest of collectors. Of the couple of dozen extant 1891 twenties, only eight coins have been certified above the Gem level by NGC and PCGS combined. As a result, several notable collections contained an inferior example, or were lacking an example of this issue altogether. As a case in point, the Norweb specimen was graded PR50 by the cataloger of that sale in November 1988. Further collecting pressure is caused by the fact that the business strike mintage of 1891 Philadelphia twenties was a staggeringly low 1,390 coins, of which only 100 survivors are believed extant.

Splendiferous cameo contrast inspires the awe of anyone examining this double eagle. Frosty orange-gold devices seemingly float atop darkly mirrored fields, which display a subtle "orange peel" effect. We strain to find a single flaw worthy of mention, as should always be the case with a Superb Gem proof coin. This memorable specimen is sure to witness feverous bidding activity when it crosses the auction block.

*From The Scott Rudolph Collection.* (#99107)

***See: Video Lot Description***

## Contrasting 1892 Double Eagle, PR64 Cameo

**4159** **1892 PR64 Cameo NGC.** The date is about centered with the J of J.B.L. over the inside left curve of the 8. The left base of the 1 is over the left edge of a dentil. The reverse has a broken right tail feather, a characteristic of several different dates in the proof double eagle series.

In 1892 the Mint produced a mere 93 proof double eagles, as just 4,430 others for circulation. There is no doubt that some of the proofs remained unsold at the time, later to be melted. Some others that were sold eventually found there way into circulation by heirs to collectors who didn't realize that the coins were worth a premium. Probably about 25 to 35 examples of the original production still survive in various grades, along with less than 200 business strikes in various grades. The Smithsonian Institution has two pieces, and the American Numismatic Society has one piece. In addition we have a database of 42 different auction appearances that date back to Abe Kosoff's sale of November 1971. The average time between offerings is about 11 months.

The mirrored fields and lustrous devices on this yellow-gold proof are subdued by hazy surfaces with hairlines on both sides. There are no singular spots or blemishes to aid the search for a prior provenance. The number of survivors is far smaller than the demand for examples of this date, so the present opportunity should be given careful consideration. (#89108)

## Exceptional 1898 Double Eagle PR65 Deep Cameo

**4160** **1898 PR65 Deep Cameo PCGS.** Just 75 proof double eagles were struck in 1898, and possibly half that number survive today. Combining the estimates of Walter Breen and David Akers, somewhere between 30 and 40 proofs of this date survive. The real number of survivors may be even higher, perhaps as many as 50 coins. PCGS and NGC have combined to certify a total of 78 submissions, in this case a figure that is guaranteed to include resubmissions as it is more than the original mintage. Of the proofs certified only 18 pieces have received the Deep / Ultra designation. Just 15 of the 78 coins certified by these two services have received higher grades than the coin offered here. As resubmissions tend to increase with higher numerical grade, we might suggest that only three or four finer examples exist. The relatively high number of Cameo and Deep / Ultra Cameo coins that are known undoubtedly is a reflection of the stringent quality standards seen across the board for all proof coins in 1898. As a result, proofs from this year are often used for type purposes.

This example is outstanding in its aesthetic appearance with deep yellow gold fields and richly lustrous devices—the combination of which give this coin its stark cameo appearance. Each side is virtually perfect. Close examination and a critical eye aided by a strong loupe will be needed to discern what separates this outstanding coin from an even higher grade. (#99114)

## Impressive 1900 Liberty Double Eagle PR65 Cameo

**4161** **1900 PR65 Cameo NGC.** The date is centered between the bust and the border, with the left edge of the base of the 1 over the center of a dentil. The J in J.B.L. is centered over the inside and outside left curves of the 9. The reverse is well executed with only slight unfinished work at the bottom of the spaces between the vertical shield stripes.

With a mintage of 124 pieces, the current number of survivors is estimated to be in the range of 50 to 60 coins. Jeff Garrett and John Dannreuther write: "Although the number of coins known for this date is relatively high for a Proof Liberty Head double eagle, many are impaired or otherwise damaged. There are probably around 50 examples known in all levels of preservation. The 1900 double eagle is seen with and without cameo devices." Based on their discussion, it can be presumed that the present piece is finer than most survivors. NGC has certified 32 proof 1900 double eagles, including 21 Cameo pieces and seven Ultra Cameo coins. The average numerical grade of all 32 submissions is PR64.6.

A modest obverse planchet flake attached to the inside point of star 12 may help to assist in pedigree research, as there are no other significant marks on either side. Only a few other tiny planchet flakes can be seen on either side, with some faint reverse hairlines. The intricately detailed obverse and reverse design motifs have a light coat of frosty yellow luster, surrounded by fully and deeply mirrored yellow-gold fields. (#89116)

## Wonderful 1904 Twenty, PR65 Cameo

**4162** **1904 PR65 Cameo PCGS.** The official mintage of proof 1904 twenties was recorded at 98 pieces by the Philadelphia Mint. As such, the combined total of 104 graded examples at NGC and PCGS can most easily be explained by the phenomenon of multiple resubmissions of the same coin, although it is also possible that more than 98 pieces were struck. At the end of the day, it is likely a combination of both factors. Of the surviving population of 1904 proof double eagles, most are lacking cameo contrast between the fields and the design devices. Bowers (2004) provides an explanation: "The portrait was polished in the die ... yielding a satiny, but not frosty finish." Jeff Garrett provides offered a similar insight when he wrote in 2006 that "most of the examples seen also have very little, if any, cameo surfaces."

The specimen offered here is an exception. Well preserved, glassy fields adjoin lightly frosted devices and the coloration is a stunningly rich orange-gold hue. Its surface quality and field-to-device contrast was enough to earn this piece a PR65 Cameo grade at PCGS—one of only 8 to do so, with none finer (11/08). In terms of quality and overall eye appeal, this proof survivor edges out the Smithsonian Institution example, which is an uncertified coin graded as PR64 Deep Cameo by the authors of the *Encyclopedia of U.S. Gold Coins*. And, since the formation of our online auction archives in 1993, this is only the second PR65 1904 double eagle, regardless of surface designation, that we have had the privilege to handling. That coin—a PR65 Ultra Cameo graded by NGC—was lot 1763 in our March 2008 ANA sale, where it realized $109,250. (#89120)

# HIGH RELIEF DOUBLE EAGLES

## 1907 High Relief, Wire Rim Twenty, AU58

**4163 1907 High Relief, Wire Rim AU58 NGC.** A respectable near-Mint State example of one of America's greatest coin issues. The strength of luster on this yellow-gold piece is commensurate with the assigned grade. A small abrasion beneath the branch in the right obverse field is noted, although the overall surface quality is nicer than one would expect to find on an AU58 survivor. The collector demand for High Relief twenties is always higher than the supply, despite a combined certified population well into the four-digits. Because the beauty of Saint-Gaudens' Roman Numerals double eagle design is undeniable and popular, the High Reliefs were less affected than other issues during the gold meltings of the late 1930s. (#9135)

## Impressive MS63 1907 Double Eagle High Relief, Wire Rim

**4164 1907 High Relief, Wire Rim MS63 PCGS.** Wire Rim. An easily-seen wire rim encircles the entire obverse periphery of this Select Mint State specimen. Every collector and investor in U.S. numismatics dreams of owning an example of this fabulous coin type. As a result, demand always outstrips supply. This lovely representative appears to the unaided eye to grade at least one point higher than the PCGS holder indicates. After close inspection with a magnifier, a few trivial flaws are found, including a couple of tiny marks below the knee and several rim nicks on the obverse, between 3 and 6 o'clock. If not for these relatively minor defects, this appealing High Relief piece would undoubtedly grade even higher. A highly attractive coin that should appeal to the discerning specialist. (#9135)

A 15% BUYER'S PREMIUM ($9 MIN.) APPLIES TO ALL LOTS.

## Attractive 1907 High Relief, Wire Rim Double Eagle, MS63

**4165** **1907 High Relief, Wire Rim MS63 PCGS.** Wire Rim. This is a very appealing example which is better preserved and more attractive than the grade might suggest. Well struck, with bold details on Liberty's fingers, head, and hair tresses. A small abrasion is noted on Liberty's upper left (facing) leg. The usual wispy die lines are noted on the reverse fields, and a couple of shallow luster grazes appear on the lower reverse, between the top edge of the sun and the eagle's belly. A lovely example of a coin type which is always in considerable demand, due to its status as a first-year issue with a limited mintage and closer ties to its creator, Augustus Saint-Gaudens, than the later versions of his monumental double eagle design. (#9135)

## Striking 1907 High Relief Twenty Wire Rim, MS64

**4166** **1907 High Relief, Wire Rim MS64 PCGS.** Exceptionally well-detailed with stark, three-dimensional details on the central devices. The satin-like surfaces have a number of fine die polishing marks in the fields, as usual. The only marks of any consequence are located on the lower reverse, and both obverse and reverse show a bold wire rim. Though some numismatic scholars decry the attention paid to (and prices paid for) the High Relief twenties, noting how issues with lesser mintages are priced much lower, many more go with the collecting flow and acknowledge the Wire Rim double eagles' popularity. *From The Calvin Collection.* (#9135)

## Crisp Choice 1907 High Relief, Wire Rim Twenty

**4167 1907 High Relief, Wire Rim MS64 NGC.** The recent announcement of the Mint's 2009 Ultra High Relief double eagle, a project that promises to fulfill the vision of Augustus Saint-Gaudens in a form accessible to more than just a handful of fortunate numismatists, has brought the original High Relief twenties increased popularity. The present Choice piece shows a strong obverse wire rim and uncommonly strong luster in the lemon-gold fields. Boldly impressed as always with a profound, sculptural quality to the well-preserved central devices. An excellent piece to obtain in anticipation of the 2009 Ultra High Relief pieces.
*From The Martin L. Diffenbaucher, Jr. Collection.* (#9135)

## Nice Near-Gem 1907 Wire Rim, High Relief Twenty

**4168 1907 High Relief, Wire Rim MS64 PCGS.** The population of 1907 High Relief twenties drops precipitously beyond the MS64 level. Collectors can expect a full Gem piece to cost nearly double that of an MS64 example. For this reason, near-Gems—such as the current offering—elicit much attention when appearing at auction. Dave Bowers, in his *Guide Book of Double Eagle Gold Coins* (2004), offers the following advice to those pursuing a 1907 High Relief double eagle: "Select an example with care, checking the high parts of the relief for rubbing or marks, particularly at Miss Liberty's bosom and, most obviously, on her knee." For the current offering we note only one mark worthy of mention; a small abrasion on Liberty's left shin. Otherwise, the high points are pleasantly well preserved and the luster is rich. For identification purposes, a copper-like toning spot is observed at the 3 o'clock obverse rim. The immediate eye appeal of this Wire Rim twenty is comparable to that of a finer piece. (#9135)

## Exceptional MS65 1907 High Relief Twenty

**4169 1907 High Relief, Wire Rim MS65 PCGS. CAC.** President Roosevelt believed U.S. coinage at the turn of the last century was bland and uninspired. In fact, he went even further and said it was "artistically of atrocious hideousness." Roosevelt did know what he liked, and he liked the inaugural medal done by Augustus Saint-Gaudens after his election in 1904. He summoned the sculptor to the White House in 1905 and they spoke at length about coinage. Both agreed the high point of artistic achievement in coinage was realized by the high relief coinage of the ancient Greeks.

Roosevelt enlisted Saint-Gaudens support for redesigning U.S. coinage. It took two years for the sculptor to work the coin designs in between his other commissions. Mint procrastination was also a factor in the delay of the production of the coins, in part caused by Mint personnel's unfamiliarity with the striking of high relief coinage. At last an exasperated Theodore Roosevelt exclaimed, "Begin the new issue even if it takes you all day to strike one piece." The ten dollar design was a modification of his monumental sculpture at the entrance of Central Park. The twenty dollar design was inspired by the Nike of Samothrace that stands atop the Grand Staircase in the Louvre.

This is a magnificent example of Saint-Gaudens' concept realized in high relief. The surfaces appear flawless and are covered with softly frosted mint luster that shows slight reddish patina. The striking details are fully articulated in all areas, as one would expect, and it appears that the wire rim is complete around each side.
*From The James Mossman Collection.* (#9135)

# PROOF HIGH RELIEF DOUBLE EAGLE

## Choice Proof MCMVII High Relief Twenty

**4170 1907 High Relief PR64 NGC.** Dr. Robert Loewinger researched proof High Relief double eagles for his treatise *Proof Gold Coinage of the United States*. According to Walter Breen, those pieces have the following characteristics:

a) Inner borders sharp on both sides.
b) Relief details fully brought up.
c) All berries rounded.
d) All Capitol pillars countable.
e) All tail feathers with clear ends.
f) Edge letters are bolder than on normal strikings in the same collar, with horizontal striations between them.
g) Only a minor trace of knife-rim.

Dr. Loewinger also lists the criteria used by NGC to distinguish proofs from business strikes:

1) Extreme sharpness in all details, both at the centers and toward the peripheries.
2) The complete absence of die erosion or distortion.
3) Numerous, raised die-polishing lines on both sides. These appear in a random, swirling pattern. While also evident on currency strikes, these are particularly bold on proofs.
4) Uniformly satiny surfaces, without any of the radial flowlines that produce conventional Mint luster.
5) A build-up of metal just inside both borders, though especially evident on the reverse. This appears as a slightly raised ridge forming a concentric circle with the coin's border. It probably resulted from the extreme compression to which the proofs were subjected by additional strikes.

The present piece meets the above requirements for a proof. The strike is penetrating throughout, and the rich satin luster is dissimilar to that seen on the typical High Relief twenty. There are no grade-limiting marks, which suggests that this coin was given special handling by the Treasury. Butter-gold toning cedes to hints of aqua near Liberty's torch.

The new NGC holder allows a better view of the edge and rim than on prior generation encapsulations. This near-Gem proof has a slight wire rim on the obverse between 6 and 1 o'clock. The wire rim on the reverse is also slight and partial, present between 3 and 10 o'clock.

Die polish lines are prominent inside the rim and throughout the fields. These likely faded on later strikes from the die, which suggests that the proofs were struck prior to 'normal' High Relief production. Clearly, this is a special High Relief twenty, and it will hold the place of honor within the finest 20th century proof type set. (#9132)

A 15% BUYER'S PREMIUM ($9 MIN.) APPLIES TO ALL LOTS.

## SAINT-GAUDENS DOUBLE EAGLES

### Honey-Gold 1908-D With Motto Twenty, MS66

**4171** **1908-D Motto MS66 PCGS.** Like the earlier Liberty double eagles, there are several issues in the Saint-Gaudens series that are conditionally rare in Gem or finer quality. Issues such as the 1908-D that began with a moderate mintage of 349,500 coins are relatively plentiful in lower Mint State grades, but are nearly impossible to find in higher grades. David Akers considers the issue to be underrated and ranks it 20th in the 55-coin series in terms of rarity.

Both sides of this honey-gold Premium Gem have satiny luster with subdued mint brilliance and subtle reflectivity in the fields. A few tiny toning spots can be seen on the obverse, and the surfaces are virtually free of distractions. A winning combination of eye appeal, condition rarity, and high grade. Population: 23 in 66, 3 finer (11/08). (#9148)

### Desirable MS62 1908-S Twenty

**4172** **1908-S MS62 NGC.** The 1908-S is one of the rarest issues in the Saint-Gaudens double eagle series and one of the most popular. Not only does it have a notably low mintage of only 22,000 pieces (second only to the 1907 High Relief), but it is also scarce in all grades, especially so in Mint State. The present example, though mildly abraded on the central devices and denied a Select grade, offers considerable eye appeal for an MS62 coin. The strike is characteristically sharp, and the light lemon-gold surfaces offer uncommonly bright luster. Census: 38 in 62, 39 finer (11/08).
*From The Calvin Collection.* (#9149)

## Low Mintage 1908-S Twenty, MS64

**4173** **1908-S MS64 PCGS.** Of the 48 different Saint-Gaudens Type 6 double eagles (1908-1933), the 1908-S boasts the lowest mintage of coins; 22,000 pieces were struck for circulation. It is also a condition rarity with only 29 examples thus graded by PCGS at the MS64 level, with a mere 28 pieces finer (11/08). Interestingly, some of the later, more renowned issues sell for multiples of the 1908-S twenty, despite having similar populations in high grade. For example, 29 1931 double eagles have been graded by PCGS at the MS64 level with 35 finer pieces—a larger total that the 1908-S—but is valued much higher in price guides. This incongruity can best be explained by the fact that the total population of the 1908-S is greater than the 1931 issue, but only so in lower grades.

Boldly impressed. An abrasion on Liberty's right knee and a couple of marks on the eagle—although well concealed—preclude a finer grade. The fields are remarkably clean on this apricot-gold near-Gem, thus the eye appeal is reminiscent of a finer example. (#9149)
***See: Video Lot Description***

## Semi-Key 1908-S Double Eagle, MS65

**4174** **1908-S MS65 PCGS. CAC.** Ex: Brahin. With regard to third party certification, most coins are either accurately graded or conservatively graded; the latter observation applies to the current offering. Sumptuous, satiny luster gracefully swirls atop both sides of this well struck Gem. The apricot-gold coloration is even throughout, save for a small area of light copper toning at the 3 o'clock obverse rim.

At 22,000 pieces, the 1908-S double eagle has the lowest recorded mintage of all Arabic Numeral issues from 1907 through 1933. However, the 1908-S twenties are not the rarest in the series, since several 1920s and 1930s issues were subsequently melted in mass quantities. Nonetheless, the paltry mintage of 1908-S coins, combined with the fact that most of the coins struck entered circulation, make this issue legitimately rare in Gem or better condition. As of (11/08), PCGS has certified 14 examples at the MS65 level with only 14 finer.

Several theories have been put forth to explain why the San Francisco Mint managed to strike over 4 million Liberty double eagles from 1906 to 1907, yet struggled to produce just 22,000 1908-dated coins with the new Saint-Gaudens design. Some suggest that the Great Earthquake and Fire of 1906 was the cause, while others feel that the large production of double eagles in the previous two years created an excessively large supply, so the demand for new 1908 twenties was low. Another explanation is that the San Francisco Mint was awaiting new With Motto dies, resulting in a late production start.

Roger Burdette's *Renaissance of American Coinage, 1905-1908* sheds light on what could be the true reason for the small mintage of 1908-S double eagles. In his 2006 reference on the subject, Burdette explains the complications experienced by the Philadelphia Mint with regard to the new lettered edge mechanism: "It was not until September 1907 that the new mechanism was completely successful on the gold coins, and it was December before the double eagle version was operating reliably at Philadelphia. Denver and San Francisco mints had additional problems with the mechanism and it was August 1908 before the San Francisco Mint could strike the new coins without damaging the presses." While four months left plenty of time to strike more than 22,000 coins, it may have been that mint officials decided to wait until January 1909 to ramp up production of the new double eagle design. In the end, all theories likely share a roll in the low mintage of 1908-S twenties. (#9149)

## Fiery Red-Gold 1909/8 Twenty, MS64

**4175** **1909/8 MS64 PCGS.** Based on a review of auction records and population reports, it is now apparent that the 1909/8 double eagles are comparable to the normal date 1909 twenties, in terms of availability. For unknown reasons, however, the overdate version is twice as scarce in Mint State condition. The PCGS *Population Report* records 92 examples of 1909/8 twenties in MS64, compared to 228 regular date versions in the same grade. Only 14 overdate pieces have achieved a Gem designation, with 3 finer coins—each MS66 (11/08). The numbers at NGC are similar.

This blazing red-gold specimen reveals tinges of copper coloration when rotated under a light source. The surfaces are lustrous and pleasantly well preserved. Four small copper toning spots within the sun's rays on the reverse are noted for the sake of accuracy, although they do not detract from the overall eye appeal of this offering. *From The Calvin Collection.* (#9151)

## Conditionally Scarce 1909/8 Saint-Gaudens Twenty, MS64

**4176** **1909/8 MS64 PCGS.** This is an above-average overdated Saint that is very well struck, with warm reddish-gold and sea-green patina and shimmering luster. A few shallow marks are clustered in the upper right obverse field, and a group of even smaller marks reside on the lower reverse. Although several hundred 1909/8 double eagles emerged from hiding in Europe in the late 1960s and early 1970s, this issue is still scarce in the finer Mint State grades. Apparently, most of the coins that were repatriated in those decades were circulated to one degree or another. (#9151)
***See: Video Lot Description***

## Charming MS64 1909-D Twenty

**4177** **1909-D MS64 PCGS.** In its second year of production for the Saint-Gaudens double eagle, the Denver mint delivered only 52,500 coins. This date was once regarded as a major rarity in Mint State, but the emergence of a Central American hoard in 1983 has made the 1909-D generally available in grades up to and including the MS63 level. In Choice and finer grades, however, this issue remains highly elusive. This sharply struck example offers soft, frosty luster that enlivens cyan-tinged wheat-gold surfaces. Only a few light, scattered ticks preclude Gem status. PCGS has certified just 20 finer pieces (11/08).
*From The Calvin Collection.* (#9152)

## Conditionally Challenging Near-Gem 1909-D Twenty

**4178** **1909-D MS64 PCGS.** As might be expected, finding a Choice Uncirculated example of this low mintage issue is quite difficult. This well frosted example reveals some satin luster tendencies as the coin rotates beneath a light. The yellow-golden surfaces have a few shallow, scattered marks but none are severe. An interesting group of circular die polishing lines are seen around the D mintmark. The paltry original mintage of 52,500 pieces is the fourth-lowest in the Saint-Gaudens double eagle series. The discovery of a hoard in Central America has resulted in the relative availability of BU and Select quality examples; but near-Gems are still scarce. (#9152)

## Highly Attractive 1912 Gem Double Eagle

**4179** **1912 MS65 PCGS. CAC.** The 1912 represents the only double eagle issue of the year, as none were struck in Denver or San Francisco. It is also the first year with 48 obverse stars, reflecting the entry of New Mexico and Arizona into the Union.

The 1912 is relatively available through the near-Gem level of preservation, evidenced by a few thousand having been certified by PCGS and NGC in grades MS60 to MS64. The Gem and finer population decreases significantly.

Both sides of the current MS65 specimen are awash in potent luster and variegated greenish-gold and peach-gold patina. A solid strike delivers exquisite delineation to the design features, enhancing even more the coin's magnificent eye appeal. A few grade-consistent marks do not detract in the least. Housed in a green-label holder. Population: 26 in 65, 5 finer (11/08).
*From The Calvin Collection.* (#9160)

## Eye-Appealing Gem 1912 Double Eagle

**4180** **1912 MS65 NGC.** Dave Bowers comments on this issue in his *Guide Book of Double Eagle Gold Coins* (2004): "In the context of double eagles of this era the 1912 is one of the scarcer issues. However, in absolute terms enough are around that you will have no difficulty in finding a nice one at, say, the MS63 level. Gems are rare." As usual, Mr. Bowers' comments are correct. As of (11/08), NGC has certified only 15 examples at the MS65 level, with a staggeringly low total of three finer pieces—each an MS66 survivor. The numbers at PCGS are similar.

Boldly struck with thick, satiny luster over orange-gold surfaces. The fields are of Superb Gem quality, although closer examination reveals a few abrasions on Liberty's midsection, thus defining NGC's Gem determination. (#9160)
***See: Video Lot Description***

## Conditionally Elusive Gem
## 1913-S Double Eagle

**4181** **1913-S MS65 PCGS.** The 1913-S issue claims the third-lowest mintage in the entire Saint Gaudens double eagle series. Although less rare than the 1909, 1914, and 1915 issues in AU and Choice Mint State condition, any finer survivors are extremely hard to find; and they seldom appear in public auctions. The honey-gold and rose surfaces of this conditionally scarce example display swirling luster and impressively struck design features. Both sides are free of distracting marks and the high level of eye appeal is quite uncommon for the issue. PCGS has seen just 20 Gems, and only a single MS66 coin finer, as of (11/08). (#9163)
***See: Video Lot Description***

## Single Finest-Graded 1915 Saint-Gaudens Double Eagle, MS66

**4182** **1915 MS66 NGC.** According to the catalog of the 2007 Central States Auction, held in Milwaukee by Heritage Auction Galleries: "The 1915 double eagle, with a mintage of 152,000 pieces, is readily available in grades through Mint State 64, but becomes a challenge in MS65, where only 70 or so pieces have been certified by NGC and PCGS combined. No finer examples have been seen by either service (3/07)."

At some point, within the past 18 months, the situation has changed. This magnificent specimen is now the single finest-graded example of the 1915, designated as MS66 by NGC, with none finer at either service (11/08).

Well struck with essentially pinpoint accuracy on the design elements, including the frequently-challenging fingers, hair tresses, and Capitol building, on the obverse. The striking definition is equally sharp on the eagle's breast feathers and the sun's rays, on the lower reverse. The surfaces are splendidly preserved, and reveal very little in the way of coin-to-coin contact.

Perhaps the most visually alluring aspect of the piece is its beautiful, subtly variegated coloration. This is revealed in shades of rose-gold and lime-green, which are illuminated by satiny mint frost across both sides. The result is an undeniably compelling combination; with great technical merit and vast eye appeal both contributing to the Premium Gem grade of this superior representative. It may be many years before this or any other MS66 example appears again in a public auction format. (#9167)

## Stunning 1916-S Double Eagle, MS67

**4183** **1916-S MS67 NGC.** Among S-mint Saint-Gaudens issues, few dates are as obtainable as the 1916-S in grades up to and including Gem condition. Indeed, population figures indicate that the number of MS64 and finer survivors totals several thousand coins. The appearance of a Superb example, however, is a vastly different story. This marks only the fourth time that Heritage has offered a 1916-S at the MS67 level, including the outstanding Phillip H. Morse specimen that realized just over $25,000 in November 2005.

This satin-like representative boasts peerless fields and lovely, delicate orange accents. Trivial contact in the vicinity of Liberty's knee is the only noticeable disturbance on the silky-smooth surfaces. There are only three coins so graded at NGC, with none finer, while PCGS has not certified an example better than MS66 (11/08).
*From The Scott Rudolph Collection.* (#9169)
***See: Video Lot Description***

## Coveted 1921 Double Eagle AU58

**4184** **1921 AU58 PCGS.** Over the years, the 1921 has gradually emerged as the third-rarest regular issue Saint-Gaudens double eagle, behind only the uncollectible 1933 and the prohibitively rare 1927-D. Since the mintage of the 1921 is 528,500 pieces, what happened to them all? Why has PCGS certified only 93 examples in all grades? Almost certainly, more than 99% of the mintage remained in Treasury holdings until the 1933 FDR gold recall prevented their release into collector hands.

Eventually, those coins were melted into ingots housed in the legendary gold vault of Fort Knox. Since few collected late-date double eagles in 1921, and international commerce needs were met by Treasury releases of 1922 to 1928 double eagles, the only demand for 1921 twenties came from the Treasury itself, which used them to back gold certificates.

Anyone could have obtained a 1921 twenty (or even a 1927-D) prior to 1933 simply by writing a letter to the Treasury with proper payment. This method maintained the Joseph C. Mitchelson collection at the Connecticut State Library during the 1920s. Some 1921 double eagles apparently went into non-numismatic hands, since a majority of the PCGS pieces are in AU grades, especially AU55 to AU58. Such pieces were probably set aside as a novelty by non-collectors, since gold coins of any date seldom circulated after World War I. Only after the FDR gold recall did such keepsakes suddenly attain significant collector value.

The present piece is likely such a lightly handled keepsake. Although both sides display unbroken mint bloom, slight friction is noted on Liberty's nose, chest, and raised knee. The rich orange-gold surfaces display only scattered minor marks. The 1921 is typically the final date added to an important collection of Saint-Gaudens twenties, and the present example provides a rare opportunity to obtain an example under six figures. Population: 25 in 58, 45 finer (12/08). (#9172)
***See: Video Lot Description***

A 15% BUYER'S PREMIUM ($9 MIN.) APPLIES TO ALL LOTS.

## Original 1922-S Twenty, MS65

**4185** **1922-S MS65 NGC.** After a three-year hiatus in double eagle production from 1917 to 1919, mintages resumed with two years of tentative striking in 1920 and 1921, and not until 1922 did official mintages return to the millions, as it did in San Francisco. While the 1922 Philadelphia issue, with its mintage of under 1.4 million pieces, is available in most grades thanks to extensive repatriation, the 1922-S double eagle was not so fortunate, and as Garrett and Guth described it, the issue " ... suffered tremendously from the massive meltings of gold coins in the 1930s."

In this sense, the 1922-S has more in common with the substantially rarer issues struck in 1920 and 1921 than its Philadelphia contemporary. Garrett and Guth continue by noting the existing combined certified population of under 2,000 pieces, a tiny figure that surely includes resubmissions, and they point out that " ... most of those are in lower Mint State grades or circulated." They laud Gem and better survivors, which now show a combined certified population of just 21 examples of the former and a mere five pieces in the latter category (11/08).

The present survivor's luster is stronger than the norm, though it also shows an undercurrent of the more typical satin finish. Striking quality is excellent, and the generally yellow-gold surfaces show hints of green-gold and yellow. All things considered, this is a delightful example of an already challenging issue, made even more desirable by its conditionally rare state, and a coin that virtually any collector of the series would be proud to own. (#9174)

## Enchanting MS67 1924 Double Eagle

**4186** **1924 MS67 PCGS. CAC.** The popularity that the 1924 double eagle enjoys as a type coin extends to virtually any level, even the Superb Gem state, as coins such as the present piece clearly show. The strike is suitably bold for the grade, if a trifle soft on Liberty's torch hand, and the fields are smooth and immensely lustrous. Occasional hints of pink visit sun-yellow and peach-orange surfaces. Despite the over 4.3 million pieces struck and repatriation that amounts to at least a six-figure return to the United States, the 1924 double eagle remains conditionally scarce in MS67 and an extreme rarity any finer, with just one such coin known to PCGS (11/08). *From The James Mossman Collection.* (#9177)

## Formidable Near-Gem 1924-D Saint-Gaudens Twenty

**4187** **1924-D MS64 PCGS.** In the 1940s and early 1950s, like many Saint-Gaudens issues, the 1924-D was considered to be quite rare. Its status changed in the mid-1950s, however, when several small hoards turned up in European banks. David Akers, in his catalog of the Dr. Thaine Price Collection (May 1998) writes of the '24-D:

"...the status of the coin was reduced from very rare to only very scarce. Nevertheless, since most of the specimens that have been found in the last four decades have been only Choice Uncirculated or lower grade, the 1924-D is still considered (and correctly so) to be a rare issue in Very Choice Uncirculated. True Gems are of the highest rarity with only a very small number of pieces known."

Examination of PCGS/NGC population data corroborates Akers' assessment of surviving coins. The two services have seen nearly 600 pieces in the MS60 to MS63 grade levels, about 250 near-Gems, and 20 coins grading higher (11/08). The present MS64 offering is thus among the finest that most collectors can hope to obtain.

Full luster characterizes both sides, with the obverse showing two shades of honey-gold in the center, framed by greenish-gold at the margins. Rich apricot-gold dominates the reverse, accented with splashes of mint-green and lilac. A better-than-average strike imparts strong definition to the design elements, including those in the peripheral areas that often exhibit weakness. A handful of minute marks preclude Gem classification. (#9178)

***See: Video Lot Description***

## Charming 1924-S Double Eagle, MS64

**4188** **1924-S MS64 PCGS.** The 1924-S was extensively melted shortly after it was produced, and while some examples have turned up in European hoards over the past fifty years, it remains a very scarce and important twenty, especially in high grade. Indeed, the vast majority of coins certified by PCGS and NGC grade MS63 or lower.

This charming near-Gem specimen has bright yellow-gold surfaces that yield flashy mint frost. A solid strike delivers strong definition to the design elements, including Liberty's fingers and the eagle's plumage. Some minute surfaces and rim marks preclude the attainment of a higher grade. Population: 90 in 64, 3 finer (11/08).
*From The Calvin Collection.* (#9179)

## Lustrous 1925-D Double Eagle, MS64

**4189** **1925-D MS64 PCGS.** Both sides of this near-Gem are awash with potent luster, and each is dominated by apricot-gold patination, imbued with traces of lavender and mint-green. A well executed strike leaves strong delineation on most of the design elements, including Liberty's branch hand, facial features, and toes, and the eagle's plumage. Magnification reveals a few minute grade defining marks. MS64 is the highest grade most collectors can hope to own, as PCGS and NGC combined have certified fewer than 15 pieces finer (11/08). Encapsulated in a green-label holder.
*From The Calvin Collection.* (#9181)

## Conditionally Scarce 1925-D Double Eagle, MS64

**4190** **1925-D MS64 PCGS.** This frosty and highly lustrous near-Gem has bright pinkish-gold color, along with faint peripheral olive toning. This piece is sharply struck with excellent obverse and reverse detail. Like so many other issues, most of the nearly 3 million pieces that were originally minted met their fate in melting pots during the late 1930s. Today, it is possible that as many as 900 examples of the '25-D still exist, but most of the survivors are in lower grades than this example. A large but unknown quantity of this issue were imported from Europe in various transactions throughout the 1950s and 1960s. Currently, PCGS has only graded six specimens finer than MS64 (11/08). (#9181)
***See: Video Lot Description***

A 15% BUYER'S PREMIUM ($9 MIN.) APPLIES TO ALL LOTS.

## Memorable, Condition Rarity 1925-D Gem Double Eagle

**4191** **1925-D MS65 PCGS.** This is a marvelous Gem example of this issue, one that was formerly thought to be a great rarity. According to the *Coinage of Augustus Saint-Gaudens as Illustrated by the Phillip H. Morse Collection:*

> "At one time, the 1925-D was considered to be a major rarity, much more so than the 1920-S, 1930-S, 1931, and 1932. This was before an unknown quantity was discovered in the 1950s, followed by even larger quantities in Europe in the 1960s. Even to this day, small hoards of this date trickle out from time to time. Presently the 1925-D is regarded on par in rarity with the 1924-D, although in finer Mint State grades (MS65 and better) it is slightly rarer with only about a dozen examples certified."

Like so many issues in the series, the 1925-D has seen recent importations—in the case of the 1925-D, mostly from banks in France and Switzerland—that have lessened its rarity while adding to the number of high-grade examples.

The 1925-D is generally a well-produced double eagle, as well. Most examples are well struck, with frosty surfaces and above-average luster. This splendid piece is far from the exception. The coloration is a rich orange-gold, with radiant cartwheel luster emanating from the surfaces throughout. A sharp strike has brought up the details in Liberty's hair, gown, and branch hand, and bold definition characterizes the eagle's plumage. The frosty surfaces are relatively abrasion-free, save for a few small, scattered ticks that may have limited an even higher grade. A memorable and condition rarity Saint-Gaudens double eagle, one of four Gems certified at PCGS, with two finer (11/08). (#9181)

## Elusive 1925-S Twenty Dollar, MS62

**4192** **1925-S MS62 NGC.** The 3.77 million plus mintage does not represent the true scarcity of the 1925-S double eagle, as large quantities were melted during the 1930s. Fewer than 600 coins are believed known today in all grades, making it one of the major rarities in the Saint-Gaudens series (James Halperin, et al., The Coinage of Augustus Saint-Gaudens).

This MS62 example displays luminous peach-gold surfaces laced with traces of light tan. Well defined design elements show just a few localized areas of softness. A few light surface and rim marks are visible over each side. A vertical crack runs through the eagle's beak *From The Calvin Collection.* (#9182)

## Key Date 1926-D Double Eagle, MS62

**4193** **1926-D MS62 PCGS.** In the 1940s, the 1926-D double eagle was believed to be an extremely rare coin. The generous mintage of 481,000 pieces was nearly wiped out in the great Gold Recall of the 1930s. Fortunately, some of this mintage was used in international commerce, and a small number of specimens of this date has been discovered in European holdings over the years. Today, the issue is still the tenth scarcest date in the 54 coin series.

The strike is sharp on the present specimen, with the pillars of the capitol dome clearly delineated. Satiny mint luster envelopes the coin, and only the scattered handling marks limit the grade. (#9184)

A 15% BUYER'S PREMIUM ($9 MIN.) APPLIES TO ALL LOTS.

## Pleasing Apricot-Gold 1926-D Twenty, MS63

**4194** **1926-D MS63 PCGS.** Referencing the February 1934 issue of The Numismatist, Dave Bowers states that "in December 28, 1933, Acting Secretary Henry Morgenthau issued an order for banks and individuals to surrender all gold coins and Gold Certificates in their possession, excepting numismatic coins and quarter eagles ... ." Whatever 1926-D double eagles that did enter the channels of commerce were obviously affected by the government order. However, it is believed that the majority of this issue never left the control of the Treasury Department, making the bulk melting of 1926-D twenties most convenient. The combined population data of the two major services currently totals a staggeringly low 299 coins in all grades.

Thick apricot-gold patination blankets both sides of this Select Uncirculated representative. Slight weakness on the dome of the Capitol—typical for the issue—is noted. The strike elsewhere is sufficient and the luster is pleasing. Without the aid of magnification, only a couple of small abrasions on the rays of the reverse are obvious. Housed in an older generation PCGS holder, this refreshingly original specimen is sure to garner the attention of collectors and dealers alike. Population: 58 in 63, 25 finer (11/08).
*From The Calvin Collection.* (#9184)

## Key Date 1926-D Saint-Gaudens Double Eagle, MS63

**4195** **1926-D MS63 PCGS.** An attractive example of one of the key dates in the Saint-Gaudens double eagle series. Fifty years ago the 1926-D and the 1924-S were considered to be the rarest coins of the type and were hailed as great rarities. The first auction appearance of a 1926-D was in the World's Greatest Collection (Numismatic Gallery, 1/1946), lot 1044. In that sale, the coin was illustrated in a full page lot description, and realized an astounding sale price of $1,300, exactly twice the amount garnered by the 1927-D coin in the same sale. At its next appearance, in the Dr. Charles W. Green Collection (Mehl, 4/1949), lot 916; the coin was the subject of extremely spirited bidding, and sold for the fantastic total of $2,500. As David Bowers says in *A Guide Book of Double Eagle Gold Coins,* the market for later-date Saint-Gaudens double eagles was profoundly affected by the success of the Green sale, and demand for the coins has increased steadily down to the present day. In the 1950s and 1960s, many double eagles were found in European bank holdings. The 1926-D was never found in hoard quantities, but enough examples were discovered to topple the coin from its premier spot in the rarity ratings. In recent times, David Akers rated this issue as the thirteenth rarest coin in the 55-coin series.

Today, the 1926-D is almost always seen in MS60-MS63 grades. Circulated examples are curiously uncommon, and Gem specimens are very rare. Most coins seen are well struck, with only a little softness at the periphery. The present coin has an above average strike, with just a touch of softness on the capitol dome and pillars. The fields display a scattering of small contact marks, consistent with the grade. The surfaces have unbroken, satiny luster that complements the bold devices to produce outstanding eye appeal. A beautiful and historic prize for the advanced collector. (#9184)

## Radiant MS64 1927-S Twenty

**4196 1927-S MS64 NGC.** Paul M. Green, in an article for the October 24, 2006 edition of *Numismatic News*, discussed the two mass coin meltings held by the federal government in the 20th century. The first mass melting was held under the auspices of the Pittman act, which reduced more than a quarter-billion silver dollars to bullion. The second mass melting, which stemmed from Roosevelt's recalls, decimated America's coinage of gold. Green quotes figures:

> "The numbers were enormous, including 67,856,029 gold $20s, or 39 percent of all the double eagles ever produced, along with 21,423,342 gold eagles, or 37% of all the gold eagles ever produced, and 27,539,662 half eagles, or 35 percent of all the half eagles ever made.
>
> "The gold numbers, while not as large as the Pittman Act silver dollar melting, had a similar if not greater impact. ... The problem was and is figuring out just what dates were impacted. Like the Pittman Act silver dollar melting, there were no records kept as to how many coins of each date and mintmark were destroyed."

Though repatriation would render several erstwhile rarities more available, no such flood of overseas treasures transformed collectors' assessments of the 1927-S, and it remains elusive in an absolute sense and a condition rarity at the Choice and better levels. This MS64 example has impressively lustrous yellow-gold surfaces that show elements of emerald and cyan close to the margins. Striking detail is solid, and though a few scattered marks preclude Gem status, none of these warrant individual mention. A solid all-around coin for a grade rarely reached by this coveted issue. Census: 17 in 64, 11 finer (11/08). *From The Calvin Collection.* (#9188)

## Challenging 1929 Twenty, MS64

**4197** **1929 MS64 PCGS.** For collectors of Saint-Gaudens double eagles, the playing field becomes abruptly uneven following the 1928 issue, and only those possessing a combination of patience and financial fortitude attempt to complete the final three years of the series. With the exception of the 1921 classic rarity, the 19 date slots between 1907 and 1928 can be filled with relative ease, partly owning to the expanded production of coins from all three minting facilities during those years.

One of our favorite numismatic researchers of all time, Dave Bowers, appears to have erroneous information regarding the rarity of the 1929 issue in his *Guide Book of Double Eagle Gold Coins*. In that 2004 publication, the author suggests an extant field population of between 1,270 and 1,790 pieces—encapsulated or uncertified with all grades considered. The same book lists a population range of 280 to 445 coins for the 1926-D issue. In contrast, Garrett and Guth (2006) documented nearly identical certified population figures and auction appearances for each date. As of (11/08), the combined NGC and PCGS population of 1929-dated twenties is 312 coins at all levels of preservation. Since the aggregate total for the 1926-D issue is similar at 299 pieces, we are forced to respectfully challenge Bowers' notion that nearly 1,800 1929 double eagles are extant. Furthermore, although there are collectors who still prefer their coins unencumbered by plastic, the financial advantage of third party grading for such a scarce issue likely precludes an uncertified population of any significance.

The coloration of this offering is best described as "simply gold." Pleasing cartwheel luster and a crisp strike define the grade, which may have missed a full Gem designation due to a single abrasion above Miss Liberty's right knee. (#9190)

## Rare, Beautiful Gem 1931 Saint-Gaudens Double Eagle

**4198** **1931 MS65 PCGS.** Among Saint-Gaudens double eagles, the 1931 is considered to be one of the top seven rarest issues in the series, with precious few examples that survived the mass meltings of twenty dollar gold pieces minted in the now-elusive years of 1929 to 1933. The original mintage of 2,938,250 pieces was apparently almost obliterated by the gold recall of 1933. Experts have speculated over the years as to which of these later-dated issues is now the rarest, and exactly how they should be ranked. The population figures by the major services can sometimes be misleading as to exact rarity, however, as the same coin may have been submitted to both services at different times, or even to the same service multiple times; thus causing the published figures to be inflated.

This beautiful coin is a sparkling Gem in every sense of the word. The luster is frosty and entirely unbroken by any stacking or cabinet friction. Only the most trivial luster grazes are seen on each side that serve to limit the grade of this appealing specimen. Lovely shades of peach-gold and rose patina bathe each side. The strike is well brought up, with Liberty's fingers and the Capitol dome revealing nice definition. The reverse field is free of the often-seen die break through the eagle's beak (or it may be from another set of dies altogether). There are also no bothersome alloy spots, the latter of which are also an unfortunate companion to many survivors of this issue. A few minute marks scattered over the obverse are mentioned for the sake of accuracy. Population: 25 in 65, 10 finer (11/08). (#9192)
***See: Video Lot Description***

A 15% BUYER'S PREMIUM ($9 MIN.) APPLIES TO ALL LOTS.

## Radiant 1931-D Double Eagle, MS64

**4199** **1931-D MS64 PCGS. CAC.** Only 106,500 double eagles were struck at the Denver Mint in 1931, making this a comparatively low-mintage issue. It is considered a rare date with a surviving field population of 100 to 150 pieces.

David Bowers relates an interesting story about 1931-D double eagles in his *American Coin Treasures and Hoards*, that reads in part:

> "In 1960 a Sidney, New York, businessman took from his bank safety deposit box four 'ordinary' pieces and brought them to a coin dealer, for he had heard there was a premium above face value for all gold coins.
>
> "The dealer glanced at them, found they were all of the extremely rare 1931-D variety and in blazing gem Mint State, showed him the listing in The Guide Book, and expected that the finder would be delighted. Just the opposite occurred. Uncertainty set in—what were they really worth? Could they be sold for more elsewhere? Maybe they shouldn't be sold after all.
>
> "Back into the safe deposit box the rare 1931-D pieces went. Had they been common dates they would have been sold for the current market value at the time, which would have been between $40 and $50."

What happened to those four coins remains a mystery.

A delicate blend of medium peach-gold color with greenish-gold highlights bathes the radiantly lustrous surfaces of this gorgeous near-Gem twenty dollar. The design elements are well brought up, including sharp definition on Liberty's head, branch-hand fingers, and toes, the Capitol building, and the eagle's feathers. It is only the presence of a few minute marks that prevents Gem classification. Population: 39 in 64, 19 finer (11/08).

*From The Calvin Collection.* (#9193)

## Sharp MS63 1932 Double Eagle

**4200** **1932 MS63 PCGS.** The mintage of slightly over 1.1 million pieces, like that of numerous issues late in the Saint-Gaudens series, proves meaningless. The federal gold recall, combined with excess inventory of double eagles of previous issues, ensured that the vast majority of the 1932-dated coins never left government control. Only a tiny fraction of the production run, many of which were ordered singly by those who desired examples of recent issues, survives today. This is in marked contrast to the eagle issue of the same year, which, though also melted heavily, is readily available to collectors of almost any budget.

Representatives of this noted issue, the final collectible Saint-Gaudens double eagle, trade only infrequently. Garrett and Guth (2006) lavish praise on the 1932 twenty: "As one of the great rarities of the series, any 1932 double eagle will always bring considerable attention."

This Select exemplar should attract the attention of series specialists. The devices are well-defined overall, and the apricot-gold and sun-yellow surfaces offer strong luster with just a hint of satin. Though abrasions appear above Liberty's branch arm and on her legs and gown, the reverse is clean, and the coin as a whole retains significant eye appeal for the grade assigned. The present piece represents a significant opportunity to own one of the most elusive and challenging Saint-Gaudens double eagle issues, a date that is more challenging than the combined certified population might suggest. Population: 8 in 63, 59 finer (11/08). (#9194)

A 15% BUYER'S PREMIUM ($9 MIN.) APPLIES TO ALL LOTS.

## Vibrant 1932 Gem Double Eagle

**4201** **1932 MS65 PCGS.** Nearly the entire mintage of 1,101,750 1932 double eagles was consigned to the melting pots during the late 1930s. Gold specialists generally consider that fewer than 100 examples have survived to the present day, virtually all in Mint State condition (*A Handbook of 20th Century United States Gold Coins, 1907-1933*, second edition, 2008, by David Akers, revised and expanded by Jeff Ambio). We note that PCGS and NGC have certified, to date, a total of 142 pieces, but a number of these are likely resubmissions.

The above authors discuss the 1932's rarity vis-a-vis other late date double eagles:

> "The 1932 is rarer than the 1929 and 1931-D from an overall standpoint, but it is the most plentiful of the 1929-1932 issues in the Saint-Gaudens Double Eagle series in high grade. This is not to imply that the 1932 is a plentiful issue in an absolute sense, for nothing could be farther from the truth. The federal government destroyed virtually the entire mintage within a few years of striking."

Variegated orange-gold and mint green patination adorns the present Gem, and ebullient luster radiates from both sides, each of which has a satin-like finish. A well executed strike manifests itself in sharp definition on the design features, including excellent detail on Liberty's gown lines, fingers, and toes, the panes on the Capitol building, and the eagle's plumage. A couple of minor marks on each side likely precludes an even finer grade. Population: 28 in 65, 7 finer (12/08). (#9194)

## Rare Gem 1932 Saint-Gaudens Double Eagle

**4202** **1932 MS65 NGC.** As the final collectible double eagle in U.S. coinage history, the 1932 is one of the true legends of numismatics. Of course, the fact that the Mint melted most of the 1.1 million pieces originally produced only enhances the desirability of this issue among advanced gold specialists. The comments of Jeff Garrett and Ron Guth, writing in the *Encyclopedia of U.S. Gold Coins, 1795-1933* (2006) are instructive:

> "As with all other double eagles coined in this decade, virtually the entire mintage was melted during the late 1930s. Today, the combined population data show 115 pieces have been submitted and certified, most of which grade from MS-63 to MS-66. This probably includes many resubmissions. The Smithsonian collection example is possibly the finest known, and would probably grade MS-67. As one of the great rarities of the series, any 1932 double eagle will always bring considerable attention. In complete contrast to the Indian Head eagles of 1932, which are an extremely common hoard date, the 1932 Saint-Gaudens double eagle is very expensive and difficult to obtain."

Well struck and intensely lustrous, with captivating lime-gold and rose coloration blended together over obverse and reverse. Nicely frosted with a cartwheel sheen, the surfaces of this coin display just a handful of scattered abrasions on each side; all of which are minute. The reverse is especially clean. A hint of cloudiness is noted in the fields, but is too faint to be of any real concern.

A special coin and a rare opportunity for the specialist in this great series to acquire a Gem example of the 1932 Saint-Gaudens double eagle. (#9194)

***See: Video Lot Description***

# PROOF SAINT-GAUDENS DOUBLE EAGLES

## Magnificent 1908 Double Eagle With-Motto Type Matte PR66

**4203 1908 Motto PR66 NGC.** No proofs of Augustus Saint-Gaudens' beautiful double eagle design were made for sale to the public until after the debate about the motto IN GOD WE TRUST had been settled. President Theodore Roosevelt felt it was blasphemous to use God's name on tawdry, secular objects like money, and directed that the motto be omitted on the new designs. However, the public was overwhelmingly opposed to the removal of the motto. In deference to public outcry, the motto was restored on coins struck after August 1, 1908. The first proofs made for sale to the general public were of the With-Motto design, struck after that date.

All proof examples of the 1908 double eagle were produced with a controversial Matte, or Sandblast, finish. This finish proved unpopular with the public, and few pieces were sold. The April 1909 issue of *The Numismatist* had this to say about the new proofs:

> "The types of the gold coins now being issued at the United States Mint do not permit the making of bright finish or brilliant Proof specimens. The face of the die touches almost every part of the planchet, dulling the surface of even a polished blank. Proof coins of the present gold series, so far as issued, have a very dull appearance, the finish being what is known as 'sandblast,' and are far less pleasing to the eye than the coinage for circulation, which is brighter and of lighter color.
>
> Less than 100 gold Proof sets were struck dated 1908. All are of the new types, the and with the motto IN GOD WE TRUST. Few things are more beautiful than a brilliant Proof gold coin. The absence of this condition in the new series is to be regretted."

Today, collectors appreciate the Sandblast proofs of this era as sophisticated works of art. Examples of this production process are rare, with David Akers and Jeff Ambio estimating a surviving population of 65-80 pieces in all grades.

The present coin is a superior representative of this coveted issue. The dark, matte-textured surfaces give the coin a medallic quality. The strike is extraordinary, with crisp detail showing on all the devices. Overall eye appeal is outstanding. Census: 28 in 66, 12 finer (11/08). (#9205)

## Superlative 1912 Double Eagle, PR67

**4204** **1912 PR67 NGC.** Only 74 proof twenties were struck in 1912, and this date is roughly comparable in rarity to the 1911 and the other dates of the series (except for the 1908 which is the most "common"). Earlier estimates of the number of survivors have ranged between 10-15 pieces to as many as 20-25 specimens. We believe that the actual number of proofs in all grades is somewhere between 25 and 35 coins.

The fine matte surfaces sparkle with myriad tiny granular facets and the coin, overall, has a pleasant olive-gold color. Only 74 proof twenties were struck in 1912, and this date is roughly comparable in rarity to the 1911 and the other dates of the series (except for the 1908 which is the most "common"). Earlier estimates of the number of survivors have ranged between 10-15 pieces to as many as 20-25 specimens. Like the 1911, we believe that the actual number of proofs in all grades to be somewhere between 25 and 35 coins.

The finish of this piece shows an even, monochromatic mustard coloration over both sides. Again, magnification shows myriad tiny sparkling facets from the sandblast surfaces. This sparkle gives the coin a "life" and sheen that serves as a perfect counterbalance to the otherwise deep coloration on the piece.

The surfaces are not perfect; however they are certainly presentable for the assigned Gem grade. There are small (almost microscopic) contact marks evident in the fields on each side and a couple of shiny spots show on the upper torso of Liberty and also her knee. Also, as a future identifier, a tiny black spot is seen just above the capitol's dome. These are all trifling objections, though, and do not disrupt the overall impression of Gem quality that this coin projects. They do, however, serve as an explanation for the grade and inform the viewer why the coin "only" grades PR65. Breathtaking eye appeal in this very rare matte proof gold double eagle

*Ex: Heritage (8/2004), lot 7819.* (#9209)

## COMMEMORATIVE SILVER

### Intensely Toned 1900 Lafayette Dollar, MS67

**4205** **1900 Lafayette Dollar MS67 NGC.** DuVall 2-C. Charles Barber, designer of the Lafayette dollar, was proud of his work as an engraver, and often pointed to his years of expertise in an official capacity when engaged in one of his many disputes with several different outside artists over technical specifications for new designs. In this sense, the Lafayette dollar represents something of a failure for the chief engraver, since neither side, especially not the reverse, exhibits full highpoint detail on *any* example. A particular point of trouble is the mounted Lafayette's boot, which is demarcated from his trousers only rarely and never rounded. While the minting process for the only classic commemorative silver dollar was hastily executed, it is a criticism of Barber that his work likely would have failed to strike up satisfactorily even under optimal conditions.

This exquisitely preserved Lafayette dollar exhibits above-average detail and powerful luster beneath distinctive and variegated patina. An outer ring of pale emerald surrounds an ocean-blue and amethyst center laced with thin streaks of orange, while the reverse is predominantly sky-blue with splashes of russet-violet at the rims and the horse's head. Aside from a fingerprint in the right reverse field, the surfaces are practically flawless, with none of the abrasions found so often on the portraits or the statue. A wonderful example that is worthy of the finest collection. One of just eight examples graded MS67 by NGC, with only five certified at that level by PCGS, and no coins finer at either service (11/08). (#9222)

## Amazingly Toned 1915-S Pan-Pac Half, MS67

**4206 1915-S Panama-Pacific MS67 PCGS. CAC.** A breathtaking palette of iridescent colors grace the obverse of this Superb Gem commemorative. At the periphery, a band of salmon-pink coloration is bordered by thin, successive rings of sea-green, lavender, and russet toning, which flow into a variegated pool of strikingly beautiful ice-blue and platinum hues in the center. The reverse is an even silver-gray tone. The 1915 Panama-Pacific halves were all struck at the San Francisco Mint and were the first commemorative coins to include the motto IN GOD WE TRUST. Population: 75 in 67, 2 finer (11/08). (#9357)

## 1904 Lewis And Clark Gold Dollar, MS66

**4207 1904 Lewis and Clark MS66 PCGS.** Some may consider the scarcity of the 1904 Lewis and Clark gold dollars to be surprising, considering that they were not produced for circulation. Apparently, however, the coins were acquired chiefly by non-numismatists and many were mishandled. As a result, high-grade examples such as this one can be challenging to locate.

With swirling luster and unusually crisp striking details, this lovely Premium Gem is instantly impressive, and obviously superior to the average survivor of the low 10,025-piece net mintage. Bright lime and honey-gold toning increases the coin's eye appeal. The pristine surfaces have a semiprooflikeness and are wonderfully preserved. PCGS has certified only 14 finer examples as of (11/08). (#7447)

## Dazzling 1905 Lewis and Clark Gold Dollar, MS66

**4208** **1905 Lewis and Clark MS66 PCGS.** The official mintages of the 1904 and 1905 Lewis and Clark commemorative gold dollars are very similar, and are recorded at 10,025 and 10,041 pieces, respectively. These numbers actually represent net mintages, however, as both issues were originally produced in significantly higher quantities: 25,028 coins for the 1904, and 35,041 examples of the 1905. About 15,003 of the 1904s were melted as unsold, however, and roughly 25,000 of the 1905s suffered the same fate (David Bowers, 2008, p. 48).

This Premium Gem is sharply struck and the unmarked surfaces display dazzling mint luster. It is a great example of this popular, early gold commemorative type. Population: 68 in 66, 2 finer (11/08). (#7448)

## Magnificent 1915-S Panama-Pacific Quarter Eagle, MS67 ★ The Finest Certified

**4209** **1915-S Panama-Pacific Quarter Eagle MS67 ★ NGC.** NGC Census figures reveal that while that service has certified 1,794 1915-S Panama-Pacific quarter eagle commemoratives, a solitary coin has been assigned the coveted Star, the Superb Gem offering in the present lot! Close inspection with a glass reveals the reasons for this designation. Both sides display potent luster and beautiful peach-gold color imbued with hints of mint-green. An attentive strike delivers crisp, uniform definition to the design elements, and impeccably preserved surfaces are devoid of mentionable contacts or alloy spots. This is a magnificent piece that will be the centerpiece of a high-grade collection.

*From The Scott Rudolph Collection.* (#7450)

***See: Video Lot Description***

## Historic Five-Piece Panama-Pacific Commemorative Set
## Ex: King Farouk, Substantially Documented

**4210 Farouk's Five-Piece Panama-Pacific Commemorative Set With Cases and Documentation.** The opportunity offered here, to purchase the 1915-S Panama-Pacific five-piece commemorative set pedigreed to King Farouk and the Palace Collections of Egypt, is not a unique one if one looks through the past. There was the Palace Collections of Egypt auction, where one could have bid in the first February 1954 session on lot 298, "Panama-Pacific Exposition, 1915, fifty dollars round and octagonal; two and a half dollars; one dollar and a silver half dollar. *In case of issue.*" Political volatility notwithstanding, the sale of the Palace Collections of Egypt was a tremendous opportunity for the bold bidder.

A shade under three years later, in a decidedly more domestic locale, this set came up for auction again, this time at the 19th Semi-Annual California State Numismatic Association Convention's auction, put on by Leo A. Young. The cataloging was altogether more generous:

> "The very rare Panama Pacific *[sic]* Exposition Set of 1915 consisting of round & octagon $50 gold coins, $2.50 and $1.00 gold and 50¢ silver-this is the original set owned by King Farouk and purchased from the Palace Collection through Spink's of London, England. A magnificent set-Brilliant Uncirculated-mounted in gold lettered white plastic but also complete with original case of issue and the original ribbons of issue-truly one of the kings of display items with the added prestige of guaranteed authenticated royal ownership ..."

A handful of private collectors and vendors have had the privilege of owning or offering this monumental set, and Heritage is proud to continue that tradition. The white and gold of the above-mentioned plastic case has been traded for the white and gold of NGC encapsulation, but the spirit remains the same. (The holder and its ribbon and tags are available as a later lot in this auction.) In the half-century since the Palace Collections auction, the legend of the King Farouk pedigree has only grown, and the public offering of this set must be regarded by commemorative collectors as an event of high importance.

The present lot contains five coins and four pieces of ephemera, all coins pedigreed to the King Farouk Collection on their NGC holders:

i) **1915-S Panama-Pacific Half Dollar MS66 NGC, CAC.** A strikingly lustrous representative that offers marvelous patina. The cen-

tral obverse is light gold-gray and orange, and that side's margins show rich sapphire and cyan toning with a thin ring of violet through the peripheral patina, this pattern appearing on a number of high-end toned Panama-Pacific halves. The reverse shows pink-tinged gold-orange around the periphery with a bright silver-white center. Well-defined with excellent eye appeal.

ii) **1915-S Panama-Pacific Gold Dollar MS66 NGC, CAC.** Not only one of the best technical examples available today, but also one of the most beautiful, with crisp detail and rich, satiny luster. Deep yellow-orange shadings prevail, but tiny glints of coral-pink add considerable variety and eye appeal. Noteworthy and desirable.

iii) **1915-S Panama-Pacific Quarter Eagle MS64 NGC, CAC.** Gorgeous luster with rich butter-yellow surfaces that show occasional sunset-orange tints. Well-defined overall, though a degree of the usual softness is present on Columbia's head, and if not for a few wispy marks in the fields, this piece would qualify easily for a finer designation.

iv) **1915-S Panama-Pacific Fifty Dollar Round MS63 NGC, CAC.** The undisputed master of the mountains of American commemoratives, represented here by a pleasing Select example. Warm sun-yellow color and considerable luster that reflects the impressive texture lent to the dies. Subtle green-gold accents are scattered on each side, including to the left of Minerva's portrait. Minimally abraded for the grade.

v) **1915-S Panama-Pacific Fifty Dollar Octagonal MS64 NGC.** This octagonal issue is a favorite of collectors and non-collectors alike, edged out by only the fifty dollar round for most challenging American commemorative. This luminous yellow-orange piece has a slightly dusky quality overall, though the eye appeal is consistently impressive. The well struck obverse shows few marks, and though a few sage alloy flecks are present at the lower reverse, these are hardly bothersome.

Lot 4210

vi) **Shreve & Co. Copper and Glass Five-Slot Coin Frame With Ribbons and Tags.** The hammered copper and glass in excellent condition, with the purple velvet and ribbons similarly well-preserved. The paper tags show only the slightest evidence of fading and are easily readable. Two screws holding the apparatus together missing, as is the leatherette-and-brass ring-suspension on the back of the holder, but these have little impact on the way this frame presents.

vii) **Five-Slot Cardboard and Leatherette Coin Case.** An enigmatic item. The Farouk auction description does not mention the nature of the case which housed the pieces. Neither does the California auction description, save in a roundabout way which mentions the "ribbons." This case is too small to hold any sort of ribbon. Perhaps this case is something along the lines of the now-lost white-and-gold plastic holder, an item made to help house the coins. Whatever its origin, the case is fascinating. Silver and black leatherette is applied over cardboard on the exterior. The interior has similar leatherette facing with a salmon-colored lining.

viii) **Auction Catalog for the 19th Semi-Annual California State Numismatic Association Convention,** held November 8-11, 1956. Light discoloration on the cover with scattered bidder's notes in an unknown hand, minor fraying at the corners, otherwise solid condition despite clear use. Staples are strong with no rusting.

ix) **Leo A. Young One-Page Autograph Letter Signed,** on personal memo-stationery, dated 4-18-67. An important link in this lot's pedigree chain, written to a familiar (but not completely identified) correspondent. It reads in full:

> "Dear Ralph: / Nov. 8-11, 1956, Cal. State Auction Catalog + Price Realized list enclosed. / Lot #1447 - Pan Pac. Set, estimated value at $3,750. = - Sold at $3600.00 to Kenyon Painter. / This is the Farouk set. I personally purchased it from Spink + Sons of London and they did + do guarantee what I've said about it being the Farouk Set. What else can I do for you? / Regards / Leo"

Minor fraying at edges with light ink stain at left, otherwise pleasing condition with textual integrity absolute.

If coins could talk, this widely traveled set would have quite the story to tell. Even though the pieces themselves are mute, the tags and their text, the catalog, and most of all, the letter from Leo A. Young speak volumes. For the collector who likes coins with a heavy dose of history, this is a fantastic lot. Should the winning bidder not already own a copy, the purchase of the Palace Collections of Egypt catalog from a reputable dealer in numismatic literature is highly recommended, to add yet another link to the past.

# Momentous 1915-S Panama-Pacific Fifty Dollar Round, MS64

**4211** **1915-S Panama-Pacific 50 Dollar Round MS64 PCGS. CAC.** A handful of U.S. issues hold an instant allure, not only for numismatists, but even for those who have never thought about collecting coins. The fifty dollar Panama-Pacific commemorative varieties are two such issues; while the Panama-Pacific Round does not benefit from the distinctive shape of the Octagonal issue, it shares the same broad surfaces and impressive heft, with over two ounces of pure gold contained in each one. The fifty dollar denomination is equally eye-catching.

It is worth noting that a non-collector, given the choice of which of two Panama-Pacific fifties, one the Octagonal type and the other a Round, to examine first, that person almost invariably selects the former. The sheer novelty of an octagonal coin is overwhelming, and in strict terms of visual interest, the odd shape triumphs. So it was with the Panama-Pacific fifties at the time of issue, which eventually resulted in a lower net mintage for the Panama-Pacific Round compared to its Octagonal counterpart. Q. David Bowers discusses this at length in his *Commemorative Coins of the United States*:

> "The octagonal $50 pieces were more popular than the round ones at the [Panama-Pacific International] Exposition. More of these were sold singly and in boxed sets (containing the three lower denominations and the buyer's choice of one $50 variety), as it seemed to the typical buyer that the eight-sided coin was more distinctive in shape ... than a round piece.
>
> The reception by numismatists of the Panama-Pacific coins was uniformly favorable, and undoubtedly at least a hundred or so five-piece sets were distributed in such channels, but most of the approximately 300 sets eventually sold seem to have gone to wealthy citizens in the San Francisco area, convention officials, bankers (particularly true of the framed sets sold later), and members of the general public."

It is interesting to note that the figures Bowers provides add up to an estimate of nearly 400 five-coin sets sold; given the official net mintage of just 483 pieces for the Panama-Pacific Round fifty, this leaves very few examples acquired through single purchase (with the three smaller coins included as a bonus). When one additionally considers the official net mintage of 645 pieces for the Octagonal fifties, it becomes clear that while many well-to-do individuals were willing to let the Round coins tag along in sets, those who were interested in purchasing just one Panama-Pacific fifty overwhelmingly rejected the circular variety and pursued its eight-sided cousin instead.

That rejection created the single greatest challenge facing gold commemorative enthusiasts today. It cannot be emphasized enough that only *483 pieces* of the Panama-Pacific Round fifty escaped the melting pot, creating a hard cap on the number of complete sets possible, and substantial attrition has further infringed on that figure. Moreover, the collector seeking an unimpaired survivor has even fewer options available, making a Choice coin such as the present piece an undeniable prize. Warm yellow-gold luster greatly enhances the eye appeal, and the well struck central devices are smooth. Aside from a handful of wispy flaws on and near the portrait, the surfaces are minimally marked. An interesting and noteworthy representative that would act well as a cornerstone of a similarly graded commemorative gold set. PCGS has graded just nine finer examples (11/08). (#7451)

# 1915-S Pan-Pac Round Fifty Dollar
# A Significant MS66 Survivor

**4212** **1915-S Panama-Pacific 50 Dollar Round MS66 NGC.** As the finishing touches were being made to the buildings and exhibits of the Panama-Pacific Exposition in San Francisco, World War II gained momentum in Europe. This is noteworthy as foreign representatives of both sides of the conflict participated in the exposition. Fortunately, it would not be until April 1917 that the United States officially entered the war as an ally of the Entente Powers. And, as such, the 1915 World's Fair enjoyed peace and unity among the 42 foreign countries and the 44 American states and territories who participated in this celebration of the discovery of the Pacific Ocean by Vasco Núñez de Balboa, the rebuilding of San Francisco after the 1906 earthquake and, more significantly, the completion of the Panama Canal.

An extensive variety of medals and coins commemorating the Panama-Pacific Exposition were produced. Numismatists today can thank President Theodore Roosevelt's earlier thrust for a renaissance of our nation's coinage, as many unusual and visually spectacular creations were produced as a result of his vision and leadership. Indubitably, the most memorable of the commemorative coins struck for the event are the fifty dollar gold coins—both in round and octagonal form. These pieces were the creation of Robert Ingersoll Aitken, an independent sculptor based in New York City. The outside design influence is unmistakable, as his composition was both original and artistically charged. Cornelius Vermeule, in his *Numismatic Art in America, Aesthetics of the United States Coinage,* offers beautifully crafted commentary of Aitken's design:

> "Robert Aitken tried to create modern, pseudo-Athenian coins, in an idiom of archaeological classicism popular among many American sculptors trained partly at the American Academy in Rome before and after the First World War. His ideas were laudable. There were a minimum of inscriptions, a classic Greco-Egyptian profile of Athena in full panoply, the date in roman numerals, and a naturalistic owl in a mass of Western pine cones. ... In an overall view, the arresting feature of the giant gold coins is their archaistic treatment of details in relief. Athena's crest, wreath, curls, and aegis imitate the work of an ancient bronze." ... "these coins were a tour de force, dated to be sure, but unusual enough in all respects to be worthy of what American numismatic art could achieve when creativity and mint technique worked in unison."

Aitken also designed the Panama-Pacific International Exposition commemorative medal, which, according to researcher and author Roger Burdette, was "struck by the Philadelphia Mint and on the exhibition site." The medal is another numismatic masterpiece by this outside sculptor who went on to design the 1921 Missouri commemorative half dollar and many other memorable pieces. Although he called New York City his home, it is interesting to note that Aitken was a native of San Francisco, which is likely coincidental to his commission to design the Panama-Pacific fifty dollar gold pieces. To non-numismatists he is best known for his architectural creations, such as the West Pediment of the United States Supreme Court building in Washington, D.C.

In terms of technical grade, the specimen offered here resides in the upper echelon of survivors from the original distribution of 483 commemoratives. Only 19 Panama-Pacific fifties in the round format have been graded MS66 by NGC, with just 3 finer pieces certified at the MS67 level (11/08). Lustrous with a pleasing strike, this bold example is a masterpiece that is equally steeped in historical significance and artistic beauty.

## Impressive 1915-S Panama-Pacific Fifty Octagonal Design, AU Details

**4213 1915-S Panama-Pacific 50 Dollar Octagonal—Improperly Cleaned—NCS. AU Details** The beautiful Panama-Pacific commemorative coins were created to celebrate the Renaissance of San Francisco after the 1906 earthquake, and the completion of the Panama Canal. A set of five coins was commissioned in conjunction with the Panama-Pacific International Exposition, held in San Francisco in 1915. The octagonal fifty dollar gold coins were the most dramatic and memorable of these special coins.

From a design by Robert Aitken, a New York artist, the first specimens of the octagonal gold coins were struck on June 15, 1915 at the San Francisco Mint. A total of 1,509 pieces were initially minted, but slow sales resulted in melting of 855 specimens, leaving a paltry net total of 645 examples issued. Contemporary opinion noted the design was lacking in American themes, but later numismatists value the coins as a classical tour de force.

The present specimen is a pleasing example of this scarce classic. Some microscopic hairlines indicate the coin was cleaned at some time in the past, but no overt damage was incurred. Bright yellow-gold surfaces are complemented by strongly impressed devices to produce striking eye appeal. Abrasions and surface marks are truly minimal. Overall, this coin is an eminently acceptable example of this impressive design. (#7452)

## Popular 1915-S Panama-Pacific Octagonal Fifty, MS63

**4214 1915-S Panama-Pacific 50 Dollar Octagonal MS63 NGC.** Much has been written about the territorial gold predecessor to the Panama-Pacific fifty dollar octagonal issue, the United States Assay Office fifty dollar octagonal, colloquially known as a "slug," and how it was an inspiration for the later issue's different and distinctive shape. Examination of a "slug" and a Panama-Pacific fifty side-by-side, however, reveals an interesting design difference. On the United States Assay Office fifty dollar octagonal pieces, the design is set so that when the obverse is held upright, flat sides are present at the top and bottom.

By contrast, the Panama-Pacific octagonal fifty has points at the top and bottom. Aesthetics likely played a role; the use of points at the cardinal directions gives the overall arrangement a more angular appearance, and since the pieces were commemorative and decorative, not utilitarian, less concern was given to how the coins would be handled.

Unfortunately for posterity, a number of the 645 Panama-Pacific octagonal fifties that escaped the melting pot *were* handled, often roughly, and many coins experienced wear or other impairments. By that standard, the present Select coin has come through the decades largely scot-free. Though a handful of wispy abrasions in the broad, lustrous yellow-gold fields preclude a finer designation, the sharp strike and rich color of this coin lend it distinctive eye appeal. At the time of their release, these coins' unusual shape led to greater interest in them; now, more than 90 years later, their eight-sided appearance continues to draw collectors. A great example of this issue, a series key along with its round twin.

# Important Gem 1915-S Panama-Pacific Octagonal Fifty

**4215** **1915-S Panama-Pacific 50 Dollar Octagonal MS65 NGC.** In 1915, San Francisco was far to the west of any American city where a major fair had yet been held. In that city, a leading citizen named James Phelan headed up a group that had ambitions to turn their city into a world-class town. In 1904, inspired by recent fairs, and particularly those hosted by Chicago and St Louis, they approached Daniel Burnham, an architect involved in the building of both the Chicago World's Fair and San Francisco's Chronicle Building and Merchant's Exchange. He possessed precisely the vision this group shared. He had been quoted in print as saying that "Beauty in the public work of a city has always paid." This was exactly the spirit Phelan and his friends desired—a neat blending of pleasing aesthetics and commercialism that would pay off, producing a showcase for the many qualities of their city as host to a world gathering. They also insisted that it was high time for such a fair to be held on the West Coast.

The Burnham Plan was presented to and endorsed by the San Francisco Board of Supervisors in 1905. Architects were chosen for the project. Sketches of planned monuments, buildings, streets, and parks were all readied by the spring of 1906. All were lost when the great earthquake of that year almost destroyed the city. The plans burned with City Hall. Enthusiasm for rebuilding San Francisco was almost immediate, and Phelan's group hoped it included their plan for the world's fair. But such was not to be. Financing the rebuilding of the city proved daunting, and many citizens felt that a celebration was not yet appropriate. Thus, for a few years the idea of staging a fair at this locale faded.

Elsewhere, others had plans of their own. Momentum built particularly in New Orleans for the next American exposition. Within a mere five years of the earthquake, however, San Franciscans had gathered enough spiritual steam to launch an advertising and lobbying campaign. In 1911, they achieved their goal when, following Congressional debates, President Taft declared that San Francisco would be host to the next American world's fair. This inspired a funding campaign. Almost all of the required money was given by Californians, who hoped to showcase San Francisco's resurrection. Their campaign succeeded largely because it had two spearheads that New Orleans could not equal. They proposed an exposition that would honor the 400th anniversary of Vasco Núñez de Balboa's historic discovery of the Pacific Ocean as well as the upcoming completion of the Panama Canal, which in 1911 was seen as a new world wonder. New Orleans was a great shipping center that would benefit from the opening of the canal, but the Pacific Ocean was far away.

San Francisco set to work. Before the Panama Canal officially opened to sea traffic in August 1914, an army of architects, designers, inventors, contractors, and builders descended on the city by the bay. It had taken 50 years to plan and construct the canal, but the expo city seemed almost to grow organically. The fair site would be huge, and would even feature a detailed reproduction of the Panama Canal covering five acres! But it would not be a real city. Much would be fantasy. The stage would be real enough, but the buildings that would look so substantial were actually constructed almost entirely of temporary materials intended to last approximately one year. Most of the building material was called "staff," an odd combination of burlap fibers and plaster which could be painted and decorated to look like concrete or marble. It had been used in building the Chicago fair in 1892 and tended to disintegrate slowly; it was not intended to last more than the duration of the exposition.

It took three years to put up this new city for the fair. It was located at the northern end of San Francisco on the bay, where land space was too short. This was alleviated by filling in the mud flats there, the site of today's Marina District. The fairgrounds eventually occupied 635 acres, stretching between the Presidio and Van Ness, bordered on the south by Chestnut Street and on the north by the bay. When the exposition officially opened on February 20, 1915, all of the anticipation and years of planning and building proved worth the wait. Over the next 257 days, more than 18 million visitors passed through the turnstiles of the entrance to wander through the modern and classical wonders displayed on the 635 acres.

The octagonal fifty dollar gold pieces that were produced at the fair are said to have been a tribute to the Gold Rush era, the famous "gold slugs" struck by Augustus Humbert from 1851-53. Humbert's work had led directly to the establishment of the U.S. Mint at San Francisco. However, mint officials may not have been as acutely aware of this history as we suppose. It is entirely possible that the two types of gold fifties were intended to reflect the dual nature of the events being celebrated—one for the Canal, and one for the anniversary of the discovery of the Pacific. No one has looked deeply enough into the archives to see if such an idea was postulated.

This stunning orange-gold example has a lovely overlay of satiny mint luster. The surfaces are as clean as one would expect from a Gem. In fact, the only mark we see is a tiny horizontal mark across the highpoint of the cheek of Athena. An outstanding example of this distinctive gold commemorative. (#7452)

Outstanding 1915-S Panama-Pacific
Fifty Dollar Octagonal, MS67

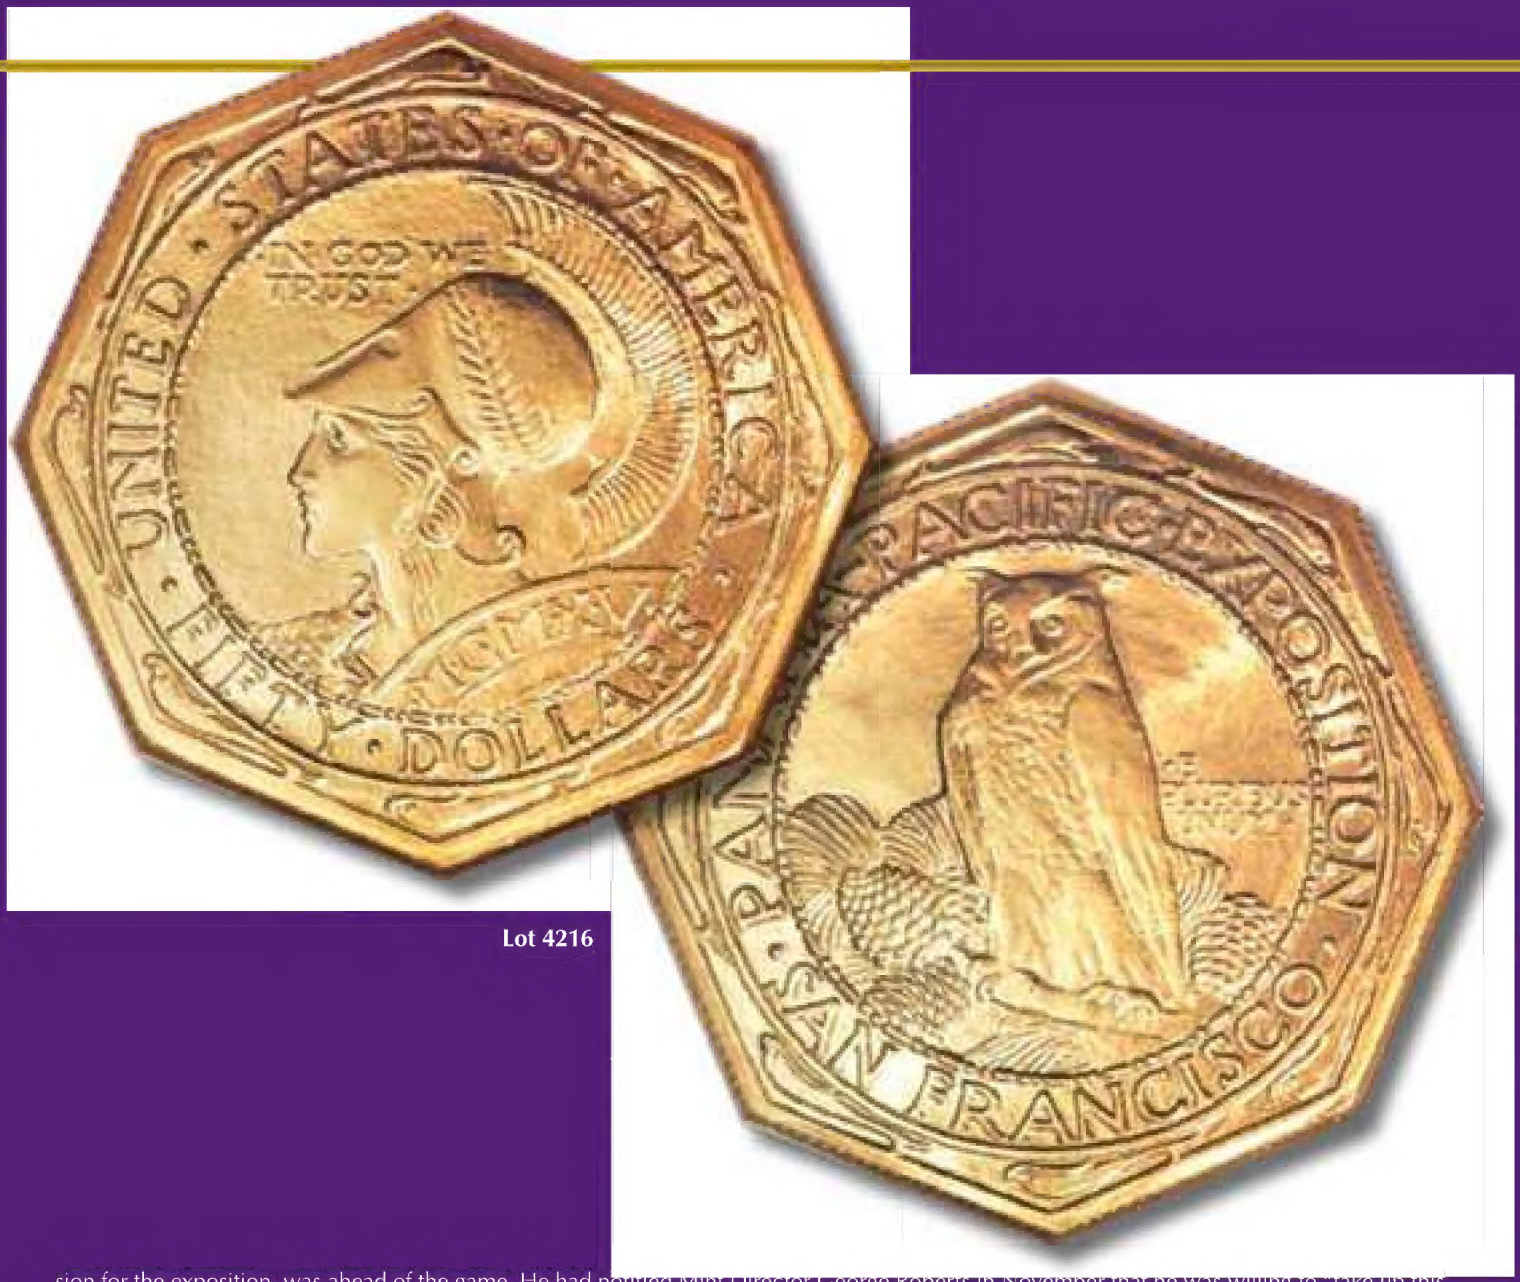
**4216 1915-S Panama-Pacific 50 Dollar Octagonal MS67 NGC.** The Panama-Pacific fifty dollar octagonal gold commemorative piques several collecting interests. It is one of just eight classic gold commemoratives, those produced from 1903 to 1926. It reprises the gold pieces first produced by Augustus Humbert in 1851 as United States Assayer of Gold in California, thus recalling the heritage of private and Territorial gold issues. It is a large coin, having the approximate size of four quarters arranged in a 2x2 grid, and a weight of about 15 of those quarters. Every auction appearance of the Pan-Pac octagonal commands interest, and the commemorative has been popular since it was released during the Panama-Pacific International Exposition in 1915.

Shortly after the United States started work on the Panama Canal in 1904, Reuben Hale and other members of the San Francisco Merchant's Association proposed an exposition. Not only would the event celebrate San Francisco's status as the major West Coast port for canal traffic, but it would also mark the 400th anniversary of Vasco Nuñez de Balboa's discovery of the Pacific Ocean. The disastrous 1906 earthquake put a hold on those plans, but only temporarily. Roger W. Burdette (2007) elaborates: "The rebuilding of San Francisco seemed to stimulate fundraising for the exposition and some individual pledges exceeded $250,000 ... the exposition was seen by San Francisco businesses as a unique opportunity to '... draw the attention of the world to San Francisco' and promote it as a "playground of America" for tourists.' "

That last sentiment proved prescient, as people came from all over the United States to view the magnificent displays. The crowds included politicians and celebrities such as Woodrow Wilson, Theodore Roosevelt, Eddie Rickenbacker, Thomas Edison, and Helen Keller. The Liberty Bell was there, shipped from Independence Hall in Philadelphia. The Ford Motor Company set up an assembly line in the Palace of Transportation, producing a car every 10 minutes for a few hours each afternoon. The promoters of the exposition did not hide their enthusiasm, stating in the exposition brochure that "the Panama-Pacific Exposition is an encyclopedia of modern achievement. You are afforded an opportunity to make a comparative study of the methods and manners of modern civilization ... such an event will not occur again while you live." Lest the motivation for the event be forgotten, the full-color cover displayed a larger-than-life man pushing apart the earth to make way for the canal.

The authors of the exposition brochure declared that the various architects, artists, and landscape gardeners had built a city that was "straight out of a beautiful dream." For numismatists, there were commemorative coins and a souvenir medal from the U.S. Mint. The coins included a silver half dollar, a gold dollar, a gold quarter eagle, and two types of a "quintuple eagle" or fifty dollar coin, one round and the other octagonal. Both medal and coins were to have been struck by the Mint on-site, but concerns about the legality of minting U.S. coins at a non-official mint location resulted in the moving of coin production to the nearby San Francisco Mint. Legislation limited production of the fifty dollar coins to 3,000 pieces, equally divided between the two styles. Designs for the coins were solicited both internally, from engravers Charles Barber and George Morgan, and from outside through lists of capable artists provided by the Commission of Fine Arts.

Robert Aitken, a New York artist on the commission's list as a possible coin designer, was officially notified on January 21, 1915, that he had been selected to prepare designs for the fifty dollar gold coins. Aitken, who had been persistent in his desire to obtain a design commis-



**Lot 4216**

sion for the exposition, was ahead of the game. He had notified Mint Director George Roberts in November that he was willing to "take up this work" immediately, so that the process would not be compromised because of time constraints. Aitken delivered sketches of the obverse and reverse designs to acting Mint Director Frederick P. Dewey (Roberts had resigned November 15, 1914) only two days after receiving his authorization to proceed. After several weeks of negotiation between Aitken and Treasury officials (extensively documented in Burdette's *Renaissance of American Coinage 1909-1915*), Aitken's designs were approved in early March.

The obverse of both fifty dollar coins depicts the Roman goddess Minerva, while the reverse displays an owl, said to be sacred to Minerva and a symbol of wisdom. Some suggest that the motifs alluded to the need for America to be watchful and prepared on the eve of this country's involvement in World War I, already raging in Europe. The basic round and octagonal designs were the same, everything from the outer text ring inward, though reduced in size for the octagonal piece. On both obverse and reverse Aitken placed an unbroken circle of dolphins into the spaces provided by the angled corners of the octagonal design. Dolphins were considered friends and guardians of sailors, and were symbolic of the new connection between the Atlantic and Pacific Oceans provided by the Canal.

The allegorical nature of Aitken's designs received mixed reactions both during design negotiations and after the coins were released. Though some thought the symbolism appropriate, others complained that the designs were nothing more than copies of ancient works. Despite the promotional efforts of the enigmatic and sometimes controversial Farran Zerbe, president of the ANA from 1908 to 1910 and the person in charge of the exposition's coin and medal department, most of the fifty dollar coins went unsold and were melted.

This offering is one of the 645 coins sold either during the exposition or shortly thereafter (though the later sales may have violated the terms of the authorizing legislation). The presentation of this piece is amazing. Surfaces are exceptionally clean, with no toning spots or significant marks, indicating the piece has been carefully treasured and protected for nearly a century. Sharply struck, lustrous surfaces gleam with an orange-tinted, honey-gold patina. Though fifty dollar Pan-Pac octagonals are not uncommon in auction offerings, in this state of preservation the coin is extremely rare. Neither NGC nor PCGS has certified an example finer than MS67, and this sample is one of only four listings at that grade in the NGC *Census Report* (9/08). A rare and beautiful example of a historic issue, this coin is truly a "numismatic sensation" that will be a highlight of the most discriminating collection.

*From The Scott Rudolph Collection.* (#7452)

***See: Video Lot Description***

## TERRITORIAL GOLD

### AU Details 1850 Baldwin Five, K-2

**4217 1850 Baldwin Five Dollar—Improperly Cleaned—NCS. AU Details.** K-2, R.5. An earlier die state without substantial die break at the rim over Liberty's hair bun. George C. Baldwin and Thomas S. Holman bought out F.D. Kohler & Co., who gave the purchasers a glowing public recommendation. The coins issued by the firm, however, were modestly underweight on gold, a fact later exploited by a consortium of bankers who manipulated Augustus Humbert and local newspapers into stirring a public frenzy against Baldwin & Co. and other private coiners, driving them from the state. This finely granular example is a survivor from their coinage exploits, oddly luminous from a past cleaning, but still well-detailed on the yellow-gold central devices. Listed on page 368 of the 2009 *Guide Book*. *From The Martin L. Diffenbaucher, Jr. Collection.* (#10025)

## Rare 1860 Clark, Gruber Ten, MS61
## One of the Finest Pieces Known

**4218** **1860 Clark, Gruber & Co. Ten Dollar MS61 PCGS.** K-3, R.5. After their facility began functioning as a mint, the Clark, Gruber coinage was issued in significant quantities. From the beginning of operations in July 1860, through the end of calendar year 1862, the firm issued a total of $594,305 in gold coins. Walter Breen attempted to estimate original mintages in his *Complete Encyclopedia,* based on rarity ratings provided by Donald Kagin. For the 1860 ten dollar piece, Breen estimated a mintage of 3,500 coins. After discontinuing their coinage operations in 1862, the firm began producing gold ingots with a production reported to be as much as $828,000 in value, although not a single ingot is known today. Finally, the Clark, Gruber operation was purchased by the United States Government on April 16, 1863, with the promise of a branch mint in Denver. The facility served as a government Assay Office, and the promised Denver branch of the United States Mint finally opened for business—43 years later.

This example is a remarkable Mint State specimen with brilliant green-gold surfaces. Frosted mint luster is seen around the peripheries with a slight semireflectivity around the central devices. The design elements are sharply struck throughout, giving the coin a well-balanced appearance. The surfaces have a few small abrasions that are consistent with the grade. The most obvious one that can be used for pedigree purposes is a check-shaped scratch from the P, below the E, and terminating in the A of PEAK at the top of the obverse. Population: 5 in 61, 8 finer (11/08). (#10137)

## Popular 1861 Clark, Gruber & Co. Quarter Eagle, K-5, MS61

**4219** **1861 Clark, Gruber & Co. Quarter Eagle MS61 NGC.** K-5, R.4. The Clark, Gruber & Co. minor (quarter eagle and half eagle) gold coinages make an interesting and relatively inexpensive introduction to territorial gold for the area novice. For the more advanced collector, high-end examples such as the present MS61 piece beckon. Though this bright yellow-gold example shows wispy abrasions and a small dig below Liberty's hair bun, the overall visual appeal is high, and the strike and luster speak of quality. Noteworthy and exciting for the Colorado gold connoisseur. Listed on page 376 of the 2009 *Guide Book*. *From The Martin L. Diffenbaucher, Jr. Collection.* (#10139)

## Clark, Gruber 1861 Twenty Dollar Gold Impressive, XF40

**4220 1861 Clark, Gruber & Co. Twenty Dollar XF40 NGC.** Breen-7946, Kagin-8, R.5. The pioneer gold coins of Clark, Gruber & Co. enjoyed an unparalleled reputation for honest value, and were widely accepted by merchants and bankers in the western United States. Clark, Gruber & Co. was established in 1858 as a banking house by the Clark brothers, Austin and Milton, and their partner Emanuel Gruber. The firm was originally located in Leavenworth Kansas, on the corner of Delaware and Third Streets. With the expansion of the Colorado Gold Rush, the firm became one of the principal buyers of gold dust and ore in the region. Clark, Gruber & Co. soon found the costs of shipping their gold to Philadelphia or New Orleans for coining to be exorbitant. Insurance and shipping alone amounted to 10% of the value of the cargo. In addition, the firm had assets of up to $300,000 tied up in transit for months with each shipment. The advantages of coining the gold locally were painfully obvious. Milton Clark was an attorney, and after reviewing the current statutes, he concluded there was no legal impediment to forming a private mint, as long as the coins issued were of true value. Accordingly, land was purchased in Denver City, machinery was purchased and transported from Philadelphia, and a fine new building was erected to house the operation on the corner of G and McGaa Streets. The firm opened its new banking and assaying business on July 10, 1860, and the first coins were struck 10 days later. The Clark, Gruber & Co. issues quickly became the principal coinage of the Pike's Peak region. During their two years of operation, the firm issued $594,305 worth of gold coins. The operation was sold to the U.S. government, in anticipation of setting up a federal mint in Denver. Unfortunately, the Civil War, and other events, delayed the opening of the Denver Mint until 1906.

Clark, Gruber & Co. issued coins in the traditional gold denominations of $2.50, $5.00, $10.00, and $20.00. The design of the 1861 coins was quite similar to the federal issues, but the inscriptions on the reverse read CLARK, GRUBER & CO DENVER, with the denomination at the bottom. The coins always contained more than face value in gold when struck, but the alloy was soft, and the coins wore down quickly. While the coins were generally well executed, striking quality was not a major concern.

The present coin is an attractive example of this interesting design. The softness of the alloy has resulted in moderate, even wear on the high points, typical of this issue. Much detail remains on the central devices, and the PIKES PEAK inscription is fully legible. Vibrant yellow-gold color enhances the surfaces, and abrasions are minimal for the grade. (#10142)

## XF Sharpness 1851 Humbert Fifty 880 Thous, Reeded Edge, K-5

**4221 1851 Humbert Fifty Dollar, 880 Thous.—Reverse Scratched—NCS. XF Details.** K-5, Low R.5. A faint straight pinscratch crosses the reverse between 10:30 and 3:30, but hardly seems worthy of a 'Scratched' designation. The eagle's shield and rock show wear consistent with the XF sharpness grade. The wings display luster and impressive plumage detail. A few small bagmarks are scattered above the eagle and throughout AMERICA. Moderate rim dings are present at 4 o'clock on the obverse, and at 4 and 11 o'clock on the reverse. Circulated slugs often have small bruises on the rim corners, due to the softness of the alloy, the indifference of frontier commerce, and the sheer weight of the piece. Listed on page 362 of the 2009 *Guide Book*.
*From The Omaha Collection.* (#10211)

## 1851 Humbert Fifty, Reeded Edge, 880 Thous., K-5, XF45

**4222 1851 Humbert Fifty Dollar, 880 Thous. XF45 NGC.** Reeded Edge, No 50 on Reverse. K-5, Low R.5. The Humbert fifty dollar gold pieces of 1851 were issued in both Lettered Edge and, later, Reeded Edge varieties. The Reeded Edge varieties eliminated many of the cumbersome manual labor steps required to physically and individually edge-letter eight-sided coins, a process that resulted in many curious errors, transpositions, and inversions. The edge-reeding also cut down on the inclination for ne'er-do-wells to shave the edges in order to keep a bit of bullion.

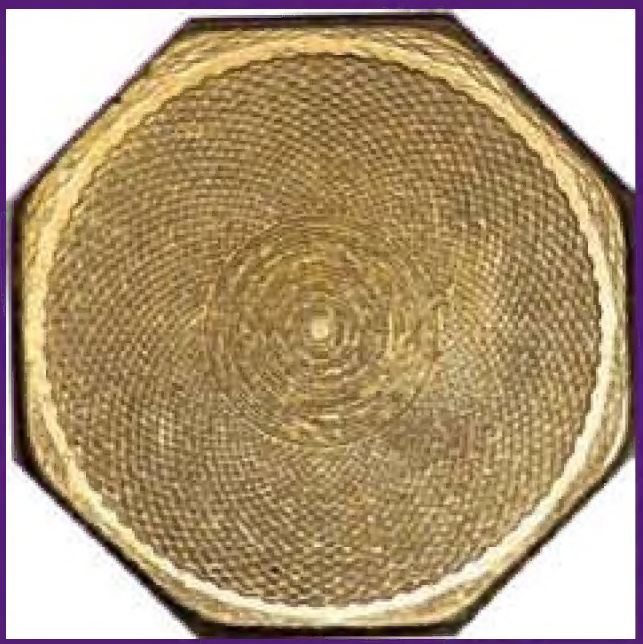
This piece still offers considerable luster remaining, with typical brownish-gold coloration and a couple of the rim bumps often seen on these large, soft, and heavy gold pieces. Listed on page 362 of the 2009 *Guide Book*. (#10211)

## Attractive AU53 1851 Humbert Fifty Dollar 'Slug', K-5

**4223 1851 Humbert Fifty Dollar, 880 Thous. AU53 NGC.** Reeded Edge, No 50 on Reverse, K-5, Low R.5. The first Humbert octagonal "slugs," which are in reality fifty dollar ingots, had a lettered edge that included the date. The hand-lettering process was cumbersome and resulted in numerous errors, such as partially inverted lettering and repunched letters and words. It is a tribute to Humbert and the other personnel involved in the U.S. Assay Office that in a remarkably short time they managed to progress from the first rudimentary hand-lettered pieces to high-speed production of reeded-edge coins (such as the present piece) on coin presses that rivaled those of the then-current Philadelphia Mint.

Like most of these soft and heavy gold coins, this piece shows some small abrasions from a short stay in circulation, along with a couple of rim bumps—the octagonal shape made the eight corners particularly susceptible to contact. While minimally abraded for a "slug" there are two small planchet voids on the rock that the eagle is perched upon. Much luster is present over the rich-colored amber-gold surfaces, with a glint of greenish (likely alloyed silver) near the date and over the eagle. A nice example of this historic coinage, listed on page 362 of the 2009 *Guide Book*. (#10211)

A 15% BUYER'S PREMIUM ($9 MIN.) APPLIES TO ALL LOTS.



## Near-Mint 1851 Humbert Fifty Reeded Edge, 880 Thous., K-5

**4224 1851 Humbert Fifty Dollar, 880 Thous. AU58 NGC.** K-5, Low R.5. A reeded edge variety with the date on the obverse exergue. This straw-gold example displays shimmering luster on the legends, eagle, and scroll work. The eagle's plumage detail is virtually complete, although the rock, leg, and arrows show wear. Careful inspection locates a couple of trivial edge nicks at the corners, but field marks are fewer in number than generally seen. The obverse field has a pebbled texture, as made from a rusted die. A desirable example of this first-year Humbert issue.

The United States Assay Office of Gold in San Francisco essentially operated as a provisional United States mint in California prior to the opening and operations of the official branch mint three years later. Augustus Humbert, who served as assayer for the United States, came to the west coast from New York where he had been a watchmaker. Humbert was appointed the assayer of the USAOG at a salary "not to exceed five thousand dollars," and arrived in San Francisco early in January 1851.

After the U.S. Assay Office closed in 1853, Humbert partnered with John Glover Kellogg in an assay house venture, which produced private gold coins in 1854 and 1855 during the growing pains of the new San Francisco Mint. Many large Kellogg & Humbert gold ingots were recovered from the 1857 *S.S. Central America* shipwreck. Humbert returned to New York in 1860, where he lived there for several years until his death on June 7, 1873 at the age of 58. The present variety is listed on page 362 of the 2009 *Guide Book*. Census: 12 in 58, 11 finer (11/08).

*From The James Mossman Collection.* (#10211)

## Beautiful MS61 Kagin-12a 1852 Assay Office Ten Dollar

**4225** **1852 Assay Office Ten Dollar MS61 NGC.** K-12a(2), R.5. Faint beads on the reverse rim. An imposing example of this scarce pioneer gold variety. The reverse has full luster, and obverse luster dominates the borders and devices. The eagle and shield display exceptional definition. Although most survivors have notable abrasions or other problems, the present lot is uncommonly mark-free. A speck of translucent residue is present on the D in DOL. Both sides have slender die cracks that may be interest to the specialist. Listed on page 363 of the 2009 *Guide Book*. Census: 23 in 61, 12 finer (11/08). *From The Martin L. Diffenbaucher, Jr. Collection.* (#10001)

## AU53 1852 Assay Office Fifty 900 Thous., Kagin-14

**4226** **1852 Assay Office Fifty Dollar, 900 Thous. AU53 PCGS.** K-14, High R.5. An impressive Assay Office 'slug' that has full plumage detail on the eagle and only moderate wear on the leg and fletchings. Rose-tinged luster outlines the legends. A few of the corners have small dings, with a more noticeable ding on the obverse at 5 o'clock. A small strike-through near the I in UNITED provides an identifier, and the only conspicuous mark is a tick within the reverse lathe work. Most surviving slugs are cleaned or heavily abraded, but the present piece is original and partly lustrous. Listed on page 364 of the 2009 *Guide Book*. Population: 3 in 53, 12 finer (12/08). (#10019)

## Shining MS62 1853 Assay Office Twenty Dollar 900 Thous., K-18

**4227 1853 Assay Office Twenty Dollar, 900 Thous. MS62 NGC.** K-18, R.2. The U.S. Assay Office at San Francisco first produced the fifty dollar octagonal ingots, or "slugs," and larger octagonal ingots were in the planning, but the California populace demanded smaller, not greater denominations. Private coinages filled the gaps until the Assay Office received formal permission to strike ten and twenty dollar pieces such as the present lot. This yellow-gold and honey-gold piece of .900 fineness evidently did not circulate, instead retaining its immense luster. Wispy but grade-defining abrasions have little impact on the overall visual appeal. Listed on page 365 of the 2009 *Guide Book*.
*From The Martin L. Diffenbaucher, Jr. Collection.* (#10013)

A 15% BUYER'S PREMIUM ($9 MIN.) APPLIES TO ALL LOTS.

# Renowned 1855 Fifty Dollar Gold Piece
# Rare Kellogg & Co. Issue, PR63
# J.G. Kellogg's Specimen

**4228** **1855 Kellogg & Co. Fifty Dollar PR63 NGC.** Adams-54, Breen -7921, Kagin-4, R.7. Any fifty dollar gold coin is an impressive numismatic item. The massive presence of these beautiful pieces captures the attention and holds the respect of any viewer. The Kellogg fifty dollar slug probably owes its existence to its potential as an advertisement, rather than to any commercial need for such a coin.

The Kellogg firm was operating at full speed turning out their twenty dollar gold coins in 1855. With this denomination well established and serving admirably in the local economy, it is unlikely there was any pressing need for the fifty dollar piece. while Edgar Adams pays lip service to the idea that a larger denomination was desired by local merchants to facilitate counting of large sums, the fact that only two dozen or so pieces were minted indicates actual demand was not great. Instead, the small mintage of presentation pieces was a statement about the quality of Kellogg's products and the ability of the firm to match Wass, Molitor & Co. in the production of large denomination gold coins.

John Glover Kellogg arrived in San Francisco on October 12, 1849. He was originally from Auburn, New York and came West to seek his fortune at the height of the gold rush. He initially took a position with Moffat & Co., and remained with that firm during their operation as the United States Assay Office of Gold. When Moffat & Co. closed down in late 1853, prior to transitioning their facility to the new San Francisco Mint, Kellogg established a partnership with assayer G.F. Richter. The new firm of Kellogg & Richter was located at No. 106 Montgomery Street, in the basement of J.P. Haven's building. Initially, the firm acted only as an assay office, but California merchants and bankers petitioned them on January 14, 1854 to produce coins for the local economy. The intention seems to be for Kellogg & Richter to fill the gap between the closing of Moffat & Co. and the opening of the San Francisco Mint. Kellogg & Richter embraced the opportunity enthusiastically, and their first twenty dollar gold coin was minted on February 9, 1854. The coins were Immediately popular with the public, and the California economy easily absorbed all the coinage the Kellogg firm could produce. Since production was modest at the new Mint in 1854, Kellogg continued producing his private coinage through 1855. By late 1854, Kellogg had dissolved his partnership with Richter and taken a new partner, Augustus Humbert. Humbert had popularized the dramatic eagle design used on the back of the Kellogg Fifty Dollar slug when he was a principle of the United States Assay Office of Gold. Ferdinand Gruner was the engraver of the slug. The Wass, Molitor & Co. firm was Kellogg's main competition in the private coinage industry, and they were famous for their giant fifty dollar slugs. Kellogg undoubtedly produced his artistically superior slug to demonstrate his firm's ability to keep pace with the competition at all levels of the private coinage trade.

The present specimen is an extremely attractive example of this spectacular issue. An exemplary strike complements the reflective fields to produce stunning eye appeal. Every detail of Gruner's intricate design is fully realized, and enticing yellow-gold color radiates from the proof surfaces. A few handling marks and rim bruises are unavoidable with such a large coin, and are consistent with the grade. PCGS has graded only one coin in PR63, with two higher. NGC has certified the present coin in PR63, with none finer (1/,08).

No mintage records were kept for this issue. Experts believe perhaps 20-25 coins were produced, all as presentation pieces. Three coins, including the present specimen, were retained by Kellogg at the time of issue. Other prominent collectors known to have acquired an example of the Kellogg Fifty Dollar gold piece include Virgil Brand, Andrew Zabriskie, George Earle, and John Beck. An exact census of surviving pieces is impossible to establish, but experts agree on a range of 12-15 specimens extant. This issue has justly been called the "King of Territorial Gold."

## Interesting XF Details 1860 Mormon Five, K-6

**4229 1860 Mormon Five Dollar—Improperly Cleaned—NCS. XF Details.** K-6, High R.5. In addition to the differences in design from the Mormon gold pieces of 1849 and 1850, the 1860-dated Mormon fives also have a different composition. As recounted in Erik von Klinger's article "Mormons arrive to gold" in the December 20, 2004 edition of *Coin World*, "The gold for the 1860 coins is supposed to have come from mines in Colorado, where a gold rush began in 1858. The gold dust was about .917 (22-karat) fine, purer than the California gold that was used for the older Mormon coinage."

Despite the softer metal used, this example has held up well to its light wear. A past cleaning has lent the lemon-gold surfaces a degree of unnatural luster and scattered hairlines, but the surfaces are minimally flawed otherwise. Listed on page 375 of the 2009 *Guide Book*. *From The Martin L. Diffenbaucher, Jr. Collection.* (#10268)

A 15% BUYER'S PREMIUM ($9 MIN.) APPLIES TO ALL LOTS.

## 1860 Mormon Five Dollar, K-6, AU55

**4230** **1860 Mormon Five Dollar AU55 NGC.** K-6, High R.5. The K-6 Mormon five dollar was struck in 1860, the first coinage from the group in the 10 years since the 1850 coinage, which was also limited to the half eagle or five dollar denomination. The previous year, 1849, saw mintages of the quarter eagle, half eagle, eagle, and double eagle denominations—although, of course, none of those pieces before 1860 bore an image of the U.S. national bird.

The 1860 Mormon five dollar in design is completely unlike the various issues that precede it, so much so that it must be thought of as a separate subtype. The 1849-50 gold pieces bear on one side the all-seeing eye of Jehovah, with a crown's or bishop's miter above and HOLINESS TO THE LORD around the periphery. On the reverse, clasped hands of friendship are in the center, with date below, the denomination, and various inscriptions related to "pure gold" and Salt Lake City.

The 1860-dated pieces, however, bear a likeness of the Lion of Judah, apparently in repose beside a flowing stream, with HOLINESS TO THE LORD now transliterated into the newly developed Deseret alphabet, as Kagin points out "the first known use of the Deseret alphabet" and "the basis of a proposed language peculiar to the Mormons." The reverse here *does* bear the figure of an eagle, but rather than a shield on its breast the bird here has a beehive superimposed. On the K-6 variety the legend DESERET ASSAY OFFICE PURE GOLD encircles the rim, with PURE GOLD to the right. (R.8 copper die trial pieces are known with a different reverse that has PURE GOLD to the left.)

Kagin points out that the occasion for the issuance of the 1860 five dollars was the discovery of gold in Colorado, and the dust used for the coins was purer than the California gold, .917 fine versus .890 fine. While the coins were well-accepted within the Mormon community, they saw little favor elsewhere. Most of the pieces are circulated, with the average grade of certified survivors (the top end of all pieces) in the range of AU50. This AU55 piece shows pretty brownish-gold coloration with considerable luster remaining, and the strike is bold. The overall eye appeal is quite high. Listed on page 375 of the 2009 *Guide Book*. (#10268)

## Uncommonly High Grade 1849 Norris, Gregg, & Norris Five MS62, K-2

**4231 1849 Norris, Gregg, & Norris Five Dollar, P.E. MS62 NGC.** K-2, R.5. The firm of Norris, Gregg, & Norris is generally considered the first producer of Territorial gold in California after the discovery of that precious metal in late 1848. The company was previously located in Brooklyn, and an advertisement of the period noted:

> "Norris, Gregg & Norris. Manufacturers and dealers in raw iron pipes and fittings of all kinds for steam, water, gas, etc. ... Tubular boilers of various sizes."

In spite of their presence in Gold Rush California, much of the coining history from this period was forgotten until Edgar Adams published a book on the subject in 1913. In it related:

> "The significance of the initial 'N.G.&N.' is said not to have been understood until the sale of the coins of Augustus Humbert in 1902. Among his effects was found a perfectly Uncirculated gold piece of this variety, wrapped in a sheet of paper bearing the words, 'From my friends, Norris, Gregg & Norris.' "

Could this be that coin? We can only speculate, but note that this is one of the finest examples known of this popular Territorial issuer. Only eight others have been so graded by NGC and PCGS with three finer (12/08). The surfaces are bright and semiprooflike on each side. Unlike softly struck or lightly worn examples of N.G.& N. fives, this piece shows a complete 5 on the high point of the shield. Bright yellow-gold color is seen on each side and there are no obvious or mentionable abrasions. (#10279)

A 15% BUYER'S PREMIUM ($9 MIN.) APPLIES TO ALL LOTS.

## Notable MS61 1849 Norris, Gregg, & Norris Five Reeded Edge, Period, K-4

**4232 1849 Norris, Gregg, & Norris Five Dollar R.E. MS61 NGC.** Period, K-4, R.4. The earliest reports of gold from California made that area of the West Coast seem a magical place, and among the earliest metalworkers to make the journey there by sea were the eponymous members of Norris, Gregg, & Norris. As quoted in the Dan Owens compilation reference *California Coiners and Assayers*, an advertisement run in New York City drew attention to their Brooklyn establishment: "Norris, Gregg & Norris. Manufacturers and dealers in raw iron pipes and fittings of all kinds for steam, water, gas, etc. No. 62 Gold St. Mills and public buildings heated by steam. Tubular boilers of various sizes. Thomas H. Norris, Charles Gregg, Hiram A. Norris."

When the three members made their way to California, their firm turned iron into gold, becoming what Owens " ... believed to have been the first quantity issuer of gold coins in California." The firm's fortune, however, was not to be found in California, and at least one of its principals, Hiram A. Norris, returned to Brooklyn and died there in August of 1853.

While the Norris, Gregg, & Norris gold half eagle issues faded into a degree of obscurity, more recent decades have brought greater acknowledgement of the pioneering nature of the firm's territorial gold (and consequently greater demand). This interesting piece has intact yellow-gold luster with light, scattered abrasions across the fields and the low areas of the devices. The high points show a degree of striking softness but no appreciable evidence of wear. Listed on page 360 of the 2009 *Guide Book*.

*From The Martin L. Diffenbaucher, Jr. Collection.* (#10282)

## Oregon Exchange Company Five Dollar
## A Pleasing VF25 Survivor

**4233** **1849 Oregon Exchange Co. Five Dollar VF25 PCGS.** K-1, R.5. A territorial issue that most collectors only dream of owning. Not necessarily because of the strong prices associated with Oregon Exchange Company half eagles, but simply due to the limited extant population. It is believed that less than 50 examples have survived the original mintage of 6,000 pieces. A review of the NGC *Census Report* and the PCGS *Population Report* support the claim, as a combined total of only 40 1849 Oregon fives have been certified as of (11/08), which most certainly includes a few resubmissions.

This example clearly circulated, which adds to its historical significance and charm. The few abrasions observed on either side are commensurate with the assigned grade, although we note two marks at the 3 o'clock obverse rim for the sake of full disclosure. The obverse patina is an even tan hue, whereas the reverse tone is a pleasing orange-gold color. A pleasant example of this highly challenging issue. Population: 8 in 25, 12 finer (11/08). (#10288)

A 15% BUYER'S PREMIUM ($9 MIN.) APPLIES TO ALL LOTS.

## Rare 1849 Oregon Exchange Co. Five Dollar, AU Details

**4234 1849 Oregon Exchange Co. Five Dollar—Damaged—NCS. AU Details.** K-1, R.5. 89% Gold, 5% Silver, 6% Copper. Produced by the Oregon Exchange Company in 1849, only 6,000 of these half eagles were issued and today we estimate that no more than 50-60 pieces exist in all grades.

Often referred to as "Beaver Money", these gold coins were created in order to ease a rather urgent need for circulating currency in the Oregon Territory, shortly after the beginning of the great California Gold Rush.

In the latter months of 1848 and the early months of 1849, a great deal of gold dust had migrated from California into Oregon, as gold miners purchased lumber, foodstuffs, and other items that were exported from Oregon. Dealing with gold dust as a medium of exchange was problematic for Oregonians (as it was also proving to be for Californians). Variations in gold purity and general mistrust between buyers and sellers were among the chief difficulties that led, finally, to the establishment of a private mint in Oregon City for the weighing and stamping of gold dust into five and ten dollar coinage.

This is an attractive coin with sharp details on the beaver. The surfaces show only a few small, scattered marks and both sides display even, light-green color. The "damage" referred to by NCS is probably the set of puncture marks that reside just below and to either side of the A in NATIVE, near the center of the reverse. Overall, however, this is a very pleasing example of this rare territorial issue. Listed on page 373 of the 2009 *Guide Book*.
*From The Martin L. Diffenbaucher, Jr. Collection.* (#10288)

## Rarely Seen 1849 Oregon Five, AU53

**4235 1849 Oregon Exchange Co. Five Dollar AU53 NGC.** K-1, R.5. The news of the discovery of gold in California reached the Oregon Territory in late July 1848. That news was confirmed in Oregon City, seat of Clackamas County, on August 9 of that year, when the brig *Henry* docked with gold dust, arriving from San Francisco, and by October more than two-thirds of the men in Oregon had departed to seek treasure in the gold fields of California. The *Oregon Spectator,* founded in 1846, one of the first newspapers west of the Mississippi River, was forced to stop publishing in 1848 "because its printer, with 3,000 officers, lawyers, physicians, farmers and mechanics were leaving for the gold fields." (Kagin, *Private Gold Coins and Patterns of the United States.)* By spring of the following year, gold dust had almost entirely replaced beaver and other fur pelts as the primary medium of exchange, although it traded at a substantial discount to silver coins (when available) and to its value at the Philadelphia Mint. Miners were losing money.

Against this backdrop, the Oregon Exchange Company was formed, with the express purpose of weighing and stamping gold. Although Oregon was officially declared a territory of the United States on March 3, 1849—rendering any plan to coin gold clearly unconstitutional—several prominent residents determined to proceed with the plan. The surnames of those residents were Kilborn, Magruder, Taylor, Abernethy, Willson, Rector, (Gill) Campbell, and Smith. Their initials K. M. T. A. W. R. G. S. appear around the rim of the five dollar gold pieces, which also picture a beaver on a log and a laurel wreath. In error, the initials T.O. (rather than O.T., for Oregon Territory) were stamped on the obverse. The five dollar contains the reverse legend OREGON EXCHANGE COMPANY around the periphery, with 130 G. / NATIVE GOLD. / 5 D. in the center. The initials of two men were omitted from the ten dollar pieces struck later, and the T.O. was corrected to O.T.

The gold coinage was unalloyed with silver or copper, and succeeded in raising the price of gold dust from $12 to $16 as the pieces circulated. Alloy was purposely omitted to ensure that the pieces would be accepted regardless of variances in the purity of gold dust, but their inherent softness caused them to suffer in contact with the harder alloyed gold coinage from California—and their higher intrinsic value caused them to soon be melted.

The fives were struck to the extent of 6,000 pieces, along with 2,850 of the tens. The present example shows light rub and strike softness on the beaver and his log, along with miscellaneous small abrasions and surface nicks characteristic of a soft, unalloyed gold. A bit of softness is also visible around the N's in OREGON and NATIVE. Much luster remains, however, and the surfaces are enormously appealing. Census: 4 in 53, 5 finer (11/08). Listed on page 373 of the 2009 *Guide Book.* (#10288)

## COINS OF HAWAII

### Delicately Toned 1883 Hawaii Ten Cents, MS66

**4236** **1883 Hawaii Ten Cents MS66 PCGS.** The 1883 one-year type Umi Keneta, or Hawaii one dime, had a reported mintage of 250,000 pieces, but a large number were likely melted when Hawaii became a Territory of the United States. Walter Breen (1988) writes that the U.S. Treasury at that time decided that the Islands should use American coins. As a result, orders went out to banks and commercial establishments in the Islands ordering withdrawal of all 1883 Hawaiian coins from circulation.

Soft luster resides on both sides of this Premium Gem example, each of which displays a delicate mix of gray, sky-blue, lavender, and yellow-gold patina. A well executed strike leaves virtually complete definition on the design elements. Nicely preserved throughout. Population: 10 in 66, 0 finer (11/08). (#10979)

## Rare 1883 Hawaiian Eighth Dollar, PR66
## One of the Finest Specimens Extant

**4237 1883 Hawaii 12 1/2 Cents PR66 PCGS.** KM-4, Medcalf-Russell 2CS-2, R.7. Struck in silver with a reeded edge. Of the five denominations designed and engraved by Charles Barber for the Kingdom of Hawaii, the eighth dollar—or "hapawalu" in the Hawaiian language—was the only issue not adopted for use. The hapawalu would have required the production of special planchets and would have been the only denomination that did not directly correlate with any unit of currency being used in the United States. Since America already had her eyes set on the Kingdom of Hawaii for strategic purposes, it is likely that the hapawalu was replaced with the dime, or umi keneta, for the convenience of commercial trade between the two nations. As such, the dime, quarter, fifty cent, and dollar denominations were struck in proof and business strike format, but the 12 and a half cent "hapawalu" coins were only struck as proofs. Mint records indicate that 20 pieces were produced, compared to 26 proof specimens of the other four denominations. The difference may be related to six proof sets that were coined at the Philadelphia Mint in September 1883 (Breen, 1988).

As of (11/08), only 11 hapawalu proofs have been certified by PCGS, not counting a couple of copper pattern versions. Of the 11 coins in the *Population Report,* all but two examples are graded PR63 or lower. This piece and one other hapawalu—assuming that the two listed do not represent the resubmission of the same coin—are documented at the PR66 level. NGC lists just five grading events.

Gunmetal-gray patination dominates both sides of this Premium Gem. When carefully viewed at an angle, the prooflike fields glisten and an array of subtle amber, rose, and blue hues are revealed. Owing to a powerful strike, the details are razor-sharp. The absolute rarity of this issue explains why examples rarely come on the market. In fact, this specimen represents only the second appearance of a silver proof hapawalu—not counting a couple of patterns and fantasy pieces—to be auctioned by Heritage since the inception of our online auction archives in 1993.
*From The Deb-Ann Collection.* (#10985)

A 15% BUYER'S PREMIUM ($9 MIN.) APPLIES TO ALL LOTS.

## COMMEMORATIVE MEDAL

Historic 1925 Norse American Medal
Gold Planchet, PR63

**4238** **1925 Norse Gold PR63 NGC.** The sponsor of the Norse American medal was Congressman O. J. Kvale of Minneapolis, Minnesota. Wishing to commemorate the 100th anniversary of the first organized arrival of Norse immigrants in the United States, Kvale proposed this issue for Congressional consideration. Since Congress had already approved four commemorative coins in 1925, and because the controversy surrounding the Huguenot- Walloon Tercentenary half dollar of 1924 was still fresh in Congressional minds, Kvale believed a medal stood a better chance of approval than another coin. The issue was authorized on March 2, 1925.

The Mint delivered 33,750 medals on thick silver planchets, 6,000 medals on thin silver planchets, and only 100 medals on gold planchets. All of these pieces were probably struck in early May 1925. The gold medals were produced as matte proofs and sold to the public at a price of each. Arlie Slabaugh described this issue in his early work on U.S. Commemoratives. Today, specimens are rare, and advanced collectors traditionally include them in sets of U.S. Commemorative coins. The present survivor is an uncommonly attractive piece for the grade. Both obverse and reverse are honey-gold in color with an unquestionably matte texture. The scattered, grade-defining contact marks are not individually distracting. The present specimen is a fine example of this scarce issue.

Brass Pattern 1925 Norse Medal MS64

**4239** **1925 Norse Medal—Brass Pattern—MS64 PCGS.** This fascinating piece has the 1 1/4" diameter of the Thin and Thick silver Norse medals. The thickness is unknown due to encapsulation, but is presumably 1/20", the same as Thin medals. This is because the Thin medals were struck first, May 21-23, 1925. The 1/16" Thick medals were struck in late May and June. Eventually, 100 matte proof 1" gold Norse medals were struck, along with 75 medals in 2 5/8" silver-plated copper-bronze.

The chronology and diameter suggest that the present piece is a Mint pattern for the Thin Norse medal. It is toned golden-brown but retains glimpses of the original gold color within design crevices. The strike is exacting, and there are no relevant marks. PCGS has certified a single brass pattern (this piece), along with just one copper die trial and a single (silver?) uniface die trial. Presumably unique, and the future centerpiece of an advanced collection of classic silver commemoratives. (#79450)

***See: Video Lot Description***

## Key Date 1877 Cent, MS61
## Struck on a Venezuela Centavo Planchet

**4240 1877 Indian Cent—Struck on a Venezuela One Cent Centavo Planchet—MS61 NGC.** 2.3 gm. Judd-1496, Pollock-1649, R.8. Although it is listed in the standard pattern references, this piece is not a true pattern but a mint error. This fascinating piece made its way into the two major pattern references due to its appearance, which is suggestive of a deliberately struck off-metal pattern. Later research revealed the truth, and the most recent edition of Judd, while it maintains the listing for this singular item, indicates its true status as a mint error.

While the Philadelphia Mint did not strike any contract coinage for Venezuela in 1877, a legacy copper-nickel planchet from the previous year's production of one centavo coins somehow mixed in with the bronze blanks for cents and was struck. The result was this fascinating and distinctive specimen.

The feathers of the headdress are weak at the tips, owing to the underweight nature of the planchet, and the lower part of the wreath is similarly ill-defined. By contrast, the soft lower right corner of the N in ONE is a diagnostic for this important issue. Occasional sage accents grace the otherwise nickel-gray surfaces, which are smooth and attractive.

Any Uncirculated 1877 cent is highly desirable due to its status as a low mintage key date. Finding such an example struck on a foreign planchet is an opportunity unlikely to surface again.

*Ex: Bowers and Merena 2003 Baltimore ANA Auction, lot 3158.*

## MEDALS AND TOKENS

### Grant Indian Peace Medal
### Possibly Awarded to an Indian

**4241 Ulysses S. Grant Indian Peace Medal XF45 Tooled Uncertified.** Julian IP-42. Silver, 62 mm. Neatly holed on the rim at 12 o'clock, as issued. Similar in appearance (although a different piece) to lot 174 in Ford:16, which was described as "even wear in a pattern suggestive of a medal that has been worn as a decoration." The provenance of the present peace medal is unknown, but it may have been awarded to an Indian Chief during the 1870s. The portrait and globe show moderate wear, and the obverse field has a tooled area near the L in LIBERTY. Julian states that 300 silver medals were struck in August to September, 1871, and an unknown number of silver restrikes from the same dies were produced for collector sale during the 1880s. Per Julian, it is "virtually impossible" to distinguish between the originals and the 1880s restrikes.

*End of Session Six*

# Heritage Auction Galleries Staff

**Steve Ivy - Co-Chairman and CEO**

Steve Ivy began collecting and studying rare coins in his youth, and as a teenager in 1963 began advertising coins for sale in national publications. Seven years later, at the age of twenty, he opened Steve Ivy Rare Coins in downtown Dallas, and in 1976, Steve Ivy Numismatic Auctions was incorporated. Steve managed the business as well as serving as chief numismatist, buying and selling hundreds of millions of dollars of coins during the 1970s and early 1980s. In early 1983, James Halperin became a full partner, and the name of the corporation was changed to Heritage Rare Coin Galleries. Steve's primary responsibilities now include management of the marketing and selling efforts of the company, the formation of corporate policy for long-term growth, and corporate relations with financial institutions. He remains intimately involved in numismatics, attending all major national shows. Steve engages in daily discourse with industry leaders on all aspects of the rare coin/currency business, and his views on grading, market trends and hobby developments are respected throughout the industry. He serves on the Board of Directors of the Professional Numismatists Guild (and was immediate past president), is the current Chairman of The Industry Council for Tangible Assets, and is a member of most leading numismatic organizations. Steve's keen appreciation of history is reflected in his active participation in other organizations, including past or present board positions on the Texas Historical Foundation and the Dallas Historical Society (where he also served as Exhibits Chairman). Steve is an avid collector of Texas books, manuscripts, and national currency, and he owns one of the largest and finest collections in private hands. He is also a past Board Chair of Dallas Challenge, and is currently the Finance Chair of the Phoenix House of Texas.

**James Halperin - Co-Chairman**

Jim Halperin and the traders under his supervision have transacted billions of dollars in rare coin business, and have outsold all other numismatic firms every year for over two decades. Born in Boston in 1952, Jim attended Middlesex School in Concord from 1966 to 1970. At the age of 15, he formed a part-time rare coin business after discovering that he had a knack (along with a nearly photographic memory) for coins. Jim scored a perfect 800 on his math SATs and received early acceptance to Harvard College, but after attending three semesters, he took a permanent leave of absence to pursue his full-time numismatic career. In 1975, Jim personally supervised the protocols for the first mainframe computer system in the numismatic business, which would catapult New England Rare Coin Galleries to the top of the industry in less than four years. In 1983, Jim merged with his friend and former archrival Steve Ivy, whom Jim had long admired. Their partnership has become the world's largest and most successful numismatic company, as well as the third-largest auctioneer in America. Jim remains arguably the best "eye" in the coin business today (he won the professional division of the PCGS World Series of Grading). In the mid-1980s, he authored "How to Grade U.S. Coins" (now posted on the web at www.CoinGrading.com), a highly-acclaimed text upon which the NGC and PCGS grading standards would ultimately be based. Jim is a bit of a Renaissance man, as a well-known futurist, an active collector of EC comics and early 20th-century American art (visit www.jhalpe.com), venture capital investor, philanthropist (he endows a multimillion-dollar health education foundation), and part-time novelist. His first fictional novel, "The Truth Machine," was published in 1996 and became an international science fiction bestseller, and was optioned for movie development by Warner Brothers. Jim's second novel, "The First Immortal," was published in early 1998 and immediately optioned as a Hallmark Hall of Fame television miniseries. Jim is married to Gayle Ziaks, and they have two sons, David and Michael. In 1996, with funding from Jim and Gayle's foundation, Gayle founded Dallas' Dance for the Planet, which has grown to become the largest free dance festival in the world.

**Greg Rohan - President**

At the age of eight, Greg Rohan started collecting coins as well as buying them for resale to his schoolmates. By 1971, at the age of ten, he was already buying and selling coins from a dealer's table at trade shows in his hometown of Seattle. His business grew rapidly, and by 1985 he had offices in both Seattle and Minneapolis. He joined Heritage in 1987 as Executive Vice-President and Manager of the firm's rare coin business. Today, as an owner and as President of Heritage, his responsibilities include overseeing the firm's private client group and working with top collectors in every field in which Heritage is active. Greg has been involved with many of the rarest items and most important collections handled by the firm, including the purchase and/or sale of the Ed Trompeter Collection (the world's largest numismatic purchase according to the Guinness Book of World Records), the legendary 1894 San Francisco Dime, the 1838 New Orleans Half Dollar, and the 1804 Silver Dollar. During his career, Greg has handled more than $1 billion of rare coins, collectibles and art, and provided expert consultation concerning the authenticity and grade condition of coins for the Professional Coin Grading Service (PCGS). He has provided expert testimony for the United States Attorneys in San Francisco, Dallas, and Philadelphia, and for the Federal Trade Commission (FTC). He has worked with collectors, consignors, and their advisors regarding significant collections of books, manuscripts, comics, currency, jewelry, vintage movie posters, sports and entertainment memorabilia, decorative arts, and fine art. Additionally, Greg is a Sage Society member of the American Numismatic Society, and a member/life member of the PNG, ANA, and most other leading numismatic organizations. Greg is also Chapter Chairman for North Texas of the Young Presidents' Organization (YPO), and is an active supporter of the arts. Greg co-authored "The Collectors Estate Handbook," winner of the NLG's Robert Friedberg Award for numismatic book of the year. Mr. Rohan currently serves on the seven-person Advisory Board to the Federal Reserve Bank of Dallas, in his second appointed term. He and his wife, Lysa, are avid collectors of rare wine, Native American artifacts, and American art.

**Paul Minshull - Chief Operating Officer**

As Chief Operating Officer, Paul Minshull's managerial responsibilities include integrating sales, personnel, inventory, security and MIS for Heritage. His major accomplishments include overseeing the hardware migration from mainframe to PC, the software migration of all inventory and sales systems, and implementation of a major Internet presence. Heritage's successful employee-suggestion program has generated 200 or more ideas each month since 1995, and has helped increase employee productivity, expand business, and improve employee retention. Paul oversees the company's highly-regarded IT department, and has been the driving force behind Heritage's web development, now a significant portion of Heritage's future plans. As the only numismatic auction house that combines traditional floor bidding with active Internet bidding, the totally interactive system has catapulted Heritage to the top rare coin website (according to Forbes Magazine's "Best of the Web"). Paul was born in Michigan and came to Heritage in 1984 after 12 years as the General Manager of a plastics manufacturing company in Ann Arbor. Since 1987, he has been a general partner in Heritage Capital Properties, Sales Manager, Vice President of Operations, and Chief Operating Officer for all Heritage companies and affiliates since 1996. Paul maintains an active interest in sports and physical fitness, and he and his wife have three children.

**Todd Imhof - Vice President**

Todd Imhof did not start collecting coins in his teens, unlike most professional numismatists. Shortly after graduating college, Todd declined an offer from a prestigious Wall Street bank to join a former high school classmate in his small rare coin firm in the Seattle area. In the mid-1980s, the rare coin industry was rapidly changing, with the advent of third-party grading and growing computer technologies; as a newcomer, Todd more easily embraced these new dynamics. He soon discovered a personal passion for rare coins, and for working with high-level collectors; in 1991, he co-founded Pinnacle Rarities, a firm specialized in servicing the savviest and most prominent collectors in numismatics. At 25, he was accepted into the PNG, and currently serves on its Consumer Protection Committee and its Legislation/Taxation Issues Committee. In 1992, he was invited to join the Board of Directors for the Industry Council for Tangible Assets, later serving as its Chairman (2002-2005).

Todd enjoys a reputation that is envied by the entire numismatic community, and his relationship with Heritage's most prominent clients, who seek his expertise and integrity, has only strengthened over the years. Clients and colleagues are impressed by his ability to navigate complex deals with unsurpassed professionalism. By understanding what each collector is trying to accomplish, Todd has the uncanny ability to identify the perfect coins at the right prices. In the famous Phillip Morse Auction, he became the only person in history to purchase two separate $1mm+ coins during a single auction session! Todd is an avid competitive sailor, and collector of fine wines and Olympic medals. He and his wife have two sons and a daughter.

**Leo Frese - Vice President**

Leo has been involved in numismatics for nearly 40 years, a professional numismatist since 1971, and has been with Heritage for over 20 years. He literally worked his way up the Heritage "ladder" through dedication, hard work, and a belief that the client is the most important asset Heritage has. He worked with Bob Merrill for nearly 15 years and now is the Director of Consignments. Leo has been actively involved in assisting clients sell nearly $500,000,000 in numismatic material. Leo was recently accepted as a member of PNG, is a life member of the ANA, and holds membership in FUN, CSNS, and other numismatic organizations. He believes education is the foremost building block in numismatics. Leo encourages all collectors to broaden their horizons, be actively involved in the hobby, and donate freely to YN organizations. Leo's interests include collecting Minnesota pottery and elegant Depression glass. Although travel is an important element of his job, he relishes time with his wife Wendy, children Alicen and Adam, and son-in-law Jeff.

**Jim Stoutjesdyk - Vice President**

Jim Stoutjesdyk was named Vice President of Heritage Rare Coin Galleries in 2004. A Michigan native, Jim became involved in numismatics at a young age and was named the ANA's Outstanding Young Numismatist of the Year in 1987. A University of Michigan graduate, he was first employed by Superior Galleries, eventually becoming their Director of Collector Sales. Since joining Heritage in 1993, Jim has assumed many responsibilities including Gallery Manager for the retail showroom, retail clientele development, editor of Heritage's Insider magazine from 1998 to 2000, and wholesale trading at coin shows across the nation. Jim's duties now include buying and selling, pricing all new purchases, assisting with auction estimates and reserves, and overseeing the daily operations of the rare coin department. Jim met his wife Amy at Heritage; they married in 1998 and have a son Blake and a daughter Emily. While away from Heritage Jim enjoys spending time with his family and traveling to new places. Jim serves on the Board of Directors of Families for Effective Autism Treatment and has raised tens of thousands of dollars to provide education, advocacy, and support to families in the North Texas area who are affected by autism.

**Norma L. Gonzalez - VP of Auction Operations**

Born in Dallas, Texas, Norma joined the U.S. Navy in August of 1993. During her five-year enlistment, she received her Bachelor's Degree in Resource Management and traveled to Japan, Singapore, Thailand and lived in Cuba for three years. After her enlistment, she moved back to Dallas where her family resides. Norma joined Heritage in 1998; always ready for a challenge, she spent her days at Heritage and her nights obtaining an M. B. A. She was promoted to Vice President in 2003. She currently manages the operations departments, including Coins, Currency, World & Ancient Coins, Sportscards & Memorabilia, Comics, Movie Posters, Pop Culture and Political Memorabilia. Norma enjoys running, biking and spending time with her family. In February 2004 she ran a 26.2-mile marathon in Austin, Texas and later, in March she accomplished a 100-mile bike ride in California.

**Debbie Rexing - VP - Marketing**

Debbie's marketing credentials include degrees in Business Administration in Marketing and Human Resource Management from The Ohio State University, as well as sales experience for General Foods. After joining Heritage in 2001, Debbie rapidly became an integral part of the marketing teams involved with Heritage's most exciting and successful specialties, including U.S. Coins, World Coins, Currency, Music & Entertainment, Vintage Movie Posters, Americana, and U.S. Tangibles Inc. Her varied responsibilities included cross-functional coordination of photography, auction logistics, and marketing. Debbie has been active in coin auctions, staffing the podium, executing client bids, and in lot viewing. Her wide experience in many aspects of the business has provided her with a broad perspective of Heritage's activities. She and her husband Rick have three children – Trent, Abbey, and Claire – and her hobbies include interior design, entertaining and exercise, the beach and water activities, and watching Ohio State football.

**Kelley Norwine - VP - Media and Client Relations**

Born and raised in South Carolina, Kelley pursued a double major at Southern Wesleyan University, earning a BA in Music Education and a BS in Business Management. A contestant in the Miss South Carolina pageant, Kelley was later Regional Manager & Director of Training at Bank of Travelers Rest in South Carolina. Relocating to Los Angeles, Kelley became the Regional Manager and Client Services Director for NAS-McCann World Group, an international Advertising & Communications Agency where she was responsible for running one of the largest offices in the country. During her years with NAS Kelley was the recipient of numerous awards including Regional Manager of the Quarter and the NAS Courage and Dedication award. After relocating to Dallas, Kelley took a job as Director of Client Services for TMP/Monster Worldwide and joined Heritage in 2005 as Director of Client Development. She was named VP of Marketing for Heritage in 2007. A cancer survivor, Kelley is an often-requested motivational speaker for the American Cancer Society. In her spare time, she writes music, sings, and plays the piano.

**Patricia Castillo - Director of Auctions & Client Service**

Patricia Castillo lived all over the country before settling down in Ferris, Texas, near Dallas. She began her career working in Customer Service, and in 2001 joined the Heritage family assisting in Client Services and live auctions. Patricia's knowledge grew with the company, and her hard work led to her promotion to Director of Auctions and Client Services. Patricia is directly involved in the training and management of the Client Services team. A cancer survivor, Patricia enjoys spending time with her two beautiful little girls, attending softball games, and spending time with family and friends.

**Andrea Voss - Live-Auction & Event Coordinator**
Andrea Voss is a true Texas native – born and educated in the Dallas area, with a degree in Journalism from the University of North Texas in Denton. Andrea joined the Heritage family in 2004, and after assisting Client Services with e-mail inquiries, she earned the opportunity to become the Auction Supervisor. Her responsibilities have grown with her experiences, and she is now the Live-Auction & Event Coordinator. Clients may see her in the back of the live auction room supervising, or in the front using her Auctioneer license. In her off hours, Andrea enjoys time on her patio with her dog and cat, and still dreams of one day being a writer.

**Devin Jackson - Auction Client Services/Live Auction Supervisor**
Devin Jackson joined Heritage in 2005 as a member of the Client Services Group. Devin is a native Texan, growing up in a small suburb south of Dallas. Devin later attended the University of North Texas and graduated with a Bachelor's Degree in Kinesiology. A life long sports fanatic, Devin briefly coached high school football, basketball, and track in his home town of Ferris, TX after graduating from college. Devin later joined the staff of Heritage Auction Galleries, assisting with Live Auctions and Client Services. Devin has collected sports cards and memorabilia since he was a young boy and he continues to collect memorabilia from his favorite professional sports teams, including the San Francisco 49ers.

**Marti Korver - Manager - Credit/Collections**
Marti has been working in numismatics for more than three decades. She was recruited out of the banking profession by Jim Ruddy, and she worked with Paul Rynearson, Karl Stephens, and Judy Cahn on ancients and world coins at Bowers & Ruddy Galleries, in Hollywood, CA. She migrated into the coin auction business, running the bid books for such memorable sales as the Garrett Collection and representing bidders as agent at B&R auctions for 10 years. She also worked as a research assistant for Q. David Bowers for several years. Memorable events included such clients (and friends) as Richard Lobel, John Ford, Harry Bass, and John J. Pittman. She is married to noted professional numismatist and writer, Robert Korver, (who is sometimes seen auctioneering at coin shows) and they migrated to Heritage in Dallas in 1996. She has an RN daughter (who worked her way through college showing lots for Heritage) and a son (who is currently a college student and sometimes a Heritage employee) and a type set of dogs (one black and one white). She currently collects kitschy English teapots and compliments.

**Becky Dirting - Managing Director, Collectibles Division**
Becky joined Heritage in 2005 and was named Managing Director of the Collectibles Departments in 2007, providing direct oversight for such auction specialties as Historical Books & Manuscripts, Americana & Political, Civil War, Western, Americana Indian Art, Texana, Comics & Comic Art, Music & Entertainment, Vintage Movie Posters, Sports Collectibles, Illustration Art, and Natural History. Becky's career path included PwC Consulting in Learning and Knowledge Management, and she remains focused on staff development, training, operations and process development, knowledge management, budget management, and contract negotiation. She enjoys spending time with her wonderful husband, sons, extended family, friends and beloved pets, and is a talented chef.

**Julie Gonzalez - Director of Auction Operations**
After working part-time for Heritage for many years, Julie Gonzalez was so excited about the growth opportunities that she joined us on a full-time basis! As the Operations Manager for Americana, she led her team through several successful auctions, and was then promoted to lead the operations staff and consignment coordinators for a third of Heritage's specialty auctions. Her work ethic, determination and tenacity are supporting Heritage's growth. Away from work, you might spot Julie outside enjoying time with her family and friends, or running.

# Coin Department Specialists

**David Mayfield - Vice President**
David has been collecting and trading rare coins and currency for over 35 years. A chance encounter with his father's coin collection at the age of nine led to his lifetime interest. David has been buying and selling at coin shows since the age of 10. He became a full time coin & currency dealer in the mid-80s. David's main collecting interest is in all things Texas, specializing in currency and documents from the Republic of Texas. Being a sixth generation Texan whose family fought for Texas' independence has only increased the value and meaning of these historical artifacts for him. After more than two decades of marriage, David and Tammy have two wonderful sons, Brian and Michael.

**Jim Jelinski - Consignment Director**
A collector since age 8, Jim has been involved in numismatics over 5 decades, progressing from humble collector to professional dealer and educator. He is a Life Member of the *American Numismatic Association*, the *American Numismatic Society*, and other state and national organizations. Starting as Buyer for Paramount International Coin Corporation in 1972, he opened Essex Numismatic Properties in 1975 in New Hampshire. Later, positions at M.B. Simmons & Associates of Narberth, Pennsylvania included Director of Sales, Director of Marketing and Advertising, and Executive Vice President. In 1979, he reorganized Essex in Connecticut and, as Essex Numismatics, Inc., worked as COO and CFO. He joined the staff at Heritage as Senior Numismatist and Consignment Coordinator. Jim has two sons, and is actively involved in his church, and community; he just completed his 20th season of coaching youth athletics, and working in Boy Scouting as a troop leader and merit badge counselor. He has been a fund raiser for Paul Newman's "Hole in the Wall Gang" camp for terminally ill children, and for Boy Scouts. His personal diversions include fly fishing, sky diving, cooking, and wine collecting.

**Sam Foose - Consignment Director and Auctioneer**
Sam's professional career at Heritage divides neatly into two parts. Sam joined Heritage Numismatic Auctions, Inc. in 1993 as an Auction Coordinator. Over the next five years, Sam ran the day-to-day auction operations, ultimately rising to Assistant Auction Director, and began calling auctions. After serving as a Senior Manager and Consignment Director in other collectible fields outside of numismatics, Sam returned to Heritage in 2002 as a Consignment Director in time to help Heritage's expansion into other collectibles. Sam travels the country assisting clients who wish to liquidate their collections of coins, paper money, decorative arts, and sports collectibles. To Sam, helping consignors make the best decisions to maximize their returns from auctioning their properties is the most rewarding part of his job. Sam holds auction licenses in several jurisdictions, and has hammered in excess of $250 million in collectibles as one of Heritage's primary auctioneers. During his free time, Sam enjoys his wife (Heather) and two children (Jackson and Caroline), gardening, golf, grilling, and sports.

**Bob Marino - Consignment Director & Senior Numismatist**
Bob started collecting coins in his youth, and started selling through eBay as the Internet became a serious collector resource. He joined Heritage in 1999, managing and developing Internet coin sales, and building Heritage's client base through eBay and other Internet auction websites. He has successfully concluded more than 40,000 transactions on eBay, selling millions of dollars of rare coins to satisfied clients. Many collectors were first introduced to Heritage through Bob's efforts, and he takes pride in dealing with each client on a personal level. Bob is now a Consignment Director, assisting consignors in placing their coins and collectibles in the best of the many Heritage venues – in short, maximizing their return on many of the coins that he sold to them previously! Bob and his family moved to the DFW area from the Bitterroot Valley in Western Montana. He enjoys spending time with his family, woodworking (building furniture), and remodeling his house.

**Charles Clifford - Consignment Director**
Charles has been involved with collectibles for over 35 years. His first venture with coins began in the 1970s when he drove to banks all over North Texas buying bags of half dollars to search for the 40% silver clad coins. He has worked as a bullion trader, a rare coin buyer, worked in both wholesale and retail sales, served as a cataloger, and has traveled to hundreds of coin and sports card conventions across the country. Charles also has the distinction of working with Steve Ivy over four decades! Currently he is assisting clients obtain top dollar for the items they have for sale, either by direct purchase or by placing their material in auction. He appreciates Heritage's total commitment to "World Class Client Service" and the "Can Do - Nothing is Impossible" attitude of management and each and every employee. He enjoys collecting hand-blown Depression glass and antique aquarium statues.

**Mike Sadler - Consignment Director**
Mike Sadler joined the Heritage team in September 2003. Mike attended the United States Air Force Academy, earning a degree in civil engineering and pinned on his silver wings in June 1985. After seven years flying various aircraft, he joined American Airlines where he still pilots. More than once, Mike has surprised Heritage employees serving as their pilot while they flew to shows, conventions, and to visit clients. Like so many of our clients, Mike started putting together sets of coins from circulation when he was a small boy, and that collection grew to go to the auction block with Heritage in January 2004. Before coming to Heritage, his unlimited access to air travel enabled him to attend coin shows all around the country. He gained a tremendous knowledge of rare coins and developed an outstanding eye for quality. He is a trusted friend and colleague to many of today's most active collectors. Having been a collector for so long, and a Heritage consignor himself, Mike understands the needs of the collector and what Heritage can offer. Mike is married, has three children, and enjoys coaching and playing lacrosse

**Katherine Kurachek - Consignment Director**
Katherine grew up in Sarasota, Florida, graduated from the University of Mississippi in 1993 as an art major, and then resided in Colorado (where she opened a pizzeria!) before moving to Dallas. Acting on a suggestion from her father, an avid collector of type coins and a client of Steve Ivy for more than two decades, Katherine came to Heritage in January 2003. She worked alongside Leo Frese for several years, honing her experience in dealing with the numismatic wholesale trade. Taking care of the needs of our dealer-consignors includes soliciting the consignments, inputting the material into our computer systems, and ensuring the smooth flow of the consignment through the many production processes. Katherine is now frequently traveling to coin shows to represent Heritage and service her dealer accounts.In her spare time, she enjoys gardening, golf, hiking, fly-fishing, and walking her two Akitas (Moses and April). Katherine has finally inherited her father's love of these pieces of history, and currently collects love tokens and counterstamps.

**Jason Friedman - Consignment Director**
Jason's interest in rare coins began at the age of twelve when he discovered a bag of Wheat cents and Liberty nickels in his garage. His collecting interest expanded to Morgans and dealing in various coinage. Jason's numismatic business allowed him to pay for most of his college tuition while working part time and attending classes full time. Jason earned his degree in business from the University of North Texas in 2005. Shortly after, he joined Heritage and was able to turn his passion for numismatics into a career. His computer skills and coordinator background are invaluable tools in accessing all levels of expertise at Heritage. Jason enjoys interacting with clients and assisting them in every aspect of the auction process. Apart from his director position, Jason finds it particularly gratifying phone bidding on clients' behalf. He is a member of the American Numismatic Association (ANA) and Florida United Numismatists (FUN).

**Doug Nyholm - Consignment Director**
Doug has been collecting coins since the age of ten and fondly recalls spending Morgan silver dollars to purchase candy as a boy. He worked in the IT industry for 28 years with Unisys, 3Com and Sun Microsystems before joining Heritage. Doug's expertise includes all U.S. coins and varieties. He is also well acquainted with U.S. Federal currency and obsoletes. Doug has a special interest in territorials, and in 2004 he wrote and published *The History of Mormon Currency* and has authored many articles on Kirtland currency, scrip and related Utah items. He is currently writing several additional books including one on Utah National Banknotes. Doug is married, has two daughters, and enjoys mountain climbing and hiking. Doug was the President of the Utah Numismatic Society for 2006-07. His current collecting interests include Capped Bust & Seated half dollars, U.S. Type, and Mormon coins & currency.

**David Lindvall - Consignment Director**
David is a Life Member of the American Numismatic Association, and it seems at times that he has spent his entire life traveling to coin shows across America. His career in numismatics actually started in 1973 at International Coin of Minneapolis. In 1988, he joined Heritage in their Wholesale Division, ultimately rising to become Manager. David continues to enjoy numismatics, but after three decades of traveling to conventions large and small, he decided to change positions so he could spend more time at home than in airport lounges. He joined Heritage's Consignment Director team, where his lifetime of numismatic experience is benefiting clients who expect the very best service when they consign their coins and notes to auction. David has a BA in History and a Masters of Divinity, and he continues to be active in both areas. Now living on Cedar Creek Lake, his hobbies include boating, fishing, and making his lake home available to family and friends to enjoy the lakeside amenities.

**Dennis Nowicki - Consignment Director**
Dennis is fascinated with historical collectibles, and began his numismatic career as the Auction Manager for Bowers and Ruddy Galleries/ American Auction Association in the mid-1970s. After serving in the USAF at NORAD-Cheyenne Mountain Complex, Dennis spent a decade in Japan as a language instructor. He remained active in numismatics and philatelics as a dealer and collector. In the 1990s, he joined Heritage as their webmaster/designer, garnering the NLG's Outstanding Web Site award. Dennis later designed and supported websites for several numismatic firms, as well as cataloging auction lots. He has returned to Heritage as a Consignment Director and cataloger for the US and World coin departments.

**Mark Van Winkle - Chief Cataloger**
Mark has worked for Heritage (and Steve Ivy) since 1979. He has been Chief Cataloger since 1990, and has handled some of the premier numismatic rarities sold at public auction. Mark's literary achievements are considerable. He was editor of *Legacy* magazine, won the 1989 NLG award for Best U.S. Commercial Magazine, and the next year won another NLG award for Best Article with his "Interview With John Ford." In 1996 he was awarded the NLG's Best Numismatic Article "Changing Concepts of Liberty," and was accorded a third place Heath Literary Award that same year. He has done extensive research and published his findings on Branch Mint Proof Morgan Dollars, in addition to writing numerous articles for *Coin World* and *Numismatic News*. Mark has also contributed to past editions of the *Red Book*, and helped with the Standard Silver series in Andrew Pollock's *United States Patterns and Related Issues*. He was also a contributor to *The Guide Book of Double Eagle Gold Coins*.

**Mark Borckardt - Senior Cataloger**
Mark started attending coin shows and conventions as a dealer in 1970, and has been a full-time professional numismatist since 1980. He received the Early American Coppers Literary Award, and the Numismatic Literary Guild's Book of the Year Award, for the *Encyclopedia of Early United States Cents, 1793-1814*, published in 2000. He serves as a contributor to *A Guide Book of United States Coins*, and has contributed to many references, including the Harry W. Bass, Jr. Sylloge, and the *Encyclopedia of Silver Dollars and Trade Dollars of the United States*. Most recently, he was Senior Numismatist with Bowers and Merena Galleries, serving as a major contributor to all of that firm's landmark auctions. Mark is a life member of the A. N. A., and an active member of numerous organizations. He is an avid collector of numismatic literature, holding several thousand volumes in his library, as well as related postcards and ephemera. He is an avid bowler, carrying an 200+ average, and with seven perfect 300 games. Mark is a graduate of the University of Findlay (Ohio) with a Bachelors Degree in Mathematics. Mark and his wife have a 20-something year old son, and twin daughters who are enrolled at Baylor.

**Brian Koller - Cataloger & Catalog Production Manager**
Brian's attention to detail ensures that every catalog, printed and on-line, is as error free as technology and human activity allows. In addition to his coin cataloging duties, he also helps with consignor promises and client service issues. Brian has been a Heritage cataloger since 2001, and before that he worked as a telecom software engineer for 16 years. He is a graduate of Iowa State University with a Bachelor's degree in Computer Engineering, and is an avid collector of U.S. gold coins. Brian's numismatic footnote is as discoverer of a 1944-D half dollar variety that has the designer's monogram engraved by hand onto a working die. In addition to describing many thousands of coins in Heritage catalogs, Brian has written more than one thousand reviews of classic movies, which can be found on his website, filmsgraded.com.

**John Salyer - Cataloger**
John has been a numismatist and coin cataloger with Heritage since 2002. He began collecting Lincoln Cents, Jefferson Nickels, Mercury and Roosevelt Dimes, and Franklin Halves at the age of eleven, as a sixth-grader in Fort Worth; his best friend was also a collector, and his dad would drive them to coin shops and flea markets in search of numismatic treasures. The two youngsters even mowed lawns together in order to purchase their coins, which were always transferred into Whitman folders. John graduated from the University of Texas with a bachelor's degree in English. Prior to his numismatic employment, he worked primarily within the federal government and for several major airlines. His hobbies include playing guitar and collecting antique postcards; an avid golfer, he also enjoys spending time on the links. John has enjoyed making his former hobby his current occupation.

**Dr. Jon Amato - Cataloger**
Jon has been with Heritage since 2004. He was previously a Program Manager in the NY State Dept. of Economic Development, and an Adjunct Professor at the State University of New York at Albany, where he taught economic geography, natural disasters assessment, and environmental management. Jon is currently writing a monograph on the draped bust, small eagle half dollars of 1796-1797; his research included surveying more than 4,000 auction catalogs, recording the descriptions, grades, and photos of 1796-1797 halves. He published an article entitled "Surviving 1796-1797 Draped Bust Half Dollars and their Grade Distribution," in the *John Reich Journal*, February 2005, and also wrote "An Analysis of 1796-1797 Draped Bust Half Dollars," in *The Numismatist*, Sept. 2001. Jon belongs to many numismatic organizations, including the ANA, ANS, John Reich Collectors Society, and the Liberty Seated Collectors Club, and has made several presentations at ANA Numismatic Theaters. He earned a bachelor's degree from Arizona State University, an M.A. from the S. U. N. Y. at Buffalo, and a Ph. D. from the University of Toronto.

**John Dale Beety - Cataloger**
John grew up in Logansport, Indiana, a small town associated with several numismatic luminaries. Highlights as a Young Numismatist include attending Pittman III, four ANA Summer Seminars (thanks to various YN scholarships), and placing third in the 2001 World Series of Numismatics with Eric Li Cheung. He accepted a position with Heritage as a cataloger immediately after graduation from Rose-Hulman Institute of Technology, after serving an internship at Heritage during the summer of 2004. In addition to his numismatic interests, he enjoys many types of games, with two state junior titles in chess and an appearance in the Top 20 Juniors list of the World Blitz Chess Association.

**Cristina Gonzalez - Director of Operations**
Cristina Gonzalez started working at Heritage in 1999, and through years of dedication and application, rose from a Coin Operations Clerk to the Director of Coin Operations. Through innovative thinking, she restructured the daily office tasks preparing millions of numismatic items for auction. She leads a staff of twenty through 104 Weekly Internet Auctions and more than a dozen Signature Auctions each year. Cristina is also supervisor of the Auctions travelling team and attends every numismatic auction. She loves spending time with her family, especially her grandchildren, and working in her yard.

**Ron Brackemyre - Operations Manager**
Ron Brackemyre began his career at Heritage Auction Galleries in 1998 as the Manager of the Shipping Department, and was promoted to Consignment Operations Manager for Numismatics in 2004. He is responsible for the security of all of Heritage's coin and currency consignments, both at the Dallas world headquarters and at shows. His department also coordinates the photography, scanning, and cataloging of coins for upcoming auctions; coordination of auction planning; security and transportation logistics, and lot-view and auction prep. If you have attended a live Heritage coin auction, you are familiar with Ron's excellent work. Ron and his wife, Denice, have two teen-aged sons, and the family passion is riding dirt bikes.

**Cataloged by:** Mark Van Winkle, Chief Cataloger; Mark Borckardt, Senior Cataloger; Jon Amato, John Beety, George Huber, Brian Koller, John Salyer, David Stone, Dennis Tarrant

**Edited by:** Mark Van Winkle, George Huber, Stewart Huckaby, Bob Korver

**Operations Support by:** Cristina Gonzales, Miguel Reynaga Sr., Edna Lopez, Alma Villa, Maria Flores, Celeste Robertson, Manuela Bueno, Cristina Ibarra, Maria Jimenez

**Catalog and Internet Imaging by:** Tony Webb, Travis Awalt, Stephanie Krause, Colleen McInerney, Jason Young, Joel Gonzalez, Kevin Gaddis Jr., Darnell McCown, Lori McKay, Maribel Cazares, Sharon Johnson

**Production and Design by:** Tim Hose, Mary Hermann, Mark Masat, Debbie Rexing

# Terms and Conditions of Auction

**Auctioneer and Auction:**

1. This Auction is presented by Heritage Auction Galleries, a d/b/a/ of Heritage Auctions, Inc., or its affiliates Heritage Numismatic Auctions, Inc., or Heritage Vintage Sports Auctions, Inc., or Currency Auctions of America, Inc., as identified with the applicable licensing information on the title page of the catalog or on the HA.com Internet site (the "Auctioneer"). The Auction is conducted under these Terms and Conditions of Auction and applicable state and local law. Announcements and corrections from the podium and those made through the Terms and Conditions of Auctions appearing on the Internet at HA.com supersede those in the printed catalog.

**Buyer's Premium:**

2. On bids placed through Auctioneer, a Buyer's Premium of fifteen percent (15%) will be added to the successful hammer price bid on lots in Coin and Currency auctions, or nineteen and one-half percent (19.5%) on lots in all other auctions. There is a minimum Buyer's Premium of $9.00 per lot. In Gallery Auctions (sealed bid auctions of mostly bulk numismatic material), the Buyer's Premium is 19.5%.

**Auction Venues:**

3. The following Auctions are conducted solely on the Internet: Heritage Weekly Internet Auctions (Coin, Currency, Comics, and Vintage Movie Poster); Heritage Monthly Internet Auctions (Sports, and Stamps). Signature® Auctions and Grand Format Auctions accept bids from the Internet, telephone, fax, or mail first, followed by a floor bidding session; Heritage Live and real-time telephone bidding are available to registered clients during these auctions.

**Bidders:**

4. Any person participating or registering for the Auction agrees to be bound by and accepts these Terms and Conditions of Auction ("Bidder(s)").
5. All Bidders must meet Auctioneer's qualifications to bid. Any Bidder who is not a client in good standing of the Auctioneer may be disqualified at Auctioneer's sole option and will not be awarded lots. Such determination may be made by Auctioneer in its sole and unlimited discretion, at any time prior to, during, or even after the close of the Auction. Auctioneer reserves the right to exclude any person from the auction.
6. If an entity places a bid, then the person executing the bid on behalf of the entity agrees to personally guarantee payment for any successful bid.

**Credit:**

7. Bidders who have not established credit with the Auctioneer must either furnish satisfactory credit information (including two collectibles-related business references) well in advance of the Auction or supply valid credit card information. Bids placed through our Interactive Internet program will only be accepted from pre-registered Bidders; Bidders who are not members of HA.com or affiliates should pre-register at least 48 hours before the start of the first session (exclusive of holidays or weekends) to allow adequate time to contact references. Credit may be granted at the discretion of Auctioneer. Additionally Bidders who have not previously established credit or who wish to bid in excess of their established credit history may be required to provide their social security number or the last four digits thereof to us so a credit check may be performed prior to Auctioneer's acceptance of a bid.

**Bidding Options:**

8. Bids in Signature. Auctions or Grand Format Auctions may be placed as set forth in the printed catalog section entitled "Choose your bidding method." For auctions held solely on the Internet, see the alternatives on HA.com. Review at HA.com/common/howtobid.php.
9. Presentment of Bids: Non-Internet bids (including but not limited to podium, fax, phone and mail bids) are treated similar to floor bids in that they must be on-increment or at a half increment (called a cut bid). Any podium, fax, phone, or mail bids that do not conform to a full or half increment will be rounded up or down to the nearest full or half increment and this revised amount will be considered your high bid.
10. Auctioneer's Execution of Certain Bids. Auctioneer cannot be responsible for your errors in bidding, so carefully check that every bid is entered correctly. When identical mail or FAX bids are submitted, preference is given to the first received. To ensure the greatest accuracy, your written bids should be entered on the standard printed bid sheet and be received at Auctioneer's place of business at least two business days before the Auction start. Auctioneer is not responsible for executing mail bids or FAX bids received on or after the day the first lot is sold, nor Internet bids submitted after the published closing time; nor is Auctioneer responsible for proper execution of bids submitted by telephone, mail, FAX, e-mail, Internet, or in person once the Auction begins. Internet bids may not be withdrawn until your written request is received and acknowledged by Auctioneer (FAX: 214-4438425); such requests must state the reason, and may constitute grounds for withdrawal of bidding privileges. Lots won by mail Bidders will not be delivered at the Auction unless prearranged.
11. Caveat as to Bid Increments. Bid increments (over the current bid level) determine the lowest amount you may bid on a particular lot. Bids greater than one increment over the current bid can be any whole dollar amount. It is possible under several circumstances for winning bids to be between increments, sometimes only $1 above the previous increment. Please see: "How can I lose by less than an increment?" on our website. Bids will be accepted in whole dollar amounts only. No "buy" or "unlimited" bids will be accepted.

The following chart governs current bidding increments.

| Current Bid | Bid Increment |
|---|---|
| <$10 | $1 |
| $10 - $29 | $2 |
| $30 - $49 | $3 |
| $50 - $99 | $5 |
| $100 - $199 | $10 |
| $200 - $299 | $20 |
| $300 - $499 | $25 |
| $500 - $999 | $50 |
| $1,000 - $1,999 | $100 |
| $2,000 - $2,999 | $200 |
| $3,000 - $4,999 | $250 |
| $5,000 - $9,999 | $500 |
| $10,000 - $19,999 | $1,000 |
| $20,000 - $29,999 | $2,000 |
| $30,000 - $49,999 | $2,500 |
| $50,000 - $99,999 | $5,000 |
| $100,000 - $199,999 | $10,000 |
| $200,000 - $299,999 | $20,000 |
| $300,000 - $499,999 | $25,000 |
| $500,000 - $999,999 | $50,000 |
| $1,000,000 - $1,999,999 | $100,000 |
| $2,000,000 - $2,999,999 | $200,000 |
| $3,000,000 - $4,999,999 | $250,000 |
| $5,000,000 - $9,999,999 | $500,000 |
| >$10,000,000 | $1,000,000 |

12. If Auctioneer calls for a full increment, a bidder may request Auctioneer to accept a bid at half of the increment ("Cut Bid") only once per lot. After offering a Cut Bid, bidders may continue to participate only at full increments. Off-increment bids may be accepted by the Auctioneer at Signature® Auctions and Grand Format Auctions. If the Auctioneer solicits bids other than the expected increment, these bids will not be considered Cut Bids.

**Conducting the Auction:**

13. Notice of the consignor's liberty to place bids on his lots in the Auction is hereby made in accordance with Article 2 of the Texas Business and Commercial Code. A "Minimum Bid" is an amount below which the lot will not sell. THE CONSIGNOR OF PROPERTY MAY PLACE WRITTEN "Minimum Bids" ON HIS LOTS IN ADVANCE OF THE AUCTION; ON SUCH LOTS, IF THE HAMMER PRICE DOES NOT MEET THE "Minimum Bid", THE CONSIGNOR MAY PAY A REDUCED COMMISSION ON THOSE LOTS. "Minimum Bids" are generally posted online several days prior to the Auction closing. For any successful bid placed by a consignor on his Property on the Auction floor, or by any means during the live session, or after the "Minimum Bid" for an Auction have been posted, we will require the consignor to pay full Buyer's Premium and Seller's Commissions on such lot.
14. The highest qualified Bidder recognized by the Auctioneer shall be the buyer. In the event of any dispute between any Bidders at an Auction, Auctioneer may at his sole discretion reoffer the lot. Auctioneer's decision and declaration of the winning Bidder shall be final and binding upon all Bidders. Bids properly offered, whether by floor Bidder or other means of bidding, may on occasion be missed or go unrecognized; in such cases, the Auctioneer may declare the recognized bid accepted as the winning bid, regardless of whether a competing bid may have been higher.
15. Auctioneer reserves the right to refuse to honor any bid or to limit the amount of any bid, in its sole discretion. A bid is considered not made in "Good Faith" when made by an insolvent or irresponsible person, a person under the age of eighteen, or is not supported by satisfactory credit, collectibles references, or otherwise. Regardless of the disclosure of his identity, any bid by a consignor or his agent on a lot consigned by him is deemed to be made in "Good Faith." Any person apparently appearing on the OFAC list is not eligible to bid.
16. Nominal Bids. The Auctioneer in its sole discretion may reject nominal bids, small opening bids, or very nominal advances. If a lot bearing estimates fails to open for 40–60% of the low estimate, the Auctioneer may pass the item or may place a protective bid on behalf of the consignor.
17. Lots bearing bidding estimates shall open at Auctioneer's discretion (approximately 50% of the low estimate). In the event that no bid meets or exceeds that opening amount, the lot shall pass as unsold.
18. All items are to be purchased per lot as numerically indicated and no lots will be broken. Auctioneer reserves the right to withdraw, prior to the close, any lots from the Auction.
19. Auctioneer reserves the right to rescind the sale in the event of nonpayment, breach of a warranty, disputed ownership, auctioneer's clerical error or omission in exercising bids and reserves, or for any other reason and in Auctioneer's sole discretion. In cases of nonpayment, Auctioneer's election to void a sale does not relieve the Bidder from their obligation to pay Auctioneer its fees (seller's and buyer's premium) and any other damages or expenses pertaining to the lot.
20. Auctioneer occasionally experiences Internet and/or Server service outages, and Auctioneer periodically schedules system downtime for maintenance and other purposes, during which Bidders cannot participate or place bids. If such outages occur, we may at our discretion extend bidding for the Auction. Bidders unable to place their Bids through the Internet are directed to contact Client Services at 1-800-872-6467.
21. The Auctioneer or its affiliates may consign items to be sold in the Auction, and may bid on those lots or any other lots. Auctioneer or affiliates expressly reserve the right to modify any such bids at any time prior to the hammer based upon data made known to the Auctioneer or its affiliates. The Auctioneer may extend advances, guarantees, or loans to certain consignors, and may extend financing or other credits at varying rates to certain Bidders in the auction.
22. The Auctioneer has the right to sell certain unsold items after the close of the Auction. Such lots shall be considered sold during the Auction and all these Terms and Conditions shall apply to such sales including but not limited to the Buyer's Premium, return rights, and disclaimers.

**Payment:**

23. All sales are strictly for cash in United States dollars (including U.S. currency, bank wire, cashier checks, travelers checks, eChecks, and bank money orders, all subject to reporting requirements). All are subject to clearing and funds being received In Auctioneer's account before delivery of the purchases. Auctioneer reserves the right to determine if a check constitutes "good funds" when drawn on a U.S. bank for ten days, and thirty days when drawn on an international bank. Credit Card (Visa or Master Card only) and PayPal payments may be accepted up to $10,000 from non-dealers at the sole discretion of the Auctioneer, subject to the following limitations: a) sales are only to the cardholder, b) purchases are shipped to the cardholder's registered and verified address, c) Auctioneer may pre-approve the cardholder's credit line, d) a credit card transaction may not be used in conjunction with any other financing or extended terms offered by the Auctioneer, and must transact immediately upon invoice presentation, e) rights of return are governed by these Terms and Conditions, which supersede those conditions promulgated by the card issuer, f) floor Bidders must present their card.
24. Payment is due upon closing of the Auction session, or upon presentment of an invoice. Auctioneer reserves the right to void an invoice if payment in full is not received within 7 days after the close of the Auction. In cases of nonpayment, Auctioneer's election to void a sale does not relieve the Bidder from their obligation to pay Auctioneer its fees (seller's and buyer's premium) on the lot and any other damages pertaining to the lot.
25. Lots delivered in the States of Texas, California, or other states where the Auction may be held, are subject to all applicable state and local taxes, unless appropriate permits are on file with Auctioneer. Bidder agrees to pay Auctioneer the actual amount of tax due in the event that sales tax is not properly collected due to: 1) an expired, inaccurate, inappropriate tax certificate or declaration, 2) an incorrect interpretation of the applicable statute, 3) or any other reason. The appropriate form or certificate must be on file at and verified by Auctioneer five days prior to Auction or tax must be paid; only if such form or certificate is received by Auctioneer within 4 days after the Auction can a refund of tax paid be made. Lots from different Auctions may not be aggregated for sales tax purposes.
26. In the event that a Bidder's payment is dishonored upon presentment(s), Bidder shall pay the maximum statutory processing fee set by applicable state law. If you attempt to pay via eCheck and your financial institution denies this transfer from your bank account, or the payment cannot be completed using the selected funding source, you agree to complete payment using your credit card on file.
27. If any Auction invoice submitted by Auctioneer is not paid in full when due, the unpaid balance will bear interest at the highest rate permitted by law from the date of invoice until paid. If the Auctioneer refers any invoice to an attorney for collection, the buyer agrees to pay attorney's fees, court costs, and other collection costs incurred by Auctioneer. If Auctioneer assigns collection to its in-house legal staff, such attorney's time expended on the matter shall be compensated at a rate comparable to the hourly rate of independent attorneys.

28. In the event a successful Bidder fails to pay any amounts due, Auctioneer reserves the right to sell the lot(s) securing the invoice to any underbidders in the Auction that the lot(s) appeared, or at subsequent private or public sale, or relist the lot(s) in a future auction conducted by Auctioneer. A defaulting Bidder agrees to pay for the reasonable costs of resale (including a 10% seller's commission, if consigned to an auction conducted by Auctioneer). The defaulting Bidder is liable to pay any difference between his total original invoice for the lot(s), plus any applicable interest, and the net proceeds for the lot(s) if sold at private sale or the subsequent hammer price of the lot(s) less the 10% seller's commissions, if sold at an Auctioneer's auction
29. Auctioneer reserves the right to require payment in full in good funds before delivery of the merchandise.
30. Auctioneer shall have a lien against the merchandise purchased by the buyer to secure payment of the Auction invoice. Auctioneer is further granted a lien and the right to retain possession of any other property of the buyer then held by the Auctioneer or its affiliates to secure payment of any Auction invoice or any other amounts due the Auctioneer or affiliates from the buyer. With respect to these lien rights, Auctioneer shall have all the rights of a secured creditor under Article 9 of the Texas Uniform Commercial Code, including but not limited to the right of sale. In addition, with respect to payment of the Auction invoice(s), the buyer waives any and all rights of offset he might otherwise have against the Auctioneer and the consignor of the merchandise included on the invoice. If a Bidder owes Auctioneer or its affiliates on any account, Auctioneer and its affiliates shall have the right to offset such unpaid account by any credit balance due Bidder, and it may secure by possessory lien any unpaid amount by any of the Bidder's property in their possession.
31. Title shall not pass to the successful Bidder until all invoices are paid in full. It is the responsibility of the buyer to provide adequate insurance coverage for the items once they have been delivered to a common carrier or third-party shipper.

**Delivery; Shipping; and Handling Charges:**

32. Buyer is liable for shipping and handling. Please refer to Auctioneer's website www.HA.com/common/shipping.php for the latest charges or call Auctioneer. Auctioneer is unable to combine purchases from other auctions or affiliates into one package for shipping purposes. Lots won will be shipped in a commercially reasonable time after payment in good funds for the merchandise and the shipping fees is received or credit extended, except when third-party shipment occurs.
33. Successful international Bidders shall provide written shipping instructions, including specified customs declarations, to the Auctioneer for any lots to be delivered outside of the United States. NOTE: Declaration value shall be the item'(s) hammer price together with its buyer's premium and Auctioneer shall use the correct harmonized code for the lot. Domestic Buyers on lots designated for third-party shipment must designate the common carrier, accept risk of loss, and prepay shipping costs.
34. All shipping charges will be borne by the successful Bidder. Any risk of loss during shipment will be borne by the buyer following Auctioneer's delivery to the designated common carrier or third-party shipper, regardless of domestic or foreign shipment.
35. Due to the nature of some items sold, it shall be the responsibility for the successful bidder to arrange pick-up and shipping through third-parties; as to such items Auctioneer shall have no liability. Failure to pick-up or arrange shipping in a timely fashion (within ten days) shall subject Lots to storage and moving charges, including a $100 administration fee plus $10 daily storage for larger items and $5.00 daily for smaller items (storage fee per item) after 35 days. In the event the Lot is not removed within ninety days, the Lot may be offered for sale to recover any past due storage or moving fees, including a 10% Seller's Commission.
36. The laws of various countries regulate the import or export of certain plant and animal properties, including (but not limited to) items made of (or including) ivory, whalebone, turtleshell, coral, crocodile, or other wildlife. Transport of such lots may require special licenses for export, import, or both. Bidder is responsible for: 1) obtaining all information on such restricted items for both export and import; 2) obtaining all such licenses and/or permits. Delay or failure to obtain any such license or permit does not relieve the buyer of timely compliance with standard payment terms. For further information, please contact Bill Taylor at 800-872-6467 ext. 1280.
37. Any request for shipping verification for undelivered packages must be made within 30 days of shipment by Auctioneer.

**Cataloging, Warranties and Disclaimers:**

38. NO WARRANTY, WHETHER EXPRESSED OR IMPLIED, IS MADE WITH RESPECT TO ANY DESCRIPTION CONTAINED IN THIS AUCTION OR ANY SECOND OPINE. Any description of the items or second opine contained in this Auction is for the sole purpose of identifying the items for those Bidders who do not have the opportunity to view the lots prior to bidding, and no description of items has been made part of the basis of the bargain or has created any express warranty that the goods would conform to any description made by Auctioneer. Color variations can be expected in any electronic or printed imaging, and are not grounds for the return of any lot.
